1.1. CM08 - Card-Account Product Link Setup

Using this option, the bank can link different account products to a card product. You can setup a card product using the **Card Master Setup** (Fast Path: CM07) option.

Once the card products are defined, that needs to be linked with the account products. After the accounts are opened under these products, the card details can be maintained using the **Card Maintenance** option. The account product which is attached to the card product can be either with the card facility or you can select the **ATM** check box in the **External Bank Facility** section in the **Account Details 2** tab in **Account Master Maintenance** (Fast Path: CH021) option

Definition Prerequisites

- [CM07 - Card Master Setup](#)
- Account Product Definition

Modes Available

Add, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To link a card product to a account product

1. Type the fast path **CM08** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Card-Account Product Link Setup**.
2. The system displays the **Card-Account Product Link Setup** screen.

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria to search for the customer from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> Customer short name: The short name of the customer. Customer IC: The identification criteria (IC) arrived at by the bank during customer addition. Customer ID: The unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their</p>

respective criteria. Choose the appropriate customer from the existing customer list.

For example, if the customer's short name is George Abraham. One can search the above customer by entering Geo in the **Search String** field.

Cust IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and the customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

[Display]

This field displays the short name of the branch, where the customers account is opened.

The customer signature record and the other customer papers are kept in this branch.

These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name

[Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Card Issue Mode

[Mandatory, Radio Button]

Select the appropriate card issue mode.

The options are:

- **Online:** It allows the user to issue the card in online mode. In online mode the card number needs to be specified.
- **Batch:** It allows the user to issue card in batch mode. In batch mode, a request reference number is generated and displayed

in the card number field

Card Product	<p>[Conditional, Pick List]</p> <p>This field displays the card product.</p> <p>If the card is to be issued, select the card product from the pick list.</p>
Card No	<p>[Mandatory, Numeric, 20]</p> <p>Select the card number from the pick list.</p> <p>In online issuing mode the card number is mandatory and will be validated against the branch inventory.</p>
Old Card No	<p>[Conditional, Pick List]</p> <p>Select the old card number from the pick list.</p> <p>In case of reissue, an old card number is mandatory and the card status will be validated for Lost or Damaged status.</p>
Actions	
Reissue	<p>[Optional, Check Box]</p> <p>Select the Reissue check box to reissue a card.</p> <p>The Card Product field gets disabled if this check box is selected.</p>

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Type the search string and press the **<Tab>** key.
6. Select the card product from the pick list.

Field Description

Field Name

Description

Search Criteria 1

[Mandatory, Drop-Down]

Select the search criteria to search for the customer from the drop-down list.

The options are:

- Customer IC (Complete Match): The identification criteria (IC) arrived at by the bank during customer addition.
- Katakana/Kanji Name (Complete Match): The entered name will be checked in the NLS master full name. A complete match of full name is Katakana/Kanji name.
- Katakana/Kanji Name (Wildcard Match): The entered name will be checked in the NLS master full name. A wildcard match of full name is Katakana/Kanji Name.
- Katakana (Single Byte): The entered name will be checked in the customer master. A single byte match of full name is Katakana name.

Search String 1

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria 1** field.

Search Criteria 2

[Optional, Drop-Down]

Select the search criteria to search for the customer from the drop-down list.

The options are:

- Date of Birth (YYYYMMDD) (Complete Match)
- Mobile No (Wildcard Match)
- Home Phone (Wildcard Match)

Search String 2

[Mandatory, Pick List]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria 2** field.

IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

[Display]

This field displays the short name of the branch, where the customer's account is opened.

The customer signature record and the other customer papers will be kept in this branch.

These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name

[Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

Kana Name	<p>[Display]</p> <p>This field displays the kana name of the customer for whom the card is maintained.</p>
Kanji Name	<p>[Display]</p> <p>This field displays the kanji name of the customer for whom the card is maintained.</p>
Home Phone	<p>[Display]</p> <p>This field displays the home phone number of the customer for whom the card is maintained.</p>
Mobile phone	<p>[Display]</p> <p>This field displays the mobile phone number of the customer for whom the card is maintained.</p>
Date of Birth	<p>[Display]</p> <p>This field displays the birth date of the customer for whom the card is maintained.</p>
Online	<p>[Mandatory, Radio Button]</p> <p>Click Online to issue a card in an online mode.</p> <p>In the online mode the card number needs to be specified.</p>
Batch	<p>[Mandatory, Radio Button]</p> <p>Click Batch to issue a card in the batch mode.</p> <p>In the batch mode a request reference number will be generated and displayed in the Card No field.</p>
Card Product	<p>[Display]</p> <p>This field displays the card product.</p> <p>If the card is to be issued, select the card product from the pick list.</p>
Card No	<p>[Mandatory, Pick List]</p> <p>Select the card number from the pick list.</p> <p>In online issuing mode the card number is mandatory and will be validated against the branch inventory.</p>
Postal Matter Code	<p>[Optional, Drop-Down]</p> <p>Select the code relating to the issued card from the drop-down list.</p> <p>The printing material, like mail receipt confirmation number, will be sent by the printing company along with the re-issued card for ensuring proper delivery.</p>
Reissue	<p>[Optional, Check Box]</p> <p>Select the Reissue check box to reissue a card.</p>
Old Card No	<p>[Conditional, Pick List]</p>

Select the old card number from the pick list.

In case of reissue, an old card number is mandatory.

Assign Same ContractNo

[Optional, Check Box]

Select the **Assign Same ContractNo** check box to have the same contract number on the new card.

If the check box is not selected then the system will generate the new contract number.

The user will be allowed to login in MB, IB, or TB if same contract number is assigned. However, the random number will not be the same. Hence, random number authentication pending transaction will not be allowed.

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Type the search string and press the **<Tab>** key.
6. Select the card product from the pick list.
7. Enter the other relevant information.

Field Description

Field Name	Description
Embossed Name	[Mandatory, Alphanumeric, 120] Type the name that will appear on the issued card.
Card Status	[Display] This field displays the current status of the card.
Language	[Mandatory, Drop-Down] Select the language in which the card is maintained from the drop-down list. The options are: <ul style="list-style-type: none"> English Chinese
Issue Date	[Mandatory, Pick List, DD/MM/YYYY] Select the date on which the card is issued from the pick list.

Expiry Date	[Mandatory, Pick List, DD/MM/YYYY] Select the expiry date of card after which the card cannot be used from the pick list.
Remarks	[Mandatory, Alphanumeric, 120] Type the remarks for the transaction.

Column Name	Description
Account Linked	
Account No.	[Display] This column displays the account number belonging to the selected customer and will be associated with the card to be issued.
Product Name	[Display] This column displays the product to which this account belongs.
Account Title	[Display] This column displays the title given for the account number.
Account Relation	[Display] This column displays the relation of selected customer to the account.
Default (Y/N)	[Display] This column displays whether the account is primary account number. By default, it is displayed as Y.
Link (Y/N)	[Display] This column displays the link status. By default, it is displayed as Y.

Card Status History

Remarks

[Display]

This column displays the remark for the maintained card.

9. Click the **Ok** button.
10. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
11. The card maintenance details are added once the record is authorized.

1.6. CMS01 - Card Maintenance

Using this option, card details like embossed name, issue date, expiry date etc. are maintained .The bank can reissue a card in a batch or an online mode. Whenever there is a reissue the system generates the card number.

The card details tab allows you to link the primary account number and the default account number to the card and also modify the existing account linkage of a card.

Definition Prerequisites

- Customer Definition
- Card Product Definition
- Card account linkage definition (for modification)

Other Prerequisites

Not Applicable

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add card details

1. Type the fast path **CMS01** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Card Maintenance**.
2. The system displays the **Card Maintenance** screen.

Card Activation

1.8. CM03 - Card Status Change

Using this option the bank can change the status of a card as per the functional requirement. The bank may receive a customer request to block an issued card due to theft/lost/damage. Once the card is found and customer requests for activation the same is also facilitated in this maintenance. The various card status are available with the user :

- Active
- Lost
- Unblock
- Generated
- Mailed
- Blocked

Note: Cards having current status as active and generated are only allowed to change status. The new status can be changed to lost, damaged and mailed.

Definition Prerequisites

- [8053 - Customer Addition](#)
- [CM01 - Card Maintenance](#)

Modes Available

Modify, Cancel, Amend, Authorize. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify the card status

1. Type the fast path **CM03** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Card Status Change**.
2. The system displays the **Card Status Change** screen.

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria to search for the customer from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> Customer short name: The short name of the customer. Customer IC: The identification criteria (IC) arrived at by the bank during customer addition. Customer ID: The unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their</p>

respective criteria. Choose the appropriate customer from the existing customer list.

For example, if the customer's short name is George Abraham. One can search the above customer by entering Geo in the **Search String** field.

IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and the customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

[Display]

This field displays the short name of the branch, where the customer's account is opened.

The customer signature record and the other customer papers are kept in this branch.

These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name

[Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Card No

[Mandatory, Pick List]

Select the number of the card whose status has to be changed from the pick list.

Current Status

[Display]

This field displays the current status of the selected card.

New Status

[Mandatory, Drop Down]

Select the new status for the card from the drop-down list.

Comments

[Optional, Pick List]

Select the reason for changing the card status from the pick list.

The user can also enter the comments.

3. Click the **Modify** button.
4. Select the search criteria from the drop-down list.
5. Enter the search string and press the **<Tab>** key.
6. Select the customer from the pick list.

1.13. CM13 - Card - Multi Currency Account Linkage

Using this option card can be linked or delinked to an MCA. One MCA can be linked to ten cards at a time. One card can also be linked to multiple MCA of same module but different Business types. This option also allows re-issuance of debit card to the MCA. For re-issuance of debit card enter the currently linked debit card number based on which the status of the debit card will be displayed.

Definition Prerequisites

- The maintenance screen of card and MCA

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To link or delink the card with the MCA

1. Type the fast path **CM13** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Card - Muti Currency Account Linkage**.
2. The system displays the **Card - Muti Currency Account Linkage** screen.
