# 1. Master Maintenance

# 1.1. BIM04-Bill Parameters Maintenance\*

Using this option you can define various bill-related parameters for a bank. The bank can define the contingent general ledger codes used for passing the contingent general ledger entries for bills at the time of lodging, dispatch and realization.

The system function, which is used for calculation of the drawing power and the collateral term validity parameters, can also be defined in this option.

### **Definition Prerequisites**

- BAM20 Bank code Maintenance
- GLM02 Chart of Accounts

### Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

### To modify bill parameters

- 1. Type the fast path **BIM04** and click **Go** or navigate through the menus to **Global Definitions > Master > Bill Parameters Maintenance**.
- 2. The system displays the Bill Parameters Maintenance screen.

### **Bill Parameters Maintenance**

Field Name	Description
Bank Code	[Mandatory, Pick List] Select the branch code, for which the bill parameters are to be defined, from the pick list. The pick list displays only the authorised bank codes.
Bank Name	[Display] This field displays the name of the bank code selected in the corresponding field.
Bill Bank Parameters	;
GL for bills held under vault Dr	[Mandatory, Numeric, Nine] Type the GL code of the bills held under the debit vault.
GL for bills held under vault Cr	[Mandatory, Numeric, Nine] Type the GL code of the bills held under the credit vault.
GL for Customer Portfolio Dr	[Mandatory, Numeric, Nine] Type the GL code of the customer portfolio under debit.
GL for Customer Portfolio Cr	[Mandatory, Numeric, Nine] Type the GL code of the customer portfolio under credit.
GL for non- Customer Portfolio Dr	[Mandatory, Numeric, Nine] Type the GL code of a non-customer portfolio under debit.
GL for non- Customer Portfolio Cr	[Mandatory, Numeric, Nine] Type the GL code for a non-customer portfolio under credit.
Collateral term validity (In Days)	[Mandatory, Numeric, Five] Type the validity of the collateral term. The validity is measured in terms of days. A bill can be pledged as collateral to a bank if the period between lodging the bills and its maturity date is equal to or less than the specified collateral term value.
Drawing power calculation routine	[Mandatory, Alphanumeric, 120] Type the drawing power function defined in the system, on the basis of which the bank will calculate the drawing power.

- 3. Click the **Modify** button.
- 4. Type the bank code and press the **<Tab>** key or select it from the pick list.
- 5. Modify the relevant information.

- 7. The system displays the message "Record Modified..Authorisation Pending...". Click the **Ok** button.
- 8. The bill parameters are modified once the record is authorised.

**Note**: The customer portfolio GL's are used if the outward bills are lodged and non-customer portfolios are used if the inward bills are lodged.

# 1.2. BIM02-Court Master Maintenance

Using this option, you define a unique court code for various courts across the country where the bills will be sent for resolution , if the bills are not honored by the drawee

The bank can initiate legal proceedings in such cases.Using the **Branch-Court Cross Reference Maintenance** (Fast Path: BIM03) option, the bank can link a court code to a brace code.

#### **Definition Prerequisites**

• GLM02 - GL chart of accounts

#### Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

#### To add a court code details

- 1. Type the fast path **BIM02** and click **Go** or navigate through the menus to **Global Definitions > Master > Court Master Maintenance**.
- 2. The system displays the Court Master Maintenance screen.

### **Court Master Maintenance**

# 1.3. BIM03-Branch-Court Cross Reference Maintenance\*

The payee can decide if the bank should initiate court proceedings to recover a bill, which the drawer does not pay after the grace period.

The lodging of these proceedings is Protest.Branch can specify the unpaid bills that are to be sent to court for collection.

Using this option, the bank can link a court code to a branch code. Only one court can be linked to a branch. At the time of protest, the general ledger entries are passed to the general ledgers defined for the linked court.

### **Definition Prerequisites**

- BAM17 Branch Type Maintenance
- BIM02 Court Master Maintenance

### Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

#### To modify account restriction

- 1. Type the fast path **BIM03** and click **Go** or navigate through the menus to **Global Definitions > Master > Branch-Court Cross Reference Maintenance**.
- 2. The system displays the Branch-Court Cross Reference Maintenance screen.

### **Branch-Court Cross Reference Maintenance**

Field Name	Description
Branch Code	[Mandatory, Pick List] Select the branch code from the pick list. The pick list lists only the authorised bank codes.

- 8. The branch court cross details are added once the record is authorised.

# 1.4. BIM01 - Drawee Risk Card Maintenance

Using this option you can track certain information of the drawee customer.

The banks can pledge the bills, which are sent for collection as security, against an overdraft limit set up for its drawee. Before setting up the limit, the bank conducts an intensive investigation against the drawee and captures the various details of the drawee's business and credit worth.

The details are captured against a risk card number allocated to each drawee, and a limit is allocated against the risk card number for a defined period.

### **Definition Prerequisites**

• BAM17 - Branch Type Maintenance

#### Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

#### To add credibility details of drawee

- 1. Type the fast path **BIM01** and click **Go** or navigate through the menus to **Global Definitions > Master > Drawee Risk Card Maintenance**.
- 2. The system displays the Drawee Risk Card Maintenance screen.

Issuance Source Name :		GS	Er	d Date of Risk Card:	12/08/2008	

Field Name	Description
Share Capital (in	[Mandatory, Numeric, 13, Two]
lcy)	Type the working capital of the drawee.
	This amount is calculated in the local currency of the bank.
	The share capital is the primary factor used to calculate the overdraft limit for a payee, who is pledging the bills against the given drawee.
Bill Used Value	[Display]
	This field displays the value used for the bill.
Bank's Max	[Mandatory, Numeric, Three, Five]
Exposure to Drawee: [in %]	Type the maximum exposure percentage.
	This limit is calculated as a percentage of the share capital and is set up by the bank based on the drawee's creditworthiness. The limit is validated against the overdraft facility given to the payee.

Field Name	Description		
Issuance Date of IC	[Mandatory, Pick List, dd/mm/yyyy]		
	Select the issuance date of the IC from the pick list.		
OD Limit Max	[Mandatory, Numeric, Three, Five]		
Exposure to Drawee: [in %]	Type the additional limit set up by the bank for the same customer.		
	This sub limit is used for validation against a payee at the given time. The percentage of OD limit that can be exposed for this drawee is named as Drawee's total exposure allowed.		
Date of Expiry of IC	[Mandatory, Pick List, dd/mm/yyyy]		
	Select the expiry date of IC from the pick list.		
Drawee Business	[Mandatory, Alphanumeric, 14]		
Credit Rating	Type the business credit rating of the drawee.		
	The bank's business credit rating can be updated on a periodic basis based on the drawee's business performance.		
No. of Protest	[Mandatory, Numeric, Three]		
Lodged	Type the number of times for which the bill was not honored by the customer and sent to the court for protest.		
	If a drawee's bills have been protested in the court, the bank may not accept bills from the drawee as a collateral.		
<b>Risk Card Status</b>	[Mandatory, Drop-Down]		
	Select the risk card status from the drop-down list.		
	The options are:		
	<ul> <li>Regular- This status is defined for a drawee after the start date of the limit.</li> </ul>		
	<ul> <li>Under Investigation- This status is defined if the drawee's portfolio is under investigation.</li> </ul>		
	<ul> <li>Expired- This status is defined for a drawee after the expiry date of the limit.</li> </ul>		
	<ul> <li>Limits can only be provided for a drawee with risk card status as Regular.</li> </ul>		
Start Date of Risk	[Mandatory, Pick List, dd/mm/yyyy]		
Card	Select the start date of the risk card maintenance from the pick list.		
	This date should be the current process date or a future date.		
Issuance Source	[Mandatory, Alphanumeric, 40]		
Name	Type the name of the issuance source.		
	This is the agency appointed by the bank to track the drawee's business credit rating.		

Field Name	Description
End Date of Risk Card	[Mandatory, Pick List, dd/mm/yyyy]
	Select the expiry date of the risk card maintenance from the pick list.
	The investigation department conducts a review for an extension of the end date depending on the customer's credit worthiness.

Select the account type, from the drop-down list.	
The options are:	
• CASA	
• GL	
This field is enabled if the <b>Outward Bills</b> option is selected <b>Batch Type</b> field.	in the
A/C No. [Mandatory, Numeric, 16]	
Type the CASA or GL account number.	
This field depends up on options selected in A/C Type field	
A/C Name [Display]	
This field displays the account holders name based on the account number.	
In case the account type is GL then the GL description is populated.	

Field Name	Description
Bank Code	[Mandatory, Pick List] Select the bank code if the bill is an inward bill for collection, from the pick list.
Branch	[Mandatory, Pick List] Select the branch code if bill is an inward bill for collection from the pick list.
Benef Name	[Mandatory, Alphanumeric, 40]
	Type the beneficiary name, if applicable.
A/C Ccy	[Mandatory, Drop-Down]
	Select the account currency from the drop-down list.
	If the beneficiary is a CASA account the account currency is defaulted. If the beneficiary is a GL account, you need to select the GL account currency.
	Note: The CASA or the GL account currency should be the same as the bill currency.
Batch Date	[Mandatory, Pick List, dd/mm/yyyy]
	Select the batch date from the pick list.
	By default, the system displays the current process date. The batch date can also be backdated.
Status	[Display]
	This field displays the status of the bill batch data entry.
3. Select the <b>Open</b>	Batch option from the Operation drop-down list.

- 4. Select the batch type from the drop-down list.
- 5. Select the account number, branch and the batch date from the pick list.

Field Name	Description
Bill Details	
Srl No	[Display]
	This field displays the running serial number as generated by the system.
	This number indicates the chronology of the bill within a batch.
Ref No.	[Mandatory, Numeric, 16]
	This field displays the bill reference number as generated by the system.
	This is the portfolio number followed by the serial number of the bill in the batch.

Field Name	Description	
Туре	[Mandatory, Drop-Down] Select the type of the bill from the drop-down list.	
	The options are:	
	<ul> <li>Local PDC – Post Dated Cheque which is drawn in local clearing</li> </ul>	
	Outstation PDC	
	Trade Bills	
	Note: All types of bills can be clubbed into a single batch for Outward Bill collection. But in case of an Inward Bill collection only trade bills will be accepted.	
Amount	[Mandatory, Numeric, 20]	
	Type the amount of the bill.	
	<b>Note</b> : The bill amount currency and the account currency must be same.	
Doc No.	[Mandatory, Numeric, 12]	
	Type the bill number as displayed on the physical instrument.	
Usage	[Mandatory, Drop-Down]	
	Select the purpose of the bill from the drop-down list.	
	The options are:	
	Collection	
	Collateral	
Bill Date	[Mandatory, Pick List, dd/mm/yyyy]	
	Select the bill date from the pick list.	
	In case of post dated cheques, this will be the date on the instrument.	
Maturity Date	[Mandatory, Pick List, dd/mm/yyyy]	
	Select the maturity date of the bill from the pick list.	
	In case of local post dated cheques, date will be calculated by the system based on the clearing type and float days set up for the clearing type.	

Field Name	Description
Payment Type	[Mandatory, Drop-Down]
	Select the option in which the payee would like to accept the payment for the bill from the drop-down list.
	The options are:
	• Cash
	Savings Account
	Bankers Cheque
	Demand Draft
Protest	[Optional, Check Box]
	Select the <b>Protest</b> checkbox if the bill should be protested if it is not honored.
	If the bill is unpaid, whether it should be protested in the court of law is specified here.
	<b>Note</b> : By default the check box is selected for collateral type bills.
Grace Type	[Mandatory, Drop-Down]
	Select the grace days after which protest should be lodged from the drop-down list.
	The options are:
	<ul> <li>Maturity: Bill will be protested after the specified grace period days from the maturity date.</li> </ul>
	<ul> <li>Dispatch: Bill will be protested after the specified grace period days from the dispatched date.</li> </ul>
	<ul> <li>Lodging: Bill will be protested after the specified grace period days from the bill lodging date.</li> </ul>
Grace Period	[Mandatory, Numeric, Three]
	Type the number of grace period days after which the bill will be protested, if not honored.
Routing No	[Mandatory, Numeric, Nine]
C C	Type the routing number of the destination bank.
	In case of outstation PDC and Trade bills, this bank and branch should be set up as a correspondent bank. In case of local PDC it should be a valid branch set up in routing branch master.
Bank	[Display]
	This field displays the bank code which is populated on entering the routing number.
Branch	[Display]
	This field displays the branch code which is populated on entering the routing number.

	Description
Sector	[Display]
	This field displays the sector code which is populated on entering the routing number.
Instructions	[Optional, Alphanumeric, 240]
	Type the bill specific instructions, if any.
Nominee	[Optional, Alphanumeric, 40]
	Type the name of the bill nominee, if any.
Cheque Details	
Clearing Type	[Conditional, Drop-Down]
	Select the cheque clearing type from the drop-down list.
	This field is enabled only if the bill is a local post dated cheque and its purpose is clearing.
Cheque Literal	[Conditional, Drop-Down]
	Select the cheque literal from the drop-down list.
	This field is enabled only if the bill is a local post-dated cheque and its purpose is clearing.
Collateral Details	
Туре	[Conditional, Drop-Down]
	Select the type of bill from the drop-down list.
	This field in enabled if the bill is collateral.
	The options are:
	<ul> <li>Regular: The bill is in a regular status and can be pledged as collateral.</li> </ul>
	<ul> <li>Waiting: The bill cannot be used as collateral presently but can be used at a later date.</li> </ul>
	<ul> <li>Investigation: The bill's drawer is under investigation so it cannot be accepted as collateral.</li> </ul>
	<ul> <li>Non Collateral: The bill cannot be accepted as collateral for some specific reason.</li> </ul>
Code	[Mandatory, Pick List]
	Select the collateral code from the pick list.
	The list contains the applicable collaterals for the product of beneficiary account in case the bill is a regular type collateral.
A/C Limit No	[Mandatory, Pick List]
	Select the limit number of the beneficiary account to which the bill collateral has to be linked from the pick list.

Field Name	Description
Risk Card No	[Mandatory, Pick List]
	Select the drawee risk card number maintained by the bank for the drawee from the pick list.
	The drawee of the bill should be a valid risk card holder.

# 2.2. BIM05 - Bills Processing Maintenance\*

Using this option you can track and update the bill status throughout its life cycle. The option facilitates the bill inquiry and enables you to modify the bill details after the bills are deposited into the system. The system provides details on the following:

- Bills
- Collaterals
- Drawee particulars
- Cheque & Service charge.

### **Definition Prerequisites**

- BAM17 Branch Type Maintenance
- BAM20 Bank Codes Maintenance
- BAM97 Currency Codes Cross Reference
- BAM14 Rewards and Service Charge definition
- BIM01 Drawee Risk Card Maintenance
- BAM39 Collateral Codes Maintenance
- STM59 Settlement Bank Parameters
- BI001 Bills Data Entry

### Modes Available

Not Applicable

### To modify the bill details

- 1. Type the fast path **BIM05** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Data Entry > Bills Processing Maintenance**.
- 2. The system displays the **Bills Processing Maintenance** screen.

## **Field Description**

Field Name	Description
<b>Collection Details</b>	
Bill Document No	[Display]
	This field displays the bill number as it will appear on the physical instrument.
Bill Status	[Display]
	This field displays the current status or position of the bill.
	The options can be Realised, Part Realised, Dishonored, Protested, etc.
	You can modify the bill status when you inquire for a bill by choosing the <b>Modification</b> option in the <b>Collection Option</b> field.

Field Name	Description
Bill Usage	[Display]
	This field displays the purpose of the bill, i.e., whether it is a collection or to be pledged as collateral.
	You can modify the bill usage when you inquire for a bill by choosing the <b>Modification</b> option in the <b>Collection Option</b> field.
Routing No	[Display]
	This field displays the routing number against which the cheque has been drawn.
	The routing number is a combination of the bank code and the branch code.
	The combination can be obtained from the <b>Routing Branch</b> Maintenance (Fast Path: STM54) option.
	Routing Number = Sector Code / Bank Code + Branch Code
	For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.
	For an inward clearing cheque, this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up using the <b>Settlement Bank Parameter</b> s option.
	The system may not allow a bank's own cheques to be deposited, thus encouraging the internal bank transactions to be done through transfer of funds. This feature is bank configurable
	You can modify the routing number when you inquire for a bill by choosing the <b>Modification</b> option in the <b>Collection Option</b> field.
Bill Date	[Display]
	This field displays the bill date as it will appear on the physical instrument.
Maturity Date	[Display]
