1. Preface

This document describes the steps to create FLEXCUBE IS Function ID using extensible Rapid Application Development (Open Development) tool.

1.1 <u>Audience</u>

The Open Development Function ID Development book is intended for the FLEXCUBE Application Developers who perform the following tasks with Extensible Open Development:

- Develop the new screen (also called as function ID)
- To modify the existing screen
- Bug Fixing the existing screen

To Use this manual, you need conceptual and working knowledge of the below:

Proficiency	Resources
FLEXCUBE IS Development overview	Development Overview Guide
Open Development function ID development getting started	Getting Started
Open Development Reference	Reference
Open Development installation and setup guide	Installation and Setup

1.2 Related documents

For more information on Function ID Development, see these resources:

- Overview Guide
- Getting Started
- Reference
- Installation and Setup

1.3 Conventions

The following text conventions are used in this document:

Convention Meaning:

boldface	Boldface type indicates graphical user interface elements (for example, menus and menu items, buttons, tabs, dialog controls), including options that you select.

italic	italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates language and syntax elements, directory and File name, URLs, text that appears on the screen, or text that you enter.
STOP	Indicates important information

1.4 Pre-request

• Open Development environment with designated project and release details

Pefer Installation and Setup for installation and setup of project/release details

• Target FLEXCUBE IS environment

2. Introduction

2.1 How to use this Guide

The information in this guide includes:

- <u>Chapter 2, "Introduction"</u>
 This is introduction section.
- <u>Chapter 3, "Manual Static data population"</u> This section describes the prerequisites before creating a Function Id.
- <u>Chapter 4, "Header Information"</u> This section describes the Header Credentials in detail.
- <u>Chapter 5, "Preferences"</u>
 This section describes basic functionalities and information about the screen.
- <u>Chapter 6, "Datasources"</u>
 This section describes the steps required to get started with Function Creation.
- <u>Chapter 7, "List of Values"</u>
 This section describes steps to add List Of Values definitions.
- <u>Chapter 8, "Datablocks"</u> This section describes the actions to be performed after adding Datasources.
- <u>Chapter 9, "Screen Layout Design"</u>
 This section describes the steps required to design the Screen Layout.
- <u>Chapter 10, "Fieldsets"</u>

This section describes the steps required to map the Fields to specific locations in the Screen.

- <u>Chapter 11, "Actions"</u>
 This section describes the amendable and web service information.
- <u>Chapter 12, "Summary"</u> This section describes the steps to design the Summary Screen.
- <u>Chapter 13, "Open Development Tool Files Generation"</u> This section describes steps to generate and deploy Open Development Tool Files.
- <u>Chapter 14, "Testing"</u>
 This section describes steps to Test the created Screen in FLEXCUBE.

3. Manual Static data population

This section explains the data base tables that need to be manually populated to start the Open Development screen development.

3.1 CSTB_DATA_DICTIONARY maintenance

Add rows in CSTB_DATA_DICTIONARY for Table/View and columns.

Column Name	Data Type	Data Length	Constraints
TABLE_NAME	VARCHAR2	50	PRIMARY
COLUMN_NAME	VARCHAR2	50	PRIMARY
LABEL_CODE	VARCHAR2	255	
FIELD_NAME	VARCHAR2	255	

3.2 CSTB_LABELS maintenance

Add rows in CSTB_LABELS for all label code required.

Column Name	Data Type	Data Length	Constraints
LABEL_CODE	VARCHAR2	255	PRIMARY
LANGUAGE_CODE	VARCHAR2	3	
LABEL_TYPE	VARCHAR2	20	
LABEL_DESCRIPTION	VARCHAR2	4000	

3.3 <u>STTB_PK_COLS maintenance</u>

Add rows in STTB_PK_COLS for tables that are part of data sources.

Column Name	Data Type	Data Length	Constraints
TABLE_NAME	VARCHAR2	30	PRIMARY
COLUMN_LIST	VARCHAR2	300	
DATA_TYPE_LIST	VARCHAR2	300	
DATA_LENGTH_LIST	VARCHAR2	100	

3.4 Table needs to be created in the database schema.

Database schema that is linked with the flexcube should contain the table or view structure. This will act as the data source to the screen.

4. Header Information –Basic Information about the Screen

Log into the Open Development Tool and click on Browser Tab. Then click on the Function Generation tab that appears on the left hand side.

4.1 <u>Action</u>

A header appears where the "New" option is chosen from the Action options. The Function-id is to be entered in the space just below.

4.2 Function Type

Select Function Type -Parent

On pressing enter, the details of the tables are seen. The details listed in the Keys Tab under the column labeled as "Columns" are typed in the Open Development Tool where the PK Cols details are needed. The entries are given separated by ~ symbol.

For our example, the PK Cols Details are written as:

CIFNUMBER~LOCATION~MEDIA~AUTH_STAT~

🖀 PL/SQL Developer - FCISDISTUT5@KERDEV2 - [Edit table STTMCUSTOMERADDRESSTBL]	- 7 🗙

	>
	10mm 801
C EIL C EILER LOSS EILE LO	VIEW SQL

Now click on the Columns Tab. The Types column is looked up for the entries corresponding to the PK Cols details filled.

In our example, the Type corresponding to CIFNUMBER,LOCATION,MEDIA,AUTH_STAT is VARCHAR2. Thus the entry into the PK Types details for this table is:

VARCHAR2

In case block for Detail Data sources, the Relation Type is to be changed to "One to Many"

Multi record option is made "Yes ", Parent field should be maintained and Master block should be "NO".

- The columns that were added in the datasources in our earlier step will now have to be added in the corresponding datablock as well by right-clicking on the already added datablock and then pressing "Add".
- The column name is typed into the field name and we click on the corresponding space for Label Code to fill all the entries for the row. We the click the check boxes then click "OK" in the screen below.

11. Actions

This is the place where amendable information and web services information is captured in Open Development Tool.

For maintenance type of function system enables the below action codes only:

- QUERY
- NEW
- MODIFY
- AUTHORIZE
- DELETE
- CLOSE
- REOPEN

For transaction Screens all the action would be enabled

12. Summary

- In Open Development Tool, the summary screen is created using the summary option on the left side of the screen.
- The datablock, the datasource and other details are filled and then the necessary fields are taken into the right side.
- Please ensure that the primary key of the Data source must be queried.
- Multi Branch Where Clause is for querying multi branch screens.
