1.48. Cl502 - Offers Inquiry	
1.49. Cl503- Create Lead	
1.50 CI504 - Customer Service Maintenance	308

1.1. Customer Information Capture

Oracle FLEXCUBE supports capture of customer details at a global level. The CIF module encompasses the whole process of adding a new customer to the bank's customer base, subsequent maintenance of their details and cross-references between the customer and their accounts in the bank.

1.2. 8053 - Customer Addition

Using this option you can add the details of a new customer to the customer information database. A customer can be added to the system while initiating to open an account, or even before opening an account.

During the process of account opening, the system validates to check if the customer is new or an existing customer. If the given details of the customer do not meet the search criteria, the system prompts the teller stating that 'It is a new customer' and displays this option.

The system also restricts the teller from operating the account of a customer, who is a staff of the bank for security reasons.

Definition Prerequisites

- CIM01 Signature Types Maintenance
- CIM02 Business Type Maintenance
- CIM03 Customer Prefixes Maintenance
- CIM04 Profession Codes Maintenance
- CIM08 Customer Types Maintenance
- BAM75 State Codes Maintenance
- BAM72 Customer City Maintenance

Modes Available

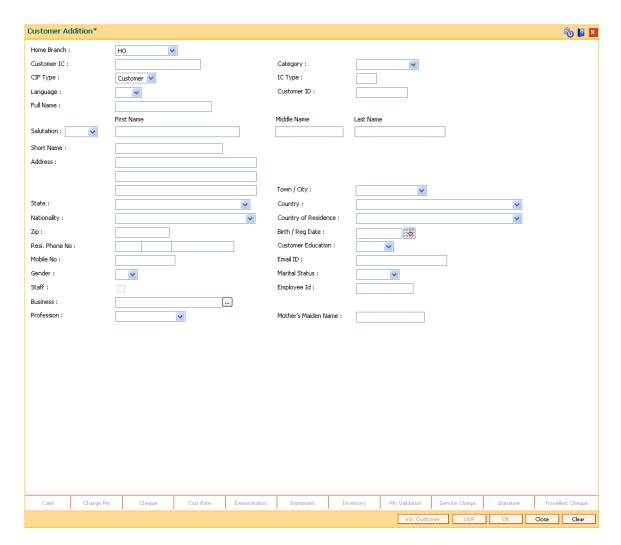

Not Applicable

To add a new customer

- 1. Type the fast path **8053** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Addition**.
- 2. The system displays the **Customer Addition** screen.

Customer Addition

Field Name	Description
Home Branch	[Mandatory, Drop-Down] Select the home branch of the customer from the drop-down list. It is defaulted to the branch code of the user who is logged in.
Customer IC	[Mandatory, Alphanumeric, 30] Type the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC. In countries where there is no concept of a unique identification criteria, this can be configured to be auto-generated.
Category	[Mandatory, Drop-Down] Select the category of the customer from the drop-down list. For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can

choose to set up multiple customer types to segregate the customers using the

Customer Types Maintenance (Fast Path: CIM08) option.

Further processing such as tax applicable, Service Charges, etc., are levied

based on the customer type.

CIF Type [Mandatory, Drop-Down]

Select the type of registered entity from the drop-down list.

The options are:

Customer

Prospect

IC Type [Display]

This field displays the IC type of the customer, based on the option selected in

the Category field.

An IC type is internally linked to every customer category/customer type. This

field is displayed when the category is selected for the customer.

Language [Mandatory, Drop-Down]

Select the appropriate language from the drop-down list.

It is the language in which the bank would interact with the customer.

Customer ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Full Name [Conditional, Alphanumeric, 100]

Type the full name of the corporate customer.

For Individual customer, this will be disabled and will be a concatenation of First

Name, Middle Name and Last Name.

Salutation [Conditional, Drop-Down]

Select the salutation to be used for the customer from the drop-down list.

This field is mandatory for individual customers. Various prefixes can be maintained using the Customer Prefixes Maintenance (Fast Path: CIM03)

option.

For example, Mr., Mrs., Miss, M/s, etc.

This field is disabled and set to **M/s** option for corporate customers.

First Name [Mandatory, Alphanumeric, 252]

Type the first name of the customer.

Middle Name [Optional, Alphanumeric, 252]

Type the middle name of the customer.

Last Name [Optional, Alphanumeric, 252]

Type the last name of the customer.

Short Name [Mandatory, Alphanumeric, 20]

Type the short name of the customer.

The short name is defaulted when the user enters the full name of the customer.

The user can modify it, if required.

The full name as well as the short name will be displayed in capital letters only,

even if it is entered in small letters.

Address [Mandatory, Alphanumeric, 35]

Type the address of the customer.

It has 3 lines for the address. It accept character, numbers and "#" as special

character.

Town/City [Mandatory, Drop-Down]

Select the name of the town or city, where the customer resides, from the drop-

down list.

This can be configured to be optional, if the bank so desires.

State [Mandatory, Drop-Down]

Select the name of the state, where the customer resides, from the drop-down

list.

Country [Mandatory, Drop-Down]

Select the name of the country, where the customer resides, from the drop-

down list.

Nationality [Mandatory, Drop-Down]

Select the nationality of the customer from the drop-down list.

Country of [Mandatory, Drop-Down]

Residence Select the customer's country of residence from the drop-down list.

Zip [Mandatory, Alphanumeric, 10]

Type the zip code of the city where the customer resides.

Birth/Reg Date [Mandatory, Pick List, dd/mm/yyyy]

Select the birth date in case of the individual customer or the registration date in

case of a corporate customer.

Based on the details entered in this field the system identifies a customer as a

major or a minor.

Resi Phone [Mandatory, Numeric, Three, Five, 20]

No Type the residence contact number of the customer.

Customer [Conditional, Drop-Down]

Education Select the education of the customer from the drop-down list.

This field is disabled for corporate type of customer.

Mobile No [Optional, Numeric, 20]

Type the mobile number of the customer.

Email ID [Optional, Alphanumeric, 40]

Type the email address of the customer.

Gender [Conditional, Drop-Down]

Select the gender of the individual customer from the drop-down list.

This field is disabled for corporate type of customer.

Marital [Conditional, Drop-Down]

Status Select the marital status of the individual customer from the drop-down list.

This field is disabled for corporate type of customer.

Staff [Conditional, Check box]

Select the Staff check box, if the customer is a staff of the bank.

This field is disabled for corporate type of customer.

Employee Id [Conditional, Alphanumeric, Six]

Type the employee id of the bank staff.

This field is enabled if the **Staff** check box is selected.

[Conditional, Pick List] **Business**

Select the business of the corporate customer from the pick list.

The values displayed in the option are the business segments to which the customer's belong. Each business type is defined in the Business Type

Maintenance (Fast Path: CIM02) option.

This field is disabled for individual type of customer.

[Conditional, Drop-Down] **Profession**

Select the profession of the customer from the drop-down list.

The profession codes are maintained in the Profession Codes Maintenance

(Fast Path: CIM04) option.

This field is disabled for corporate type of customer.

[Conditional, Alphanumeric, 252] Mother Maiden's Name

Type the mother maiden's name.

This field is enabled for individual customers.

3. Enter the customer IC and select the category from the drop-down list.

4. Click the Val. Customer button. The system will validate the existence of the customer using the above combination.

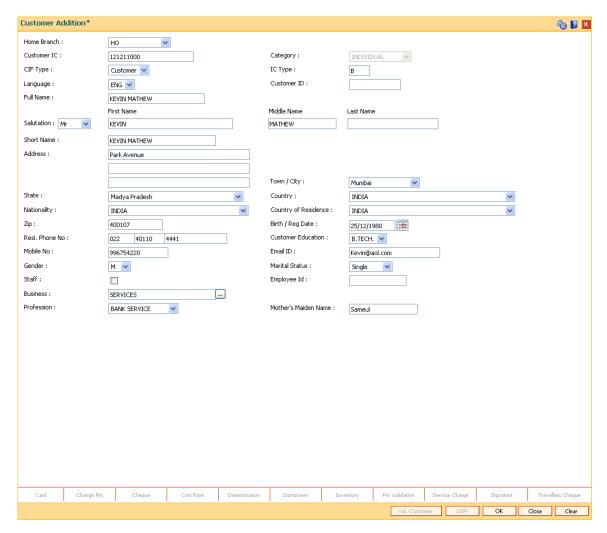

5. The system displays the message "This is a new Customer". Click the **OK** button.

The system displays the message "This is an existing Customer". The system will disable the addition process.

6. Enter the contact details, address details, and the personal information of the customer.

Customer Addition

- 7. Click the Ok button.
- 8. The system displays the unique customer identification number. Click the **Ok** button.
- 9. The system displays the message " Do you want to continue with Customer Document Maintenance? ". Click the **Ok** button.
- 10. The system displays the **Customer Document Maintenance** (Fast Path: CHM52) option. For more details, refer to this option in the **Customer Information User Manual**.

1.3. CI501- Assisted Customer Creation

Using this option you can add the details of a new customer or a prospect. A customer can be added to the system at the time of account opening, or before it. During the process of account opening, the system validates to check if the customer is new or an existing customer.

You can also perform a CRM search using this option. The detail of the customer added in Oracle FLEXCUBE is also updated in CRM.

Note: The validations provided in this option are based on Oracle FLEXCUBE.

Definition Prerequisites

1.4. CIM09 - Customer Information Master Maintenance

Using this option basic information of a customer can be maintained. Information such as the customer's mailing address, permanent address, corporate information, etc., can be captured.

This back-office maintenance allows for maintenance of additional customer information apart from the basic customer information added during customer addition. Since the customer addition is done as a separate transaction, the Add mode will be disabled in this option.

Definition Prerequisites

- 8053 Customer Addition
- CIM06 Income Slabs Maintenance
- CIM07 Relation Master Maintenance
- BAM03 Branch Master Maintenance

Modes Available

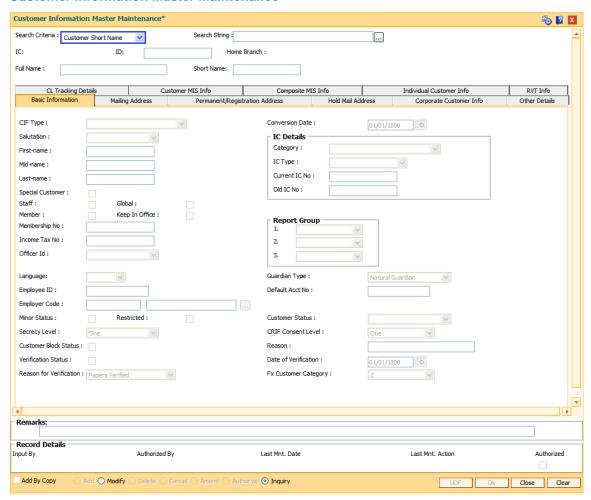

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the customer information master details

- 1. Type the fast path CIM09 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Information Master Maintenance.
- 2. The system displays the Customer Information Master Maintenance screen.

Customer Information Master Maintenance

Field Description

Field Description Name

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the

letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

[Display]

This field displays the branch, where the customer's account is maintained.

It is maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short [Display]

Name

This field displays the short name of the customer.

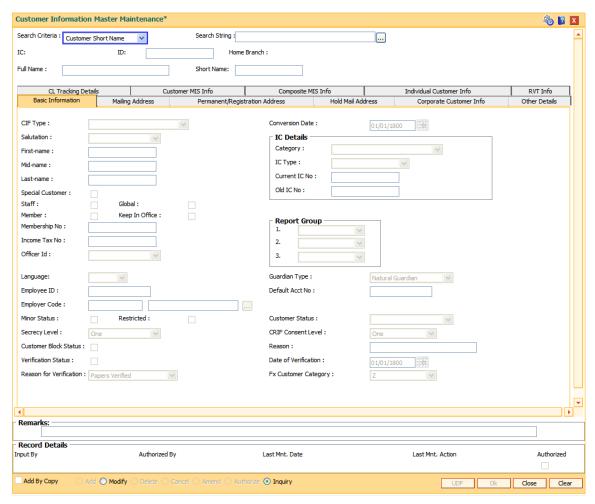

The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

The customer short name can be changed through the **Change Customer Name/IC Number** (Fast path: 7101) option.

- 3. Click the Modify button.
- 4. Select the search criteria from the drop-down list.
- 5. Type the search string, press the **<Tab>** key.
- 6. The system displays a list of customer's that match the search criterion.
- 7. Select the customer from the pick list. The customer details are displayed in the screen.

Customer Information Master Maintenance

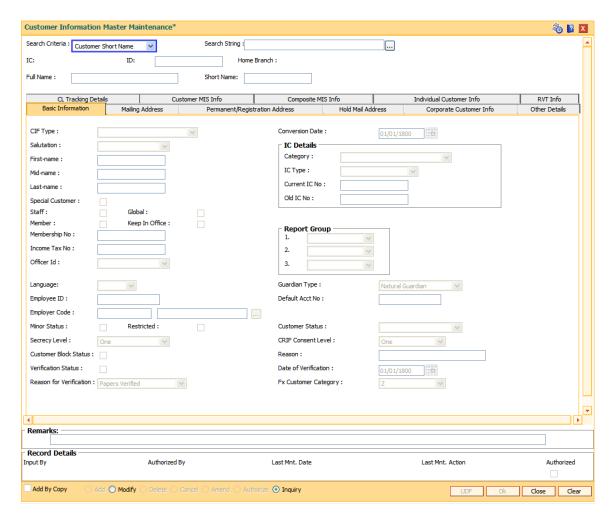

8. Modify the relevant information in the various tabs.

Basic Information

Field Name	Description
CIF Type	[Conditional, Drop-Down] Select the Customer option to convert a prospect into a customer. This field is disabled in case of an existing customer.
Conversion	[Conditional, Pick List]
Date	Select the Conversion Date from the pick list.
	It is the date on which the prospective customer is converted into an existing customer.
	This field is enabled only if the CIF type is Prospect.
Salutation	[Display]
	This field displays the salutation of the customer.
	It is defaulted from the Customer Addition (Fast Path: 8053) option.
First-name	[Display]
	This field displays the first name of the customer.

Mid-name [Display]

This field displays the middle name of the customer.

Last-name [Display]

This field displays the last name of the customer.

Special Customer

[Optional, Check Box]

Select the Special Customer check box if the customer belongs to special

category.

User templates having restricted access to transactions, adhoc report inquiries / generation can be defined for special category customers in the

Template Profile Maintenance (Fast Path: SMM01) option.

Staff [Conditional, Check Box]

Select this check box if the customer is a staff member of the bank.

This field is enabled if the Staff option is selected from the Category drop-

down list in the **Customer Addition** (Fast Path: 8053) option.

Global [Optional, Check Box]

Select the Global check box, if the customer has to be replicated to

FLEXCUBE Corporate Module.

The CL Tracking Details tab will be enabled only if this check box is

selected.

Member [Optional, Check Box]

Select the **Member** check box, if the customer is a member of any

association or club.

Keep In Office [Optional, Check Box]

Select the Keep In Office check box, if the customer wants to direct the bank

to hold his mails/statements in the home branch.

The **Keep In Office** option allows the customer to direct his correspondence

with the bank to be held in the home branch.

If the **Keep In Office** check box is selected, in the **Modify** mode the **Hold Mail Address** tab is displayed with the alternate address. This address

cannot be modified.

By default, the system displays the home branch address as the hold mail

address.

Membership No [Conditional, Alphanumeric, 20]

Type the membership number of the customer if he is a member of any

association or club.

This field is enabled only if the Member check box is selected.

Report Group [Optional, Drop-Down]

Select the report group, to which the customer belongs, from the drop-down list. There could be a maximum of three report groups to which a customer

can belong.

This is provided for information only and has no processing implications.

Income Tax

[Optional, Alphanumeric, 20]

Type the identification number of the customer provided by the Income Tax

Department for the purpose of tracking tax liabilities.

Officer Id

[Optional, Drop-Down]

Select the Officer Id from the drop-down list.

It is the ID of the officer, who entered the customer details or the ID of the

relationship manager who has been assigned to the customer.

Language

[Mandatory, Drop-Down]

Select the language from the drop-down list.

It is the customer's preferred language while communicating with the bank.

Guardian Type [Display]

This field displays the type of the guardian.

A guardian is required when the customer is a minor.

The options are:

• No Guardian - The system displays this option when the customer does not have a guardian. By default, the system displays this option when the customer is a major.

- Natural Guardian The system displays this option when the parents of the customer are his guardians.
- Legal Guardian The system displays this option when the guardians of the customer are guardians by law

Employee ID

[Optional, Alphanumeric, 16]

Type the employee ID of the customer, if the customer is a staff of the bank.

Default Acct No [Optional, Alphanumeric, 16]

Type the customer's default account number.

Employer Code

[Optional, Pick List]

Select the employer code from the pick list. The employer name is displayed

in the adjacent field.

These codes are maintained using the **Company Master Maintenance** (Fast

Path: BAM81) option.

Minor Status [Display]

This check box indicates, if the customer is a minor.

Restricted

[Display]

This field displays whether the customer is a restricted customer or not.

This is maintained in the **Customer Account Restriction** option (Fast Path:

CIM21).

Only tellers with suitable capability will be able to inquire and post transactions into restricted accounts. Normal tellers will not be able to

transact on the account.

Customer [Display]

Status This field displays the customer status.

Secrecy level [Optional, Drop-Down]

Select the level of secrecy of the customer information from the drop-down

list. It ranges from 1 to 6 and can be customized as per customer

requirement.

CRIF Consent Level

[Optional, Drop-down]

Select the CRIF Consent Level from the drop-down list.

It is the level of consent given by the customer to the bank with regards to

sharing his information with the third parties.

Customer Block Status [Display]

This check box displays whether the customer is blocked for transaction.

Reason [Display]

This field displays the reason for the customer block.

Verification Status [Optional, Check Box]

Select the Verification Status check box to indicate confirmation of the

verification for the customer.

Date of Verification

[Display]

This field displays the date on which the customer status is verified.

Reason for Verification [Optional, Drop-Down]

Select the reason for the status verification from the drop-down list.

Fx Customer Category

[Mandatory, Drop-Down]

Select the category of the Fx customer from the drop-down list.

By default system displays the value as Z as the Fx customer category which is defaulted at the time of customer addition. The Z customer category is

considered as the worst FX customer category.

The customer category is used for grading and rate calculation purpose. The value in this field is defined at the back end as part of Day 0 setup.

IC Details

Category [Display]

This field displays the category of the customer.

For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using

the Customer Types Maintenance (Fast Path: CIM08) option.

Further processing such as tax applicable, Service Charges, etc., are levied

based on the customer type.

IC Type [Display]

This field displays the IC type of the customer, based on the category to

which the customer belongs.

This is maintained in the **Customer Types Maintenance** (Fast Path: CIM08)

option.

Current IC No [Display]

This field displays the current IC number of the customer.

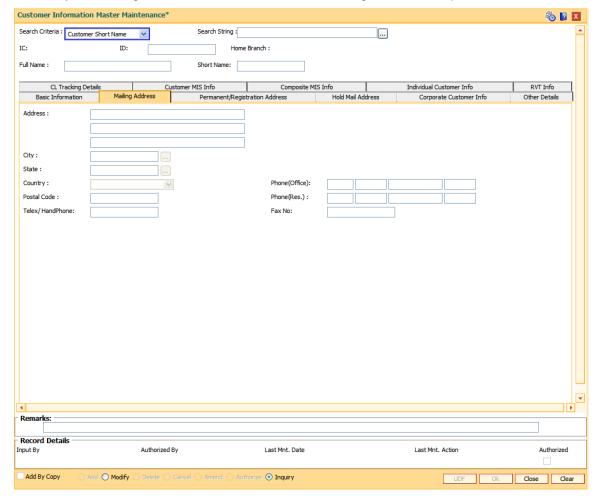

Old IC No [Display]

This field displays the old IC number of the customer, if any.

Mailing Address

This is the address to which customer's account statements are mailed. At the CASA Account level, it is possible to indicate if the statements are to be sent to Customer level address or Account level address or both. The system, by default displays the address mentioned in the **Customer Addition** option (Fast Path: 8053).

To modify the mailing address of the customer, the following details are captured:

Field Description

Field Name Description

Address [Mandatory, Alphanumeric, 35]

Type the mailing address of the customer. The address can be mentioned in

three lines.

City [Mandatory, Pick List]

Select the name of the city where the customer's mails should be sent from

the pick list.

State [Mandatory, Pick List]

Select the name of the state where the customer's mails should be sent from

the pick list.

Country [Mandatory, Drop-Down]

Select the name of the country, where the customer's mails should be sent,

from the drop-down list.

Phone (office) [Optional, Numeric, Three, Five, 20, Five]

Type the customer's office contact number. It is split into 4 parts:

Country code

Area Code

Phone Number

Extension

Postal Code [Mandatory, Numeric, 10]

Type the postal code of the customer's mailing address.

Phone (Res.) [Optional, Numeric, Three, Five, 20, Five]

Type the customer's residential contact number. It is split into 4 parts:

Country code

Area Code

Phone Number

Extension

Telex/ [Optional, Alphanumeric, 15]

Type the mobile number of the customer.

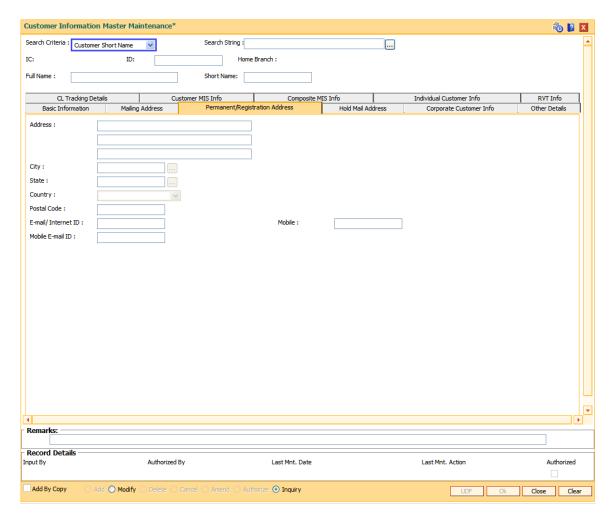

Fax No [Optional, Numeric, 15]

Type the fax number of the customer.

Permanent/Registration Address

This is the permanent address of the customer. The system, by default displays the address mentioned in the **Customer Addition** (Fast Path: 8053) option as the permanent address of the customer. This address can however be modified using this maintenance.

Field Name	Description
Address	[Mandatory, Alphanumeric, 35]
	Type the permanent address of an individual customer or the head quarter address in case of a corporate customer. The address can be mentioned in three lines.
City	[Mandatory, Pick List]
	Select the name of the city, of the customer's permanent/head quarter address, from the pick list.
State	[Mandatory, Pick List]
	Select the name of the state, of the customer's permanent/head quarter address, from the pick list.
Country	[Mandatory, Drop-Down]
	Select the name of the country of the customer's permanent/head quarter address from the drop-down list.
Postal Code	[Mandatory, Numeric, 10]

Type the postal code of the customer's permanent/head quarter address.

Email/ [Optional, Alphanumeric, 40]
Internet ID

Type the e-mail ID of the customer.

Mobile [Optional, Numeric, 20]

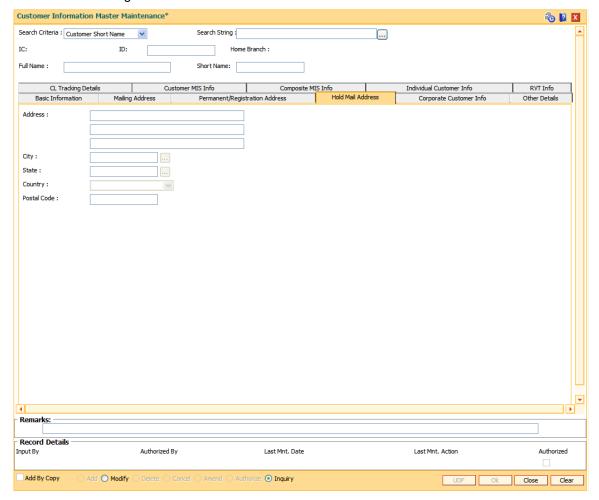

Type the mobile number of the customer.

Mobile [Optional, Alphanumeric, 40]
Email ID

Type the mobile email ID of the customer.

Hold Mail Address

If the **Keep In Office** flag is set ON, the customer statements/advices should be sent to customer home branch address. In this case, the system defaults the address of the home branch as maintained in **Branch Master Maintenance** (Fast Path: BAM03) option. It will be used in statement/advices generation for all the accounts of such customer's.

Field Description

Field Description Name

Address [Display]

This field displays the home branch address of the customer, where the customer

has opened the account. The address can be mentioned in three lines.

City [Display]

This field displays the city name.

State [Display]

This field displays the state name.

Country [Display]

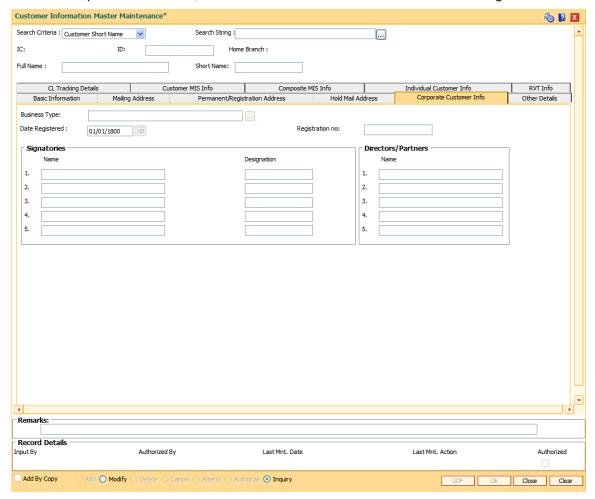

This field displays the country name.

Postal [Display]

Code This field displays the postal code.

Corporate Customer Info

Incase of corporate customers, additional details can be maintained/modified using this tab.

Field Name	Description
Business Type	[Optional, Pick List]
	Select the business type of the customer from the pick list.
	Business types are mentioned using the Business Type Maintenance (Fast Path: CIM02) option and are added while adding a customer in the Customer Addition (Fast Path: 8053) option.
	This field is applicable for both individual and corporate customers.
Date	[Mandatory, Pick List, dd/mm/yyyy]
Registered	Select the registration date of the corporate customer from the pick list.
Registration no	[Optional, Alphanumeric, 15]
	Type the registration number of the corporate customer.
Signatories	
Name	[Optional, Alphanumeric, 40]
	Type the names of the authorised signatories of the corporate customer.
Designation	[Optional, Alphanumeric, 40]
	Type the designations of the authorised signatories of the corporate customer.
D:	

Directors/Partners

Name [Optional, Alphanumeric, 40]

Type the list of names of the directors or partners of the corporate customer.

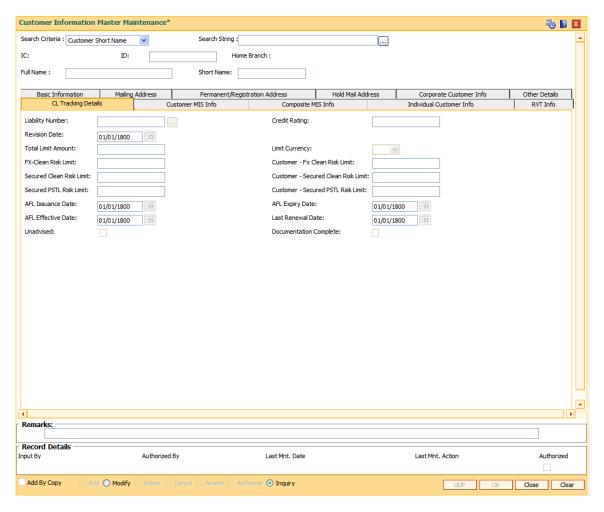

CL Tracking Details

The CL Tracking Details tab enables the bank to maintain the customer central liability information. The central liability (CL) tracking is done in **FLEXCUBE Corporate**. A sequence of actions needs to be performed to define the Central Liability enable it to be effective.

When a customer is not a part of a group, the group level limits such as FX-Clean Risk Limit, Secured Clean Risk Limit, Secured PSTL Risk Limit, etc., are same as that of customer level limits such as Customer FX-Clean Risk Limit, Customer Secured Clean Risk Limit, Customer Secured PSTL Risk Limit, etc.

When the customer is a part of a group, then the liability number selected/entered should be the group liability number. For example, Customer A and Customer B belong to group Z. In this case, all the three customer's, including the group, are defined as separate customer's in **FLEXCUBE Retail**, each having its own **FLEXCUBE** Customer ID. When defining group Z, the group level limits are defined and customer level limits are unassigned. However when defining customer's A or B, the **FLEXCUBE** Customer ID of group Z is entered as liability number and the customer level such as Customer FX-Clean Risk Limit, Customer Secured Clean Risk Limit, Customer Secured PSTL Risk Limit, etc., are to be entered. The system automatically displays the FX-Clean Risk Limit, Secured Clean Risk Limit, etc., of group.

Field Name	Description
Liability Number	[Display]
	This field displays the Customer ID of the customer as the Liability Number.
	If the customer is a part of a group, then the parent Customer ID would be needed to be selected from the pick list.
	Even after replication of the customer, in the modify mode the system would allow the user to change the liability ID to any other customer ID.
Credit Rating	[Optional, Alphanumeric, 45]
	Type the credit rating assigned to the customer as per the banks rating scale.
Revision Date	[Mandatory, Pick List, dd/mm/yyyy]
	This field displays the date on which the credit limits set for the customer will be revised.

Total Limit Amount [Mandatory, Numeric, 11, Two]

Type the overall limit assigned to a group or customer.

Though the total of each sub-limits to be defined can be greater than

this value, each of the sub-limits cannot exceed this value.

Limit Currency [Mandatory, Drop-Down]

Select the currency in which the limit amounts are being defined from

the drop-down list.

By default the local currency is the limit currency.

FX-Clean Risk Limit [Mandatory, Numeric, 9, Two]

Type the unsecured foreign exchange limit available for the group or

customer.

Customer - Fx Clean Risk Limit

[Mandatory, Numeric, 9, Two]

Type the unsecured foreign exchange limit available to a customer.

If the customer is a part of a group, then this limit has to be less than

or equal to FX-Clean Risk Limit.

Secured Clean Risk Limit [Mandatory, Numeric, 9, Two]

Type the secured clean risk limit available on the group or customer.

Customer - Secured Clean Risk Limit

[Mandatory, Numeric, 9, Two]

Type the secured clean risk limit available to the customer.

If the customer is a part of a group, then this limit has to be less than

or equal to Secured Clean Risk Limit.

Secured PSTL Risk

Limit

[Mandatory, Numeric, 9, Two]

Type the secured pre-settlement risk limit (PSTL) available on the

group or customer.

Customer - Secured PSTL Risk Limit

[Mandatory, Numeric, 9, Two]

Type the secured pre-settlement risk limit (PSTL) available on the

customer.

If the customer is a part of a group, then this limit has to be less than

or equal to Secured PSTL Risk Limit.

AFL Issuance Date [Mandatory, Pick List, dd/mm/yyyy]

Select the AFL Issuance date from the pick list.

AFL Expiry Date [Mandatory, Pick List, dd/mm/yyyy]

Select the AFL Expiry date from the pick list.

AFL Effective Date [Mandatory, Pick List, dd/mm/yyyy]

Select the AFL Effective date from the pick list.

Last Renewal Date [Mandatory, Pick List, dd/mm/yyyy]

Select the last renewal date from the pick list.

Unadvised [Optional, Check Box]

Select the **Unadvised** check box, if all limit facilities to a customer across **FLEXCUBE** has been suspended and any credit that is to be

forwarded to the customer has to be under authorisation.

Documentation Complete

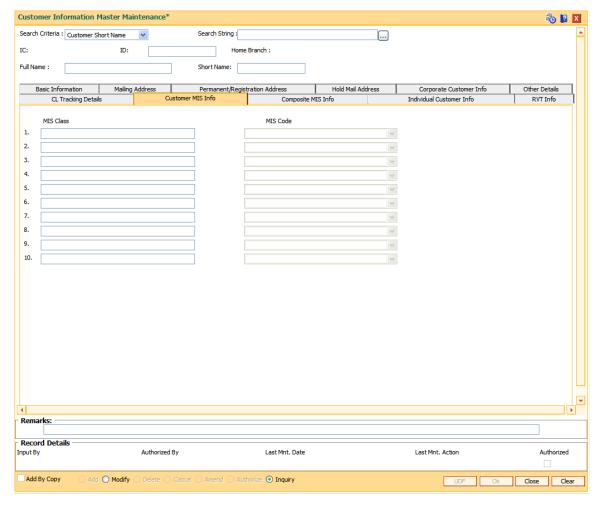

[Optional, Check Box]

Select the **Documentation Complete** check box, if all the documents

have been received.

Customer MIS Info

This screen enables the user to link MIS codes at the customer level.

Field Name	Description
MIS Class	[Display] This field displays the list of MIS classes that are set up and downloaded.

These MIS classes are to be defined in **FLEXCUBE Corporate**.

MIS class code is an identifier for the kind of entity that is identified as the basis for MIS reporting. There can be multiple codes under each overall head. The most basic attribute of an MIS class is its type.

An MIS class in **Oracle FLEXCUBE** can belong to one of the following types:

- Customer type
- Transaction type
- Composite Type

You can define a maximum of ten MIS classes for each of the above types.

The MIS type helps classify reporting based on either, a customer or a transaction. An MIS class belonging to the customer type helps you generate your profitability for a customer. Similarly, MIS class belonging to the transaction type helps you generate your profitability report based on transactions.

For example, Industry Segment can be an MIS Class

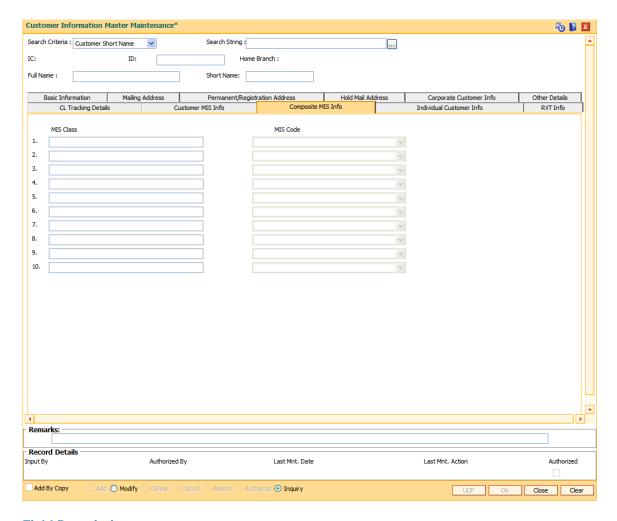

MIS [Optional, Drop-Down]

Code Select the MIS code corresponding to the MIS Class from the drop-down list.

Composite MIS Info

Composite MIS codes for a customer are to be defined in this screen. Apart from the Customer MIS codes defined earlier, an additional 10 MIS codes can be linked at the customer composite level for MIS reporting.

Field Description Name

MIS Class

[Display]

This field displays the list of MIS classes that are set up and downloaded. These MIS classes are to be defined in **FLEXCUBE Corporate**.

MIS class code is an identifier for the kind of entity that is identified as the basis for MIS reporting. There can be multiple codes under each overall head. The most basic attribute of an MIS class is its type.

An MIS class in **FLEXCUBE Retail** can belong to one of the following types:

- Customer type
- Transaction type
- Composite Type

You can define a maximum of ten MIS classes for each of the above types.

The MIS type helps classify reporting based on either, a customer or a transaction. An MIS class belonging to the customer type helps you generate your profitability for a customer. Similarly, MIS Class belonging to the transaction type helps you generate

your profitability report based on transactions.

For example, Industry Segment can be an MIS Class

MIS Code

[Display]

This field displays the MIS code corresponding to the MIS Class. The MIS codes for a MIS Class are defined in **FLEXCUBE Corporate**.

Each MIS Code reports to an MIS Class. MIS Codes are values to be defined for each of the MIS class.

For example, Automobile Parts can be an MIS Code belonging to Industry Segment MIS Class.

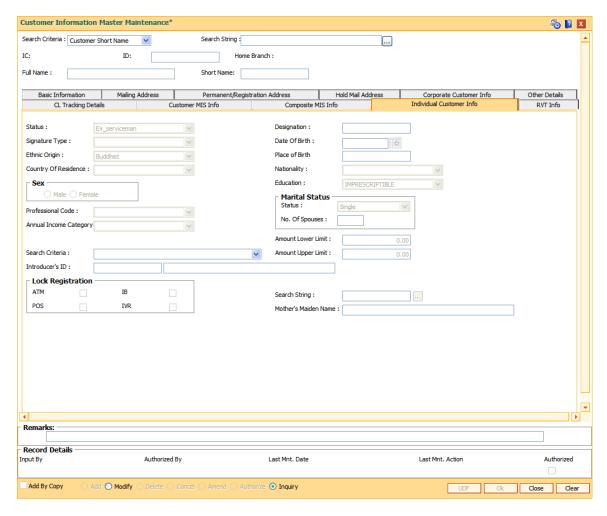

Individual Customer Info

The fields in this tab are enabled based on the selected customer type. You can only edit the following fields if you select corporate type of customer:

- Nationality
- · Country of Residence
- · Search Criteria
- Search String
- · Lock Registration.

Refer to the field description table for the fields editable for an individual type of customer.

Field Name	Description	
Status	[Mandatory, Drop-Down]	
	Select the status of the individual customer from the drop-down list.	
	The options are:	
	Regular	
	Ex_serviceman	
	Deceased	
Designation	[Mandatory, Alphanumeric, 40]	
	Type the designation of the Individual customer.	
Signature	[Optional, Drop-Down]	
Туре	Select the signature type of the customer from the drop-down list.	

CIM01) option.

The signature type is defaulted from the **Customer Addition** (Fast Path: 8053) option and is defined in the **Signature Types Maintenance** (Fast Path:

Date of Birth [Mandatory, Pick List, dd/mm/yyyy]

Select the date of birth of the customer from the pick list.

The date of birth is used to generate automatic birthday greetings for the customer. The date of birth is defaulted from the **Customer Addition** (Fast

Path: 8053) option.

Place of Birth [Optional, Alphanumeric, 60]

This field will be used for storing the customer place of birth.

Ethnic Origin [Optional, Drop-Down]

Select the religion of the customer from the drop-down list.

Nationality [Mandatory, Drop-Down]

Select the nationality of the customer from the drop-down list. The nationality

is defaulted from the Customer Addition (Fast Path: 8053) option.

Country of Residence [Mandatory, Drop-Down]

Select the name of the country, where the customer resides, from the drop-down list. The status is defaulted from the **Customer Addition** (Fast Path:

8053) option.

Education [Mandatory, Alphanumeric, 40]

Type the education qualification of the customer.

Sex [Mandatory, Radio Button]

Click the appropriate option to select the gender of the customer.

The options are:

Male

Female

This field is disabled for corporate customers.

Marital Status

Status [Mandatory, Drop-Down]

Select the marital status of the customer from the drop-down list.

The marital status is defaulted from the **Customer Addition** (Fast Path: 8053)

option.

This field is disabled for the corporate type customer.

No. of [Conditional, Numeric, Two]

Spouses

Type the number of angulars

Type the number of spouses of the customer.

This field is enabled only if the Married option is selected from the Status

field.

Professional [Man Code Color

[Mandatory, Drop-Down]

Select the profession code of the individual customer from the drop-down list.

These codes are maintained in **Profession Codes Maintenance** (Fast Path:

CIM04) option.

Annual Income Category

[Optional, Drop-Down]

Select the annual income slab, under which the individual customer falls, from

the drop-down list.

These income slabs are defined in the Income Slabs Maintenance (Fast

Path: CIM06) option.

Amount Lower Limit [Display]

This field displays the lower limit of the income slab depending upon the Annual Income Category selected.

The lower limit of the income slab is specified in the Income Slabs

Maintenance (Fast Path: CIM06) option.

This is the least income a customer should have to fall in this income slab

Amount Upper Limit [Display]

This field displays the upper limit of the income slab depending upon the Annual Income Category selected.

The upper limit of the income slab is specified in the **Income Slabs Maintenance** (Fast Path: CIM06) option.

This is the maximum income a customer should have to fall in this income slab.

The following fields are applicable if the individual is being introduced by the existing customer.

Search Criteria

[Optional, Drop-Down]

Select the search criteria, to search for the customer from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Introducer's ID

[Display]

This field displays the customer's ID and short name of the introducer.

Mothers Maiden Name

[Conditional, Alphanumeric, 252]

Type the mother's maiden name.

This field is will be enabled for individual customers.

By default the system displays the name as maintained in the **Customer Addition** (Fast Path: 8053) option.

Lock Registration

[Optional, Check Box]

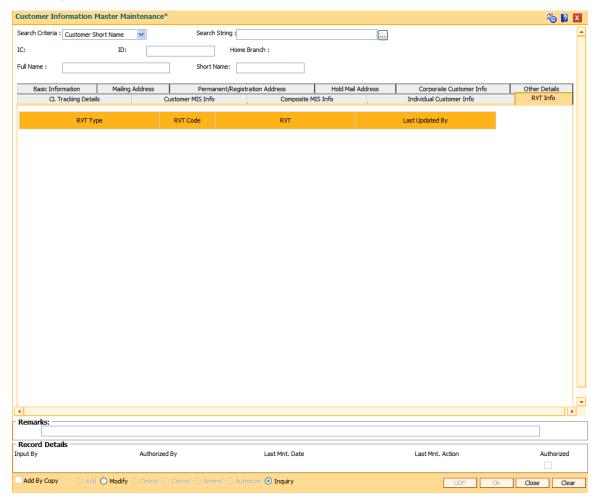

Select the appropriate check box to register a customer for lock registration.

The option are:

- ATM
- IB
- POS
- IVR

The check boxes ATM, POS and IVR are disabled and are for future use.

RVT Info

Field Description

Column Name Description

RVT Type

[Display]

This column displays the value tag type of the customer.

The RVT types maintained in the RVT definition.

RVT [Optional, Pick List]

Select the RVT type from the pick list.

It can be selected by manual option or GEFU upload.

Last Updated By [Display]

This column displays whether RVT is updated manually or GEFU upload.

9. Click the Ok button.

10. The system displays the **UDF Details** screen. For more information, refer to the Introduction Manual.

- 11. The system displays the message "Record Modified... Authorisation Pending.. Click Ok to Continue". Click the **Ok** button.
- 12. The customer information details are modified once the record is authorised.

1.5. CIM11 - Customer Detail Maintenance

Using this option you can maintain additional data for individual customer. The background information of the customer such as their employment details and relationship details can be captured in this option.

These details, though not mandatory, are in addition to the ones which have been maintained in the **Customer Master MaintenancQUALITYe** (Fast Path: CIM09) option.

Definition Prerequisites

- BAM03 Branch Master Maintenance
- CIM04 Profession Codes Maintenance
- 8053 Customer Addition
- 7101 IC No Short Name Change

Modes Available

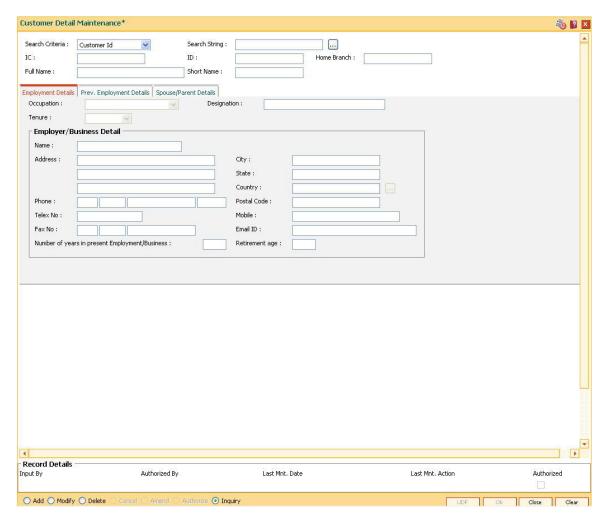

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the customer details

- 1. Type the fast path CIM11 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Detail Maintenance.
- 2. The system displays the **Customer Detail Maintenance** screen.

Customer Detail Maintenance

Field Name Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch [Display]

This field displays the branch, where the customer's account is opened. It is maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full name [Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name [Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer Addition**

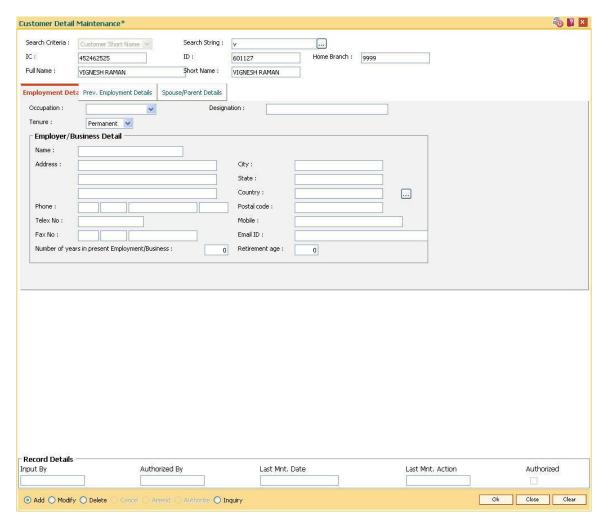

(Fast Path: 8053) option.

The customer short name can be changed through the **Change Customer Name/IC Number** (Fast Path: 7101) option.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Enter the search string and press the **<Tab>** key and select it from the pick list.

Customer Detail Maintenance

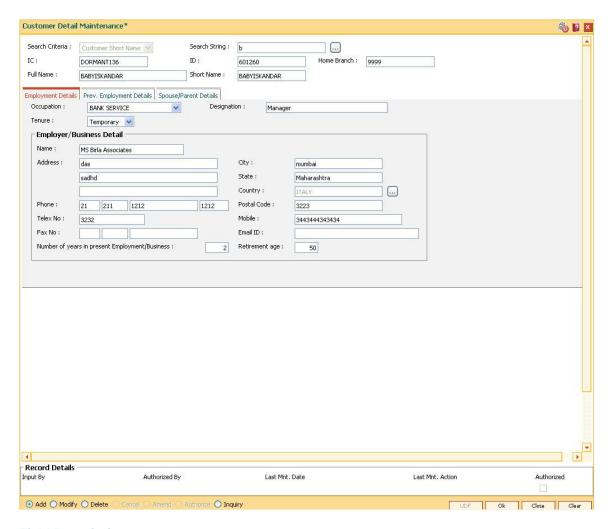

6. Enter the relevant information in the various tabs.

Employment Details

Field Name	Description	
Occupation	[Display] This field displays the occupation of the customer. The profession is maintained in the Profession Codes Maintenance (Fast Path: CIM04) option and is defaulted from the Customer Addition (Fast Path: 8053) option.	
Designation	[Display] This field displays the designation of the customer.	
Tenure	[Optional, Drop-Down] Select the tenure of the occupation for the customer from the drop-down list The options are:	
	Permanent	
	Temporary

Case Description	[Conditional, Alphanumeric, 40] Type the case description. This field is enabled if the Any Legal Case History check box is selected.
Police Record	[Conditional, Alphanumeric, 40] Type the description of the police case against the customer, if any. This field is enabled if the Any Legal Case History check box is selected.

Credit/Bank Card Details

Credit Rating [Optional, Alphanumeric, 15]

Type the credit rating of the customer.

If the bank has an internal credit rating or has access to external credit rating

of the customer, you can specify the value.

This field is for informational purposes only. FLEXCUBE Retail does not do

any processing based on the same.

Cr Rating Date [Optional, Pick List, dd/mm/yyyy]

Select the credit rating date from the pick list.

It is the date on which the credit rating for the customer was done.

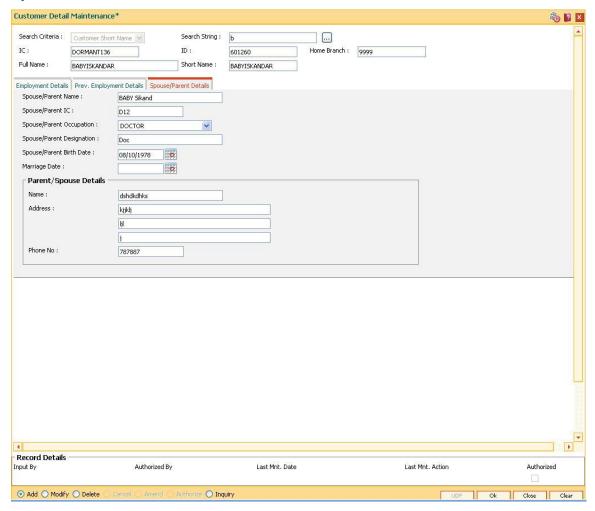

Credit / Bank [Optional, Alphanumeric, 40]

Card Name Type the name of three credit cards held by the customer.

Reference [Optional, Alphanumeric, 20]

Number Type the credit card or reference number for the corresponding credit card.

Spouse/Parent Details

Field Name	Description
Spouse/Parent Name	[Optional, Character, 40] Type the full name of the customer's spouse or parent.
Spouse/Parent IC	[Optional, Alphanumeric, 16] Type the IC of the customer's spouse or parent. This number is not validated, as the relation may not be a customer of the bank.
Spouse/Parent Occupation	[Optional, Drop-Down] Select the occupation of the customer's spouse or parent's from the drop-down list. The profession codes are maintained in the Profession Codes Maintenance (Fast Path: CIM04) option.
Spouse/Parent Designation	[Optional, Alphanumeric, 40] Type the designation of the customer's spouse or parent.
Spouse/Parent Birth Date	[Optional, Pick List, dd/mm/yyyy] Select the birth date of the spouse or parent from the pick list. The date can be selected from the calendar.
Marriage Date	[Optional, Pick List, dd/mm/yyyy] Select the date of the marriage, if the customer is married, from the pick list.
D	mandanan Dataila

Parent/Spouse Employer Details

Name	[Optional, Alphanumeric, 40] Type the name of the customer's spouse or parent's employer's name.
Address	[Optional, Alphanumeric, 35] Type the customer's spouse or parent employer's address.
Phone No	[Optional, Alphanumeric, 15] Type the customer's spouse or parent employer's phone number.

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Authorised". Click the **Ok** button.

1.6. CIM17 - Corporate Customer Details

Using this option you can maintain additional details of corporate customers such as the history and status of the company, financial information, business information and shareholders information. The information in this maintenance is not mandatory.

Definition Prerequisites

• 8053 - Customer Addition

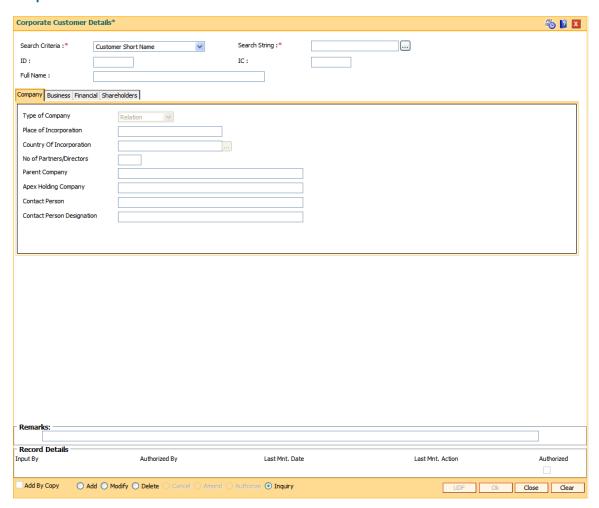

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the corporate customer details

- Type the fast path CIM17 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Corporate Customer Details.
- 2. The system displays the Corporate Customer Details screen.

Corporate Customer Details

Field Name Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering **Geo** in the search string field.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

[Display] IC

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration

can be used as a customer IC.

Full Name [Display]

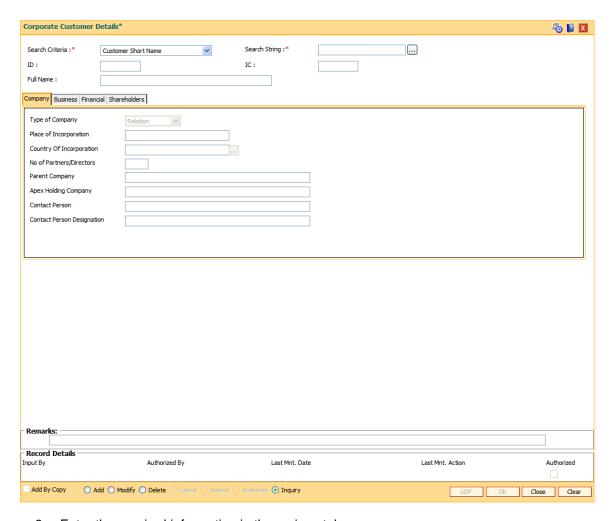

This field displays the full name of the customer.

The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- Type the search string and press the **<Tab>** key and select the customer from the pick list.

Corporate Customer Details

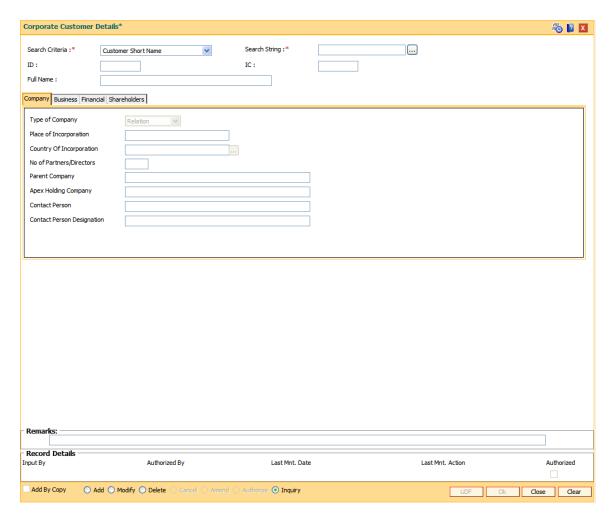

6. Enter the required information in the various tabs.

Company

Field Name	Description
Type of Company	[Mandatory, Drop-Down] Select the type of company from the drop-down list. The options are:
	Relation
	Partnership
	Public Limited
	Private Limited
	Others
Place of Incorporation	[Optional, Alphanumeric, 16] Type the name of the place where the company was incorporated.

Net Profit/Loss Year Before	[Mandatory, Numeric, 13, Two] Type the net profit or loss incurred during the year before the previous financial year. The currency is dependent upon place of incorporation.
Auditor Name 1	[Mandatory, Alphanumeric, 40] Type the name of the company's auditor. The currency is dependant upon place of incorporation.
Auditor Name 2	[Optional, Alphanumeric, 40] Type the name of the company's auditors, if there is more than one auditor.

Shareholders

Field Name	Description
Major Shareholder Names	[Mandatory, Alphanumeric, 40] The field will capture the name of the shareholder
Nationality	[Mandatory, Picklist] The nationality of the share holder. List of Values from Country Maintenance
Share Holding Percentage	[Mandatory, Numeric, 3,2] This field will be used for storing the share holding percentage.
Address	[Mandatory, Alphanumeric, 120] This field will be used to capture the address of the share holder.
Country	[Mandatory, Picklist] This field will be used to capture the country of the share holder. List of Values from Country Maintenance
Contact	[Optional, Numeric, 30]

Number Contact Number of the shareholder

Tax [Mandatory, Alphanumeric, 20]

Identification Number

The tax identification number of the share holder.

Relationship [Optional, Pick List]

Select the appropriate relationship from the pick list.

It is the relationship of the shareholder to corporate customer.

7. Click the Ok button.

8. The system displays the message "Record Authorised". Click the ${\bf Ok}$ button.

1.7. CHM52 - Customer Document Maintenance

Using the **Document Plan Code Maintenance** (Fast Path: ORS35) option you can create a document plan code. **Oracle FLEXCUBE** allows you to attach a document plan at the customer level or at account level. The documents are attached at the customer level based on the plan code selected for a particular customer type in the **Customer Type Maintenance** (Fast Path: CIM08) option.

After a customer is added, you can capture the details of documents submitted by the customer as per bank's norms by performing document maintenance. The system tracks the mandatory documents based on the receipt date. The mandatory documents need to be marked as received. The non-mandatory documents can be marked either as received or waived.

Using this option you can maintain the document status for each customer.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

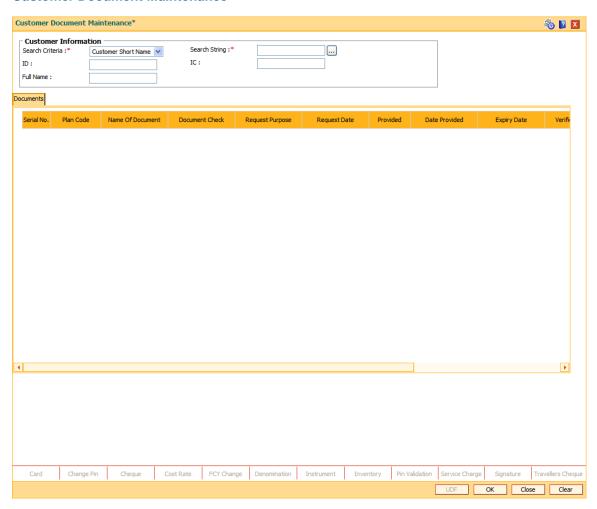

Not Applicable

To maintain document status for a customer

- Type the fast path CHM52 and click Go or navigate through the menus to Transaction Processing > Account Transactions > CASA Account Transactions > Cash > Customer Document Maintenance.
- 2. The system displays the **Customer Document Maintenance** screen.

Customer Document Maintenance

Field Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the dropdown list.

The options are:

- Customer Short Name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition
- Customer ID Unique identification given by the bank

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then

any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing

customer list.

For example, the customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

ID [Display]

This field displays the ID of the customer.

IC [Display]

This field displays the identification code of the customer.

Full Name [Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the Customer

Addition (Fast Path: 8053) option.

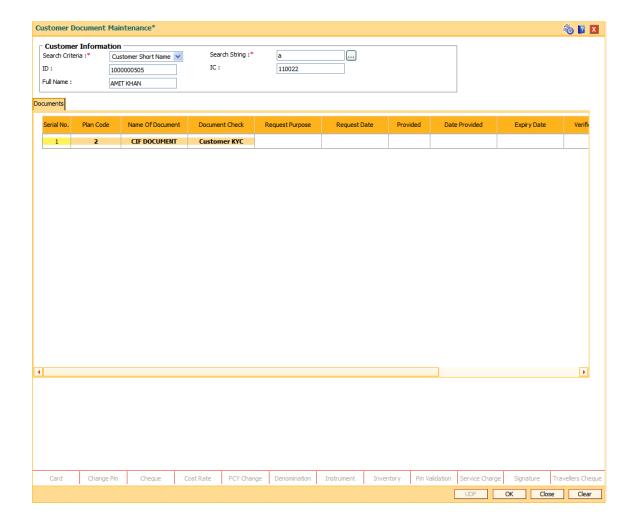

3. Select the search criteria from the drop-down list.

4. Enter the search string and select the appropriate record from the pick list.

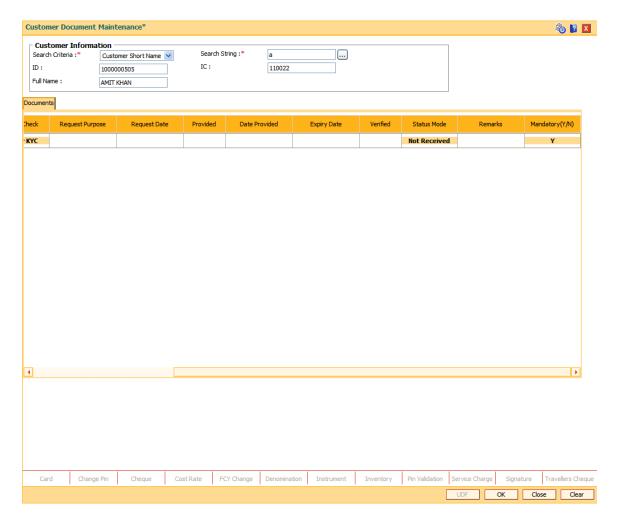

The system displays the customer document details in the **Documents** tab.

Documents

Field Name	Description
Serial No	[Display]
	This column displays the system generated serial number, based on the existing documents attached to the customer or documents in the plan.
Plan Code	[Display]
	This column displays the plan code.
	The plan codes are maintained in the Document Plan Code Maintenance (Fast Path: ORS35) option.
	A plan code is maintained to create a consolidated set of standard documents. Ideally banks may maintain a plan code based on the product type. Multiple documents can be maintained under a single plan code.
Name of Document	[Display]
	This column displays the name of the document corresponding to the serial number and the plan code.

Document Check [Display]

This column displays the check level for the selected document as maintained in the **Document Plan Code Maintenance** (Fast Path:

ORS35) option.

By default it displays the value as Customer KYC.

Request Purpose [Mandatory, User Input]

This field will capture the purpose of documents requested.

Request Date [Mandatory, User Input (YYYYMMDD)]

This field will capture the date on which the documents were requested

from the customer.

Provided [Optional, UserInput]

This field is used to capture if the documents are provided or not.

Date Provided [Conditional mandatory (if Provided is Y), User Input (YYYYMMDD)]

This field will capture the date on which the documents are provided by

the customer.

Expiry date [Optional, UserInput (YYYYMMDD)]

This field will capture the date after which document will no longer be

valid.

Verified [Optional, UserInput]

This field is used to capture if the documents are verified or not.

Status Mode [Mandatory, Drop-Down]

Select the status of the document from the drop-down list.

The options are:

Not Received

Received

Waive

Returned

For a mandatory document, the status has to be either Received or

Returned.

Remarks [Optional, Alphanumeric, 120]

Any remarks/comments regarding the received documents from the

customer

Mandatory (Y/N) [Display]

This column displays the value as Y if the document is mandatory else

N.

It is the default value for each document, as maintained in the **Document Plan Code Maintenance** (Fast Path: ORS35) option.

6. Modify the relevant document status.

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Authorised..". Click the **Ok** button.
- 9. The system displays the message "Transaction completed successfully..". Click the **Ok** button.

1.8. TDS05 - Customer Special Tax Code Maintenance

Using this option, you can maintain special tax codes for a specified period at customer level. After changing tax codes, the additional tax 1 and additional tax 2 is applicable as maintained in the **Additional Tax Maintenance** (Fast Path: BAM51) option. The new tax codes are updated during BOD after remote authorisation. During account opening, if special tax code exists for the customer, then the special tax code will be applicable for the account.

Note 1: If special tax code has to be maintained, then tax waiver should be discontinued. Both cannot coexist.

Note 2: You can only delete the special tax codes which have not been activated.

Definition Prerequisites

- 8053 Customer Addition
- BAM51 Additional Tax Maintenance

Modes Available

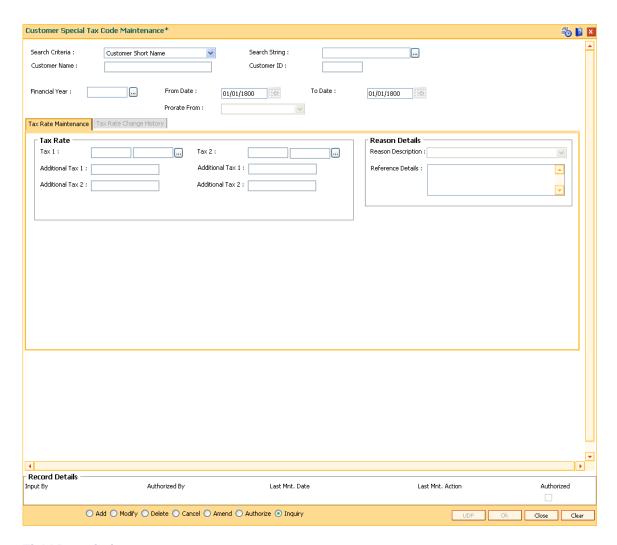

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain customer special tax codes

- Type the fast path TDS05 and click Go or navigate through the menus to Global Definitions > Master > Customer Special Tax Code Maintenance.
- 2. The system displays the **Customer Special Tax Code Maintenance** screen.

Customer Special Tax Code Maintenance

Field Name

Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the dropdown list.

The options are:

- Customer Short Name
- **Customer IC** Identification criteria (IC) arrived at by the bank during customer addition
- Customer ID Unique identification given by the bank

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their

respective criteria. Select the appropriate customer from the existing

customer list.

For example, the customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Customer Name [Display]

This field displays name of the customer.

Customer ID [Display]

This field displays the ID of the customer.

Financial Year [Mandatory, Numeric, Four]

Type the financial year for which tax special code has to be

maintained.

If the tax special code is to be applicable across financial years, then

the value should be entered as 2099.

From Date [Optional, dd/mm/yyyy, Pick List]

Type the date from which special tax code will be applicable or select

it from the pick list.

The value should be a future date within the financial year.

To Date [Optional, dd/mm/yyyy, Pick List]

Type the date upto which the special tax code will be applicable or

select it from the pick list.

The value should be greater than the From Date and within the

financial year.

Prorate From [Mandatory, Drop-Down]

Select the date from which the tax should be computed from the drop-

down list.

The options are:

• Effective Date - If this option is selected, the tax will be

computed from the date on which tax code changes

• Last Taxable Date - If this option is selected, tax will be computed from the last taxable date

3. Click the Add button.

4. Select the search criteria from the drop-down list.

5. Enter the search string and select the appropriate record from the pick list.

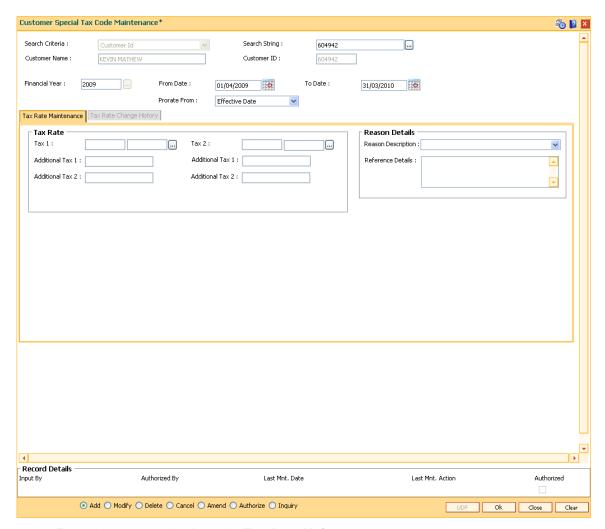

6. Enter the financial year.

7. Type the start and end date or select it from the pick list.

8. Select the date from which the tax should be computed from the drop-down list.

Customer Special Tax Code Maintenance

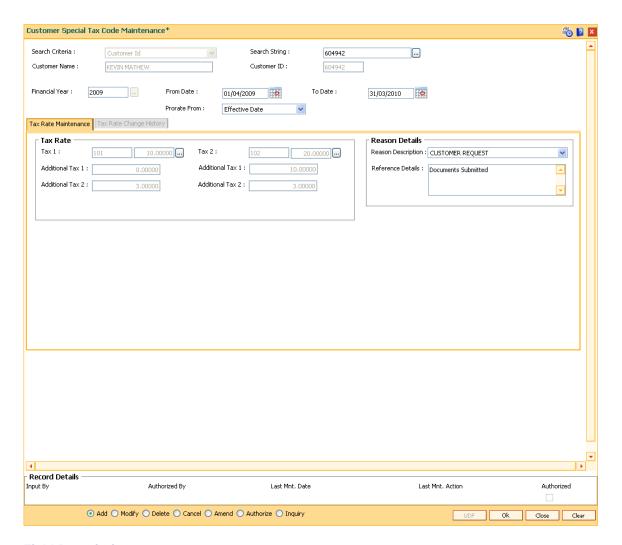

9. Enter the relevant details in the **Tax Rate Maintenance** tab.

Tax Rate Maintenance

Field Name	Description
Tax Rate	
Tax 1	[Optional, Pick List] Select the tax 1 code from the pick list.
Additional Tax 1	[Display] This field displays the additional Tax 1 on Tax 1 code selected in the corresponding field.
Additional Tax 2	[Display] This field displays the additional Tax 2 on Tax 1 code selected in the corresponding field.
Tax 2	[Optional, Pick List] Select the tax 2 code from the pick list.

Additional Tax 1 [Display]

This field displays the additional Tax 1 on Tax 2 code selected in the

corresponding field.

Additional Tax 2 [Display]

This field displays the additional Tax 2 on Tax 2 code selected in the

corresponding field.

Reason Details

Reason Description [Mandatory, Drop-Down]

Select the appropriate reason from the drop-down list.

The reason codes are maintained using the **Reason Codes**

Maintenance (Fast Path:BAM40) option.

Reference Details [Optional, Alphanumeric, 120]

Type the additional details, if any.

10. Click the **Ok** button.

 The system displays the message "Record Added...Authorisation Pending..". Click the Ok button.

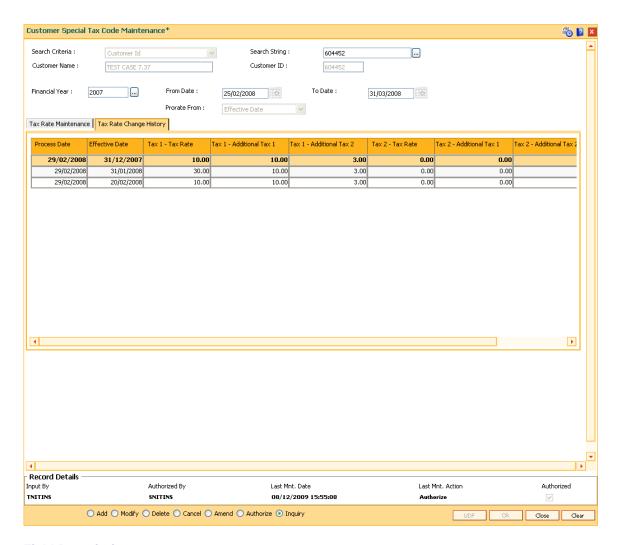

12. The customer special tax codes are added once the record is authorised.

To view the customer special tax codes

- 1. Click the **Inquiry** button.
- 2. Select the search criteria from the drop-down list.
- 3. Enter the search string and select the appropriate record from the pick list.
- 4. Enter the financial year and select it from the pick list.
- 5. The system displays the details in the **Tax Rate Change History** tab.

Tax Rate Change History

Field Name	Description
Process Date	[Display] This column displays the date on which the tax rate was modified.
Effective Date	[Display] This column displays the date from which the TDS variance is
Tax 1 - Tax Rate	applicable. [Display]
Tax 1 - Additional Tax 1	This column displays the new tax 1 rate after the addition of variance. [Display] This column displays the additional tax 1 for new rate.
Tax 1 - Additional Tax 2	[Display] This column displays the additional tax 2 for new rate.

Tax 2 - Tax Rate [Display]

This column displays the new tax 2 rate after the addition of variance.

Tax 2 - Additional [Display]

Tax 1 This column displays the additional tax 1 for new rate.

Tax 2 - Additional [Display]

Tax 2 This column displays the additional tax 2 for new rate.

Reason for Change [Display]

This column displays the reason for the addition of the variance.

6. Click the Close button.

1.9. Customer Image Capture

The system allows the banker to capture the specimen signature and/or the photograph of customer's to facilitate the online verification process for the teller. This feature will replace the manual storage and retrieval of specimen signatures and photographs. A customer can be linked with a maximum of one signature and one photograph. In an offline scenario, these images can be retrieved from the customer's home branch.

The specimen signature and photograph of the customer is scanned and stored as a .jpeg or .jpg image. The teller can attach the scanned image to an account using the Linking Customer Image option.

1.10. 7102 - Link Cust Image

Using this option the photograph and/or specimen signature of the customer can be linked to a **Oracle FLEXCUBE** customer. This feature of capturing signature and identity photograph of the customer is required by the teller to facilitate the online verification process.

This linking can be done in the online mode using the **FLEXCUBE** Customer ID or Customer IC and Customer type combination. A customer can be linked with a maximum of one signature and one photograph.

In an offline scenario, these images can be retrieved from the customer's home branch. The supervisor can authorise the photograph and signatures linked to the customer, using the **Authorise Captured Image** (Fast Path: 7104) option. The image can be viewed only after it has been authorised.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

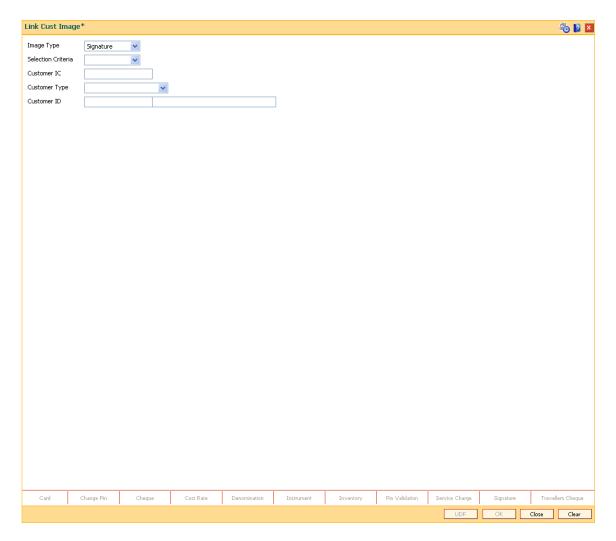

Not Applicable

To link the customer image

- 1. Type the fast path **7102** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Link Cust Image**.
- 2. The system displays the **Link Cust Image** screen.

Link Cust Image

Field Name	Description
Image Type	[Mandatory, Drop-Down] Select the image type from the drop-down list, It depends on whether you want to link the photograph or the signature of the customer. By default, the system displays the Signature option.
Selection Criteria	 [Mandatory, Drop-Down] Select the search criteria to search for the customer from the drop-down list. The options are: Customer IC Identification criteria (IC) arrived at by the bank during customer addition. Customer ID- Unique identification given by the bank.
Customer IC	[Conditional, Alphanumeric, 30] Type the identification code of the customer. A customer IC along with customer type is a unique method of customer

identification across the bank (covering all branches). Based on the IC and Customer Type, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

This field is enabled only if the **Customer IC** option is selected in the **Selection Criteria** field.

Customer Type

[Conditional, Drop-Down]

Select the customer type from the drop-down list.

You can choose to set up multiple customer types to segregate the customer's using the **Customer Types Maintenance** (Fast Path: CIM08). Further processing such as tax applicable, Service Charges, etc., are levied based on the customer type.

This field is disabled, if the **Customer ID** option is selected in the **Selection Criteria** field.

Customer ID

[Conditional, Alphanumeric, 20]

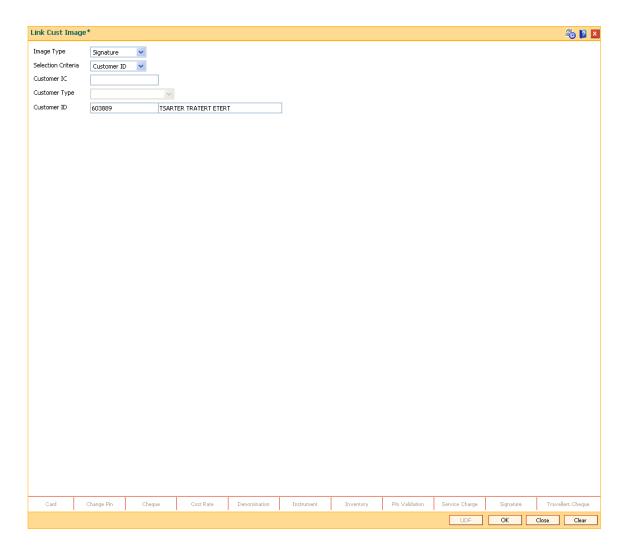

Type the ID of the customer. The name of the customer is displayed in the adjacent field.

A customer ID is an identification number generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC & Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system. This field is enabled only if the Customer ID is selected in the **Selection Criteria** field.

- 3. Select the image type and selection criteria from the drop-down list.
- 4. Depending upon the option selected in the selection criteria field, the system enables the relevant field.
- 5. Enter the required information.

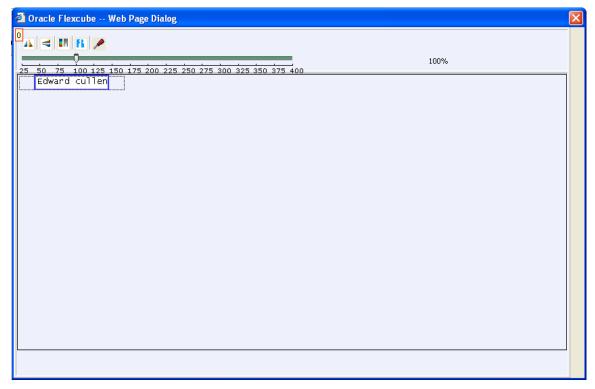

Link Cust Image

Signature/Image

- 3. Click the Ok button.
- 4. The system displays the message "Image Inserted. Authorisation Pending".
- 5. Click the Ok button.
- 6. Image is linked once it is authorised.

Note: Paste the scanned signature on to the clipboard. Alternatively, the system picks up the .bmp file based on your setting specifications for the source of the signature, i.e., whether it is picked up from the .bmp files or from the clipboard.

1.11. 7103 - Unlink Cust Image

Using the **Link Cust Image** (Fast Path: 7102) option, you can link photograph and/or specimen signature of the customer. If incase wrong image is linked and noticed at the time of authorisation then you can delete the unauthorised image for the selected customer using this option.

Definition Prerequisites

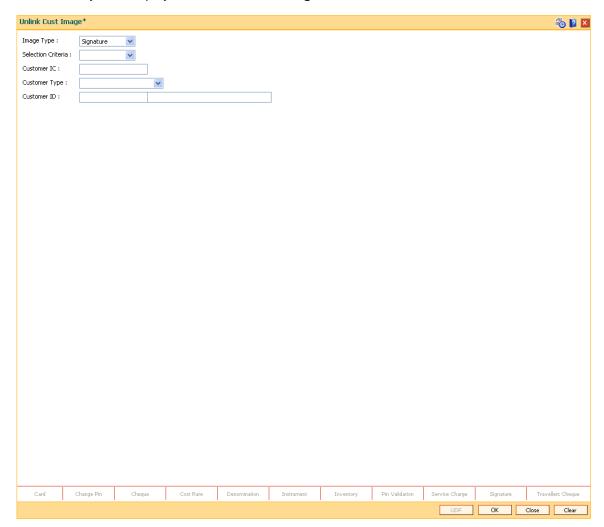

- 7102 Link Cust Image
- 7111 Modify Customer Image

Modes Available

Not Applicable

To cancel the customer image

- Type the fast path 7103 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Unlink Cust Image.
- The system displays the Unlink Cust Image screen.

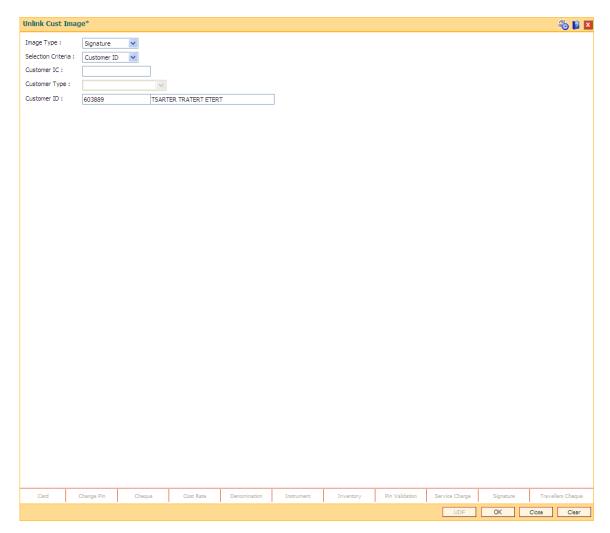

Field Name	Description
Image Type	[Mandatory, Drop-Down] Select the Image Type from the drop-down list. Image type depends on whether you want to unlink the photograph or the signature of the customer. By default, the system displays the Signature option.
Selection Criteria	[Mandatory, Drop-Down]
	Select the search criteria, to search for the customer, from the drop-down list.
	The options are:
	Customer short name
	 Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
	 Customer ID- Unique identification given by the bank.
Customer IC	[Conditional, Alphanumeric, 10] Type the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
Customer Type	[Conditional, Drop-Down] Select the customer type from the drop-down list. You can choose to set up multiple customer types to segregate the customer's using the Customer Types Maintenance (Fast Path: CIM08) option. Further processing such as tax applicable, Service Charges, etc., are levied based on the customer type. This field is disabled, if the Customer ID option is selected in the Selection Criteria field.
Customer ID	[Conditional, Alphanumeric, 20] Type the ID of the customer. The name of the customer is displayed in the adjacent field. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system. This field is enabled only if the Customer ID is selected in the Selection Criteria field.

- 3. Select the image type and selection criteria from the drop-down list.
- 4. Enter the data corresponding to the selection criteria and press the **<Tab>** key.

Unlink Cust Image

- 5. Click the **Ok** button.
- 6. The system displays the message "Do you want to cancel the image?".
- 7. Click the **Ok** button.

1.12. 7104 - Authorise Captured Image

Using this option the supervisor can authorise the photograph and signatures linked to the customer which were done through the **Link Cust Image** (Fast Path: 7102) option.

The image can be viewed only after it has been authorised. This feature will replace the manual storage and retrieval of specimen signatures and photographs.

Definition Prerequisites

• 7102 - Link Cust Image

Modes Available

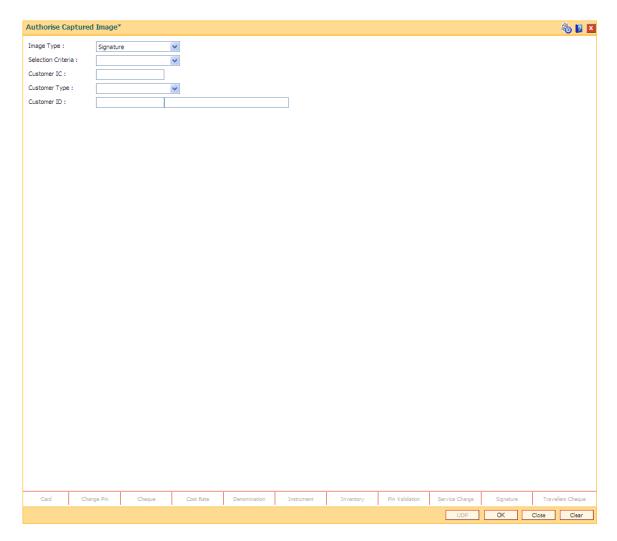

Not Applicable

To authorise the customer image

- 1. Type the fast path **7104** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Authorisation > Authorise Captured Image**.
- 2. The system displays the Authorise Captured Image screen.

Authorise Captured Image

Field Name	Description
Image Type	[Mandatory, Drop-Down] Select the Image Type from the drop-down list. Image type depends on whether you want to authorise the photograph or the signature of the customer. By default, the system displays the Signature option.
Selection Criteria	[Mandatory, Drop-Down] Select the search criteria, to search for the customer, from the drop-down list.
	The options are: • Customer short name
	 Customer IC Identification criteria (IC) arrived at by the bank during customer addition. Customer ID- Unique identification given by the bank.

Customer IC [Conditional, Alphanumeric, 20]

Type the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the IC and Customer Type, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

This field is enabled only if the **Customer IC** option is selected in the

Selection Criteria field.

Customer Type [Conditional, Drop-Down]

Select the customer type of the drop-down list.

You can choose to set up multiple customer types to segregate the customer's using the **Customer Types Maintenance** (Fast Path: CIM08) option. Further processing such as tax applicable, Service

Charges, etc., are levied based on the customer type.

This field is disabled if the Customer ID option is selected in the

Selection Criteria field.

Customer ID [Conditional, Alphanumeric, 20]

Type the ID of the customer. The name of the customer is displayed in

the adjacent field.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for

searching and tracking the customer in the system.

This field is enabled only if the Customer ID is selected in the

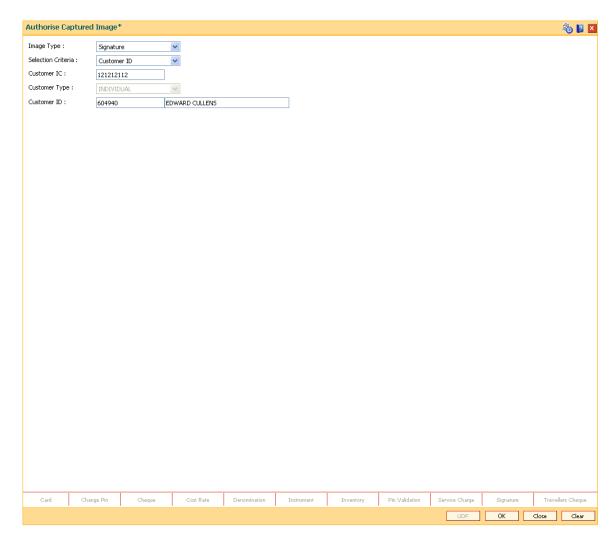

Selection Criteria field.

3. Select the image type and the selection criteria from the drop-down list.

4. Enter the data corresponding to the selection criteria.

Authorise Captured Image

- 5. Click the Ok button.
- 6. The system displays the message "Image Authorisation Successful".
- 7. Click the **Ok** button.

1.13. 7105 - Customer Image Display

The photograph and/or specimen signature of the customer can be linked to **Oracle FLEXCUBE** customer using the **Link Cust Image** (Fast Path: 7102) option. The supervisor can authorise the photograph and signatures liked to the customer, using the **Authorise Captured Image** (Fast Path: 7104) option.

Using this option you can view the image for the selected customer after it has been authorised. The system also you to zoom in, zoom out, flip, invert the photographs / signatures.

Definition Prerequisites

• 7104 - Authorise Captured Image

Modes Available

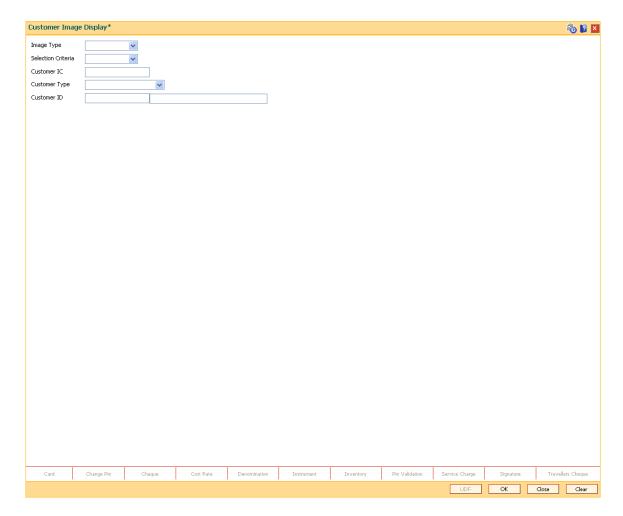

Not Applicable

To view the customer image

- 1. Type the fast path **7105** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Image Display**.
- 2. The system displays the **Customer Image Display** screen.

Customer Image Display

Field Name	Description
Image Type	[Mandatory, Drop-Down] Select the image type from the drop-down list. The options are:
	Signature
	• Photo
	Image type depends on whether you want to view the photograph or the signature of the customer. By default, the system displays the Signature option.

This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system. This field is enabled only if the Customer ID is selected in the Selection Criteria field.

3. Select the image type and the selection criteria from the drop-down list.

4. Enter the relevant information corresponding to the selection criteria.

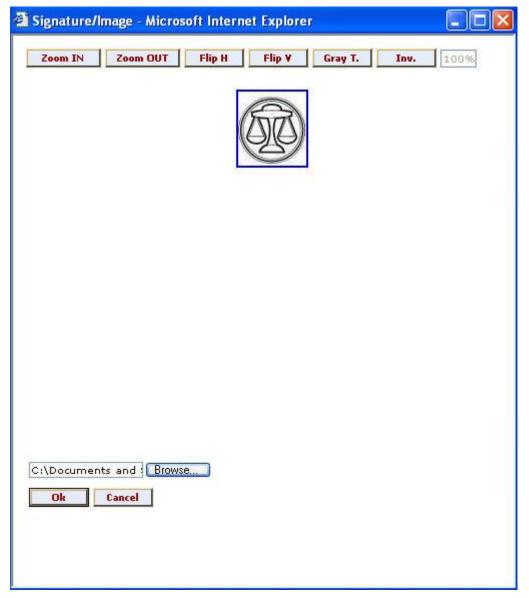

Modify Customer Image

- 5. Click the **Ok** button.
- 6. The system displays the Signature/Image screen.

Signature/Image

- 7. Type the appropriate path for the image file or click the **Browse** button to select the image file. The system will display the image to be linked.
- 8. Click the Ok button.
- 9. The system displays the message "Image Linked Successfully. Authorisation Pending". Click the **Ok** button.
- 10. The modified image is linked to the account successfully once the record is authorised.

1.15. 3000 - Thumb Print Interface

Using this option you can verify the thumbprint of the customer. It is an interface with the thumbprint application online and displays whether the verification is successful or not.

It will also display the customer ID and all the accounts linked to the customer ID. Once the account in which the customer wants to perform transaction is selected, you can navigate to that particular screen, and the details of the account number are displayed in the subsequent screen.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

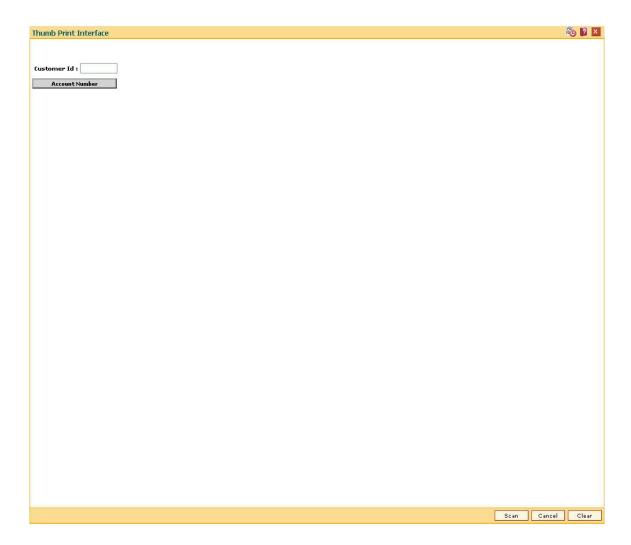

Not Applicable

To verify the thumb print

- 1. Type the fast path 3000 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Thumb Print Interface.
- 2. The system displays the **Thumb Print Interface** screen.

Thumb Print Interface

- 3. Connect the thumb scanner to the system.
- 4. Click the **Scan** button.
- 5. The system displays the message "Please Insert The Card".
- 6. Insert the smart card in the scanner and click the **Ok** button.
- 7. The system displays the message "Sensor Feedback".
- 8. Scan the thumb impression of the customer on the sensor.
- 9. The system displays the message "Verification Successful". Click the **Ok** button.
- 10. The system displays the customer account numbers.
- Click the appropriate account number. Once the account number is selected the customer session is started.
- 12. Enter the fast path for the required transaction. The account details are automatically populated on the screen.

Note: If the thumb verification is not successful then the user will be prompted for dual authorization. If the user clicks the **Cancel** button then the transaction is aborted. If **Ok** button is

clicked then user has to enter the supervisor login details. Once the login details are verified then user can proceed with the transaction else the transaction is aborted.

1.16. Customer Based Transactions

Oracle FLEXCUBE provides the comprehensive customer-based information to a user of the financial service provider. The customer-based transaction allows the user to search for all details of the customer. Inquiries related to the account, can be conducted based on the customer search and the name of the customer can be changed on genuine circumstances, etc.

1.17. 7101 - IC No - Short Name Change

Using this option you can change the Customer IC, Short Name, or Full Name.

Due to various reasons, customer's may want to change their name; for example, a female customer could change her maiden name after marriage, or an individual / corporate customer could adopt a new name, etc. The passport number of a customer could be changed to a new IC number as the earlier passport would have got expired.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

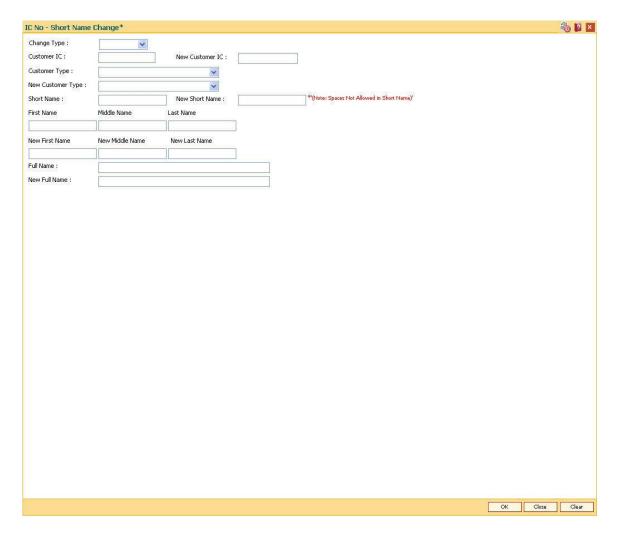

Not Applicable

To change customer name or SSN/TIN

- 1. Type the fast path **7101** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > IC No Short Name Change**.
- 2. The system displays the IC No Short Name Change screen.

IC No - Short Name Change

Field Name

Description

Change Type

[Mandatory, Drop-Down]

Select the appropriate attribute you want to change from the dropdown list.

The options are:

- Customer IC Identification given by a central authority
- Customer Short Name Short name of the customer.
- Full Name Name of the individual customer or the name of the corporate, in case of a corporate customer.

Customer IC

[Mandatory, Alphanumeric, 30]

Type the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the IC and Customer Type, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport

number, birth certificate or corporate registration can be used as a

customer IC.

New Customer IC [Conditional, Alphanumeric, 30]

Type the new identification code of the customer.

This field is enabled only if the **Customer IC** option is selected in the

Change Type field.

Customer Type [Mandatory, Drop-Down]

Select the appropriate customer type or category from the drop-down

list.

For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using the **Customer Types Maintenance** option.

New Customer Type [Conditional, Drop-Down]

Select the new customer type or category from the drop-down list.

For example, Individual, Corporate, Local Government, etc.

This field is enabled only if the **Customer IC** option is selected in the

Change Type field.

Short Name [Display]

This field displays the short name of the customer

The short name of the customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

New Short Name [Conditional, Alphanumeric, 20]

Type the new short name of the customer.

This field is enabled only if the **Short Name** option is selected in the

Change Type field.

First Name [Display]

This field displays the first name of the customer.

Middle Name [Display]

This field displays the middle name of the customer.

Last Name [Display]

This field displays the last name of the customer.

New First Name [Conditional, Alphanumeric, 252]

Type the new first name of the customer.

This field is enabled only if the **Full Name** option is selected in the

Change Type field.

New Middle Name [Conditional, Alphanumeric, 252]

Type the new middle name of the customer.

This field is enabled only if the Full Name option is selected in the

Change Type field.

New Last Name [Conditional, Alphanumeric, 252]

Type the new last name of the customer.

This field is enabled only if the Full Name option is selected in the

Change Type field.

Full Name [Display]

This field displays the full name of the customer.

This field is populated only if the Full Name option is selected in the

Change Type field.

The full name of the customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

If the customer IC and Customer Type entered are of type 'Individual', then the first name, middle name and last name are displayed.

If the customer IC and Customer Type entered are of type 'Corporate', then the full name is displayed.

New Full Name

[Display]

This field displays the full name of an individual customer or the corporate name in case of a corporate customer.

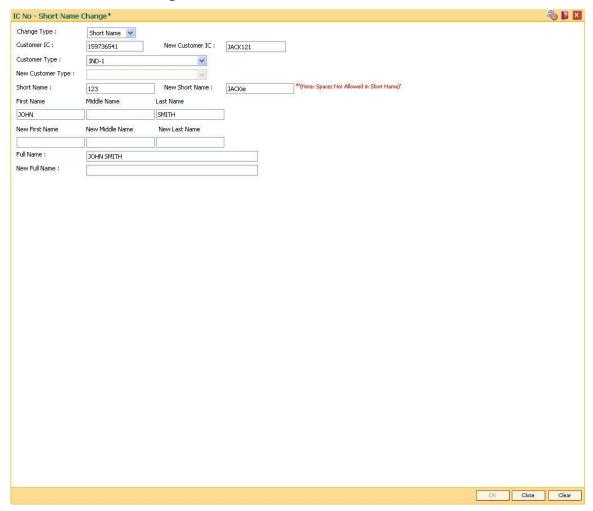

This field is populated only if the **Full Name** option is selected in the **Change Type** field.

If the customer IC and Customer Type entered is of type 'Individual', then type the first name, middle name and last name.

If the customer IC and Customer Type entered is of type 'Corporate', then type the full name.

- 3. Select the change type from the drop-down list.
- 4. Enter the customer IC number and the required customer details.

IC No - Short Name Change

5. Click the Ok button.

- 6. The system displays the message "Authorisation Required. Do You Want to Continue". Click the **OK** button.
- 7. The system displays the **Authorization Reason** screen.
- 8. Enter the relevant information and click the **Grant** button.
- 9. The system displays the message "Update Complete". Click the **Ok** button.

Note: For more information on Authorisation transactions, refer to the *FLEXCUBE Introduction User Manual*.

1.18. Cl002 - Backoffice User Definition*

This option is used to define the details of the back office user.

Definition Prerequisites

Not Applicable

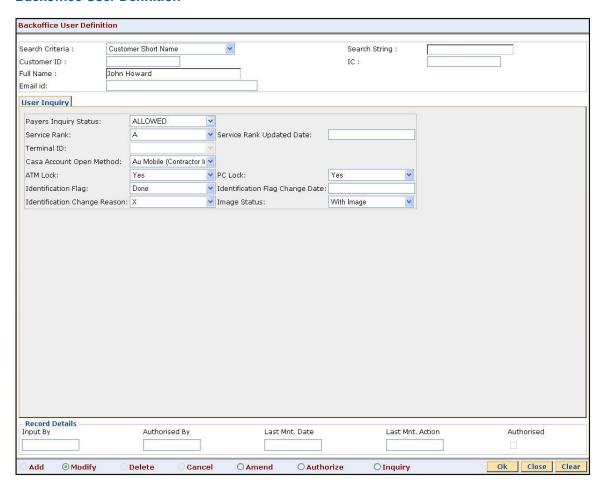

Modes Available

Modify, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the back office user definition details

- Type the fast path Cl002 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Backoffice User Definition.
- 2. The system displays the **Backoffice User Definition** screen.

Backoffice User Definition

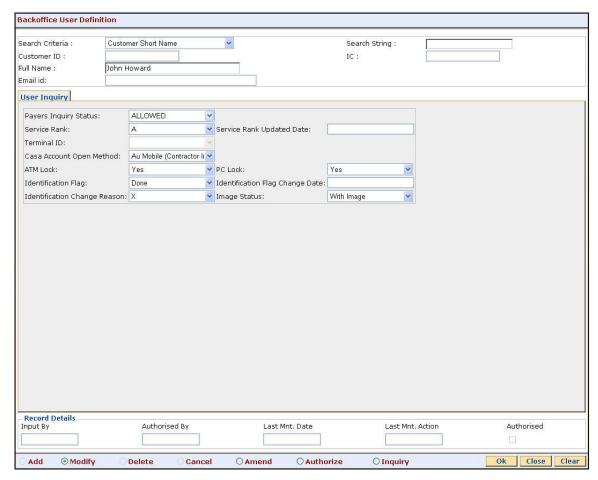

Field Name	Description
Search Criteria	[Mandatory, Drop-Down] Select the search criteria to search for a customer from the drop-down list. The options are:
	Customer Short NameCustomer IcCustomer Id
Search String	[Mandatory, Alphanumeric, 40] Type the search string according to the data entered in the Search Criteria field.
Customer ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
IC	[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
Full Name	[Display] This field displays the full name of the customer.
Email id	[Mandatory, Alphanumeric, 16] Type the e-mail ID of the customer.

- 3. Click the **Modify** button.
- 4. Select the search criteria from the drop-down list and type the search string.

Backoffice User Definition

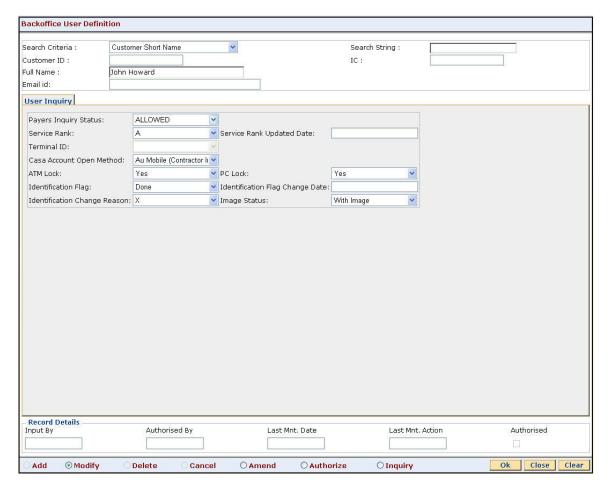

5. Enter the required information in the **User Inquiry** tab.

User Inquiry

Field Name

Description

Payers Inquiry Status

[Mandatory, Drop-Down]

Select the payer's status inquiry, to define the back office users, from the drop-down list.

If the number of changes made exceed the limit, the system marks the status as Not Allowed.

If the customer requests to reset the counter, the user can change the account status to Allowed using the Modify option. This field has to be authorised after modification.

The options are:

- ALLOWED
- NOT ALLOWED

By default the system displays Allowed.

Service Rank

[Mandatory, Drop-Down]

Select the service rank of the customer from the drop-down list.

When a KDDI customer opts for "AU Linkage"- he is given "A" rank.

In all other cases, the customer's are "B" rank.

Service Rank Updated Date [Display]

This field displays the date and time when the service rank of a customer was modified either from "A" to "B" or vice-versa.

Terminal ID

[Display]

This field displays the Terminal Id / Subscriber id which comes in the http message in every request sent from a mobile.

Casa Account Open Method

[Mandatory, Drop-Down]

Select the CASA account opening method from the drop-down list.

ATM Lock

[Mandatory, Drop-Down]

Select whether the ATM should be locked from the drop-down list.

The options are:

Done

Identification Flag Change Date [Mandatory, Numeric, yyyy/mm/dd, hh:mm:ss]

Type the date on which the identification flag status is changed.

Identification Change Reason

[Mandatory, Drop-Down]

Select the reason for changing the identification flag status from the drop-down list.

arop-aown list.

Image Status [Mandatory, Drop-Down]

Select the image status to be displayed from the drop-down list.

The options are:

With Image

Without Image

Under Confirmation

Confirmed

- 6. Click the **Ok** button.
- 7. The system displays the message "Record Modified...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.

1.19. CI141 - Customer To Customer Relation

Using this option, you can maintain the records of relationship shared by any particular customer (referred as primary customer) with other customer's of the bank (referred as secondary customer's).

The account relationships can be defined in the **Customer Account Relationship Maintenance** (Fast Path: CI142) option.

These relations are maintained only for information purposes. No processing is done using these definitions.

Note: This transaction is automatically authorised.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

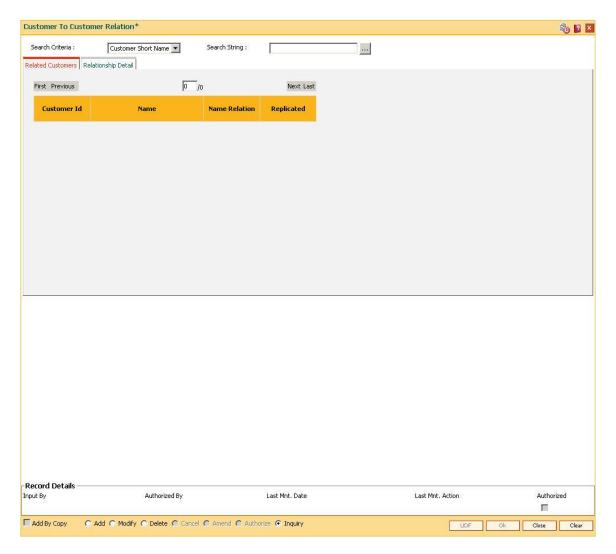

Add By Copy, Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the customer relation details

- 1. Type the fast path Cl141 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer To Customer Relation.
- 2. The system displays the **Customer To Customer Relation** screen.

Customer To Customer Relation

Field Name	Description
Search Criteria	[Mandatory, Drop-Down] Select the search criteria from the drop-down list. The options are:
	 Customer Short Name - Short name of the customer.
	 Customer IC - Identification given by a central authority.
	 Customer ID - Unique identification given by the bank.
Search String	[Mandatory, Alphanumeric, 20, Pick List]
	Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.
	If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer

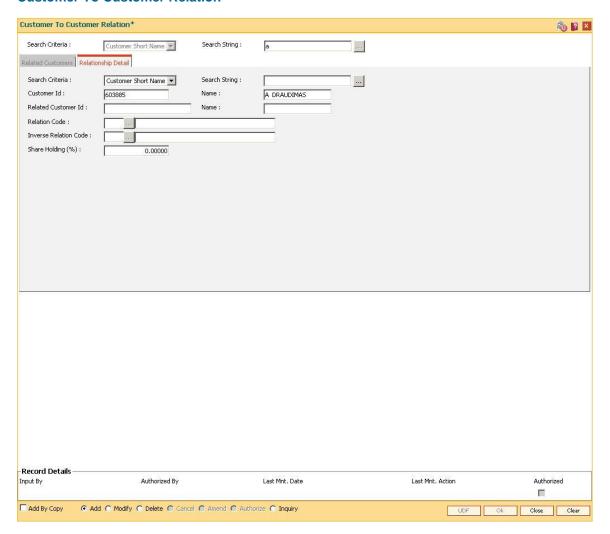

from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Enter the search string and press the **<Tab>** key and select the customer from the pick list.

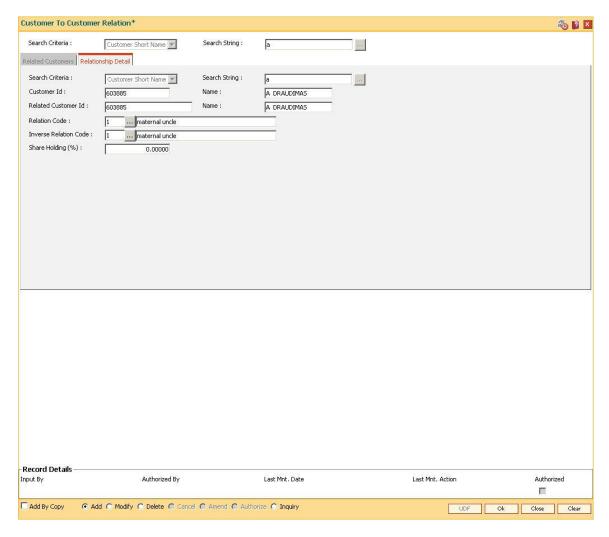

Customer To Customer Relation

6. Enter the relevant information in the **Relationship Details** tab.

Relationship Detail

Field Name Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria from the drop-down list.

The options are:

- Customer Short Name Short name of the customer.
- Customer IC Identification given by a central authority.
- Customer ID Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the **Search String** field.

Based on the search string, a list of customer's is generated. Select the secondary customer, for whom you want to add relationship with other customer's of the bank.

Customer

[Display]

ld

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Name

[Display]

This field displays the full name of the secondary customer who shares a

relationship with the primary customer.

The full name of the customer is defaulted from the Customer Addition (Fast

Path: 8053) option.

Related Customer [Display]

This field displays the ID of the secondary customer.

ld Name

[Display]

This field displays the full name of the secondary customer.

The full name of the secondary customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

Relation Code [Mandatory, Pick List]

Select the appropriate relationship code from the pick list

Relation code is used to define the relationship of the secondary customer with

the primary customer. Each code uniquely identifies a relationship.

Inverse

[Mandatory, Pick List]

Relation Code

Select the Inverse Relation Code from the pick list.

Inverse relation code is used to define the relationship of the primary customer with the secondary customer. Each code uniquely identifies a relationship.

The system does not validate that this inverse relation code entered is inverse to

the Relation Code selected earlier.

Share holding (%)

[Optional, Numeric, Three, Five] Type the share holding percentage.

It allows you to set multiple relationships between two customer's.

The share holding percentage depends upon the primary customer, secondary

customer and the relation code used to relate the two customer's.

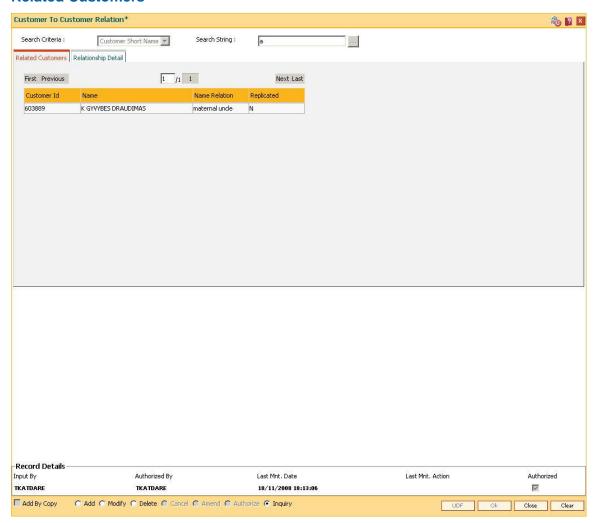

- 7. Click the Ok button.
- 8. The system displays the message "Record Authorised...". Click the **Ok** button.

To view the customer relation details

- 1. Click the **Inquiry** button.
- 2. Select the search criteria from the drop-down list.
- 3. Enter the search string and press the <**Tab**> key and select the customer from the pick list.
- 4. The data corresponding to the search criteria is displayed in the **Related Customer** tab.

Related Customers

Field Name	Description
Customer Id	[Display]
	This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category
	combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Name	[Display] This field displays the full name of the secondary customer who shares a relationship with the primary customer.
	The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.

Name Relation [Display]

This field displays the relationship name of the secondary customer

with the primary customer.

Replicated [Display]

This field displays whether the customer is replicated.

5. Double-click the record to view the relationship details.

6. Click the Close button.

1.20. Cl162 - Combined Statement Plan

Using this option you can prepare a combined statement of customer accounts. You can maintain instructions for providing a single statement to customer's who own multiple accounts. Each combined statement plan must have at least two accounts associated with it.

An account cannot be included in more than one statement plan. A plan number is given to each combination of accounts that are associated with a plan. Closed accounts cannot be included in statement plans. Each account in the combined statement plan will have a flag called Details/Summary.

If the flag is selected as Summary, then only summary will be printed in the combined statement.

The default value for Details/Summary flag will be as follows:

- Details- For CASA with statement (including OD account)
- Summary- For CASA with passbook, Term Deposit & Loan accounts (FCR and FCC)

The following account types are available for the combined statement:

- Current account
- Savings account with statement
- Savings account with passbook (can be identified with the passbook flag at the account level)
- Term deposit accounts
- Loan accounts(in FCR and FCC).

Also the bank can decide to have bank level maintenance as 'Automatic combined statement plan generation' during FCR setup. In this case automatic inclusion of accounts in combined statement plan process happens in the end of day process.

For Example:

If a customer has at least one CASA account with relation as SOW and Non Syariah and is not part of any combined statement plan, opens any new CASA (With relation as SOW), TD or Loan account then that account along with existing CASA account will be automatically included in Automatic Combined Statement Plan i.e. Plan No.1.

However, if the customer doesn't want or have a special request for his/her combined statement structure, branch can uncombine the statement of accounts manually. In case the customer opts for more than one combined statement, the user can create separate combined statement plan manually. The address in the combined statement plan will be defaulted with the customer mailing address (at the time of automatic plan generation or manual addition).

By default, customer accounts (under 1 CIF) will be included into one combined statement automatically except joint account (And/Or). If customer requests, the joint accounts will be included in the combined statement manually.

If there is only one account in a combined statement plan, because of closure of other accounts, then combined statement plan will be deleted automatically and only single statement will be printed for the month.

If there are more than one combined statement plan for the customer, then the new accounts will be combined with the high priority plan i.e. the one created first.

The maximum number of combined statement plans which can be created per customer can be 99. Any user generated Combined Statement Plan will start from 2 and will carry on till 99 as plan number 1 is reserved for the system. The maximum number of accounts that can be included in a combined statement plan can be 9999.

Note: The system automatically authorises this transaction.

Definition Prerequisites

• 8053 - Customer Addition

Ref660766161

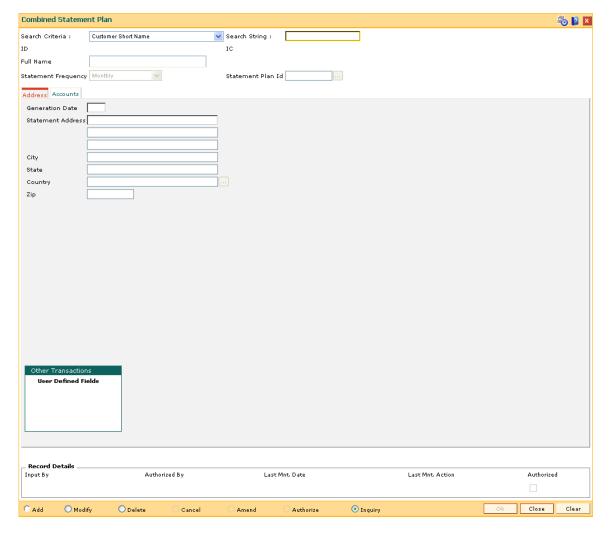

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the combined statement

- 1. Type the fast path Cl162 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Combined Statement Plan.
- 2. The system displays the Combined Statement Plan screen.

Combined Statement Plan

Field Name	Description
Search Criteria	[Mandatory, Drop-Down]
	Select the search criteria, to search for the customer, from the drop-down list.
	The options are:
	Customer short name
	 Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
	 Customer ID- Unique identification given by the bank.
Search String	[Mandatory, Alphanumeric, 20]
	Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.
	If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.
	For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.
ID	[Display]
	This field displays the ID of the customer.
	A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
IC	[Display]
	This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
Full Name	[Display]
	This field displays the full name of the customer.
	The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.
Statement Frequency	[Display] This field displays the time frequency or interval for generating the account statements. For example, Monthly, Quarterly, Yearly.

By default, this field displays Monthly.

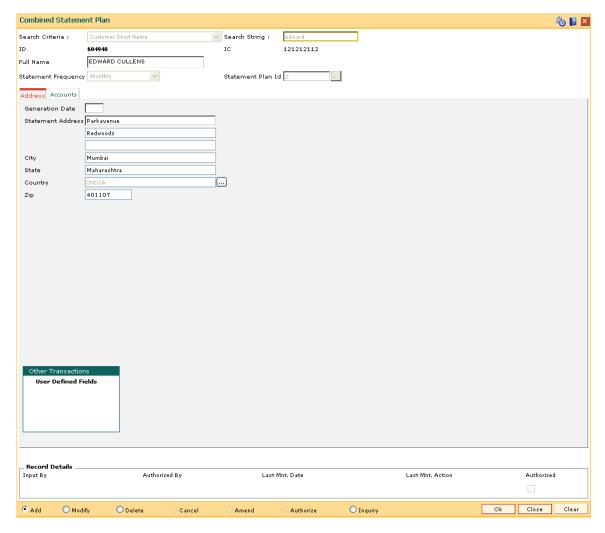

Statement Plan Id

[Display]

This field displays the statement plan ID, a serial number maintained by the system, to track multiple combined statements that may be maintained by the bank for the same customer.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Enter the search string and press the <Tab> key and select the customer from the pick list.

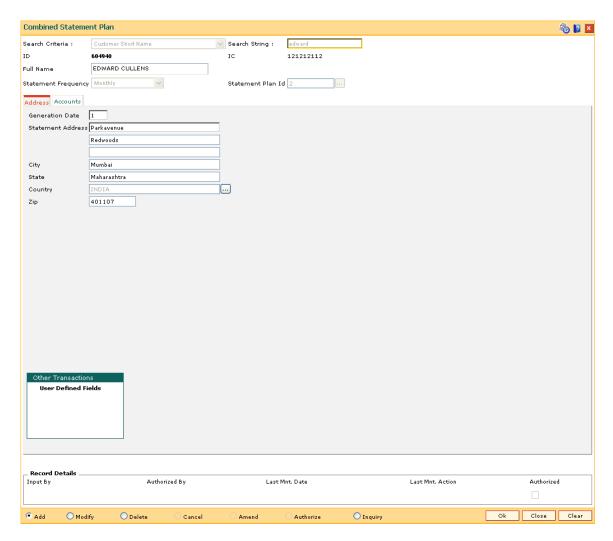

Combined Statement Plan

- 6. The system displays the address and account details in the tab screens.
- 7. Enter the required information in the various tabs.

Address

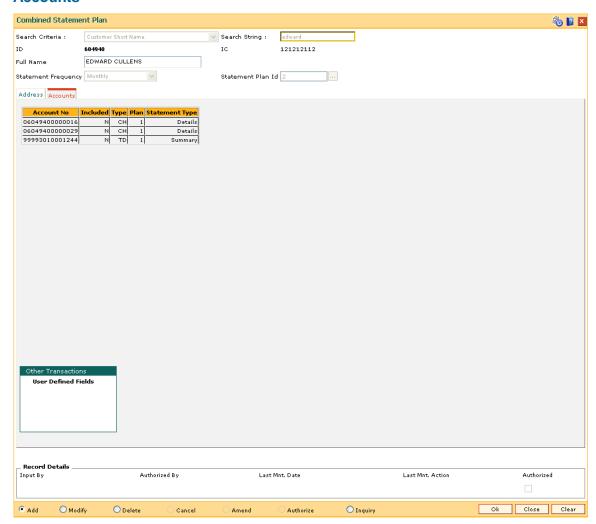

Field Name	Description
Generation Date	[Mandatory, Numeric, Two] Type the date on which the combined statements should be generated. If the date is specified as 15, then the statements will be generated on the 15th of every month, for the previous month.
Statement Address	[Mandatory, Alphanumeric, 35] Type the address where the combined statements should be sent. This address can differ from the customer/account address.
City	[Optional, Alphanumeric, 35] Type the name of the city. This field is part of the Statement Address.
State	[Optional, Alphanumeric, 35] Type the name of the state. This field is part of the Statement Address.
Country	[Mandatory, Pick List] Select the country name from the pick list. This field is part of the Statement Address.

Accounts

Field Description

Field Name	Description
Account No	[Display] This field displays the list of all the accounts with which the customer has a primary relationship.
Included	[Toggle] Click the toggle status to change the value. The options are:
	 Y - If Y is displayed against an account, it indicates that the account is included in the combined statement plan
	N - If N is displayed against an account, it indicates that the account is

not included in the combined statement plan.

You can add or remove an account to/from the combined statement plan by double-clicking the Included column to change the N value to Y and viceversa.

Closed accounts are displayed in the list of accounts, only for the information purpose and the system does not allow a closed account to be added to the plan.

Type

[Display]

This field displays the module to which the account belongs.

The options are:

- CH CH indicates that the account is a CASA account
- LN LN indicates that the account is a Loan account
- TD TD indicates that the account is a Term Deposit account

Plan

[Display]

This field displays the serial number of the plan code to which the account belongs.

If the value in the Included column is **Y**, then the Plan column displays the serial number of the plan code. If you change this value from N to Y, then the system will automatically display the plan code serial number currently used. If the account is not included in any combined statement plan then this column will have a zero value. If the account is included in another statement plan then the value in the Included column will be Y and the Plan column will

Statement Type

[Toggle]

Double-click on the field to change the statement type.

display the serial number of the plan code.

The options are:

- Detail: If this option is selected, then the system will include this account in the combined statement in the detail mode.
- Summary: If this option is selected, then the system will include this account in the combined statement in the summary mode.

For CASA with statement (including OD Account), default value will be Detail. For CASA with passbook, Loan and TD Accounts, default value will be Summary.

For the system initiated combined statement plans, the default options, based on the conditions above, will be set by the system.

- 8. Click the Ok button.
- The system displays the message "Record Authorised...Click Ok to Continue". Click the Ok button.

Examples for combined statement plan

Example 1: When a new customer opens account,

On 01/01/2007, a customer comes to branch and opens one CASA account No.111.

The customer has no other accounts other than the account which is opened during the day. Hence no system initiated combined statement plan will be generated in the EOD.

On 25/01/2007, customer comes to the branch for opening another TD account.

During the EOD, system will check whether any CASA accounts are available for the customer.

In this case, CASA Account No.111 already exists. Hence, in the EOD, a new system initiated combined statement pan (plan NO 1) will be generated and both the CASA account (111) as well as the newly opened TD account will be introduced in that plan.

Example 2:

When there are some TD accounts already available for the customer, and customer ZZZ has three TD accounts and one loan account with the bank. Since there are no CASA accounts, no combined statement will be created for the customer as combined statement plan requires at least one CASA account.

On 25/01/2007, customer ZZZ opens a CASA account with statement (passbook flag not ticked).

In the EOD, system will check whether there are any other account exists for the customer.

In this case, there are three TD accounts and one loan account available. Hence, system will create a combined statement plan and include the CASA account with statement along with three TD accounts and one loan account.

1.21. CIM10 - Customer NLS Details Maintenance

Using this option you can capture the customer address in native language such as Arabic, Japanese, etc., which aids in delivering correspondence through courier/post.

Definition Prerequisites

- BAM03 Branch Master Maintenance
- CIM03 Customer Prefixes Maintenance
- 8053 Customer Addition
- 7101 IC No Short Name Change

Modes Available

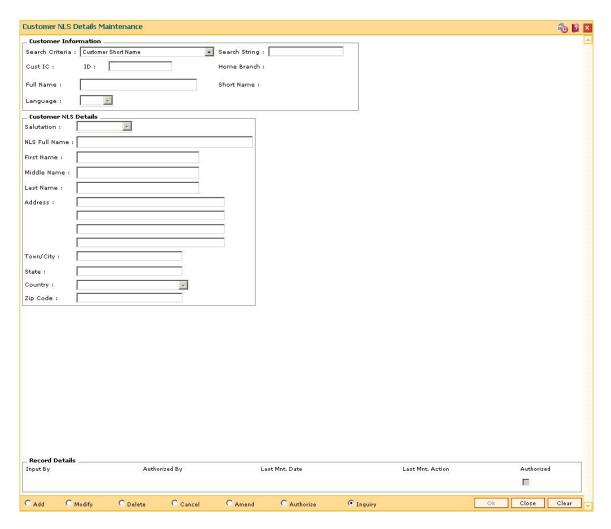

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain customer NLS details

- 1. Type the fast path CIM10 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer NLS Details Maintenance.
- 2. The system displays the Customer NLS Details Maintenance screen.

Customer NLS Details Maintenance

Field Name

Description

Customer Information

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system

displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Cust IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

Type the zip code.

3. Click the **Add** button.

4. Select the search criteria from the drop-down list and press the <**Tab>** key.

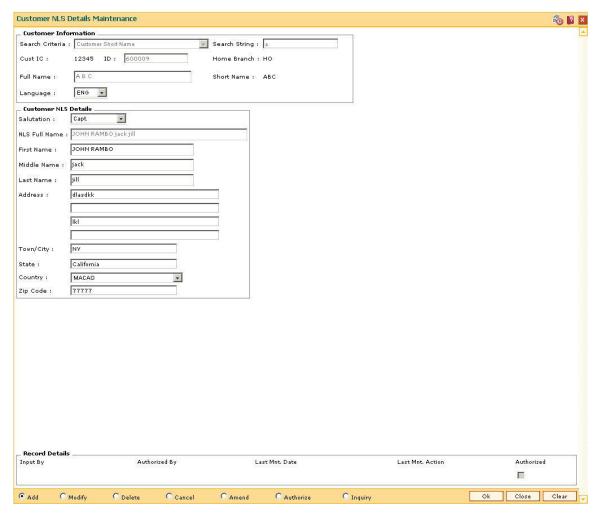

5. Type the search string and press the **<Tab>** key.

6. Select the customer from the pick list.

7. Enter the customer NLS details.

Customer NLS Details Maintenance

- 8. Click the Ok button.
- 9. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
- 10. The customer NLS details are added once the record is authorised.

1.22. CIM12 - Customer Contact/Complaint log Maintenance

Using this option, you can maintain a log of all contacts that a customer has had at the bank to help maintain continuity of all the discussions between the customer and various bank officers. You can also capture all customer complaints/requests, status of the complaints like whether it has been followed up or not, closed or not, etc.,

This facility is available to Customer/Non Customer (even non-customer's can call for some requests or information to the call centre)/ bank staff.

Any fees corresponding to a request will have to be manually handled by the bank.

For Example:

Customer calls up the call centre and requests for TPIN Activation on 17th Sep 2009, User has to check 'Customer Complaint/Request log' radio button and by default the request date will be captured as 17th Sep 2009.

User can choose:

- Nature of Request Service
- Criteria of Request Account Maintenance
- Measurement E Channel Maintenance
- Detail Measurement TPIN Activation

On clicking **OK** the request will be added.

If the request is modified on 19th Sep 2007, then the TPIN of the customer will be activated and the request will be closed. User will visit the screen in Modify mode and the date will be defaulted to 19th Sep 2007 and Officer ID will be modified to the current officer doing the modification (which can be modified).

- Status The user will change as 'Closed'.
- Description The user modifies the details.

Note: The sstem automatically authorises this transaction.

Definition Prerequisites

8053 - Customer Addition

Modes Available

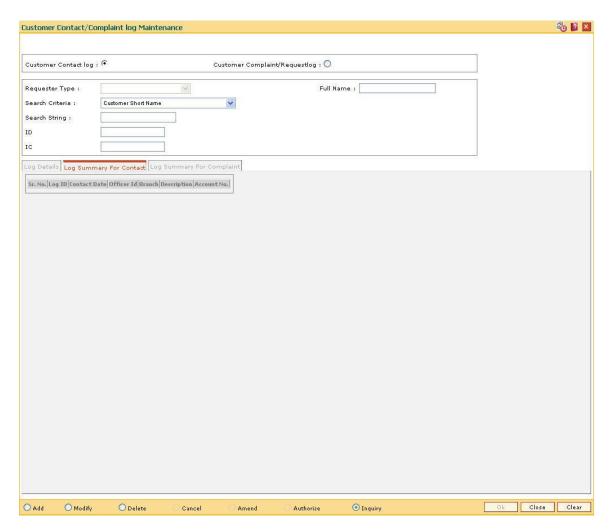

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the customer contact/complaint log

- Type the fast path CIM12 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Contact/Complaint log Maintenance.
- 2. The system displays the Customer Contact/Complaint log Maintenance screen.

Customer Contact/Complaint log Maintenance

Field Name	Description
Customer Contact log	[Mandatory, Radio Button]
	Click this option if the customer contact log is to be maintained.
Customer	[Mandatory, Radio Button]
Complaint/Requestlog	Click this option if the customer complain or request log is to be maintained.
Requester Type	[Conditional, Drop-Down]
	Select the requester type from the drop-down list.
	The options are:
	Customer
	Non Customer
	This field is enabled only if the Customer Complaint/Request Log option is selected.

Search Criteria

[Conditional, Drop-Down]

Select the search criteria, to search for the customer, from the dropdown list.

The options are:

- Customer short name
- Customer IC: Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID: Unique identification given by the bank

This field is disabled if the **Requester Type** is **Non Customer**.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the Search String field.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Full Name

[Conditional, Alphanumeric, 40]

Type the full name of the customer.

This field is enabled only if the Customer Complaint/Request Log option is selected and the Requester Type is Non Customer.

For other options, the system displays the full name of the customer.

The full name of the customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

Contact Number

[Conditional, Alphanumeric, 23]

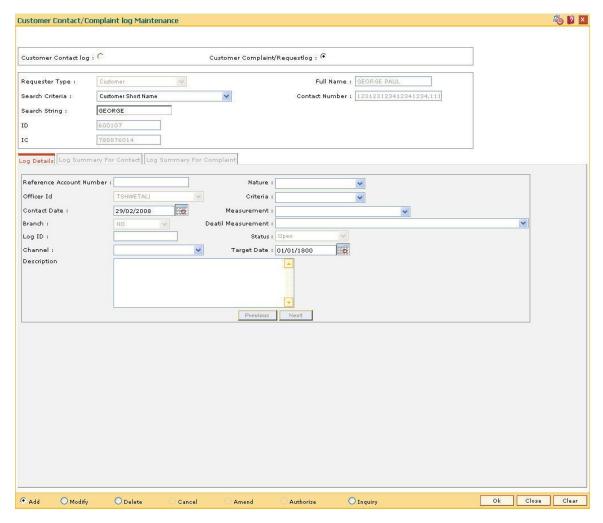

Type the contact number.

This field is enabled only if the **Customer Complaint/Request Log** option is selected and the **Requester Type** is **Non Customer**.

- 3. Click the Add button.
- 4. Click on the criteria based on which log is to be maintained.
- Select the search criteria from the drop-down list and enter the search string and press the **Tab>** key and select the customer from the pick list.
 OR

Select the requester type from the drop-down list.

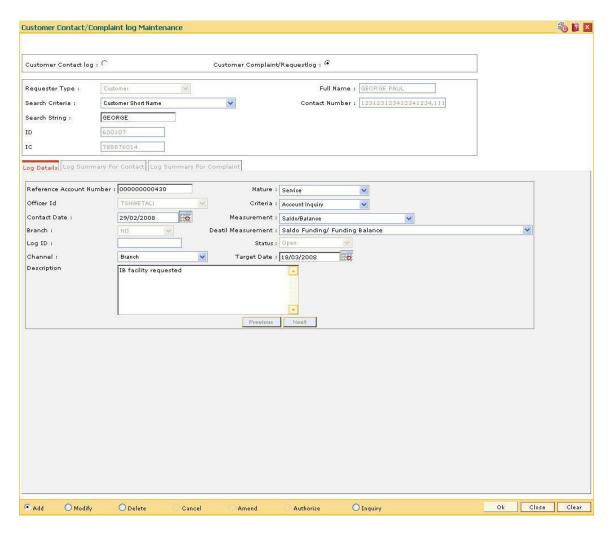

Customer Contact/Complaint log Maintenance

6. Enter the relevant information in the **Log Details** tab.

Log Details

Field Name	Description
Reference Account Number	[Optional, Numeric, 16]
	Type the reference account number for which the customer contact/complaint log details are to be maintained.
Nature	[Conditional, Drop-Down] Select the nature of the request from the drop-down list. The options are:
	Service
	• Sales
	Complaint
	This field is enabled only if the Customer Complaint/Request Log option is selected.
Officer Id	[Display] This field displays the officer ID. A officer ID is the login ID assigned to the person who adds a particular

record. The ID is set up as part of the SMS functions.

The officer ID is automatically selected, stored and displayed by the system for every transaction. If the record has been added as part of the setup, the officer ID will be displayed as SYSTEM.

This field is enabled in the Modify mode.

Criteria

[Conditional, Drop-Down]

Select the criteria/subject of the request from the drop-down list.

The options are:

- Account Inquiry
- Account Transaction
- Account Maintenance
- Product
- Application
- Channel

This field is enabled only if the Customer Complaint/Request Log option is selected.

Contact Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the date of customer request/complaint from the pick list. This date should be greater than or equal to the current date.

By default, the system displays the current process date.

Measurement

[Conditional, Drop-Down]

Select the appropriate measurement value, based on the option selected in the criteria field, from the drop-down list.

This field is enabled only if the Customer Complaint/Request Log option is selected.

Branch

[Display]

This field displays the short name of the branch where contact with the

customer was made.

Detail

[Conditional, Drop-Down]

Measurement

Select the option based on the value selected in the **Measurement** field from

the drop-down list.

This field is enabled only if the Customer Complaint/Request Log option is selected.

Log ID

[Display]

This field displays the Log Id of the request which gets generated at the time of capturing the request.

Status

[Conditional, Drop-Down]

This field displays the status of the complaint.

In the Add mode, it displays the default status value as Open.

The options are:

- Open
- Process
- Closed

This field is enabled in the **Modify** mode.

Channel [Mandatory, Drop-Down]

Select the channel through which the request has been raised from the dropdown list.

The options are:

Branch

Cash@work

Access Centre

ATM

HP Banking

Target Date [Conditional, Pick List, dd/mm/yyyy]

Select the target date for closure of the request/complaint from the pick list.

The date should be greater than or equal to the request date.

This field is enabled only if the Customer Complaint/Request Log option is

selected.

Description [Mandatory, Alphanumeric, 256]

Type a brief description of the request of the customer.

7. Click the **OK** button.

8. The system displays the message "Record Added with Log Id". Click the **OK** button.

9. Click the Close button.

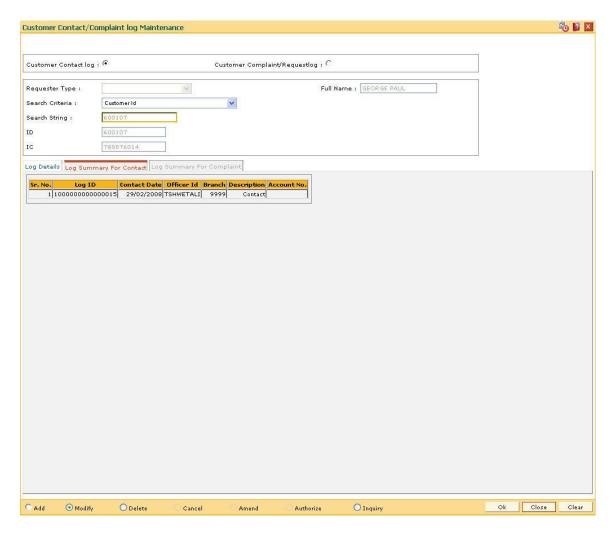

To modify the customer contact log

- 1. Click the Modify button.
- 2. Click on the criteria based on which log is to be maintained.
- 3. If the Customer Complaint/Request log option is selected, select the requester type.
- 4. Select the search criteria from the drop-down list and enter the search string and press the <Tab> key and select the customer from the pick list.
- 5. The system displays the appropriate tab.

Log Summary For Contact

This tab displays all the records for a selected customer. All the contact logs pertaining to all the accounts of the selected customer will be displayed along with the date. User can select a record based on the date to check the details.

Field Name	Description
Sr No	[Display]
	This field displays the serial number for the customer logs.
Log ID	[Display] This field displays the Log ID of the request which gets generated at the time of capturing the request.
Contact Date	[Display] This field displays the date on which the contact was made.
Officer Id	[Display] This field displays the ID of the officer, who had contacted the customer.
Branch	[Display] This field displays the short name of the branch where contact with the customer was made.
Description	[Display] This field displays a brief description of the last contact with the customer.

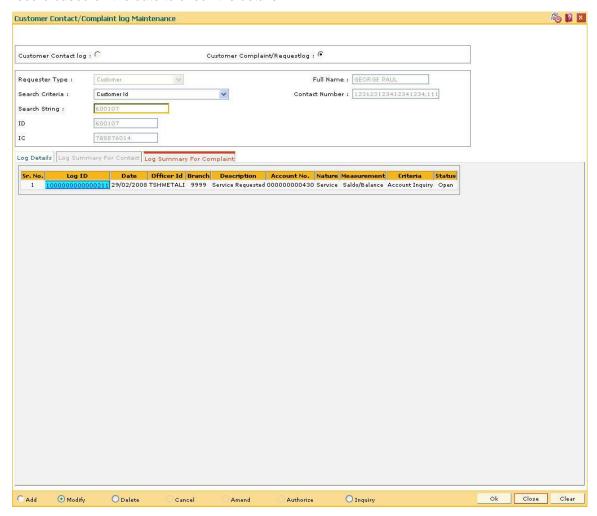

Account No [Display]

This field displays the account number of the customer.

Log Summary For Complaint

This tab displays all the records for a selected customer. All the complaints/services pertaining to all the accounts of the selected customer will be displayed along with the date. User can select a record based on the date to check the details.

Field Name	Description
Sr No	[Display] This field displays the system generated serial number for the customer log.
Log ID	[Display] This field displays the Log ID of the request which gets generated at the time of capturing the request.
Date	[Display] This field displays the date on which the request was made.

Officer Id [Display]

This field displays the ID of the officer, who had captured the request.

Branch [Display]

This field displays the short name of the branch where the request is captured.

Description [Display]

This field displays the description of the request.

Account No [Display]

This field displays the account number of the customer against which the

request is captured.

Nature [Display]

This field displays the nature of the request.

Measurement [Display]

This field displays the measurement of the request.

Criteria [Display]

This field displays the criteria/subject of the request.

Status [Display]

This field displays the status of the request.

6. Double-click the appropriate record in the Log ID column to enable the Log Details tab.

7. Modify the relevant information and click the **OK** button.

8. The system displays the message "Record Modified". Click the **Ok** button.

1.23. CIM13 - Customer Memo Maintenance

Using this option, you can maintain a note on preferences or special status of a customer which can help in dealing with the customer appropriately at any point of time. A memo maintained at the customer level is applicable for all accounts held by a customer for which this customer is the primary customer.

Customer Memo is a string attached at the customer level which can be displayed when the teller does transactions on **Oracle FLEXCUBE** branch. If the memo severity is high, the memo is automatically displayed when performing a transaction from branch and the system will enforce an authorisation. In case of a low severity memo, the teller can choose to see the memo and the authorisation requirement is not enforced. However system will not validate the existence of memo in case of batch upload.

Note: This transaction is automatically authorised.

Definition Prerequisites

- 8053 Customer Addition
- · Customer Account should be opened

Modes Available

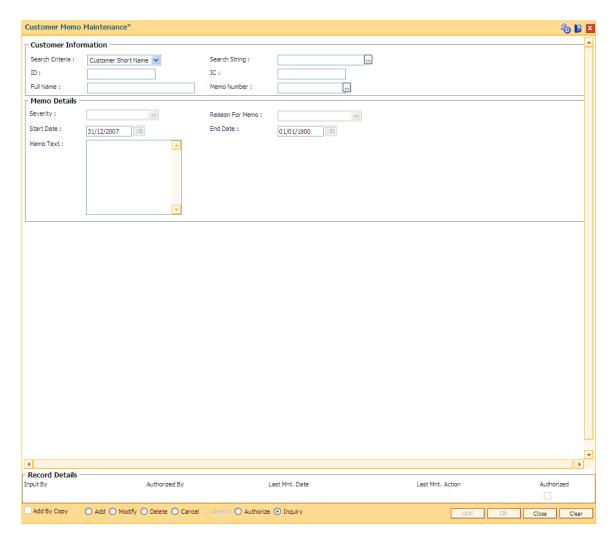

Add By Copy, Add, Modify, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the customer memo

- 1. Type the fast path CIM13 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Memo Maintenance.
- 2. The system displays the **Customer Memo Maintenance** screen.

Customer Memo Maintenance

Field Name

Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the dropdown list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20, Pick List]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from

the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string

field.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for

searching and tracking the customer in the system.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Full Name [Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

Memo Number [Display]

This field displays the serial number of the memos.

The memo number is auto-generated at the time of memo addition.

Maximum four memos are allowed at the customer level.

Memo Details

Severity [Mandatory, Drop-Down]

Select the severity level from the drop-down list.

A memo can be sent with two types of severity levels.

The options are:

 High - If the high severity memo is attached to the account, all the branch transactions on the account will require authorisation from the supervisor.

 Low - If the low severity memo is attached to the account, it displays a message on the screen for the Teller.

Reason For Memo [Mandatory, Drop-Down]

Select the reason for maintaining the memo on the customer from the

drop-down list.

Start Date [Mandatory, Pick List, dd/mm/yyyy]

Select the date from which the memo will be in affect from the pick list.

The start date should not be less than the system date.

End Date [Mandatory, Pick List, dd/mm/yyyy]

Select the date from which the memo will not be in effect from the pick

list.

The end date must be greater than the start date.

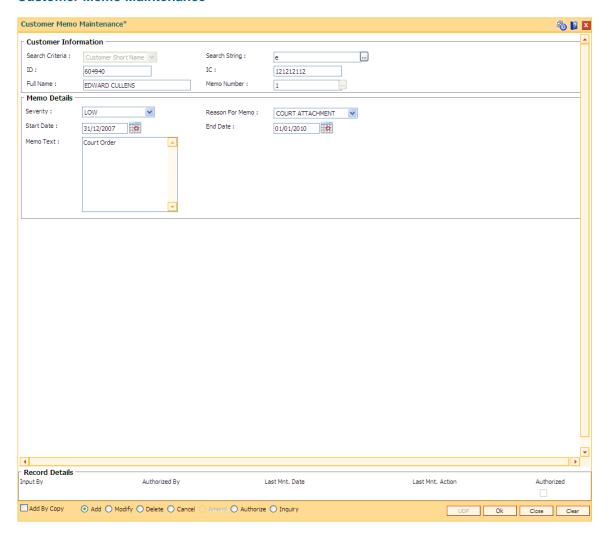

Memo Text

[Mandatory, Alphanumeric, 254]

Type the message that will appear on the screen when transaction related to the customer is performed by the teller.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Enter the search string and press the <Tab> key and select the customer from the pick list.
- Enter the memo details.

Customer Memo Maintenance

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Added... Authorisation Pending". Click the **Ok** button.
- 9. The memo is added for the selected customer after the record is authorised.

1.24. CIM16 - Customer Dormancy Status Maintenance

Using this option you can update the customer status from Dormant to Active. It will also activate all the accounts for which the customer is a primary holder. A customer becomes dormant when all the accounts under their Customer ID changes to dormant.

Definition Prerequisites

8053 - Customer Addition

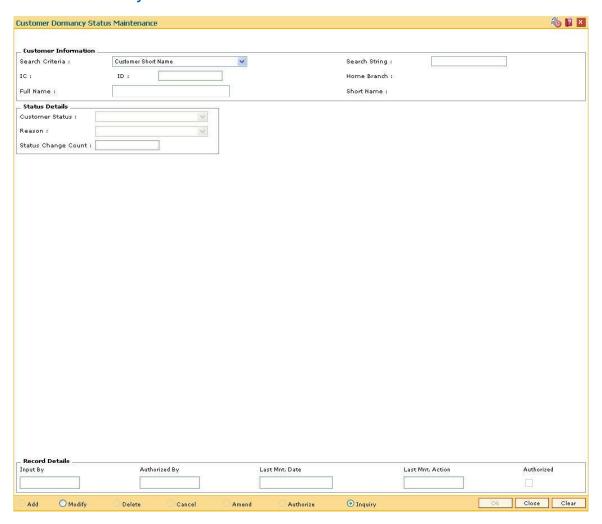

Modes Available

Modify, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify/amend the customer status maintenance

- Type the fast path CIM16 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Dormancy Status Maintenance
- The system displays the Customer Dormancy Status Maintenance screen.

Customer Dormancy Status Maintenance

Field Name Description

Customer Information

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer from the drop-down

list.

The options are:

Customer short name

- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be nonexistent in the system. This ID is used for searching and tracking the

customer in the system.

Home Branch

[Display]

This field displays the branch, where the customer's account is opened.

It is maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the Customer Addition

(Fast Path: 8053) option.

Short Name [Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the Customer Addition

(Fast Path: 8053) option.

The customer short name can be changed through the Change Customer

Name/IC Number (Fast Path: 7101) option.

Status Details

Customer [Conditional, Drop-Down]

Status Select the dormancy status of the customer from the drop down list.

This field is enabled if the customer status is dormant.

Reason [Conditional, Drop-Down]

Select the reason for change of status being performed from the drop-down

list.

This field is enabled if the customer status is dormant.

Status [Display]

Change Count

This field displays the count of the status change for the customer.

3. Click the **Modify** button.

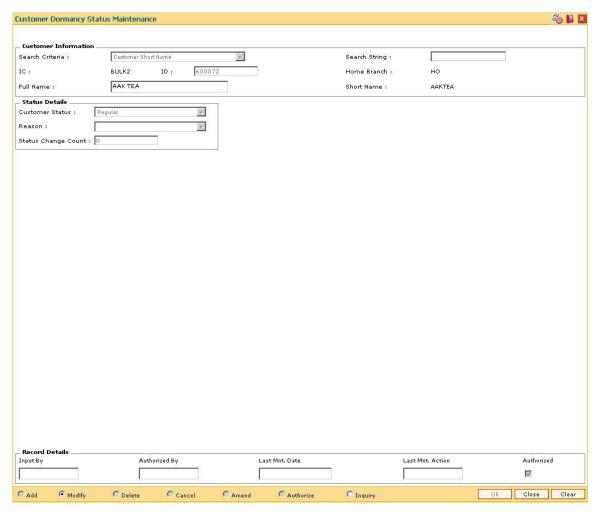

4. Select the search criteria from the drop-down list.

5. Enter the search string, press the <Tab> key and select the customer from the pick list.

6. Enter the other status details.

Customer Dormancy Status Maintenance

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Modified". Click the **Ok** button.

1.25. CIM18 - CBR Details Maintenance

The CBR details are certain user-defined features or attributes, based on which the customer can be grouped or categorized under a common language, location, salary structure, etc. CBR codes are useful for the Central Bank Reporting purposes.

Using this option you can create user defined fields which were not present in the various customer maintenance options which are a part of the standard **FLEXCUBE** Release. The bank can define the labels as well as contents of fields using the **User Defined Fields Maintenance** (Fast Path: BA078) option and **CBR PickLists Maintenance** (Fast Path: BA080) option.

Defining these categories facilitates generating MIS reports, beyond the standard reports available within **Oracle FLEXCUBE**.

Definition Prerequisites

- BA080 CBR PickLists Maintenance
- BA078 CBR Label Maintenance
- 8053 Customer Addition

Modes Available

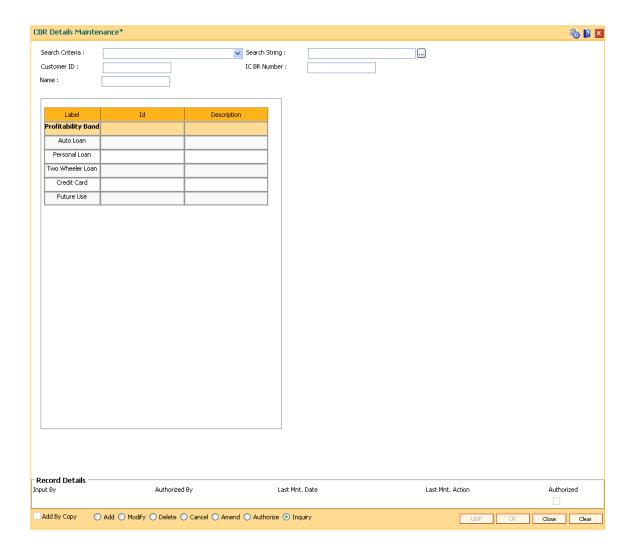

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the CBR code details

- 1. Type the fast path CIM18 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > CBR Details Maintenance.
- 2. The system displays the CBR Details Maintenance screen.

CBR Details Maintenance

Field Name Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria from the drop-down list.

The options are:

- · Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their

respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Customer ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

IC/BR Number [Display]

This field displays the identification code of the customer.

A customer IC along with the customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Name [Display]

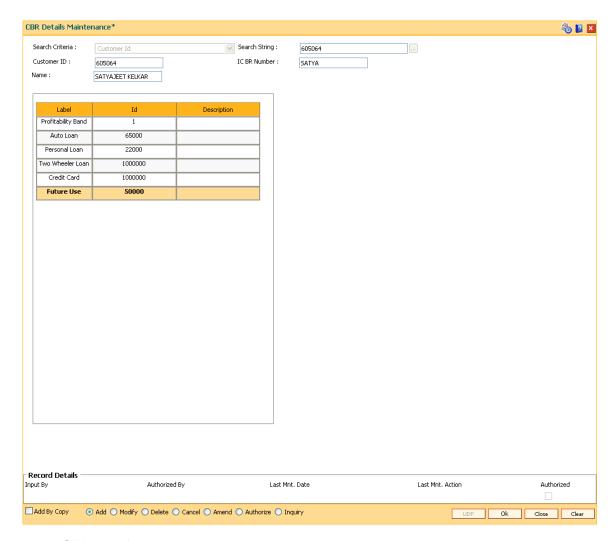

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Enter the search string and press the **<Tab>** key.
- 6. Select the customer from the pick list.
- 7. Double click the ID column to enter the relevant details for the corresponding label.

CBR Details Maintenance

- 9. Click the **Ok** button.
- 10. The system displays the message "Record Added... Authorisation Pending.. Click Ok to Continue". Click the **Ok** button.
- 11. The CBR details are added once the record is authorised.

Note: The CBR labels displayed in this screen are defined in the <u>CBR Label Maintenance</u> (Fast Path: BA078) option.

1.26. CIM19 - Customer BlackList Details

Using this option, you can maintain information on those customer that are blacklisted for various reasons. The customer to be marked as Blacklisted, has to be an existing customer in **Oracle FLEXCUBE**. The system permits the user to define start date and end date for blacklisting.

Definition Prerequisites

• 8053 - Customer Addition

Other Prerequisites

Not Applicable

Modes Available

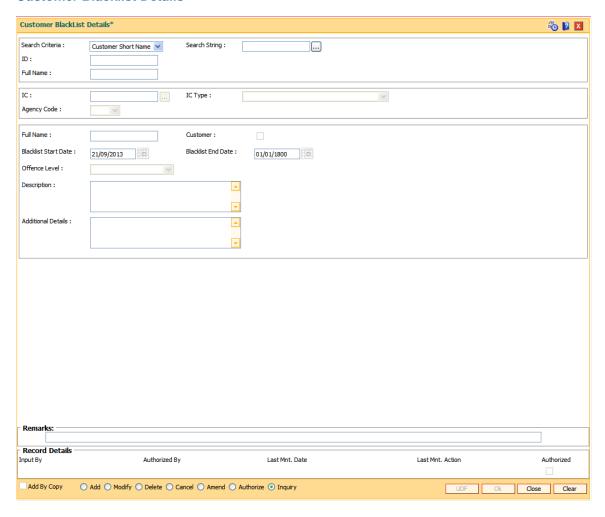

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry.

To add the customer blacklist information

- 1. Type the fast path CIM19 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer BlackList Details.
- 2. The system displays the **Customer Blacklist Details** screen.

Customer Blacklist Details

Field Description

Field Name Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20, Pick List]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the

pick list of all those customers having those letters in their respective criteria.

Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search

the above customer by entering 'Geo' in the search string field.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Full Name [Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the Customer Addition (Fast

Path: 8053) option.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the

combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used

as a customer IC.

IC Type [Display]

This field displays the IC type.

IC type is internally linked to every customer category/customer type.

Agency Code [Mandatory, Drop-Down]

Select the agency which will rate the customer from the drop-down list.

The bank can maintain multiple records for each customer based on the agency

code.

The agency codes are maintained as part of System Day 0.

Agency code obtains data from master table of agency code.

Full Name [Display]

This field displays the full name of the blacklisted customer.

Customer [Display]

This field displays whether the customer is an existing customer.

If the check box is selected, the customer is an existing customer.

Blacklist [Mandatory, Pick List, dd/mm/yyyy]

Start Date Select the Blacklist Start Date from the pick list.

It is the beginning date from when the customer stands black listed.

Blacklist [Mandatory, Pick List, dd/mm/yyyy]
End Date

Select the Blacklist End Date from the pick list.

It is the date till which the customer's blacklisted status is valid.

Offence Level

[Mandatory, Drop-Down]

Select the blacklist offence level from the drop-down list.

The value of field "offence level" will combine the value of offence level and offence description which is define in the screen - Blacklist restriction maintenance (FP:CIM25).

For example, offence level set as "2" and offence description set as "Medium" in the screen - Blacklist restriction maintenance (FP:CIM25, then the value of offence level in CIM19 will be 2-Medium.

The options are:

- 1
- 2
- 3
- High
- Low

Description

[Optional, Alphanumeric, 120]

Type an appropriate reason for black listing the customer.

Additional Details

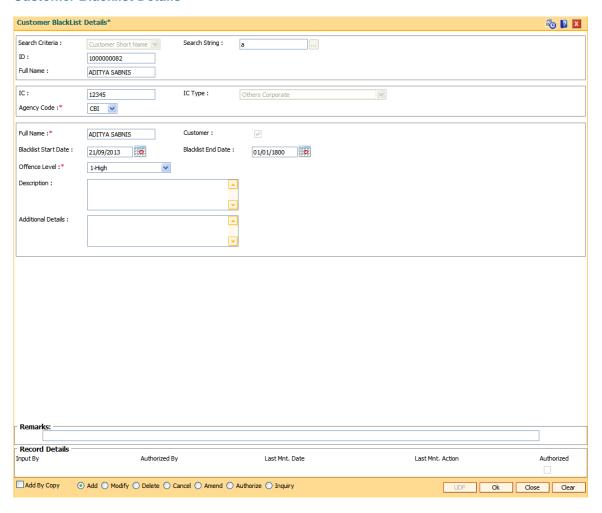

[Optional, Alphanumeric, 120]

Type any additional information for black listing the customer.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Enter the search string and press the **<Tab>** key.
- 6. Select the customer from the pick list.
- 7. Enter the other relevant details.

Customer Blacklist Details

- 8. Click the Ok button.
- The system displays the message "Record Added... Authorisation Pending..". Click the Ok button.
- 10. The customer black list details are added successfully once the record is authorized.

1.27. CIM20 - Investor Services - Customer Data - Inquire*

FLEXCUBE Investor Services (FIS) is a comprehensive multi-currency shareholder servicing solution for Mutual Funds. Using this option ,you can make inquiries on the customer's data pertaining to FIS system.

It automates all Transfer Agent functions within a mutual fund company. All the mandatory information required by the FIS system has to be maintained in **Oracle FLEXCUBE**.

Definition Prerequisites

BAM03 - Branch Master Maintenance

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the investor service details

- 1. Type the fast path CIM20 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Investor Services- Customer Data-Inquire.
- 2. The system displays the Investor Services Customer Data Inquire screen.

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer from the drop-down list.

The option are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

This field displays the branch, where the customer's account is opened.

It is maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

O

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name [Display]

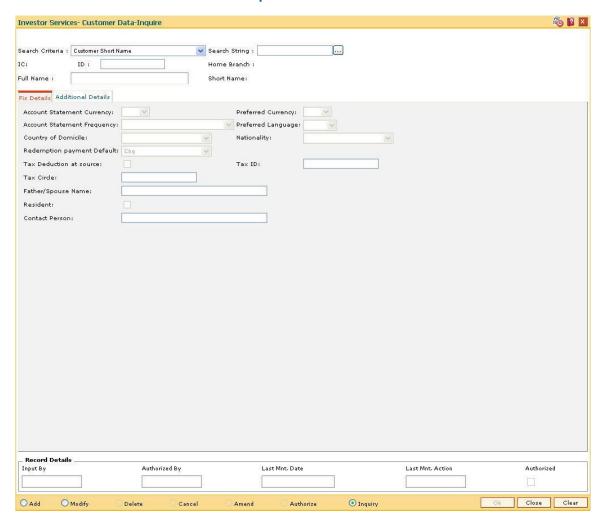

This field displays the short name of the customer.

The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.

The customer short name can be changed through the **Change Customer Name/IC Number** (Fast Path: 7101) option.

- 3. Click the Add button.
- 4. Select the search criteria from the drop-down list.
- 5. Type the search string and press the **<Tab>** key and select the customer from the pick list.

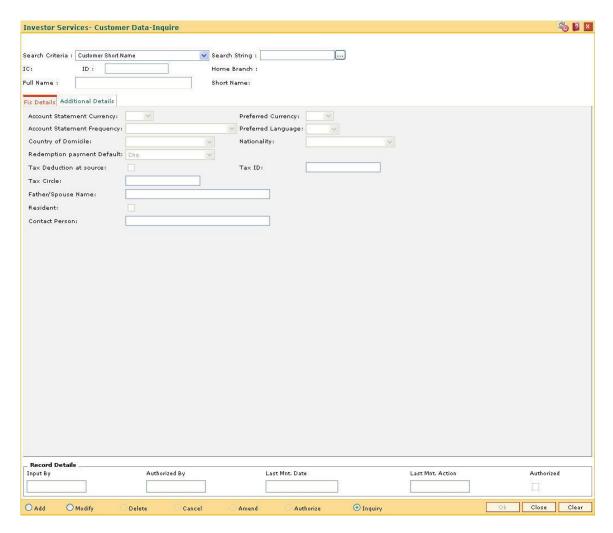

Investor services - Customer Data - Inquire

6. Enter the relevant information in various tabs.

Fis Details

Field Name	Description
Account Statement Currency	[Mandatory, Drop-Down]
	Select the currency in which account statement is required from the drop- down list.
	All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.
	For example, if the currency selected is USD, the statement of accounts for the customer will come in USD.
Preferred Currency	[Mandatory, Drop-Down]
	Select the preferred currency from the drop-down list.
	It is the currency in which the investor or unit holder prefers to make any payments involving transactions or receives any dividend income payments.
	The currency you select here will be deemed as the default currency for all payments from or to the investor.

Account [Mandatory, Drop-Down]

Statement Frequency From the drop-down list.

It is the time frequency or interval for generating the account statements.

For example, Monthly, Quarterly, Yearly.

Preferred [Mandatory, Drop-Down]

Language Select the preferred language from the drop-down list.

It is the language preferred by the investor for correspondence and

communication.

Country of [Mandatory, Drop-Down]

Domicile

Select the country, where the investor is domiciled from the drop-down list.

Nationality [Mandatory, Drop-Down]

Select the nationality of the investor from the drop-down list.

Redemption payment Default

[Mandatory, Drop-Down]

Select the redemption payment default mode from the drop-down list. It is the default mode of payment that is to be used for paying out the

proceeds of any redemption transactions for the investor.

Tax Deduction at source

[Optional, Check box]

Select the Tax Deduction at source check box, if the tax deducted on the

amount is to be redeemed.

This amount is paid by the bank, to the tax authorities.

The tax proceeds are to be recovered from the customer. The bank will

deduct this tax amount from the redemption proceeds.

The tax is calculated based on the tax code attached to the account at the

time of account opening.

Tax ID [Mandatory, Alphanumeric, 16]

Type the tax identification number for the investor.

Tax Circle [Mandatory, Alphanumeric, 40]

Type the tax circle to which the unit holder belongs.

Father/Spouse Name

[Mandatory, Alphanumeric, 40]

Type the name of the father or the spouse.

Resident [Optional, Check box]

Select the Resident check box to indicate that the investor resides in the

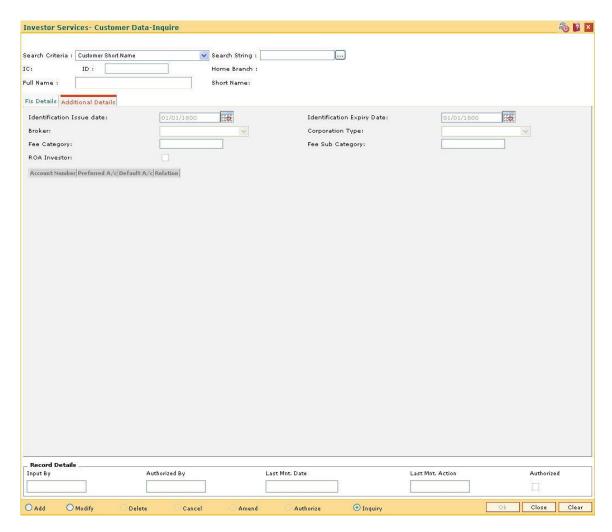

selected country of domicile.

Contact Person [Mandatory, Alphanumeric, 40]

Type the name of the contact person.

Additional Details

Field Name	Description
Identification Issue date	[Mandatory, Pick List, dd/mm/yyyy]
	Select the Identification Issue date from the pick list.
	It is the date of issue of the identification document or proof that is furnished by the unit holder.
Identification Expiry Date	[Mandatory, Pick List, dd/mm/yyyy]
	Select the Identification Expiry date from the pick list.
	It is the date of expiry of the identification document or proof that is furnished by the unit holder.
Broker	[Mandatory, Drop-Down]
	Select the introducer broker preferred by the investor from the drop-down list.
Corporation Type	[Mandatory, Drop-Down]
	Select the Corporation Type from the drop-down list.

	It is the type of the corporation that the company is to be deemed.
Fee Category	[Mandatory, Alphanumeric, 40] Type the fee category to be deemed applicable for the investor whose account you are creating.
Fee Sub Category	[Optional, Alphanumeric, 40] Type the fee sub-category to be deemed applicable for the investor whose account you are creating.
ROA Investor	[Optional, Check box] Select the ROA Investor check box to indicate that the investor prefers to avail of the Rights of Accumulation facility.

Column Name	Description
Account Number	[Display]
	This column displays the account number to which this customer has been linked as a primary customer.
Preferred A/c	[Toggle]
	Select Y if the account is a preferred account.
Default A/c	[Toggle]
	Select Y if the account is a default account.
Relation	[Display]
	This column displays the relation of the preferred account holder.

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
- 9. The investor services customer data is added once the record is authorised.

1.28. CIM21 - Customer Account Restriction/ Block

Using this option you can mark a customer as Restricted. When a customer is restricted, all the existing CASA, Term Deposit and the Loan accounts are marked as restricted.

When customer restriction is cleared, all the accounts are cleared from restriction expect those accounts that have an account level restriction.

Definition Prerequisites

- SMM01 Template Profile Maintenance
- 8053 Customer Addition
- · Customer should have an account opened

Modes Available

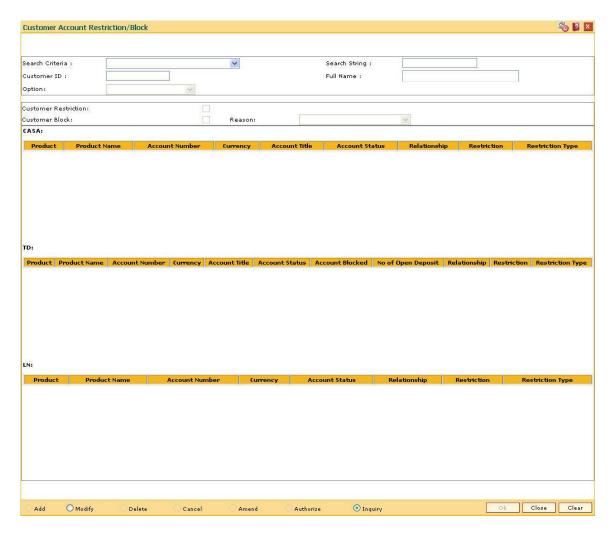

Modify, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify customer account restrictions

- 1. Type the fast path CIM21 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Account Restriction/ Block.
- 2. The system displays the **Customer Account Restriction/Block** screen.

Customer Account Restriction/Block

Field Name

Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the dropdown list.

The options are:

- · Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their

respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Customer ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Full Name [Display]

This field displays the full name of the customer.

Option [Mandatory, Drop-Down]

Select the action to be taken from the drop-down list.

The options are:

Block

Restriction

Customer [Conditional, Check Box]
Restriction

Select the **Customer Restriction** check box if all the customer accounts are to be restricted and only authorised officer is allowed to inquire on the accounts.

This field is enabled only if the **Restriction** option is selected from the **Option** field.

Customer Block [Conditional, Check Box]

This field is enabled only if the **Block** option is selected from the

Option field.

Reason [Conditional, Drop-Down]

Select the reason for blocking the customer account from the drop-

down list.

This field is enabled only if the **Block** option is selected from the

Option field.

Column Name Description

CASA

Product [Display]

The code assigned to CASA/TD/Loan product.

Product Name [Display]

The name assigned to the CASA / TD / Loan product, which is defined at the product level. This is the product under which the CASA / TD /

Loan account is opened.

Account Number [Display]

The account number for which the user want to view the account

details.

Currency [Display]

The currency assigned to the product at the product level, under which

the account is opened.

Account Title [Display]

The name of the customer who holds the CASA / TD / Loan account.

Account Status [Drop-Down]

The current status of the account.

Relationship [Display]

The account holder's relationship with the account.

E.g. Sole owner, Joint holder, etc.

Restriction [Display]

If Yes option is selected in the Customer Restriction field, then the customer is restricted. Automatically all his accounts are restricted and

only an authorised officer is allowed to inquire on the accounts.

If No option is selected in the Customer Restriction field, restriction is removed, accounts with customer restriction get unmarked. Accounts

with account restriction retain the restriction.

Restriction Type [Display]

The type of restriction is Customer Restriction or Account Restriction.

Column Name Description

TD

Product [Display]

The code assigned to CASA/TD/Loan product.

Product Name [Display]

The name assigned to the CASA / TD / Loan product, which is defined at the product level. This is the product under which the CASA / TD /

Loan account is opened.

Account Number [Display]

The account number for which the user want to view the account

details.

Currency [Display]

The currency assigned to the product at the product level, under which

the account is opened.

Account Title [Display]

The name of the customer who holds the CASA / TD / Loan account.

Account Status [Drop-Down]

The current status of the account.

Account Blocked [Display]

The status of the account.

No of Open Deposit [Display]

The number of open deposit.

Relationship [Display]

The account holder's relationship with the account.

E.g. Sole owner, Joint holder, etc.

Restriction [Display]

If Yes option is selected in the Customer Restriction field, then the customer is restricted. Automatically all his accounts are restricted and only an authorised officer is allowed to inquire on the accounts.

only an authorised officer is allowed to inquire on the accounts.

If No option is selected in the Customer Restriction field, restriction is removed, accounts with customer restriction get unmarked. Accounts

with account restriction retain the restriction.

Restriction Type [Display]

The type of restriction is Customer Restriction or Account Restriction.

Column Name Description

Loan

Product [Display]

The code assigned to CASA/TD/Loan product.

Product Name [Display]

The name assigned to the CASA / TD / Loan product, which is defined at the product level. This is the product under which the CASA / TD /

Loan account is opened.

Account Number [Display]

The account number for which the user want to view the account

details.

Currency [Display]

The currency assigned to the product at the product level, under which

the account is opened.

Account Status [Drop-Down]

The current status of the account.

Relationship [Display]

The account holder's relationship with the account.

E.g. Sole owner, Joint holder, etc.

Restriction [Display]

If Yes option is selected in the Customer Restriction field, then the customer is restricted. Automatically all his accounts are restricted and

only an authorised officer is allowed to inquire on the accounts.

If No option is selected in the Customer Restriction field, restriction is removed, accounts with customer restriction get unmarked. Accounts

with account restriction retain the restriction.

Restriction Type [Display]

The type of restriction is Customer Restriction or Account Restriction.

3. Select the search criteria and type the search criteria and press the **<Tab>** key.

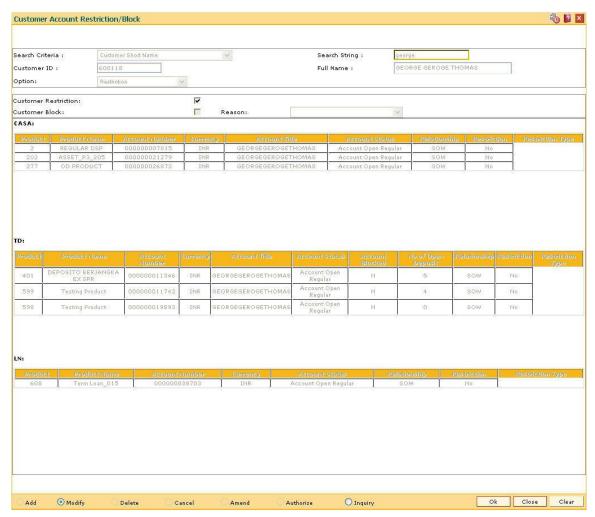

4. Select the appropriate customer from the list displayed.

5. Select the appropriate option from the drop-down list.

6. Enter the other relevant information.

Customer Account Restriction/Block

- 7. Click the **OK** button.
- 8. The system displays the message "Authorisation required. Do You Want to continue?". Click the **OK** button.
- 9. The system displays the **Authorization Reason** screen.
- 10. Enter the relevant information and click the **Ok** button.
- 11. The system displays the message "Record Authorised..Click Ok to Continue". Click the **Ok** button.

1.29. CIM30 - Customer Maturity Processing Maintenance

Banks have different type of customers like minors, major individuals, corporate customer's, etc and the customer details are added to the customer information database using the **Customer Addition** (Fast Path: 8053) option.

Using this option **Oracle FLEXCUBE** allows you to parameterize the customer status change from a minor to major when a minor customer turns major on attaining maturity or make the change through automation. In case the system is parameterized under automated mode, the functionality associated with this option will not be available.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

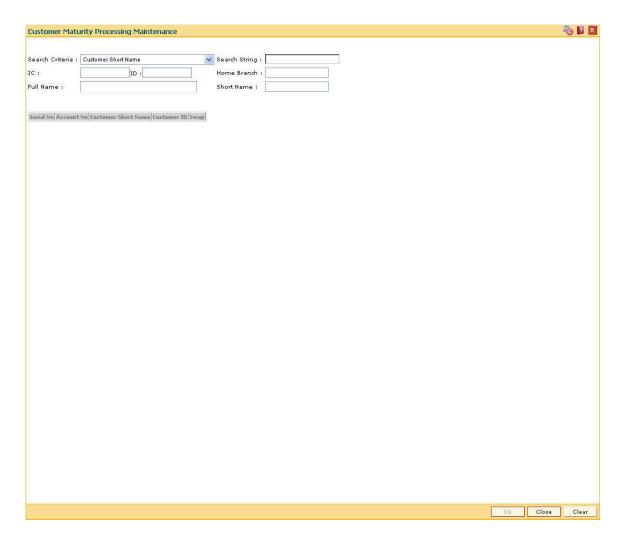

Not Applicable

To perform the customer maturity processing maintenance

- 1. Type the fast path CIM30 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Maturity Processing Maintenance.
- 2. The system displays the Customer Maturity Processing Maintenance screen.

Customer Maturity Processing Maintenance

customer list.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC [Display]

The identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration

can be used as a customer IC.

ID [Display]

The ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC & Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch [Display]

This field displays the branch, where the minor customer's account is initiated

and maintained.

Full Name [Display]

The full name of the customer.

The full name of the customer is defaulted from the **Customer Addition**

option.

Short Name [Display]

The short name of the customer.

The short name of the customer is defaulted from the **Customer Addition**

option.

The customer short name can be changed through the Change Customer

Name/IC Number option.

Column Name Description

Serial No [Display]

The system generated serial number, which indicates the row items.

Account No [Display]

The CASA, TD or Loans account number of the minor customer.

Customer Short Name [Display]

The short name of the customer.

The short name of the customer is defaulted from the **Customer Addition**

option.

The customer short name can be changed through the Change Customer

Name/IC Number option.

Customer ID [Display]

The ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC & Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Swap [Toggle]

Click the toggle status to change the value to \mathbf{Y} , to change the minor's status

to major.

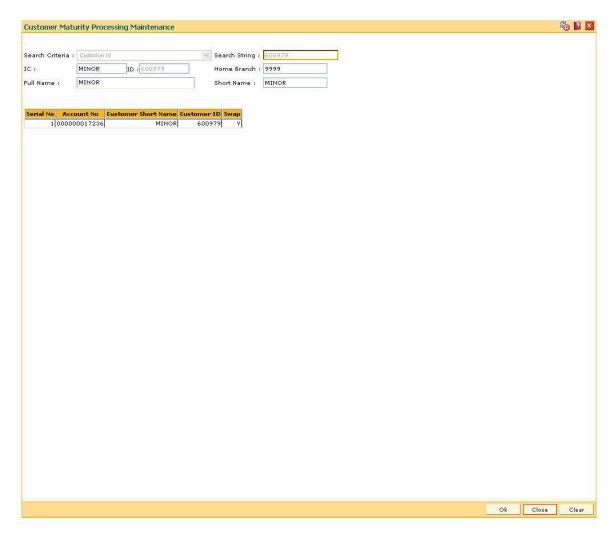

The default value is N.

3. Select the search criteria from the drop-down list.

- 4. Type the search string and press the **<Tab>** key and select a minor customer from the pick list
- 5. The system displays the account details.
- 6. Double-click the toggle status in the **Swap** column corresponding to the customer ID, whose status is to be changed from minor to major. The value is changed to **Y**.

Customer Maturity Processing Maintenance

- 7. Click the **OK** button.
- 8. The system displays the message "Authorisation required. Do You Want to continue?". Click the **OK** button.
- 9. The system displays the **Authorization Reason** screen.
- 10. Enter the relevant information and click the **Ok** button.
- 11. The system displays the message "This is a Minor Customer". Click the **OK** button.
- 12. Click the Close button.

1.30. CIM39 - Customer ID Change Maintenance

Using this option, you can change the Primary Cust ID linked to an account i.e. you can link the accounts under one Customer ID where the customer has SOW, JAF and JOF relationship; to another Customer ID with the same relationship.

This is required during certain circumstances like the customer is deceased, multiple customer IDs exist for the same customer etc. The new customer is linked to the accounts in the same relationships as that of the previous customer.

Definition Prerequisites

- 8053 Customer Addition
- 8051 CASA Account Opening

Modes Available

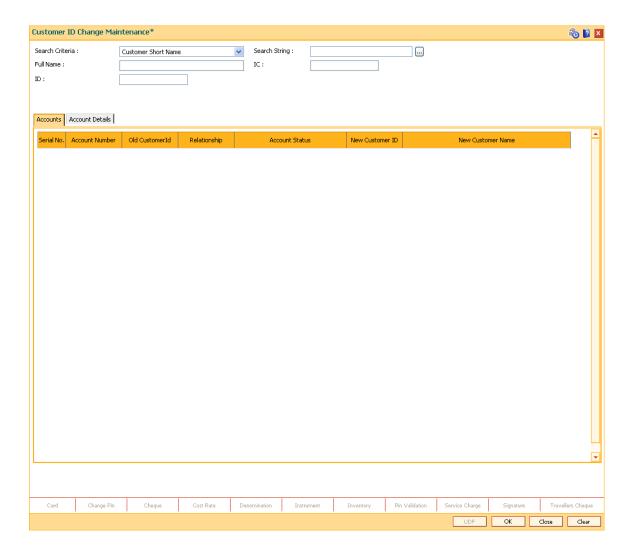

Not Required

To change the customer ID

- 1. Type the fast path CIM39 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer ID Change Maintenance.
- 2. The system displays the Customer ID Change Maintenance screen.

Customer ID Change Maintenance

Field Name

Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for a customer, from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20, Pick List]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field or select it from the pick list.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective

criteria. Select the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Full Name [Display]

This field displays the full name of the customer.

The full name of the primary customer is defaulted from the **Customer**

Addition (Fast Path: 8053) option.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration

can be used as a customer IC.

ID [Display]

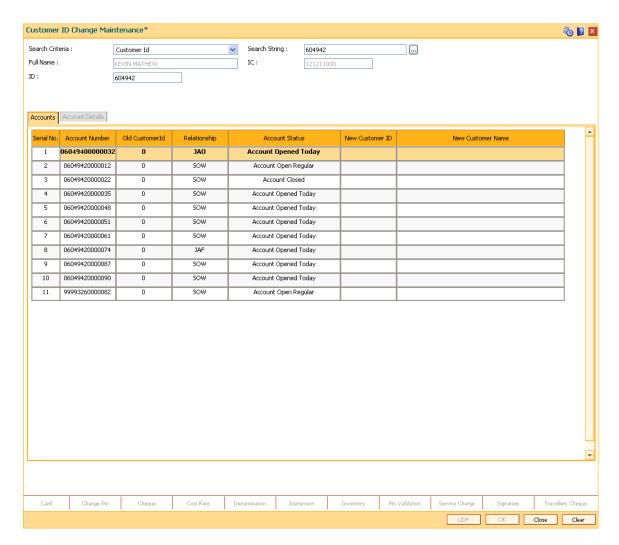

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

- 3. Select the search criteria from the drop-down list.
- 4. Enter the search string and press the <**Tab**> key. Select the customer from the pick list.
- 5. The system displays the account details.
- 6. The **Accounts** tab is displayed.

Accounts

Column Name	Description
Serial No	[Display] This column displays the serial numbers.
Account Number	[Display] This column displays the account numbers of all the accounts held by the selected customer.
Old Customer ID	[Display] This column displays the old primary customer ID.
Relationship	[Display] This field displays the relationship of the customer with all the accounts held by the customer. A customer with primary relationship, viz., Sole Owner , Joint And First , or Joint Or First must be linked. If primary relationship linked is Joint And First or Joint or First , customer with secondary relationship, viz., Joint and other or Joint or other must be linked to the account.
Account	[Display]

Status

This field displays the brief description about the memo.

3. Click the Add button.

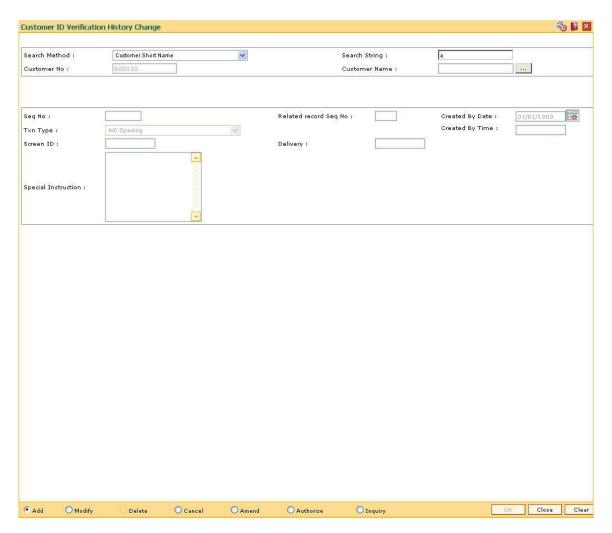

4. Select the search criteria from the drop-down list.

5. Type the search string and press the **<Tab>** key.

6. Enter the relevant information.

Customer ID Verification History Change

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.

1.34. CIM57 - Customer Anniversary Maintenance

Using this option you can block all the accounts of a customer. If the customer is not able to show up on the anniversary date or the date maintained is expired, the system will block the transactions from all the channels and branches.

This option allows tellers to maintain the future expiry date of Driving License, Passport etc. On expiry date of the documents, system will block the customer. This will happen at the BOD of anniversary date.

Definition Prerequisites

• 8053 - Customer Addition

Modes Available

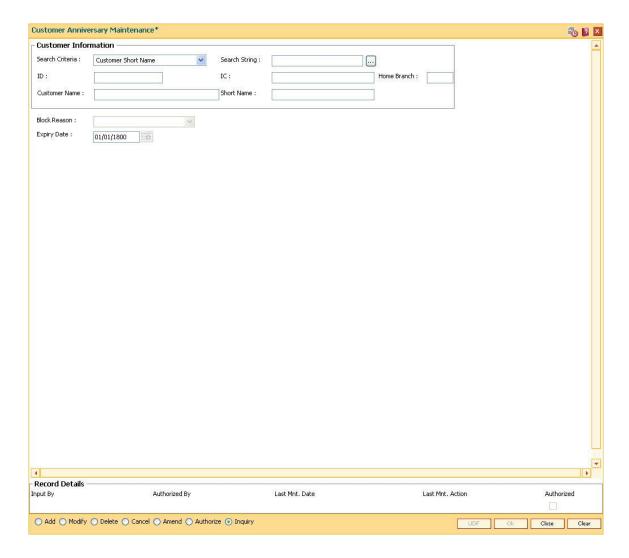

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance_Procedures**.

To add customer anniversary maintenance

- 1. Type the fast path **CIM57** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Customer Anniversary Maintenance.
- 2. The system displays the Customer Anniversary Maintenance screen.

Customer Anniversary Maintenance

Field Description Name

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria to search the customer from the drop-down list.

The search criteria are as follows:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 40]

Type the search string for the search criteria.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria.

Choose the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC & Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Home Branch

[Display]

The field displays the home branch of the customer.

The branch in which the customer account in opened.

Customer Name

[Display]

This field displays the name of the customer.

The name of the customer is defaulted from the **Customer Addition** option.

Short

[Display]

Name

This field displays the short name of the customer.

The short name of the customer is defaulted from the Customer Addition option.

Block Reason

[Mandatory, Drop-Down]

Select the reason for blocking the account from the drop down list.

The options are:

- Birth Date Expiry
- Driving License Expiry
- Passport Expiry
- Alien Card Expiry
- Visa Expiry

Expiry Date

[Mandatory, Pick List]

Select the expiry date of the customer anniversary facility for the account.

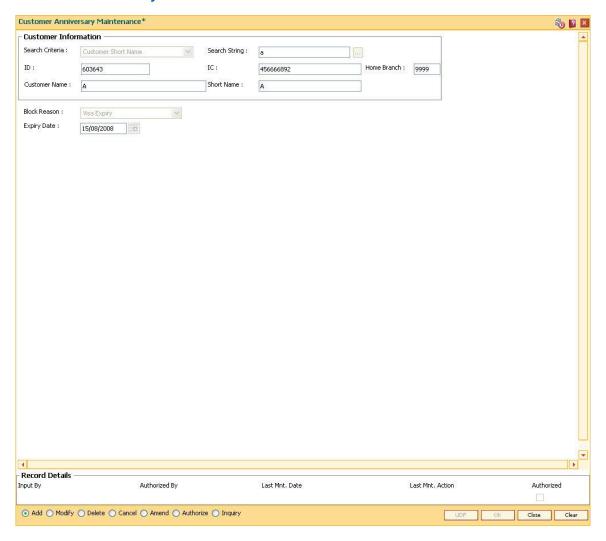

The expiry date does not apply automatic block on the Customer ID.

3. Click the Add button.

- 4. Select the search criteria and press the <Tab> key.
- 5. Enter the search string and press the **Tab**> key and select the appropriate customer from the pick list.
- Select the block reason from the drop-down list and the expiry date from the pick list.

Customer Anniversary Maintenance

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Added...Authorisation Pending...". Click the **Ok** button.
- 9. The anniversary details are added once the record is authorised.

1.35. CIM78 - Customer Information Maintenance*

Using this option you can update the customer details. The customer can change the details of his address, if any, from a call center using this screen. You can update the customer Kanji, SbKana and DBKana name and address.

All the details entered in this option are maintained in the **Customer Information Master Maintenance** (Fast path: CIM09) option.

Definition Prerequisites

- 8053 Customer Addition
- CIM09 Customer Information Master Maintenance

Modes Available

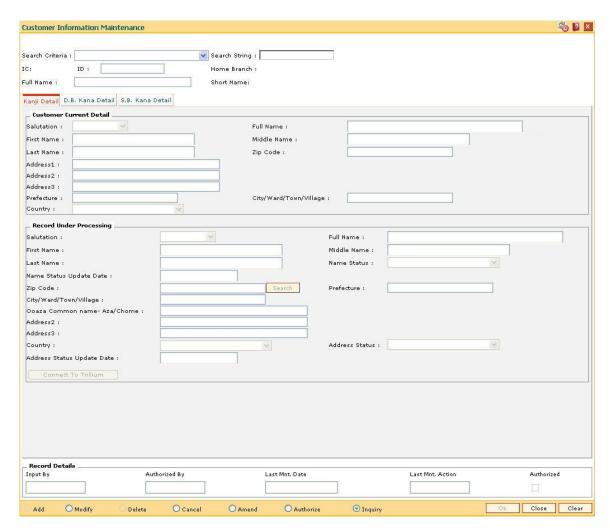

Modify, Cancel, Amend, Authorize, Inquire. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain account provision

- 1. Type the fast path **CIM78** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Customer Information Maintenance.
- 2. The system displays the **Customer Information Maintenance** screen.

Customer Information Maintenance

Field Name

Description

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria to search for the customer.

The options are:

- Customer IC
- · Customer short name
- Customer ID

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria

selected in the search criteria field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the letter of the short name or IC can be entered. The system displays the pick list of all those customers having those

letters in their respective criteria. Choose the appropriate customer

from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of

customer identification

across the bank (covering all branches). Based on the combination, the

system can

identify the customer as an existing customer even when the customer

opens a new

account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system

after customer

addition is completed successfully. This running number, unique to a

customer across

the system, is generated after the system has identified the Customer

IC & Customer

Category combination to be non-existent in the system. This ID is used

for searching

and tracking the customer in the system.

1.36. BAM64 - Customer-Account-Nominee Cross-Reference

Using this option allows you to link a nominee ID pre defined to a customer. This option is used to link a nominee to individual CASA or Term Deposit accounts of the selected customer and can also be used for defining nominee for individual deposits under the Term Deposit account of the customer. More than one nominee can also be linked to a customer.

Definition Prerequisites

- 8053 Customer Addition
- BA438- Nominee Master Maintenance
- · Existence of customer accounts

Modes Available

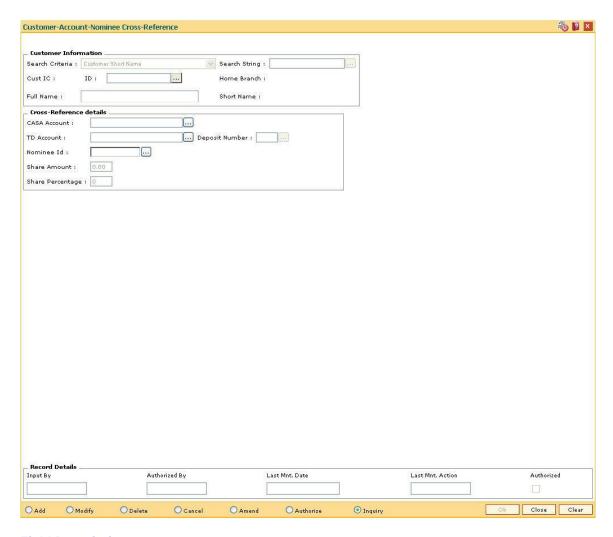

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add customer account nominee details

- Type the fast path BAM64 and click Go or navigate through the menus to Global Definitions > Master > Customer-Account-Nominee Cross-Reference.
- 2. The system displays the Customer-Account-Nominee Cross-Reference screen.

Customer-Account-Nominee Cross-Reference

Field Name Description

Customer Information

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the dropdown list.

The options are:

- Customer Short Name
- Customer IC
- Customer ID

Search String

[Conditional, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system

displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Cust IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch [Display]

This field displays the branch to which the customer account belongs.

The field displays the short name of the branch as set up in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name [Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the Customer

Addition (Fast Path: 8053) option.

Short Name [Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the Customer

Addition (Fast Path: 8053) option.

The customer short name can be changed through the Change

Customer Name/IC Number (Fast Path: 7101) option.

Cross-Reference details

CASA Account [Mandatory, Numeric, 35, Pick List]

Type the CASA account number.

TD Account [Mandatory, Numeric, 35, Pick List]

Type the TD account number.

Deposit Number [Conditional, Pick List]

Select the deposit number from the pick list.

This field is enabled if the TD account number is selected from the

above field.

Nominee Id [Mandatory, Pick List]

Select the nominee ID from the pick list.

Nominee Name [Display]

This field displays the nominee name based on the nominee Id

selected from the above field.

Relation [Optional, Pick List]

Select the relation between the nominee and the customer from the

pick list.

Share Amount [Conditional, Numeric, 13, Two]

Type the amount payable to the nominee under the selected accounts.

This field is disabled if any value is entered in the Share Percentage

field.

Share Percentage [Conditional, Numeric, Three]

Type the percentage of the amount available in the account, payable to

the nominee under the selected accounts, subject to a maximum of

100% under each account of the customer.

This field is disabled if any value is entered in the **Share Amount** field.

3. Click the Add button.

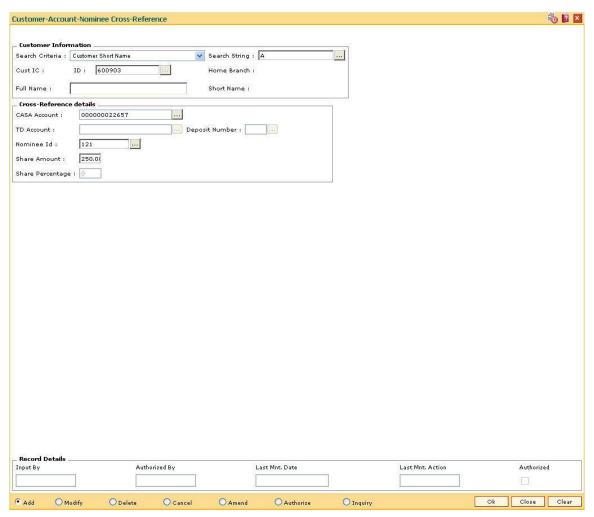

4. Select the search criteria from the drop-down list and the search string from the pick list.

5. Select the relevant cross reference details like CASA account or TD account number and accordingly nominee id and deposit number from the pick list.

6. Enter the share amount or the percentage of share.

Customer-Account-Nominee Cross-Reference

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
- 9. The customer nominee details are added once the record is authorised.

1.37. CIM14 - Customer Type - IC Type Cross Reference.

Each customer type has its identification criteria. Using this option, a customer type can be mapped to multiple IC type. The combination of the customer type and IC type is validated during customer creation and modification. The customer type values are validated in the **Customer Types Maintenance** (Fast Path: CIM08) option. The combination of Customer type and IC type has to be a unique.

Definition Prerequisites

• <u>CIM08 - Customer Types Maintenance</u>

Modes Available

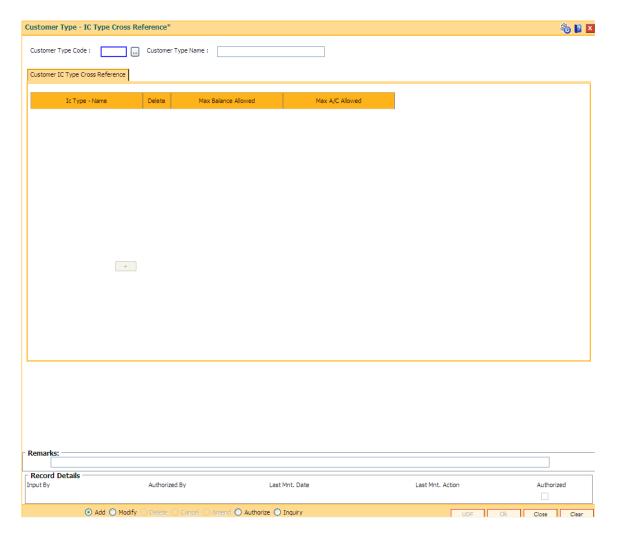

Add, Modify, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add a cross reference between customer type and IC type

- 1. Type the fast path CIM14 and click Go or navigate through the menus to Global Definition > Customer > Customer Type IC Type Cross Reference.
- 2. The system displays the **Customer Type IC Type Cross Reference** screen.

Customer Type - IC Type Cross References

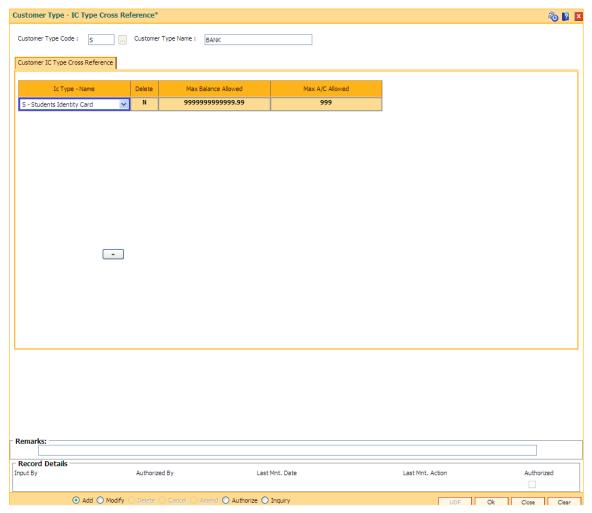

Field Name	Description
Customer Type Code	[Mandatory, Pick List]
	Select the customer type code from the pick list.
	These codes are maintained in the Customer Type Maintenance (Fast Path : CIM08) option.
Customer Type Name	[Display] This field displays the customer type name of the selected code.

- 3. Click the Add button.
- 4. Select the customer type code from the pick list.

Customer Type - IC Type Cross References

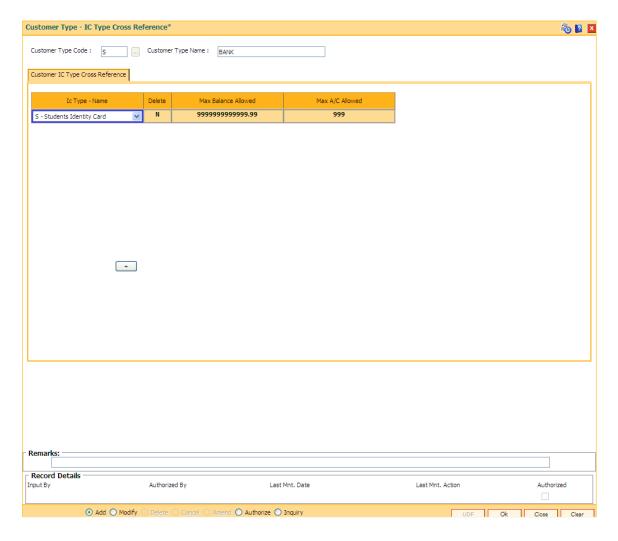

5. Click the + button to add the IC type.

Customer Type - IC Type Cross References

Column Name	Description
IC Type - Name	[Mandatory, Drop-Down]
	Select the IC type - Name from the drop-down list.
Delete	[Optional, Check Box]
	Select the Delete check box to delete the record.
	By default the value is no and it displays N .
Max Balance Allowed	[Optional, Numeric,16]
	Type the max balance allowed indicating the maximum balance that can be maintained in the account.
	By default the system displays 999999999999999999999999999999999999
Max A/C Allowed	[Optional, Numeric,16]
	Type the max account allowed indicating the maximum accounts that can be maintained.

By default the system displays 999.

- 7. Click the **Ok** button.
- 8. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **Ok** button.

1.38. STM81 - Customer Blacklist Details Modification

Using this option, you can maintain the DHIB/DHN customer blacklist details.

The three events that trigger customer blacklisting with respect to cheque returns are:

- Inward Clearing Cheque Return with Reject Reason "NSF"
- Over the Counter Cheque return with Reject Reason "NSF"
- Inward file upload from Central Bank (from other banks) for the bank customer, blacklisted from other bank.

The DHIB/DHN blacklist status is maintained at the customer level. If the customer holds multiple accounts, including joint accounts, then the cheques rejected in all the accounts are considered for blacklisting. The blacklisting process is same for both conventional accounts and Syariah accounts of a customer, but both are tracked separately.

The four SP status of a customer are as follows:

- None
- SP 1: A cheque return below a specified amount (Say amount < 500 Mio) in clearing or over the counter with reject reason as "NSF". The "SP1" status will expire in 6 months since the date of cheque return.
- SP 2: A second cheque return (below < 500 Mio) within the last 6 months with reject reason as "NSF". The "SP2" status will expire in 6 months since the date of cheque return.
- SP 3: A third cheque return (below < 500 Mio) within the last 6 months with reject reason as "NSF". The "SP3" status will expire in one year since the date of cheque return.

A cheque return beyond a specified amount (say amount >= 500 Mio) with reject reason as "NSF", will update customer blacklist status to "SP3" from either "None", "SP1" or "SP2". If a cheque that was returned is passed within 7 working days from the date of cheque return, the blacklist status is reset to the previous status automatically by the system. If the same cheque number is rejected more than once with reason as insufficient funds, it will be treated as having been rejected only once. The bank will also receive a file from Central Bank, which will contain DHN blacklist customers of the bank originated from all the other banks.

Definition Prerequisites

8051 - CASA Account Opening

Modes Available

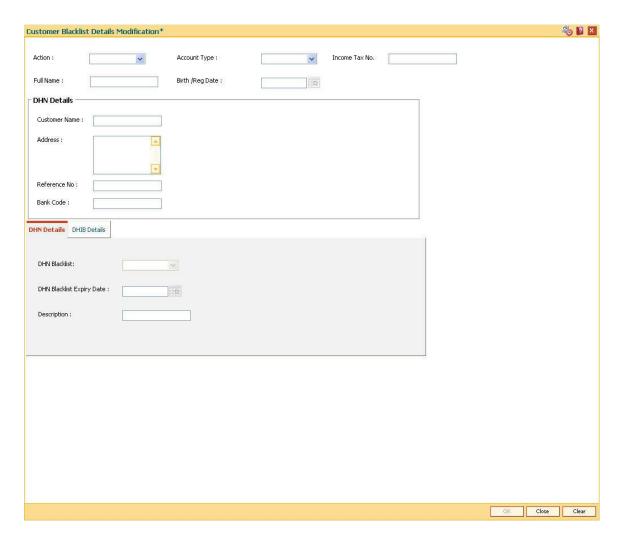

Not Applicable

To maintain the DHIB/DHN customer blacklist details

- 1. Type the fast path **STM81** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Customer Blacklist Details Modification**.
- 2. The system displays the Customer Blacklist Details Modification screen.

- 6. Click the **Ok** button.
- 7. The system displays the message "Record Successfully updated". Click the **Ok** button.

1.39. ETM01 - Customer Alerts Registration

Alerts can be categorized as bank initiated, CASA account level and customer level alerts. The bank initiated alert is sent to all the customers as and when the underlying event occurs while the customer registered and CASA account level alerts are sent to the customers who have registered for the same.

Using this option you can register for alerts and maintain various details required to provide the alert message service to customers. The alert message can be sent either through SMS or Email or both. You can also mark a time period for a customer within which no SMS alert messages will be sent. This flexibility is provided for customers who do not wish to be disturbed during their office hours or early morning etc. The SMS alerts queued during the do not disturb time range are sent to the customer after the end of set time range.

The alerts can be registered at customer level or at account level. Customer is required to specify which all type of transactions and events have to be intimated through alert. The transaction/ event triggers the alert generation. For the specified event or transaction, the system sends an alert message to the customer.

Definition Prerequisites

- 8053 Customer Addition
- · Availability of customer accounts

Modes Available

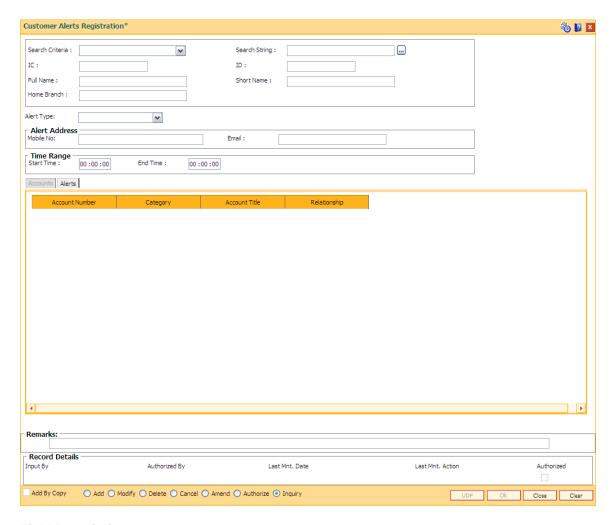

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedure**.

To register customer alerts

- 1. Type the fast path **ETM01** and click **Go** or navigate through the menus to **Global Definition > Clearing > Customer Alerts Registration**.
- 2. The system displays the **Customer Alerts Registration** screen.

Customer Alerts Registration

Field Description Name

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria from the drop-down list.

The options are:

- Customer short name
- Customer IC
- Customer ID

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the criteria selected in the **Customer Search** field.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, the customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC [Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID [Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Full [Display]

Name

This field displays the full name of the customer.

By default the system displays the name as entered in the **Customer Addition** (Fast Path: 8053) option.

Short [Display]

Name

This field displays the short name of the customer.

By default the system displays the name as entered in the **Customer Addition** (Fast Path: 8053) option.

Home Branch

[Display]

This field displays the code of the branch, where the customer account is opened.

These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Alert

[Mandatory, Drop-Down]

Type

Select the alert type from the drop-down list.

The options are:

- Customer level This option is selected for registering alerts for a specific customer.
- Account level This option is selected for registering alerts for a specific account.

Alert Address

Mobile [Display]

No

This field displays the mobile number of the customer as maintained in the **Customer Information Maintenance** (Fast Path:CIM09) option.

Email [Display]

This field displays the email ID of the customer as maintained in the Customer

Information Maintenance (Fast Path:CIM09) option.

Time Range

Start [Optional, hh:mm:ss]

Time Type the start time for the do not disturb period.

End [Optional, hh:mm:ss]

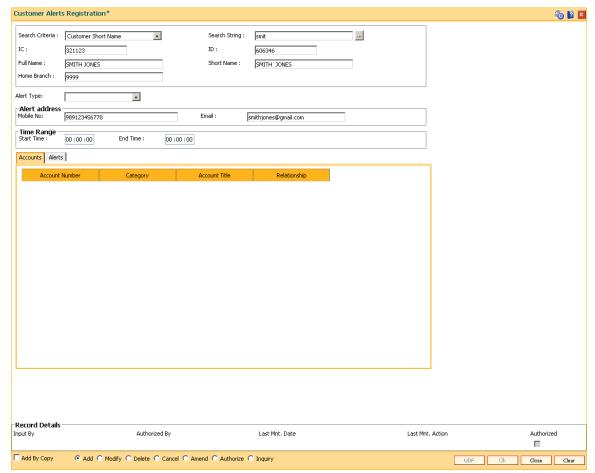

Time Type the end time for the do not disturb period.

3. Click the Add button.

4. Select the search criteria from the drop-down list.

5. Type the search string and select the relevant record from the pick list. The system displays the customer details.

Customer Alerts Registration

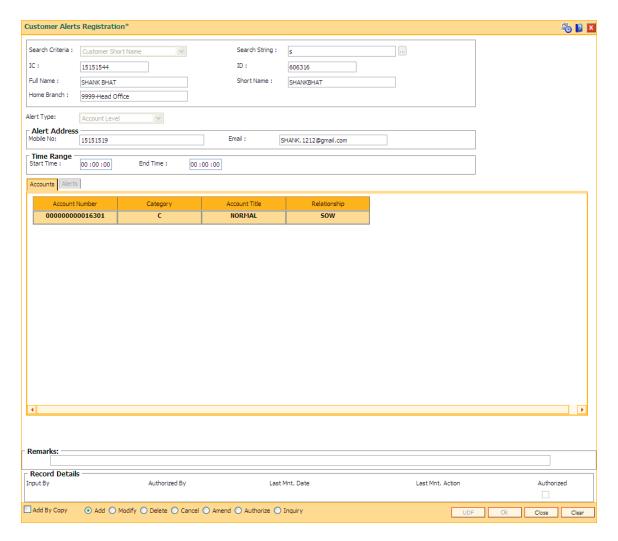

6. Select the alert type from the drop-down list. The system displays the details of various accounts for the selected customer.

Accounts

This tab is enabled if the Account level option is selected in the Alert Type drop-down list.

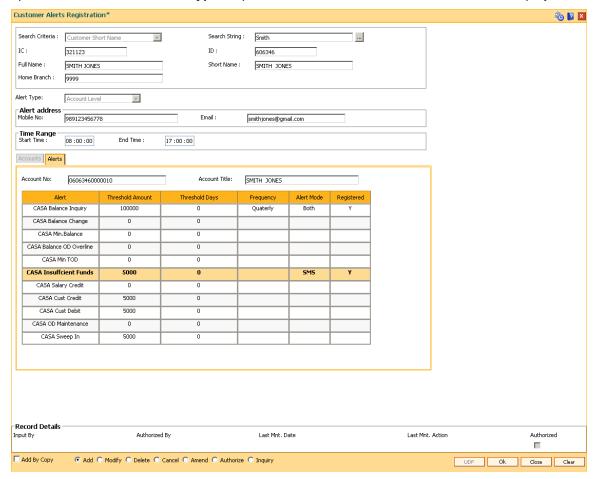

Field Name	Description
Account	[Display]
Number	This column displays the account number.
	Based on the search criterion selected, all related CASA accounts of the customer are displayed.
Category	[Display]
	This column displays the category of the CASA account.
Account Title	[Display]
	This column displays the account title.
Relationship	[Display]
	This column displays the relationship by which the customer is linked to the account.

- 7. Double-click a particular record in the **Accounts** tab to view the alerts registered under the **Alerts** tab.
- 8. Enter the relevant details in the **Alerts** tab.

Alerts

This tab displays the alerts for which the customer/account is registered. If the **Customer level** option is selected in the **Alert Type** drop-down list, then all customer level alerts are displayed.

Field Name	Description
Account No	[Display] This field displays the account number selected from the accounts tab. For customer level alerts, this field is blank.
Account Title	[Display] This field displays the account title.
Alert	[Display] This column displays the alert name.

Based on the **Alert Type** selected, it displays the account level or customer level alerts.

Threshold Amount

[Conditional, Numeric,15]

Type the threshold amount.

This field is enabled for debit and credit alerts.

If the transaction amount is greater than the threshold amount then an alert message is sent to the customer.

Threshold Days

[Display]

This field displays the number of threshold days.

It is the number of days before the event when the alert has to be sent to the customer.

Frequency

[Conditional, Drop-Down]

Select the frequency at which the alert has to be sent to the customer from the drop-down list.

The options are:

- Daily
- Weekly
- Fortnightly
- Monthly
- Bi-Monthly
- Quarterly

This field is enabled for the alerts which are frequency dependent.

Alerts Time

[Conditional, Numeric, HH]

Type the alert time of the CASA balance SMS alert generation. If no time is specified, the account balance alert is generated at the pre defined frequency as per the current functionality. This field is enabled if the **Daily** option is selected from the **Frequency** drop-down list.

Alert Mode

[Conditional, Drop-Down]

Select the mode through which alert message has to be sent to the customer from the drop-down list.

The options are:

- SMS: This option can be selected if the **Mobile No** field is not blank.
- E-mail: This option can be selected if the **Email** field is not blank.
- Both: This option can be selected if the Mobile No and Email fields are not blank.

It is mandatory to select the alert mode if you want to register alerts for the corresponding transaction/event.

Registered

[Optional, Check Box]

Select the Registered check box corresponding to the transaction/event for

which alerts are to be sent to the customer.

- 9. Click the **OK** button.
- 10. The system displays the message "Record Added...Authorisation Pending..". Click the **OK** button.
- 11. The alerts are successfully registered once the record is authorised.

1.40. CIM25 - Blacklist Restriction Maintenance

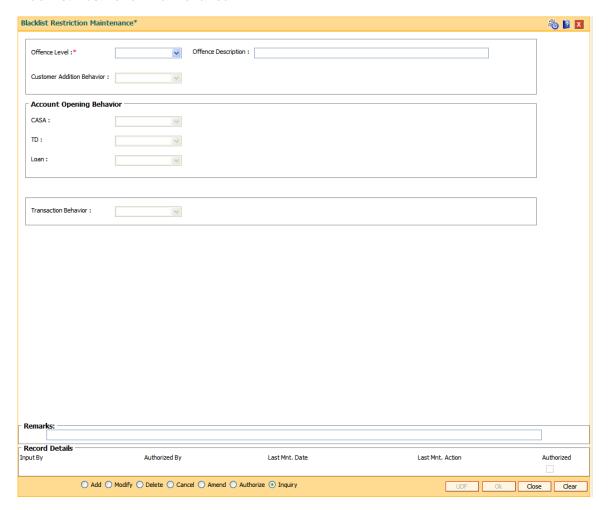

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry.

To blacklist restriction information

- Type the fast path CIM25 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer BlackList Details.
- 2. The system displays the **Blacklist Restriction Maintenance** screen.

Blacklist Restriction Maintenance

Field Name	Description
Offence Level	[Mandatory, Drop down, Numeric, Three]
	Select the blacklist offence level.
	If it is a existing Offence Level then a warning message "This is a

existing Offence Level" will be shown.

Offence Description [Mandatory, Character, 120]

Enter the description for the offence.

Customer Addition Behaviour

1.46. Cl999 - Customer Account Relation Inquiry - Zoom Inquiry

Using this option you can view the details on Asset Liability position and Profitability of the customer for all accounts with which the customer is related.

Definition Prerequisites

• 8053 - Customer Addition

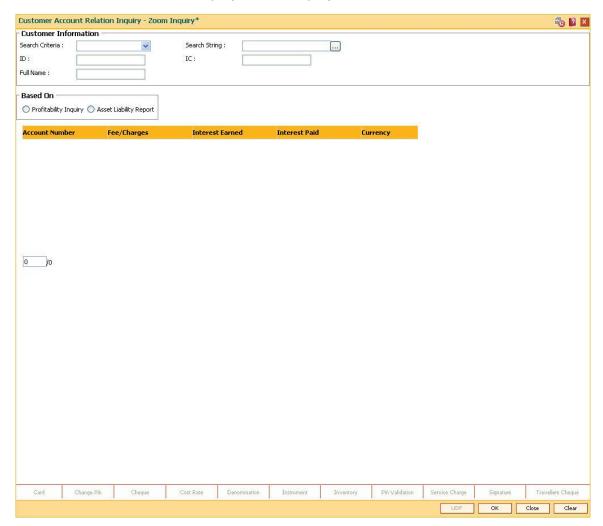

Modes Available

Not Applicable

To view the customer account relation

- Type the fast path Cl999 and click Go or navigate through the menus to Transaction Processing > Customer Transactions > Customer Account Relation Inquiry - Zoom Inquiry.
- 2. The system displays the Customer Account Relation Inquiry Zoom Inquiry screen.

Customer Account Relation Inquiry - Zoom Inquiry

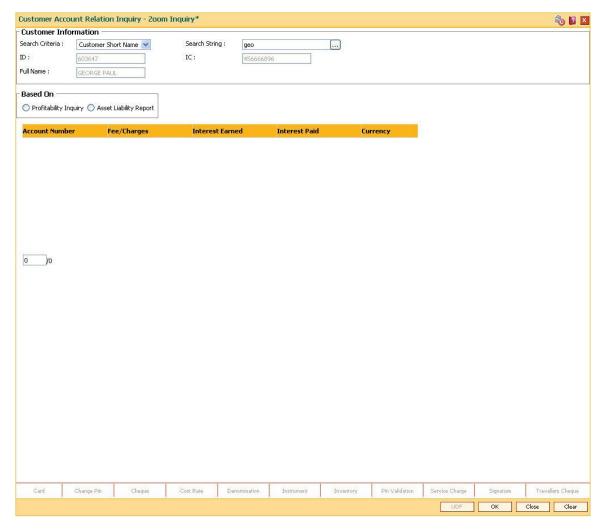

FIEID DESCRIPTION		
Field Name	Description	
Search Criteria	[Mandatory, Drop-Down]	
	Select the search criteria, to search for the customer, from the drop-down list.	
	The options are:	
	Customer short name	
	 Customer IC Identification criteria (IC) arrived at by the bank during customer addition. 	
	 Customer ID- Unique identification given by the bank. 	
Search String	[Mandatory, Alphanumeric, 20]	
	Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.	
	If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.	
	For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.	
ID	[Display]	
	This field displays the ID of the customer.	
	A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.	
IC	[Display]	
	This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.	
Full Name	[Display]	
	This field displays the full name of the customer.	
	The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.	
Based On	[Mandatory, Radio Button]	
	Click on the appropriate option based on which the customer account relation inquiry is to be made.	
	The options are:	

• Profitability Inquiry

- Asset Liability Report
- 3. Select the search criteria from the drop-down list.
- 4. Enter the search string and press the **<Tab>** key.
- 5. Select the customer from the pick list.

Customer Account Relation Inquiry - Zoom Inquiry

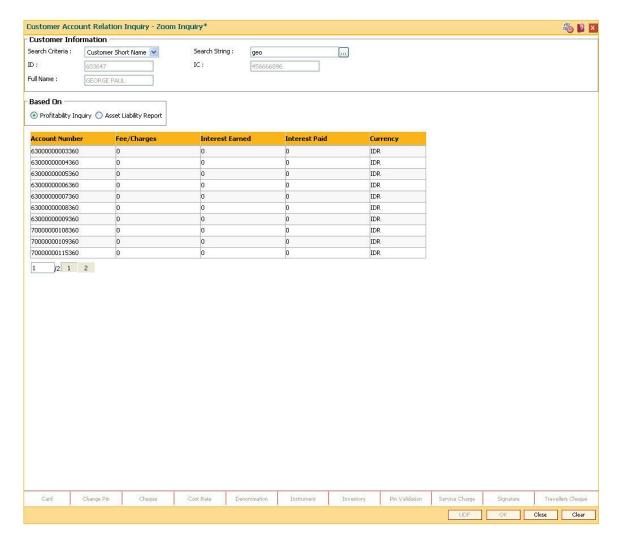

- 6. Click the **Profitability Inquiry** radio button to view the profitability details and click the **OK** button.
- 7. The system displays the interest earned, interest paid and charges details.

Profitability Inquiry

The **Profitability Inquiry** option displays the fees/charges levied on each account, interest earned and paid.

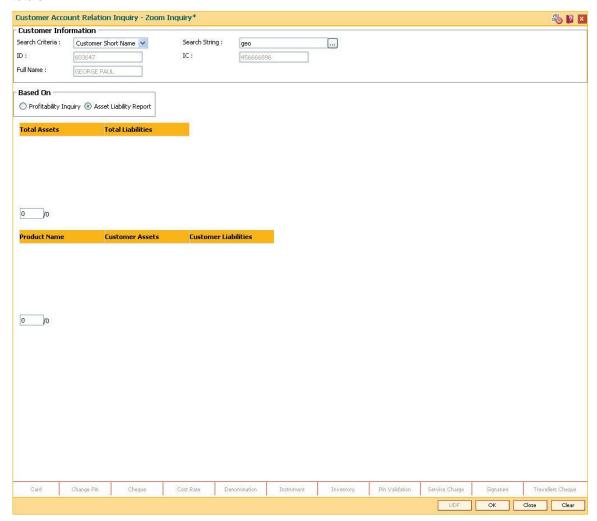

Column Name	Description
Account Number	[Display] This column displays all the accounts held by the customer.
Fees/Charges	[Display] This column displays the total fees and various charges levied on each account from the date of the account opening.
Interest Earned	[Display] This column displays the total debit interest, i.e. the interest earned by the bank against the account. This interest is an income for the bank.
Interest Paid	[Display] This column displays the total credit interest, i.e. the interest earned by the customer. This interest is expenditure for the bank.
Currency	[Display] This column displays the currency assigned to the product under which the account is opened.

8. Click the **Asset Liability Report** radio button view the asset liability report and click the **OK** button.

Asset Liability Report

The **Asset Liability Report** option provides details of product wise assets, liabilities and the totals.

Field Name	Description
Total Assets	[Display] This column displays the net worth of the total assets held by the customer.
Total Liabilities	[Display] This column displays the net worth of the total liabilities of the customer.
Column Name	Description

Product Name [Display]

This column displays the product name under which the customer account

was opened.

Customer [Display]

Assets This column displays the net worth of the total assets of the customer for the

product.

Customer [Display]

Liabilities This column displays the net worth of the total liabilities of the customer for the

product.

9. The system displays the asset and liability details.

10. Click the Close button.

1.47. CIM55 - Customer ID Verification History Inquiry*

Using this option you can view the history of the verification done on the selected customer account. It allows you to view the details of history for the changes made in the **Customer ID Verification Maintenance** (Fast Path: CIM54) option.

Definition Prerequisites

- 8053 Customer Addition
- CIM54 Customer ID Verification Maintenance

Modes Available

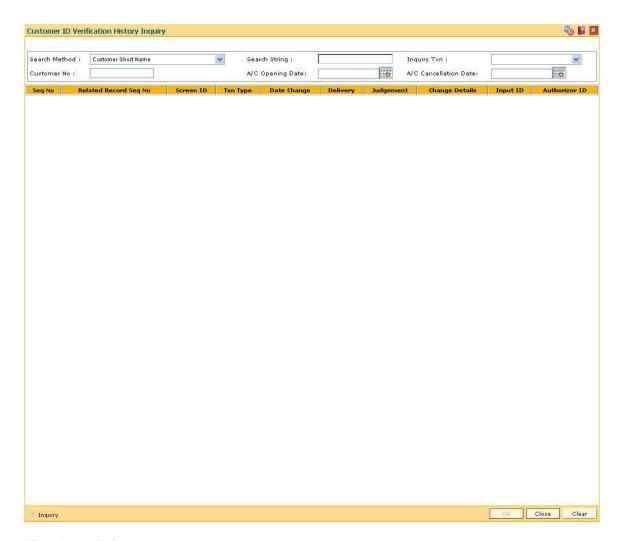

Not Applicable

To view the history of customer ID verification

- 1. Type the fast path **CIM55** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Customer ID Verification History Inquiry.
- 2. The system displays the Customer ID Verification History Inquiry screen.

Customer ID Verification History Inquiry

Field Description

Field Name	Description
Search Method	[Mandatory, Drop-Down]
	Select the search criteria to search for a customer from the drop-down list.
