Query

1. Query

1.1. CLN50 - Search*

Using this option the collector can search the cases on different criteria's. The various search criteria's are customer short name, customer IC and customer ID. The system displays the account number and the name. Using the **Follow-Up Query** (Fast Path: CLN55) option, the collectors can follow up the accounts which are displayed at different priority level.

Definition Prerequisites

- 8053 Customer Opening
- Accounts to be opened for the customers.

Modes Available

Not Applicable

To search the customer

- 1. Type the fast path CLN50 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Query > Search.
- 2. The system displays the **Search** screen.

Search

Search		
Search Criteria : Search String : Cust ID : Customer Accounts	Name :	
		Clear Close

Field Name	Description
Search Criteria	[Mandatory, Drop-Down]
	Select the search criteria from the drop-down list.
	It is the selection criteria for the account to be searched.
	The options are:
	Customer Short Name
	Customer Ic
	Customer Id
Search String	[Mandatory, Alphanumeric, 30]
	Type the value according to the search criteria selected in the corresponding field.
Cust ID	[Display]
	This field displays the customer ID.
	It is ID of the selected customer.
Name	[Display]
	This field displays the name of the selected customer.
Customer Accounts	
Account #	[Display]
	This field displays the account number of the customer.
Name	[Display]
	This field displays the name of the customer to whom the account belongs.
3. Select the search	criteria from the drop down list.

- 4. Enter the search string and press the **<Tab>** key.
- 5. The system displays the records based on the search criteria.

Search

Search		
Search Criteria : Customer Id Search String : 603733 Cust ID : 6003733	Name : RAMA K P	
Customer Accounts		
	Ассоипt # Name 099995410007733 [RAMA К Р 09995410007337 [RAMA К Р	
		Clear Close

- 6. Select the appropriate record.
- 7. Click the **Close** button.

1.2. CLN55 - Follow-Up Query*

Using this option collector can decide on the priority to follow up the cases in this mode. It displays all the cases assigned to a collector. All the accounts of the login collectors are displayed in red, green and yellow color.

Red color indicates accounts to be followed up for the day and not yet followed up. Green colour indicates accounts to be followed up for the day and followed up. Yellow color indicates accounts of future dates.

Definition Prerequisites

· Collector should have open cases assigned

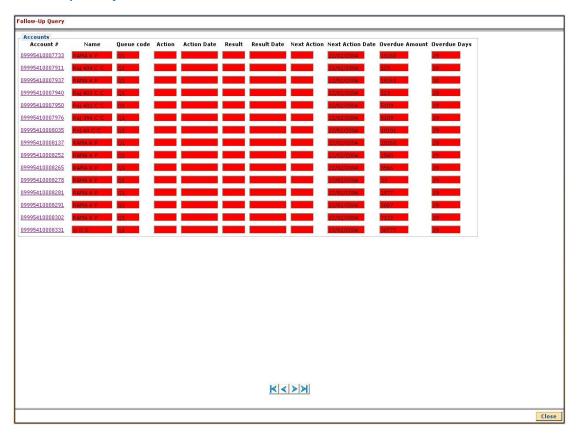

Modes Available

Not Applicable

To follow up query

- 1. Type the fast path CLN55 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Query > Follow Up Query (List Mode).
- 2. The system displays the **Follow-Up Query** screen.

Follow-Up Query

ORACLE

Column Name	Description
Accounts	
Account #	[Display] This column displays the account number of the customer.
Name	[Display] This column displays the name of the customer to whom the account belongs.
Queue code	[Display] This column displays the code of the queue to which the account belongs.
Action	[Display] This column displays the type of the action taken to execute an activity.
Action Date	[Display] This column displays the date on which the action is taken.
Result	[Display] This column displays the output of the action.
Result Date	[Display] This column displays the date of the output action.
Next Action	[Display] This column displays the next action taken on the basis of the results from the first action.
Next Action Date	[Display] This column displays the date for the next action.
Overdue Amount	[Display] This column displays the amount which is due for payment and is not paid till date.
Overdue Days	[Display] This column displays the number of overdue days for each account.

- 3. Click the account number whose follow-up is to be taken.
- 4. The system displays the Followup By Collector screen.
- 5. Enter the relevant information and click the **Follow-Up** button.
- 6. The system displays the Follow-Up Sub screen.
- 7. Enter the relevant information and click the **Ok** button.
- 8. The system displays the "Record successfully modified..Click Ok to continue". Click the **Ok** button.

2. Follow Up

1.3. CLN26 - Followup By Collector*

Follow up main form displays all the details of the account.

Using this option collector can also make the follow-up depending on the status of the account. If the customer has more than one account, the multiple account tab displays all the accounts of the customer. The system displays details on delinquency, collaterals, installments, payments, insurance etc.

Definition Prerequisites

• Account for follow-up

Modes Available

Not Applicable

To view the follow up main form

- 1. Login as a Collector.
- 2. Type the fast path CLN26 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Follow Up > Followup By Collector.
- 3. The system displays the Followup By Collector screen.

Column Name	Description
Stage No.	[Display] This column displays the stage number. If the loan amount is big, then the loan is disbursed in various stages. Each stage of disbursement has unique stage number.
Installment No.	[Display] This column displays the installment number. The repayment of loan is divided into number of installment. Each installment has a installment number.
Installment Date	[Display] This column displays the date on which the installment for loan is paid.
Principal Amount	[Display] This column displays the total amount of the loan. Interest is not included in the principal amount.
Interest Amount	[Display] This column displays the additional charge on the principal amount.
Installment Outstanding	[Display] This column displays the installment due for payment.
Charges Outstanding	[Display] This column displays the outstanding charges. These charges are due for payment.
Outstanding Principal	[Display] This column displays the principal amount due for payment.
Days	[Display] This column displays the number of days overdue for an installment.

Payment Details

Payment details tab displays the information about the payments made by the customer towards his account.

Column Name	Description
Installment Date	[Display]
	This column displays the due date of the installment.
Principal	[Display]
	This column displays the principal.
	Principal is the total loan amount excluding interest.
Principal Paid	[Display]
	This column displays the total amount of the principal that is already paid.
Interest	[Display]
	This column displays the interest.
	Interest is the surplus amount which is charged on the principal amount.

Column Name	Description
Interest Paid	[Display] This column displays the actual amount paid as an interest.
Penalty And Other Charges	[Display] This column displays the penalty and other charges. The penalty and other charges are the extra charges excluding principal and interest. For e.g. processing fees, registration charges, etc.
Penalty And Other Charges Paid	[Display] This column displays the amount of penalty and other charges paid if the due amount is not paid on time.
Fee	[Display] This column displays the total fee for processing the loan.
Fee Paid	[Display] This column displays the total amount of fee that is already paid.

Activity Hist

Activity history tab displays the list of activities that has been done on an account as part of the follow-up activities.

	It displays the number of accounts, where the customer is a group customer.				
Total OD Amount	[Display]				
(Group)	This field displays the total overdue amount.				
	It displays the total amount due as a group customer.				
Written Off	[Display]				
	This field displays the written off status of the account.				
	The check box is selected if the account is marked as write off.				

Last Resolution

Last resolution displays the details of the resolved account.

Date	[Display] This field displays the date of the resolution i.e. when the account was last resolved and moved out of collection.
Collector Group	[Display] This field displays the collector group.
Collector	[Display] This field displays the name of the collector who was working on it.
Action Taken	[Display] This field displays the details of the action taken, when the account was resolved.
Action Summary	
Total Attempts	[Display] This field displays the number of attempts made to resolve the case.
Success Attempts	[Display] This field displays the success attempts for the action. For e.g. If the customer promises to pay the amount and the PTP is not breached.
No. Of PTPs	[Display] This field displays the number of times the PTP is received as result.
No. Of PTPs Kept	[Display] This field displays the number of times the PTP is fulfilled.
No. Of PTPs Broken	[Display] This field displays the number of times the PTP is broken.
Consecutive Broken	[Display] This field displays the number of times the PTP is consecutively breached.
Next Bucket Moveme	nt

Flow Date	[Display]
	This field displays the flow date.
Flow Days	[Display]
	This field displays the flow days.

Auth/Esc Hist

Authorization/escalation tab display the history of authoriszations and escalation that is performed on an account.

Field Name	Description
Account No	[Display] This field displays the account number for the follow-up.
Action Code	[Display] This field displays the action applicable to the collector group for the case.
Action Date	[Display] This field displays the process date.
Result Code	[Display] This field displays the result applicable to the selected action.
Result Date	[Display] This field displays the process date.
Amount	[Display] This field displays the PTP amount that is paid in the followup.
Next Action Code	[Display] This field displays the future action applicable to the selected action/result.
Next Action Date	[Display] This field displays the future date for the action.
Reason Code	[Display] This field displays the code assigned to each reason. It gives the reason for delinquency.
Person Contacted	[Display] This field displays the name of the person contacted in the follow- up.
Notes By Collector	[Mandatory, Alphanumeric, 4000] Type the notes by collector. It is the brief description of the follow-up by the collector.

- 9. Enter the relevant information and click the **Ok** button.
- 10. The system displays the Followup By Collector screen.

1.4. CLN30 - Group Follow-Up*

Using this option field collectors can follow up on one or more cases. All the accounts are displayed, the collector can select the number of accounts and can take the appropriate action. On selecting the option **Select all**, the collector can follow-up all the accounts assigned.

Definition Prerequisites

· Collector should have open cases assigned

Modes Available

Not Applicable

To perform group follow up

- 1. Type the fast path CLN30 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Follow Up > Group Follow Up.
- 2. The system displays the Group Follow-Up screen.

Group Follow-Up

Field Name Description Select All [Optional, Check Box] Select the Select All check box to select all the accounts in the list of collector accounts for follow-up. **Column Name** Description [Display] Account No. This column displays the account number of the customer. Name [Display] This column displays the name of the customer. **Queue Code** [Display] This column displays the name and code of the queue to which the account belongs. State [Display] This column displays the state in which the account is currently lying. **Total Overdue** [Display] Amount This column displays the total overdue amount for each account. Last Action Code [Display] This column displays the code of the last action performed on the account. Last Action Date [Display] This column displays the date on which the last action was performed on the account. Last Result Code [Display] This column displays the last result code. Last Result Date [Display] This column displays the last result date. **Next Action Code** [Display] This column displays the future action code to be performed on the account. **Next Action Date** [Display] This column displays the future date for the action.

Column Name	Description
Note Collector	[Display] This column displays the note for the collector.
Select	[Optional, Check Box]
	Select the Select check box to pick a particular account in the list of collector accounts for follow-up.
3. Select the accou	unt number(s) by clicking the Select check box.

4. Enter the relevant information and click the **Follow-Up** button.

5. The system displays the **Follow-Up Sub** screen.

3. Authorization

1.5. CLN28 - Authorize By Supervisor*

Certain cases need the authorisation by supervisor for the next action chosen by the collector. e.g. VIP cases.

Using this option a supervisor can authorise the next action taken by the collector during the follow-up. All the accounts of the customers are displayed in the **Multiple Account** tab. The system displays details on delinquency, collaterals, installments, payments, insurance etc.

Definition Prerequisites

• Supervisor should have cases assigned to him for authorisation

Modes Available

Not Applicable

To authorize by supervisor

- 1. Login as a supervisor.
- 2. Type the fast path CLN28 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Authorization > By Supervisor.
- 3. The system displays the Authorize By Supervisor screen.

Authorize By Supervisor

Field Name	Description
Filter	[Mandatory, Pick List] Select the appropriate filter/name from the pick list. This is disabled for supervisor authorisation.
Phone (R)	[Display] This field displays the residence phone number of the borrower.
Phone (O)	[Display] This field displays the office phone number of the borrower.
Mobile No	[Display] This field displays the mobile phone number (if available) of the borrower.
No. of A/Cs Pending for Authorization	[Display] This field displays the number of accounts which are pending for authorisation.
Account No	[Display] This field displays the account number selected by system or by collector for follow-up. The customer name is displayed in the corresponding field.
Status	[Display] This field displays the status of the account number.
Customer Id	[Display] This field displays the customer ID of the borrower. The customer ID is auto-generated by the system.
Address	[Display] This field displays the address of the borrower.
State	[Display] This field displays the state.
Zip	[Display] This field displays the zip code.
Collector	[Display] This field displays the name and code of collector to whom the case is allocated.

Field Name	Description
Supervisor	[Display] This field displays the name and code of the supervisor attached to the collector group.
Workflow	[Display] This field displays the name and code of the current work flow of the account number.
State	[Display] This field displays the state in which the account is lying currently.
Queue	[Display] This field displays the name and code of the queue to which the account belongs.
Excp Collector	[Display] This field displays the exception collector of the queue to which the case belongs.
Special Code	[Display] This field displays the special code attached to the case, if any.

- 4. Select the filter criteria.
- 5. Click on the **Go** button.
- 6. The system displays the first record to be authorized by the supervisor.

Multiple A/c s

Multiple accounts tab gets enabled only when the customer has multiple accounts. This tab displays the information about the multiple accounts of the same customer.

Column Name	Description
Select	[Optional, Check Box] Select the check box to follow up the account.
Account No.	[Display] This column displays the account number of the customer.
Loan Amount	[Display] This column displays the loan amount disbursed for each account.
Overdue Days	[Display] This column displays the overdue days for each account.
Installment Amount	[Display] This column displays the installment amount for each account.

Column Name	Description				
Total Overdue Amount	[Display] This column displays the total overdue amount for each account.				
Branch	[Display] This column displays the branch of the account.				
Product	[Display] This column displays the type of the product.				
Account Balance	[Display] This column displays the balance on the account.				
Cycle String	[Display] This column displays the number of times an account falls in the cycle (0-30, 31-60, etc.).				
Delinquency String (For Last 12 Months)	[Display] This column displays the delinquency string. Delinquency string for the last 12 months will display whether any installment was overdue that month (value will be 0 – if not overdue, 1- overdue).				
Plan ID	[Display] This column displays the plan ID.				

Account Details

Account details tab displays the account details of the delinquent customer.

Information available in this section is displayed from the host system and is non editable in collections. This information is used by collectors while they take follow - up actions.

Field Name	Description
Product Details	
Product code	[Display] This field displays the product code.
Product Name	[Display] This field displays the product name.
CodCcy	[Display] This field displays the currency code. It is displayed on the basis of the loan product.

Field Name	Description
Term	[Display] This field displays the total number of days in which the loan amount is repaid.
Financial Details	
Loan Amount	[Display] This field displays the actual amount disbursed for loan.
Total Interest	[Display] This field displays the total interest on the loan amount.
Penalty	[Display] This field displays the over due charges on the loan levied as a penalty.
Fee	[Display] This field displays the processing fees for the loan.
Total Principal	[Display] This field displays the total principal as part of the loan amount.
Principal Paid	[Display] This field displays the total amount of the principal paid.
Penalty Paid	[Display] This field displays the amount of penalty charges paid.
Fee Paid	[Display] This field displays the amount of total fee paid.
Amount Paid Today	[Display] This field displays the amount paid today but not applied to the account.
Interest Paid	[Display] This field displays the total interest paid.
Overdue Amount	[Display] This field displays the amount which is due for payment and is not paid till date.
Overdue Days	[Display] This field displays the number of days the installment is due.
Min. Amount Due	[Display] This field displays the minimum amount which is due for payment.

Field Name	Description
Cycle String	[Display] This section displays the number of times an account falls in the cycle (0-30, 31-60, etc.).
Delinquency string (for last 12 months)	[Display] This section displays the delinquency string. Delinquency string for the last 12 months will display whether any installment was overdue that month (value will be 0 – if not overdue, 1- overdue).
Customer Notes	
Notes	[Display] This field displays the notes. It is the remark for the customer.
User	[Display] This field displays the user name.
Column Name	Description
Last Action/Result (L	ast 3 Action/Result)
Action	[Display] This column displays the action taken for the recovery of the loan. For e.g. reminder to a customer.
Action Date	[Display] This column displays the day on which the action is taken.
Result	[Display] This column displays the output of the action.
Result Date	[Display] This column displays the result date.
Next Action	[Display] This column displays the next action taken on the basis of the results from the first action. For e.g. The result for the first action is, customer promised to pay, so the next action will be sending the reminder to the customer for the payment.
Next Action Date	[Display] This column displays the date for the next action.

Column Name	Description
Collector	[Display] This column displays the name of the collector.
Notes	[Display] This column displays the brief description or the remarks by the collector.
Auth Status	[Display] This column displays the status of authorisation if the next action needs authorisation.

Demo Details

Demo details tab displays the demographic details of the customer. Demographic details include Customer's Address details, Customer ID etc.

Date of Valuation	[Display] This field displays the valuation date of the last value of the collateral.
Market Value	[Display] This field displays the market value.
Valuation Source	[Display] This field displays the valuation source.
Valuation Edition	[Display] This field displays the valuation edition.
Valuation Supplement	[Display] This field displays the valuation supplement
Account Insurance	
Insurance Plan Code	[Display] This field displays the insurance plan code.
Insurance Policy Number	[Display] This field displays the insurance policy number.
Assured Value	[Display] This field displays the assured value.
Amount Block Recovery	[Display] This field displays the recovery amount block.
Maturity Date	[Display] This field displays the maturity date.
Next Premium Due Date	[Display] This field displays the next premium due date.
Insurance Premium Billing	[Display] This field displays the insurance premium billing.
Manual	[Display] This field displays the manual.
Premium Billing Account	[Display] This field displays the premium billing account.
Percentage	[Display] This field displays the percentage.

Field Name	Description
Insurance Premium Amount	[Display] This field displays the insurance premium amount.
Coll. Deeds	
Status of Deeds	[Display] This field displays the status of deeds.
Name of Custodian	[Display] This field displays the name of custodian.
Date Deeds Sent	[Display] This field displays the date on which the deeds were sent.
Expected Return Date	[Display] This field displays the expected return date.
Deed Details	[Display] This field displays the deed details.
Registering Authority	[Display] This field displays the registering authority.
Guarantee	
Guarantor	[Display] This field displays the name of the guarantor of the collateral ID.
From Date	[Display] This field displays the date from which the guarantee is applicable for the collateral.
To Date	[Display] This field displays the date till which the guarantee is applicable for the collateral.
Status	[Display] This field displays the status of the guarantor.
Comments	[Display] This field displays the comments, if any.

Inst Details

Installment tab displays the details of the installment like installment schedule, Principal amount, interest amount etc.

				[

Column Name	Description
Stage No.	[Display]
	This column displays the stage number.
	If the loan amount is big, then the loan is disbursed in various stages. Each stage of disbursement has unique stage number.
Installment No.	[Display]
	This column displays the installment number.
	The repayment of loan is divided into number of installments. Each installment has a installment number.
Installment Date	[Display] This column displays the date on which the installments for the loan is paid.

Column Name	Description
Principal Amount	[Display]
	This column displays the principal amount.
	Principal amount is the total amount of the loan. Interest is not included in the principal amount.
Interest Amount	[Display]
	This column displays the additional amount charged on the principal amount.
Installment	[Display]
Outstanding	This column displays the installment due for payment.
Charges	[Display]
Outstanding	This column displays the charges due for payment.
Outstanding	[Display]
Principal	This column displays the principal amount due for payment.
Days	[Display]
	This column displays the number of days overdue for an installment.

Payment Details

Payment details tab displays the information about the payments made by the customer towards his account.

Column Name	Description
Installment Date	[Display]
	This column displays the due date of the installment.
Principal	[Display]
	This column displays the principal, which is the total loan amount excluding interest.
Principal Paid	[Display]
	This column displays the total amount of the principal that is already paid.
Interest	[Display]
	This column displays the interest.
	Interest is the surplus amount which is charged on the principal amount.

Column Name	Description
Interest Paid	[Display] This column displays the amount paid as an interest.
Penalty And Other Charges	[Display] This column displays the penalty and other charges. The penalty and other charges are the extra charges excluding principal and interest. For e.g. processing fees, registration charges, etc.
Penalty And Other Charges Paid	[Display] This column displays the amount of penalty and other charges paid if the due amount is not paid on time.
Fee	[Display] This column displays the total fee for processing the loan.
Fee Paid	[Display] This column displays the total amount of fee that is already paid.

Activity Hist

Activity history tab displays the list of activities that has been done on an account as part of the follow-up activities.

Column Name	Description
Collector	[Display] This column displays the name of the collector.
Collector Group	[Display] This column displays the name of the collector group, to which the collector belongs.
Workflow Code	[Display] This column displays the workflow code attached to the account.
State Code	[Display] This column displays the state code. It the status of the account in the workflow. There are various stages in recovery of the outstanding money due from the customer. For e.g. Promise to Pay, Customer breaks PTP or call customer on mobile.

Column Name	Description
Action	[Display] This column displays the action taken on the account in the workflow state.
Action Date	[Display] This column displays the day on which the action was taken.
Result	[Display] This column displays the result of the action.
Result Date	[Display] This column displays the date of the result.
Overridden Next Action	[Display] This column displays the automated action which was overridden by another action.
Next Action	[Display] This column displays the next action. It depends on the result of the action taken earlier.
Next Action Date	[Display] This column displays the date of the next action.
Notes By Collector	[Display] This column displays the notes by collector. Notes by collector are comments added by collector during follow-up.

PTP History

This tab displays the history of the promises received by the collector for an account during the follow-up.

Last Resolution

Last resolution displays the details of the resolved account.

Field Name	Description
Date	[Display] This field displays the date of the resolution i.e. when the account was last resolved and moved out of collection.
Collector Group	[Display] This field displays the collector group.
Collector	[Display] This field displays the name of the collector who was working on it.
Action Taken	[Display] This field displays the details of the action taken, when the account was resolved.
Action Summary	
Total Attempts	[Display] This field displays the number of attempts made to resolve the case.
Success Attempts	[Display] This field displays the successful result for the action. For e.g. If the customer promises to pay the amount, and the PTP is not breached.
No. Of PTPs	[Display] This field displays the number of times the PTP is received as result.
No. Of PTPs Kept	[Display] This field displays the number of times the PTP is successful.
No. Of PTPs Broken	[Display] This field displays the number of times the PTP is unsuccessful.
Consecutive Broken	[Display] This field displays the number of times the PTP is consecutively breached.
Next Bucket Moveme	ent
Flow Date	[Display] This field displays the flow date of the next bucket movement.
Flow Days	[Display] This field displays the number of flow days of the next bucket movement.

Auth/Esc Hist

Authorization/escalation tab display the history of authorisations and escalation that is performed on an account.

- 10. The system displays the Authorization by Supervisor screen.

4. Repossession

1.6. CLN62 - Initiate Repossession*

Assets have to be repossessed from customers in case of bad loans. Repossession involves ordering the repossession, repossessing the asset, storing it in a warehouse, valuate the asset and finally dispose the asset.

Using this option you can initiate the re-possession of the assets of the account of a customer.

Definition Prerequisites

• Accounts assigned to the collectors.

Modes Available

Not Applicable

To initiate repossession

- 1. Type the fast path CLN62 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Repossession > Initiate Repossession.
- 2. The system displays the Initiate Repossession screen.

Initiate Repossession

1.7. CLN63 - Collateral Auctioning*

Once the assets are repossessed they need to be disposed by auctioning.

Using this option you can maintain the records of the auctioning of the assets of a customer. It also contains the details of the various sales quotes made for the asset. The organization can initiate the sale of the asset based on the quotes entered in the system. This provides a better management and control for asset sale.

Definition Prerequisites

• CLN62 - Initiate Repossession

Modes Available

Not Applicable

To view the collateral auctioning records

- 1. Type the fast path CLN63 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Repossession > Collateral Auctioning.
- 2. The system displays the Collateral Auctioning screen.

Collateral Auctioning

1.8. CLN64 - Collateral Disposition*

Using this option you can maintain the sale details of the auctioned assets of a customer and the details of the new buyer to whom the asset will be sold. This is useful to complete the audit trail for the resale process.

Once the assets are repossessed they will be disposed by auctioning using the **Collateral Auctioning** (Fat Path: CLN63) option. After this the auctioned details need to be maintained in the system.

Definition Prerequisites

• CLN63 - Collateral Auctioning

Modes Available

Not Applicable

To select the buyer for the asset

- 1. Type the fast path **CLN64** and click **Go** or navigate through the menus to **Transaction Processing > Collection Transactions > Repossession > Collateral Disposition**.
- 2. The system displays the **Collateral Disposition** screen.

Field Name	Description
Sticky Notes	
Search Criteria	 [Mandatory, Drop-Down] Select the search criteria to search for the customer from the drop-down list. The options are: Customer short name: The short name of the customer. Customer IC: The identification criteria (IC) arrived at by the bank during customer addition. Customer ID: The unique identification given by the bank.
Search String	 [Mandatory, Alphanumeric, 20] Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field. If the search criterion is specified as customers short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering Geo in the Search String field.
Cust ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and the customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Note	[Mandatory, Alphanumeric, 240] Type the special note for the customer.

Column Name	Description
Notes History	
Sr. No.	[Display] This column displays the serial number for the note. It is auto-generated by the system.
Notes	[Display] This column displays the special note added for the customer.
By Collector-Name	[Display] This column displays the name of the user who added the note for the customer.
Entered On	[Display] This column displays the date on which the note was created for the customer.
	criteria from the drop-down list. string and press the < Tab > key.

- 5. Select the customer for whom the note is to be added.
- 6. The system displays the notes history for the selected customer.
- 7. Enter the new note to be added.

1.13. CLN35 - Temporary Re-Allocation*

A collector is a person who will follow up with the case.

Using this option, you can manually change the collector assigned to a particular open case during reallocation. The case will remain reallocated to the new collector till the Till Date. However, a temporary reallocated case cannot be reallocated again until Till date.

Definition Prerequisites

- Collector should be defined
- Cases should be allotted to the collectors

Modes Available

Not Applicable

To temporary re-allocate a collector

- 1. Type the fast path CLN35 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Reallocation > Temporary Re-Allocation.
- 2. The system displays the **Temporary Re-Allocation** screen.

7. Exception Case Marking

1.14. CLN29 - Exception Case Marking*

Using this option the collector can mark a case as a exceptional case if he wants that case to be handled by a exception collector.

This is the code which collector can attach to the account based on the type of the customer e.g. special code can be VIP. The cases which are ready for follow-up can be marked/unmarked for exception or the code which collector can attach to the account based on the type of the customer. The cases which are ready for follow-up can be marked/ unmarked for exception or added as a special code by the collector.

Definition Prerequisites

- Collector should be defined
- Special codes should be defined

Modes Available

Not Applicable

To mark the exception case

- Type the fast path CLN29 and click Go or navigate through the menus to Transaction Processing > Collection Transactions > Exception Case Marking > Exception Case Marking.
- 2. The system displays the Exception Case Marking screen.
