

Oracle® Enterprise Manager Ops Center

Readme

12c Release 1 (12.1.3.0.0)

E25145-07

March 2013

Oracle Enterprise Manager Ops Center Readme includes the following:

- [Prerequisites](#)
- [Installation](#)
- [Upgrade](#)
- [Uninstallation](#)
- [Known Issues](#)
- [References](#)
- [Documentation Accessibility](#)

This Readme file explains how to install and upgrade Oracle Enterprise Manager Ops Center.

Prerequisites

See the *Oracle Enterprise Manager Ops Center Installation Guide for Oracle Solaris Operating System* or the *Oracle Enterprise Manager Ops Center Installation Guide for Linux Operating Systems* for prerequisite information.

These documents can be downloaded from the Oracle Enterprise Manager Ops Center Documentation Library at:

<http://www.oracle.com/pls/topic/lookup?ctx=oc121>

Installation

See the *Oracle Enterprise Manager Ops Center Installation Guide for Oracle Solaris Operating System* or the *Oracle Enterprise Manager Ops Center Installation Guide for Linux Operating Systems* for installation and postinstall configuration instructions.

These documents can be downloaded from the Oracle Enterprise Manager Ops Center Documentation Library at:

<http://www.oracle.com/pls/topic/lookup?ctx=oc121>

Upgrade

See the Upgrading section of the *Oracle Enterprise Manager Ops Center Administration Guide* for upgrade procedures.

This document can be downloaded from the Oracle Enterprise Manager Ops Center Documentation Library at:

<http://www.oracle.com/pls/topic/lookup?ctx=oc121>

Uninstallation

You can uninstall the components of Oracle Enterprise Manager Ops Center. See the Uninstalling and Unconfiguring section of the *Oracle Enterprise Manager Ops Center Administration Guide* for uninstallation procedures.

This document can be downloaded from the Oracle Enterprise Manager Ops Center Documentation Library at:

<http://www.oracle.com/pls/topic/lookup?ctx=oc121>

Known Issues

The following are known installation and upgrade issues in Oracle Enterprise Manager Ops Center. They are grouped into the following categories:

- [Issues With Upgrading to Oracle Solaris 11.1](#)
- [Steps Required to Provision Oracle Solaris 11.1](#)
- [If System/header Is Not Installed But IDR107 Is, Enterprise Controller Installation Fails](#)
- [Upgrade of Zone Still Required After Agent Controller Upgrade](#)
- [Incorrect Agent Controller Status Displayed on Un-upgraded Systems](#)
- [DHCP on Remote Proxy Controller Not Preserved By Upgrade from 11g to 12c](#)

Issues With Upgrading to Oracle Solaris 11.1

Oracle Solaris 11.1 is supported in Oracle Enterprise Manager Ops Center 12.1.2.0.0 or later but is not supported in prior versions of Oracle Enterprise Manager Ops Center.

In addition, an issue with Oracle Solaris 11.1 prevents Oracle VM Server for SPARC management on Oracle SPARC T4 servers using the Oracle Solaris 11.1 OS. Upgrading the OS to SRU 1 or later corrects this issue.

Steps Required to Provision Oracle Solaris 11.1

If you want to provision Oracle Solaris 11.1 in an existing environment, you must verify that your environment meets the requirements. See the *Oracle Enterprise Manager Ops Center Release Notes* for more information.

If System/header Is Not Installed But IDR107 Is, Enterprise Controller Installation Fails

Enterprise Controller installation fails on a SuperCluster with Oracle Solaris 11 with the patch `idr107` installed.

The workaround is to uninstall `idr107`, install `system/header`, and re-install `idr107`. Alternatively, before running the EC installer, if the `idr` is installed and if `system/header` is not already installed, do this:

```
107.3/idr107.3.run set-repo
pkg install /system/header
pkg unset-publisher idr107
rm -r /var/tmp/2012-03-22/idr-install.39869.18111.d
```

Upgrade of Zone Still Required After Agent Controller Upgrade

After upgrading the Enterprise Controller, Proxy Controllers, and Agent Controllers, some non-global zones are not showing as upgraded.

The workaround is to restart the Agent Controller on the non-global zone. Change to the directory containing the agentadm command. On Oracle Solaris systems, this is the /opt/SUNWxvmoc/bin directory. On Linux systems, this is the /opt/sun/xvmoc/bin directory.

```
./agentadm stop
./agentadm start
```

Another workaround is to retry the zone upgrade.

Incorrect Agent Controller Status Displayed on Un-upgraded Systems

After managing an asset with an Agent Controller in a prior version, when the Enterprise Controller has been upgraded, the OS asset summary in the user interface says:

Agent Managed:No

The workaround is to upgrade the Agent Controller, which will cause the correct status to be displayed.

DHCP on Remote Proxy Controller Not Preserved By Upgrade from 11g to 12c

When a Proxy Controller is upgraded from version 11g update 3 to version 12c update 1, the Proxy Controller's DHCP settings are not preserved. A DHCP Configuration job is launched during the Enterprise Controller upgrade, but the configuration changes made by this job are not preserved by the Proxy Controller upgrade.

The workaround is to re-run the DHCP Configuration job after the remote Proxy Controller is upgraded.

References

The following documents are related to installing and upgrading Oracle Enterprise Manager Ops Center 12c Release 1 (12.1.3.0.0).

- *Oracle Enterprise Manager Ops Center Release Notes, 12c Release 1 (12.1.3.0.0)* – The Release Notes document provides instructions on installing or uninstalling the software. It also includes a list of known issues related to installation and upgrade, and postinstallation configuration.
- *Oracle Enterprise Manager Ops Center Installation Guide for Oracle Solaris Operating System, 12c Release 1 (12.1.3.0.0)* – The document provides detailed instructions on performing a fresh installation of Oracle Enterprise Manager Ops Center on Oracle Solaris systems.

- *Oracle Enterprise Manager Ops Center Installation Guide for Linux Operating Systems, 12c Release 1 (12.1.3.0.0)* – The document provides detailed instructions on performing a fresh installation of Oracle Enterprise Manager Ops Center on Oracle Linux or Red Hat Enterprise Linux systems.
- *Oracle Enterprise Manager Ops Center Administration Guide, 12c Release 1 (12.1.3.0.0)* – The document provides instructions on updating and administering Oracle Enterprise Manager Ops Center.
