Notes on components

Developer Studio: Install the release with the same version number as your Platform Services (6.x) installation.

Document Conversion Module: Install the release with the same version number as your Platform Services (6.x) installation. If you are installing CAS 3.0.0 or later, the Document Conversion Module is installed by default.

Workbench is required if you are using CAS Console.

Endeca Mobile Commerce requires the **Content Assembler API for Java** for the runtime environment and uses Workbench with Experience Manager for content configuration.

Sitemap Generator 2.1.x generates sitemaps compatible with URL Optimization API for the RAD Toolkit for ASP.NET 2.1.x using the URL Optimization API for Java 2.1.x.

Notes about .NET compatibility

The **RAD Toolkit for ASP.NET** is tied to a specific version of the Presentation API for ASP.NET and includes the appropriate DLLs in its installation. Use this version of the Presentation API with the RAD Toolkit for ASP.NET. The **Content Assembler API for the RAD Toolkit for ASP.NET** is tied to a specific version of the RAD Toolkit for ASP.NET and include the appropriate RAD Toolkit DLLs in its installation. Use this version of the RAD Toolkit with the Content Assembler API.

RAD Toolkit for ASP.NET and **URL Optimization API for the RAD Toolkit for ASP.NET** are currently not supported with Presentation API 6.1.5. To use the RAD Toolkit with MDEX Engine 6.1.5, use the Platform Services 6.1.1 Presentation API.

MDEX Engine 6.2.1 or 6.2.2 and **Presentation API** 6.2.1 or 6.2.2 are required for the **RAD Toolkit for ASP.NET** 2.1.2 or 2.1.3
