Type of Deployment	Full Deployment				
Log	Back	Next Exit			

7. Specify the following details:

Admin IP

By default it will display local host and user can not edit it.

Admin Port

Specify port number of weblogic server.

Admin UserName

Specify the appropriate admin username of the weblogic application server.

Admin Password

Specify the appropriate admin password of the weblogic application server.

Type of Deployment

Select 'Full Deployment'.

8. Click 'Test Connection' to test the connection with the application server. On successful connection, the following message will be displayed.

Message		×
i	Connection successful	
	ОК	

9. Click 'OK' and click 'Next' to display the screen below.

5	IP Address	10.184.86.27			
6	Port Number	1522			
7	Service Name	avast1			
8	Initial Capacity	15	•		
Test Connection Save Changes Modify JDBC url					
Log Back Next Exit					

13. Specify the following details

Resource ID

Select the data source needs to get created from the adjoining drop down list.

DataSource Driver

Specify the JDBC driver URL with which the connection is established. Ex: oracle.jdbc.OracleDriver for Non-XA datasources

DataSource Type

Specify the type of datasource that is to be created, XA or Non-XA.

Schema Username

Specify the username of the schema to which the connection is established.

Schema Paasword

Specify the password of the schema.

IP Address:

Specify to provide the host address of the schema.

Port Number

Specify the port number of schema.

Service Name

Specify the schema name.

Initial Capacity

The number of physical connections to create when creating the connection pool in the data source

Maximum Capacity

The maximum number of physical connections that this connection pool can contain.

Capacity Increment

The increment by which this JDBC connection pool's capacity is expanded.

Shrink Frequency

The number of seconds to wait before shrinking a connection pool that has incrementally increased to meet demand.

Connection Reserve Timeout

The number of seconds after which a call to reserve a connection from the connection pool will timeout.

- 14. Click 'Save Changes' to save the values provided In the table against corresponding value of Resource ID.
- 15. Click 'Test Connection' to try to establish connection with required details provided in the table.
- 16. Click on 'Next' to get the following screen.

Modify JDBC URL

- 17. Select 'Modify JDBC URL' for editing the generated URL.
- 18. If 'Modify JDBC URL' is selected, on click of 'Next', the following screen will be displayed.

Soracle FLEXCUBE Universal Installer
