About Currency Transaction Report

This chapter gives an overview of Oracle Financial Services Currency Transaction Reporting application.

This chapter covers the following topics:

- Introduction to Currency Transaction Report
- Logging into Currency Transaction Report
- CTR Menu

Introduction to Currency Transaction Report

As part of Regulations and Compliances, organizations are required to perform appropriate analysis and report any suspicious activities that may lead to fraud or money laundering within the institution to the regulatory authorities. These regulatory bodies are responsible for safeguarding financial institutions and consumers from abuse, providing transparency in the country's financial system, enhancing that country's security, and deterring and detecting criminal activity in the financial system.

Currency Transaction Reporting is a robust solution developed to meet operational and regulatory requirements of the FinCEN (Financial Crimes Enforcement Network). This product helps in minimizing repetitive data entry and supports parallel processing of Currency Transaction Reports. The CTR also helps in reducing the process cycle time using STP (Straight Through Processing) and accommodates FinCEN compliance and real time environmental changes. This product automates the workflow, analysis and report production and offers integration capabilities with internal and external systems thereby improving the operational efficiency.

The CTR supports the e-filing of cash transactions that are greater than \$10,000 or multiple transactions that aggregate to greater than \$10,000. The Currency Transaction Reports are created either at the branches or through the end of day files, where the CTR aggregates multiple transactions performed at the branch, ATMs and Vaults. In addition, this application also captures and reports Monetary Instrument Purchases.

A Currency Transaction Report can be created in following three ways:

- System Generated Currency Transaction Reports
- Manual Creation of Currency Transaction Reports
- Branch Generated Currency Transaction Report

System Generated Currency Transaction Reports

The CTR creates Currency Transaction Reports through batch processing of transaction data.

The following variations are possible for system generated Currency Transaction Reports:

- Currency Transaction Reports created on an exempted entity (Audit Currency Transaction Reports).
- Superseded Currency Transaction Reports in which the activity is the same or subset and the aggregation focus is less preferred to another Currency Transaction Report.
- Currency Transaction Reports that pass the initial validation are created with 'Pending QA Review' status (STP) and Currency Transaction Reports that do not pass initial validation are created with 'New' status.

Manual Creation of Currency Transaction Reports

You can manually create a Currency Transaction Report using the **Create New Report** submenu option from the Currency Transaction Report menu in the CTR. For detailed information about creating a Currency Transaction Report, refer to *“Creating a Currency Transaction Report”*.

Branch Generated Currency Transaction Report

When a CTR is integrated with the Retail Branches, a Currency Transaction Report is generated in the following manner:

1. The branch system identifies an eligible transaction during the teller session and communicates it to the CTR to determine its Exemption status. The CTR returns an appropriate notification to the Teller stating whether a transaction is an exempt transaction or a Currency Transaction Report needs to be created.
2. Subsequently if a Currency Transaction Report is required, the teller enters the Currency Transaction Report data.
3. The CTR will then validate the required fields, and pre-populate the customer/beneficiary information from Currency Transaction Report history files or from Customer Information Systems.

Thus, a branch Currency Transaction Report is generated.

Note: The CTR will have standard work queues, user defined workflow and reporting functionality to manage exceptions, continuous quality reviews, and audits.

Logging into Currency Transaction Report

The following diagram illustrates the workflow of the Exemption:

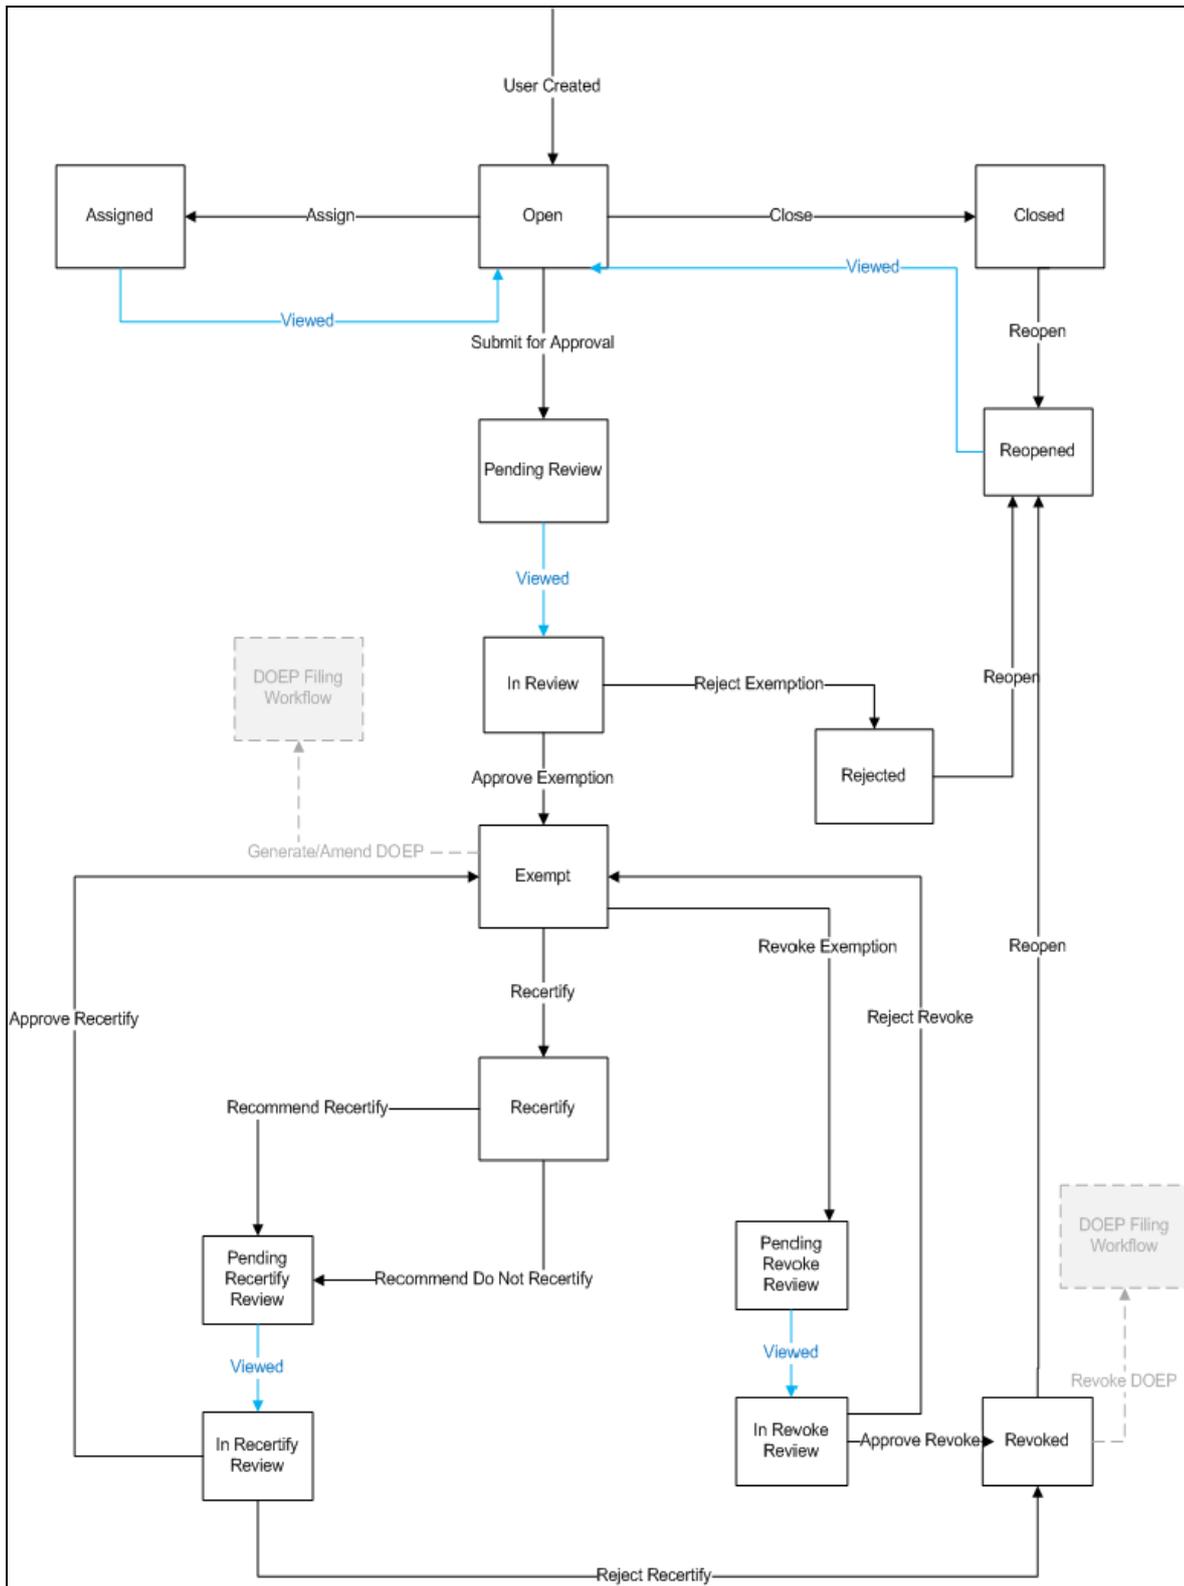

Figure 58. Exemption Workflow

Reassign	An Exemption can be reassigned in the following statuses: <ul style="list-style-type: none">● Open● Pending Review● In- review● Pending Recertify Review● In Recertify Review● Pending Revoke Review● In Revoke Review● Reopened● Reassigned● Recertify Reassign is not possible on an Exemption when its in below status <ul style="list-style-type: none">● Exempt● Revoked● Closed● Rejected
Reopen	The status of an Exemption can be changed to Reopen when its in Rejected, Revoked, and Closed status.
In-review	The status of an Exemption changes to In-review when a Supervisor views an Exemption in Pending Review status.

- When an existing Exemption which goes through yearly recertify process as a result of system triggered/user submitted and get Recertified
- When Revoked/Rejected Exemptions which are Reopened and Exempted again
- When Rejected/Closed Exemption which are reopened and Exempted.

Exempt Date

An Exempt Date is the date on which the entity exempted for filing Currency Transaction Report for the first time.

The following are the scenarios when an exempt date is recorded in the CTR:

- When an Exemption is Recertified (Approve - Recertify) as a result of a system-triggered or user- submitted Recertify action. The exempt date is not changed but the status is changed to Exempt.
- When an Exemption is Reopened from the Rejected or Closed status and exempted for the first time, records the Exempt Date.
- Exemption which is reopened from the Rejected status and if such Exemption had already been approved at least once before, then it gets rejected and does not record an exempt date and gets Exempt status again.

Note: The CTR does not extend the expiration date on the Exemption if the Exempt status has resulted from the Reject Revoke action.

Filing the Exemptions

This section details about the various DOEP and Exemptions statuses, when the Exemptions are approved/Revoked to support DOEP Filing:

Revoked

The status of an Exemption can be changed to Revoked in the following scenarios:

- Revoke action can be taken on Exemption which is in Exempt status however this action results in Pending Revoke Review status. Once supervisor approves the Revoke, (Approve – Revoke) Exemption moves to Revoked status, if supervisor rejects (Reject – Revoke) the Exemptions status changes to Exempt.
- Submit for Revoke action can be taken on Exemption which is in Recertify status however this action results in Pending Recertify Review status. Once the supervisor approves the Reject Recertify Exemption moves to Revoked status, if supervisor Approve Recertify the Exemption is extended for next one year from the date of Approve Recertify action and Exemption status changes to Exempt.
- Exemptions which are in Revoked status can be reopened to reinstate the Exemption.
- CTR expires the Exemptions on the date of expiry irrespective of the status however the Exemption status remains unchanged.

- When the Exemptions status which are in Pending Recertify Review, In Recertify Review, Pending Revoke Review, and In Revoke Review pass the expiry date, the CTR revokes Exemption by clearing the exempt date from the Exemption without changing the status.

Note: For Exemptions that are moved to the Revoked status, the expiration date is cleared.

Recertify

The status of an Exemption can be changed to Recertify in the following scenarios:

- Upon an Exemption record moving to Exempt status the CTR applies an Initiate Recertification Date that is current day + 320 calendar days (45 days prior to yearly review date).

Note: The Initiate Recertification Date range is configurable by clients and can be set for something other than 45 days.

- When a user recertifies (Approve – Recertify) and the status returns to an exempt status and the process repeats (initiate recertification date is reset).
- When a user doesn't recertify (Rejected – Recertify) Exemption status moves to Revoked and initiate recertification and expiration dates are cleared.

Recertify Date

The following are the scenarios when a recertify date is recorded in the CTR:

- Recertify (Last Renewal) date is recorded when an Exemption gets recertified.
- Recertify (Last Renewal) date is not recorded when an Exemption is exempted for the first time.

In Revoke Review

The status of an Exemption can be changed to In-Revoke Review in the following scenarios:

- When a supervisor views an Exemption which is in the status of Pending Revoke Review, the status changes to In Revoke Review. The possible actions on In Revoke Review state are Approve Revoke or Reject Revoke.
- Expire Date is not cleared on the Exemption until an Exemption is in In Revoke Review status. Clearing of Expire Date on Exempt Entity depends on the supervisor action. If a supervisor takes Reject Revoke action Expire Date stays on the Exempt entity as is. In case of Approve Revoke action Expire Date is cleared from the Exemption entity from the immediate effect.

In Recertify Review

The status of an Exemption can be changed to In-Recertify Review in the following scenarios:

- When a supervisor views an Exemption which is in Pending Recertify Review, the status changes to In Recertify Review.
- A supervisor can take Approve Recertify action which change Exemption status to Exempt and can extend the expiry date to next one year from the date of Approve Recertify action.

- Rejected** The status of an Exemption can be changed to Rejected when Exemptions are denied. This status is considered as inactive status of Exemption.
- Pending Revoke Review** The status of an Exemption can be changed to Pending Revoke Review when Submit for Revoke Exemption action is taken on Exemption which is in Exempt status.
- Pending Recertify Review** The status of an Exemption can be changed to Pending Recertify Review when a user takes Submit for Renewal Approval action on the Exemption which is in Recertify status.

Managing Monetary Instrument Transaction (MIT) Log

This feature allows banks to manage MI transactions that they are required to log and have available for review by examiners or audit to verify compliance. A financial institution must maintain a Monetary Instrument Log for five years. Oracle creates the MI log based off of logic that can be found in the CTR TSD. But clients have a need to review the data and possibly add or remove records as well as edit them.

They can then use the Oracle analytic report for generating the MI log if they have access to OBI or implemented the reports. Else they can report using information available when managing the records via this feature.

This chapter provides details to manage the Monetary Instrument Transaction (MIT) Log tab. Users can add, remove, and edit MIT Log data.

This chapter focuses on the following topics:

- Managing Search and List
- Managing MIT Details Page

Managing Search and List

This chapter discusses the following topics:

- Accessing Search and List
- Components of Search and List Page
- Searching MIT log data using Search Components

Accessing Search and List

The Search and List page is available for users with appropriate roles.

To access Search and List, follow these steps:

1. Click **Monetary Instrument Transaction Log** tab in Home page.
