23.2. APM02 - Attribute Channel Exception Maintenance	1396
23.3. APM03 - Attributes Co-existence Restriction Maintenance	1401

1. Master Definitions

FLEXCUBE maintains various Masters like, Bank Master, Branch master, various Product Masters like (CASA/TD/Loans), etc. All these maintenances are part of the global maintenance done at the host and have to be downloaded in the branch database. All the attributes defined at the master level impact the accounts opened under the respective product masters. **FLEXCUBE Retail** has the feature or flexibility of changing some of the parameters at the individual account level. This gives the bank the flexibility to customize or extend a preferential treatment to some accounts.

1.1. BAM20 - Bank Codes Maintenance

Using this option you can create and maintain other banks operating within the country. **Oracle FLEXCUBE** refers to bank codes for other operations, viz., Remittance definitions of other correspondent banks and Clearing definitions for tracking routing numbers.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry.

To add a new bank code

1. Type the fast path **BAM20** and click **Go** or navigate through the menus to **Global Definitions > Master > Bank Codes Maintenance**.
2. The system displays the **Bank Codes Maintenance** screen.

5. Click the **Ok** button.
6. The system displays the message "Record Added...Authorisation Pending..". Click the **OK** button.
7. The bank code is added once the record is authorised.

1.2. BAM08 - Bank Master Maintenance

Using this option you can maintain the general information of the bank operating **Oracle FLEXCUBE**. The Bank Master is a single record table, set up at installation where data cannot be added or deleted. The name and address of the Head Office along with separate process date for each of the modules is maintained.

The Bank Master contains all the bank level parameters such as the bank code, module-wise processing date, next process date, local currency of the bank, suspense GL and Inter-Branch (IB) GL codes that are used by all branches and modules. Using this option, you can post entries in product as well as non-product level GLs for all customer initiated and GL-GL transactions.

The various GLs such as the suspense GL, Inter-branch GL, With-Holding Tax GL, Cash Overage, Cash Shortage, Bank Cash GL and Branch Vault GL can also be specified in this maintenance.

Definition Prerequisites

- [BAM20 - Bank Codes Maintenance](#)
- [GLM02 - Chart of Accounts](#)
- [BAM25 - Currency Definition](#)

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify the bank master details

1. Type the fast path **BAM08** and click **Go** or navigate through the menus to **Global Definitions > Master > Bank Master Maintenance**.
2. The system displays the **Bank Master Maintenance** screen.

Field Description

Field Name	Description
------------	-------------

Bank Name	[Mandatory, Alphanumeric, 40] Type the name of the bank.
------------------	---

Bank Short Name	[Mandatory, Alphanumeric, 20] Type the short name of the bank.
------------------------	---

Clearing Bank Code	[Mandatory, Numeric, Four] Type the code assigned to the bank by the central bank of the country. This code will be present on all the instruments of the bank and shall be used to identify if the instruments are the bank's own instruments or other bank's instruments.
---------------------------	---

Address	[Mandatory, Alphanumeric, 35] Type the address of the head office of the bank.
----------------	---

City	[Mandatory, Alphanumeric, 35]
-------------	-------------------------------

	Type the city where the head office of the bank is located.
State	[Mandatory, Alphanumeric, 35] Type the state where the head office of the bank is located.
Zip	[Mandatory, Alphanumeric, 40] Type the zip code where the head office of the bank is located.
Country	[Mandatory, Pick List] Select the country where the head office of the bank is situated from the pick list.
Bank Identifier	[Optional, Alphanumeric, Eight] Type the bank identifier code. The code will be a part of IBAN ¹ number when it is generated.
ISO Code	[Optional, Alphanumeric, Two] Type the ISO code. The ISO country code entered will be a part of IBAN number whenever it is generated.
Last Process Date	[Display] The date on which the End of Day (EOD) process was last run. This date will be maintained for the first time once when the bank starts its operations on FLEXCUBE Retail . Subsequently, this will be maintained automatically by FLEXCUBE based on the holiday calendar of the bank (derived from the branch calendars).
Current Process Date	[Mandatory, Pick List, dd/mm/yyyy] Select the current process date from the pick list. By default, the current date will be the next process date after the last EOD was run on the system. This date will be maintained for the first time once when the bank starts its operations on FLEXCUBE Retail . Subsequently, this will be maintained automatically by FLEXCUBE based on the holiday calendar of the bank (derived from the branch calendars).
Next Process Date	[Mandatory, Pick List, dd/mm/yyyy] Select the next process date from the pick list. By default, the next process date will be the next working date after the current process date. This date will be maintained for the first time once when the bank starts its operations on FLEXCUBE Retail . Subsequently, this will be maintained automatically by FLEXCUBE based on the holiday calendar of the bank (derived from the branch calendars).
GL Process	[Mandatory, Pick List, dd/mm/yyyy]

¹(International Bank Account Number: It is a unique account number that is used to identify a customer's account in a financial institution internationally.)

Date	<p>Select the current process date, for the general ledger module, from the pick list.</p> <p>The system completes the processing of each module separately while running the EOD. Thus, the current process date, i.e., the next process date after the last EOD was run on the system, for each module is displayed separately for information purposes.</p>
STL Process Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the current process date for the settlement module from the pick list.</p> <p>The system completes the processing of each module separately while running the EOD. Thus, the current process date, i.e., the next process date after the last EOD was run on the system, for each module is displayed separately for information purposes.</p>
CHQ Process Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the current process date, for the current and savings account (CASA) module, from the pick list.</p> <p>The system completes the processing of each module separately while running the EOD. Thus, the current process date, i.e., the next process date after the last EOD was run on the system, for each module is displayed separately for information purposes.</p>
TD Process Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the current process date, for the term deposits (TD) module, from the pick list.</p> <p>The system completes the processing of each module separately while running the EOD. Thus, the current process date, i.e., the next process date after the last EOD was run on the system, for each module is displayed separately for information purposes.</p>
LN Process Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the current process date for the loans module from the pick list.</p> <p>The system completes the processing of each module separately while running the EOD. Thus, the current process date, i.e., the next process date after the last EOD was run on the system, for each module is displayed separately for information purposes.</p>
IBAN MASK	<p>[Optional, Alphanumeric, 20]</p> <p>Type the IBAN mask.</p> <p>For more information refer to Example 02 provided at the end of the CASA Account Opening (Fast Path: 8051) option.</p>

Credit Suspense Account

[Mandatory, Numeric, Nine]
Type the GL code for the credit suspense account.
An offline credit transaction, which is rejected by the host after becoming online, will be posted to this account. Branches will have to manually reverse out entries from this GL and post it to the relevant account after undertaking suitable corrective mechanisms.
The entered GL account should be the Miscellaneous Credit implemented GL. Both the GLs should be of similar type either implemented GL or Normal GL.

Debit Suspense Account

[Mandatory, Numeric, Nine]
Type the GL code for the debit suspense account.
An offline debit transaction, which is rejected by the host after becoming online, will be posted in this account. Branches will have to manually reverse out entries from this GL and post it to the relevant account after undertaking suitable corrective mechanisms.
The entered GL account should be the Miscellaneous Debit implemented GL. Both the GLs should be of similar type either implemented GL or Normal

	GL.
IB Credit Account	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for the inter branch credits.</p> <p>The GL entries for all inter branch transactions are recorded in this account. At the end of every business day the balance in this account across all the branches in the bank should be zero. For the transactions done on accounts of other branches, contra Inter branch entries are generated automatically by FLEXCUBE during End of Day and posted against this GL.</p>
IB Debit Account	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for the inter branch debits.</p> <p>The GL entries for all inter branch transactions are recorded in this account. At the end of every business day the balance in this account across all the branches in the bank should be zero. For the transactions done against accounts of other branches, contra entries are posted against this GL. For the transactions done on accounts of other branches, contra Inter branch entries are generated automatically by FLEXCUBE during End of Day and posted against this GL.</p>
Future Dated Bridge GL_CR	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for the future dated bridge credit GL.</p> <p>All the bridging credit entries for future dated transactions, from the transaction date to the value date, will be recorded in this account.</p>
Future Dated Bridge GL_DR	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for the future dated bridge debit GL.</p> <p>All the bridging debit entries for future dated transactions, from the transaction date to the value date, will be recorded in this account.</p>
Withholding Tax GL 1	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for withholding tax GL 1.</p> <p>The GL entries for tax 1 deducted at source (TDS) for CASA will be recorded in this GL.</p> <p>This is a liability type GL.</p>
Withholding Tax GL 2	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for withholding tax GL 2.</p> <p>The GL entries for tax 2 deducted at source (TDS) for CASA will be recorded in this GL.</p> <p>This is a liability type GL.</p>
VAT GL Account	<p>[Mandatory, Numeric, Nine]</p> <p>This field is currently not used.</p>
Bank Cash GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for the bank cash GL.</p> <p>The GL entries for the buy and sell transactions between the vault of the branch and the central bank will be recorded in this GL.</p>

Branch Vault Cash GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for the branch vault cash GL.</p> <p>The GL entries for the debit and credit transactions for a customer in a branch will be recorded in this GL.</p>
Cash Overage GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for the branch cash overage GL.</p> <p>The credit entries for the reconciliation of excess cash physically held by the teller will be recorded in this GL.</p> <p>This is a liability type GL.</p>
Cash Shortage GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for the cash shortage GL.</p> <p>The debit entries for the reconciliation of shortage of cash physically held by the teller will be recorded in this GL.</p> <p>This is a asset type GL.</p>
FX Profit Sundry GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for FX profit sundry GL.</p> <p>This GL account signifies the sundry GL which is debited for the profit entries to be captured as part of FX transactions.</p>
FX Profit/Loss GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the code for FX profit/loss GL.</p> <p>This GL account signifies the income GL which is credited for the profit entries to be captured as part of FX transactions.</p>
IB IBD Credit GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for the inter branch international business department credits.</p> <p>The GL entries for all inter branch transactions are recorded in this account. At the end of every business day the balance in this account across all the branches in the bank should be zero. For the transactions done on accounts of other branches, contra Inter branch entries are generated automatically by FLEXCUBE during End of Day and posted against this GL.</p>
IB IBD Debit GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for the inter branch international business department debits.</p> <p>The GL entries for all inter branch transactions are recorded in this account. At the end of every business day the balance in this account across all the branches in the bank should be zero. For the transactions done against accounts of other branches, contra entries are posted against this GL. For the transactions done on accounts of other branches, contra Inter branch entries are generated automatically by FLEXCUBE during End of Day and posted against this GL.</p>
Contingent Asset GL code	<p>[Mandatory, Numeric, Nine]</p> <p>Type the contingent asset GL code to which contingent balance needs to be</p>

for Limit	<p>posted if the contingent entries are passed at limit level.</p> <p>The user can define if the contingent entries can be passed at the limit level in the Customer Limit Setup (Fast Path: LMC01) option in the Pass Contingent Entries field.</p> <p>The system will pass contingent accounting entry for unutilized limit amount (Sanctioned Amount – Disbursed amount) for term loans, revolving loan and OD account.</p>
Contingent Liability GL code for Limit	<p>[Mandatory, Numeric, Nine]</p> <p>Type the contingent liability GL code to which contingent balance needs to be posted if the contingent entries are passed at limit level.</p> <p>The user can define if the contingent entries can be passed at the limit level in the Customer Limit Setup (Fast Path: LMC01) option in the Pass Contingent Entries field.</p>
Position Currency	<p>[Optional, Drop-Down]</p> <p>Select the appropriate position currency from the drop-down list.</p> <p>It is used to define the position in foreign exchange at the bank level.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Destination currency • Source currency
Tax Receivable GL 1	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL code for the tax receivable GL 1.</p> <p>This GL is used to debit for tax refund on the backdated debit interest adjustment.</p> <p>This GL is an asset type of GL account.</p> <p>If the hash definition at the bank level indicates that the refund of tax should be allowed then this field is enabled.</p>
Tax Receivable GL 2	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL code for the tax receivable GL 2.</p> <p>This GL is used to debit for tax refund on the backdated debit interest adjustment. This GL is an asset type of GL account.</p> <p>If the hash definition at the bank level indicates that the refund of tax should be allowed then this field is enabled.</p>
Tax Remitted to GL	<p>[Optional, Numeric, Nine]</p> <p>Enter the GL to which the tax is remitted within the bank in LCY.</p>
Near to Real Time	<p>[Optional, Check Box]</p> <p>Select the near to real time check box , denotes that the product GLs will be updated within the set time that is very close to the real time.</p>
Scheduler based	<p>[Optional, Check Box]</p>

Select the Scheduler Based check box , denotes that the balances of the product level GLs will get updated at a specified frequency only.

Field Description

Field Name	Description
------------	-------------

Bank Tax Id	[Mandatory, Numeric, 15] Type the identity number under which the bank pays the tax. This field is only for information purposes.
--------------------	---

Central Bank Code	[Mandatory, Numeric, Four] Type the central bank code. This is a code assigned to a bank by the Central Bank.
--------------------------	---

Head Office LO	[Mandatory, Numeric, Two] Type the head office LO.
-----------------------	---

By default, the system displays the value in this field as 1.

Head Office Cost Center	<p>[Mandatory, Drop-Down]</p> <p>Select the code of the branch, which is acting as the head office of the bank, from the drop-down list.</p>
Default Bank Currency	<p>[Mandatory, Drop-Down]</p> <p>Select the currency code, of the local currency of the bank, from the drop-down list.</p> <p>The various currencies of the bank are defined using the Currency Codes Maintenance (Fast Path: BAM56) option or in FLEXCUBE Corporate depending upon the implementation.</p>
Head Office Currency	<p>[Mandatory, Drop-Down]</p> <p>Select the local currency for the head office branch from the drop-down list.</p>
Start Year Month	<p>[Mandatory, Numeric, Two]</p> <p>Type the start year month.</p> <p>Interest/charges capitalization dates for CASA/TD products are determined based on the value in this field.</p> <p>For example, if the value in this field is set as 7 and if the capitalization frequency is set as half-yearly at the product level, the credit capitalization for the CASA product will take place in June and December every year. If the value in this field was 3, then the credit interest capitalization will happen in August and February every year.</p> <p>The start month can be different from the financial year of the bank.</p>
Automatic MCA No. Generation	<p>[Optional, Checkbox]</p> <p>Select the Automatic MCA No. Generation checkbox if MCA No. has to be generated automatically.</p>
Clrg. Per Day	<p>This field is for future use.</p>
Index Rate Period	<p>This field is for future use.</p>
IDD Max Days	<p>This field is for future use.</p>
IT Circle Number	<p>[Mandatory, Alphanumeric, 12]</p> <p>Type the income tax circle number where annual returns are filed.</p>
TDS Next Remittance Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the next date on which tax is to be remitted by the bank to the government agents from the pick list.</p> <p>This field is for information purposes only.</p>
Interface Flag	<p>[Optional, Check Box]</p> <p>Select the Interface Flag check box, for Universal Banking Implementation with Interface to FLEXCUBE Corporate modules.</p>
TD Variance	<p>[Mandatory, Numeric, Three, Five]</p>

for OD	<p>Type the variance that is added to interest rate of a term deposit against which an overdraft is granted.</p> <p>When the term deposit is kept as security against an overdraft, the OD interest rate is calculated as follows:</p> <p><i>OD interest rate = TD interest rate + TD variance for OD</i></p> <p>For example, an overdraft is being provided to a CASA account customer against a term deposit he holds with the bank.</p> <p>Rate of TD - 4.5% for 12 months</p> <p>Variance provided for OD - 2.5%</p> <p>Debit interest charged on OD - 4.5 + 2.5 % = 7 %</p>
TDS Start Month	<p>[Mandatory, Numeric, Two]</p> <p>Type the month that represents the beginning of the tax year.</p> <p>For example, if the tax year is April to March, this field will have a value of 4 (Apr).</p>
Week Start Day	<p>[Mandatory, Numeric, One]</p> <p>Type the day that represents the beginning of the week for the bank.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 1 - Monday • 2 - Tuesday • 3 - Wednesday • 4 - Thursday • 5 - Friday • 6 - Saturday • 7 - Sunday <p>This field is used for any processing frequency which is specified as weekly.</p>
Automatic Acct No. Generation	<p>[Optional, Check Box]</p> <p>Select the Automatic Acct No. Generation check box if the system should automatically generate account numbers.</p> <p>The number is generated as a combination of branch/ product code / serial number and a check digit.</p> <p>If this field is not selected, the account number can be manually entered for CASA and LOAN accounts.</p>
Rate VAT	<p>[Mandatory, Numeric, Three, Five]</p> <p>Type the percentage value, if the Commission on Turnover (COT) is a percentage for turnover more than the slab maintained in the Account Attributes Maintenance.</p>
IS Interface	<p>[Optional, Check Box]</p> <p>Select the IS Interface check box, for Universal Banking Implementation with Interface to FLEXCUBE Retail Investor Services modules.</p>

Amount VAT	<p>[Mandatory, Numeric, Three, Two]</p> <p>Type the fixed amount, if the Commission on Turnover (COT) is fixed for turnover more than the slab maintained in the Account Attributes Maintenance.</p>
Reserve Calculation Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the reserve calculation frequency from the drop-down list.</p> <p>It is the frequency at which provisioning should take place for CASA and Loan accounts based on the customer CRR codes.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Daily • Weekly • Fortnightly • Monthly • Bi-monthly • Quarterly • Half-yearly • Yearly
Hold Amount Flag	<p>[Optional, Check Box]</p> <p>Select the Hold Amt. Flag check box, to allow the bank to put a hold on the customer's available balance in case of future transactions. The hold will be removed on the value date.</p> <p>If check box is not selected, the system will post the future dated transaction only on the value date.</p>
Flier to be sent with Statement	<p>[Mandatory, Drop-Down]</p> <p>Select the type of flier to be sent along with the statement from the drop-down list.</p> <p>A flier is an additional information with the statement.</p> <p>The nature of OMR mark in the output statement file will be determined based on this flag. The printer can append the required flier based on the OMR flag.</p> <p>The options are:</p> <ul style="list-style-type: none"> • No Flier • Small Flier • Large Flier
Service Charge Package	<p>[Optional, Pick List]</p> <p>Select the service charge package, for transactions which do not have account numbers (e.g. Walk-In transactions), from the drop-down list.</p>
Service Charge Package Name	<p>[Display]</p> <p>This field displays the name of the service charge package attached.</p>

AML Dr Limit	[Optional, Numeric, 13, Two] Type the anti money laundering limit for debit transaction.
AML Cr Limit	[Optional, Numeric, 13, Two] Type the anti money laundering limit for credit transaction.
AML Daily Dr Limit	[Optional, Numeric, 13, two] Type the anti money laundering limit for cumulative debit transaction on a particular day.
AML Daily Cr Limit	[Optional, Numeric, 13, Two] Type the anti money laundering limit for cumulative credit transaction on a particular day.

Future Dated Funds Transfer Parameters

Hold for Asset Product	[Optional, Check Box] Select the Hold for Asset Product check box if credit hold is required for asset type product for future dated transactions.
Hold For Liability Product	[Optional, Check Box] Select the Hold For Liability Product check box if credit hold is required for liability type product for future dated transactions.
Holiday Processing	[Mandatory, Drop-Down] Select the processing date of the transaction, if the value date of the transaction is on a non working day, according to bank calendar, from the drop-down list. The options are: <ul style="list-style-type: none"> • Next • Previous

Limits Revaluation Frequency

Last Revaluation Date	[Mandatory, Pick List, dd/mm/yyyy] Select the last date of limit revaluation from the pick list.
Limit Revaluation Frequency	[Mandatory, Drop-Down] Select the frequency of the limit revaluation from the drop-down list.
Next Revaluation Date	[Mandatory, Pick List, dd/mm/yyyy] Select the next date of revaluation of the bank from the pick list.
Revaluation Base	[Display] This field displays the base of revaluation for the bank.
Inter-Branch Settlement	[Mandatory, Radio Button] Select the appropriate inter branch settlement mode.

The options are:

- **Direct:** Select this option if the Interbranch settlement will happen directly.
 - **Through Hierarchy:** Select this option if the inter-branch settlement will be routed through reporting branches.
6. Click the **Ok** button.
 7. The system displays the message "Record Modified...Authorisation Pending..". Click the **OK** button.
 8. The bank master is modified once the record is authorised.

1.3. BAM17 - Branch Type Maintenance

A bank operates as a group of numerous branches at various locations. All branches may or may not perform every business activity that banks carry out. For example, a particular branch located in a rural area may not deal with foreign exchange while a certain branch located in a prime commercial area of a big city may function only as a commercial bank.

Using this option, the bank can define categories or types of branches, depending on the activities they perform by assigning a unique numeric code to each defined branch category or type. Depending on the business activities performed at a branch, a branch- type code could be attached to the **Branch Master Maintenance** (Fast Path: BAM03) option.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a new branch type

1. Type the fast path **BAM17** and click **Go** or navigate through the menus to **Global Definitions > Master > Branch Type Maintenance**.
2. The system displays the **Branch Type Maintenance** screen.

5. Click the **Ok** button.
6. The system displays the message "Record Added...Authorisation Pending..". Click the **OK** button.
7. The bank type is added once the record is authorised.

1.4. BAM03 - Branch Master Maintenance

Using this option you can create new branches, maintain branch centers and define the hierarchy of the branch structure. Such hierarchy is reflected while printing the branch books of account such as balance sheet, profit and loss, etc. You can also collect the tax from the other branches and later on can remit it to the local tax authority.

Oracle FLEXCUBE supports consolidation of GL up to nine levels. Only the branches defined in this maintenance can pass valid general ledger entries. Branches that have transactions should be defined as the lowest level (level 0) branches. Non-**FLEXCUBE** branches can be set up to co-exist with **Oracle FLEXCUBE** branches.

Definition Prerequisites

- [BAM41 - Sector Master](#)
- [BAM75 - State Codes Maintenance](#)
- [BAM17 - Branch Type Maintenance](#)

Modes Available

Field Description

Field Name	Description
Branch Code	<p>[Mandatory, Numeric, Four]</p> <p>Type the branch code.</p> <p>Branch code is a unique number.</p> <p>Once added, this field cannot be modified or amended.</p>
Branch Name	<p>[Mandatory, Alphanumeric, 120]</p> <p>Type the branch name.</p> <p>This name will appear on the header of printed reports related to the branch.</p>
Branch Currency	<p>[Mandatory, Drop-Down]</p> <p>Select the branch currency from the drop-down list.</p> <p>The local currency of the branch in which it operates.</p>
Branch Short Name	<p>[Mandatory, Alphanumeric, 40]</p>

Type the short name for the branch.

This name will appear in the pick list of a field, where a branch name needs to be selected.

CC Level	[Mandatory, Drop-Down] Select the appropriate CC level for the branch from the drop-down list.
Address	[Optional, Alphanumeric, 35, Three Lines] Type the detailed physical address of the branch. It is used for printing on advice and reports where required.
Higher Level CC	[Mandatory, Pick List] Select a valid FCR branch code from the pick list. The pick list displays the branch codes having CC level greater than the CC Level of the branch code under maintenance. For head office branch, this field accepts zero. There can be only one branch with 'Higher Level CC' as zero.
IBCC Level	This field is for future use.
Higher Level IBCC	This field is for future use.
City	[Optional, Alphanumeric, 35] Type the name of the city where the payable branch is situated.
Last Batch No	[Display] This field displays the batch number of the first voucher entry batch done in the branch. By default, the value in the field will be zero in the Add mode. In the Inquiry mode this field is a non-editable display field. This field can be used to the next batch number of voucher entry transactions in that branch.
State	[Optional, Alphanumeric, 35] Type the name of the state, where the payable branch is situated.
Clearing Sector Code	[Mandatory, Pick List] Select the clearing sector code from the pick list. The pick list lists all the sector codes defined in the Sector Master (Fast Path: BAM41) option. The clearing sector code along with other parameters is used to calculate the float to be given to different instruments deposited at this branch. This clearing sector code forms a part of the routing code of all inward instruments issued for this branch.
Zip Code	[Optional, Alphanumeric, 35] Type the zip code of the payable branch.
Main Branch	[Optional, Drop-Down] Select the main branch code from the drop-down list.

	This code is used for extension counters, which report to a main branch.
Country	[Optional, Pick List] Select the name of the country, where the payable branch is situated, from the pick list.
Computing Center	[Mandatory, Pick List] Select the code of the computing center for this branch from the pick list.
Department	This field is for future use.
Tax Collecting Branch	[Optional, Checkbox] Select the Tax Collecting Branch check box to collect the tax from the other branches and later on can remit it to the local tax authority.
Branch Type	[Mandatory, Drop-Down] Select the branch type from the drop-down list. The branch type specifies the activities that are carried out in the branch. The drop-down lists all the branches that are added in the Branch Type Maintenance (Fast Path: BAM17) option.
Tax Remitted to Branch	[Optional, Pick List] Select the tax remitted to branch code to which the tax goes if it is not a tax collecting branch from the pick list .
IFSC Code	[Optional, Alphanumeric, 11] Type the IFSC code. This is a unique across the branches of banks in India for NEFT and RTGS. The code consists of 11 digits: <ul style="list-style-type: none"> • First 4 digits represent the entity • Fifth digit is defaulted to '0' (Zero) for future use • Last 6 digits represent the branch identity
Flexcube Branch	[Optional, Check Box] Select the Flexcube branch check box if the branch is operating under Oracle FLEXCUBE . By default, the check box is selected.

3. Click the **Add** button.
4. Enter the branch code, branch name and the branch short name.
5. Enter the branch address and other branch details.
6. Select the type of branch from the drop-down list and the clearing sector code from the pick list.

1.7. BAM92 - Department Master Maintenance*

Using this option you can maintain different departments. The department code can be used while passing voucher entries. The departments can be used at branch-level if the Department flag is ticked for the branch.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add department master

1. Type the fast path **BAM92** and click **Go** or navigate through the menus to **Global Definition > Master > Department Master Maintenance**.
2. The system displays the **Department Master Maintenance** screen.

Department Master Maintenance

The screenshot shows the 'Department Master Maintenance' window. At the top, there's a title bar. Below it, there are two input fields: 'Department No. : 6' and 'Department Name : LOAN DEPARTMENT'. A large empty area occupies the middle of the screen. At the bottom, there is a 'Record Details' section with five columns: 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. Each column has a corresponding input field. Below this section is a toolbar with radio buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry'. To the right of the radio buttons are three buttons: 'Ok', 'Close', and 'Clear'.

1.11. BA316 - Village Master*

Using this option you can create a village code. The village code can then be linked to a branch code. A branch can be linked with many villages.

Definition Prerequisite

- [BAM03 - Branch Master Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the village master code

1. Type the fast path **BA316** and click **Go** or navigate through the menus to **Global Definitions > Master > Village Master Code**.
2. The system displays the **Village Master** screen.

Village Master

The screenshot shows the 'Village Master' application window. At the top, the title bar reads 'Village Master'. Below the title bar, there are four input fields arranged in two rows. The first row contains 'Village Code:' followed by a text box and a dropdown arrow, and 'Village Name:' followed by a text box. The second row contains 'Branch Code:' followed by a text box and a dropdown arrow, and 'Branch Name:' followed by a text box. Below these fields is a large empty rectangular area. At the bottom of the window, there is a 'Record Details' section with five columns: 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. Each column has a corresponding text box, and the 'Authorized' column has a checked checkbox. Below the 'Record Details' section is a navigation bar with radio buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry' (which is selected). To the right of these buttons are three buttons: 'Ok', 'Close', and 'Clear'.

Field Description

Field Name	Description
Village Code	[Mandatory, Alphanumeric, 10] Type the village code.
Village Name	[Mandatory, Alphanumeric, 46] Type the name of the village that is to be added in the village master.
Branch Code	[Mandatory, Pick List] Select the code of the branch, for which the village code is defined,.from the pick list.
Branch Name	[Display] This field displays the name of the selected branch code.

3. Click the **Add** button.
4. Enter the village code and name.
5. Enter the branch code and name.

Customer Search

Search Criteria	[Mandatory, Drop-Down] Select the search criteria, to search for the customer, from the drop-down list. The options are: <ul style="list-style-type: none"> • Customer short name • Customer IC Identification criteria (IC) arrived at by the bank during customer addition • Customer ID- Unique identification given by the bank
------------------------	--

Search String	[Mandatory, Alphanumeric, 20] Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field. If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering "Geo" in the search string field.
----------------------	--

Customer	[Display]
-----------------	-----------

ID This field displays the ID of the customer.
 A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

IC [Display]
 This field displays the identification code of the customer.
 A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Full Name [Display]
 This field displays the full name of the customer.
 The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Column Name	Description
Customer ID	[Display] This column displays the ID of the customer.
Customer IC	[Display] This column displays the identification code of the customer.
Full Name	[Display] This column displays the full name of the customer. The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.
Account No	[Display] This column displays the account number of the customer.
Relationship	[Display] This column displays the relationship with the account holder.
Delink	[Toggle] If the field is marked as Y then that group will get linked and if the field is marked as N then that group will get de-linked.

3. Click the **Add** button.
4. Enter the group code, name and select the group type.
5. Enter the group hierarchy and customer search details.
6. Click the **Add** button to add the customer.

1.14. BA431 - LOB Master

LOB master facilitates the generation of new Line of Business codes for the bank.

Using this option, new LOB codes are generated along with the LOB descriptions. Once defined, the LOB codes are available for selection while linking the LOB codes with the branches.

You can also define E-channel limit for the LOBs and during **Customer Addition** (Fast Path: 8053), based on the LOB selected, the corresponding e-channel limit will be defaulted at the customer level.

Definition Prerequisites

- [BAM20 - Bank Codes Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add line of business details

1. Type the fast path **BA431** and click **Go** or navigate through the menus to **Global Definitions > Master > BA431 - LOB Master**.
2. The system displays the **BA431 - LOB Master** screen.

Field Description

Field Name	Description
Line of Business (LOB) Codes	[Mandatory, Numeric, Three] Type the code for the line of business like Personal Banking, Private banking, etc.
Line of Business (LOB) Name	[Mandatory, Alphanumeric] Type the name of the line of business.
Apply Consolidated E-channel Limit	[Optional, Check Box] Select the Apply Consolidated E-channel Limit check box to define a total limit for the transactions through all the e-channels from various CASA accounts of the customer. If the check box is not selected, FLEXCUBE will not validate the e-channel transaction amount at LOB level. It will be validated only at the account level.
E-channel Limit	[Conditional, Numeric, 13, Two]

Amount(Daily)

Type the total E-channel limit applicable to the customer.

The amount defined will be defaulted at customer level during customer addition as per the LOB code selected. The transaction approved at the account level will be validated against this limit amount applicable at the LOB to which the customer belongs. The primary holder of the CASA account will always be verified at the LOB (in case of joint accounts as well).

Any subsequent modifications, in the **Apply consolidated E-channel Limit** field or the amount mentioned in this field will be applicable to the new as well as existing customers already opened under the LOB. The changes will be applied online. If the LOB code is deleted subsequently, it will have an impact on the consolidated e-channel limit available to its existing customers.

This field is enabled only if the field **Apply Consolidated e-Channel Limit** is selected.

Currency

[Display]

This field displays the currency in which the e-channel limit amount is defined.

This field displays the local currency.

3. Click the **Add** button.
4. Enter the line of business code and name.
5. Select whether the consolidated E-channel limit needs to be applied to the LOB.

1.16. BA435 - Branch - Product Cross Reference

Using this option, products which have been created by the product management team can be made available to certain branches or all branches of the bank and for certain customer types or all customer types for opening accounts under them.

This maintenance will control only the account opening transactions. However all other transactions do not refer to this maintenance.

Note: The customer type mapping can be done only for CASA products.

Definition Prerequisites

- [BAM03 - Branch Master Maintenance](#)
- [CHM01 - CASA Product Master Maintenance](#)
- [TDM01 - TD Product Master](#)
- [LNM11 - Product Master Maintenance](#)

Modes Available

Add, Modify, Delete, Inquiry.

To add branch product cross reference

1. Type the fast path **BA435** and click **Go** or navigate through the menus to **Global Definitions > Master > Branch - Product Cross Reference**.
2. The system displays the **Branch-Product Cross Reference** screen.

1.17. BA090 - Bank Calendar Maintenance

Using this option you can maintain a calendar for the cost center or branch bank.Branches report to a cost center and the GL entries of the branches are consolidated at the cost center.

Definition Prerequisites

- [BAM03 - Branch Master Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a bank calendar

1. Type the fast path **BA090** and click **Go** or navigate through the menus to **Global Definitions > Master > Bank Calendar Maintenance**.
2. The system displays the **Bank Calendar Maintenance** screen.

Bank Calendar Maintenance

The screenshot shows the 'Bank Calendar Maintenance' window. At the top, there are input fields for 'Cost Centre', 'Year', and 'Month' (set to '(None)'). Below these is a calendar for May 2010. The calendar table is as follows:

Sun	Mon	Tue	Wed	Thu	Fri	Sat
						1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30	31					

Below the calendar is a 'Record Details' table with the following columns: Input By, Authorised By, Last Mnt. Date, Last Mnt. Action, and Authorised. The 'Authorised' column contains a checkbox.

At the bottom of the window, there is a toolbar with radio buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry'. The 'Inquiry' option is selected. There are also 'Ok', 'Close', and 'Clear' buttons.

1.18. BA089 - Corporate Calendar Maintenance

Using this option you can maintain a corporate calendar to restrict branch transactions for corporate customers. The calendar is maintained to specify the day when corporate transactions are restricted. On the maintained holidays in the calendar, **Oracle FLEXCUBE** will restrict only the branch transactions such as Cash withdrawal, deposits etc. Batch transactions such as Standing Instructions and sweep in/out will be executed normally for the corporate account. Future dated, backdated, ATM and Internet Banking transactions are also allowed.

Definition Prerequisites

1.20. BAM62 - Customer/Account/LOB X-Ref

Using this option you can maintain the AO codes/ LOB codes attached to the customer.

This option is available after the customer is added in the **Customer Addition** (Fast Path: 8053) option. Once the AO code is added at the customer level, the same gets defaulted to all the accounts opened (CASA/TD/Loans/SDB), using this customer as the primary holder. However, the default AO/LOB codes can be modified both at customer and account level. Any modification done, will be updated online.

If the AO/ LOB codes for a customer are modified, then for all the accounts already opened before the modification, will continue to have the earlier AO codes stamped at the account level. However any new accounts opened after this modification will have the new AO codes.

For example: A customer is added in the system through the **Customer Addition** (Fast Path: 8053) option and was introduced to the bank by Business AO 'XYZ' and 'ABC' is assigned as the AO operations. Now, as the customer was brought to the bank for a CASA account by 'XYZ' the CASA account will have XYZ as the customer's AO Business and 'ABC' as the customer's AO Operations.

One other employee of bank 'PQR' who looks after loans approaches the customer and offers him a loan which is required by the customer. Now as the customer was originally introduced to the bank by 'XYZ' he will come as default AO business. But as 'PQR' is the one who brought the loan business he can be assigned as the AO business for that loan account using this option. Similarly AO Operations can also be changed from the default. If 'XYZ' is no more a valid AO, and is to be replaced by 'PQR', at the customer level it can also be done through this option.

Definition Prerequisites

1.21. BAM68 - Islamic Product Attributes

Using this option you can maintain Syariah product level parameters i.e. product type, nisbah %, bonus %, zakat %, the respective GL accounts etc. Whenever a deposit is opened under a syariah product, the fields maintained in this option will be applicable and the nisbah/bonus%, zakat% defined for those products will be stamped to the deposits.

You can use the **Islamic Account attributes** (Fast Path: BAM69) option in case certain rates applicable to the account needs to be modified. The cumulative profit sharing amount is calculated by the external system and the details will be received by file upload and posted to FCR as follows:

- For CASA accounts : First the system will credit the interest amount to the CASA account and then debit the CASA account for monthly fee, tax and Zakat amount.
- For Term Deposit accounts: The system will first credit to the CASA account linked to the TD deposit and Zakat and Tax amount will be credited to the ZAKAT GL and TAX GL respectively by debiting the CASA account subsequently.

For creating a Islamic product attributes, you have to first create CASA/TD products with interest rate / interest rate variance / SC as zero amount by using the **CASA Product Master Maintenance** (Fast Path: CHM01) option and **TD Product Master Maintenance** (Fast Path: TDM01) option. Also, the **Reinvest** option should be set in the **Maturity** field in the **On Maturity** tab and the **Part Redemption** check box should be cleared under the **Redemption** tab in **TD Product Master Maintenance** (Fast Path: TDM01) option.

For all the deposits opened under the TD Daily / Monthly product, maintenance of payout instruction to either CASA or external account or to a GL account is mandatory as per the interest/profit payment requirements.

Definition Prerequisites

- [TDM01 - TD Product Master](#)
- [CHM01 - CASA Product Master Maintenance](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add islamic product attributes

1. Type the fast path **BAM68** and click **Go** or navigate through the menus to **Global Definitions > Master > Islamic Product Attributes**.
2. The system displays the **Islamic Product Attributes** screen.

1.22. BAM60 - Product Category Maintenance

Using this option various products offered by the bank are maintained through master maintenance and are downloaded to the individual branches. Products are grouped by their module (CASA/TD/Loan) and subsequent grouping of the products can be done for reporting purposes.

Example: You can create a group 1 under the loans module under which product A can be mapped. This is done by selecting the product category "1" (pick list is available in the field **Product Category** under **Definition** tab , while addition/modification of product A is done in **Product Master Maintenance** (Fast Path – LNM11) option.)

Definition Prerequisites

- Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add product category

1. Type the fast path **BAM60** and click **Go** or navigate through the menus to **Global Definitions > Master > Product Category Maintenance**.
2. The system displays the **Product Category Maintenance** screen.

1.23. BA524 - Product Code - Product Type Cross Reference

Using this option, user can select appropriate product type for product code and cross refer the product type defined as a part of day 0 with the product codes. Hence using this screen, Product code-Product type cross reference can be maintained for CASA/TD/Loan Products.

At the time of LOAN/ CASA / Term Deposit account opening, the product type code must be mapped against the product code for successful generation. This code is selected for account opening and is used in account number generation (depending on the bank's requirement for example as the first 2 digits of account number) and subsequently for **IBAN**³ generation as well. One product code can be cross referred to one product type only. However one product type can be cross referred to multiple product codes.

Definition Prerequisites

- [CHM01 - CASA Product Master Maintenance](#)
- [TDM01 - TD Product Master](#)
- [LNM11 - Product Master Maintenances](#)

Modes Available

1.26. MCA01 - Multi Currency Package Definition

Using this option you can create the multi currency packages by grouping the products of a particular module. You can also specify whether the package is for corporate's. This maintenance also specifies if multiple accounts can be opened under this package or not. Products added within the package can be deleted provided no sub account has been opened under it. The multi currency package cannot have multiple products of the same currency. For CASA module the user has to define one currency as base.

Only one product under One MCA Package is maintained.

Definition Prerequisites

- [CHM01 - CASA Product Master Maintenance](#)
- [TDM01 - TD Product Master](#)
- [BAM56 - Currency Codes Maintenance](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the multi currency package

1. Type the fast path **MCA01** and click **Go** or navigate through the menus to **Global Definitions > Master > Multi Currency Package Definition**
2. The system displays the **Multi Currency Package Definition** screen.

Type the number of decimal units up to which the currency can be denominated. The number of decimals allowed for any amount in the currency are as follows:

- 0 - Currency with no decimals
- 2 - Currency with two decimals
- 3 - Currency with three decimals

Position GL

[Mandatory, Pick List]

Select the position GL from the pick list.

	The currency position is recorded in the Position GL.
Position Equivalent GL	<p>[Mandatory, Pick List]</p> <p>Select the position equivalent GL from the pick list.</p> <p>The currency position in local currency is recorded in the Position Equivalent GL.</p>
Position Squaring Required	<p>[Optional, Check Box]</p> <p>Select the Position Squaring Required check box, so that position squaring in foreign currency arising from cross currency transactions at branches being squared/balanced by head office.</p> <p>When the check box is selected the Position GL and Position Equivalent GL field will be mandatory for selection. After position squaring, entry towards profit/loss arising out of such business is also passed automatically by system.</p> <p>Position squaring for that currency will happen automatically during EOD.</p> <div style="border: 1px solid black; padding: 5px; background-color: #e0f0ff;"> <p>Note: Position squaring will be performed for all cross currency transactions including cross currency transaction of conversion of FCY tax to LCY performed during batch execution and also for special transactions (same currency FCY transactions).</p> </div>
Spot Days	<p>[Mandatory, Numeric, Three]</p> <p>Type the number of spot working days applicable for the currency.</p> <p>The payment advises will be generated on a date, which is calculated as the number of spot working days before the maturity date of the contract.</p>
Tolerance Limit	<p>[Mandatory, Numeric, Eight]</p> <p>Type the tolerance limit for the ERI amount.</p>
Settlement Days	<p>[Mandatory, Numeric, Three]</p> <p>Type the settlement days for a currency.</p> <p>The settlement messages for the components of a contract will be generated according to the settlement days specified for the currency of the settlement account.</p>
Index Base Currency	<p>[Mandatory, Pick List]</p> <p>Select the base index currency from the pick list.</p> <p>It is for future use.</p>
Cut Off Time	<p>[Optional, Numeric, Two, Two, Two]</p> <p>Type the currency cut-off time.</p> <p>It is the time by which all transactions involving a currency should be generated.</p> <p>For a currency, the user can indicate the cut-off day, hour and minute. This time should be expressed in the local time of the bank.</p>
Generate 103+	[Optional, Check Box]

Select the **Generate 103+** check box to generate the MT 103 SWIFT statement. Since currently SWIFT is not directly supported through FCR this field should not be selected.

It is for future use.

Index Currency

[Optional, Check Box]

This field should not be selected as it is for future use.

Euro Conversion

[Conditional, Check Box]

Select the Euro Conversion check box, to compute the ERI (Euro Related Information) currency equivalent to the settlement amount while generating SWIFT messages during settlement.

Rounding

Rule

[Mandatory, Drop-Down]

Select the rule from the drop-down list.

The rounding rule refers to the method to be followed for rounding off fractional units of a currency.

The options are:

- Down - The amount is rounded down based on the number of decimals and the nearest rounding unit
- Round Near - The amount is rounded down or rounded up based on the number of decimals and the nearest rounding unit
- Truncate - The amount is truncated to the number of decimals specified for the currency
- Up - The amount is rounded up based on the number of decimals and the nearest rounding unit

Unit

[Conditional, Numeric]

Type the nearest unit to which the rounding should take place, if the user has selected **Up** or **Down** option in the **Rule** field.

The number of units specified here should not be greater than the number of decimals allowed for the currency.

Amount Format Mask

[Mandatory, Radio Button]

Click the appropriate amount format mask option.

It is the format in which amounts in this currency are to be displayed for contracts in this currency.

The options are:

- 99,999,999,999
- 9999,99, 99, 999

By default the system displays the 99,999,999,999 format.

Euro Type

[Mandatory, Radio Button]

Select the appropriate currency type option.

The options are:

- Euro Ccy
- IN Ccy
- OUT Ccy
- EURO Closed

Auto Exchange Rate

CreditLimit [Optional, Numeric, 13, Two]
The system defaults the value to zero. It is for future use.

DebitLimit [Optional, Numeric, 13, Two]
The system defaults the value to zero. It is for future use.

Post Decimal [Mandatory, Numeric, 50]
The system defaults the value to zero. It is for future use.

Ccy Symbol [Mandatory, Alphanumeric, One]
Type a symbol for the currency.

2.3. BA091 - Currency Rate Maintenance*

Using this option you can maintain exchange rates of all currencies with respect to the local currency of the bank. The exchange rate with respect to the local currency is defined in **FLEXCUBE** using this maintenance or in **FLEXCUBE Corporate**, depending upon the implementation.

Definition Prerequisites

- [BAM25 - Currency Definition](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add new currency rate details

1. Type the fast path **BA091** and click **Go** or navigate through the menus to **Global Definition > Master > Currency Rate Maintenance**.
2. The system displays the **Currency Rate Maintenance** screen.

Currency Rate Maintenance

Currency Rate Maintenance				
Currency	USD	Effective Date	01/09/2005

2.4. BAM65 - Currency Pair Definition

Using the **Currency Pair Definition** option you can define and maintain the currency pairs.

Definition Prerequisites

- [BAM25 - Currency Definition](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the currency pair details

1. Type the fast path **BAM65** and click **Go** or navigate through the menus to **Global Definitions > Master > Currency Pair Definition**.
2. The system displays the **Currency Pair Definition** screen.

Currency Pair Definition

The screenshot shows the 'Currency Pair Definition' window. At the top, there are two rows for 'Currency 1:' and 'Currency 2:', each with a dropdown menu and a text input field. Below this is a section for 'Through Currency' with a checkbox and a text input field. The 'No. Of Units' section has radio buttons for 'One' (selected), 'Hundred', and 'Thousand'. The 'Quotation Method' section has radio buttons for 'Direct' (selected) and 'Indirect'. The 'Spread Definition' section has radio buttons for 'Percentage' (selected) and 'Points'. A 'Points Multiplier' field is set to '1.00'. At the bottom, there is a 'Record Details' section with fields for 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. The 'Authorized' field has a checkbox. At the very bottom, there is a navigation bar with radio buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry' (selected), along with 'Ok', 'Close', and 'Clear' buttons.

Field Description

Field Name	Description
Currency 1	<p>[Mandatory, Pick List]</p> <p>Select the currency code to be used for the currency pair from the pick list.</p> <p>All valid currencies defined in the Currency Definition (Fast Path: BAM25) option will be available in the pick list.</p>
Currency 2	<p>[Display]</p> <p>This field displays the currency 2.</p>
Through Currency	<p>[Conditional, Pick List, Check Box]</p> <p>Select the Through Currency check box to enable the Through Currency pick list.</p> <p>The through currencies are defined for a particular currency pair, for which an exchange rate is not maintained, i.e. currencies not frequently traded internationally.</p> <p>The user can select the currency code, which he wants to specify as the Through Currency.</p>
No Of Units	<p>[Mandatory, Radio Button]</p> <p>Click the appropriate number of units option.</p> <p>This field indicates the units to be used for currency conversion.</p> <p>The options are:</p> <ul style="list-style-type: none"> • One • Hundred • Thousand
Quotation Method	<p>[Mandatory, Radio Button]</p> <p>Click the appropriate quotation method option.</p> <p>The quotation method is used to define how the exchange rate will be displayed.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Direct - The home currency is variable and quoted against one unit of the foreign currency. For Ex : If the home currency is USD, then 1 USD = 50 INR is a direct quote • Indirect - One unit of the home currency is quoted against foreign currency For Ex : If the home currency is INR, then 1 INR = 0.02 USD is an indirect quote
Spread Definition	<p>[Conditional, Radio Button]</p> <p>Click the appropriate spread definition option.</p> <p>Using this field the user can define spread type for the currency pairs.</p>

This field is enabled only if the **Through Currency** field is disabled.

The options are:

- **Percentage** - The Buy/Sale spread value **Currency Rates Maintenance** (Fast Path: BAM26) option is taken as Percentage of Mid rate and subtracted/added to the Mid rate to get the Buy/Sale Rate. Example: If in BAM26 Midrate = 200 and Buy Spread = 10, Direct Quote in the **Currency Pair Definition** (Fast Path: BAM65) option percentage is selected, the Buy rate in BAM26 is calculated as follows:

$$= 200 - (200 * 10\%) = 200 - 20 = 180$$

Similar calculation for Sale rate. Example : If in BAM26 Midrate = 200 and Sale Spread = 10, Direct Quote in the **Currency Pair Definition** (Fast Path: BAM65) option percentage is selected, the Sale rate in BAM26 is calculated as follows:

$$= 200 + (200 * 10\%) = 200 + 20 = 220$$

- **Points** - The Buy/Sale spread value **Currency Rates Maintenance** (Fast Path: BAM26) option is taken as points and subtracted/added to the Mid rate to get the Buy/Sale Rate. Example: If in BAM26 Midrate = 200 and Buy Spread = 10, Direct Quote, Points Multiplier = 1 in the **Currency Pair Definition** (Fast Path: BAM65) option point is selected, the Buy rate in BAM26 is calculated as follows:
$$= 200 - 10 \text{ (Points Multiplier)} = 190$$
Similar calculation for Sale rate. Example : If in BAM26 Midrate = 200 and Sale Spread = 10, Direct Quote, Points Multiplier = 1 in the **Currency Pair Definition** (Fast Path: BAM65) option point is selected, the Sale rate in BAM26 is calculated as follows:

$$= 200 + 10 \text{ (Points Multiplier)} = 210$$

Points Multiplier

[Conditional, Numeric, Six]

Type the points multiplier value.

This field is enabled only if **Points** option is selected in the **Spread Definition** field.

For example: If the Points multiplier is changed to 0.5 then the currency rates will be as follows:

The Buy rate in BAM26 is calculated as follows:

$$= 200 - 10 (0.5) = 195$$

The Sale rate in BAM26 is calculated as follows:

$$= 200 + 10 (0.5) = 205$$

3. Click the **Add** button.
4. Select the currency 1 from the pick list.
5. Enter the other details such as number of units, through currency, quotation method, and spread definition.

2.5. BAM97 - Currency Codes Cross Reference

When the financial service provider shifts to **Oracle FLEXCUBE** from the existing legacy system (external system), some of the codes such as currency code, transaction code, GL code, etc, have to be matched by cross-referring between the legacy system and the **Oracle FLEXCUBE** system.

Similarly, when extracting data from **Oracle FLEXCUBE** to an external system, the currency code pertaining to the external system can be maintained in this maintenance so that the extracts contain the relevant currency code.

Using this option **Oracle FLEXCUBE** integration with other external systems can be done as required. You can maintain a reference between the currency codes defined in **Oracle FLEXCUBE** with the corresponding currency codes defined and maintained in the external system.

Definition Prerequisites

- [BAM56 - Currency Codes Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add currency code cross reference

1. Type the fast path **BAM97** and click **Go** or navigate through the menus to **Global Definitions > Master > Currency Codes Cross Reference**.
2. The system displays the **Currency Codes Cross Reference** screen.

2.6. BAM90 - Currency Float Maintenance

This maintenance is used for cash deposits that have future value date.

Using this option you can define the float days for giving the value date for cash deposits, based on the currency.

After this maintenance is done, using the **Future Dated Cash Deposit** (Fast Path: 1411) option, you can accept future dated cash deposit from the customer and the float days maintained in this option will be defaulted as value date for the transaction.

2.7. BAM32 - Transaction Rate Cross Reference

Using this maintenance you can arrive at the default exchange rates to be applied when posting transactions. This default is arrived at by using the base exchange rate with respect to the local currency and applying the suitable spreads. **FLEXCUBE** adopts the buy low, sell high policy.

The default exchange rate is derived as follows.

Sr No	Nature of Transaction	Default Exchange Rate Formula
1	Buy Foreign Currency	BR + A
2	Sell Foreign Currency	BR - A
3	Buy Local Currency	BR + B
4	Sell Local Currency	BR - B

- BR – Base Rate
- A – Spread to use to compute LCY equivalent
- B - Spread to use to compute target currency equivalent

Definition Prerequisites

- [BAM15 - Transaction Mnemonic Codes](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add transaction rate cross reference

1. Type the fast path **BAM32** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Transaction Rate Cross Reference**.
2. The system displays the **Transaction Rate Cross Reference** screen.

6. The system displays the message "Record Added...Authorisation Pending...". Click the **OK** button.
7. The transaction rate cross reference details are added once the record is authorised.

2.8. BAM31 - Treasury Spread Maintenance

Using this option you can maintain the bid (buy) and ask (sell) spread for the foreign currencies against the local currency for an effective date. The spread rate can be maintained for the foreign currencies which are maintained in the bank.

The final exchange rate to be applied for a transaction at branch is derived after application of treasury spread and branch spread.

Definition Prerequisites

- [BAM25 - Currency Definition](#)

Modes Available

Modify, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify the treasury spread

1. Type the fast path **BAM31** and click **Go** or navigate through the menus to Global Definitions > Master > Treasury Spread Maintenance.
2. The system displays the **Treasury Spread Maintenance** screen.

8. The treasury spread details are modified once the record is authorised.

2.9. BAM34 - Special Exchange Rate Inquiry

Using this option you can define special exchange rate spread margin, for the transaction type TT for the bid and ask spreads. You can perform an inquiry about the special exchange rates for the foreign currencies.

You can also define a set of transactions as special transactions. The defined transactions will refer to this special exchange rate matrix to calculate the exchange rates.

The special exchange rate is maintained for the foreign currencies against local currency. The matrix will be two dimensional based on FX customer category and the transaction size in USD. These are maintained through the back-end tables. The system uses these spreads to arrive at the foreign currency rates for certain special transactions.

Definition Prerequisites

- [BAM25 - Currency Definition](#)

Modes Available

Not Applicable

To view the special exchange rate

1. Type the fast path **BAM34** and click **Go** or navigate through the menus to Global Definitions > Master > Special Exchange Rate Inquiry.

2.10. BAM26 - Currency Rates Maintenance

Using this option you can maintain exchange rates / spreads of all currencies with respect to the local currency of the bank, i.e., this option allows you to maintain the mid rate and buy and sell spreads for each currency and for each rate type.

The exchange rates between currencies are defined in **Oracle FLEXCUBE** using this option or in **FLEXCUBE Corporate**, depending upon the implementation.

Note: The spreads maintained for the Rate Types Book, Standard and CB will not be updated in the **Oracle FLEXCUBE** Currency Rate Maintenance Table and only the Mid rates for these types will get updated in the table (ba_ccy_rate).

Definition Prerequisites

Field Description

Field Name

Description

Currency 1

[Mandatory, Pick List]

Select the currency code, for which the exchange rate needs to be defined, from the pick list.

All valid currencies defined in the **Currency Definition** (Fast Path: BAM25) option will be available in the pick list. This currency is always the transaction currency.

Currency 2

[Mandatory, Pick List]

Select the currency code, against which the exchange rate needs to be defined, from the pick list.

All valid currencies defined in the **Currency Definition** (Fast Path:

BAM25) option will be available in the pick list. The Currency 2 should be part of **Currency Definition** (Fast Path: BAM25) option in which the Currency 1 is defined.

Branch Code [Mandatory, Pick List]
Select the branch code, for which the exchange rates are applicable, from the pick list.
The user can maintain a sequence format that will be applicable to all the branches.

Column Name	Description
Rate Type	[Mandatory, Pick List] Select the exchange rate types for a currency pair from the pick list. For different transaction categories the user can maintain different exchange rates. The options are: <ul style="list-style-type: none">• Book• Cash• CB• STANDARD• TC• TT
Mid Rate	[Mandatory, Numeric, 24, Eight] Type the mid rate of the currency. This is rate which is used in all transactions. The mid rate is the base rate for a currency pair. The buy or sale spreads as defined will be applied on this rate. Example : EUR/USD Mid rate is 200
Buy Spread	[[Mandatory, Numeric, 10] Type the buy spread value. This field accepts positive as well negative values. The negative values will also be accepted till length 10. This field will accept maximum 8 digits after the decimal place.
Sale Spread	[Mandatory, Numeric, 10, Eight] Type the sale spread value. This field should accept positive as well negative values. The negative values should also be accepted till length 10. This field will accept maximum 8 digits after the decimal place.
Buy Rate	[Mandatory, Numeric, 24] Type the buy rate of the currency. The buy rate is the exchange rate for a currency pair computed by the system based on the mid rate, the spread specified, the spread

definition maintained in Currency Pair Definition (Fast Path: BAM65) option.

Example 1: Positive Spread

Mid rate = 200

Buy Spread = 10

Depending on the option selected in Currency Pair Definition (Fast Path: BAM65) option the buy rate will be affected.

If spread is defined as Points & Points Multiplier is 1

Then, Buy Rate = 190

If spread is defined as Percentage

Then, Buy Rate = 180

The user can enter options in the Currency Pair Definition (Fast Path: BAM65) option in the following ways:

- In points
- In percentage
- In Points Multiplier

The user can also input the buy rate for a currency pair; the system will compute the buy spread.

Example 2: Negative Spread

Mid Rate = 200

Buy Spread = -10

Depending on the option selected in Currency Pair Definition (Fast Path: BAM65) option the buy rate will be affected.

If spread is defined as Points & Points Multiplier is 1

Then, Buy Rate = 210

If spread is defined as Percentage

Then, Buy Rate = 220

The user can enter options in the Currency Pair Definition (Fast Path: BAM65) option in the following ways:

- In points
- In percentage
- In Points Multiplier

The user can also input the buy rate for a currency pair; the system will compute the buy spread.

Sale Rate

[Mandatory, Numeric, 24]

Type the sale rate of the currency.

The sale rate is the exchange rate for a currency pair computed by the system based on the mid rate, the spread specified, the spread definition maintained in Currency Pair Definition (Fast Path: BAM65) option.

Example 1: Positive Spread

Mid Rate = 200

Sale Spread = 10

Depending on the option selected in Currency Pair Definition (Fast Path: BAM65) option the sale rate will be affected.

If spread is defined as Points & Points Multiplier is 1

Then, Sale Rate = 210

If spread is defined as Percentage

Then, Sale Rate = 220

The user can enter options in the Currency Pair Definition (Fast Path: BAM65) option in the following ways:

- In points
- In percentage
- In Points Multiplier

The user can also input the sale rate for a currency pair, the system will compute the sale spread.

Example 2: Negative Spread

Mid Rate = 200

Sale Spread = -10

Depending on the option selected in Currency Pair Definition (Fast Path: BAM65) option the sale rate will be affected.

If spread is defined as Points & Points Multiplier is 1

Then, Sale Rate = 190

If spread is defined as Percentage

Then, Sale Rate = 180

The user can enter options in the Currency Pair Definition (Fast Path: BAM65) option in the following ways:

- In points
- In percentage
- In Points Multiplier

The user can also input the sale rate for a currency pair, the system will compute the sale spread.

Delete

[Toggle]

If the field is marked as **N** then the rate type will not be deleted and if the field is marked as **Y** then the rate type will be deleted.

3. Click the **Add** button.
4. Select the currency code 1, currency code 2, and branch code from the pick list.
5. Click the **Add** button. Select the rate type from pick list.
6. Enter the mid rate, buy spread, sale spread, buy rate, sale rate value.

3. Securities Definitions

The **FLEXCUBE Retail** Security Management System (SMS) provides a security envelope within which, all the **FLEXCUBE Retail** application modules are executed. SMS maintains and controls access to users in the **FLEXCUBE Retail** system and ensures that only authorized users are allowed to use the system.

Security definitions are broadly categorized into two parts namely host security definition and branch security definition. For the purpose of security and centralized control, it is recommended that all the security related definitions users are created at the HO and branch security definitions are important attributes of the user are modified at HO and downloaded to the branches.

All the users of the bank can be broadly classified depending upon their role and seniority. Such classification is represented in **FLEXCUBE Retail** using templates. All the **FLEXCUBE Retail** transactions are linked to one or more such templates to define the access to the transactions for the respective class of users.

Each user needs to have a user profile defined in the system. This user profile is linked to one of the templates.

3.1. 762 - Menu Language Cross Reference

Security Management System enables you to select the language of your choice, for the screen display, provided the system supports that language, and the description of the **Oracle FLEXCUBE** menus and tasks are defined in the specified language.

Using this option you can define the menu and tasks in the required language. A default language of the teller is maintained in the **User Profile Maintenance** (Fast Path: 759) option.

Definition Prerequisites

- [BAM15 - Transaction Mnemonic Codes](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquire. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a menu language cross reference

1. Type the fast path **762** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Security > Menu Language Cross Reference**.
2. The system displays the **Menu Language Cross Reference** screen.

Menu Language Cross Reference

3.3. SMM01 - Template Profile Maintenance

A template is a grouping of users with common requirements for access rights. Users with a common set of access rights can be linked to the template with those access rights.

A template differentiates users based on the level, nature of tasks to be done by that group of users, access codes for controlling access across branches, and the category (OP / SM / OT) defining the nature of tasks which can be done by them.

For every voucher entry transaction, system will check for the **Restrict Txns on Customer acct for VE** check box at the template level and will allow or disallow you to do transaction on customer accounts. Login time restrictions can be imposed by splitting the entire day into 30 minutes slot. The system checks for login time violation, if any, when the your try to login.

Field Description

Field Name	Description
Template Code	[Mandatory, Numeric, Three] Type the code of the template. Each code is manually generated and uniquely identifies a template.
Template Name	[Mandatory, Alphanumeric, 40] Type the name of the template.
Template Type	[Mandatory, Drop-Down] Select the template type from the drop-down list. The options are: <ul style="list-style-type: none"> • cash • non-cash
Password Lifetime	[Mandatory, Numeric, Two] Type the period in days for which the password will be valid. After the specified period expires, the system will force the user to change the password.

Template Category

[Mandatory, Drop-Down]

Select the category of the template from the drop-down list.

The options are:

- SM – SM stands for System Manager. Templates with this category enable access control for the system
- OP – OP stands for Operators. Templates with this category enable batch operations such as End of day, beginning of day, etc.
- OT – OT stands for Others. Templates with this category enable normal online and back office transactions.

Each of the transactions in **FLEXCUBE Retail** are classified as 'SM', 'OP' or 'OT'.

Template Access Code

[Mandatory, Drop-Down]

Select the template access code from the drop-down list.

The template access code indicates the type of accounts in the bank that can be accessed by the users of a given template.

The options are:

- Same Branch Normal Accts - Access to only normal accounts in the branch
- Same Branch Restricted and Normal Accts - Access to restricted and normal accounts in the same branch
- Same Branch Restricted Normal and Staff Accts - Access to normal, restricted and staff accounts in the branch
- Group of Branch Accts - Access to group of branch account.
- Across Branch Normal Accts - Access to normal accounts across branches
- Across Branch Restricted and Normal Accts - Access to normal and restricted accounts across branches
- Across Branch All Accts - Access to all types of accounts across branches, including staff accounts.

Allow balance inquiry level

[Optional, Drop Down]

Select allow balance inquiry level from the drop-down list. It defines the level at which the balance inquiry is to be allowed. The options are: - All branches in the same hierarchy except HO - Branch and its child branches - Same branch - All branches.

Template Level

[Mandatory, Numeric, Two]

Type the level of the template.

Seniority of users for authorisation of transactions can be defined using this template level. A higher template level is indicative of higher level of the user attached to it within the bank. Transactions posted by a teller can be authorised only by those supervisors whose

templates have a higher level than that of the teller posting the transaction.

Group Code

[Conditional, Pick List]

Select the group code from the pick list.

This allows the linkage of Transaction Group Code to the template.

The user will be able to perform transactions on the accounts, which are maintained with the branches under the selected group code.

While creating the user under a template, a check will be made that the user branch belongs to the group code attached to the template, else the user creation will not be allowed.

The group codes are created using the **Transaction Group Code Maintenance** (Fast Path: SMM19) option.

This field is enabled only if the **Group of Branch Accts** option is selected in the **Template Access Code** field.

**Restrict
Inquiries/Adhoc Rpts
On Other Staff Accts**

[Conditional, Check Box]

Select the **Restrict Inquiries/adhoc rpts on other staff accts** check box if all the inquiries and report generation for other staff accounts are to be restricted.

This check box is enabled only if the **Template Access Code** is selected as **Across Branch All Accts** or **Same Branch Restricted Normal and Staff Accts**.

**Restrict
Inquiries/Adhoc Rpts
On Own Accts**

[Conditional, Check Box]

Select the **Restrict Inquiries/adhoc rpts on own accts** check box if all the inquiries and report generation for staff's own accounts are to be restricted.

This check box is enabled only if the **Template Access Code** is selected as **Across Branch All Accts** or **Same Branch Restricted Normal and Staff Accts**.

**Restrict Txns On
Other Staff Accts**

[Conditional, Check Box]

Select the **Restrict Txns on other staff accts** check box to restrict the template to have access to other staff accounts for all the transactions.

This check box is enabled only if the **Template Access Code** is selected as **Across Branch All Accts** or **Same Branch Restricted Normal and Staff Accts**.

**Restrict Txns On Own
Accounts**

[Conditional, Check Box]

Select the **Restrict Txns on own accounts** check box to restrict the template to have access to staff's own accounts for all the transactions.

This check box is enabled only if the **Template Access Code** is selected as **Across Branch All Accts** or **Same Branch Restricted Normal and Staff Accts**.

**Restrict
Inquiries/Adhoc Rpts
On Special Customer**

[Optional, Check Box]

Select the **Restrict Inquiries/adhoc rpts on Special Customer**

Accts	<p>accts check box to restrict inquiry or adhoc report generation on special customer accounts.</p> <p>The system will display appropriate error message, if the teller inquires or generates adhoc reports on special customer account.</p>
Restrict Txns On Special Customer Accts	<p>[Optional, Check Box]</p> <p>Select the Restrict Txns on Special Customer accts check box to restrict transaction on special customer accounts. The system displays an error message, if the teller posts any transaction on the special customer account.</p> <p>You can identify the customers as special category using the option Customer Information Master Maintenance (Fast Path: CIM09).</p>
Restrict Txns On Customer Acct For VE	<p>[Optional, Check Box]</p> <p>Select the Restrict Txns on Customer acct for VE check box to disable voucher transaction on the customer account for the user.</p> <p>The user will however be able to do the voucher transactions on GL accounts. The value defined will be defaulted to the Voucher Entry (Fast Path: GLM01) option.</p>
Login Time (Half an Hour slots)	<p>[Display]</p> <p>This field displays the login time.</p> <p>Entire day is split into 30 minute slots for allowing or disallowing access during that time. A blank slot indicates that entry during that time is not allowed.</p> <p>It is to be noted that the system will check only for access only when the user trying to login into the system during these slots. Once the user has logged in, no further checks are done.</p>

3. Click the **Add** button.
4. Enter the code and the name of the template and lifetime of the password.
5. Select the template category and the template access code from the drop-down list.
6. Select the appropriate restriction check boxes.
7. Select the time slots when login is not allowed by clicking on the blue areas in the calendar.

8. Click the **Ok** button.
9. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** button.
10. The template profile is added once the record is authorised.

Note: Restrictions will apply to all accounts for a customer as staff. Clear the **Employee** check box in the **Account Master Maintenance** (Fast Path: CH021) option if the user does not want to restrict any of the staff accounts.

3.4. SMM14 - Template Securities Settings

Using this option you can define a user name and password policy at a template level. The policy is typically based on the bank's internal audit policies. A default template can be added for a bank and is mandatory. Each template then can have its own variant of this policy.

Definition Prerequisites

- [SMM01 - Template Profile Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add template security settings

1. Type the fast path **SMM14** and click **Go** or navigate through the menus to **Global Definitions > Security > Template Security Settings**.
2. The system displays the **Template Security Settings** screen.

Field Description

Field Name	Description
Minimum Password Length	[Mandatory, Numeric, Two] Type the minimum number of characters that a password can have. The value can be between 1 and 14.
Maximum Password Length	[Mandatory, Numeric, Two] Type the maximum number of characters that a password can have. The value can be between 6 and 14. The maximum field length should be equal to or greater than minimum password length.
Minimum Password Age	[Mandatory, Numeric, Two] Type the minimum wait time before a password can be changed. The value can be between 2 – 7 days.
Maximum Password Age	[Mandatory, Numeric, Two] Type the maximum time for which the password is valid.

The value can be between 30 to 90 days.

The next password change date for a user is calculated using this field.

No of Previous Passwords disallowed

[Mandatory, Numeric, Two]

Type the number of previous passwords that the system should disallow.

The system will check whether the new password is from the number of previous passwords defined.

The system will remember the number of previous password based on the value specified for this field.

By default it will remember at least 1 previous password.

Uppercase Alphabets Allowed

[Optional, Check Box]

Select the **Uppercase Alphabets Allowed** check box to allow the upper case alphabets (A - Z) to be used in the password.

Mandatory

[Conditional, Numeric, Two]

Type the number of uppercase characters that must be present in the password.

This field is enabled only if the **Uppercase Alphabets Allowed** check box is selected.

Lowercase Alphabets Allowed

[Optional, Check Box]

Select the **Lowercase Alphabets Allowed** check box to allow the lower case alphabets (a - z) to be used in the password.

Mandatory

[Conditional, Numeric, Two]

Type the number of lowercase characters that can be entered in the password.

This field is enabled only if the Lowercase Alphabets Allowed check box is selected.

Numbers Allowed

[Optional, Check Box]

Select the **Numbers Allowed** check box to allow the numbers (0 - 9) to be used in the password.

Mandatory

[Conditional, Numeric, Two]

Type the number of numeric characters that can be entered in the password.

This field is enabled only if the **Numbers Allowed** check box is selected.

Special Characters Allowed

[Optional, Check Box]

Select the **Special Characters Allowed** check box to allow the special characters to be used in the password.

Mandatory

[Conditional, Numeric, Two]

Type the number of special characters that can be entered in the password. All special characters, for example, - !, \$, # are allowed except & and =.

User Name allowed in Password	<p>[Optional, Check Box]</p> <p>Select the User Name allowed in Password check box to allow the user name to be used in the password.</p>
User Id allowed in Password	<p>[Optional, Check Box]</p> <p>Select the User Id allowed in Password check box to allow the user id to be used in the password.</p>
First character in password	<p>[Conditional, Check Box]</p> <p>Select the appropriate check box to determine what would be the first character in the password.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Uppercase - If this check box is selected then the first character in the password can be an uppercase • Lowercase- If this check box is selected then the first character in the password can be a lowercase • Numeric- If this check box is selected then the first character in the password can be a number • Special- If this check box is selected then the first character in the password can be a special character <p>At least one of the Uppercase Alphabets Allowed, Lowercase Alphabets Allowed, Numbers Allowed or Special Characters Allowed check boxes should be selected.</p>
Last character in password	<p>[Conditional, Check Box]</p> <p>Select the appropriate check box to determine what would be the last character in the password.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Uppercase - If this check box is selected then the last character in the password can be an uppercase • Lowercase- If this check box is selected then the last character in the password can be a lowercase • Numeric- If this check box is selected then the last character in the password can be a number • Special- If this check box is selected then the last character in the password can be a special character <p>At least one of the Uppercase Alphabets Allowed, Lowercase Alphabets Allowed, Numbers Allowed or Special Characters Allowed check boxes should be selected.</p>
No. of successive characters allowed	<p>[Mandatory, Numeric, Two]</p> <p>Type the number of successive alphabets or numbers that can be used in the password. For example, if the value is 2 then ab or 12 will be allowed whereas abc or 123 will not be allowed.</p> <p>It cannot be greater than the maximum password length.</p>

No of consecutive identical characters allowed

[Mandatory, Numeric, Two]

Type the number of consecutive alphabets or numbers that can be identical in the password. For example, if it is 2 then aa or 11 will be allowed whereas aaa or 111 will not be allowed.

It cannot be greater than the maximum password length.

Additional Validation Routine

[Optional, Alphanumeric, 36]

Type the additional database validation routine that can be linked.

The restriction on this additional validation function is created by the user.

Account Options

The **Account Options** tab maintains the parameters for account lockout and expiry.

The screenshot shows the 'Template Security Settings' window with the 'Account Options' tab selected. The window title is 'Template Security Settings'. At the top, there is a 'Template ID' field with the value '12' and a 'Global' checkbox. Below this, there are two tabs: 'Password Policy' and 'Account Options'. The 'Account Options' tab contains the following settings:

- 'Disable if user has not logged-in for:' set to '5 days'.
- 'Prompt user to change Password before expiry:' set to '3 days'.
- 'Account Lockout' section with a sub-header and three settings:
 - 'Maximum Login Attempts before Lockout:' set to '3'.
 - 'Maximum Login Attempts before Lockout in a single day:' set to '4'.
 - 'Allow Account to be unlocked automatically:' checked, with 'after:' set to '15 mins'.

At the bottom of the window, there is a 'Record Details' section with five fields: 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. Below these fields are several radio buttons: 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry'. At the very bottom right, there are three buttons: 'Ok', 'Close', and 'Clear'.

Field Description

Field Name	Description
------------	-------------

Disable if user has not logged-in for

[Mandatory, Numeric, Two]

Type the number of days of inactivity after which the id should be disabled.

If a user does not login for n days then the id will be disabled.

Prompt user to change Password before expiry

[Mandatory, Numeric, Two]

Type the number of days before expiry of password, when the system should prompt for change of password.

The system will prompt the user to change his password on login, n days before his password expiry date.

It cannot be greater than the **Maximum Password Age** field.

Account Lockout

Maximum Login Attempts before Lockout

[Mandatory, Numeric, Two]

Type the number of successive failed login attempts allowed.

Maximum Login Attempts before Lockout in a single day

[Mandatory, Numeric, Two]

Type the number of failed login attempts allowed within a day.

These need not be consecutive attempts.

Allow Account to be unlocked automatically

[Optional, Check Box]

Select the **Allow Account to be unlocked automatically (Y/N) after (n) mins** check box to allow the system to unlock the account automatically after n minutes.

after

[Conditional, Numeric, Two]

Type the number of minutes after which the account will be unlocked automatically.

The **Mins** field is enabled only if this check box is selected.

6. Click the **Ok** button.
7. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
8. The template security setting details are added once the record is authorised.

3.5. SMM06 - Template Access Rights Maintenance

Using this option a configured access is provided to various templates to which various users are linked. It also enables the security administrator to define the hierarchy structure of the system.

When you log into **FLEXCUBE**, the system dynamically builds the list of menus and tasks to which your template is enabled and displays the same. Disabled menus and tasks are not displayed and cannot be accessed by you even with the use of a fast path.

Definition Prerequisites

- [SMM01 - Template Profile Maintenance](#)
- [SMM03 - Task Profiles Maintenance](#)

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add template access rights

1. Type the fast path **SMM06** and click **Go** or navigate through the menus to **Global Definitions > Security > Template Access Rights Maintenance**.
2. The system displays the **Template Access Rights Maintenance** screen.

Note: In modification mode, authorised template for a given category will be displayed in pick list. Options such as add, modify, delete, etc., can be modified here. In delete mode, authorised templates can be deleted in this maintenance.

3.6. SMM04 - Class Profile Maintenance

Classes are created for grouping users for authorisation purposes. Any action performed by the maker of a particular class, will have to be authorised by the authorizer of the same class. Classes are used to restrict tellers, to access classes to which they do not belong.

You must be associated with at least one class to be a valid user of the system. You can be linked to more than one class.

For example, all SMS users can have a class called SMS, and all Loan users can have a class called LN. An SMS class user cannot authorize transactions of a user belonging to LN class, unless the user asking for authorisation also belongs to the LN class (a user can belong to more than one class).

7. The system displays the message "Dual Control". Click the **Ok** button.
8. The prohibited password is added once the record is authorised.

3.8. SMM16 - Reports Access Rights Maintenance

Using this option you can maintain the report access right to a particular template. A user linked to a particular template will have the associated access rights. Modifying the access rights in the template will affect all the users assigned to those templates.

Those reports to which you do not have access rights will not even be displayed in the **Reports** (Fast Path: 7775) option.

For example:

Assume that the following 6 Reports are available. Template 107 is defined with following access rights for reports in loan module:

REPORT	MODULE	REPORT NAME	AVAILABLE
Loans	LNAS	Loans Advice and Statement	Y
Loans	LNDE	Loans Daily Exception Report	Y
Loans	LNDT	Loans Daily Transaction Report	Y
Loans	LNDV	Loans Deviations Report	Y
Loans	LNIN	Loans Interest and Arrears Report	N
Loans	LNNP	Loans NPA Report	N

Any user who is created with Template 107 will have an access to the reports which are flagged as Y (i.e. LNAS, LNDE, LNDT, LNDV Reports) similarly he will not have an access to reports flagged as N (i.e LNIN, LNNP Reports).

Definition Prerequisites

3.9. SMM17 - Access Code Maintenance

Using this option you can maintain access codes and the access code names.

The defined access codes are attached to access domain codes through **Access Domain Maintenance** (Fast Path: SMM18) option which is subsequently attached to the user in the **User Profile Maintenance** (Fast Path: SMM02) option. Based on the access domain and attached access codes, you will be able to inquire and maintain accounts that are having one of the access codes included in your access domain else the inquiry/maintenance will not be allowed for you on that CIF/account.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add access code

1. Type the fast path **SMM17** and click **Go** or navigate through the menus to **Global Definitions > Security > Access Code Maintenance**.
2. The system displays the **Access Code Maintenance** screen.

3.10. SMM18 - Access Domain Maintenance

Using this option you can define an access domain code, attach Access Codes to that Domain and define the default Access Code for that Domain. The defined access domain will be attached to the user in the **User Profile Maintenance** (Fast Path: SMM02).

When you create any CIF, it will have the default Access Code defined here and attached as the Access Code. Any account created under this CIF will have the CIF level Access Code propagated to the account level. Based on the Access Domain and the defined Access Codes in that Access Domain, you will be able to inquire and maintain accounts that are having one of the Access Codes included in the your Access Domain else the inquiry/maintenance will not be allowed for you on that CIF/Account.

Definition Prerequisites

3.13. BA026 - Customer/Account Access Code Maintenance

Using this option you can maintain the access codes for the customers/accounts. If you have created a CIF the default access code of the access domain attached to you will be stamped to the CIF as the access code.

For any account creation the primary customer level access code will be stamped for that account. The system validates that you have access to both the existing and the new access code (being modified to now), for the customer or the account.

GEFU upload can also be used for bulk maintenance of the access codes for CIF/accounts.

Definition Prerequisites

- [SMM02 - User Profile Maintenance](#)
- [SMM18 - Access Domain Maintenance](#)
- [8053 - Customer Addition](#)
- [8051 - CASA Account Opening](#)

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify customer/account access code

1. Type the fast path **BA026** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Customer/Account Access Code Maintenance**.
2. The system displays the **Customer/Account Access Code Maintenance** screen.

4. Customer Definitions

The CIF module in **FLEXCUBE Retail** is designed to allow extensive capture and maintenance of customer details. These details would ultimately be used at respective bank branches, service departments and also for MIS purposes at the management level.

The key features of the CIF module definitions in **FLEXCUBE Retail** are as follows:

- Customer Type: Customers in **FLEXCUBE** are needed to be classified under a specific category. This can determine the tax rate applicable to a customer, or the service charges to be levied to a customer.
- Relationship: Relation codes can be maintained to identify the relationships among the customers of the bank for information purposes.
- Business Codes – Business code definition for corporate customers
- Profession Codes – Profession code definition for individual customers
- Income Slabs – Income slabs for individual customers
- Signature Type – Various types of signatures which can be captured.

4.1. CIM08 - Customer Type Maintenance

Using this option you can maintain customer types namely Resident-Individual Tax Paying, Resident Individual, Non-Tax Paying, Foreigner, Corporate Tax paying, Church, etc. The customer type determines the tax rate applicable to customer(s) under each category. Tax codes are unique to each type of customer.

Definition Prerequisites

- [BAM30 - Tax Codes Maintenance](#)
- [ORS35 - Document Plan Code Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the customer type

1. Type the fast path **CIM08** and click **Go** or navigate through the menus to **Global Definitions > Customer > Customer Type Maintenance**.
2. The system displays the **Customer Type Maintenance** screen.

4.6. CIM06 - Income Slabs Maintenance

Using this option you can maintain the income slabs for individual customers. Each income slab code has an upper limit and a lower limit. The upper limit should be greater than the lower limit. One income slab should not overlap another. The value maintained in this option is available as drop down list in the **Customer Master Maintenance** (Fast Path: CIM09) option.

Note: The system automatically authorizes this transaction.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the income slab

1. Type the fast path **CIM06** and click **Go** or navigate through the menus to **Global Definitions > Customer > Income Slabs Maintenance**.
2. The system displays the **Income Slabs Maintenance** screen.

Field Description

Field Name	Description
------------	-------------

Nominee ID	[Mandatory, Numeric, 10] Type the nominee ID.
-------------------	--

Customer of the Bank	[Optional, Checkbox] Select the Customer of the Bank check box if the nominee is the bank customer.
-----------------------------	---

Customer Information

The fields in this section are enabled if the Customer of the Bank check box is selected.

Search Criteria	[Mandatory, Drop-Down] Select the search criteria, to search for the customer, from the drop-down list.
------------------------	--

The search criteria are as follows:

- Customer Short Name

- Customer Ic Identification criteria (Ic) arrived at by the bank during customer addition.
- Customer Id- Unique identification given by the bank.

Search String

[Conditional, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customers' short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

Cust IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Full Name

[Display]

This field displays the full name of the customer.

The name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name

[Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

The customer short name can be changed through the **Change Customer Name/IC Number** (Fast Path: 7101) option.

Home Branch

[Display]

This field displays the branch to which the customer account belongs. The field displays the short name of the branch as set up in the **Branch Master Maintenance** (Fast Path: BAM03) option.

3. Click the **Add** button.
4. Enter the nominee id.
5. Enter the other required information.

8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** button.
9. The nominee details are added once the record is authorised.

4.9. CIM51 - Customer Group Definition Maintenance

Using this option you can maintain the definition of a customer group in **FLEXCUBE**. It uses customer to customer relationship in **FLEXCUBE** as basis. This maintenance will be used to identify if a customer belongs to a group based on his/her relationships with other customers in the bank. This information can be used to provide benefits to a customer based on the behavior of a group to which he / she belongs to. This maintenance also captures customer to account relationships to identify the accounts of other customers to be considered for deriving the behavior of the group.

Using this maintenance, bank can define:

- A customer group code and name
- All the customer to customer relationships, which form the part of the customer group
- All customer to account relationships which will be considered to pick up accounts while considering the behavior of the group

This maintenance just defines relationships between any two customers that will make them form a group. The **Customer Group definition** maintained will be linked to eligibility in the form of a UDE. This UDE definition will take customer group name as input.

Definition Prerequisites

- [CIM07 - Relation Master Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the customer group details

1. Type the fast path **CIM51** and click **Go** or navigate through the menus to **Global Definitions > Customer > Customer Group Definition Maintenance**.
2. The system displays the **Customer Group Definition Maintenance** screen.

Date of Expiry	[Optional, Output] This field specify if the customers having this particular classification are to be reported.
Remarks/ Comments	[Optional, Alphanumeric, 120] Any remarks/comments or observations regarding the Bank's FATCA Classification.

3. Click the **Ok** button.

4. The details are added once the record is authorized.

5. CASA Definition

In **FLEXCUBE Retail** every customer account has to be classified either as an Asset or Liability Account. The Savings Bank parameters, the CASA product Master and the Account Master Attributes are defined under the CASA definitions. Overdraft limits including Temporary Overdrafts can be attached only to accounts under Asset products category. Recurring Deposit Products can also be defined under CASA definitions. Various other details like debit and credit interest details, GL definitions, interest accrual and capitalization frequencies, Tax calculation and deduction parameters, etc., can be defined in the Product Master under the CASA definitions.

5.1. CHM84 - CASA Product Attributes Maintenance

Using this option you can maintain the product level parameters for the window period functionality.

First withdrawal done in the OD account (where OD limit is utilized) will start the window period count for the account. The system logs the repayment of withdrawals in the OD account during this period. The account will be marked as **Debit Block** with the reason code as **Overdue Account** if all debits (where OD limit is utilized) in the account are not repaid within the window period.

Penal Interest will be defined and charged if the overdue amount is not repaid within the grace days defined. No further debits from branch/channels/GEFU will be permitted in the account even if the OD limit is not fully utilized by the customer. If the OD limit is attached to the account, the Window Period, Grace Days, Penalty rate and Penalty GLs defined in this option will be applicable for all the accounts opened under this product.

For more information, refer to the [Example 01](#), [Example 02](#) and [Example 03](#) provided at the end of this chapter.

Penalty Details	
Window Period In Days	[Mandatory, Numeric, Four] Type the number of days within which the entire negative balance in

the account opened under this product is required to be repaid.

Grace Days For Window Period

[Mandatory, Numeric, Two]

Type the number of days after the window period within which if the repayment is done, penalty will not be charged.

If the repayment of overdue amount is not done within the grace days then, penalty will be calculated on the entire overdue amount for the total number of days exceeding the window period expiry date.

Rate

[Mandatory, Numeric, Two, 10]

Type the absolute rate that will be used for charging the window period penalty.

Penalty Income GL

[Mandatory, Numeric, Nine]

Type the GL account number to which the window period penalty charged will be posted.

This is applicable for OD accounts in normal stage.

This is income type of GL.

Penalty Suspended Income GL

[Mandatory, Numeric, Nine]

Type the GL account number to which the window period penalty charged will be posted.

This is applicable for OD accounts in suspended stage.

3. Click the **Add** button.
4. Select the product code from the pick list.
5. Enter the penalty details.

Example 01 – For Window Period Count

The window period count will start from the first withdrawal in the account (where OD limit is utilized). The count will include the withdrawal date also.

Window Period - 20 Days

First Withdrawal utilizing the OD limit - 05/01/2008

Repayment Date - 24/01/2008

Example 02

If there is only one limit in the account the window period will expire with the limit expiry date. If there are multiple limits in the account then the window period will expire with the last limit expiry date.

Window Period in the Account - 30 days

Withdrawal date - 15/06/2008

Limit Expiry date - 30/06/2008

In the above example, since the limit is expiring on 30/06/2008, the window period expiry date will also be 30/06/2008.

Example 03

Position of a CASA account is as follows;

Window Period (Days)	Grace Days for Penal Interest	Drawing Power	Available Balance	Net Balance
20	4	100000	20000	120000

Withdrawal Date (DD/MM/YYYY)	Withdrawal Amount	Available Balance	Window Period count Starts	Repayment date (DD/MM/YYYY)	Remarks
01/01/2008	10000	10000	NO	--	Count will not start as the OD limit is not utilized.
03/01/2008	15000	-5000	YES	22/01/2008	OD limit for 5000 is utilized.
05/01/2008	10000	-15000	YES	22/01/2008	OD limit for 15000 is utilized.
08/01/2008	5000	-20000	YES	22/01/2008	OD limit for 20000 is utilized.

Assuming there are no further withdrawals in the account. All the withdrawals done should be repaid within the window period.

If 20000 is not paid before EOD of 22/01/2008 then:

1. Account will become 'Debit Block' with the reason code as 'Overdue Account' in EOD of 22/01/2008.
2. Entire outstanding amount i.e. 20000 will become overdue.

Case 01 – Customer makes the repayment within Grace Days

1. Customer repays 20000 on 25/01/2008.
2. Available balance will become zero.
3. 'Debit Block' status of the account will be removed automatically in EOD of 25/01/2008.
4. No penal interest will be charged.

Case 02 – Customer makes the repayment after Grace Days

1. Customer repays 20000 on 29/01/2008.
2. Available balance will become zero.
3. 'Debit Block' status of the account will be removed automatically in EOD of 29/01/2008.

Penal interest will be calculated on 20000 for 6 days (23/01/2008 to 28/01/2008). This penalty will be posted to the account in addition to the debit interest on 31/01/2008 (interest charging date).

5.2. CHM04 - CASA Bank Parameters Maintenance

Using this option you can define bank wide parameters pertaining to Current and Savings accounts like EOD and BOD batch size, transaction batch size, dormant reactivation mode, SI execution on previous day and tax on interest accrual. This screen maintains the reactivation parameter for dormancy as “Manual” due to non-allowance of transactions for a dormant account.

This maintenance is one time activity undertaken during the static data setup phase and only one authorised record is possible in this maintenance, during the static data setup phase.

Field Description

Field Name

Description

Record Number

[Mandatory, Pick List]

Select the record number from the pick list.

It is a manually generated identifier used for the bank parameters.

The number has no operational significance.

Miscellaneous Parameters

BOD - Batch Size

[Mandatory, Numeric, Four]

Type the commit size of the BOD batch process like standing instruction execution.

The commit sizes refer to the transactions processed per batch. The value of the commit size is defined during the installation of **FLEXCUBE Retail**.

	<p>The batch sizes are calculated using the processing time factor and the restart need.</p>
TXN - Batch Size	<p>[Mandatory, Numeric, Four]</p> <p>Type the commit size of the transaction posting of EOD batch process.</p> <p>The batch sizes refer to the transactions processed per batch. The value of the commit size is defined during the installation of FLEXCUBE Retail.</p> <p>The batch sizes are calculated using the processing time factor and the restart need.</p>
Dormant Reactivation Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the dormant reactivation mode for CASA accounts from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Automatic (Dr/Cr) –The dormant account will be reactivated automatically upon a customer originated debit or credit transaction. • Debit - The dormant account will be reactivated automatically upon a customer originated debit transaction only. • Manual – The reactivation from dormant account has to be done manually.
EOD - Batch Size	<p>[Mandatory, Numeric, Four]</p> <p>Type the commit size of the interest capitalization of EOD batch process.</p> <p>The batch sizes refer to the transactions processed per batch. The value of the commit size is defined during the installation of FLEXCUBE Retail.</p> <p>The batch sizes are calculated using the processing time factor and the restart need.</p>
Single Entry For Console Chq	<p>[Optional, Check Box]</p> <p>Select the Single Entry For Consol Chq check box to enable the system to store a single entry for consolidated cheque deposits in the statement or passbook.</p> <p>If the check box is not selected, then the statement or passbook will show individual entries for the cheques deposited through consolidated cheque deposit option.</p>
Tax on Interest Accrual	<p>[Optional, Check Box]</p> <p>Select the Tax on Interest Accrual check box to calculate and deduct the tax on accrued interest.</p> <p>If the check box is not selected, then the tax will be computed and deducted at the time of interest capitalization.</p> <p>The system will also look at the Product Master TDS flag and will compute tax only for products where TDS flag is checked.</p>
SI Execution on	<p>[Optional, Check Box]</p>

Previous Day	<p>Select the SI Execution on Previous Day check box if the standing instruction is to be executed on the previous working day whenever the standing instruction execution date is a holiday.</p> <p>If the check box is not selected, then the standing instruction will be executed on the next working day whenever the standing instruction execution date is a holiday.</p> <p>Standing instruction falling on month end will be executed on the previous day.</p>
Passbook Update on Deposit Date	<p>[Optional, Check Box]</p> <p>Select the Passbook Update on Deposit Date check box to update the passbook on the deposit date for cheque deposits.</p> <p>If the check box is not selected, then the passbook gets updated on the cheque value date.</p>
Interest and Tax Entries	<p>[Mandatory, Drop-Down]</p> <p>Select the interest and tax entries from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Individual: Interest and Tax entries will be passed separately • Consolidated: Interest and Tax entries will be passed in one entry
Post Capitalization on next working day	<p>[Display]</p> <p>This field displays whether the posting of capitalization entry in CASA accounts is to be done on the next day or not.</p> <p>If this check box is selected, the available balance is updated during next BOD and the GL entries for interest capitalization is passed with posting date with value date as next date.</p>
Multi Currency Account (MCA) Operation for CASA and RD	<p>[Optional, checkbox]</p> <p>Select the Multi Currency Account (MCA) Operation for CASA and RD checkbox if TD module has to function as per MCA model.</p> <p>If this check box is selected following screens/ functionality related to TD operations will not be available.</p> <ul style="list-style-type: none"> • 8051 (CASA/RD account opening). Account opening will be through a new screen • CASA / RD Account customer relationship will not be maintained through Customer Account Relationship Maintenance (Fast Path: CI142). • CASA / RD Account status maintenance will not be done through Account Status Maintenance (Fast Path: CHM21) . • CASA / RD sub account transfer to another branch will not be done through Single Account Transfer (Fast Path: BA995). • Standing Instruction Maintenance (Fast Path: CHM31) and Sweep Out Maintenance (Fast Path: CHM32) will not have New TD account references.
Off Balance Sheet Accounting for	<p>[Optional, Check Box]</p>

write off required	Select the Off Balance Sheet Accounting for write off required check box to pass the entries for written off accounts.
Contingent Asset GL	[Conditional, Pick List] Type the account number of the asset type contingent GL. This field is enabled only if the Off Balance Sheet Accounting for write off required check box is selected.
Contingent Liability GL	[Conditional, Pick List] Type the account number of the liability type contingent GL. This field is enabled if the Off Balance Sheet Accounting for write off required check box is selected.
Home Cash GL	[Display] This field displays the home cash GL code in which the cash deposit or withdrawal is posted.
Intermediate GL for Sweepin	[Optional, Pick List, Numeric, 9] Select the intermediate GI for sweepin from the pick list. OR Type the GL code through which sweep in of funds will be routed to CASA account. The CASA account is credited by debiting this GL and a hold is marked on the sweep-in provider. In case this flag is unchecked, normal sweep in functionality will work, without involving the intermediate GL.
Account Manager Maintenance at	[Mandatory, Drop-Down] Select the account manager maintenance at from the drop-down list. The options are: - Any Level - MCA Level - Sub Account Level - Deposit Level It governs the maintenance behavior of account managers and replication of account managers incase of batch transactions resulting in opening of new accounts or deposits.
Intermediate GL for sweep in	GL code through which sweep in of funds will be routed to beneficiary CASA account. Sweep in instruction is defined in Sweep in Maintenance (CHM32). The beneficiary CASA account is credited by debiting this GL and a lien is marked on the sweep-in provider TD. If sweep in from CASA is set as EOD, then beneficiary CASA account is credited by debiting this GL and a hold is marked on the sweep-in provider CASA. In EOD, lien/hold on TD/CASA is removed from the provider account and provider account is debited to credit the beneficiary account. Entry passed between intermediate GL and beneficiary CASA are reversed to the extent of sweep in.

3. Click the **Modify** button.
4. Select the record number from the pick list.
5. Modify the miscellaneous parameters.

5.3. CHM01 - CASA Product Master Maintenance

The CASA product master encapsulates all the attributes of the product introduced by the bank.

Using this option you can define a product, to open new accounts under the same product. The account pertaining to a product automatically inherits the specified product attributes. However, you can make changes at the account level to offer special privileges to the customer.

The product master set up in **Oracle FLEXCUBE** is highly parameterized and allows setting up current, savings and recurring deposit products at the bank level by defining various product parameters such as credit and debit interest details, service charges, product facilities, etc. All the products are uniquely identified in the system by means of a product code. After the product is set up, **Branch- Product Cross Reference** (Fast Path: BA435) needs to be done and both branch product cross reference and product master needs to be downloaded to the branches for opening accounts under the product in the respective branches.

In this screen **Oracle FLEXCUBE** supports dormancy plan Id selection at CASA product level.

Field Description

Field Name	Description
------------	-------------

Minimum Interest Variance	[Mandatory, Numeric, Two, 10] Type the minimum variance allowed on the interest rate for this product. The values can be between –100 to +100. The interest variance specified at the account level should be greater than or equal to this variance limit.
----------------------------------	---

Credit Accrual Basis	[Conditional, Drop-Down] Select the credit accrual basis, for the accounts opened under this product, from the drop-down list. It defines the way in which number of days is calculated between two dates for interest computation. The accrual basis is always defined as 'a/b' where:
-----------------------------	--

- 'a' denotes number of days in a month
- 'b' denotes number of days in a year

Oracle FLEXCUBE Retail supports six accrual basis.

The options are:

- EURO30 /360 –The number of days in a month are always 30 and number of days in a year are always 360 except for February. For February, actual numbers of days are taken in to consideration while the denominator remains as 360.
- US30/360 – Always 1/12 for any month.
- Actual/Actual – Actual number of days in a calendar month / actual number of days in a year.
- Actual/360 - The number of days in a month is the actual number of days of the calendar month and the number of days in the year is 360.
- EURO30/Actual - If normal month then 30/No of Days in Year. If month is February then No of Days in February/No of Days in Year
- US30/Actual – Number of days in any month =30 and number of days in a year = actual number of days in the year. Refer Example 6.
- Actual/365 - The number of days in a month is the actual number of days of the calendar month and the number of days in the year is 365.

Maximum Interest Variance

[Mandatory, Numeric, Two, 10]

Type the maximum variance allowed on the interest rate for this product. The values can be between –100 to +100.

The maximum variance specified at the account level should be within the variance limit set up at the product level.

The interest variance specified at the account level should be less than or equal to this variance limit.

Debit Accrual Basis

[Conditional, Drop-Down]

Select the debit accrual basis from the drop-down list.

This field denotes the debit interest accrual basis for the accounts opened under this product. It defines the way in which number of days is calculated between two dates for interest computation.

Oracle FLEXCUBE Retail supports six accrual basis.

The options are:

- EUR30 /360 – Euro 30/360 - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- US30/360 – 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- Actual/Actual – Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- Actual/360 - Actual days in a month will be taken as numerator

and 360 days in a year will be taken as denominator.

- EURO30/Actual - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- US30/Actual – 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- Actual/365 - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator.

Interest rate plan	[Mandatory, Pick List] Select the interest rate plan, for the selected product, from the pick list. The global interest rate plans have to be defined which comprises of credit, debit and OD interest, based on tiers as required by the bank.
Plan Description	[Display] This field displays the plan description corresponding to the interest rate plan.
Interest Variance in	[Display] This field displays the type of interest variance. The options are as follows: <ul style="list-style-type: none">• Absolute• Percentage
Credit Interest Parameters	
Balance Base	[Mandatory, Drop-Down] Select the base for computation of credit interest from the drop-down list. The options are: <ul style="list-style-type: none">• DailyBalance - The interest will be calculated on the daily balance of the account. The interest is calculated on the end of day balance of each day in the account. This interest is added at the end of the accrual period.• AverageDailyBalance - The interest will be calculated on the average daily balance of the account during the accrual period.• MonthlyMinimum - The interest will be calculated on the minimum balance between two specified dates in a month during the accrual period. If there is a debit balance in the account during the specified dates, the customer does not get any credit interest for that period.
Interest Capitalization Basis	[Mandatory, Drop-Down] Select the interest capitalization basis from the drop-down list. The options are: <ul style="list-style-type: none">• Calendar – If this option is selected interest capitalization will be done at month-end

- Anniversary - If this option is selected interest capitalization will be done on some specified date.

Capitalization Frequency

[Mandatory, Drop-Down]

Select the capitalization frequency from the drop-down list.

It is the frequency at which the interest is capitalised. On capitalization, interest is credited to the account.

The options are:

- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

The interest capitalization frequency should be greater than or equal to the interest accrual frequency.

Anniversary Day

[Conditional, Numeric, Two]

Type the anniversary day of capitalization.

This field is enabled only if the **Anniversary** option is selected in the **Interest Capitalization Basis** field.

Balance Start Day

[Conditional, Numeric, Two]

Type the start date of the month from which the minimum balance is to be counted for the interest calculation.

This field is enabled only if the user has selected the **Monthly Minimum Balance** option in the **Balance Base** field for calculating interest on monthly minimum balance.

For example, when interest is calculated on the minimum balance between 11th and 30th of the month, enter the start date as 11.

Balance End Day

[Conditional, Numeric, Two]

Type the end date of the month up to which the minimum balance is to be counted for interest calculation.

This field is enabled if the **Monthly Minimum Balance** option selected in the **Balance Base** field for calculating interest on monthly minimum balance.

For example, when interest is calculated on the minimum balance between 11th and 31st of the month, the end date to be entered is 31. If the month has fewer days than 30 or 31, the system treats the last date of that month as the end date.

Capitalization Offset Month

[Conditional, Numeric, Two]

Type the offset period in months from beginning month of the financial year defined.

This field is enabled only when the **Capitalization Frequency** is quarterly and above and the start month as entered here will start the count of months from the financial year.

Tier Type	<p>[Mandatory, Drop-Down]</p> <p>Select the tier type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cumulative – In the cumulative type of interest tier structure, the system will calculate the interest based on the interest rate of the tier in which the entire balance amount falls. • Incremental – In the incremental type of interest tier structure, the account balance is broken into various tiers and the interest is calculated based on the interest rates for the respective tier.
Interest Accrual Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the interest accrual frequency from the drop-down list.</p> <p>It is the interval at which the interest accrual will be done. The accrual entries are passed based on the accrual frequency set up at the product level.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Daily • Weekly • FortNightly • Monthly • Bi-Monthly • Quarterly • Half-Yearly • Yearly <p>The interest accrual frequency should be less than or equal to the interest capitalization frequency.</p>
Book/Collected Bal To Pay	<p>[Mandatory, Drop-Down]</p> <p>Select the parameter on which the interest is to be computed from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Book Balance -Interest will be computed on the end of day ledger full book balance, including the unclear funds and hold funds. • Collected Balance – Interest will be computed on the end of day clear balance (available balance), including hold funds
Minimum Interest To Pay	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the minimum interest amount that can be paid.</p> <p>If the interest payable at the time of interest capitalization or at account closure is less than this amount, then no interest shall be paid.</p>
Accrued Interest Reversal On Account Closure	<p>[Optional, Check Box]</p> <p>Select the Accrued Interest Reversal on Account Closure check box</p>

to reverse the accrued interest in books.

Accrued interest is not paid to the customer on closure of the CASA account. This field will be disabled if '**Tax on Interest Accrual**' flag is checked at the Savings Bank Parameter

Rounding Method

[Mandatory, Drop-Down]

Select the rounding method from the drop-down list.

The options are:

- Raise
- Cutoff
- Round

For more information, refer to [Example 14](#) provided at the end of the option.

Nearest Amount to Round

[Mandatory, Drop-Down]

Select the appropriate nearest amount to round from the drop-down list.

While capitalizing the interest if the rounding precision required is different from the currency rounding precision then this field can be used. For each decimal movement *10 factor should be used.

The options are:

- 1
- 10
- 100
- 1000

Recompute Interest on Capitalization Date

[Conditional, Check Box]

Select the **Recompute Interest on Capitalization Date** check box if the system has to re-compute the interest on capitalization date, if there is any interest rate changes since last capitalization date.

This field is enabled if the **Daily Balance** option is selected in the **Balance Base** drop-down list in the **Credit Interest Parameters** section. For corporate customers, whose CASA accounts will be opened under corporate CASA products this check box will not be selected.

Debit Interest Parameters

Balance Base

[Display]

This field displays the balance base.

By default, the system displays the balance base as Daily. Debit interest is always calculated on the daily balance of the account.

Interest Capitalization Basis

[Mandatory, Drop-Down]

Select the interest capitalization basis from the drop-down list.

The options are:

- Calendar – If this option is selected interest capitalization will be

done at month-end

- Anniversary - If this option is selected interest capitalization will be done on some specified date.

Capitalization Frequency

[Mandatory, Drop-Down]

Select the capitalization frequency from the drop-down list.

It is the interval at which the debit interest is to be capitalised.

The options are:

- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

The debit interest capitalization frequency should be greater than or equal to the interest accrual frequency, maintained in the Credit Interest tab. The debit interest capitalization frequency can be different from the credit interest capitalization frequency.

Anniversary Day

[Conditional, Numeric, Two]

Type the anniversary date of capitalization.

This field is enabled only if the **Anniversary** option is selected in the **Interest Capitalization Basis** field.

Capitalization Offset Month

[Conditional, Numeric, Two]

Type the offset period in months from beginning month of the financial year defined.

This field is enabled only when **Capitalization Frequency** is quarterly and above and the start month as entered here will start the count of months from the financial year.

Min OD Days

[Conditional, Numeric, Two]

Type the offset period in months from beginning month of the financial year defined.

This field is enabled only when **Capitalization Frequency** is quarterly and above and the start month as entered here will start the count of months from the financial year.

Minimum Dr Interest To Charge

[Mandatory, Numeric, 13, Two]

Type the minimum amount of debit interest to be charged.

If the debit interest amount at the time of debit interest capitalization is less than the value in this field, then the minimum interest to charge is applied on the account.

Cheque Purchase Index Code

[Mandatory, Drop-Down]

Select the cheque purchase index code from the drop-down list.

The rate of interest effective for the selected index code will be the

interest rate applicable and charged on cheque purchase.

The bank wide interest index codes and interest rates are maintained separately under bank global maintenance. For more information on Interest Index Codes refer to the **Interest Index Maintenance** (Fast Path: BAM12) option and for interest rates refer to the **Interest Index Rates** (Fast Path: BAM13) option.

Floor Rate	[Optional, Numeric, 10, Two] Type the lowest tier that can be used in the interest plan.
Ceiling Rate	[Optional, Numeric, 10, Two] Type the highest tier to be used in the interest plan.
Default OD Index Code	[Mandatory, Pick List] Select the default OD index code from the pick list. If there is no tier used then the OD index rate is defined.
Tier Type	[Mandatory, Drop-Down] Select the tier type from the drop-down list. The options are: <ul style="list-style-type: none">• Cumulative – In the cumulative type of interest tier structure, the system will calculate the interest based on the interest rate of the tier in which the entire balance amount falls.• Incremental – In the incremental type of interest tier structure, the account balance is broken into various tiers and the interest is calculated based on the interest rates for the respective tier.
Use product tiers for debit interest calculation	[Optional, Check Box] Select the Use product tiers for debit interest calculation check box, if the interest rate at the limit level is used or else the tiers at the product level are used.
Loan Linked OD	[Conditional, Checkbox] Select the checkbox if the OD accounts under this product is required to behave as per the Loan Linked OD. This check box will be enabled for Asset type of products. For Liability products this will remain disabled.
Rounding Method	[Mandatory, Drop-Down] Select the rounding method from the drop-down list. The options are: <ul style="list-style-type: none">• Raise• Cutoff• Round
Nearest Amount to Round	[Mandatory, Drop-Down] Select the appropriate nearest amount to round from the drop-down list. While capitalizing the interest if the rounding precision required is

different from the currency rounding precision then this field can be used. For each decimal movement *10 factor should be used.

The options are:

- 1
- 10
- 100
- 1000

Overline Interest Parameters

OL Interest On OL Amt Only [Optional, Check Box]
Select the OL Interest On OL Amt Only check box, if the OL interest is applied on OL amount only.
The overline interest rate is to be applied only to overline balance or for the entire balance.

Tier Type [Mandatory, Drop-Down]
Select tier type from the drop-down list.
The options are:

- Cumulative – In the cumulative type of interest tier structure, the system will calculate the interest based on the interest rate of the tier in which the entire balance amount falls.
- Incremental – In the incremental type of interest tier structure, the account balance is broken into various tiers and the interest is calculated the interest based on the interest rates for the respective tier.

Use OL as variance on OD Rate [Optional, Check Box]
Select the **Use OL as variance on OD Rate** check box to use OL interest as a variance on OD interest.

Service Charges

Periodic Service Charge for the product can be defined to the product using the Service Charges tab of the Product Master option. By default, all accounts opened under the defined product will attract the service charges as mentioned in the product SC package.

All the SCs in the SC package will be applied in product currency. In absence of product currency SC, the local currency equivalent of the SC will be taken into consideration. However there is an option to waive or alter the SC's at the account level and customer level.

Field Description

Field Name

Description

Service Charges

Service Charge Package

[Mandatory, Drop-Down]

Select the service charges package, to be attached to the CASA product, from the drop-down list.

All service charges under this package shall be applicable by default to all accounts under the product.

For more information on defining Service Charge packages, refer to the **SC Package Definition** (Fast Path: SCM01) option.

No. Of Cheques for SC

[Mandatory, Numeric, Three]

Type the maximum number of cheques that can be withdrawn without levying the relevant cheque withdrawal service charge.

Days from A/c Open for Maint. SC

[Mandatory, Numeric, Three]

Type the minimum number of days for which the account has to be

operational before applying relevant service charges on it. This number can be set to zero to make the charge applicable immediately.

SC Funds Utilization Sequence

[Mandatory, Drop-Down]

Select the SC funds utilization sequence from the drop-down list.

This represents the order in which the funds in the account shall be used for payment of service charges.

It is a combination of three values representing following meaning:

- B - Funds from available balance excluding OD limit/lines
- A - Funds from advance against unclear funds
- O - Funds from OD Limit
- S - Funds from Sweep-in

Min Bal. to Avoid Dormancy SC

[Mandatory, Numeric, 13, Two]

Type the minimum book balance that has to be maintained in CASA to avoid levying of dormancy service charge on the account.

The service charges will be levied in the account currency.

Max. Amount Per Cycle

[Mandatory, Numeric, 13, Two]

Type the maximum service charge amount that can be levied on an account during SC capitalization in a cycle.

If the total of all the service charges is more than the amount mentioned in this field, the maximum amount in this field is applied and the service charges will be reduced pro-rata.

Min. Amount Per Cycle

[Mandatory, Numeric, 13, Two]

Type the minimum service charge that has to be levied in a cycle.

If the aggregate of the all individual SCs is less than the minimum, the minimum will be charged and all eligible SC amounts will accumulate pro-rata. This can be maintained as zero.

Exclude Periodic Charges and Rewards from Interest Calculations

[Optional, Check Box]

Select the Exclude Periodic Charges and Rewards from Interest Calculations check box, if the interest on the account should be calculated on the entire available balance after excluding the periodic charges and rewards for the current cycle.

Clear the check box if the interest should be calculated on the account balance after deducting the service charges for the current cycle.

Commitment Fees

Percentage OD Utilisation for Commitment Fee Waiver

[Mandatory, Numeric, Five, Two]

Type the percentage OD utilization above which commitment fee is not levied.

The commitment fee is computed on the unutilized amount below the "utilization percentage" and is levied to the account at the month end.

Commitment Fee = [(Sum of Sanctioned limits * minimum percentage utilization defined for the product) – limit utilized] * Fee percentage *

Actual no. of days/360

If the value of (Sum of Sanctioned limits * minimum percentage utilization defined for the product) is greater than the limit utilized.

For instance, the sanctioned overdraft limit for an account is 1000000 and the minimum percentage utilization maintained is 50%. If the limit utilized is less than 500000, then the commitment fee needs to be charged as per the fee percentage defined.

In the event of the CASA OD Account Closure/Write Off, the commitment fee will be levied on the same day.

**Commitment Fee
Calculation Basis**

[Display]

This field displays the option Actual/360 and the other options are for future use.

Commitment fee rate

[Mandatory, Numeric, Two, Two]

Type the rate at which the commitment fee will be levied to the accounts for this product.(without any account level variance).

Facilities

Account facilities such as cheque book facility, Standing instruction, etc., associated with the product can be defined here. All these fields are Non Mandatory.

Field Description

Field Name	Description
------------	-------------

Account Facilities

Cheque Book	[Optional, Check Box] Select the Cheque Book check box to enable the cheque book facility.
--------------------	--

Sweepin	[Optional, Check Box] Select the Sweepin check box to enable the sweep-in facility.
----------------	---

Overdraft	[Conditional, Check Box] Select the Overdraft check box to enable the OD facility. This field is enabled if the Asset option is selected from the Product Type field.
------------------	--

Sweep Out	[Optional, Check Box]
------------------	-----------------------

	Select the Sweep Out check box to enable the sweep out facility.
Standing Instruction	[Optional, Check Box] Select the Standing Instruction check box to enable the SI facility.
Inward Direct Debit Auth	[Optional, Check Box] Select the Inward Direct Debit Auth check box to enable inward direct debits from the account.
Default Sweep in Min Bal	[Conditional, Check Box] Select the Default Sweep in Min Bal check box to default the maximum of all the 4 minimum balances (i.e., minimum balance maintained for the product, minimum balance with cheque book facility, minimum balance with ATM facility and minimum balance with sweep in facility) defined at the product level to the CASA Account Master (Fast Path: CH021) option. When this check box is selected the minimum balance amount will be displayed, only when any sweep in instruction is set up on an account (this account being a beneficiary). This field is enabled only if the Sweepin check box is selected.
Credit Line	[Optional, Check Box] Select the Credit Line check box to define the product as a credit line product.
External Banking Facility	
Tele-Banking (TBS)	[Optional, Check Box] Select the Tele-Banking (TBS) check box to enable telephone banking facility for the product.
ATM	[Optional, Check Box] Select the ATM check box to enable ATM facility for the product.
Point Of Sale (POS)	[Optional, Check Box] Select the Point Of Sale (POS) check box to enable point of sale facility for the product.
Internet (NET)	[Optional, Check Box] Select the Internet (NET) check box to enable internet banking facility for the product.
Passbook Facilities	
PassBook	[Optional, Check Box] Select the Passbook check box to enable the passbook facility.
PassBook Format ID	[Conditional, Pick List] Select the format ID of the passbook from the pick list. This field is enabled only if the Passbook check box is selected.

The various formats of the passbooks are defined using **Passbook Parameter Maintenance**. One of the formats is linked to the product to indicate the format of passbooks for all accounts under this product.

Compression

[Optional, Check Box]

Select the **Compression** check box if compression is required in the account which is opened under this product.

By default, this field will be checked and can be modified as per the product requirement."

Threshold Count of Transaction for Compression

[Conditional, Numeric, Five]

Type the number of transactions that can be compressed for passbook transaction printing.

This field is enabled only if the **Compression** check box is selected. Once the check box is selected, this field becomes mandatory.

The minimum number of transactions that can be compressed are three.

For example, If the number entered is 10, the last transaction will be printed individually and rest of all the transactions before that will be compressed and printed in one line with total amount.

Threshold Count of Days for Compression

[Conditional, Numeric, Five]

Type the number of days of transactions that can be compressed.

This field is enabled only if the **Compression** check box is selected. Once the check box is selected, this field becomes mandatory.

The minimum days of transactions that can be compressed are three.

For example, If the number entered is 10, and if customer account has transactions on passbook printing date and if the number of unprinted days are greater than threshold period, **FLEXCUBE** will compress all pending transactions and print one transaction. The same day transactions will be printed separately.

Other Facilities

Fund Transfer To Same Customer

[Optional, Check Box]

Select the Fund Transfer to same customer check box to transfer the fund to same customer.

No processing will be done in **FLEXCUBE** based on this field.

Centralized Account Facility

[Optional, Check Box]

Select the **Centralized Account Facility** check box to allow the centralized accounting facility for the account opened under a product.

The centralized accounting facility is applicable only to the corporate CASA of basic, general, temporary, special budget, special non budget if this check box is selected.

SI Max Retries

[Mandatory, Numeric, Two]

Type the maximum number of retries that the system should make in case of failure of a standing instruction.

The maximum number of retries allowed is nine. Retries take place at

Beginning of Day (BOD) on successive days.

Minimum Balance Required

[Mandatory, Numeric, 13, Two]

Type the amount that should be maintained as the minimum balance in the account.

This balance, in the product currency, is the minimum balance required on accounts with no ATM and cheque facilities. A transaction which results in decrease of the account balance below the specified amount will require an override.

Min. Bal with Chqbk Fac.

[Conditional, Numeric, 13, Two]

Type the minimum balance to be maintained in the account when availing the cheque book facility.

This field is enabled if the **Cheque Book** check box is selected.

Min Balance with ATM Fac.

[Conditional, Numeric, 13, Two]

Type the amount that should be maintained as the minimum balance in the account to avail the ATM facility.

Minimum balance required in an account with ATM and cheque book facility is the maximum of three minimum balances namely Minimum balance, Min Bal with Chqbk facility and Min Balance with ATM facility.

This field is enabled if the **ATM** check box is selected.

Minimum Trading Balance Required

[Optional, Numeric, 13, Two]

Type the minimum amount that should be maintained for trading.

ATM Daily Withdraw Limit

[Optional, Numeric, 13, Two]

Type the maximum ATM withdrawal limit for a day.

Daily Interbranch Withdrawal Limit

[Mandatory, Numeric, 13, Two]

Type the daily interbranch withdrawal limit.

The system validates the cumulative daily interbranch withdrawal done by the customer against the value in this field.

For example, if the value in this field is 10000, and the customer withdraws 6000 in the morning, the system allows the transaction to take place. If the customer tries to withdraw another 6000 in the evening the system does not allow the transaction to take place as the cumulative withdrawal has exceeded the daily interbranch withdrawal limit.

Ac Ledger Retention Days

[Mandatory, Numeric, Three]

Type the number of days for which the account ledger entries have to be maintained in the system, after the transaction date account has been closed.

The account ledger and passbook entries will be retained in the system for these many days after the transaction posting day or after the account has been closed. System will post a consolidated row on the account for all transactions which are going to be purged.

No. of Cheques for Reorder

[Mandatory, Numeric, Three]

Type the number of cheque leaves remaining in a cheque book after

which message needs to be displayed to the teller at the time of branch transactions on the account.

The system will display an online message to the teller for all online cheque withdrawals when the outstanding number of cheques in the account is less than this level so that manual re-order of cheque book can be done by the teller.

Max. No. of Accounts per Customer

[Mandatory, Numeric, Two]

Type the maximum number of accounts that can be opened under a product for the customer.

The data entered in this field will limit the number of accounts of a customer both as a sole owner or jointly under this product. This restriction will not be applicable to relations like Guarantors, Authorised Signatories, Nominees, co-borrowers, etc.

By default, zero is displayed. It means that there is no limit on the number of accounts that the customer can open under this product.

Minimum Average Balance

[Mandatory, Numeric, Five, Two]

Type the minimum average balance for the particular product.

The calculation of this average balance will be for the same period as the period used in calculating the periodic average balance for each account.

Minimum Initial Payin

[Optional, Numeric, Eleven, Two]

Type the minimum amount initial payin.

This is the minimum amount that needs to be deposited in the CASA account after account opening.

The minimum amount should be less than or equal to 9999999999.99.

General Ledger

The GL entries generated due to transactions on accounts under the product can be generated and posted automatically to asset and liability, income or expense GLs defined at the product level.

Note: Refer to Accounting entries document for more details on GL entries.

Field Description

Field Name	Description
------------	-------------

General Ledger Codes

Asset Balances

[Mandatory, Numeric, Nine]

Type the general ledger (GL) code for recording negative balance accounts.

All the negative (asset) balance accounts under this product will report to this GL code. If the CASA account has turned negative from a positive balance due to overdrawing the balance in the liability balances GL for the corresponding account will become zero and the negative balance will be transferred to the asset balances GL.

This is an asset type GL.

Suspended Asset

[Mandatory, Numeric, Nine]

Type the GL code for suspended assets.

A non-performing account is called a suspended account. The asset balances of the non-performing accounts under this product will report to

	<p>this GL code.</p>
Interest Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code to which the interest receivable amounts are to be posted.</p> <p>During debit interest accrual on normal accounts with negative balances, this GL account is debited and the interest income GL for this product is credited. During capitalisation, entries are reversed from this GL and posted to asset/liability GL.</p> <p>This GL account is credited and the customer account and the corresponding asset/liability GL account are debited when the interest is capitalised on the account.</p>
Suspended Interest Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording interest receivable amount on suspended accounts.</p> <p>During debit interest accrual on suspended accounts with negative balances, this GL account is debited and the suspended interest income GL for this product is credited.</p> <p>During capitalisation, entries are reversed from this GL and posted to Suspended asset/liability GL. When an account turns non-performing and if the clawback facility is enabled, all the pending interest arrears are transferred to this GL. This GL is debited and the interest receivable GL is credited when the pending interest arrears are transferred. When account reverts to normal state, the reverse will be done.</p> <p>This is an Asset type of GL.</p>
Interest Income	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording income earned from normal accounts under this product.</p> <p>This GL account is credited and the interest receivable GL account is debited at the time of debit interest accrual on a normal account with a negative balance. This is an income type GL.</p>
Suspended Interest	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording income earned from suspended accounts under this product.</p> <p>This GL account is credited and the suspended interest receivable GL account is debited at the time of debit interest accrual on a suspended account.</p> <p>This is an liability type GL.</p>
Legal Fees	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording legal fees incurred on normal accounts belonging to this product.</p> <p>This GL account is credited and the customer account is debited when the legal fees are raised through common billing.</p> <p>This is a asset type GL.</p>
Suspended Legal	<p>[Mandatory, Numeric, Nine]</p>

Fees	<p>Type the GL code for recording legal fees incurred on suspended accounts belonging to this product.</p> <p>This GL account is credited and the customer account is debited when the legal fees are raised through common billing.</p> <p>When an account turns non-performing and if the clawback facility is enabled, the legal fees GL is debited to the extent of the fees arrears and this GL is credited. When account reverts to normal state, the reverse will be done. For any further fees accruals through common billing the customer account is debited and this GL is credited.</p> <p>This could either be an asset or a liability type of GL.</p>
Outgoings	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording outgoings incurred on normal accounts belonging to this product.</p> <p>Outgoings pertain to amounts collected by the bank on behalf of another agency, for example, Insurance Premium. This GL account is credited and the asset / liability GL account is debited when the outgoings are raised through common billing.</p> <p>This is a liability type GL.</p>
Suspended Outgoings	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording outgoings incurred on suspended accounts belonging to this product.</p> <p>Outgoings pertain to amounts collected by the bank on behalf of another agency e.g. Insurance Premium. This GL account is credited and the suspended asset / liability GL account is debited when the outgoings are raised through common billing.</p> <p>When an account turns non-performing and if the clawback facility is enabled, the outgoing fees GL is debited to the extent of the suspended outgoings arrears and this GL is credited. For any further outgoing fees accruals through common billing the customer account is debited and this GL is credited. When account reverts to normal state, the reverse will be done.</p> <p>This could either be an asset or a liability type of GL.</p>
Liabilities Balances	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording positive balance accounts.</p> <p>The balances of all the positive balance (liabilities) accounts will be recorded in this general ledger code.</p> <p>This GL account is credited when the customer account has a credit balance and there is a credit to the account.</p> <p>If the CASA account has turned positive from a negative balance due to deposit, the balance in the Asset balances GL for the corresponding account will become zero and the positive balance will be transferred to the Liability balances GL.</p> <p>This is a liability type GL.</p>
Suspended Interest Recovered	<p>[Mandatory, Numeric, Nine]</p> <p>Type the GL code for recording suspended interest recovered from</p>

suspended accounts under this product.

When credits are made to suspended accounts for recovery of interest, the suspended interest is debited to the extent of recovery and this GL is credited.

This GL is affected when an account turns non-performing and there is a credit to the account for recovery of interest. The appropriate GL is debited to the extent of the interest recovery and this GL is credited.

This is an income type of GL.

Interest Payable

[Mandatory, Numeric, Nine]

Type the GL code for recording interest payable amount on accounts.

During credit interest accrual on accounts with positive balances, this GL account is credited and the interest expense GL for this product is debited.

During capitalisation, entries are reversed from this GL and posted to asset/liability GL.

This is a liability type of GL.

Write-Off

[Mandatory, Numeric, Nine]

Type the GL code for recording write off entries on accounts belonging to this product.

When an account is written off, the Write off GL is affected to the extent of the asset balance in the CASA account less the provision made already for that account.

This is an expense type GL.

Interest Expense

[Mandatory, Numeric, Nine]

Type the GL code for recording credit interest applied on accounts under this product.

During credit interest accrual on accounts with positive balances, this GL account is debited and the interest payable GL for this product is credited. This is an expense type of GL.

Bad Reserve

[Mandatory, Numeric, Nine]

Type the GL code for recording bad debts reserve (provisions) for accounts under this product.

During provisioning, the Interest Income GL is debited and this GL is credited.

This GL will have the provision done for an NPL account.

This is a liability type GL.

Unclaimed Deposits

[Mandatory, Numeric, Nine]

Type the GL code for recording unclaimed amounts on accounts under this product. The balances of all the unclaimed accounts will be recorded in this general ledger code.

During unclaimed processing, the credit balance of an unclaimed dormant account gets transferred to this GL account, after the unclaimed deposit period is over. The unclaimed deposit period is specified in the

Unclaimed Transfer Value field in the **Facilities** tab.

This GL account will be credited and the liability account will be debited with the unclaimed balance.

This is a liability type of GL.

Cheque Purchase Interest

[Optional, Numeric, 10]

Type the GL code for recording interest income due to cheque purchase done on accounts under this product.

This is an income type GL.

Tax Absorbed 1

[Optional, Numeric, Nine]

Type the GL code for recording tax absorbed 1 by the bank on the interest payable.

When the GL code is mentioned in this field, for all the accounts under that product the system will deduct the respective tax 1 on the taxable interest earned by the account, from this GL. The account will not have any entry for the tax deduction and it will get the full interest amount without tax deduction.

This field is mandatory only if the bank absorbs the tax 1. Otherwise, enter '0' in this field.

This is an expense type GL.

Tax Absorbed 2

[Optional, Numeric, Nine]

Type the GL code for recording tax absorbed 2 by the bank on the interest payable.

When the GL code is mentioned in this field, for all the accounts under that product the system will deduct the respective tax 2 on the taxable interest earned by the account, from this GL. The account will not have any entry for the tax deduction and it will get the full interest amount without tax deduction.

This field is mandatory only if the bank absorbs the tax 2. Otherwise, enter '0' in this field.

This is an expense type GL.

SC Max. Amount Diff GL

[Mandatory, Numeric, Nine]

Type the GL code for recording maximum amount of service charge incurred on the accounts belonging to this product.

SC Min. Amount Diff GL

[Mandatory, Numeric, Nine]

Type the GL code for recording minimum amount of service charge incurred on the accounts belonging to this product.

Suspended SC

[Mandatory, Numeric, Nine]

Type the GL code for recording service charge incurred on suspended accounts belonging to this product.

Commitment Fee Income

[Mandatory, Numeric, Nine]

Type the GL code for credit of commitment fee levied to OD accounts in regular status.

	This is an income type of GL.
Non zero balance to be transferred for corporates	[Optional, Radio Button] Click the radio button to transfer the non zero balance accounts of the corporates.
Suspended Commitment Fee	[Mandatory, Numeric, Nine] Type the GL code for credit of commitment fee levied to OD account in suspended status. This is a liability type of GL.
Non zero Balance transfer GL	[Conditional, Numeric, Nine]

Field Name	Description
Asset Balances	[Mandatory, Numeric, Nine] The general ledger (GL) code for recording negative balance accounts. The balances of all the negative (asset) balance accounts under this product will report to this GL code. If the CASA account has turned negative from a positive balance due to overdrawing the balance in the liability balances GL for the corresponding account will become zero and the negative balance will be transferred to the asset balances GL. This is an asset type GL.
Suspended Asset	[Mandatory, Numeric, Nine] A non-performing account is called a suspended account. The asset balances of the non-performing accounts under this product will report to this GL code.
Interest Receivable	[Mandatory, Numeric, Nine] The GL code to which the interest receivable amounts are to be posted. During debit interest accrual on normal accounts with a negative balances, this GL account is debited and the interest income GL for this product is credited. During capitalization, entries are reversed from this GL and posted to asset/liability GL. This GL account is credited and the customer account and the corresponding asset/liability GL account are debited when the interest is capitalized on the account.
Suspended Interest Receivable	[Mandatory, Numeric, Nine] The GL code for recording interest receivable amount on suspended accounts. During debit interest accrual on suspended accounts with a negative balances, this GL account is debited and the suspended interest income GL for this product is credited. During capitalization, entries are reversed from this GL and posted to Suspended asset/liability GL.

When an account turns non-performing and if the clawback facility is enabled, all the pending interest arrears are transferred to this GL.

This GL is debited and the interest receivable GL is credited when the pending interest arrears are transferred. When account reverts to normal state, the reverse will be done.

This could either be an asset or a liability type of GL.

Interest Income

[Mandatory, Numeric, Nine]

The GL code for recording income earned from normal accounts under this product.

This GL account is credited and the interest receivable GL account is debited at the time of debit interest accrual on a normal account with a negative balance. This is an income type GL.

This is an income type GL.

Suspended Interest

[Mandatory, Numeric, Nine]

The GL code for recording income earned from suspended accounts under this product.

This GL account is credited and the Suspended interest receivable GL account is debited at the time of debit interest accrual on a suspended account.

This is an income type GL.

Legal Fees

[Mandatory, Numeric, Nine]

The GL code for recording legal fees incurred on normal accounts belonging to this product.

This GL account is credited and the customer account is debited when the legal fees are raised through common billing.

This is a liability type GL.

Suspended Legal Fees

[Mandatory, Numeric, Nine]

The GL code for recording legal fees incurred on suspended accounts belonging to this product.

This GL account is credited and the customer account is debited when the legal fees are raised through common billing.

When an account turns non-performing and if the clawback facility is enabled, the legal fees GL is debited to the extent of the fees arrears and this GL is credited. When account reverts to normal state, the reverse will be done. For any further fees accruals through common billing the customer account is debited and this GL is credited.

This could either be an asset or a liability type of GL.

Outgoings

[Mandatory, Numeric, Nine]

The GL code for recording outgoings incurred on normal accounts belonging to this product.

Outgoings pertain to amounts collected by the bank on behalf of another agency, for example, Insurance Premium. This GL account is credited and the asset / liability GL account is debited when the outgoings are raised through common billing.

This is a liability type GL.

Suspended Outgoings

[Mandatory, Numeric, Nine]

The GL code for recording outgoings incurred on suspended accounts belonging to this product.

Outgoings pertain to amounts collected by the bank on behalf of another agency e.g. Insurance Premium. This GL account is credited and the suspended asset / liability GL account is debited when the outgoings are raised through common billing.

When an account turns non-performing and if the clawback facility is enabled, the outgoing fees GL is debited to the extent of the suspended outgoings arrears and this GL is credited. For any further outgoing fees accruals through common billing the customer account is debited and this GL is credited. When account reverts to normal state, the reverse will be done.

This could either be an asset or a liability type of GL.

Liabilities Balances

[Mandatory, Numeric, Nine]

The GL code for recording positive balance accounts.

The balances of all the positive balance (liabilities) accounts will be recorded in this general ledger code.

This GL account is credited when the customer account has a credit balance and there is a credit to the account.

If the CASA account has turned positive from a negative balance due to deposit, the balance in the Asset balances GL for the corresponding account will become zero and the positive balance will be transferred to the Liability balances GL.

This is a liability type GL.

Suspended Interest Recovered

[Mandatory, Numeric, Nine]

The GL code for recording suspended interest recovered from suspended accounts under this product.

When credits are made to suspended accounts for recovery of interest, the suspended interest is debited to the extent of recovery and this GL is credited.

This GL is affected when an account turns non-performing and there is a credit to the account for recovery of interest. The appropriate GL is debited to the extent of the interest recovery and this GL is credited.

This is an income type of GL.

Interest Payable

[Mandatory, Numeric, Nine]

The GL code for recording interest payable amount on accounts.

During credit interest accrual on accounts with positive balances, this GL account is credited and the interest expense GL for this product is debited.

During capitalization, entries are reversed from this GL and posted to asset/liability GL.

This is a liability type of GL.

Field Description

Field Name	Description
------------	-------------

Statement Parameters

SC Analysis Flag	[Optional, Check Box]
------------------	-----------------------

Select the **SC Analysis Flag** check box to get a split of the consolidated services charges applied on the account. The breakup can be viewed in a separate report.

Statement Frequency

[Mandatory, Drop-Down]

Select the statement frequency from the drop-down list.

It is the time frequency or interval at which the account statement should be generated.

The options are:

- Daily
- Weekly
- Fortnightly
- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

The daily, weekly and fortnightly frequency can be set at the account level.

Statement to all Inactive Accounts

[Optional, Check Box]

Select the **Statement to all Inactive Accounts** check box if the statement is to be generated for all the accounts on which no transactions have been posted during the statement cycle.

Branch Name Address Flag

[Optional, Check Box]

Select the **Branch Name Address Flag** check box if the branch name and address is to be included in the statement.

The name and the address of the branch where the CASA account for the product is opened and maintained will appear on the statement.

Year To Date Number Flag

[Optional, Check Box]

Select the **Year To Date Number Flag** check box if the generated statement must display the number of occurrence of the statement within a year, i.e., whether the statement generated is first or tenth, etc., within the duration of the year.

Account Closing Statement

[Optional, Check Box]

Select the **Account Closing Statement** check box if the statement is to be generated after the account closure procedure.

Deferred Statement Generation Day

[Mandatory, Numeric, Two]

Type the day or date of the month on which all the account statements should be generated, instead of the regular month end schedule.

Though the statements shall be generated on the deferred day, it will contain transactions only till the month end.

For the values greater than 25, the statements will be generated during

end of month runs.

Rate Change Advices

- Generate Rate Change Intimation** [Optional, Check Box]
Select the **Generate Rate Change Intimation** check box to generate the rate change intimation for accounts.
- Lead Days for Intimation** [Conditional, Numeric, Two]
Type the lead days for intimation. The advice will be generated these number of days before a future dated rate change.
This field is enabled only if the **Generate Rate Change Intimation** check box is selected.

Notice Format Parameters

- SI Failed Notice Format** [Mandatory, Numeric, Three]
Type the format in which the advice for the failure of the standing instruction execution is to be generated during the End of Day (EOD) process.
- Insufficient Funds Advice Format** [Mandatory, Numeric, Three]
Type the format in which the insufficient funds advice will be generated. An insufficient fund advice is generated at EOD if the account does not have the minimum balance.
- Tax Deduction Notice Format** [Mandatory, Numeric, Three]
Type the format in which the TDS notice will be generated. The TDS notice will be generated during EOD process if TDS is applicable and is deducted for an account.
- Reminder Plan Code** [Mandatory, Pick List]
Select the reminder plan code from the pick list.
It is the plan code for the generation of payment reminders. The advice is generated when the payment is outstanding on the account for a number of days greater than number of days specified for the generation of an advice as specified in the reminder plan code.
For more information, refer to **Reminder Plan Maintenance** (Fast Path: BAM44) option
- Minimum Arrear for Reminder** [Mandatory, Numeric, Ten]
Type the minimum amount after which reminder is generated.
Reminder will be generated only if the od limit - book balance for the account is below this amount.
- Minimum Arrear for TOD/Overline Report** [Mandatory, Numeric, Ten]
Type the minimum amount for which TOD or Overline report has to be generated.
- Credit Line**
- OD Notice Format** [Mandatory, Numeric, Three]

Type the format in which the OD notice will be generated. OD notice is generated for accounts whose balance falls within the OD limit ceiling. The system generates an advice stating that there is a balance outstanding in the customer's account.

Overdraft Notice Past Due Days

[Mandatory, Numeric, Three]

Type the number of overdraft notice past due days. A notice will be sent to the customer after the mentioned number of days after the expiry of the OD.

Limit Exp. Notice Format

[Mandatory, Numeric, Three]

Type the format in which the limit expiry notice will be generated. This notice is generated when a CASA OD limit is going to expire within the number of days specified in the **Cr Line Exp Notice Lead Days** field.

Cr Line Exp. Notice Lead Days

[Mandatory, Numeric, Three]

Type the number of credit line expiry notice lead days.

A notice will be sent to the customer before the specified number of days prior to the expiry of the credit line.

SI Advice

SI Credit Advice Format

[Mandatory, Numeric, Three]

Type the format in which the SI credit advice will be generated.

The system generates the SI credit advice for the beneficiary's account after the successful execution of the standing instructions.

SI Debit Advice Format

[Mandatory, Numeric, Three]

Type the format in which the SI debit advice will be generated.

The system generates the SI debit advice for the provider's account after the successful execution of the standing instructions.

Uncleared Funds Advance Line

Expiry Notice Format

[Mandatory, Numeric, Three]

Type the format in which the uncleared funds expiry notice will be generated.

The system will generate an advice in this format before Expiry Notice Lead days of expiry of the Advance against Uncleared funds on the account.

Expiry Notice Lead Days

[Mandatory, Numeric, Three]

Type the number of uncleared funds advance expiry notice lead days.

A notice will be sent to the customer, the specified number of days prior to the expiry of the uncleared funds advance line.

Advices for Auto Expiry Products

Generate Account Expiry Intimation

[Optional, Check Box]

Select the check box if you want the system to generate an Expiry Intimation/ Notice for the accounts opened under the product.

Lead Days for Intimation

[Conditional, Numeric, Three]

Type the number of days prior to account expiry date when a notice is to be sent to the customer.

For e.g. If the Lead Days for Intimation is set as 15 days, then the Account Expiry Intimation Advice will be generated 15 days prior to the Expiry date.

This field is enabled if the **Generate Account Expiry Intimation** check box is selected.

Exception

Exception parameters can be defined and used for reporting unusually large debit/credit transaction amounts, credit balance amounts and debit/credit movements in the accounts. These fields are not mandatory and are parameterized as per auditory.

Field Description

Field Name Description

Exception Reporting Parameters

Large Credit Transaction Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large credit transaction amount.</p> <p>Any single credit transaction in an account above the amount specified, it will be displayed in the large credit transaction report.</p>
Large Debit Transaction Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large debit transaction amount.</p> <p>Any single debit transaction in an account above the amount specified, it will be displayed in the large debit transaction report.</p>
Large Credit Balance Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large credit balance amount.</p> <p>If the credit in the book balance of any account exceeds the amount specified, it will be displayed in the large credit balances report.</p>
Large Debit Balance Amount	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large debit balance amount.</p> <p>If the debit in the book balance of any account exceeds the amount specified, it will be displayed in the large credit balances report.</p>
Large Credit Movement	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large credit variation amount.</p> <p>If there is a large credit variation in the balance of the account owing to single or multiple credits exceeds the specified value, it will be displayed in the large credit movement report.</p>
Large Debit Movement	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the large debit variation amount.</p> <p>If any large debit variation in the book balance owing to single/multiple debits in any account exceeds the value specified, it will be displayed in the large credit movement report.</p>
Insignificant Balance	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the insignificant credit balance amount.</p> <p>If any account has a credit balance that is less than the amount specified, then those accounts will be displayed in the insignificant balances report.</p>
Min. Bal. for Dorm Rep.	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the minimum balance for dormancy report.</p> <p>The minimum balance below the amount specified in this field will be considered for report generation for dormant accounts.</p> <p>The system will include all accounts under this product in the Dormancy Report when the balance in the dormant account is more than this minimum balance.</p>
Large Balance	<p>[Mandatory, Numeric, 13, Two]</p>

Type the large balance.

It is the upper limit of a balance which an account can have.

If the large balance is modified at the product level, the new limit will be applicable for new accounts under that product and for existing accounts the old limit will be applicable.

Window Period For Large Balance In Days

[Mandatory, Numeric, Three]

Type the number of days for which large balance in an account can be exceeded.

If the window period is modified it is applicable for the new accounts opened under that product and existing accounts will continue to have old window period.

Common

Field Description

Field Name **Description**

Advertising Message	<p>[Optional, Alphanumeric, 72]</p> <p>Type an advertising message.</p> <p>The message serves as the marketing slogan for the product and gets printed on all the customer advices under that particular product.</p>
TDS Flag	<p>[Conditional, Check Box]</p> <p>Select the TDS Flag check box if tax is deducted at source. All the accounts opened under this product will be subjected to TDS if the flag is checked.</p> <p>This field is enabled if the CASA option is selected in the Product Classification field.</p>
Tax Currency	<p>[Conditional, Drop-Down]</p> <p>Select the tax currency from the drop-down list.</p> <p>This field is enabled only if TDS flag is selected. This is the currency in which tax is remitted from the account.</p>
Rounding Method for TDS	<p>[Optional, Drop-Down]</p> <p>Select the rounding method from the drop- down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Raise • Cutoff • Round
Nearest Amount to Round for TDS	<p>[Optional, Drop-Down]</p> <p>Select the appropriate nearest amount to round from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 1 • 10 • 100 • 1000
Expiry Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the expiry date for the product from the pick list.</p> <p>No new accounts can be opened under the product once it has expired. The existing accounts can continue to exist even after product expires.</p>
Funds Utilization Sequence	<p>[Mandatory, Drop-Down]</p> <p>Select the sequence of fund utilization from the drop-down list.</p> <p>It is a combination of six values representing following meaning:</p> <ul style="list-style-type: none"> • B - Funds from Available balance excluding OD limit/lines • O -Funds from OD Limit • S - Funds from Sweep-in

- A - Funds from Advance against unclear funds
- T - Funds from Temporary Over Draft (TOD)
- V - Funds from Overline

Withdrawals Allowed	<p>[Optional, Numeric, Five]</p> <p>Type the maximum number of withdrawals allowed in a month. Customer originated debits to an account done by cash or cheque or any other transaction will affect this counter.</p>
Stop Interest Accrual at Dormancy	<p>[Optional, Check Box]</p> <p>Select the Stop Interest Accrual at Dormancy check box to stop the interest accrual once the account becomes dormant.</p>
PDC Plan Code	<p>[Mandatory, Pick List]</p> <p>Select the post dated cheque (PDC) plan code from the pick list.</p>
Document Plan Code	<p>[Optional, Pick List]</p> <p>Select the document plan code to be attached to the CASA product from the pick list.</p>
Dormancy Transfer Unit	<p>[Mandatory, Drop-Down]</p> <p>Select the dormancy transfer unit from the drop-down list.</p> <p>It is the unit in which the dormancy transfer value should be read.</p> <p>The options are:</p> <ul style="list-style-type: none"> • M - Month • Y - Year • D - Day
Dormancy Transfer Value	<p>[Mandatory, Numeric, Three]</p> <p>Type the number of dormancy transfer units after which an account will be converted to a dormant account.</p> <p>An account becomes dormant after a specified period if no transactions are performed on an account by the customer within that period.</p>
Unclaimed Transfer Value	<p>[Mandatory, Numeric, Three]</p> <p>Type the number of unclaimed transfer units.</p> <p>A dormant account will be closed and the balance will be transferred to the Unclaimed Deposits GL account after the unclaimed transfer period. The unclaimed transfer value is inclusive of the dormancy transfer value. For example,</p> <ul style="list-style-type: none"> • Dormancy transfer unit – Months • Dormancy transfer value – 3 • Unclaimed transfer value – 6 <p>The customer opens an account on January 1 2004. He does not perform any transactions on the account. The system will change the status of the account to dormant on March 31, 2004. The system will close the account and transfer the balance of the account to the Unclaimed Deposits GL on</p>

June 30, 2004.

Dormancy Lead Days [Mandatory, Numeric, Three]
Type the number of days that forms the basis of identification of accounts prior to dormancy.
The system uses this value in validating the dormancy period at the product level, i.e., the user will not be able to maintain at the product level a dormancy period which is lesser than these lead days.

Asset Classification Preferences

This section is enabled if the Asset option is selected in the Product Type drop-down list.

Preferences Plan Code [Mandatory, Pick List]
Select the preferences plan code, which will be applicable to the product, from the pick list.
A preference plan code of the classification preferences, determines the preference set for the product with respect to CRR movement, provisioning and claw-back.

Secured Classification Plan Code [Mandatory, Pick List]
Select the secured classification plan code from the pick list.
The asset classification plan codes are defined in the **Asset Classification Plan Maintenance** (Fast Path: ACM05) option.

NPL Approp. Seq [Mandatory, Character, 16]
Type the sequence which will be used for appropriation if the account is in non performing stage.
The sequence defined will be defaulted to the account level.

Unsecured Classification Plan Code [Mandatory, Pick List]
Select the unsecured classification plan code from the pick list.
The asset classification plan codes are defined in the **Asset Classification Plan Maintenance** (Fast Path: ACM05) option.

Auto Expiry of Account

Auto Expiry of Account Flag [Optional, Check Box]
Select the **Auto Expiry of Account Flag** check box for maintaining approval date as well as expiry date for below accounts.

Default Expiry Period [Conditional, Numeric, Three]
Type the default expiry period for the product created.
This field is enabled if the **Auto Expiry of Account Flag** check box is selected.

Maximum Expiry Period [Conditional, Numeric, Three]
Type the maximum period for which the product can be extended.
This field is used to maintain the maximum effective period for temporary account and maximum postponed period for FCY cash and FCY remittance product class accounts. Expiry date can be extended multiple

times within the maximum term of expiry. This value should be greater than the default expiry period.

This field is enabled if the **Auto Expiry of Account Flag** check box is selected.

Field Description

Field Name	Description
------------	-------------

Installment Amount

- | | |
|-------------------------------|--|
| Minimum | [Mandatory, Numeric, 13, Two]
Type the minimum amount per installment for the accounts under the product. |
| Maximum | [Mandatory, Numeric, 13, Two]
Type the maximum amount per installment for the accounts under the product. |
| Incremental | [Mandatory, Numeric, 13, Two]
Type the incremental amount per installment for the accounts under the product. |
| Maximum Deposit Amount | [Mandatory, Numeric, 13, Two]
Type the maximum amount of deposit defined for the RD account. |

The total sum of all installment amounts should not be greater than this value.

Drawdown Instructions

Drawdown Execution for Holiday due dates on

[Mandatory, Drop-Down]

Select the drawdown day, in case the drawdown execution day is a holiday, from the drop-down list.

The options are

- Next Working Day
- Previous Working Day

Max. No. of Retries

[Mandatory, Drop-Down]

Select the maximum number of retries

[Mandatory, Numeric, Three]

Type the maximum number of retries allowed. The maximum number of retries which should be undertaken by the system in event of drawdown failure.

Term Parameters

Term Unit

[Mandatory, Drop-Down]

Select the unit of term of the RD from the drop-down list.

The options are:

- Month
- Year
- Week

Min Term

[Mandatory, Numeric, Three]

Type the minimum number of term units allowed for the accounts under the product.

Max Term

[Mandatory, Numeric, Three]

Type the maximum number of term units allowed for the accounts under the product.

Minimum Lock-in Period

[Mandatory, Numeric, Three, Drop-Down]

Type the minimum lock-in period and select the lock-in period unit from the drop-down list.

This parameter will be referred when premature RD account closure will be initiated. If this parameter is non-zero term, then it will not allow to prematurely close the RD account before this term.

The options are:

- Daily
- Monthly

Other RD Parameters

Installment Frequency

[Mandatory, Drop-Down]

Select the installment frequency of RD from the drop-down list.

The options are:

- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly
- Weekly
- Bi-Weekly

Number of Missed Payments Allowed

[Mandatory, Numeric, Two]

Type the number of missed payments allowed for an account.

This should be a positive value. Account holder can miss the installment only once, which can be paid only in the next month. If more than one installment is missed , then the account will be marked as default.

When to Calc and Deduct Tax

[Mandatory, Drop-down]

Select the value for when to calculate and deduct the tax from the drop-down list.

The Options are:

- On Maturity : Tax is calculated and deducted at the time of maturity.
- At Withdrawal : Tax is calculated and deducted at the time of withdrawal/redemption.

Once set , this field is non-modifiable.

Rest Period Basis

[Conditional, Drop-Down]

Select the rest period basis from the drop-down list.

The options are:

- Anniversary: Anniversary is supported in IBA and EAB type of Maturity Value computation.
- Calendar: Calendar is supported in RBTT type of Maturity computation.

This field gets defaulted to **Anniversary** option when the **Flexible RD** option is selected in the **Interest Calculation Method** field.

Partial payment allowed

[Conditional, Check Box]

Select the **Partial payment allowed** check box to enable the payment of an installment amount different from the regular outstanding installment amount and penalty.

The payment made will be applied to due installments if it is sufficient to knock off one full installment or else it will be treated as advance payment.

	<p>This field gets disabled if the Flexible RD option is selected in the Interest Calculation Method field.</p>
Holiday Grace Days Facility	<p>[Conditional, Check Box]</p> <p>Select the Holiday Grace Days Facility check box to enable the system not to charge penalty if installment due date is a holiday and customer makes payment on next working day.</p> <p>If the check box is not selected, then the system will charge penalty as per the grace day's parameter of the product.</p> <p>This field gets disabled if the Flexible RD option is selected in the Interest Calculation Method field.</p>
Interest Calculation Method	<p>[Conditional, Drop-Down]</p> <p>Select the method of interest calculation from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Actual - The interest will be computed on the actual balance • Expected - The interest calculation will not look at the actual balance and will compute interest on the scheduled expected balance • Flexible RD - This calculation method is used for Savings/TPD Plan products
Penalty Calculation Basis	<p>[Conditional, Drop-Down]</p> <p>Select the criteria based on which penalty will be calculated from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Online: Online is supported only for EAB type of Maturity value computation • A/c Closure • None - By default this option will be displayed if the Flexible RD option is selected in the Interest Calculation Method field.
Maturity Value Routine	<p>[Conditional, Drop-Down]</p> <p>Select the maturity value routine, to be used to compute the maturity value of the RD, from the drop-down list.</p> <p>By default None option will be displayed if the Flexible RD option is selected in the Interest Calculation Method field.</p>
Penalty Rate-Control Flag	<p>[Conditional, Drop-Down]</p> <p>Select the penalty rate-control flag from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Fixed: Fixed penalty rate allowed for EAB type of maturity value computation. • Floating: Floating penalty rate allowed for IBA and RBTT type of maturity value computation.
RD Matured GL	<p>[Mandatory, Numeric, Nine]</p>

	Type the GL account number to which the RD amount is transferred after maturity.
Penalty Income GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the GL account number to which the penalty amount is transferred after maturity.</p> <p>This field is not applicable if the Flexible RD option is selected in the Interest Calculation Method field.</p>
Extend Maturity On Late Payment	<p>[Optional, Check Box]</p> <p>Select the Extend Maturity On Late Payment check box if the maturity date of the accounts falling under this product is to be extended by one installment frequency from the date of payment, in case the last installment payment happens after the grace period. This is applicable in case the last installment is paid late.</p> <p>e.g. for a recurring deposit of 12 months having the last monthly installment on 15.12.2008 and maturity on 15.01.2009, if number of grace days is three, the customer can make a payment up to 18.12.2008 (within the grace period), without affecting the date of maturity. In case the customer pays the last installment on 20-12-2004, then the maturity date will be extended by one installment frequency from the date of last installment paid. Here the maturity date will be extended to 20-01-2005.</p>
Compounding Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the compounding frequency for RD interest from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None / At Maturity: If this option is selected, interest is computed using simple formula of computation. • Monthly: If this option is selected, interest is compounded to balance base.
PMI Allowed	<p>[Optional, Check Box]</p> <p>Select the PMI Allowed checkbox if the system is expected to calculate Post Maturity interest on the matured RD accounts opened under the product.</p>
PMI Index Code	<p>[Conditional, Pick List]</p> <p>Select the PMI index code from the pick list.</p> <p>This field is enabled if the PMI Allowed check box is selected.</p>
PMI Expense GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the PMI expense GL code.</p> <p>This field is enabled if the PMI Allowed check box is selected.</p>
PMI Accrual Basis	<p>[Conditional, Drop-Down]</p> <p>Select the PMI accrual basis, for the accounts opened under this product, from the drop-down list.</p> <p>Oracle FLEXCUBE Retail supports six accrual basis.</p>

The options are:

- EURO30 /360 –The number of days in a month are always 30 and number of days in a year are always 360 except for February. For February, actual numbers of days are taken in to consideration while the denominator remains as 360.
- US30/360 – Always 1/12 for any month.
- Actual/Actual – Actual number of days in a calendar month / actual number of days in a year.
- Actual/360 - The number of days in a month is the actual number of days of the calendar month and the number of days in the year is 360.
- EURO30/Actual - If normal month then 30/No of Days in Year. If month is February then No of Days in February/No of Days in Year
- US30/Actual – Number of days in any month =30 and number of days in a year = actual number of days in the year. Refer Example 6.
- Actual/365 - The number of days in a month is the actual number of days of the calendar month and the number of days in the year is 365.

PMI Routine

[Conditional, Drop-Down]

Select the PMI routine from the drop-down list.

This is PMI routine for calculation of PMI interest.

This field is enabled if the **PMI Allowed** check box is selected.

Flexible RD Parameters

This tab is enabled only if the Recurring Deposit option is selected from the Product Classification field.

Field Description

Field Name	Description
------------	-------------

Deposit Details

Initial Deposit

[Mandatory, Numeric, 13]

Type the initial deposit amount which will be equivalent to the gift value.

The deposit amount cannot be negative or a decimal value.

This field is applicable for Savings Plan Product only, which will have a gift facility.

The user will have to define different products for different gifts as the Initial deposit amount will vary according to different gifts.

For example, the user can define a Savings Plan product for a Motorcycle which is a Gift. Then he will name the product as Savings Plan Motorcycle Scheme and will define the Minimum Initial Deposit as 15 Mio which is equivalent to the value of Motorcycle.

For TPD Plan product, initial deposit amount will not be defined i.e. it

will be zero.

Variable Deposit Allowed

[Optional, Check Box]

Select the **Variable Deposit Allowed** check box if the variable deposit is allowed for the accounts opened under the product.

Withdraw Details

Maximum Withdrawal Amount

[Mandatory, Numeric, 13]

Type the maximum amount which a customer can withdraw, during every early part redemption.

The amount cannot be negative or a decimal value.

No of Withdrawals Per Year

[Mandatory, Numeric, Two]

Type the number of withdrawals allowed for a product during the term.

The term will be counted from the anniversary date of the account opening.

Penalty Routine

[Display]

This field displays the penalty routine for the Flexible RD products.

Maturity Details

Maturity Routine

[Mandatory, Drop-Down]

Select the maturity routine for flexible RD accounts from the drop-down list.

Maturity Action

[Mandatory, Drop-Down]

Select the maturity action for savings / TPD plan account from the drop-down list.

The options are:

- None: If this option is selected, on the maturity of savings / TPD plan account the maturity proceeds will be credited to a matured GL. The Bank will have to manually debit this GL and remit the proceeds to the customer account
- Credit proceeds to CASA Account: If this option is selected, on the maturity of savings / TPD plan account, the maturity proceeds will be credited to the source CASA account

Automatic Closure Details

Number of Consecutive Unpaid Installment

[Mandatory, Numeric, Two]

Type the number of consecutive unpaid installments allowed for a customer, after which automatic closure will be initiated by the system.

For example:

If the number of installment defined in this field is six (assuming the installment frequency is monthly), then system will automatically close the account in the seventh month's BOD (when the customer has not paid the installments consecutively for 6 months).

Automatic Closure Action

[Mandatory , Drop-Down]

Select the action to be taken when the system initiates automatic closure from the drop-down list. Penalty will also be recovered in case of automatic closure.

The options are:

- Transfer proceeds to source CASA account: If this option is selected, on automatic closure the proceeds will be transferred to the source account and the account status will be marked as closed. If no source account is defined for any account, then the CASA account will be blocked
- Block the Account: If this option is selected, on automatic closure, the account will be blocked by the system. Interest accrual and capitalization, will continue to happen in the account. To reactivate the account again user will have to activate the account manually through the **Account Status Maintenance** (Fast Path: CHM21) option, after which normal drawdown will be initiated from the next month. In this case the customer will have to knock off all the outstanding arrears

Penalty Details

Redemption Penalty Income GL

[Mandatory, Numeric, Nine]

Type the GL account number which will account for penalty due to early part/ full redemption of flexible RD accounts.

This is a income type GL.

Interest Details

Interest Rate Control

[Mandatory, Drop-Down]

Select the interest rate control from the drop-down list.

The options are:

- Fixed
- Floating

8. Click the **Ok** button.
9. The system displays the message "Record Added...Authorization Pending..Click Ok to continue". Click the **Ok** button.
10. The savings and checking product master is added successfully once the record is authorised.

Example 1: Different Types of Balance Bases accepted in CASA

Credit Interest : 12%

Say the balances for the month for an account are as follows:

2	200
3	300
4	400
5	450
6	375
7	225
8	100
9	165
10	900
31	900

Balance Considered for interest Calculation under different bases:

Daily Balance

Interest calculation for these sample 31 days is = $((150 * 1 * 12) / (365 * 100) + (200 * 1 * 12) / (365 * 100)) \dots \dots$ for all days

Monthly Minimum:

Start Day = 11th End Day = 6th

Minimum of all balances within above period : 150 (day 1)

Interest calculation for these sample 31 days is = $((150 * 31 \text{ days} * 12) / (365 * 100))$

Average Daily Balance:

Average Balance for the 31 days = 395.6

Interest calculation for these sample 31 days is = $((326.5 * 31 \text{ days} * 12) / (365 * 100))$

Example 2: Incremented and Cumulative Credit Interest Tiers.

Tier No.	Interest Index Code	In %
1	2000	10
2	3000	15
3	4000	20

In case the customer account balance is 3500 then in the case of cumulative type, the interest rate for 3500 will be 20%. In case of incremental type, the interest will be calculated as 2000 @ 10%, 1000 @ 15% and the balance 500 @ 20%.

Example 3 Credit Interest Tiers and Interest Rate Variance

Tier No.	Interest Index Code	Interest Rate Variance	Balance	Net Interest Rate
1	226	-1.50	5,000.0	10.50
2	227	2.50	50,000.0	15.00

The interest on the balances is computed on the tiered system and based on whether the interest type is incremental or cumulative. Suppose the balance in a particular account is 45,000. Then based on the tiered structure and the Tier Type the calculations will be as follows

Incremental

For first 5000, interest will be computed at the rate of 10.5 %.For the balance 40,000 the interest will be computed at the rate of 15%.

Cumulative

For the total balance of 45,000, the interest will be computed using the second tier interest rate of 15%.

Example 4: Interest Calculation at Account closure for an Account with OD facility. – Minimum OD days field.

If you set 7 days as minimum OD days and USD 100 as minimum Dr. interest to be charged. There are multiple limits as follows:

Limit 1 10,000 @15%

Limit 2 20,000 @17%

At the time of account closure the system will compare the following three values:

If the account closure is within 7 days of the first time it went OD, then the interest is calculated as follows:

Outstanding Balance X 15% X 7 = A

Actual interest will be calculated as follows: Outstanding Balance X 15% X no. of days = B

Minimum Interest setup at the product level i.e. USD 100.

The highest of the three values derived above will apply.

Example 5: Commitment Fee Waiver Limit

If the average OD utilisation is 6,000/- and the OD limit is 10,000/- and the percentage OD utilisation for Commitment Fee Waiver is 75%, then commitment fee will be charged on the unutilised amount, i.e., (10,000 – 6,000 =) 4,000/-. But if the average OD utilisation is equal to or greater than 7,500/- in the same case, then commitment fee will not be charged.

Example 6: Different Interest Accrual Methods:

Assuming a Monthly accrual cycle for interest calculation:

Start Date: 1-Feb-2000

End date: - 29-Feb-2000

Principal Base: 50000 USD

Interest rate: 15%

Accrual Method	Number of days in numerator / denominator	Calculation	Interest accrued.
Actual / actual	29 days / 366 days	$(50,000 * 29 * 15) / (366 * 100)$	594.26 USD
Actual / 365	29 days / 365 days	$(50,000 * 29 * 15) / (365 * 100)$	595.89 USD
Actual / 360	29 days / 360 days	$(50,000 * 29 * 15) / (360 * 100)$	604.16 USD
US 30 / 360	30 days / 360 days	$(50,000 * 30 * 15) / (360 * 100)$	625.00 USD
EURO 30/ 360	29 days/ 360 days	$(50,000 * 29 * 15) / (360 * 100)$	604.166 USD
US 30 / Actual	30 days / 366 days	$(50,000 * 30 * 15) / (366 * 100)$	614.754 USD
EURO 30 / Actual	29 days / 366 days	$(50,000 * 29 * 15) / (366 * 100)$	594.262 USD

As can be clearly seen there is a difference in interest calculated when different methods of accrual are used.

Example 7: Collected Balance versus Book Balance Method

Clear Balance in the account: 25,000.00

Unclear Balance on account due to Cheques deposited: 10,000.00

Hence,

Book Balance in the account at End of day: .35,000.00

Collected Balance at End of day: .25,000.00

In a Book balance product, interest would be calculated on .35,000.00 while for a collected balance product, the same would be calculated on 25,000.00.

Example 8: Accrual and Capitalisation of Credit interest

Credit Balance of a CASA Account: 100,000 Rs

Accrual Cycle: Monthly

Capitalisation Cycle: Quarterly

Interest Rate: 5 % on Actual / Actual basis

No rounding off pattern has been assumed

Date	Opening Balance of A/c	Interest Accrued	Interest Charged	Closing Balance of A/c at End of Month
1-January-2001	100,000			
31-Jan-2001	100,000	424.65	0.00	100,000
28-Feb-2001	100,000	383.56	0.00	100,000
31-Mar-2001	100,000	424.65	1232.86	11,232.36

Example 9: Debit Interest Accrual, Balance base and Charging

Overdraft limit granted to customer: Rs 16,000

OD interest Rate: 10%

Minimum Debit Interest to charge: 10 Rs

Accrual Frequency: Monthly Charging Frequency: Monthly

Date	Debit Balance of A/c	Interest Computed	Interest Charged	Closing Balance of A/c at End of Month
1-January-2001	400			
31-Jan-2001	400	3.397	10 USD	410.00
28-Feb-2001	15,000	115.06	115.06	15115.06
31-Mar-2001	15115.06	128.375	128.375	15243.43

Example 10: Overdraft, Temporary Overdraft:

OD Limit specified 25000

Index Rate for TOD 15%

Debit Interest Variance 2%

Effective TOD Interest 17%

Index Rate for Overline 20%

Variance for overline interest 2%

Effective Overline Interest 22%

Overline Interest on Overline Balance Only

If the book balance in the account is USD 40,000 Dr. and if the overline interest is to be charged on Overline amount only, then,

Amount to be considered to charge overline interest 40,000 less 25,000 : 15,000 Dr.

Hence overline interest would be charged at 22% on 15,000 Dr.

In case the overline interest is to be charged on the full amount, then 22% would be charged on 40,000 Dr.

Assuming that the OD limit expires then the entire Debit balance of the account would be charged at the effective TOD rate of 17%

Example 11: Product level Service Charges Calculation and Levy:

Month 1

Month 1 Overdraft Limit Granted to account Nil

Flag Service Charges into Overdraft Yes

Minimum Balance for A/c 400 Rs

Account Balance 100 Rs

Minimum Balance Violation SC Fixed Charge of 10 Rs

Account Balance 90 Rs

Month 2

Overdraft Granted to account 1000 Rs

Percentage Utilisation 10%

Commitment Fee 5%

Account Balance 20 Rs

Commitment Fee Charged 50 Rs

Minimum Balance Violation SC 10 Rs

Account Balance (40) Rs – as the flag SC into OD is ticked

Example 12: Dormancy and Unclaimed Processing

Dormancy Transfer Value: 3 Dormancy Transfer Units: Months

Unclaimed Transfer Value: 6 Unclaimed Transfer Units: Months

Start of Month 1: Account Opened

No Customer initiated transactions on the account.

End of Month 3: Dormancy processing. Account Status changed to Dormant

End of Month 6: Unclaimed Processing. Account closed and balance transferred to unclaimed GL.

Example 13: Calculating Account Minimum Balance:

Minimum Balance for Account: 500 Rs

Minimum Balance with ATM: 700 Rs

Minimum Balance for account with cheque facility: 620 Rs

Account Facility	Available - Y/N	Minimum Balance Required
Cheque Facility	N	500 Rs
ATM Facility	N	
Cheque Facility	Y	620 Rs
ATM Facility	N	
Cheque Facility	N	700 Rs
ATM Facility	Y	
Cheque Facility	Y	700 Rs (maximum of all balances required)
ATM Facility	Y	

Example 14: Examples of rounding:

The available methods in Interest rules set up are as follows:

- Raise – The interest amount is raised to the next higher decimal place
- Cutoff – The interest amount is truncated at the specified decimal place
- Round – The interest amount is rounded up if the decimal place is .5 or greater and rounded down if less than 0.5

Interest Amount	Rounding method	Nearest amount to round to	Rounded Amount
10095.8463	Raise	1	10095.85

		10	10095.9
		100	10096
		1000	10100
10095.8463	Cutoff	1	10095.84
		10	10095.8
		100	10095
		1000	10090
10095.8463	Round	1	10095.85
		10	10095.8
		100	10096
		1000	10100

5.4. CHM02 - Casa Interest Rate Tiers Maintenance

Using this option you can define the tier structure for debit interest, credit interest, overline and TOD can maintain the interest rate and the variances.

You can also define the minimum balance to accrue interest with effective date which will be applicable for daily balance, monthly minimum balance and average daily balance methods but only for credit interest plan. This plan is then attached to the CASA Product using the **CASA Product Master Maintenance** (Fast Path: CHM01) option.

Definition Prerequisites

- [BAM12 - Interest Index Maintenance](#)
- [BAM13 - Interest Index Rates](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the interest rate tier

1. Type the fast path **CHM02** and click **Go** or navigate through the menus to **Global Definitions > CASA > Casa Interest Rate Tiers Maintenance**.
2. The system displays the **Casa Interest Rate Tiers Maintenance** screen.

Field Description

Field Name	Description
------------	-------------

Plan Code	[Mandatory, Numeric, Five] Type the plan code of the interest rate tier.
Effective Date	[Mandatory, Pick List, dd/mm/yyyy] Select the date, from which the interest rate will be in effect, from the pick list. The effective date should be equal to or greater than the process date. This field is enabled only in Add mode.
Plan Description	[Mandatory, Alphanumeric, 72] Type the description of the plan.
Advice Required	[Optional, Check Box] Select the Advice Required check box to generate advice for the interest rate change done through this maintenance.

**Interest
Variance in**

[Mandatory, Radio Button]
Click the type interest variance.
The options are as follows:

- Absolute : If this option is selected, the variance can be defined with an absolute value.
- Percentage: If this options is selected, the variance can be defined based on the interest rate.

Types

[Mandatory, Radio Button]
Click the appropriate option for which the interest variance needs to be defined.
The options are as follows:

- Credit
- Debit
- OverLine
- TOD

**Minimum
Balance to
Accrue Interest**

[Conditional, Numeric, 13, Two]
Type the amount that has to be maintained as the minimum balance for interest accrual.

Interest will get accrued to the account only if the account balance (depends on the product parameter, i.e., book/collected balance) is greater than the minimum balance to accrue interest.

If the minimum balance to accrue interest is specified as zero in the interest plan for a particular product, the interest will be calculated and accrued for all the accounts under that product and no validation will be done for minimum balance for interest accrual.

If any back dated transaction is done on an account which has a minimum balance to accrue interest defined, then based on the effective dates for which the minimum balances were applicable, the back dated interest will be recomputed and the adjustment entries will be passed.

This field is enabled only if **Credit** option is selected in **Types**.

Column Name	Description
Tier No	[Display] This column displays the tier number which is auto-generated.
Max.Balance	[Mandatory, Numeric, 13, Two] Type the maximum balance for which the interest rate is applicable.
Index Code	[Mandatory, Pick List] Select the index code of the interest rate from the pick list.
Int. Rate	[Display] This field displays the interest rate corresponding to the index

code. It displays up to 10 digits after decimal.

Int. Variance in Absolute Value (%)

[Display]

This column displays the interest variance in absolute value. It displays up to 10 digits after decimal.

Int. Variance in Percentage (%)

[Display]

This column displays the interest variance as percentage of base rate. It displays up to 10 digits after decimal.

This field appears blank if interest variance is defined in absolute value.

Delete

[Conditional, Check Box]

Select the **Delete** check box to delete the record.

This field is disabled for the first record.

3. Click the **Add** button.
4. Select the plan code and the effective date from the pick list.
5. Enter the description for the plan.
6. Select the appropriate type of plan and enter the minimum balance to accrue interest.
7. Click the **+** button to add interest rate details.
8. Enter the maximum balance, index code and the interest variance.

5.5. CH099 - CASA Multi Currency Product Package Definition

Multi currency package is a logical grouping of product codes having same product type but different currencies. Different packages can be created using the same product type code. Each package can have a list of product codes which are cross referenced to the product type selected.

Using this option you can create a CASA multi-currency package for each product type. You can facilitate the automatic account opening (based on certain validations like existence of active accounts under the **IBAN**⁴ etc.) when an incoming payment or fund transfer credit through Internet Banking and credit to CASA through Internet banking (IBS) option is initiated i.e. the product code is selected based on this option at the time of automatic account opening.

Only one product under one MCA package is maintained.

Definition Prerequisites

- [BA524 - Product Code - Product Type Cross Reference](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry.

To add CASA multi currency package for a product type

1. Type the fast path **CH099** and click **Go** or navigate through the menus to **Global Definitions > Master > CASA Multi Currency Product Package Definition**.
2. The system displays the **CASA Multi Currency Product Package Definition** screen.

CASA Multi Currency Product Package Definition

⁴(International Bank Account Number: It is a unique account number that is used to identify a customer's account in a financial institution internationally.)

5.6. CHM12 - Loan Linked OD Parameter

The above screen is required to be maintained for Loan Linked OD functionality. In this functionality, a Loan account is created automatically for the outstanding Debit balance in the CASA OD account during the batch processing. The Loan account is disbursed and gets credited to the CASA OD account to make the balance of the CASA OD account as '0' (zero). This screen will store the details required during batch processing for automatic Loan account opening. The CASA product will be the unique key in this screen. A Loan product and the required schedule code and rate chart codes are maintained here. During the batch processing, the system will create a new loan account in the loan product as defined in the above screen for the respective debit balance in the CASA account. During the loan account opening the entered schedule code and the rate chart codes gets linked to the Loan account created.

Definition Prerequisites

- [CHM01 - CASA Product Code](#)
- [LNM11 - Loan Product Code](#)

Modes Available

Add By Copy, Add, Cancel, Amend, Authorize.

To modify loan linked OD parameter

1. Type the fast path **CHM12** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Other Transactions > Loan Linked OD Parameter**.
2. The system displays the **Loan Linked OD Parameter** screen.

Field Description

Field Name

Description

CASA Product Code

[Mandatory, Pick list]

The Pick List will show the Asset type of CASA products for which the "Loan Linked OD" flag is checked in CHM01. The CASA Product for which the Loan Linked OD parameters are to be maintained.

For a CASA Product only one record can be maintained.

Presently only Lcy CASA Products should be selected.

CASA Product Code (Description)	[Display] This field displays the CASA Product description.
Currency	[Mandatory, Output] This field displays the CASA Product currency.
Loan Product Code	[Mandatory, Pick list] The Pick List will show the Loan products for which the "Open" flag at LNM11 is checked.. The Loan product under which the Loan accounts to be opened as a part of Loan Linked OD processing. The Pick List will show the Loan products for which the "Accounts to be opened in Post Maturity Stage" flag at LNM11 is checked. The CASA and Loan Product currency should be same. Presently only Lcy Loan products should be selected.
Loan Product Code (Description)	[Display] This field displays the Loan Product description.
Currency	[Mandatory, Output] This field displays the Loan Product currency.
Schedule Code	[Mandatory, Numeric, 3] The Pick List will show the schedules attached to the product. Schedule code to be attached to the accounts opened under this loan product is shown here.
Schedule Code (Description)	[Display] This field displays the schedule code description.
Rate Chart Code	[Mandatory, Pick list] select the Rate Chart code to be attached to the Accounts opened under this loan product.
Rate Chart Code (Description)	[Display] This field displays the Rate Chart Code.

3. Click the **Add** radio button to add the record.
4. Click the **Ok** button
5. The system displays the message "Record Added... Authorization Pending". Click the **OK** button.

6. TD Definition

A Term Deposit is a deposit of money placed by the customer with the bank, repayable on a certain date. Pre-agreed interest may be payable at regular intervals during the term of the deposit or at maturity. The TD product master, product rates and TD bank parameters are maintained under the TD definition.

6.1. TDM04 - TD Bank Parameters Maintenance

Using this option bank level parameters for Term Deposits are maintained. These parameter will regulate transactions involving penalties and GLs.

Two important entities that are defined in **TD Bank Parameters Maintenance** are:

- **Suspense General Ledgers:** General Ledger entries are automatically passed in **Oracle FLEXCUBE**. However, in certain exceptional cases, the system fails to pass the GL entries automatically. In such cases, GL posting is done automatically by the system into the suspense GLs defined at the bank parameter level. The bank would have to manually reconcile these GLs.
- **Penalty Interest Parameters:** The penalty interest rate values will be derived from the **Bank Parameters Maintenance** if the penalty interest rate to be charged has been defined as **Bank Level** while defining the product. You can specify an interest index and a variance that has to be levied as penalty at the account level.

Penalty applicable due to partial withdrawal can be done in two ways for all TD products at the bank level namely

- **Absolute Method -** The absolute penalty can be defined as a fixed rate or floating rate. Fixed interest rate is defined in 'Net Penalty Interest Rate' field. Floating interest rate is defined by selecting the corresponding interest index code in 'Net Penalty Index' field.
- **Incremental Method –** Penalty can be defined as reduction in applicable TD interest rate. This reduction can be either in the form of variance as defined in 'Incremental Penalty Interest Variance' or index code as defined in 'Incremental Penalty Index'. The standard penalty routine uses the incremental method.

Definition Prerequisite

- [BAM08 - Bank Master Maintenance](#)
- [GLM02 - Chart of Accounts](#)

Modes Available

Add By Copy, Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add bank parameter

1. Type the fast path **TDM04** and click **Go** or navigate through the menus to **Global Definitions > TD > TD Bank Parameters Maintenance**.
2. The system displays the **TD Bank Parameters Maintenance** screen.

Field Description

Field Name	Description
Bank Code	[Mandatory, Numeric, Three] Type the bank code. It is a unique number assigned to the bank.
GL Details	
Branch Suspense Credit GL	[Mandatory, Numeric, Nine] Type the branch suspense credit GL. Any credit suspense entry, if generated, will be logged in this GL.
Branch Suspense Debit GL	[Mandatory, Numeric, Nine] Type the branch suspense debit GL. Any debit suspense entry, if generated, will be logged in this GL.
Replacement Cost	[Optional, Check Box]

Application	Select the Replacement Cost Application check box to apply the replacement cost.
Stamp Duty Tax Applicable	[Optional, Check Box] Select the Stamp Duty Tax Applicable check box to apply the stamp duty tax.
Multi Currency Account(MCA) Operation	[Optional, Check Box] Select the Multi Currency Account(MCA) Operation check box to allow MCA operations.
DST Contra GL	[Conditional, Numeric, Nine] Type the GL to which Documentary stamp tax payable to BIR is posted. This is a asset type of GL and available in the currency of TD account. This field is enabled only if the Stamp Duty Tax Applicable option is selected.

Interest Rate Details

Incremental Penalty Interest Variance	[Mandatory, Numeric, Two, 10] Type the incremental penalty interest variance. This is the incremental penalty variance applicable on the TD interest rate. This will be a fixed variance. This field displays value of up to 10 digits after decimal. At the product level if the Penalty Rate to Use field is defined as Bank Level and the Penalty Routine calculation refers to the incremental penalty interest rate then it overlooks the net penalty interest rate and penalty is calculated as follows : <i>Penalty Interest Rate (applicable) = Interest Rate (at the account level) - Net Incremental Penalty Interest Variance</i> The Incremental Penalty Interest Variance should be less than 100.
--	---

Incremental Penalty Index	[Mandatory, Pick List] Select the incremental penalty index code from the pick list. This field displays value of up to 10 digits after decimal. The system populates the net incremental penalty rate in the adjacent field, after adding the incremental penalty variance to the incremental penalty index. At the product level if the Penalty Rate to Use field is defined as Bank Level and the Penalty Routine calculation refers to the incremental penalty interest rate then it overlooks the net penalty interest rate and penalty is calculated as follows: <i>Penalty Interest Rate (applicable) = Interest Rate (at the account level) - Net Incremental Penalty Interest Rate</i> For example, the interest rate at the account level is defined as 6% and incremental penalty interest variance at the bank level is defined as 1%. In this case, 5% rate will be applicable for the account, if the deposit is broken prematurely. <i>Penalty Interest Rate (applicable) = Interest Rate (at the account level) -</i>
----------------------------------	--

Net Incremental Penalty Interest Rate

For example, the interest rate at the account level is defined as 6% and incremental penalty interest variance at the bank level is defined as 1%. In this case, 5% rate will be applicable for the account, if the deposit is broken prematurely.

Net Penalty Interest Rate

[Mandatory, Numeric, Three, 10]

Type the net penalty interest rate variance.

It is the absolute penalty interest, irrespective of the TD interest rate.

The Net Penalty Interest Rate should be less than or equal to 100..This field displays value of up to 10 digits after decimal .

Net Penalty Index

[Mandatory, Pick List]

Select the net penalty index from the pick list.This field displays value of up to 10 digits after decimal.

The system populates the net penalty rate in the adjacent field, after adding the net penalty interest rate variance to the net penalty index.

At the product level, if the **Penalty Rate to Use** field is defined as **Bank Level** and the **Penalty Routine** calculation refers to the net penalty interest rate then it overlooks the incremental penalty interest rate.

For example, if the net penalty index is defined as 5% then net penalty index applicable for the deposit is 5%.

Use of TD Calendar for Maturity

[Optional, Check Box]

Select the **Use of TD Calendar for Maturity** check box to use the TD calendar if the TD maturity date falls on a holiday.

Adjusted Maturity Day in case of Holiday

[Conditional, Drop-Down]

Select the adjusted maturity day, if the TD maturity date falls on a holiday, from the drop-down list.

This field is enabled when the **Use of TD Calendar for Maturity** check box is selected.

The options are:

- Previous
- Next

Variance for Penalty

[Mandatory, Numeric, Two, 10]

Type the variance in percentage for the penalty.

The user can modify the penalty amount to the percentage as defined.

If there is no increase or decrease in the penalty, the input here has to be zero.

The penalty variance should be less than 100.This field displays value of up to 10 digits after decimal

Update Rate of Interest at EOD on Renewal

[Optional, Check Box]

Select the **Update Rate of Interest At EOD on Renewal** check box to update the rate of interest of all the deposits force renewed, auto renewed or opened at BOD to the treasury rate upload by the bank for

the current date. TD statements/advices will be generated at EOD for all the deposits renewed/opened at BOD with the correct interest rates.

Account Manager Maintenance at

[Mandatory, Drop-Down]

Select the account manager maintenance at from the drop-down list. The options are: - Any Level - MCA Level - Sub Account Level - Deposit Level It governs the maintenance behavior of account managers and replication of account managers incase of batch transactions resulting in opening of new accounts or deposits.

Note: The **Use of TD Calendar for Maturity** and **Adjusted Maturity Day in Case of Holiday** fields are enabled only in the **Modify** mode.

3. Click the **Add** button.
4. Enter the bank code and press the **<Tab>** key.
5. Enter the GL details and the interest rate details.

6.2. TDM01 - TD Product Master

TD product encapsulates all the attributes of the product introduced by the bank.

Using this option, once the product is defined, it enables you to open new accounts under the same product. The account pertaining to a product automatically inherits the specified product attributes. However, you can make changes at the account level to offer special privileges to the customer.

The graphical representation of the product flow is given below.

TD product master comprises of General Parameters, Deposit Term Parameters, Interest Rates Parameters, Redemption Parameters, Maturity Parameters, GL Code Parameters, Advices Parameters, Interest Payout Parameters, Denomination details and Special features.

Field Description

Field Name	Description
------------	-------------

General Parameters

Product Name	[Mandatory, Alphanumeric, 35] Type the product name. Product name can be the schemes introduced by the bank. The same product name appears on the bank statement or deposit certificate. Two different products can have the same product name. These products can be distinguished by the product code.
---------------------	---

Discounting Type	[Mandatory, Drop-Down] Select the discounting type for the TD product from the drop-down list. The options are:
-------------------------	---

- **Not Discounted** - The initial amount is deposited and interest is calculated on the deposit amount.
- **Normal Discounted** – In normal discounted deposit, the maturity

amount is defined along with the interest rate and the initial amount is deposited. Only the principle amount is discounted. Maturity value is decided based on the interest calculation.

- **True Discounted** - In true discount even the interest, which will be received, will be discounted further and reduced from the initial deposit amount of the normal discounted TD.

Tax Deduction at Source Flag

[Mandatory, Drop-Down]

Select the TDS flag for TD product from the drop-down list.

This flag determines the instance depending on which, the tax should be deducted from the interest earned on the TD.

- **No Tax** - No TDS will be deducted from the accounts opened under this product.

If the account is opened under this particular product for the **Customer Type - Resident** and the **TDS flag** is set to **No Tax**, even though the **Tax Code** is defined at the **Customer** level, no tax will be deducted from the account.

- **Accrual** - TDS will be calculated and deducted, on every interest accrual for an account.
- **Compounding** - TDS will be deducted whenever the computed interest is added to the principle amount.
- **PayOut** - TDS will be deducted at the time of interest payment to the customer, i.e., when the date becomes due, and not at the event of payment to the customer. Accordingly entries will be automatically made in the Payable GL
- **Withdrawal** - TDS will be deducted at the time of interest withdrawal. For example, if **Interest Payout** instruction is given as **Transfer to CASA**, there will be no time lag and the interest amount after tax deduction will be credited to the savings account at the time of interest payout. If **Interest Payout** instruction is given as **Cash**, the net amount will be given to the customer, when he personally comes to collect the proceeds, from which tax will already be deducted on the due date.

TDS rate depends on the customer type and product customer tax codes cross reference, maintained in the global parameters.

In Tax parameter maintenance TDS06, it is possible to specify if the tax needs to be calculated at the customer level or account level.

Once added, this field cannot be modified or amended.

Lien Allowed

[Mandatory, Drop-Down]

Select the lien allowed for the TD product from the drop-down list.

Lien means placing a hold on the deposit when the bank wants to provide credit to the customer against the same or for a court case on the customer or for any reason where the bank wants to hold on to the deposit and ensure customer does not encash.

For example, a customer wants 75,000 as loan. The bank may ask for 25% margin on loan, as security. The customer needs to place the time deposit of 1,00,000 as a security or collateral against the loan. Thus the TD of 1,00,000 is marked for lien.

Lien can be marked on the following amounts:

- **Principal** - Lien can only be imposed on the principal portion of the deposit.
- **Principal + Interest** - Lien can be imposed on the cumulative value of the principle and interest accrued and compounded till now.
- **Maturity** - Lien can be imposed up to the maturity amount of the deposit. This means applying lien for the interest portion, which is yet to be accrued and compounded.
- **None** - No lien will be allowed on such TD products.

Once added, this field cannot be modified or amended.

Product Expiry Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the product expiry date from the pick list.

This expiry date is required to be set up by you, at the time of initial product definition. You cannot open new accounts under the product, after the expiry date. But accounts existing under the product will continue to function normally.

History Retention Days

[Mandatory, Numeric, Four]

Type the history retention period in days.

Tax Currency

[Conditional, Drop-Down]

Select the tax currency for the TD product from the drop-down list.

The tax will be deducted in the account currency, but will be remitted in the tax currency.

This field is disabled when the **Tax Deduction at Source flag** is set to **No Tax**.

Accrual Frequency

[Mandatory, Drop-Down]

Select the accrual frequency for the TD product from the drop-down list.

This specifies the time interval at which, the interest for a deposit will get accrued or accumulated.

The options are:

- Daily
- Weekly
- FortNightly
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly

For example, if **Accrual Frequency** is defined as **Daily**, then the system will compute the interest every day, for all the deposits under this product.

Once added, this field cannot be modified or amended.

Accrual Start Month	<p>[Conditional, Drop-Down]</p> <p>Select the accrual start month of the TD product from the drop-down list.</p> <p>The user needs to specify the start month, in case the Accrual Frequency is Bimonthly, Quarterly, Half Yearly or Yearly.</p> <p>This field is disabled if Accrual Frequency is selected as Daily.</p> <p>Once added, this field cannot be modified or amended.</p>
PMI Accrual Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the post maturity interest accrual frequency, for a TD product, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None • Daily • Weekly • Monthly • Quarterly • Half-Yearly • Yearly
Account Retention Days	<p>[Mandatory, Numeric, Three]</p> <p>Type the account retention days.</p> <p>These are the number of days, for which an initiated TD account will be retained without a payin happening for the same. If the payin does not happen within the specified period, then the TD deposit will be closed during the EOD process on the last retention day.</p> <p>Once added, this field cannot be modified or amended.</p>
Advertising Message	<p>[Mandatory, Alphanumeric, 72]</p> <p>Type the advertising message for the TD product.</p> <p>It will be used for the purpose of product promotion. The user can modify this message, to suit the product promotion strategy of the bank. This message will be printed on the statement, sent to the customers.</p>
Credit Interest Parameter	<p>[Mandatory, Drop-Down]</p> <p>Select the parameter for calculation of interest from the drop-down list.</p> <p>If payin is done through cheque, the interest can be calculated either from the posting date or value date of the cheque.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Posting Date • Value Date
Lead Days for Notice (Call Deposit)	<p>[Conditional, Numeric, Three]</p> <p>Type the number of lead days before which the customer should inform the bank for redemption (partial/ full) from a Call Deposit account.</p>

Example: If the value in this field is 7, then all the accounts/ deposits opened under this TD product will have to give a notice of 7 days for redemption (partial/ full).

This field is enabled if the **Call Deposit (No Maturity)** option is selected in the **Class** drop-down list.

Disallow Multiple Deposit Creation

[Optional, Check Box]

Select the **Disallow Multiple Deposit Creation** checkbox to disallow multiple deposit creation for a TD account.

In case of premature closure with partial renewal, auto renewal/ force renewal or online redemption system will not validate this checkbox.

Allow Top-up Pay-in

[Conditional, Check Box]

Select the **Allow Top-up Pay-in** check box to allow pop-up pay in.

This field is enabled if **Disallow multiple deposit creation** check box is selected. Top-up pay-in into the existing deposit will only be allowed up to the extent of maximum amount parameterise at the TD product-level.

In case of a normal payin, if multiple deposit is allowed at the product-level new deposit will be opened, if the multiple deposit is not allowed the pay-in will not be allowed to the existing deposit. In case of top-up pay-in, the deposit amount for the top-up pay-in will be added to the existing deposit.

Field Description

Field Name	Description
------------	-------------

Amount

Minimum

[Mandatory, Numeric, 13, Two]

Type the minimum amount that can be accepted as deposit under this product.

The system displays an error message if the TD deposit is being opened with a balance less than the amount defined in this field.

Partial redemption will not be allowed if the balance is below the value, defined in this field. In this case, the full amount has to be redeemed. After redemption, the balance in the account should be equal to or greater than the minimum balance.

For example, for a deposit of 50,000 the minimum balance is defined as 5000. The customer wants to redeem 47,000. The system will not allow the customer to redeem an amount more than 45,000. He has to redeem either an amount less than 45,000 or 50,000, i.e., the full amount.

Once added, this field cannot be modified or amended.

Maximum

[Mandatory, Numeric, 13, Two]

Type the maximum amount that can be accepted as deposit under the product. The system displays an error message if the TD is being opened with a balance more than the amount defined in this field. The maximum amount can exceed, if the amount is increased due to the compounding effect.

For example, if 10000 is defined as maximum amount at the product level, no deposit greater than 10000 can be made under this product.

Once added, this field cannot be modified or amended.

Incremental [Mandatory, Numeric, 13, Two]

Type the incremental amount.

When a new deposit is made it has to be in multiples of the incremental amount, specified in this field. However this field becomes invalid for the deposits, which are being renewed.

The system renews the deposit irrespective of the incremental value defined at the product level. Any new deposit made in the new account should be in the multiple of the incremental amount.

For example, if minimum deposit allowed is 1000 and the incremental amount is 100, an account can be opened for 1000 and subsequent deposits can be made in the multiples of 100 i.e. 1100, 1200, etc.

Once added, this field cannot be modified or amended.

Terms

This section is disabled and Maximum term is defaulted as 9999 and the Term unit as Combination, if the Flexible TD (No Maturity) or Call Deposit (No Maturity) option is selected in the Class drop-down list.

Unit [Mandatory, Drop-Down]

Select the unit for specifying the term of the deposit from the drop-down list.

The options are:

- **Days** – Deposit accounts will always be specified in terms of days. For example, a deposit for one year will have to be opened as 365 days.
- **Months** – Deposit accounts will always be specified in terms of months. For example, a deposit for one year will have to be opened as 12 months. The term has to be a multiple of months and a deposit cannot be opened for a period like 6 months 15 days.
- **Combination** – If the user defines the unit as Combination, the system will allow the user to set up a minimum/maximum term as a combination of months and days. For example, the user can specify 3 months and 15 days. This option provides the user maximum flexibility while opening an account.

Once added, this field cannot be modified or amended.

Minimum [Mandatory, Numeric, Four]

Type the minimum term in days and/or months. This is validated against the **Unit** field. If the unit is selected as **Months**, **Days** or **Combination**, then the system will allow you to define the minimum term only in months, days or in combination respectively.

For example, if 90 days is specified as the minimum term at the product level, a

user will be allowed to open deposits for 90 days and above for this product.
Once added, this field cannot be modified or amended.

Maximum [Mandatory, Numeric, Four]

Type the maximum term in days and/or months. This is validated against the **Unit** field. If the unit is selected as **Months, Days** or **Combination**, then the system will allow you to define the maximum term only in months, days or in combination respectively.

For example, if 365 days is specified as the maximum term at the product level, a user will be allowed to open deposits for 365 days and below for this product.

Once added, this field cannot be modified or amended.

Incremental [Mandatory, Numeric, Four]

Type the incremental term.

A deposit term has to be in multiples of the incremental term. While opening a term deposit account, the term will be validated against this field.

The deposit term and the renewal term should be in the multiples of the incremental term value defined in this field.

For example, if the minimum term is 1 month and the incremental term is 3 months, the account can be opened for a period of 1 month or in multiples of 3 months, i.e., 4, 7, 10 months.

Once added, this field cannot be modified or amended.

1st Slab

Min. Amount [Mandatory, Numeric, 13, Two]

Type the minimum amount for the 1st slab.

Slabs help banks to encourage customers to keep higher deposits for lower term and vice versa. These slabs control the deposit amount and deposit term combination that can be accepted while opening or renewing a TD account.

For each product, two slabs of minimum deposits and their corresponding minimum terms or vice versa can be defined.

The system displays an error message and partial redemption will not be allowed if the TD deposit is being opened with a balance less than this amount.

Once added, this field cannot be modified or amended.

Min. Term [Mandatory, Numeric, Four, Four]

Type the minimum term for the 1st slab.

Slabs help banks to encourage customers to keep higher deposits for lower term and vice versa.

These slabs control the deposit amount and deposit term combination that can be accepted while opening or renewing a TD account.

For each product, two slabs of minimum deposits and their corresponding minimum terms or vice versa can be defined.

Once added, this field cannot be modified or amended.

2nd Slab

**Min.
Amount**

[Optional, Numeric, 13, Two]

Type the minimum amount for the 2nd slab, if any.

Slabs help banks to encourage customers to keep higher deposits for lower term and vice versa. These slabs control the deposit amount and deposit term combination that can be accepted while opening or renewing a TD account. For each product, two slabs of minimum deposits and their corresponding minimum terms or vice-versa can be defined.

The system displays an error message and partial redemption will not be allowed if the TD deposit is being opened with a balance less than this amount.

Once added, this field cannot be modified or amended.

Min. Term

[Optional, Numeric, Four, Four]

Type the minimum term for the 2nd slab, if any.

Slabs help banks to encourage customers to keep higher deposits for lower term and vice versa.

These slabs control the deposit amount and deposit term combination that can be accepted while opening or renewing a TD account.

For each product, two slabs of minimum deposits and their corresponding minimum terms or vice-versa can be defined.

Once added, this field cannot be modified or amended.

Field Description

Field Name **Description**

Interest Rates

Minimum Rate

[Mandatory, Numeric, Ten]

Type the minimum interest rate allowed for accounts under this product. This is inclusive of the variance at the product and account level.

For example, the minimum rate is specified as 12% and the variance as -2% at the product level. While opening the account the interest for that slab is 13% and we specify the variance as -2%, the net effective rate will be 11%. The system will give an error message stating that the interest rate is not within the product parameters.

Once added, this field cannot be modified or amended.

Maximum Rate

[Mandatory, Numeric, Ten]

Type the maximum interest rate allowed for accounts under this product. This is inclusive of the variance at the product and account level.

For example, the maximum rate is specified as 14% and the variance is 2%. While opening the account the interest for that slab is 13% and we specify the variance as 2%, then the net effective rate will be 15%. The system will give an

error message stating that the interest rate is not within the product parameters.
Once added, this field cannot be modified or amended.

**Rate
Control
Flag**

[Optional, Drop-Down]

Select the rate control flag from the drop-down list.

The options are:

- **Fixed Rate:** If this option is selected, there is no change in the interest rate during the term of the account.
- **Floating Rate:** If this option is selected, the interest rate for the product can be changed during the term of the account.
- **Higher Rate:** This option is selected, only if the rate is changed during the term of the account. When the top-up pay-in is allowed this option cannot be selected.

Profit Ratio

This field is used for Islamic products.

**Interest
Variance
as**

[Mandatory, Radio Button]

Click the type of the interest variance.

The options are as follows:

- **Absolute Value:** If this options is selected then the interest variance is absolute value.
- **Percentage:** If this options is selected then the interest variance is the percentage of base rate.

**Minimum
Variance**

[Mandatory, Numeric, Three, Ten]

Type the minimum variance allowed at the account level for all accounts under that product.

For example, if the minimum variance is set as 2%, it specifies that the Account Level Variance cannot be below 2%. But the overall interest rate should be within the interest ceiling defined at the product level.

Once added, this field cannot be modified or amended.

**Maximum
Variance**

[Mandatory, Numeric, Three, Ten]

Type the maximum variance allowed at the account level for all accounts under that product.

For example, if the maximum variance is set as 2%, it specifies that the Account Level Variance cannot exceed 2%. But the overall interest rate should be within the interest ceiling defined at the product level.

Once added, this field cannot be modified or amended.

Field Description

Field Name	Description
------------	-------------

Interest Calculation

Interest Accrual Basis

[Mandatory, Drop-Down]

Select the interest accrual basis for normal period from the drop-down list.

Normal period is defined as the period between the last interest compounding / accrual / payout date (whichever is later) to the next compounding / accrual / payout date (whichever is earlier).

The interest accrual methods and their calculation characteristics are defined below:

- **Euro 30/360** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- **US 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Actual/Actual** - Actual days in a month will be taken as

numerator and actual days in a year will be taken as denominator.

- **Actual/360** - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Euro 30/Actual** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- **US 30/Actual** - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- **Actual/365** - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years. Once added, this field cannot be modified or amended.
- **CHN 30/360 - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator for normal interest accrual.**

**Interest Accrual
Basis Broken
Period**

[Mandatory, Drop-Down]

Select the interest accrual basis for the broken period from the drop-down list.

The options are:

- **Euro 30/360** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- **US 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Actual/Actual** - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- **Actual/360** - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Euro 30/Actual** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- **US 30/Actual** - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- **Actual/365** - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years.
- **CHN 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator for normal interest accrual.

The period that is less than a full payout/compounding cycle will be

taken as broken period by the system.

For example, if the account has monthly interest accrual with interest payout/compounding frequency defined as **Calendar** and the account matures on 13th of a month, then the period between 1st to 13th is the broken period.

Refer to **Interest Accrual Basis** for details of various options.

Once added, this field cannot be modified or amended.

PMI Interest Basis

[Mandatory, Drop-Down]

Select the PMI interest basis from the drop-down list.

The options are:

- **Euro 30/360** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- **US 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Actual/Actual** - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- **Actual/360** - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Euro 30/Actual** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- **US 30/Actual** - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- **Actual/365** - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years.
- **CHN 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator for normal interest accrual.

PMI Interest Component Include

[Optional, Check Box]

Select the check box if you want the PMI interest computation balance base to include the uncollected interest.

Premature Withdrawal Interest Basis

[Mandatory, Drop-Down]

Select the premature withdrawal interest basis from the drop-down list.

The options are:

- **Euro 30/360** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- **US 30/360** - 30 days
- in a month will be taken as numerator and 360 days in a year will

be taken as denominator.

- **Actual/Actual** - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- **Actual/360** - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Euro 30/Actual** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- **US 30/Actual** - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- **Actual/365** - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years.
- **CHN 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator for normal interest accrual.

**Premature
Withdrawal Interest
Basis Broken
Period**

[Mandatory, Drop-Down]

Select the premature withdrawal interest basis for the broken period from the drop-down list.

The options are:

- **Euro 30/360** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- **US 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Actual/Actual** - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- **Actual/360** - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Euro 30/Actual** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- **US 30/Actual** - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- **Actual/365** - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years.
- **CHN 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator for normal interest accrual.

Example: If the Accrual period at the Product level is Quarterly and the deposit period is 100 days, then 90 days will form one quarter and the

remaining 10 days will be the broken period.

Interest Payout basis

[Mandatory, Drop-Down]

Select the interest payout basis from the drop-down list.

The options are:

- **Calendar:** If the user selects **Calendar**, the interest payout will take place at the end of the calendar month or quarter.
- **Anniversary:** If the user selects **Anniversary**, the interest payout will take place at the start date of placing a deposit

For example, the deposit is placed on 15th of March with the interest payout frequency as **Monthly**. If the **Calendar** option is selected, the interest payout will start from 31st of March, 30th April and so on. If the **Anniversary** option is selected, the first interest payouts will be on 15th of April, and then next will be 15th May.

Once added, this field cannot be modified or amended.

Interest Compounding basis

[Mandatory, Drop-Down]

Select the frequency, at which the interest accrued is compounded to the principal, from the drop-down list.

The options are:

- **Calendar:** If the user selects **Calendar**, the interest compounding will take place at the end of the calendar month or quarter.
- **Anniversary:** If the user selects **Anniversary**, the interest payout will depend upon the start date of placing a deposit and the compounding frequency.

For example, the deposit is placed on 15th of March with the interest compounding frequency as **Monthly**. If the **Calendar** option is selected, the interest compounding will start from 31st of March, 30th April and so on. If the **Anniversary** option is selected, the interest compounding frequency will be on 15th of April, 15th May and so on.

Once added, this field cannot be modified or amended.

Interest Compounding Frequency

[Mandatory, Drop-Down]

Select the frequency, at which the interest accrued will be compounded to the principal, from the drop-down list.

The options are:

- None/At Maturity
- Daily
- Weekly
- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

Interest Payout Frequency

The interest compounding frequency should be greater than or equal to the accrual frequency.

[Mandatory, Drop-Down]

Select the interest payout frequency from the drop-down list.

Interest payout frequency is the period at which the interest will be paid.

The options are:

- None/At Maturity
- Daily
- Weekly
- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

The interest payout frequency should be greater than or equal to the compounding frequency.

Minimum Deposit Term For Periodic Interest

[Optional, Numeric, Four, Four]

Type the minimum deposit term for periodic interest. If the deposit is opened with a term less than the period specified in this field, the interest will be payable only at maturity.

For example, the **Minimum Deposit Term For Periodic Interest** is defined as 6 months. The **Interest Payout Frequency** is **Monthly**. If the account is being opened for 4 months, the **Interest Payout Frequency** will be defined as **At Maturity** by the system.

Once added, this field cannot be modified or amended.

Post Maturity Interest Index/Rate

[Drop-Down]

Select the post maturity interest index rate from the drop-down list.

The account reaches the post maturity stage, if no maturity payout instructions are specified for the TD.

If the customer gives the renewal instruction on the matured deposit during the grace period, the account can be renewed from the maturity date.

It specifies the rate at which the interest is paid for the grace period after maturity if no renewal instructions have been given by the customer. The effective rate for the interest index code is displayed in the next field.

Include Variance on PMI

[Optional, Check Box]

Select the **Include Variance on PMI** check box if the account level variance has to be included in the PMI interest calculation.

Recompile PMI on Rate Change

[Optional, Check Box]

Select the **Recompile PMI On Rate Change** check box to recompute

PMI on rate change.

**Post Maturity
Interest routine**

[Conditional, Pick List]

Select the post maturity interest routine from the pick list.

It is a logical set of instructions for calculating the post maturity interest rate. The bank can define its own post maturity interest calculation routine.

This field is enabled if the **Conventional** option is selected in the **Class** drop-down list.

Payout Option

[Mandatory, Drop-Down]

Select the default payout for the TD product from the drop-down list.

The options are:

- **No Instructions** – The interest will be paid, and the post maturity interest will be calculated.
- **Redeem** - The interest will be paid, but no post maturity interest will be calculated.
- **Reinvest** – The interest amount will be reinvested into the principal specified in the **Interest Payout and Redemption** tab.

Field Description

Field Name	Description
------------	-------------

Maturity Parameters

Maturity Due Notice Days

[Mandatory, Numeric, Three]

Type the maturity due notice days.

It specifies the number of days, in advance a notice will be sent to the customer, informing about the maturity of the deposit accounts under this product. This field does not have any validations.

Unclaimed Deposit Transfer Days

[Mandatory, Numeric, Four]

Type the unclaimed deposit transfer days.

A matured term deposit with no renewal/redemption instruction will remain in the matured GL. The user can specify a time period after which such deposit will be closed automatically by the system and the proceeds will be transferred to the unclaimed GL.

Unclaimed Deposit

[Mandatory, Drop-Down]

Processing Frequency	<p>Select the unclaimed deposit processing frequency from the drop-down list.</p> <p>The options are follow:</p> <ul style="list-style-type: none"> • Daily • Monthly <p>The system's process of transferring of deposit and subsequent closure of accounts could be scheduled to take place either monthly or daily.</p>
Forced Renewal Term	<p>[Mandatory, Numeric, Four]</p> <p>Type the forced renewal term.</p> <p>It is the term for which the deposit is to be automatically renewed on the maturity if there is lien on the deposit. The lien can be internal lien, i.e., for availing an overdraft against TD or it can be an external lien like a court order.</p> <p>This term can be specified in months and / or days.</p>
Auto Renewal Term	<p>[Mandatory, Numeric, Four]</p> <p>Type the auto renewal term, for which the deposit is to be automatically renewed, if the customer has not given any renewal instructions and there is no lien on the deposit.</p> <p>This term can be specified in months and / or days.</p>
Auto/ Force Renew With Deposit Variance	<p>[Optional, Check Box]</p> <p>Select the Auto/ Force Renew With Deposit Variance check box to apply variance to deposits opened by auto/forced renewal under the product.</p> <p>For more information refer to the Example01 given at the end of this chapter.</p>
Renew With Maturity Date	<p>[Optional, Check Box]</p> <p>Select the Renew With Maturity Date check box to renew the TD account as on the maturity date even if the TD account grace day's have expired. Grace days is not applicable in this case.</p> <p>This option is applicable for TD accounts that are opened as No Instruction on maturity.</p>
Renewal Rate	<p>[Conditional, Drop-Down]</p> <p>Select the renewal rate from the drop-down list.</p> <p>The renewal rate is to be applied in case renewal is done from maturity.</p> <p>The field is enabled only if the Renew With Maturity field is selected.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Current - The interest rate effective as on the renewal date will be will be applied to the TD account. • Higher - Higher of the interest rate applicable on the maturity date of the TD and the renewal/processing date will be applied. • Lower- Lower of the interest rate applicable on the maturity date of the TD and the renewal/processing date will be applied. • None- This field value is applicable if Renew With Maturity check box is unchecked.

Renewal Grace Period

[Mandatory, Numeric, Three]

Type the renewal grace period.

A deposit is kept in the matured GL, in case no instructions for payment of the matured deposit has been received from the customer at the time of deposit initiation. However, the customer can come to the bank well after the maturity date and request to renew the deposit effective from maturity date. You can define a period at the product level within which, a matured deposit could be renewed with the back dated effect from the maturity date, if **Renew With Maturity** flag is not selected.

Maturity option

[Mandatory, Drop-Down]

Select the appropriate maturity option from the drop-down list.

The maturity option is available for interest and principal. However, the user may change these product level defaults and select the desired option at the time of **Multiple Payout Instructions**, at the deposit/account level.

The options are:

- **No Instructions** - The amount gets transferred to the matured deposits GL and the amount would earn post-maturity interest for the grace days. Beyond grace days, no PMI interest will be applicable.
- **Redeem**- The amount gets transferred to the payable GL and this amount would not earn post-maturity interest.
- **Reinvest**- The amount gets added to the existing account with the auto renewal term.

Add pending interest to Principal on Maturity

[Optional, Check Box]

Select the **Add Pending interest to Principal on Maturity** check box to add any uncollected interest and due interest, which is not collected, to the principal at the time of maturity of that account.

The adding of amounts to principal on maturity will be done in the BOD.

Restriction Options on Principal Payouts

[Mandatory, Drop-Down]

Select the restriction option on the principal payouts from the drop-down list.

The options are:

- None
- Deposit and Beneficiary Blocked

Redemption

Redemption Parameters

Premature Redemption Allowed

[Optional, Check Box]

Select the **Premature Redemption Allowed** check box to allow premature redemption. A deposit cannot be renewed before maturity, if the check box is not selected.

Part Redemption Allowed

[Optional, Check Box]

Select the **Part Redemption Allowed** check box to allow partial redemption.

If this field is selected, it enables the **Units of Redemption** field.

Unit Of Redemption

[Conditional, Numeric, 13, Two]

Type the units of redemption.

This field is enabled only if the **Part Redemption Allowed** check box is selected. You can specify the multiples in which the amount can be

partially or prematurely redeemed. When partial or premature redemption is carried out on an account, the amount is validated against this field.

Change Slab on Redemption

[Optional, Check Box]

Select the **Change Slab on Redemption** option to change the slab on redemption.

After redemption, principal balance may go below the specified slab level according to which interest rate was applied to the TD account. The interest rate will be reapplied according to the new principal balance if this option is selected.

Penalty Rate to Use

[Mandatory, Drop-Down]

Select the penalty rate to be used from the drop-down list.

The options are:

- **Bank Rate** - If you select bank level penalty rate, then the system will derive it from the **TD Bank Parameters** level for term deposit.
- **Product Rate** - If you select product level penalty rate, then it enables the next two fields where the user can define the penalty rate. This penalty rate is applicable for all the interest slabs of the product. It will also be applicable for any partial redemption for deposit under the product.
- **Slab Level** - If you select slab level penalty rate then the penalty rate can be defined for each slab in **TD Product Rates**.

Once added, this field cannot be modified or amended.

Fixed Penalty Rate / Variance

[Conditional, Numeric, Three,Ten]

Type the fixed penalty rate or variance on penalty rate in this field.

This field will be enabled only if the **Penalty Rate to Use** is selected as **Product Level/Slab Level**.

The fixed rate defined will be applicable for all the product/slabs or variance applicable on the rate determined by the penalty index.

Penalty Index

[Conditional, Drop-Down]

Select the penalty index from the drop-down list.

The penalty index lists all the interest rates from the **Interest Index Rates** (Fast Path: BAM13) option.

The interest rate applicable for the selected interest index code will be displayed in the next field.

The penalty rate can either be fixed or can be set to the penalty index.

This field is enabled if **Product Rate** is selected from the **Penalty Rate to Use** drop-down list.

Penalty Routine to Use

[Mandatory, Drop-Down]

Select the penalty routine to be used from the drop-down list.

The options are:

- Standard

- User Defined

If it is standard, it will display the **Penalty Routine**. If it is user defined, it will enable the **Penalty Routine** field so that the relevant penalty routine can be entered.

Penalty Routine	<p>[Conditional, Pick List]</p> <p>Select the penalty routine from the pick list.</p> <p>Penalty routine is the logical set of instructions for deriving the penalty amount. This field will be enabled only if the Penalty Routine to Use is set to User Defined.</p>
Partial Period Interest Payable Upto	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate partial period interest payable option from the drop-down list.</p> <p>In case of premature deposit redemption one can specify the interest benefit available to the customer.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Current Redemption Date - Interest up to current redemption date is paid. • Last Anniversary Date – Interest accrued up to the last anniversary date is paid. • Last Accrual Date – Interest accrued up to the last accrual date is paid. <p>Once added, this field cannot be modified or amended.</p>
Minimum Term for Penalty Interest	<p>[Mandatory, Numeric, Four, Four]</p> <p>Type the minimum term in months and/or days for penalty interest. If the deposit is redeemed within this period, then no interest is payable on that deposit.</p>
Lock-in Term	<p>[Optional, Numeric, Four, Four]</p> <p>Type the minimum term for lock in term.</p> <p>This period indicates the term for which the deposit needs to be retained in the system before it can allowed to be redeemed.</p>
Service Charge Package	<p>[Optional, Pick List]</p> <p>Select the service charge package code attached to the TD product from the pick list.</p>
Minimum Order Amount	<p>[Conditional, Numeric, Five]</p> <p>Type the minimum order amount applicable for this product.</p> <p>This field is enabled if Call Deposit (No Maturity) option is selected in the Product Class and maintains the minimum order amount for withdrawal for the product created.</p>
Number of Partial Withdrawals Allowed	<p>[Conditional, Numeric, Five]</p> <p>Type the number of partial redemptions allowed for a term deposit.</p> <p>This field is enabled if the Part Redemption Allowed check box is</p>

selected.

Minimum Amount for Withdrawal

[Optional, Numeric, 15]

Type the minimum amount which is allowed for withdrawal of the product.

The minimum amount for withdrawal, set at the time of product creation will be used to validate the redemption amount.

Note: If the partial redemption principal amount is less than the minimum withdrawal amount, then system will reject the redemption transaction and will give error message.

Field Description

Field Name	Description
------------	-------------

GL Codes

Regular Deposits

[Mandatory, Numeric, Nine]

Type the regular deposit GL code.

The **Regular Deposits** reflects the cumulative amount, i.e., the outstanding principal, deposited to all the account under the product.

This is a liability type GL.

Once added, this field cannot be modified or amended.

Payment GL

[Mandatory, Numeric, Nine]

Type the payment GL code.

All the payin amounts done via various modes for the deposits initiated under a product will be logged in this GL. The deposits from various modes are consolidated to this GL before they are swept out to the Regular deposit GL.

Once added, this field cannot be modified or amended.

Interest Accrued

[Mandatory, Numeric, Nine]

Type the interest accrued GL code.

This GL contains the interest which has been accrued on the account under the product.

Entries will be passed in this GL account when the interest accrual takes place. The entry will be reconciled when the compounding or payout takes place.

This is a liability type GL.

Once added, this field cannot be modified or amended.

Matured Deposits

[Mandatory, Numeric, Nine]

Type the matured deposit GL code.

A deposit amount is transferred to this GL from the **Regular Deposits GL** once an account is matured and there is no renewal or maturity payment instruction on the account. The value in this GL would reflect the cumulative amount, i.e., the principal + compounded interest of all such matured accounts under a product for which there are no renewal/maturity instructions.

This is a liability type GL.

Once added, this field cannot be modified or amended.

Unclaimed Deposits

[Mandatory, Numeric, Nine]

Type the unclaimed deposits GL code.

The unclaimed deposit reflects the cumulative amount, i.e., the principal + compounded interest which has matured and has remained in the **Matured GL** for the unclaimed period specified at the product level, without being collected by the customer. The system automatically closes a matured unclaimed account and transfers the proceeds to the **Unclaimed Deposits GL**.

Unclaimed deposit period is specified in the **On Maturity** tab.

The proceeds could be credited to any desired party or GL by debiting this GL.

This is a liability type GL.

Once added, this field cannot be modified or amended.

Interest Expense

[Mandatory, Numeric, Nine]

Type the interest expense GL code.

The interest expenses GL reflects the cumulative amount of interest paid to various accounts under a product during the accrual cycle. When the credit entry is passed in an accrued GL the contra entry is passed in the interest expenses account.

This is an expense type GL.

Once added, this field cannot be modified or amended.

Discounted Interest

[Mandatory, Numeric, Nine]

Type the discounted interest GL code.

The discounted interest will be enabled only for Normal Discounted and True Discounted types of **Discounting Type** field in **General** tab.

This is an expense type GL.

Once added, this field cannot be modified or amended.

Interest Compounded

[Mandatory, Numeric, Nine]

Type the interest compounded GL code.

This is applicable to compounded type of TD products. It is used to keep track of the total interest compounded, account wise. This GL is affected at the time of compounding based on the compounding frequency defined at the product level.

This is a liability type GL.

Once added, this field cannot be modified or amended.

GL Codes

Interest Payable

[Mandatory, Numeric, Nine]

Type the interest payable code.

When the interest payout mode is cash or cheque, the amount due to the customer is stored in this account. The proceeds have to be personally collected by the customer. This account does not accrue or pay any interest on such funds.

Redemption Payable

[Mandatory, Numeric, Nine]

Type the redemption payable code.

The redemption payable GL stores the principal amount that is to be paid to the customer when the TD account is redeemed for principal payout modes as cash or cheque.

Replacement Cost GL

[Mandatory, Numeric, Nine]

Type the GL which would account for the replacement cost.

This is a income type of GL

GL Codes-Tax Withheld 1

Base Tax

[Mandatory, Numeric, Nine]

Type the GL for base tax.

The amount of tax which can be remitted with respect to base tax under a specific tax structure (Tax 1 or Tax 2).

Additional Tax1

[Mandatory, Numeric, Nine]

Type the GL for additional tax 1.

The amount of tax which can be remitted with respect to additional tax 1 under a specific tax structure (Tax 1 or Tax 2).

Additional Tax2

[Mandatory, Numeric, Nine]

Type the GL for additional tax 2.

The amount of tax which can be remitted with respect to additional tax 2 under a specific tax structure (Tax 1 or Tax 2).

GL Codes-Tax Withheld 2

Base Tax

[Mandatory, Numeric, Nine]

Type the GL for base tax.

Additional Tax1

[Mandatory, Numeric, Nine]

Type the GL for additional tax 1.

Additional Tax2

[Mandatory, Numeric, Nine]

Type the GL for additional tax 2.

Field Name Description

Payment GL

[Mandatory, Numeric, Nine]

The payment GL code.

All the payin amounts done via various modes for the deposits initiated under a product will be logged in this GL. The deposits from various modes are consolidated to this GL before they are swept out to the Regular deposit GL.

Once added, this field cannot be modified or amended.

Interest Accrued

[Mandatory, Numeric, Nine]

The interest accrued GL contains the interest which has been accrued on the account under the product , is reflected.

Entries will be passed in this GL account when the interest accrual takes place. The entry will be reconciled when the compounding or payout takes place.

This is a liability type GL.

Once added, this field cannot be modified or amended.

Matured Deposits

[Mandatory, Numeric, Nine]

The matured deposit GL code.

A deposit amount is transferred to this GL from the **Regular Deposits** GL once an account is matured and there is no renewal or maturity payment instruction on the account. The value in this GL would reflect the cumulative amount , i.e., the principal + compounded interest of all such matured accounts under a

product for which there are no renewal/maturity instructions.

This is a liability type GL.

Once added, this field cannot be modified or amended.

**Tax
Withheld 1**

[Mandatory, Numeric, Nine]

The tax withheld reflects the cumulative amount of tax deducted from accounts under a product, which is payable to the government. A reversal entry is passed when this amount is paid to the government. A reversal entry is to be passed manually to this GL when this amount is paid to the government.

Tax entries pertaining to Tax Code 1 defined in **Customer Types Maintenance** will be passed to this GL

This is a liability type GL.

**Tax
Withheld 2**

[Mandatory, Numeric, Nine]

The tax withheld reflects the cumulative amount of tax deducted from accounts under a product, which is payable to the government. A reversal entry is to be passed manually to this GL when this amount is paid to the government.

Tax entries pertaining to Tax Code 2 defined in **Customer Types Maintenance** will be passed to this GL.

This is a liability type GL.

**Unclaimed
Deposits**

[Mandatory, Numeric, Nine]

The unclaimed deposit reflects the cumulative amount, i.e., the principal + compounded interest which has matured and has remained in the **Matured GL** for the unclaimed period specified at the product level, without being collected by the customer. The system automatically closes a matured unclaimed account and transfers the proceeds to the **Unclaimed Deposits GL**

Unclaimed Deposit period is specified in the **On Maturity** tab.

The proceeds could be credited to any desired party or GL by debiting this GL.

This is a liability type GL.

Once added, this field cannot be modified or amended.

**Interest
Expense**

[Mandatory, Numeric, Nine]

The interest expenses is the cumulative amount of interest paid to various accounts under a product during the accrual cycle will be reflected in this GL. When the credit entry is passed in an accrued GL the contra entry is passed in the interest expenses account.

This is an expense type GL.

Once added, this field cannot be modified or amended.

------------	-------------

Advices

Interest Remittance Advice

[Mandatory, Numeric, Three]

Type the interest remittance advice format.

An advice is sent in this format whenever interest has been remitted on TD accounts belonging to this product. The remittance can be for any payout mode.

Once added, this field cannot be modified or amended.

Interest Remittance Failed Advice

[Mandatory, Numeric, Three]

Type the interest remittance failed advice format.

For interest payout modes other than cash or cheque, an advice is sent in this format when the remittance has failed. The reason for failure of the remittance is conveyed to the customer through this advice.

	Once added, this field cannot be modified or amended.
Deposit Renewal Advice	<p>[Mandatory, Numeric, Three]</p> <p>Type the deposit Renewal Advice format.</p> <p>When deposits are renewed, the advice is sent to the customer in this format.</p> <p>Once added, this field cannot be modified or amended.</p>
Redemption Proceeds Remittance Failed Advice	<p>[Mandatory, Numeric, Three]</p> <p>Type the redemption proceeds remittance failed advice format.</p> <p>This advice maintains the format in which the customer should be intimated in case of redemption proceeds remittance failure. This is used when the remittance payout mode is other than cash or cheque.</p> <p>Once added, this field cannot be modified or amended.</p>
Deposit Confirmation Advice	<p>[Mandatory, Numeric, Three]</p> <p>Type the deposit confirmation advice format.</p> <p>The system generates the deposit confirmation advice and sends it to the customer. The deposit confirmation advices are generated during the EOD process.</p> <p>Once added, this field cannot be modified or amended.</p>
Interest Adjustment Advice	<p>[Mandatory, Numeric, Three]</p> <p>Type the interest adjustment advice format.</p> <p>If there is any interest adjustment on the deposit, advice will be generated in this format, informing the interest adjustment on the account.</p> <p>In the Add mode, this field displays the default values which can be modified.</p> <p>Once added, this field cannot be modified or amended.</p>
Certificate/Statements	
Passbook	<p>[Optional, Check Box, Drop-Down]</p> <p>Select the Passbook check box to maintain a passbook for a TD account. If this flag is checked, the system enables you to issue a passbook to the customer. This enables the Passbook drop-down list.</p> <p>Select the appropriate option from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Account Level – The passbook is maintained at the account level. • Deposit Level – The passbook is maintained at the deposit level
Passbook Id	<p>[Conditional, Pick List]</p> <p>Select the format ID for the passbook from the pick list.</p> <p>The various formats can be defined in Passbook Parameter</p>

Maintenance under a passbook ID and linked to the product.

This pick list is enabled if **Passbook** check box is selected.

Statement

[Optional, Check Box]

Select the **Statement** check box to specify the frequency of statements to be generated for all TD accounts under the product and send it to the customer at the defined interval.

Frequency

[Conditional, Drop-Down]

Select the interval of statement generation from the drop-down list.

The options are:

- At Maturity
- Daily
- Weekly
- FortNightly
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly

This field is enabled if the **Statement** check box is selected.

Certificate

[Optional, Check Box]

Select the **Certificate** check box to generate a certificate.

Debit Card

[Optional, Check Box]

Select the **Debit Card** check box to maintain the debit card facility for a TD account.

If this field is selected, the system enables you to issue a debit card for TD account.

Field Description

Field Name	Description
------------	-------------

Features

Discounted Interest Flag

[Optional, Check Box]

Select the **Discounted Interest Flag** check box to enable the discounted interest.

FLEXCUBE Retail offers this special feature which is applicable for interest payout. The product setup should be as follows:

- At the Product level the **Interest Payout Frequency** should be defined as **Quarterly**, and at the time of payin the **Interest Payout Frequency** parameter should be changed to **Monthly**.

Apart from the above combination of payout instructions, no other combination will work.

The rate available to the customer is lower than the quoted rate. E.g. if the quoted rate is 10%, the actual rate due to the above setup would be 9.9%.

Once added, this field cannot be modified or amended.

Unclaimed Flag

[Optional, Drop-Down]

Select the appropriate unclaimed flag option from the drop-down list.

You can specify whether an individual deposit or the account should be tagged as unclaimed.

The options are:

- **Deposit level** – The individual deposit will be tagged as unclaimed when it crosses the unclaimed deposit transfer days.
- **Account level** - The account will be tagged as unclaimed when all the deposits under the account cross the unclaimed deposit transfer days.

Redemption Renewal Unclaimed Account

[Optional, Check Box]

Select the **Redemption Renewal Unclaimed Account** check box to allow the bank to redeem an unclaimed account.

If this flag is selected, during unclaimed processing, the account will not be closed but the GL entries are passed by the system to move the balance to Unclaimed GL. Hence the system allows the customer to renew or redeem an unclaimed deposit.

If this flag is not selected, during unclaimed processing the account will be closed and the GL entries are passed by the system to move the balance to Unclaimed GL. The customer cannot redeem or renew an unclaimed deposit.

Interest Calendar for holiday processing

[Optional, Check Box]

Select the **Interest Calendar for holiday processing** check box to allow holiday processing based on interest calendar for a TD account.

Fund Transfer to Same Customer

[Optional, Check box]

Select the **Fund Transfer to same customer** check box to transfer the funds to the same customer.

No processing is done in FCR based on this field.

Add On Features

Auto Redemption Flag

[Mandatory, Drop-Down]

Select the appropriate auto redemption flag option from the drop-down list.

At the product level, you can parameterize the sequence in which the deposits/accounts will be broken to fund a linked CASA account.

The options are:

- **First In First Out** - Deposit/account created first through sweep out will be broken first
- **Highest Rate First Out** - Deposit/account with highest rate will be broken first thus, restricting the customer from retaining deposits/accounts with higher rates.
- **Lowest Rate First Out** - Deposit/account with lowest rate will be

broken first thus, giving more benefit to the customer.

- **Last In First Out** - Deposit/account created last through sweep out will be broken first

If a withdrawal from CASA account, with Sweep In instructions, requires withdrawing more cash than the amount present in the account, the deposits will be redeemed as per the **Auto Redemption** option specified.

Once added, this field cannot be modified or amended.

Update Running Balance On Compounding

[Mandatory, Drop-Down]

Select whether the current/running balance should be updated on interest compounding or not from the drop-down list. This balance would be reflected on the TD passbooks and TD statements.

The options are:

- **YES** - Update the balance on compounding
- **NO** - Do not update the balance on compounding

Currency Declaration Form

CDF Threshold Amount in USD

[Conditional, Numeric, 13, Two]

Type the threshold amount for FCNR transaction.

This field is enabled if **FCNR** option is selected in **Class** field.

Dormancy Details

Dormancy Plan Code

[Optional, Pick List]

Select the dormancy plan code applicable for the product from the pick list.

Effective Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the effective date, from when the interest rates are applicable, from the pick list.</p>

By default, the system displays, the posting date. This date can be the posting date or greater.

Terms

Unit [Display]
This field displays the unit of the term as specified in the **TD Product Master** (Fast Path: TDM01) option. This could be Months, Days or Combination.
The minimum, maximum and incremental terms defined below will be in the respective unit.

Minimum [Display]
This field displays the minimum term as defined at the product level.

Maximum [Display]
This field displays the maximum term as defined at the product level.

Incremental [Display]
This field displays the incremental term as defined at the product level.

Amount

Incremental [Display]
This field displays the incremental amount that can be accepted under this product as defined at the product level.

Minimum [Display]
This field displays the minimum deposit amount that can be accepted as deposit as defined at the product level.

Maximum [Display]
This field displays the maximum deposit amount that can be accepted under this product as defined at the product level.

3. Click the **Add** button.
4. The system displays the message "This action will clear all data on the screen. Do You Want to continue?". Click the **Yes** button.
5. Select the product code and effective date from the pick list.

Field Description

Column Name

Description

Start Months

[Display]

The column displays the number of months for the slab, which is being defined.

The system by default displays the minimum term defined at the product level. This value cannot be modified.

For every new term, click this column to type the appropriate start month.

The system displays the error FCR6783, if you try to change the default minimum term. For more information refer to Appendix A on page X.

Start Days

[Display]

The column displays the number of days for the slab, which is being defined.

The system by default displays the minimum amount defined at the product level. This value cannot be modified.

For every new term, click this column to type the appropriate start day.

Slab Amount [Mandatory, Numeric, 13, Two]

Type the deposit amount.

The system by default displays the minimum amount defined at the product level.

7. Click the **Details** button to view the slab details.
8. The system displays the **Slab Details** tab.
9. Enter the relevant information.

Field Description

Column Name **Description**

Sr. No. [Display]
 This column displays the sequence or row number generated by the

system.

Effective Date	[Display] This column displays the date from which the rates will be effective.
Amount	[Display] This column displays the slab start amount as specified in the TD Slab Definition tab. This is the amount for which the interest, penalty rates and variances will be applicable.
Start Months	[Display] This column displays the slab start duration of the term in months as specified in the TD Slab Definition tab.
Start Days	[Display] This column displays the slab start duration of the term in Days as specified in the TD Slab Definition tab.
Interest Index	[Mandatory, Pick List] Select the interest index applicable for the combination of amount and term from the pick list. The interest rate is validated against the minimum and maximum rate defined at the product level. The Interest Indexes are defined in the Interest Index codes option.
Interest Rate	[Display] This column displays the interest rate derived from the current effective interest rate linked to the interest index code. It displays up to 10 digits after decimal. The current effective rates for an interest index code are defined in the Interest Index Rate (Fast Path: BAM13) option. Interest rate in this field, and the variance at the product level will constitute the default product interest rate.
Interest Variance in Absolute Value	[Mandatory, Numeric, One, 10] Type the variance on the rate linked to the interest index code for the respective slab. This field is validated against the minimum and the maximum variance defined at the product level. It also validates if the interest rate + variance is within the minimum and maximum interest ceiling defined in the TD Product Master (Fast Path: TDM01) option.
Interest Variance in Percentage	[Display] This column displays the interest variance in percentage. It displays up to 10 digits after decimal.
Penalty Index	[Conditional, Drop-Down] Select the penalty interest index applicable for the combination of amount and term or call deposit rate from the drop-down list.

This field is enabled if the **Slab Level** option is selected in the **Penalty Rate to Use** field.

The penalty is applicable if the deposit is prematurely redeemed.

Penalty Rate

[Display]

This column displays the penalty interest rate derived from the penalty interest index code. It displays up to 10 digits after decimal.

The current effective rates for an interest index code are defined in the **Interest Index Rate** (Fast Path: BAM13) option.

Penalty Variance

[Mandatory, Numeric, 13, 10]

Type the variance for the penalty.

Net Penalty Rate = Penalty Rate + Penalty Variance

The value in this field is validated against the penalty variance defined at the product level.

Penalty Variance in Absolute Value

[Mandatory, Numeric, One, 10]

Type the variance of the penalty for the respective slab.

This field is validated against the minimum and the maximum variance defined at the product level.

It also validates if the interest rate + variance is within the minimum and maximum interest ceiling defined in the **TD Product Master** (Fast Path: TDM01) option.

Penalty Variance in Percentage

[Display]

This column displays the penalty variance in percentage. It displays up to 10 digits after decimal.

10. Click the **Ok** button.
11. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** button.
12. The product rate details are added once the record is authorised.

Note: The **Penalty Index**, **Penalty Rate** and **Penalty Variance** will get enabled only if the **Penalty Rate to Use** field in the **TD Product Master** is **Slab Level**.

7. Tax Definitions

Tax is the payment imposed upon individuals or companies for government support.

In **FLEXCUBE Retail**, the tax can be defined, corresponding to the amount of income earned or expenditure spent during a financial year for different customer types or products, subject to the exemption amount if any, as stipulated by the respective Governments. Taxes in **FLEXCUBE** can be defined in the form of tax codes and a maximum of two tax codes can be linked at the account level.

FLEXCUBE can link default tax codes depending upon the combination of product to which the account belongs and the customer type to which the primary customer of account belongs. GL accounts for passing the relevant tax entries are derived from the **Bank Master Maintenance** (Fast Path: BAM08) option.

7.1. TDS06 - Tax Parameters Maintenance

Using this option you can set the criteria for tax exemption at the bank level. This option is used to drive the tax behavior for Term Deposit and CASA Products. The Tax Parameters maintenance is a single record table, set up at installation. You cannot add or delete this Tax Parameters Maintenance table.

The tax parameters maintenance contains exemption parameters such as basis of exemption, level of exemption, the rate applicable on taxable income, and tax recovery method that are used by all branches and modules.

Definition Prerequisites

- [BAM20 - Bank Codes Maintenance](#)

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify tax code

1. Type the fast path **TDS06** and click **Go** or navigate through the menus to **Global Definitions > Master > Tax Parameters Maintenance**.
2. The system displays the **Tax Parameters Maintenance** screen.

Tax Parameters Maintenance

Field Description

Field Name	Description
Bank Code	<p>[Mandatory, Pick List]</p> <p>Select the bank code that uniquely identifies a different bank, from the pick list.</p> <p>Central Bank assigns a bank code for each bank. The bank code defined in FLEXCUBE Retail can be the same code assigned by Central Bank.</p> <p>For more information on adding bank codes, refer to Bank Codes Maintenance (Fast Path: BAM20) option.</p>
Module Name	<p>[Display]</p> <p>This field displays the module name for the corresponding bank code.</p>
Exemption Parameters	
Exemption Basis	<p>[Mandatory, Drop-Down]</p> <p>Select the criteria on which the tax exemption is based from the drop-</p>

down list.

The options are:

- **Balance** – the account balance amount will be considered for tax exemption
- **Income** – the interest income amount earned will be considered for tax exemption
- **Projected Income** – the projected (expected) interest income amount to be earned will be considered for tax exemption (This option is only valid for the TD module)

Exemption Level

[Mandatory, Drop-Down]

Select the level at which the exemption limit is specified from the drop-down list.

- **Account level** – tax exemption will be applicable on a single account held by customer
- **Customer level** - tax exemption will be applicable collectively on all accounts, across products, held by a customer (This option is only valid for the TD module)

Exemption Limit Specified At

[Mandatory, Drop-Down]

Select the level at which the exemption limit is specified from the drop-down list.

The options are:

- **Account level** – tax exemption limit is specified for every single account (This option is only valid for the TD module)
- **Customer level** - tax exemption limit is specified for every individual customer (This option is only valid for the TD module)
- **Tax Code** – the tax exemption limit is specified for the defined tax code.

Taxable Income

[Mandatory, Drop-Down]

Select the amount on which the tax will be calculated from the drop-down list.

The options are:

- **Cumulative** – tax will be deducted on the entire taxable amount.
- **Incremental** – tax will be deducted only on the incremental amount excluding the exemption amount. For example, Total Taxable Income = 10000 Exemption Amount = 5000. Tax will be deducted only on the additional 5000.

Tax Exempt Limit Period

[Mandatory, Drop-Down]

Select the time limit for which the tax is exempted from the drop-down list.

This field is valid for CASA and TD accounts.

The options are:

- Event Based
- Yearly

Rate

[Mandatory, Drop-Down]

Select the level at which the specified exemption rate will be applicable from the drop-down list.

This field is only valid for the TD module.

The options are:

- **Account** – exemption rate will be applicable for an individual account
- **Customer** - exemption rate will be applicable for all accounts, across products for a customer
- **Customer Type** - exemption rate will be applicable for all customers belonging to a particular customer type

Unrecovered Tax Recovery

[Mandatory, Drop-Down]

Select the action to be taken to recover the unrecovered tax from the drop-down list.

This field is only valid for the TD module.

The options are:

- Absorb account/TD Interest
- None
- Absorb account/TD Interest/Redemption

Tax Year End Processing

Tax Recovery

[Mandatory, Drop-Down]

Select the action to be taken to recover the tax at the end of the financial year from the drop-down list.

This field is only valid for the TD module.

The options are:

- **Deduct Unrecovered Tax** – the unrecovered tax will be deducted from the accrued interest at the end of the financial year.
- **Carry Forward Unrecovered Tax** – the unrecovered tax will be carried forward.
- **Tax Recovery From Principal** - The unrecovered tax will be recovered from the (accrued interest + principal). Therefore, for the recovery of TDS, the TD will be broken
- No Year End Processing
- **Report Unrecovered Tax** – the unrecovered tax will be identified and reported.

Tax 2

Computation Basis

[Mandatory, Drop-Down]

Select the additional tax that can be applied to the account from the drop-down list.

Tax can be calculated on the net or gross balance

This field is only valid for the TD module.

The options are:

- **Gross** – tax is calculated on the gross amount.
- **Net** – tax is calculated on the net amount, i.e., the amount after deducting tax amount 1. $\text{Net amount} = \text{Amount} - \text{tax amount 1}$

Tax Proration

[Display]

This field displays whether the tax has to be recovered on a Pro Rata basis or not.

If this check box is selected, the tax is recovered on a Pro Rata basis on the event of tax rate change from the date of account opening/capitalization to the current capitalization date.

3. Click the **Modify** button.
4. Select the bank code from the pick list.
5. Select the exemption parameters, tax year end processing and the tax computation basis from the drop-down list.

Field Description

Field Name

Description

TDS Code

[Mandatory, Numeric, Three]

Type the Tax Deducted at Source (TDS) code

The tax code is a unique number which represents the tax deducted at source (TDS). Once added, this field cannot be modified or amended.

TDS Description

[Mandatory, Alphanumeric, 40]

Type the description for the TDS code.

This information is for reference purposes.

Effective Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the date from the pick list.

The effective date should be future date only. The system will not allow if it as a current process date or back date.

TDS code and effective date should be a unique combination. If in TDS code "1" has been added with effective date of "1st Jan 2011" then

another record of TDS code with code "1" and effective date as "1st Feb 2011" can be added.

Exempt Amount

[Mandatory, Numeric, 13, Two]

Type the exemption amount.

The exemption amount is calculated on the base.

If the exemption amount is not specified, the system accepts the value as zero.

TDS Rate

[Mandatory, Numeric, Three, Five]

Type the tax rate in percentage.

By default, this field displays the value as 0.00. The maximum value accepted is 100.00.

3. Click the **Add** button.
4. Enter the TDS code and press the <Tab> key.
5. Enter the TDS description, exempt amount and the TDS rate.

7.3. BAM76 - Product Customer Tax Codes Maintenance

Using this option you can define tax codes for different customer types and product combinations. This tax code is defaulted to the account-opening screen on selecting the customer type. The default tax codes can be changed during the account opening process as well at a later stage.

Definition Prerequisites

- [BAM30 - Tax Codes Maintenance](#)
- [CHM01 - CASA Product Master Maintenance](#)
- [TDM01 - TD Product Master](#)
- [CIM08 - Customer Types Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add product customer tax code

1. Type the fast path **BAM76** and click **Go** or navigate through the menus to **Global Definitions > Customer > Product Customer Tax Codes Maintenance**.
2. The system displays the **Product Customer Tax Codes Maintenance** screen.

Product Customer Tax Codes Maintenance

Field Description

Field Name	Description
CASA Product / TD Product	<p>[Mandatory, Radio Button, Drop-Down]</p> <p>Click the appropriate option button to select the option from the drop-down list.</p> <p>Select the product option from the drop-down list.</p> <p>The tax code will be maintained for the selected product.</p> <p>The system displays the lists of all the authorised products for the selected product type.</p> <p>The Casa/TD product drop-down list is enabled, once the corresponding option button is selected.</p>
Customer Type	<p>[Mandatory, Pick List]</p> <p>Select the customer type from the pick list.</p> <p>The system displays the list of customers maintained in the Customer Types Maintenance (Fast Path: CIM08) option.</p>

The system validates the product and customer type combination.

The system enables the **Tax Code 1** and **Tax Code 2** fields only if the combination is unique.

Tax Code 1

[Mandatory, Pick List]

Select the tax code 1 from the pick list.

The tax codes 1 are maintained in the **Tax Codes Maintenance** (Fast Path: BAM30) option.

By default, the system displays the selected tax code 1 when an account for the above product type and customer type is selected.

Tax code 2

[Mandatory, Pick List]

Select the additional tax applied on the account from the pick list.

This tax code will be defaulted in the CASA/TD Account Opening screen when the above maintained customer type opens an account under the selected product.

For example, taxes are applied to the account at two levels, i.e., National tax and local tax. National tax can be specified in the **Tax Code 1** field and local tax can be specified in the **Tax Code 2** field.

3. Click the **Add** button.
4. Select the **CASA Product** or **TD Product** option. The system enables the corresponding product drop-down list depending on the option selected.
5. Select the product name from the drop-down list and the customer type from the pick list.
6. Select the first and the second tax code from the pick list.

7.5. TDS04 - Tax Waiver Criteria Maintenance

Using this option, you can maintain the tax waiver threshold amount based on the type of form(15G/15H), exemption limit for the form and the customer type. You can also set whether to continue waiver for renewed deposits within the financial year or not. The Tax waiver threshold amount is applicable only if the customer has submitted the declaration form (15G/H).

The income (projected/actual) is calculated at the customer level per branch. In case the 15G/H form is submitted for some deposits and not for other deposits then the income is computed at the customer level for all the deposits in a branch for comparing with the threshold amount. However waiver is given for deposits for which waiver is maintained and the income has not crossed the threshold limit. For the deposits where waiver is not maintained, tax is deducted at the applicable rate.

Definition Prerequisites

To add tax acknowledgement details for a financial year

1. Type the fast path **TDS07** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > Tax Acknowledgement Details Maintenance**.
2. The system displays the **Tax Acknowledgement Details Maintenance** screen.

Tax Acknowledgement Details Maintenance

Field Description

Field Name	Description
Financial Year	[Mandatory, Numeric, Four] Type the financial year for which you want to maintain the acknowledgment details.
Financial Quarter	[Mandatory, Drop-Down] Select the appropriate financial quarter from the drop-down list. The options are: <ul style="list-style-type: none"> • Q1 • Q2 • Q3 • Q4
TAN No	[Mandatory, Pick List] Select the TAN number from the pick list. The TAN number is unique bank branch wise and is maintained using the

Branch Attributes Maintenance (Fast Path: BAM88) option.

Tax Code

[Mandatory, Pick List]

Select the tax code from the pick list.

These codes are maintained using the **Tax Codes Maintenance** (Fast Path: BAM30) option.

Acknowledgement No

[Mandatory, Numeric, 120]

Type the acknowledgement number for TDS remittance.

3. Click the **Add** button.
4. Enter the financial year.
5. Select the financial quarter from the drop-down list.
6. Select the TAN number and tax code from the pick list.
7. Enter the acknowledgement number.

8. Click the **Ok** button.

9. The system displays the message "Record Added...Authorisation pending..". Click the **Ok** button.
10. The acknowledgement details are added once the record is authorised.

8. RD Definition

A recurring deposit is a deposit wherein the customer deposits a specified amount (decided at the time of opening of the Recurring Deposit Account) as installment every month. At the end of the term the principal amount together with Interest (normally compounded quarterly) is paid. The grace days maintenance, and RD product rates including penalty for late installment payment and premature withdrawal can be defined under the Recurring Deposit definition.

8.1. CHM10 - RD Product Rates Maintenance

Using this option you can define Interest slabs for RD products, Interest rates, Premature interest rates and Late payment interest rates. Premature Variance code is relevant for premature RD account closure, as 'withdrawals' are not allowed for RD accounts.

Definition Prerequisites

- [BAM12 - Interest Index Maintenance](#)
- [BAM13 - Interest Index Rates](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add RD product rates

1. Type the fast path **CHM10** and click **Go** or navigate through the menus to **Global Definitions > CASA > RD Product Rates Maintenance**.
2. The system displays the **RD Product Rates Maintenance** screen.

------------	-------------

RD Slab Details

Product Code

[Mandatory, Pick List]

Select the RD product code from the pick list.

Product code is a unique number assigned during defining CASA products using the **CASA Product Master Maintenance** (Fast Path: CHM01) option.

The length of the product code is configurable at the bank level.

Product name

[Display]

This field displays the descriptive name of the product code selected.

Term Slab

[Mandatory, Numeric, Three]

Type the term slab for which rates are being defined.

Term Unit

[Display]

This field displays the unit in which the term is defined.

Index Code and Penalty Details

Premature Variance Code	[Mandatory, Pick List] Select the premature variance code from the pick list. It is the variance applicable on the Interest Rate code applicable in case of premature closure of an RD account.
Effective Rate	[Display] This field displays the effective premature variance rate. It displays up to 10 digits after decimal.
RD Interest Index Code	[Mandatory, Pick List] Select the interest index code from the pick list. It is the interest rate that is applicable for the term slab entered. Floating interest rate is not applicable for RD products.
Effective Rate	[Display] This field displays the effective interest index rate. It displays up to 10 digits after decimal.
TD Interest Index Code	[Mandatory, Pick List] Select the authorised interest index codes from the pick list. This field is enabled only for Educational RD Product . TD interest index code for the term slab will be maintained in this field. Floating interest rate is not applicable for RD Products.
Effective Rate	[Display] This field displays the effective interest index rate.
Penalty Index code	[Mandatory, Pick List] Select the Interest rate code applicable for late payment of installment amount from the pick list.
Effective Rate	[Display] This field displays the effective late penalty rate. It displays up to 10 digits after decimal.
Fixed Late Penalty Amount	[Optional, Numeric, 13, Two] Type the fixed amount to be charged per installment per day for late payment of an installment.

3. Click the **Add** button.
4. Select the product code from the pick list.
5. Enter the term slab and the number of the late payments allowed.
6. Select the index codes and the penalty details like premature variance code, interest and penalty index code from the pick list.

Field Description

Field Name	Description
Product Code	[Mandatory, Pick List] Select the product code for which grace period needs to be defined from the pick list.
Product Name	[Display] This field displays the name of the product selected from the pick list.
Installment Frequency	[Display] This field display the installment frequency of the product. The installment frequency of the product code are set in the CASA Product Master Maintenance (Fast Path : CHM01).
Effective Date	[Mandatory, Pick List, dd/mm/yyyy] Select the effective date, from which grace days definition will be applicable for the installment frequency, from the pick list.
Grace Days	[Mandatory, Drop- Down]

Select the type of grace days from the drop-down list.

The options are as follows:

- Number of Days :
- End of the month

The adjacent field is enabled if the **Number of Days** option is selected from the drop-down list. The field is mandatory and accepts numeric character.

[Conditional, Numeric, Three]

Type the number of grace days.

This field is enabled if the **Number of Days** option is selected from the drop-down list.

The number of days specified here is added to the installment due date. Payment received within this period will not be treated as late. Payment received after the grace period is treated as late.

Example:

Grace period = 5 days

Monthly payment, Installment due date 31/01/2010

Grace period will be till 05/02/2010

Quarterly payment, Installment due date 10/04/2010

Grace period will be till 15/04/2010

3. Click the **Add** button.
4. Select the product code from the pick list.

9. Loan Definition

Providing of loan is one of the principal tasks for any banking institution. **FLEXCUBE Retail** has a very flexible loans module due to its high parameterization. Various maintenances like product master, document plan, deduction plans, calendar plan for customized installment payments, product interest rates, schedule definitions, etc., are defined under loan definition.

9.1. NM18 - Loan Bank Parameters Maintenance

Using this option, you can define bank wide parameters pertaining to retail loan accounts like lead days for rate change, lead days for reminder, suspense debit GL code and suspense credit GL Code.

This maintenance is one time activity undertaken during the static data setup phase and only one authorised record is possible. You cannot add bank parameters since they are set up during installation. They can only be modified.

Definition Prerequisites

- [BAM08 - Bank Master Maintenance](#)
- [GLM02 - Chart of Accounts](#)

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify loan bank parameters

1. Type the fast path **LNM18** and click **Go** or navigate through the menus to **Global Definitions > Loan > Loan Bank Parameters Maintenance**.
2. The system displays the **Loan Bank Parameters Maintenance** screen.

9.2. ORS35 - Document Plan Code Maintenance

Using this option you can define a set of documents to be submitted along with the account application. Requirement of such documents may differ across different types of accounts. But within a particular type of account for a bank, this list of documents may be fairly standard.

The list of documents that are standard can be grouped together using this option. It is a plan for listing the documents to be collected from an account. A document plan can be linked to one or more products. This setup has two main components, i.e.,

- **The Plan Serial Number:** It is a number allotted to individual documents which are grouped under one plan code.
- **The Plan Code:** It is a collection of plan serial numbers, i.e. a group of documents

Definition Prerequisites

Field Description

Field Name	Description
Plan Code	<p>[Mandatory, Numeric, Three]</p> <p>Type the identification code assigned to a document plan.</p> <p>Document plan will be recognised by the code assigned to the plan for all the future references.</p>
Plan Serial No	<p>[Mandatory, Numeric, Three]</p> <p>Type the plan serial number.</p> <p>Every document is assigned a serial number. When an attachment is done for document plan 11, all the serial numbers attached to plan code 11 will be applicable for accounts, which has plan code 11 attached to the product.</p> <p>Document 11 can have serial no 1. as Income papers, serial no 2. as Personal identification proof and so on.</p>
Description	<p>[Mandatory, Alphanumeric, 40]</p>

Type the description of the documents.

For example, Income papers, Personal identification proof can be descriptions of the document.

Plan Type

[Mandatory, Pick List]

Select the plan type of the document from the pick list.

The options are:

- 0 - Document
- 1 - Deviation

Document Check Level

[Mandatory, Pick List]

Select the level at which the documents are to be collected, from the customer, from the pick list.

The options are:

- First Disbursement Only - The documents are to be collected only at the first disbursement.
- Subsequent Disbursement Only - The documents have to be collected in all the later disbursement after the first disbursement.
- All Disbursements - The documents are to be collected at all the disbursement.
- CASA_KYC
- Customer KYC

For a loan account the document has to be collected before the disbursement is made. This depends at what check level it is to be collected. The Subsequent Disbursement Only option is not currently supported.

Mandatory

[Optional, Check Box]

Select the **Mandatory** check box to make the document mandatory. This is the severity of the document.

By default the field will be blank which indicates that the document is not mandatory.

If the check box is not selected, the document is not mandatory. A non-mandatory document can be waived or kept pending at the application level and disbursement can be carried out.

If the check box is selected, the document is mandatory and has to be collected and marked as received in the origination system.

The system will not allow you to mark the data entry complete without receiving the mandatory documents. The signed offer acceptance letter is mandatory and has to be marked when received in the **Account Documents Maintenance** option to allow disbursement for the first time.

Column Name	Description
Plan Serial No	[Display]

This column displays the number of documents under the plan code. Every document is assigned a serial number. When an attachment is done for document plan 11, all the serial numbers attached to plan code 11 will be applicable for accounts, which has plan code 11 attached to the product.

Document 11 can have serial no 1. as Income papers, serial no 2. as Personal identification proof and so on.

Description

[Display]

This column displays the description of the documents.

For example, Income papers, Personal identification proof can be descriptions of the document.

Plan Type

[Display]

This column displays the plan type of the document.

Document Check Level

[Display]

This column displays the level at which the documents are to be collected from the customer.

The document has to be collected before the disbursement is made. This depends at what check level it is to be collected.

Mandatory

[Display]

This column displays whether the document is mandatory or not. This is the severity of the document.

3. Click the **Add** button.
4. Enter the plan code and press the <**Tab**> key.
5. Enter the plan serial number and plan code description.
6. Select the plan type and document check level from the pick list.

9.4. BAM44 - Reminder Plan Maintenance

Payment of the loan installment is the prime concern of any bank. At times the banks may require to remind its customers, who have defaulted to repay the installments, on the due dates and when the payment becomes overdue.

Using this option you can define reminder plans, thereby enabling sending of reminders or notices to the borrowers and guarantors reminding them about the installment payment. A reminder plan consists of a series of advices that are to be sent to the customer when arrears are pending against his account. A reminder plan once created and authorised can be attached to a loan product. The combination of the reminder plan code, serial number, and secured loan flag forms a unique key to the reminder plan.

Field Description

Field Name	Description
Reminder Plan Code	<p>[Mandatory, Numeric, Two]</p> <p>Type a new number which will be the reminder plan code. Once added and authorised, this plan code can be attached to the loan product under the Loan Product Master Maintenance (Fast Path: LNM11) option.</p>
Reminder Serial Number	<p>[Mandatory, Numeric, Two]</p> <p>Type a new serial number for the Reminder Plan⁵ Code. The reminder serial number is the order in which the reminders are to be sent to the customer. One reminder plan can contain multiple advices with different formats. This serial number appears in the reminder as well as in the loans events history.</p>
Secured Loan	<p>[Optional, Check Box]</p>

⁵(It is a plan for generating reminders to be sent to customers when arrears are not paid. A reminder plan can be linked to one or more products.)

Select the **Secured Loan** check box, if the reminder plan is applicable for secured loan. If the check box is not selected, then the reminder will not be generated for loan accounts under the product which have collateral attached.

Address To Party

[Mandatory, Drop-Down]

Select the party to whom the primary reminder is to be sent from the drop-down list.

The options are:

- AUS: -Authorized Signatory
- BOR: -Borrower
- DEV: -Developer
- GUA: -Guarantor
- JAF: - Joint Account, First Owner
- JAO: - Joint Account, Owner other than the first owner
- JOF: - Joint Account, First Owner
- JOO: - Joint Account, Owner other than the first owner
- NON: - None
- OTH
- SOL: -Solicitor
- SOW: -Sole Owner
- THR: -Third Party
- TRU: -Trustee
- VAL: - Valuer

Copy To Party

[Mandatory, Drop-Down]

Select the party to whom a copy of the reminder is to be sent from the drop-down list.

The options are:

- AUS: -Authorized Signatory
- BOR: -Borrower
- DEV: -Developer
- GUA: -Guarantor
- JAF: - Joint Account, First Owner
- JAO: - Joint Account, Owner other than the first owner
- JOF: - Joint Account, First Owner
- JOO: - Joint Account, Owner other than the first owner
- NON: - None
- OTH

- SOL: -Solicitor
- SOW: -Sole Owner
- THR: -Third Party
- TRU: -Trustee
- VAL: - Valuer

Reminder Format Code	[Mandatory, Numeric, Three] Type the format code for the reminder. The reminder format code will be unique for the Reminder Plan and the reminder serial number.
Reminder SC Code	[Mandatory, Drop-Down] Select the appropriate reminder service charge code for levying of service charges for sending the reminders from the drop-down list.
Calculate Reminder days from	[Mandatory, Drop-Down] Select the reminder days from the drop-down list. The options are: <ul style="list-style-type: none"> • Arrears Due Date • Previous Arrear Date
No of days for Reminder	[Mandatory, Numeric, Three] Type the number of days for the reminder.
Log in Event History	This field is for future use.
Reminder Mode	[Mandatory, Drop-Down] Select the reminder mode from the drop-down list. The options are: <ul style="list-style-type: none"> • GIRO to Customer • Letter to Customer • Hold with Bank

3. Click the **Add** button.
4. Enter the reminder plan code and press the **<Tab>** key.
5. Enter the appropriate information in the relevant field and click the **Ok** button.

9.5. LNM11 - Product Master Maintenances

Loan product master option encapsulates all the attributes of the product introduced by the bank. Once the product is defined, it enables the bank to open new accounts under the same product. The account pertaining to a product automatically inherits the specified product attributes. However you can make changes at the account level to offer special privileges to the customer. The accrual frequency for regular interest will apply to subsidy interest also. The accounting entries will be passed to the accrual, receivable and income GL specified in **Product Interest Attributes** (FP:LNM42) option.

Loan product master definition allows setting up different types of products at the bank level by defining various product parameters such as interest processing, penalty interest, repayment schedule, disbursement parameters, etc.

Definition Prerequisites

- [BAM25 - Currency Definition](#)
- [ACM02 - Asset Classification Preferences](#)
- [ACM05 - Asset Classification Plan Maintenance](#)
- [GLM02 - Chart of Accounts](#)
- [ORS35 - Document Plan Code Maintenance](#)
- [LNM22 - Loan Plan Deduction Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add loan product details

1. Type the fast path **LNM11** and click **Go** or navigate through the menus to **Global Definitions > Loan > Product Master Maintenances**.
2. The system displays the **Product Master Maintenances** screen.

Field Description

Field Name

Description

Product Currency

[Mandatory, Drop-Down]

Select the currency for the product from the drop-down list.

By default, the system displays the currency assigned to the product as the currency of the account opened under that product.

The drop-down lists the currency codes maintained in the **Currency Codes Maintenance** (FP: BAM56) option. Once added, this field cannot be modified or amended.

Product Category

[Optional, Pick List]

Select the category of the product from the pick list.

Product Classification	<p>[Mandatory, Alphanumeric, 10]</p> <p>Type the product classification detail.</p> <p>This is a free text field used for grouping of products for reporting purposes.</p>
Advertising Message	<p>[Mandatory, Alphanumeric, 72]</p> <p>Type the advertising message.</p> <p>This message will be used for the purpose of product promotion. The user can modify this message to suit the product promotion strategy of the bank. This message will be printed on the statement sent to the customers.</p>
Product Expiry Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the expiry date of the product from the pick list.</p> <p>The user should set up the expiry date, at the time of initial product definition. The user cannot open new accounts under the product, after the expiry date. But accounts existing under the product will continue to function normally.</p>
Loan Type	<p>[Mandatory, Drop-Down]</p> <p>Select the loan type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Term • Revolving
Term Definition	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate term definition from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Weeks • Months <p>Based on this the units for loan term and other parameters for the product/ account is applied.</p> <p>For example:</p> <p>If Minimum Term = 12, Maximum Term = 360, Loan Term = 36, and Term Definition = Weeks</p> <p>It implies that,</p> <p>Minimum Term = 12 weeks</p> <p>Maximum Term = 360 weeks</p> <p>Loan Term = 36 weeks</p>
Interest Accrual Frequency [Regular]	<p>[Mandatory, Drop-Down]</p> <p>Select the frequency at which the interest is accrued from the drop-down list.</p> <p>The accrual entries are passed based on the accrual frequency set up at the product level.</p>

The options are:

- Daily
- Monthly

**Interest Accrual
Frequency [Penalty]**

[Mandatory, Drop-Down]

Select the accrual frequency for penalty interest.

The options are:

- None
- Daily
- Monthly

If penalty interest accrual is not required the user can select the frequency as none. Thus no accrual entries will be passed.

The field **Recompute Penalty on repayment** will be enabled and will apply to penalty as well as compounding interest, if value is selected as **Daily** or **Monthly**. The penalty interest will accrue daily/monthly depending on the value selected . Interest will be accrued on the arrears specified in **Interest Rules Set up** (FP: LNM41). The accrual will start once the arrear selected in **Interest Rules Set up** (FP: LNM41) become overdue.

The flag **Recompute Penalty** on repayment will be disabled.

Add On Loan

[Optional, Check Box]

Select the **Add On Loan** check box to define a syariah type of loan.

It is used in Islamic banking products.The add on loans flag will be disabled for entrusted loans.

**Backdated Account
Open Allowed**

[Optional, Numeric, Three]

Type the threshold number of days up to which the loan accounts can be opened with back date under this product.

**Principal Offset
Allowed**

[Optional, Check Box]

Select the **Principal Offset Allowed** check box to provide principal offset facility for the product.

**Principal Offset
allowed for**

[Conditional, Drop-Down]

Select the appropriate option for which principal offset is allowed from the drop-down list.

The options are:

- Fixed Rate Period only
- Floating Rate Period only
- Both

This field is enabled if the **Principal Offset Allowed** check box is selected.

Rate Revision

[Conditional, Check Box]

Allowed	<p>Select the Rate Revision Allowed check box if revision of interest rate is to be allowed during the life term of the product.</p> <p>This field is disabled if the Add on Loan check box is selected.</p>
Allow Maturity extension if there arrears	<p>[Optional, Check Box]</p> <p>Select the Allow Maturity extension if there arrears check box to allow extension of contracted maturity date even if there are arrears on the loan.</p> <p>When this check box is cleared, rollover instruction will not be recorded on Loan Maturity Date Extension screen, if there is an arrear on loan (of any type) with DPD.</p>
Propagate Regular Rate For PMI	<p>[Optional, Check Box]</p> <p>Select the Propagate Regular Rate For PMI check box to give the regular rate of interest for all loans opened under the product and determines the interest rate behaviour in PMI stage.</p>
Penalty Rate Basis	<p>[Mandatory, Drop-Down]</p> <p>Select the penalty rate from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Rate Plan - This option signifies the Loans Product Rates Plan (FP: LN060) to be used for penalty for loan. The base rate used for penalty interest computation will be the index code applicable as per the Loans Product Rates Plan(FP: LN060) (linked through option Schedule Types (FP: LNM98). The variance defined in the Account Variance Maintenance (FP: LN079) for penalty type of rate will be applied over this index rate to derive the net penalty rate. <i>Net Penalty rate = index rate (for penalty) +/- penalty variance.</i> • Net Account Rate - The net effective rate of the loan (regular rate) will be used as the base for penalty rate. The variance defined in the Account Variance Maintenance (FP: LN079) for penalty type of rate will be applied over the net effective rate of the loan to derive the net penalty rate. Change in any factor that constitute the regular rate of interest, will trigger a recalculation of penalty interest rate if the penalty rate is derived using net account rate. <i>Net Penalty rate = Net effective account rate (regular rate) +/- penalty variance.</i> Once the option is chosen and record is authorized, the option cannot be modified during the life of the loan account. <i>Net Penalty rate = Net effective account rate (regular rate) +/- penalty variance.</i> Once the option is chosen and record is authorized, the option cannot be modified during the life of the loan account.
Disallow PMI Interest	<p>[Optional, Check Box]</p> <p>Select the Disallow PMI Interest check box to suppress the calculation of PMI interest for the loan accounts opened under the product.</p>

Note: that PMI interest will not be charged even if a valid rate is maintained in the Rate chart for the loan accounts during the PMI Stage. User will not be able to modify this option once the record is authorized.

Compounding Rate Method

[Mandatory, Drop-Down]

Select the compounding rate method to be applied on the loan account from the drop-down list.

The options are:

- **Net Regular Rate** - The compounding interest rate of the loan account will be stamped as the **Net Regular Interest Rate of the Loan Account**.
- **Net Penalty Rate** - The compounding interest rate of the loan account will be stamped as the net penalty interest rate.
- **Rate Plan** - The product level compounding rates as defined in screen **Loans Product Rates Plan** (FP: LN060) and attached to **Schedule Type** (FP: LNM98), will be stamped as the compounding rate for the loan account.

Entrusted Loans

[Optional, Check Box]

Select the **Entrusted Loans** check box to categorise the product as a entrusted product.

Open as Matured

[Optional, Checkbox]

If this flag is selected, then the system will open the loan accounts directly in matured stage. This flag is to be used only for Loan Linked OD and Bill / LC / BG functionality. This option is valid only for Term Loans

Field Description

Field Name	Description
------------	-------------

Limits

Minimum Loan Amount

[Optional, Numeric, 11, Two]

Type the minimum loan amount that can be granted for an account opened under the product.

Maximum Loan Amount

[Optional, Numeric, 13, Two]

Type the maximum loan amount that can be granted for an account opened under the product.

Minimum Term

[Mandatory, Numeric, Three]

Type the minimum term for which the loan should be defined. This period does not include the IOI stage.

Maximum Term

[Mandatory, Numeric, Three]

	Type the maximum term for which the loan is defined.
Minimum Interest Variance	<p>[Optional, Numeric, Two, Five]</p> <p>Type the minimum interest variance allowed on the interest rate for the product.</p> <p>The account level interest variance should be within the value defined at the product level.</p> <p>For example, if the minimum variance is set as - 2%, system will display an error message, when the interest variance at the account level is set as – 3%.</p> <p>Once added, this field cannot be modified or amended.</p>
Maximum Interest Variance	<p>[Optional, Numeric, Two, Five]</p> <p>Type the maximum interest variance allowed on the interest rate for the product.</p> <p>The account level interest variance should be within the value defined at the product level.</p> <p>For example, if the maximum variance is set as 3%, system will display an error message, when the interest variance at the account level is set as 4%.</p> <p>Once added, this field cannot be modified or amended.</p>
Minimum Installment	<p>[Mandatory, Numeric, 11, Two]</p> <p>Type the minimum installment amount that can be accepted as an installment for an account opened under the product.</p>
Maximum Installment	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the maximum amount that can be accepted as an installment for an account opened under the product.</p>
Minimum Grace Period (in Days)	<p>[Conditional, Numeric, Three]</p> <p>Type the minimum grace period in months.</p> <p>This field is enabled if the Loan Product Type is Islamic. The grace period specified while opening a loan account in the APS option will be validated against the value in this field. The grace period at the account level should be greater than the minimum grace period defined here.</p>
Maximum Grace Period (in Days)	<p>[Optional, Numeric, Three]</p> <p>Type the maximum grace period in months.</p> <p>The grace period specified while opening a loan account in the APS option will be validated against the value in this field. The grace period at the account level should be less than the maximum grace period defined here.</p>
Floor Rate	<p>[Mandatory, Numeric, Three, Ten]</p> <p>Type the floor rate.</p> <p>It is the minimum interest rate that is applicable to a product. The value entered in this field should not be less than or equal to 100.</p>
Ceiling Rate	<p>[Mandatory, Numeric, Three, Ten]</p>

Type the ceiling rate.

It is the variance from benchmark rate in percentage term that can be added to benchmark rate to charge maximum possible rate to the loan account. The value entered in this field should not be less than or equal to 100.

Offer Validity Period

[Mandatory, Numeric, Three, Drop-Down]

Type the offer validity period in days/months/years.

Offer validity period is the stage where the bank makes an offer to the customer and the customer accepts the terms and conditions of the loan, before the loan offer expires. Offer validity period starts after the offer letter is printed. This period should be less than the product expiry date. The offer validity period can be extended in the APS option.

Acceptance Validity Period

[Mandatory, Numeric, Three, Drop-Down]

Type the acceptance validity period in days/months/years.

Acceptance validity period starts from the date the customer has accepted the offer. The first disbursement on the account has to happen before the expiry of acceptance validity period calculated from the offer acceptance date.

The **Customer Acceptance** (Fast Path: 5597) option records this particular event for an application.

Minimum Split Loan Amount

[Mandatory, Numeric,13, Two]

Type the minimum loan amount beyond which the original loan account cannot be split.

It is the minimum amount that should be left in the loan account after split.

Defaults

Document Plan Code

[Optional, Pick List]

Select the document plan code from the pick list.

A document plan code is defined in the **Document Plan Code Maintenance** (FP: ORS35) option.

Statement Frequency

[Mandatory, Drop-Down]

Select the statement frequency from the drop-down list.

Statement frequency is the frequency at which the account statement is sent to the customer.

The options are:

- None
- Monthly
- BiMonthly
- Quarterly
- Halfyearly
- Yearly

Combined statements for multiple accounts are defined in the **Combined Statement Plan** (FP: CI162) option.

Pass Contingents

[Optional, Check Box]

Select the **Pass Contingents** check box to pass the contingent entries. It allows the user to select the frequency of the contingent entries.

Contingent Entry Frequency

[Conditional, Drop-Down]

Select the contingent entry frequency from the drop-down list.

It is the frequency of executing the contingent entries.

The options are:

- Daily
- Monthly

This field is enabled if the **Pass Contingents** check box is selected.

Security

Type Of Security Required

[Optional, Check Box]

Select the **Type Of Security Required** check box corresponding to the type of security required for the loan accounts opened under the product.

The options are:

- Collateral - A collateral has to be linked to the account
- Guarantor - A customer has to be linked to the account with 'GUA' relationship
- Co-Borrower - The co-borrower can be linked to the loan account as a type of security

User can select more than one type of security to be attached at the product level,

if any of these check boxes is selected, it is mandatory to attach the selected security to the loan account before disbursement, else the disbursement will not be allowed.

Collateral Review Frequency

[Optional, Drop-Down]

Select the collateral review frequency from the drop-down list.

It is the frequency at which the collateral offered against the loan should be reviewed. A report will be generated comparing the collaterals provided against a credit on the account.

The options are:

- None
- Monthly
- Bi-Monthly
- Quarterly

- Half-Yearly
- Yearly

Exception Reporting

Small Loan Amount [Mandatory, Numeric, 11, Two]
 Type the small loan amount.
 If the loan is disbursed for a value below the amount specified, it is automatically reflected in the exception report for the day.

Large Loan Amount [Mandatory, Numeric, 13, Two]
 Type the large loan amount.
 If the loan is disbursed for a value above the amount specified, it is automatically reflected in the exception report for the day.

Small Term [Optional, Numeric, Three]
 Type the small period.
 If the loan is disbursed for a period below the term specified, it is automatically reflected in the exception report for the day.

Large Term [Optional, Numeric, Three]
 Type the large period.
 If the loan is disbursed for a period above the term specified, it is automatically reflected in the exception report for the day.

Small Rate [Optional, Numeric, Five, Ten]
 Type the small rate of interest.
 If the loan is disbursed for a value below the rate specified, it is automatically reflected in the exception report for the day.

Large Rate [Optional, Numeric, Five, Ten]
 Type the large rate of interest.
 If the loan is disbursed for a value above the rate specified, it is automatically reflected in the exception report for the day.

Sanctioned Amount Revision

Allow Upwards [Optional, Check Box]
 Select the **Allow Upwards** check box if the sanctioned limit of the account can be increased.

Allow Downwards [Optional, Check Box]
 Select the **Allow Downwards** check box if the sanctioned limit of the account can be decreased.

Below Utilised Amount [Conditional, Check Box]
 Select the **Below Utilised Amount** check box if the sanctioned limit of the account can be decreased below the amount utilised.
 This facility is available only for revolving loans.

Field Description

Field Name	Description
------------	-------------

Limits

Allowed Disbursement Modes

[Mandatory, Check Box]

Select the appropriate check boxes to indicate the allowed disbursement modes.

The bank can restrict the disbursal modes for certain products. For example, in the case of home loans the bank may disburse only banker's cheque in the name of the builder.

The options are:

- Current / Savings
- Cash
- Cheque

- GL
- ATM
- POS
- Outward Remittance
- External Account

It is mandatory to select any one of the check box.

Maximum No Of Disbursements

[Conditional, Numeric, Five]

Type the maximum number of times the bank can disburse the loan.

Only one disbursement can take place during a day.

This field by default displays the value as One if the **Add On Loan** check box is selected in the **Definition** tab.

Threshold on sanctioned amount

[Optional, Numeric, Three]

Type the threshold on sanctioned amount.

The threshold percentage is the percentage over sanctioned amount that can be disbursed without any additional checks or authorisations.

Recession Period in Days

[Mandatory, Numeric, Three]

Type the recession period after the disbursal of the loan.

The recession period starts after the first disbursal.

If the customer wants to cancel the loan within the recession period, then all the deduction and the interest accrued/charged on the account will be reversed by the system. Any deductions to be levied on the account are handled operationally.

Defaults

Disbursement Deduction Plan Code

[Optional, Pick List]

Select the disbursement deduction plan code from the pick list.

A deduction plan is a list of deductions/billing/debits to be performed at the time of loan disbursement (first disbursements only).

A deduction plan consists of more than one type of deduction and is set up in the **Loan Plan Deduction Maintenance** (Fast Path: LNM22) option.

No deduction of installment type is allowed for IPI type loans.

Schedule Drawn On

[Conditional, Drop Down]

Select the appropriate schedule drawn on option from the drop-down list.

The options are:

- Actual Outstanding Amount
- Sanction Amount

This field is enabled if **Loan Type** is selected as **Term** in **Definition** tab.

Amortisation

Method of Amortisation

[Mandatory, Drop-Down]

Select the method of amortisation to be adopted from the drop-down list.

The options are:

- **Straight-Line:** If this option is selected for the loans account:
*Monthly amortisable amount = charge collected * no of days in that month / term of the loan in Days.*
i.e., actual total days from disbursement date to maturity date.
If this option is selected for OD:
*Monthly amortisable amount = charge collected * no of days in that month / term of the OD in days,* i.e., actual total days from limit sanction date to limit expiry date.
- **IRR :** This option is applicable only for term loan accounts. **FLEXCUBE** will create 2 schedules internally for 2 different IRR's. First IRR is calculated for the entire loan amount and the second IRR is calculated for the loan amount - service charge. The difference in the interest component of Schedule 1 and Schedule 2 will be the amortized service charge component for the month.

Amortisation-Accounting Entries Frequency

[Display]

This field displays the amortisation frequency based on the method of amortization selected in the corresponding field.

If the **Straight-Line** option is selected in the **Method of Amortisation** field, this field will be defaulted to **Calendar** and if **IRR-Based** option is selected **Anniversary** will be displayed.

Available amount for Disbursement

Include Advances

[Conditional, Check Box]

Select the **Include Advances** check box to include the advances in the disbursement amount, if any.

This field is enabled if **Loan Type** is selected as **Revolving** in **Definition** tab.

Exclude Unbilled Interest

[Conditional, Check Box]

Select the **Exclude unbilled interest** check box to exclude the unbilled interest, if any.

This field is enabled if **Loan Type** is selected as **Revolving** in **Definition** tab.

Move To Regular Stage After Disbursement

[Conditional, Check box]

Select the check box to allow the account to move to regular type from IOI stage.

This field is enabled if **Loan Type** is selected as **Term** in **Definition** tab.

Example: Consider an account with IOI stage and Partial Disbursement done. Subsequently the account is fully disbursed. If this check box is selected the account will move to the regular stage (EPI/IPI) automatically.

Limits

Allowed Repayment Modes

[Mandatory, Check Box]

Select the appropriate check boxes to indicate the repayment modes.

The repayment mode allowed should be any of the modes allowed.

For example, if a bank gives loans only to a CASA account holder and draws the installment payments from CASA, then only drawdown from savings can be specified as the mode of payment.

The options are:

- Current / Savings
- Cash
- Cheque
- GL
- ATM
- POS
- Inward Remittance
- External Account

It is mandatory to select any one of the check box.

Defaults

Appropriation Sequence

[Mandatory, Character, 18]

Type the appropriation sequence for normal loans, indicating the sequence in which the funds credited to the loan account shall be appropriated to the various arrear buckets.

The standard sequence is CIFPOLANUTSDEGM.

It stands for:

- C - Principal Arrears
- I - Interest Arrears
- F - Fee Arrears
- P - Premium Arrears
- O - Outgoing Arrears
- L - Late Fee Arrears (Suspended Penalty interest)
- A - Penalty Arrears
- N - Non Accrual Interest Arrears (Suspended interest)
- U - Suspended Post Maturity Interest
- T - Post Maturity Interest
- S - Legal Fees Arrears
- D - Suspended Fees
- E - Suspended legal fees
- G - Suspended Premium
- M - Suspended Outgoings
- K - Compounding Interest Arrears
- W - Suspended Compounding Interest Arrears
- B - Diverting Interest Arrears
- V - Suspended Diverting Interest Arrears

The sequence can be defined by the user.

Longest Overdue First	<p>[Optional, Check Box]</p> <p>Select the Longest Overdue First check box to perform the appropriation sequence date-wise.</p>
Payoff Benefit	<p>[Mandatory, Drop-Down]</p> <p>Select the payoff benefit from the drop-down list.</p> <p>It is applicable only when a partial payoff is attempted. The benefit in the interest base is expected from this field.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Immediate: The effect of the PPF happens immediately. • Next Due Date: The effect of the PPF takes place on the next due date of the loan schedule. • Next Rest Period: The effect of the PPF takes place on the next rest period of the loan schedule. • No Effect
Lead Days for Repayment Date	<p>[Conditional, Numeric, Five]</p> <p>Type the number of days available to the customer for repayment of dues.</p> <p>This field is enabled if Loan Type is selected as Revolving in Definition tab.</p>
Minimum Amount For PPF	<p>[Optional, Numeric, 13, Two]</p> <p>Type the minimum number of installments that must be paid by the customer to treat the repayment as partial pay off.</p>
Minimum period for interest in Advance	<p>[Mandatory, Numeric, Three]</p> <p>Type the minimum period for Interest in Advance.</p> <p>This is applicable for IOI in Advance installment type.</p>
Auto Repayments (Draw Down)	
DrawDown Behavior	<p>[Optional, Drop-Down]</p> <p>Select the drawdown behavior from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Partial Amount Allowed - Drawdown partial amount of installment incase funds for the entire installment is not available • Full Payment Only - Drawdown only full installment amount, else reject the drawdown • Raise Earmark - Drawdown for funds available in CASA account and raise earmark for the remaining un-available amount • Force Debit - Drawdown the required funds from CASA account by force debit on CASA account
Include unbilled Penalty for	<p>[Optional, Check Box]</p>

Drawdown	Select the Include unbilled Penalty for Drawdown check box if the unbilled amount has to be included for drawdown.
DrawDown In	<p>[Optional, Drop-Down]</p> <p>Select the time of execution of drawdown processing from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • EOD • BOD
DrawDown Retry In	<p>[Conditional, Drop-Down]</p> <p>Select the drawdown retry option from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • EOD • BOD • Both <p>This field is enabled if the Maximum Retries (Daily Retries) is more than zero.</p>
Maximum Retries (Daily Retries)	<p>[Mandatory, Numeric, Five]</p> <p>Type the maximum number of retries incase a drawdown is set up on a CASA account and the CASA account does not have the funds. The system will try to draw down from the CASA account for the specified number of times on consecutive days in the BOD.</p>
Charge Penalty on Retry	<p>[Optional, Check Box]</p> <p>Select the Charge Penalty on Retry check box to charge penalty for the draw down retries.</p>
Drawdown On Next Working Day	<p>[Optional, Check Box]</p> <p>Select the Drawdown On Next Working Day check box to process the drawdown on the next working day in case the day of drawdown is a holiday.</p> <p>If check box is not selected, the drawdown would happen on the previous working day.</p>
Rate Intimations	
Generate Intimations for Rate Change	<p>[Optional, Check Box]</p> <p>Select the Generate Intimations for Rate Change check box to generate the rate change intimation.</p>
Lead Days for Rate Renewal	<p>[Conditional, Numeric, Five]</p> <p>Type the lead days for rate renewal intimation.</p> <p>This field is enabled if the Generate Intimations for Rate Change check box is selected.</p>
Pre-payments	

Disallow PPF	<p>[Conditional, Check Box]</p> <p>Select the Disallow PPF check box to disallow partial pay off through any mode for the accounts opened under this product.</p> <p>This check box is selected and disabled if the Add On Loan check box is selected in the Definition tab.</p>
Disallow EFS	<p>[Optional, Check Box]</p> <p>Select the Disallow EFS check box to disallow EFS/full pay off through any mode for loan accounts opened under this product.</p>
Disallow Advance Payments	<p>[Conditional, Check Box]</p> <p>Select the Disallow Advance Payment check box to disallow advance installment payment through any mode for loan accounts opened under this product.</p> <p>This check box is selected and disabled if the Add On Loan check box is selected in the Definition tab.</p>
Disallow PPF if there are arrears on loan	<p>[Optional, Check Box]</p> <p>Select the Disallow PPF if there are arrears on loan check box if there are arrears on loan to disallow partial pay off on loan account if there are arrears present on the loan account.</p> <p>If this field is not selected, then partial pay off will be allowed even if there are arrears on the loan.</p> <p>Partial pay off will be allowed if the transaction amount is more than the dues on the loan.</p> <p>This field is enabled if the Disallow PPF check box is un-selected. Once the value in this field is maintained and authorized, future modification of the value will not be allowed.</p>
Repayment Review	
Lead days for repayment review	<p>[Mandatory, Numeric, Two]</p> <p>Type the lead days for repayment review in days.</p> <p>It should be greater than zero and less than or equal to 60.</p>
Repayment Review Period	<p>[Mandatory, Numeric, Three]</p> <p>Type the repayment review period in months.</p> <p>It should be greater than the value defined in the Lead days for repayment review field.</p>
Default Reschedule Mode	<p>[Conditional, Drop-Down]</p> <p>Select the default reschedule mode from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Recalculate Installment • Recalculate Term <p>This field is enabled if the Repayment Review Period is greater than zero.</p>

Penalty Interest Calculation Rule on PPF

PPF Penalty %

[Optional, Numeric, 5]

Type the **PPF penalty %**. The percentage value entered in this field is used to calculate the penalty interest on PPF.

PPF Penalty routine

[Optional, Pick List]

Select the PPF penalty routine from the pick list. The penalty interest calculation on PPF will be based on the penalty routine selected.

The options are: -

- Interest for 1 month of total principal * (Pre Defined % at product Level) - Routine 1
- Interest for 1 month of PPF principal * (Pre Defined % at product Level) - Routine 2
- Interest on PPF principal in current period * (Pre Defined % at product level). Current period – From last charging date to PPF date. - Routine 3.

Prepayment Threshold for Economic Cost

The fields in this section are enabled if the **Economic Cost to be Levied** check box is selected.

Prepayment Threshold - Fixed Amount

[Mandatory, Numeric,13, Two]

Type the prepayment threshold amount for economic cost.

Prepayment Threshold for Economic Cost = Prepayment Threshold - Fixed Amount + n where n = No. of Installments.

Prepayment Threshold - Tolerance (No of Installments)

[Mandatory, Numeric, Two]

Type the number of monthly equivalent installments.

Economic Cost Quote Validity Period

[Mandatory, Numeric, Two]

Type the number of days till which the economic cost quote is valid.

The economic cost quote is generated using the **Quote for Economic Cost** (Fast Path: LNM52) option.

Economic Cost On Repayments

Economic Cost to be Levied

[Optional, Checkbox]

Select the **Economic Cost to be Levied** checkbox to include economic cost in case of repayments to loan accounts opened under this product.

Economic Cost On Repayments (To be levied in)

[Conditional, Drop-Down]

Select the rate period for which the economic cost is to be applied from the drop-down list.

The options are :

- Fixed Rate Period only

- Floating Rate Period only
- Both

This field is enabled if the **Economic Cost to be Levied** check box is selected.

- K - Compounding Interest Arrears
- W - Suspended Compounding Interest Arrears
- B - Diverting Interest Arrears
- V - Suspended Diverting Interest Arrears

Limits

Grace Period	[Mandatory, Drop-Down]
--------------	------------------------

Select the grace period from the drop-down list for calculation of grace period expiry.

The options are:

- Repayment Grace Days
- Repayment Grace Date
- End of month

Waive Penalty on MinDue Payment

[Conditional, Check Box]

Select the **Waive Penalty on MinDue Payment** check box if you want to waive the penalty applied on minimum due payment.

If the MAD is paid, then the penalty is not calculated.

This field is enabled if **Loan Type** is selected as **Revolving** in **Definition** tab.

Compute Penalty on Repayments

[Optional, Check Box]

Select the **Compute Penalty on repayments** check box to calculate the penalty to be levied on repayments.

This field decides, if the compounding interest needs to be computed and charged on repayments in addition to compounding interest charging dates as per the specified frequency. Once selected, this field will not be modified.

If this check box is selected:

- Compounding interest will be computed and charged to the account on loan repayments.
- The repayments can be installment payment, PPF, EFS, or any other customer initiated credit in the loan by any mode. Advance payment will not trigger compounding interest charging as advance payment is done when there are no arrears on loan.
- The compounding interest will be computed on the specified arrears from the last charging date.
- The computation will be driven by the accrual basis specified in interest rules set up for compounding interest
- Interest charging on repayment will be in addition to the regular charging on the due dates as per frequency specified.

If this check box is not selected:

- Compounding interest will be computed and charged only on the compounding interest charging dates.
- The compounding interest will be computed on the specified arrears from the last charging date.
- The computation will be driven by the accrual basis specified in interest rules set up for compounding interest.

Defaults

Reminder Plan

[Optional, Pick List]

Select the reminder plan from the pick list.

The loan reminder plan code containing the nature of reminders is sent to customers and / or their associates in case of non-payment of arrears.

Reminder plans are maintained in the **Reminder Plan Maintenance** (FP: BAM44) option.

Minimum Arrears for Reminder

[Optional, Numeric, 13, Two]

Type the minimum arrears for reminder.

NPL Appropriation Sequence

[Mandatory, Alphanumeric, 18]

Type the sequence in which the balance in an NPL account will be appropriated indicating the sequence in which the funds credited to a suspended loan account shall be appropriated to the various arrear buckets.

The sequence is user defined and is normally CIFPOLANUTSDEGMKWBV.

It stands for:

- C - Principal Arrears
- I - Interest Arrears
- F - Fee Arrears
- P - Premium Arrears
- O - Outgoing Arrears
- L - Late Fee Arrears (Suspended penalty interest)
- A Penalty Arrears
- N - Non Accrual Interest Arrears (Suspended interest)
- U - Suspended Post Maturity Interest
- T - Post Maturity Interest
- S - Legal Fees Arrears
- D - Suspended Fees
- E - Suspended Legal Fees
- G - Suspended Premium
- M - Suspended Outgoings
- K - Compounding Interest Arrears
- W - Suspended Compounding Interest Arrears
- B - Diverting Interest Arrears
- V - Suspended Diverting Interest Arrears

The sequence can be defined by the user.

Longest Overdue First [Optional, Check Box]
Select the **Longest Overdue First** check box to perform the appropriation sequence date-wise.

Asset Classification Preferences

Preferences Plan Code [Mandatory, Pick List]
Select the preference plan code from the pick list.
A preference plan code of the classification preferences, determines the preference set for the product with respect to CRR movement, provisioning and claw-back, used for suspended accounts.

Secured Classification Plan Code [Mandatory, Pick List]
Select the secured classification plan code from the pick list.
The secured classification codes are maintained in the **Asset Classification Plan Maintenance** (Fast Path: ACM05) option.

Unsecured Classification Plan Code [Mandatory, Pick List]
Select the unsecured classification plan code from the pick list.
The unsecured classification codes are maintained in the **Asset Classification Plan Maintenance** (Fast Path: ACM05) option.

Arrear Reporting

Minimum Arrear for reporting [Optional, Numeric, 13, Two]
Type the minimum arrear amount to be considered for reporting the loan accounts.

Field Description

Field Name

Description

Limits

Small Balance Waiver Limit

[Mandatory, Numeric, 13, Two]

Type the small balance waiver limit.

If at maturity of the loan, the outstanding amount is less than the small balance waiver amount, then the outstanding amount will be waived and the account will be closed.

Small Balance Forfeiture Limit

[Mandatory, Numeric, 13, Two]

Type the small balance forfeiture limit.

If at maturity of the loan, the repayment is more than the outstanding by up to the forfeiture amount, then the amount is forfeited and the loan account closed.

Maximum Lockin Period (Initial Period)

[Mandatory, Numeric, Three, Drop-Down]

Type the maximum lock-in term and select the term unit from the drop-

down list.

This indicates the minimum period for which the loan account should be held in the system since disbursement before it can be closed.

**Minimum Notice
Period For Early
Settlement**

[Mandatory, Numeric, Three, Drop-Down]

Type the minimum notice period required to be provided for early and final settlement and select the term unit from the drop-down list. In case the notice period is provided, the interest on the loan is calculated till the notice period start date. Else the interest is calculated till the EFS date.

Roll Over

[Conditional, Drop-Down]

Select the roll over from the drop-down list.

Rollover controls the renewal of revolving loan accounts under the product.

The options are:

- Auto: It allows the user to rollover the accounts if the arrears are not in the account
- Manual: It allows the user to perform manual rollover. The maturity date can be extended manually.
- None: Applicable for term loans where the maturity dates cannot be extended.

This field is enabled if **Loan Type** is selected as **Revolving** in **Definition** tab.

**Small Amount For
MAD #**

[Conditional, Numeric, 13, Two]

Type the part of the MAD amount raised as per the formula which is specified while defining the minimum due plan.

This field is enabled if **Loan Type** is selected as **Revolving** in **Definition** tab.

Field Description

Field Name

Description

Off Balance Sheet Product

[Optional, Check Box]

Select the check box if you want to setup off balance sheet GL's instead of asset, liabilities, etc. under various heads.

If this check box is selected, then ORACLE FLEXCUBE will not validate the GL codes. This helps the banks to sanction and disburse loans to the customer's on behalf of a third party entity / agency and the bank's balance sheet will not be affected.

Assets

Principal Balance

[Mandatory, Numeric, Nine]

Type the principal balance GL code.

The outstanding balances of the normal loan accounts belonging to the selected product will be recorded in this general ledger code.

This is an asset type GL.

Suspended Principal	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended principal balance GL code.</p> <p>The outstanding balances of the suspended loan accounts belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>
Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the fees receivable GL code.</p> <p>The outstanding fees amount to be recovered from normal loan accounts belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>
Suspended Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended fees GL code.</p> <p>The outstanding fees amount to be recovered from the suspended loan account belonging to the selected product will be recorded in this general ledger code.</p> <p>This is an asset type GL.</p>
Outgoing Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the outgoing receivable GI code.</p> <p>The outgoings raised on the normal accounts belonging to the selected product such as insurance premium, etc, are recorded in the general ledger code.</p> <p>This is an asset type GL.</p>
Suspended Outgoing Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended outgoing receivable GL code.</p> <p>The outgoings raised on the suspended accounts belonging to the selected product such as insurance premium, etc, are recorded in the general ledger code.</p> <p>This is an asset type GL.</p>
Legal Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the legal fees receivable GL code.</p> <p>If the customer has requested the bank to pay the legal fees on his/her behalf, the bank pays it and recovers the outstanding amount from the customer. This legal fee to be recovered for normal accounts is recorded in the general ledger code.</p> <p>This is an asset type GL.</p>
Suspended Legal Fees Receivable	<p>[Mandatory, Numeric, Nine]</p> <p>Type the suspended legal fees GL code.</p> <p>The legal fees payable by the customer on a suspended loan account belonging to the selected product will be recorded in the general ledger code.</p>

	This is an asset type GL.
Contingent Asset	[Mandatory, Numeric, Nine] Type the contingent asset GL code.
Allowance for Loss- Uncollected Interest GL	[Conditional, Numeric, Nine] Type the contra asset GL maintained for uncollected interest. This field is enabled for term loans only.
Rollover Interest	[Conditional, Numeric, Nine] Type the GL that is used to hold the moratorium interest until paid. This field is not mandatory if the Term option is selected in the Loan Type drop-down list.
Diverting Interest Receivable	[Mandatory, Numeric, Nine] Type the diverting interest receivable GL code. If the loan amount disbursed is used by the customer for any purpose other than the purpose for which loan is disbursed, then the account is charged with diverting interest and is accounted for in diverting interest receivable GL and will be considered as a separate arrear type. This ad-hoc interest amount is calculated externally but applied in FCR through debit interest adjustment. Diverting interest is a separate arrear and is accounted and recognised separately. This is an asset type GL.
Suspended Diverting Interest Receivable	[Mandatory, Numeric, Nine] Type the suspended diverting interest receivable GL code which will be debited for receivable amount when the diverting interest arrears are raised on the loan account whose accrual status is suspended. If claw back is applicable for diverting interest, and if there are unpaid diverting interest arrears on loan at the time of movement of loan from normal to suspended, then the unpaid arrears will move from diverting interest receivable GL to suspended diverting interest receivable GL. This is an asset type GL.
Liabilities	
Legal Fees Payable	[Mandatory, Numeric, Nine] Type the legal fees GL code. The legal fees payable to the lawyer's company for expenses incurred on the accounts belonging to the selected product will be recorded in the general ledger code. This is a liability type GL.
Outgoing Payable	[Mandatory, Numeric, Nine] Type the outgoings payable GL code. The outgoings raised on the account are recorded in this general ledger code. This is a liability type GL.
Bad Debt Reserve	[Mandatory, Numeric, Nine] Type the bad debt reserve GL code. Whenever a provisioning is done on a loan account as per the CRR definition the system debits the expense/Writeoff GL and parks the

amount in the bad debt reserve. In case of repayment or a full write off of the loan account the amount available in this GL is reversed.

This is a liability type of GL.

Allow Subsidy Rate

[Conditional, Check Box]

Select the **Allows Subsidy Rate** check box to define accounts under the term loan product which will have an interest subsidy facility.

The user has to enter the subsidy interest rate for all the loan accounts opened under this product in the **Loan Direct Account Opening** (Fast Path: LN057) option.

This field is enabled only for the products related to term loan accounts.

Unapplied Advance (RPA)

[Mandatory, Numeric, Nine]

Type the unapplied advance GL code.

Excess payments made on the account by the customer are recorded in this GL. These payments shall be automatically appropriated in the future when arrears are raised on the account.

This is a liability type GL.

Split Loan Interim GL

[Mandatory, Numeric, Nine]

Type the GL code where the disbursed amount for the split loan will be parked.

This amount is debited from the interim GL for partial payoff of the original loan account on the same day.

Contingent Liability

[Mandatory, Numeric, Nine]

Type the contingent liability GL code.

Suspended Economic Cost

[Conditional, Numeric, Nine]

Type the suspended economic cost income GL code.

This field is enabled if the **Economic Cost to be levied** check box is selected in the **Repayment** tab.

Settlement Payout

[Mandatory, Numeric, Nine]

Type the GL code for settlement payment.

Any contribution amount received for a loan account is credited to this GL. During disbursement, **Oracle FLEXCUBE** debits the **Principal Balance** (Asset type) and credits this GL.

Note: You can modify this field if accounts are not yet maintained under the defined loan product.

Subsidy Parking

[Conditional, Numeric, Nine]

Type the GL to which interest subsidy is collected for a loan account.

This is a liability type of GL.

The bank parks the interest payments received upfront to this GL and debits the same on the amortization date every month for the subsidized loan duration.

This field is enabled only if the **Allows Subsidy Rate** check box is selected.

Income

Misc Income

[Mandatory, Numeric, Nine]

Type the miscellaneous income GL code.

The additional income, other than interest income, generated on the account is recorded in the general ledger code.

The entry is initiated from the common billing maintenance.

This is an income type GL.

Economic Cost

[Conditional, Numeric, Nine]

Type the economic cost income GL code.

This field is enabled if the **Economic Cost to be levied** check box is selected in the **Repayment** tab.

Small Balance Forfeiture

[Mandatory, Numeric, Nine]

Type the small balance forfeiture GL code.

When the customer account is closed, his credit balance below a certain limit is forfeited. This forfeited balance in the account is recorded in the general ledger code.

The small balance forfeiture limit for the product is defined in the **Closure** tab.

This is an income type GL.

Suspended Diverting Interest Income

[Mandatory, Numeric, Nine]

Type the suspended diverting interest income GL code which will be booked as liability when the diverting interest arrears remain unpaid and the loan account accrual status is Suspended. This is a liability type GL.

Diverting Interest Income

[Mandatory, Numeric, Nine]

Type the diverting interest income GL code which will be booked as income when diverting interest arrears are raised on the normal loan account. This is an income type GL.

Expense

Small Balance Waiver

[Mandatory, Numeric, Nine]

Type the small balance waiver GL code.

When the customer account is closed, his debit balance below a certain limit is written off. If the small balance of the customer has been waived off, then it is recorded in this general ledger code.

The small balance waiver limit for the product is defined in the Closure tab.

This is an expense type GL.

Writeoff Expense

[Mandatory, Numeric, Nine]

	Type the write off expense GL code. When the non performing loan account is written off, it is recorded in this general ledger code. This is an expense type GL.
Provision for Loss- Uncollected Interest GL	[Conditional, Numeric, Nine] Type the expense GL maintained for provisioning uncollected interest. This field is enabled only for term loan account.
Add-on Accounting	
Margin Accounting	[Conditional, Check Box] Select the Margin Accounting check box to pass accounting entries for margin receivable as per Syariah – Murabahah practice on loan disbursement. The user has to select this check box to create a Syariah – Murabahah product. This check box is enabled if the Add On Loan check box is selected in the Definition tab.
Inventory GL Definition	[Conditional, Check Box] Select the Inventory GL Definition check box to pass accounting entries for inventory bought and sold on loan disbursement. The user has to select this check box to create a Syariah – Murabahah product. This check box is enabled if the Add On Loan check box is selected in the Definition tab.
Total Margin Receivable	[Conditional, Numeric, Nine] Type the GL that will reflect the total interest receivable over the remaining tenure of the loan for normal loan. This is an asset type GL. This field is enabled if the Margin Accounting check box is selected.
Inventory Asset GL	[Conditional, Numeric, Nine] Type the GL that will reflect the accounting entry to show that the bank has purchased asset from third party and sold it to customer. This is an asset type GL. This field is enabled if the Inventory GL Definition check box is selected.
Deferred Margin Income	[Conditional, Numeric, Nine] Type the GL, that will be credited with total interest receivable amount at the time of disbursement and will be debited with the amount of interest received as and when installment amount is paid for normal loan. This field is enabled if the Margin Accounting check box is selected.
Inventory Liability GL	[Conditional, Numeric, Nine] Type the GL that will reflect the accounting entry to show that the bank has purchased asset from third party and sold it to customer.

This is a liability type GL.

This field is enabled if the **Inventory GL Definition** check box is selected.

6. Click the **Ok** button.
7. The system displays the message "Record Added...Authorisation Pending..Click Ok to continue". Click the **OK** button.
8. The loan product details are added once the record is authorised.

9.6. BA655 - Calendar For Loan Rescission/TD Maturity/Interesting Processing

Loans recession is to be done when the customer / bank wants to close the loan account within a certain number of days from the last disbursement date, without any financial impact to the bank or customer.

Using this option you can determine the actual working days from the first disbursement date. This Loan recession calendar has to be maintained separately regardless of whether the bank/composite calendar is maintained or not.

If the customer wants to cancel the loan within the recession period, then all the deduction and the interest accrued/charged on the account will be reversed by the system. Any deductions to be levied on the account are to be handled operationally.

Calendar For Loan Rescission/TD Maturity/Interesting Processing is used for TD maturity and loan holiday processing. System refers this screen for the interest treatment on holiday processing for loan (based on the customer category "Corporate"), TD redemption and call deposit withdrawal.

9.8. ORS25 - Producer Setup*

The producer is the one who brings some business to the financial institution and banks. The details of the producer and DSA (Direct Sales Associates) who source the loan applications are maintained in this setup.

Using this option you can record or edit basic information like producer number, name, contact information, the company and branch for which the producer applies, federal tax number, status, and other information. Producer ID has to be fetched from the bank details. There can be the following status for the producer:

- Active
- Inactive
- Temporary

The producer with the **Active** and **Temp** status are only allowed to bring in the applicants. Once the loan amount is disbursed for a particular applicant brought by the producer, his CASA account will be credited based on the compensation defined in the **Product Compensation Setup**.

Definition Prerequisites

- [SMM02 - User Profile Maintenance](#)

Note: The Producer Id and Producer # combined together form the primary key.

10. Interest Rate Definitions

Interest rates are applicable when the bank is lending a loan to the customer (asset type), or when the bank borrows funds (liability type) from the depositors. The bank levies or pays different values of interest on various products offered to the customer. **FLEXCUBE Retail** allows the bank to define interest rates of its products, both asset and liability type by means of codes and links these codes to the respective products. The system's flexibility allows you to change the interest rate for a product, and state the date from which the interest rate should be effective.

10.1. BAM12 - Interest Index Maintenance

You can maintain the index names and associated codes using this option. These codes can be subsequently linked to interest rates using the **Interest Index Rates** (Fast Path: BAM13) option.

Interest Index codes can be used where the bank wants to define interest rates of its products across **Oracle FLEXCUBE**, both asset and liability type.

There can be a maximum of 999 Interest Index Codes defined in the system, and each Interest Index Code can be linked to any number of products.

For example in case the bank wants to define interest rate of 15% for personal loan, the bank would need to define an interest index code 101 as "Personal Loan Interest Rate" and link 15% to this interest index code 101. The interest index code 101 is then attached to the personal loan product.

Definition Prerequisites

- [BAM25 - Currency Definition](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

10.2. BAM13 - Interest Index Rates

Using this option you can link index codes to interest rates, and state the date from which the interest rate is effective. The index codes are defined in the **Interest Index Maintenance** (Fast Path: BAM12) option.

Interest rate can be changed by changing the rate specified at index level defined at interest index rate. If the interest rate is changed for an index code attached to a CASA or TD product, the change is automatically propagated to the account if the product is marked as a floating rate product. In case of loans, product propagation takes place by using the **Rate Change** (Fast Path: LNM81) option.

Note 1: You can define 0 % interest rates and attach the 0% interest index rate to **Loan Product Rates Maintenance** (Fast Path: LN060) option.

Note 2: If the base interest index rate attached to a derived interest index code is modified during the day, then the derived interest index rates are updated during EOD.

This field displays the name of the base interest index code selected in the corresponding field.

Interest Rate

[Mandatory, Numeric, Two, 10]

Type the interest rate for the interest index code. It displays up to 10 digits after decimal.

The highest value in this field can be 99.9999999999.

Effective Interest Rate

[Display]

This field displays the net effective rate to be applied on loan accounts in case of Derived Rate. It displays up to 10 digits after decimal.

For Regular and Base Interest Index codes it is same as Interest Rate and it cannot be negative.

The Effective rate of interest for derived rates is calculated as follows:

For example:

Base rate = 1001 (assuming the base rate (Base) = 7%)

Derived Rate factor (X) = 1%

Effective Interest Rate(Derived rate) = Base + X% of Base

= 7% + 1% of 7%

= 7% + 0.07%

= 7.07%

Advice Required

[Optional, Check Box]

Select the **Advice Required** check box to generate advice for the interest rate change.

3. Click the **Add** button.
4. Enter the interest index code, effective date and the interest rate/derived rate factor.

10.3. LN060 - Loans Product Rates Plan

This option is used to set up tiered or non-tiered applicable interest rates for the loan accounts for stages other than Regular or PMI stage. The **PPF**⁶ and EFS rates are defined in the **Loans Product Rates Plan** option. You can define a plan based on the

- Effective date of the plan
- The slab definition as to whether the plan code is tiered or non-tiered
- The rate definition if the rate is floating or fixed amount
- The tier criteria i.e if the tier interest rate is to be read as cumulative or incremental
- The ceiling rate and the floor rate and the interest rates applicable etc.

Based on the parameters provided, the system generates a schedule of rates for a particular effective date. This option is used for setting up the interest rates as well as for changing the rate at a later date. Interest for regular and PMI stages of an account is maintained in the **Rate Chart Maintenance** (Fast Path: PR002), **Discount Rate Setup** (Fast Path: PR005) and **Rate Chart Validity Maintenance** (Fast Path: PR003) options.

Definition Prerequisites

- [BAM12 - Interest Index Maintenance](#)
- [BAM13 - Interest Index Rates](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add loan product rates

1. Type the fast path **LN060** and click **Go** or navigate through the menus to **Global Definitions > Loan > Loans Product Rates Plan**.
2. The system displays the **Loan Product Rates Plan** screen.

Loan Product Rates Plan

⁶(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

Field Description

Field Name	Description
Plan Id	<p>[Mandatory, Numeric, Five] Type the plan ID. It is a unique number, which represents the product rates plan. Once added, this field cannot be modified or amended.</p>
Plan Name	<p>[Optional, Alphanumeric, 40] Type the descriptive name of the plan.</p>
Product Code	<p>[Display] This field displays the product code for which the product rates plan has been defined. After the Plan Id is attached to the product in the Schedule Type (Fast Path: LNM98) option, the product name as defined in the Product Master Maintenance (Fast Path: LNM11) is displayed along with the product code.</p>

Currency [Display]
This field displays the currency assigned to the product at the product level.
All the entries are posted in the account in the account currency.
For example, if the currency assigned to a loans product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

Effective Date [Mandatory, Pick List, dd/mm/yyyy]
Select the effective date from the pick list.
It is the date from when the loan plan is effective.
The effective date can be current date or a future date.

Rate Type [Mandatory, Drop-Down]
Select the rate type from the drop-down list.
The options are:

- Penalty
- Partial Payoff Penalty
- EFS Penalty
- Compounding Interest
- Credit Interest

Note: For rate type compounding interest:
The rate of interest can be set as fixed rate or floating rate (variable).
The rate definition for compounding interest will be non-tiered. Tiered rate set up will not be allowed.
Ceiling and floor rate can also be set for compounding rate. So if net compounding interest rate applicable on loan falls below the floor rate, floor rate will be applied on loan. Similarly, if it is more than the ceiling rate, then the ceiling rate will be applied on the loan.
The user will be able to select base rate (index code) and apply product variance for compounding interest through this screen. Net rate of interest = base rate + / - variance.
Fixed amount will not apply to compounding interest.
The product variance for compounding interest will always be set up as an absolute value.
Account variance cannot be set up for compounding interest.

3. Click the **Add** button.
4. Enter the plan ID and the name.
5. Select the effective date from the pick list and the rate type from the drop-down list.

Field Description

Field Name	Description
------------	-------------

If the Credit Interest option is selected from the Rate Type drop-down list, then the fields in this tab are disabled and set to the default value.

Rate Definition

[Mandatory, Drop-Down]

Select the rate definition from the drop-down list.

The options are:

- **Fixed Rate:** All accounts opened with this type of product rate will have fixed rate throughout the life of the loan unless changed later
- **Floating Rate:** The rate effective for the selected interest index will be applicable on prorata basis. It will change as and when the interest linked to the index is changed.
- **Fixed Amount:** In this option an amount needs to be specified as a fixed interest and the same will be applied, irrespective of

the balance outstanding or the rate of interest applicable.

This field displays the value as **Fixed Rate** if the **Credit interest** option is selected in the **Rate Type** drop-down list.

Tier Definition

Slab Definition

[Mandatory, Drop-Down]

Select the slab definition from the drop-down list.

The options are:

- Non Tiered
- **Tiered - Term Based**:- For defining penalty interest across all stages
- **Tiered - Amount Based**: - For FPI (first period installment) loans, partial payoff penalty and EFS penalty
- Tiered - Amount Term Based

This field displays the value as **Non-Tiered**, if the **Credit interest** option is selected in the **Rate Type** drop-down list.

Tier Criteria

[Display]

This field displays the tier criteria.

The options are:

- Cumulative
- Incremental

By default **Cumulative** option is displayed.

Tiered Term Lookup

[Conditional, Drop Down]

Select the tier term lookup from the drop-down list.

This field is enabled if the **Tiered - Term Based** option is selected in the **Slab Definition** drop-down list.

The options are:

- Overdue Days: The effective rate will be applicable as per the overdue days in the loan account
- Elapsed Term: The rate plan will be effective as per the elapsed term
- Remaining Term
- Sanctioned Term

Tiered Lookup Balance

[Conditional, Drop Down]

Select the tier lookup criteria for amount based tier structure from the drop-down list.

If the **Tier Criteria** is **Incremental** then it defaults to **Interest Base** option. If the **Tier Criteria** is **Cumulative** one of the following options needs to be selected:

- Disbursed Amount – The disbursed amount of the loan
- Sanctioned Amount – The original sanctioned amount
- Interest Base- The outstanding principal plus the existing unpaid arrears.
- Outstanding Principal- Only the outstanding principal.

Control Parameters

This section is disabled if **Rate Definition** field is selected as **Fixed Amount**.

Ceiling Rate [Conditional, Numeric, Three, 10]
 Type the ceiling rate.
 It is the maximum interest rate that is applicable to a product.
 The value entered in this field should not be less than 0 and greater than 999.99999. The rate should be less than or equal to maximum interest rate.
 This field is disabled if the **Credit interest** option is selected in the **Rate Type** field.

Floor Rate [Conditional, Numeric, Three, 10]
 Type the floor rate.
 It is the minimum interest rate that is applicable to a product.
 This field is disabled if the **Credit interest** option is selected in the **Rate Type** field.

Column Name	Description
TermStartMonths	[Mandatory, Numeric, Three] Type the number of months for the slab, which is being defined. The system by default displays the minimum term defined at the product level. This value cannot be modified. Click the Term+ button to add a new start term slab. The term that is defaulted by the system cannot be modified. For every new term, click this column to type the appropriate start month.
TermStartDays	[Mandatory, Numeric, Two] Type the number of days for the slab, which is being defined. The system by default displays the minimum amount defined at the product level. This value cannot be modified. Click the Term+ button to add a new term. For every new term, click this column to type the appropriate start day.
SlabAmount	[Mandatory, Numeric, 13, Two] Type the amount for the loan. The system by default displays the minimum amount defined at the

product level.

Click the **Amt+** button to add a new amount.

For every new amount slab, click this column to type the appropriate start amount for the slab.

11. Click the **Details** button to enable the **Details** tab.

12. Enter the required information.

Field Description

Column Name

Description

Sr No

[Display]

This column displays the system-generated serial number, based on the number of slabs defined in the plan.

Slab Amount

[Display]

This column displays the start loan amount defined for the tier for

amount based tier.

Start Months	[Display] This column displays the number of months defined for the term based tier.
Start Days	[Display] This column displays the number of days defined for term based tier.
Interest Index	[Conditional, Pick List] Select the interest index defined for the tier from the pick list. This field is disabled if the Fixed Amount option is selected in the Rate Definition field. This field is enabled if the interest calculation method is defined as Tiered Floating at the product level.
Interest Rate	[Display] This column displays the rate of interest applicable for the selected interest index. It displays up to 10 digits after decimal. The propagation of the index level rates to this screen for PPF and EFS rate types will display up to five digits after decimals. However, for the actual application of the rate, the complete derived rate will be used.
Interest Variance	[Conditional, Numeric, Two, 10] Type the variance on the interest for the respective slab. User will be able to provide variance up to five digits after decimal. The value entered in this field is validated with the Product Master Maintenance (Fast Path: LNM11) option. This field is disabled if the Fixed Amount option is selected in the Rate Definition field.
Net Rate	[Display] This column displays the rate at which the interest will be calculated. It displays up to 10 digits after decimal. <i>Net Rate = Interest Rate + Interest Variance</i> The net rate for PPF and EFS displayed will support up to five digits after decimal. The net rate should be within the minimum and maximum interest rate defined in the Product Master Maintenance (Fast Path: LNM11) option.
Fixed Amount	[Conditional, Numeric, 13, Two] Type the fixed amount for the selected slab. This field is enabled if the Fixed Amount option is selected in the Rate Definition field..

13. Click the **Ok** button.
14. The system displays the message "Record Added...Authorisation Pending..Click Ok to continue". Click the **Ok** button.

15. The loan product rate plan details are added once the record is authorised.

10.4. LNM41 - Interest Rules

Interest computation forms a major role in the loan account. Interest rule identifies the method in which interest has to be calculated.

- The interest base (the amount on which the interest has to be calculated)
- The period (the number of days for which the interest has to be applied)
- The rate (the rate in percent at which the interest has to be computed)

The rules are defined, based on the above components (principal, period, and rate) that are retrieved from an account for calculating interest.

Separate interest rules are required to be set up for

- Regular interest
- IOA or Penalty interest
- Post Maturity interest
- EFS penalty
- PPF penalty
- Subsidy
- Compounding Interest

For each of the above interest types, the interest rate structure, accrual basis, base for computation and rounding parameters can be set up.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add interest rule

1. Type the fast path **LNM41** and click **Go** or navigate through the menus to **Global Definitions > Loan > Interest Rules**.
2. The system displays the **Interest Rules** screen.

Interest Rules

Field Description

Field Name

Description

Rule ID

[Mandatory, Numeric, Five]

Type the Interest Rule ID.

Interest rule ID is a unique number, which represents the interest rule.

Rule Name

[Mandatory, Alphanumeric, 40]

Type the name for the interest rule.

Interest Type

[Mandatory, Drop-Down]

Select the interest type from the drop-down list.

As mentioned above a schedule setup in loans requires separate interest types to be defined each having different computation parameters and characteristics.

The options are:

- **Regular**-This interest type is ideally defined for

the regular stage of the loan. Regular stage from the interest rules point of view would also include the IOI and the Moratorium stage, if applicable. Interest base for regular interest is set up differently for actual balance loans and schedule balance loans

For Actual Balance type loans the interest base is updated based on the arrears outstanding on the account. Irrespective of the schedule of repayments generated at the time of disbursement if there are arrears pending on the account then these get added to the interest base and the interest is thus charged on outstanding interest as well. This can be set up as part of the interest rules definition by indicating which arrears should be considered as part of interest base

On the other hand in case of scheduled balance loans irrespective of arrears on the account the interest is calculated as per the schedule only.

- **Penalty-** Separate rules can be set up for processing of Penalty (IOA) interest. The penalty interest base on which the penalty will be calculated is specified in the interest rules. The user can select the arrear types which will be the base for calculating the penalty. These arrears may include Interest arrears, Charge arrears, Penalty arrears and Principal arrears
- **Partial Payoff Penalty-** Partial payoff results in reduction of part of the principal amount over and above the arrears due. A bank may thus choose to charge a partial payoff penalty. This penalty is set up as an interest rule and attached to the stage at which the penalty is to be charged. This is usually the regular stage of the loan
- **EFS Penalty-** Early or Final settlement indicates that the loan account is being settled and closed before the term of the loan ends. The bank may charge some penalty for such early settlements. The penalty is added to the outstanding arrears and total principal due to arrive at EFS amount
- **Post Maturity-** On completion of the given term of a loan if the loan amount remains outstanding on the loan account is meant to have entered in the Post Maturity stage. The bank will need to continue to charge interest on the loan account though the term has expired. A separate interest rule of Post Maturity type is defined and the Post Maturity Installment Rule together with the Post Maturity Interest Rule is defined at the time of **Schedule Setup** (Fast Path: LNM98). In Post Maturity stage the entire loan outstanding together with Interest and other charge arrears become due. Interest is calculated on the entire outstanding loan amount including interest and

other arrears

- **Compounding Interest-** This interest type is defined when compounding interest is to be computed on the outstanding arrears. However, principal balance or principal arrears will be excluded for computing compounding interest. This field is not modifiable.
- **Credit Interest**
- Subsidy Margin

3. Click the **Add** button.
4. Enter the rule ID and name.
5. Select the interest type from the drop-down list.

Rule Definitions

Field Description

Field Name

Description

Computation

Accrual Basis

[Mandatory, Drop-Down]

Select the interest accrual basis from the drop-down list.

This field denotes the interest accrual basis to be applied to the interest rule being defined. It defines the way in which number of days is calculated between two dates for interest computation.

FLEXCUBE Retail supports eight accrual basis.

The options are:

- **Euro 30/360** – 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.

- **US 30/360** - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Actual/Actual** - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- **Actual/360** - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- **Euro 30/Actual** - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- **US 30/Actual** - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.
- **Actual/365** - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator.
- **IND30/360**- 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator. (Feb is 30 if the dates are calendar).In case, the bank wants 30 days in all calculations the following can be done: For disbursement on Anniversary or Non month end cases - use US30/360. For disbursement on Calendar Month end cases - use IND30/360.
- Week/364

Once added, this field cannot be modified or amended.

Interest Base

Interest computation is driven on two methods, viz., on Actual balance or on expected balance. It is therefore imperative to enable the system to recognize the amount on which the interest is to be calculated. For this purpose the interest base is to be defined.

This section is enabled if the **Regular**, **Penalty** or **Subsidy Margin** option is selected in the **Interest Type** drop-down list.

Base Behavior

[Conditional, Drop-Down]

Select the base behavior from the drop-down list.

As mentioned above, there are two methods for calculating the interest, viz., Expected or Schedule. The difference between Actual and Expected balance loan occurs only in case of arrears. Therefore at the time of schedule generation there is no effect of this aspect. The schedule generated by system would be same in both cases and would follow the expected balance. In Expected method the system will consider the schedule balance as the base whereas in Actual balance the system will recognize the actual loan outstanding balance which would include the arrears component as well.

The options are:

- **Expected**-The interest calculation will not look at the actual balance and will compute interest on the scheduled expected balance only. In other words irrespective of the repayment status the interest will be calculated on the original schedule

balance only.

- **Actual**-The interest will be computed on the actual balance.
- **Normal** – This option is the selected to define interest rule for penalty.
- **Slabs** – If this option is selected, it allows the user to apply the penalty as per the penalty slab.

Principal

Principal

[Mandatory, Drop-Down]

Select the appropriate principal option, to include the principal for the interest base, from the drop-down list. Selection of this field is to be done in conjunction with the selection of the Principal Arrear options, viz., None, Include or Exclude.

The options are:

- **None**-This option is applicable only for Penalty interest type. This is because the penal interest is calculated on the arrears which can include Interest, Charge and Principal arrears. The system automatically assumes this option on selection of Penalty interest type. This option cannot be selected if the **Subsidy Margin** or **Regular** option is selected in the **Interest Type** drop-down list.
- **Outstanding Balance**- This is the most commonly used option for regular interest calculation of loans. This field is enabled only for Regular, EFS (Early or Final Settlement) interest and Post Maturity interest types.

In case of EFS Penalty (Early or **Final Settlement**⁷) this field value indicates the "outstanding" principal amount being paid off after set off against all arrears. The system automatically selects Outstanding balance as the base for interest type 'EFS Penalty'.

In PMI stage the entire outstanding balance becomes the arrear and thus the outstanding balance will be taken as the interest base.

In case the base behavior selected is Expected the system will automatically select the Outstanding Balance as the Principal base and will exclude the Principal arrears. This will ensure that the interest calculation will happen on the schedule balance only.

On the other hand if the base behavior selected is Actual and the Principal base is Outstanding balance, the commonly used combination will be to include the Interest and charge arrears but to select Principal Arrears as 'None'. This is because the Outstanding balance already includes the Principal arrears. System will not allow to opt for the 'Include' option in the Principal Arrear field with this combination.

Selection of 'Exclude' Principal arrears in combination with base behavior as Actual and Outstanding balance as base is not advisable as interest will be calculated on scheduled principal amount which is in

⁷(It is the liquidation of the loan account on or after maturity date by paying the final installment due.)

contradiction with the selected combination.

- **Sanctioned Amount**-The sanctioned amount is taken as the base for computation of the interest. This option is available only for Regular Interest type.
- **Disbursed Amount**- The actual amount disbursed by the bank which may be less than or equal to the sanctioned amount is taken as the base for computation of the interest.
- **Principal Paid-off**-This option is applicable only when the Interest type selected is Partial Payoff Penalty. The Partial Payoff Penalty will be calculated on the excess amount repaid after appropriating all the arrears including the Penalty Interest. Thus all the fields in the arrears grid will get disabled as the excess amount repaid becomes the base for calculation of the Partial Payoff Penalty.
- Net Credit Balance

Include Advances

[Conditional, Check Box]

Select the **Include Advances** check box to render the Advance payment amount to reduce the outstanding principal amount to arrive at the actual interest base.

Advance payment is the installment amount paid over and above the pending arrears.

This field is enabled if the **Regular** or **Subsidy Margin** option is selected in the **Interest Type** drop-down list.

Include Contribution

[Conditional, Check Box]

Select the **Include Contribution** check box to include the contribution amount to reduce the outstanding principal amount to arrive at the actual interest base.

This reduces the actual interest base and the customer can avail interest benefit for the contribution amount (if any) still pending after disbursement in the **Settlement Payout GL** defined in the **Product Master Maintenance** (Fast Path: LNM11) option.

This field is enabled if the **Regular** or **Subsidy Margin** option is selected in the **Interest Type** drop-down list.

Arrears

Rule definition requires to specify the inclusion or exclusion of various types of arrears. Accordingly the interest base gets updated for computation of various types of interest.

This section is enabled if the **Actual** or **Normal** option is selected in the **Base Behavior** drop-down list.

Interest Arrears

[Optional, Check Box]

Select the **Interest Arrears** check box to include interest arrears for the interest base calculation.

All interest arrears can be used as part of base calculation for interest/penalty base.

If the Base Behavior selected is **Expected** then this check box will be disabled. This is because arrears do not form part of interest base in

case of an Expected schedule balance type of loan.

For Regular interest type with the Base Behavior selected as **Actual** and Principal base selected is any of the available options, if this check box is selected then the interest arrears will be considered as part of the interest base.

Charge Arrears

[Optional, Check Box]

Select the **Charge Arrears** check box to include charge arrears for the interest base calculation.

Charge arrears include arrears like service charges, outgoings, legal fees and insurance premium charged on the loan account. If in arrears, these amounts can be used as part of interest base or penalty base computation.

The other conditions are similar to ones explained above in the Interest arrears.

Penalty Arrears

[Optional, Check Box]

Select the **Penalty Arrears** check box to include penalty arrears for the interest base calculation.

Interest on Arrears or IOA/Penalty arrears can be used as part of Regular interest, Penalty interest or Post Maturity interest types. It should be noted that selection of the Penalty Arrears would result in penalty interest compounding. In case of using this parameter for interest base, care needs to be taken to set appropriate frequency for Penalty interest compounding at schedule definition. If Penalty interest compounding for interest is set as None in schedule definition, ticking this field will have no effect. The Penalty arrears check box selection would be ideally used for Post Maturity Interest type where the bank wants to charge interest on Penalty interest arrears.

Compounding Interest Arrears

[Optional, Check Box]

Select the **Compounding Interest Arrears** check box to include compounding interest arrears for the interest base calculation.

If this box is selected, the unpaid compounding interest arrears on the loan will be considered for interest computation

This field will be enabled only for the following interest types:

1. Regular Interest
2. Penalty Interest
3. Compounding Interest
4. Post Maturity interest

This field will be disabled for:

1. Partial Payoff penalty
2. EFS penalty
3. Credit Interest
4. Subsidy Margin

Principal Arrears

[Optional, Drop-Down]

Select the principal arrears from the drop-down list.

Interest computation on principal arrears is determined by selection of the options under this field.

This selection has to be done in conjunction with the selected Principal base as explained above, i.e., None, Outstanding Balance, Sanctioned Amount or Disbursed Amount. If any principal is in arrears it would already be part of outstanding. So user needs to take this into account while setting this parameter.

This field is not applicable for Partial Payoff Penalty and EFS Penalty interest types.

The options are:

- **None**- Since interest base is already calculated on outstanding principal amount, this option is usually used for interest base computation for Actual balance loans. This avoids double counting in Actual balance Loans
- **Include**- This indicates that the principal arrears should be added over and above to the outstanding principal. This option is usually used only for Interest Type Penalty computation where Principal base itself is set to None
- **Exclude**- If interest is to be calculated on scheduled principal amount, in schedule balance type of Loans this option is usually used. This will exclude outstanding arrears and only consider the scheduled principal balance

Rounding Rules

Rounding Method

[Mandatory, Drop-Down]

Select the rounding method from the drop-down list.

Interest arrears or any type of penalty arrears amount computed by the system can be set up to rounded by various methods as per the Banks requirement. The number of places to which the rounding is to be done can also be specified as 1, 10, 100 and 1000.

The options are:

- Raise
- Cutoff
- Round

For more information, refer to [Example 01](#) provided at the end of the option.

Nearest Amount To Round

[Mandatory, Drop-Down]

Select the nearest amount to round up from the drop-down list.

The options are:

- 1
- 10
- 100

- 1000

Control Parameters

Minimum Interest Amount

[Conditional, Numeric, 13, Two]

Type the minimum interest amount that is to be paid.

This field is enabled if **Penalty** is selected in the **Interest Type** field.

7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** button.
9. The interest rules are added successfully once the record is authorised.

Example 01: Examples of rounding

The available methods in Interest rules set up are as follows:

- Raise – The interest amount is raised to the next higher decimal place
- Cutoff – The interest amount is truncated at the specified decimal place
- Round – The interest amount is rounded up if the decimal place is .5 or greater and rounded down if less than 0.5

Interest Amount	Rounding method	Nearest amount to round to	Rounded Amount
10095.8463	Raise	1	10095.85
		10	10095.9
		100	10096
		1000	10100
10095.8463	Cutoff	1	10095.84
		10	10095.8
		100	10095
		1000	10090
10095.8463	Round	1	10095.85
		10	10095.8
		100	10096

		1000	10100
--	--	------	-------

10.5. LNM42 - Product Interest Attributes

Using this option you can link the defined interest rules with various products.

In interest rules the various type of interests, viz., regular, penalty, partial, payoff penalty, EFS penalty and post maturity interest and compounding interest are defined. Only interest rules attached to a product from product interest attributes are available for linking at the **Schedule Type Maintenance**(LNM98) option.

All interest related GLs are defined under the **Product Interest Attributes Maintenance** (FP:LNM41). Further the accounting basis, i.e., whether the interest calculation should be on accrual or cash basis can be specified through this maintenance for Penalty interest type.

Definition Prerequisites

- [LNM41 - Interest Rules](#)
- [LNM11 - Product Master Maintenances](#)
- [GLM02 - Chart of Accounts](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add product interest attributes details

1. Type the fast path **LNM42** and click **Go** or navigate through the menus to **Global Definitions > Loan > Product Interest Attributes**.
2. The system displays the **Product Interest Attributes** screen.

Field Description

Field Name	Description
Product Code	<p>[Mandatory, Pick List]</p> <p>Select the product, for which the Interest Attribute is to be defined, from the pick list. The pick list lists only the authorized loans products.</p> <p>Product Code is a manually generated unique identifier for the Loan product.</p>
Currency	<p>[Display]</p> <p>This field displays the currency code in which the product is defined.</p> <p>The list of valid currencies is maintained in the Currency Code Maintenance (Fast Path: BAM56) option.</p> <p>All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.</p>
Interest Rule	<p>[Mandatory, Pick List]</p> <p>Select the interest rule from the pick list.</p>

It is mandatory to define and download the **Interest Rules** (Fast Path: LNM41) before defining the **Product Interest Attributes**.

The system displays the name of the interest rule adjacent to the interest rule code.

Interest Type [Display]

This field displays the interest type associated with the interest rule selected in the **Interest Rule** field.

Interest rules facilitates defining the various types of interests, viz., regular, penalty, partial, payoff penalty, EFS penalty and post maturity interest and compounding interest, credit interest and subsidy margin.

Interest Treatment

Interest Treatment [Mandatory, Drop-Down]

Select the interest treatment from the drop-down list.

Accounting

It is mandatory to select either the Cash Basis or Accrual Basis option. The system enables or disables the fields for modification based on the system configuration and interest types maintained for the interest rules. For Example: For PPF, EFS interest types the accounting can be configured as Cash basis. For regular, post maturity interest types the accounting can be configured as accrual basis.

Cash Basis [Optional , Radio Button]

Click **Cash Basis**, if accounting should be done on the cash basis. In **Cash Basis** the interest is calculated online at the time of the transaction, i.e., the accounting entries are passed only on the day the transaction is performed.

Accrual Basis [Optional, Radio Button]

Click **Accrual Basis**, if accounting should be done on accrual basis. "Accrual" of Interest on loan accounts is the process by which income is "earned" or recognized at a pre-defined frequency. This means the accrual frequency is the frequency with which accounting entries to recognize interest accrual are passed. Thus, accrual of interest on Loans is periodic, the frequency being decided at product level and can be set as Daily, Monthly or higher.

GL Codes

The Suspended GL fields are disabled for subsidy interest types.

Interest Income [Mandatory, Numeric, Nine]

Type the appropriate GL code with Income type for recording Income Earned from Loan accounts under this product.

This GL account is credited and the Interest Accrued GL account is debited at the time of Loan Interest accrual on an account.

This is an Income type GL.

Suspended Interest [Mandatory, Numeric, Nine]

Type the appropriate GL code with Liability type for recording Income

Earned from suspended accounts.

This GL account is credited and the Suspended interest Accrued GL account is debited at the time of Interest accrual on a Suspended account.

This GL is a Liability type of GL.

Interest Accrued

[Mandatory, Numeric, Nine]

Type the appropriate GL code with Asset type for recording Interest Accrued on Loan accounts.

This GL account is debited and the Interest Income GL account is credited at the time of Interest accrual on a Loan account with Normal Accrual status.

This GL is an Asset type of GL.

Suspended Interest Accrued

[Mandatory, Numeric, Nine]

Type the appropriate GL code with Asset type for recording Interest Accrued on Suspended Loan accounts.

This GL account is debited and the Suspended interest (Liability) GL account is credited at the time of Interest accrual on a Suspended Loan account.

This GL is a Asset type of GL.

Interest Receivable

[Mandatory, Numeric, Nine]

Type the appropriate GL code with type asset for recording interest receivable amount on Loan accounts.

Entries to this GL happen only after the accruals have happened on the loan account. During charging of interest on Loan accounts the Interest Receivable GL account is debited and the Interest Accrued GL account is credited (reversed). Once this GL is debited it implies that the arrear is generated and the interest amount becomes due from the customer.

This is an asset type GL.

Suspended Interest Receivable

[Mandatory, Numeric, Nine]

Type the appropriate GL code with asset type for recording Interest Receivable amount on suspended accounts.

During charging on an already suspended account, this GL account is debited and the Suspended Interest Accrued GL is credited.

When an account turns non-performing and if the clawback facility is enabled, all the pending interest arrears are transferred to this GL. In this case this GL is debited and the Interest Receivable GL is credited.

This is an asset type of GL.

Unearned Interest

This GL is currently not in use.

Suspended Recovery

[Mandatory, Numeric, Nine]

Type the appropriate GL code with Income type for recording suspended interest recovered from suspended accounts.

When credits are made to suspended accounts for recovery of interest, the Suspended Interest (Income GL) is debited to the extent of recovery and this GL is credited.

This is ideally an income type of GL where the bank can monitor the interest amount that has been recovered from the account after it got suspended.

Interest Waiver

[Display]

This field displays the interest waiver.

The waived interest account is debited this GL account.

Interest Expense

[Display]

This field displays the interest expense only if credit interest rule is selected and product type is revolving.

Interest Income Adjustments

[Mandatory, Numeric, Nine]

Type the appropriate GL code with income type for recording interest income adjustment from loan accounts under this product.

This is an income type GL.

Suspended Interest Income Adjustments

[Mandatory, Numeric, Nine]

Type the appropriate GL code with liability type for recording suspended interest income adjustment from suspended accounts.

This is an liability type of GL.

Margin/Profit

[Conditional, Numeric, Nine]

Type the income GL code.

This GL will reflect the actual Interest income. The GL will be credited only when interest is paid by the customer. The interest income GL will be debited to the extent of credit received in the interest receivable GL for both normal loan accounts.

This field is enabled if the **Regular** option is selected in the **Interest Type** field.

3. Click the **Add** button.
4. Select the product code and interest rule from the pick list.
5. Enter the interest treatment, accounting basis and GL code details.

10.6. LNM88 - Loan Product Repricing/Revision Maintenance

Using this option you can define re-pricing plan by selecting the frequency for re-pricing, reschedule type, calendar type, anniversary date, start date, etc.

This plan in-turn will be linked to a loan product. Based on the frequency selected in the plan linked, system will re-price the loan on the effective date. The term of the fixed / floating rate defined at product level, can be modified through the **Loan Account Revision/Repricing** (Fast Path: LN089) option at the account level.

In case no re-pricing plan is maintained and linked to a loan product, the user will be able to use the Loans Account Repricing/Revision Maintenance option (FP: LN089)

Definition Prerequisites

- [LNM11 - Product Master Maintenances](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add loan product repricing and revision details

1. Type the fast path **LNM88** and click **Go** or navigate through the menus to **Global Definitions > Loan > Loan Product** Repricing/Revision Maintenance.
2. The system displays the **Loan Product** Repricing/Revision Maintenance screen.

9. The loan product rate repricing/revision details are added once the record is authorised.

10.7. LNM81 - Rate Change

The **Rate Change** option allows maintenance of future dated interest rate change, effective at the interest index code level at a future date. Backdated rate change is not allowed.

Further, the rescheduling of loan accounts due to the rate change can be based on recalculate term, or recalculate installment. This is however applicable for EMI loans only. In case of IPI type loans, system will recalculate the installment amount and the term will remain the same.

If an advice is to be generated for all accounts which have undergone a rate change, it is possible by setting the advice flag during the rate change definition.

To perform an index level rate change, the interest index code needs to have a new rate maintained with the new effective date. The effective date has to be greater than the current date. This can be done by using the **Interest Index Rate** (Fast Path: BAM13) option. Once this is done, the new rate and effective date details are defaulted for index level rate change for loan accounts in this option.

Note: The new rate will not be applied to the products, if the **Rate Revision** check box at the product level is not selected for product attached to an index.

Definition Prerequisites

- [BAM12 - Interest Index Maintenance](#)
- [BAM13 - Interest Index Rates](#)
- [LNM11 - Loan Product Master](#): Rate revision flag should be enabled
- [LN060 - Loans Product Rates Plan](#): The rate definition should be Floating Rate

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add rate change details

1. Type the fast path **LNM81** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Rate Change**.
2. The system displays the **Rate Change** screen.

10.8. Installment - Repayment Rules

Installment - Repayment Rules

10.9. LNM43 - Installment Rules

This option allows you to define different installment rules. Installment rule helps define

- The basis on which the computation of the loan repayment amount is to be drawn. The computation formula are inbuilt in the system
- The Year base, i.e., either of Calendar or Anniversary year base
- Rounding rules
- The predefined installment rules can be applied to the **Schedule Type** (Fast Path: LNM98) option.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add installment rule

1. Type the fast path **LNM43** and click **Go** or navigate through the menus to **Global Definitions > Loan > Installment Rules**.
2. The system displays the **Installment Rules** screen.

Installment Rules

Field Description

Field Name	Description
Rule ID	[Mandatory, Numeric, Four] Type the installment rule ID. An installment rule ID is a unique number, which represents the installment rule.
Rule Name	[Mandatory, Alphanumeric, 40] Type the name for the installment rule.

3. Click the **Add** button.
4. Enter the rule ID and name.

Rule Definitions

Field Description

Field Name	Description
------------	-------------

Computation

Computation Formula

[Mandatory, Drop-Down]

Select the computation formula from the drop-down list.

As mentioned above the Installment Computation Formulae are inbuilt in the **FLEXCUBE** system. The basis on which the installment will be calculated will be dependent on the selection of the computation formula.

The options are:

- **ARM** - It is a unique method of calculating installment payments based on weighted average calculation. The interest rule is defined on the basis of tiered term. For Example: The interest for the first 3 months (month no. 1 to 3) = 10%. The interest for the next 3 months (month no. 4 to 6) = 11%. The interest for the next 4 months (month no. 7 to 10) = 11.5%.

The interest for the next 2 months (month no. 11 and 12) = 12%

- **IO in Arrears** - This is the Initial stage when disbursement occurs. During this stage the Principal installment amount is not calculated and therefore there is no repayment of principal amount during this stage. The customer is expected to repay only the interest charged on the loan account as and when the arrears are generated. IO in Arrears is not a mandatory stage.
- **IPI-** In IPI type of installment the Principal component of the installment remains constant throughout the term of the loan. The interest calculation is driven on the basis of the interest rule defined, i.e., either of Actual balance or Schedule balance. Thus the amount of installment (Principal+Interest) will be different on every due date.
- **Moratorium-** Moratorium is similar to IOI type of Installment. However, in case of Moratorium the system does not charge the interest amount till the end of the Moratorium period. In other words no amount becomes payable during the currency of the Moratorium Period. Interest is computed and compounded periodically, but the same is capitalised at end of Moratorium period.
- **Post Maturity** - On completion of the given term of a loan if the loan amount remains outstanding the loan account is meant to have entered in the Post Maturity stage. Post Maturity stage is mandatory in the schedule definition and the system validates the existence of the PMI stage at the time of schedule setup. A separate interest rule of Post Maturity type is defined and the Post Maturity Installment Rule together with the Post Maturity Interest Rule is defined at the time of **Schedule Setup** option (Fast Path: LNM98). In Post Maturity stage the entire loan outstanding together with Interest and other charge arrears becomes due. Interest is calculated on the entire outstanding loan amount including interest and other arrears.
- **IO in Advance:** Select this option to perform advance payment for IOI. This is part of the total IOI period as per the repayment schedule of the loan. This option is used by the customer if some benefit is provided for making advance payment of the interest, yet to accrue to the loan account.

**Charge Broken
Period Interest on
First repayment**

[Display]

This field displays the interest charges on broken period for the first repayment.

By default, this check box is selected if the **IO in Arrears, Moratorium, Post Maturity, IO in Advance** option is selected from the **Computation Formula** drop-down list.

**User Specified
Principal Repayment**

[Conditional, Check Box]

Select the **User Specified Principal Repayment** check box to decide the principal repayment is as specified by the user or as computed by the system.

This option is applied only for IPI computation formula in the regular stage of the loan.

If this field is selected, at the time of host disbursement using **Account Schedule** (FP: LN521), the principal repayment amount and the repayment date for principal component will be keyed in by the user. The interest repayment date will be worked out by the system as per the interest repayment frequency set up in **Schedule Type** (Fast Path: LNM98) and disbursement date as per the current functionality. The interest amount for each repayment cycle will be derived by the system using the principal repayment date and amount keyed in by the user.

If this field is un-selected, at the time of loan disbursement the schedule of repayment will be drawn as per the current IPI installment computation functionality.

Dates

Year Base

[Mandatory, Drop-Down]

Select the year base, for the installment calculation, from the drop-down list.

The options are:

- **Calendar** - A calendar loan will always have installment/interest payments on month ends. For e.g. a loan is disbursed on 10-Mar-2006 – for IOI stage the repayment can be made to fall due on 31-Mar-2006 and for regular stage (IPI) the repayment will fall due on 30-April-2006
- **Anniversary** - An Anniversary loan on the other hand will take the anniversary of the last disbursement date or any other date specified as the date of charging. For e.g. a loan is disbursed on 10-Mar-2006-for IOI stage the repayment can be made to fall due on 31-Mar-2006 and for regular stage (IPI) the repayment can be made to fall due on any date equal to or greater than 10-April-2006 but not later than 10-May-2006.

Rounding Rules

The fields in this section are enabled if the **ARM** or **IPI** option is selected in the **Computation Formula** drop-down list.

Rounding Method

[Mandatory, Drop-Down]

Select the rounding method from the drop-down list.

The installment amount that is calculated after computation of principal and interest due can be rounded as per banks requirement.

The options are:

- Raise
- Cutoff
- Round
- No Rounding: This option cannot be selected if the **ARM** or **IPI** option is selected in the **Computation Formula** drop-down list. For other options this field.

*Examples of rounding methods have been given below.

Nearest Amount To Round To

[Mandatory, Drop-Down]

Select the nearest amount to round up from the drop-down list.

The options are:

- 1
- 10
- 100
- 1000

6. Click the **Ok** button.
7. The system displays the message "Record Added...Authorisation Pending...". Click the **OK** button.
8. The installment rules are added successfully once the record is authorised.

* Examples of rounding:

Installment Amount	Rounding method	Nearest amount to round to	Rounded Amount
10095.8463	Raise	1	10095.85
		10	10095.9
		100	10096
		1000	10100
10095.8463	Cutoff	1	10095.84
		10	10095.8
		100	10095
		1000	10090
10095.8463	Round	1	10095.85
		10	10095.8
		100	10096
		1000	10100

10.10. LNM98 - Schedule Types

A product definition contains parameters that will be common across all loan accounts under the product. In order to define specifically the interest rules and installment rules that will be applied, a schedule plan is required to be attached to the product. One product can thus have more than one schedule plan attached to it.

A schedule type enables defining the repayment parameters such as the number of installments, interest frequency, the number of repayment stages, interest due frequency and repayment stage types (comprising of Interest Only Installment, Equated Periodic Installment, or Interest and Principal Installment). Disbursement of loan cannot be done without a schedule attached to it. This screen supports defining schedules with post maturity stage only for products which are categorized as 'Bill/LC/BG' products.

The required Schedule Type or plan can be attached at the time of Loan account opening.

Definition Prerequisites

- [LNM11 - Product Master Maintenances](#)
- [LN060 - Loans Product Rates Plan](#)
- [BAM14 - Service Charge Code Maintenance](#)

Field Description

Field Name

Description

Stage Type

Stage Name

[Mandatory, Alphanumeric, 40]

Type the relevant stage name.

The stage name may be synonymous to the type of Installment rule being attached to the stage for ease of understanding.

Stage No

[Display]

This field displays the serial number for the stage being defined.

Installment Rule

[Mandatory, Pick List]

Select the installment rule applicable for the stage from the pick list.

Installment rule is set up for an interest type and it gives an indication of the type of loan.

FCR handles the following types of loan schedules/ stages:

- IOI
- EPI
- IPI
- FPI
- MOR
- PMI
- ARM
- SI

A loan could typically have the following stages:

- IOI
- Regular period (IPI or EPI or FPI)
- Post Maturity Period (PMI Stage)

Note: In the case of interest and principal type of installment (IPI), user specified repayment (installment type is selected as IPI with **User Specified Principal Repayment** check box as selected in **Installment Rules** FP: LNM43) can be set up only for principal paying regular stage of the loan.

For more information refer to the **Installment Rules** (Fast Path: LNM43) option.

Installment Type

[Display]

This field displays the type of installment based on the Installment Rule selected.

For more information refer to the **Installment Rules** (Fast Path: LNM43) option.

Interest Rule

[Mandatory, Pick List]

Select the interest rule applicable for the stage from the pick list.

Interest rules are set up for regular interest, post maturity interest, IOA penalty, EFS penalty and **PPF**⁸ penalty separately. For each of these interest types, the interest rate structure, accrual basis, base for computation and rounding parameters are set up.

Only interest rules attached to a product from product interest attributes are available for linking at the schedule type maintenance.

For more information refer to the **Interest Rules** (Fast Path: LNM41) option.

Base

[Display]

This field displays the balance on which the interest is calculated.

This could be either of:

⁸(Partial Pay-off: It is the payment of any principal amount before the same becomes due. The amount paid is less than the total amount of principal outstanding.)

- Actual – Interest base will be the Schedule Principal balance + Unpaid Arrears (including unpaid Principal Arrears)
- Expected – Interest base will be the Schedule Principal balance irrespective of the outstanding balance

This field is defaulted based on the **Interest Rule** selected for the stage.

Default Payments/Term

[Mandatory, Numeric, Three]

Type the period in months for a non-regular stage (IOI/Moratorium). This is applicable for **Only Principal Stages** or **First Principal Stage Onwards** option is selected in the **Loan Term Comprises Of** drop-down in the **Definitions** tab.

The system will validate the maximum allowable term against the term specified at the **Loan Product Master** (Fast Path: LNM11) option.

Interest Processing

This section is conditional, based on the rule selected in the **Installment Rule** field.

Compounding Frequency

[Conditional, Drop-Down]

Select the compounding frequency from the drop-down list.

If the accruals defined at the product is **Daily** and the compounding frequency defined is **Monthly**, then the accrued amount will get compounded **Monthly**. The options are:

- None
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly

This field is enabled for **IPI** or **Moratorium Installment** rule selected in the **Installment Rule** pick list.

Rest Period Frequency

[Conditional, Drop-Down]

Select the rest period frequency from the drop-down list.

The rest period frequency specifies the periodicity at which the interest base should be updated and has to be set up for each stage of a loan.

The options are:

- None
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly

- Every due date
- Daily

If the **Weeks** option is selected from the **Term Definition** drop-down list in the **Product Master Maintenances** (Fast Path: LNM11) option, then this field is set as **Every Due date**.

The rest period frequency is also dependent on the interest calculation basis.

Following are logical examples and the selection can be amended as per the requirement of the bank.

- For IOI stage, the system defaults the value as Daily.
- For Reducing balance/EPI loans it should usually be set to monthly or higher frequency. However, both IPI and EPI schedules can take any of the available values. The repayment frequency can also determine the selection of the rest period for EPI loans
- For Daily Balance/IPI type of loans the rest period frequency may always be set to None as the principal base is immediately updated on payment
- In PMI stage the entire loan outstanding becomes due in which case the rest period frequency may be defined as daily
- Rest period frequency as every due date may be used where a calendar based irregular schedule has been maintained

End Of Period Treatment

[Mandatory, Drop-Down]

Select the end of period treatment from the drop-down list.

The treatment for any unpaid arrears to be adopted at the end of term for each stage is to be selected. This option is usually applicable to Moratorium Loans where the arrears become due for payment only at the end of the Moratorium period. Hence the option of "Capitalize arrears and Uncharged Interest" may be selected.

For all other Installment types, the end of period frequency may be taken as None.

The options are:

- None
- Capitalize arrears + Uncharged Interest: Interest is computed and compounded periodically. But the same is capitalized at end of period typically applicable for Moratorium type of loans
- Add interest to first installment:
If schedule type is MOR-IPI-PMI, then after the moratorium period installment, the composite moratorium interest along with the IPI installment will get raised.
If schedule type is MOR-EPI-PMI, then after the moratorium period the moratorium interest will get charged with the first EPI installment. Here the installment amount will remain unchanged. EPI installment amount will be adjusted in the following sequence - Interest part of the installment, Moratorium Interest and then the remaining balance if any will get adjusted for the

principal component. Excess amount will get capitalized and will get adjusted in the subsequent installments.

Arrears Compounding Frequency

[Mandatory, Drop-Down]

Select the arrears compounding frequency from the drop-down list.

It is the frequency with which the arrears will be compounded to interest base. It acts in tandem with the rule set for interest base in the **Interest Rule** (Fast Path: LNM41) option.

The options are:

- None
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly
- Every due date
- Daily

Installment Details

This section is conditional, based on the rule selected in the **Installment Rule** field.

Principal Frequency

[Mandatory, Drop-Down]

Select the principal frequency from the drop-down list.

When defining a schedule type the frequency with which principal needs to be repaid at each stage is to be specified. The system will draw up a schedule for an account accordingly.

The options are:

- None/ At Maturity
- Weekly
- Bi-Weekly
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly

You can select the **Weekly** or **Bi-weekly** option, if the **Weeks** option is selected from the **Term Definition** drop-down list in the **Product Master Maintenances** (Fast Path: LNM11) option.

The commonly used Principal repayment frequencies are as under :

- **IOI Stage** – None/At Maturity as there is no principal repayment in IOI stage. This is the Initial stage when disbursement occurs and usually there is no repayment of principal amount during

this stage

- **Moratorium** – None/At Maturity - As interest in case of moratorium is payable only at the end of the Moratorium Period
- **EPI Stage** – Any of the available options. In EPI the sum of Interest and Principal repaid at a specified periodicity remains constant throughout the term. However in case of EPI, both the Principal and Interest repayment frequencies should be the same
- **IPI Stage** – Any of the available options. IN IPI the Principal amount being repaid every period remains constant whereas the interest amount changes accordingly. Thus the installment amount (Principal+Interest) changes at each repayment. There can be many variations to this schedule such as Bullet payment where the entire principal amount is paid off in one shot. The schedule will need to be specified by the user and the system will take up charging accordingly
- **PMI Stage** – None/At Maturity – This is because in PMI stage the repayment period itself would have expired and the entire loan outstanding become payable
- **FPI Stage** - Any of the available options. In FPI, the Principal amount is paid off first and the interest amount gets paid off later.

If **User Specified Repayment** check box is selected in **Installment Rules** (FP: LNM43), the principal repayment frequency will default to None / At maturity and will not be modifiable.

Interest Frequency

[Mandatory, Drop-Down]

Select the interest frequency from the drop-down list.

This is the frequency at which the interest is levied on the loan account. We can define separate frequency for the IOI and the IPI stage.

The options are:

- None/ At Maturity
- Weekly
- Bi-Weekly
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly

You can select the **Weekly** or **Bi-weekly** option, if the **Weeks** option is selected from the **Term Definition** drop-down list in the **Product Master Maintenances** (Fast Path: LNM11) option.

The commonly used Interest repayment frequencies are as under:

- IOI – Any of the available options
- Moratorium – None/At Maturity - As interest in case of moratorium is payable only at the end of the Moratorium Period
- EPI – Any of the available options. However in case of EPI, both the Principal and Interest repayment frequencies should be the same
- IPI – Any of the available options
- PMI – Any of the available options except None/At Maturity
- FPI – Any of the available options. In FPI, the Principal amount is paid off first and the interest amount gets paid off later. Ideally, the repayment frequency may be defined in sync with the Principal repayment frequency

Penalty Frequency

[Mandatory, Drop-Down]

Select the penalty frequency from the drop-down list.

Penalty interest is also commonly referred to as IOA. The frequency for charging IOA interest can be set up for each stage in a loans schedule. It can be the same or different from Interest and Principal charging frequency. There is no Penalty charging applicable in Moratorium stage as no arrears are raised. In any other stage the required frequency setting may be used. Ideally this frequency may be defined in sync with the Interest repayment frequency.

The options are:

- None
- Weekly
- Bi-Weekly
- Monthly
- Bimonthly
- Quarterly
- Half Yearly
- Yearly
- Every Due Date

You can select the **Weekly** or **Bi-weekly** option, if the **Weeks** option is selected from the **Term Definition** drop-down list in the **Product Master Maintenances** (Fast Path: LNM11) option.

Calendar Plan

[Mandatory, Pick List]

Select the calendar plan from the pick list.

Calendar plan is required only when a special schedule based on preset dates for when the installment payments will be made is prepared.

Billing Grace Days

For Future Use

One Billing Cycle

For Future Use

**Compounding
Interest Frequency**

[Mandatory, Drop-Down]

Select the compounding interest frequency at which the compounding interest needs to be computed and charged from the pick list . The actual charging date will be arrived by adding the frequency specified in this field to the first repayment date.

The options are:

- Monthly
- Bi-Monthly
- Quarterly
- Half Yearly
- Yearly

Note: If compounding interest on the arrears is not to be applied, then the rate of interest will be set up as 0% in product rate plan and this will be attached in the schedule. Modification of values in this field will be applicable to new loan accounts only.

9. Enter the appropriate information in the **Penalty** tab.

Field Description

Field Name	Description
Loan Term Comprises Of	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate option from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> Only Principal Stages: The loan term comprises the principal stages while drawing the schedule First Principal Stage Onwards: The loan term starts after the first principal stage starts. All the Stages : The loan term comprises of all the stages
Case I	<p>Only Principal Stages</p> <p>Defined Schedules: Moratorium, IOI, IPI, EPI, FPI, and PMI</p>

Loan Term: 36 months defined in **Loan Direct Account Opening** (Fast Path: LN057) option.

The system will allow to set the following schedule while disbursing the loan:-

- i. Moratorium
- ii. IOI
- iii. IPI: 12 months
- iv. FPI: 12 months
- v. EPI: 12 months (Loan tenure = iii+iv+v)

Period for IOI/Moratorium will be taken from **Default Payments/Term** field **Details** Tab. Suppose the default payment term is defined as 24 then the schedule will be drawn for this entire term. i.e 24 months of IOI/Moratorium and 36 months of IPI/EPI/FPI (Principal Stage).

Case II

First Principal Stage

If loan tenure is defined as 12 months and IOI/Moratorium + IPI/EPI/FPI +PMI stages are defined for an account. Then the account schedule will comprise of 12 months from the first IPI/EPI/FPI (Principal Stage). If there is a IOI/Moratorium prior to the first regular stage then the term is taken from **Default Payments/Term** field **Details** Tab.

Case III

All Stages

Defined Schedules : Moratorium, IOI, IPI, EPI, FPI, and PMI

Loan Term: 24 months defined in **Loan Direct Account Opening** (Fast Path: LN057) option.

The system will allow to set the following schedule while disbursing the loan:

- i. Moratorium: 1 month
- ii. IOI: 2 months
- iii. IPI: 9 months
- iv. EPI: 6 months
- v. FPI: 6 months (Loan tenure = i+ii+iii+iv+v)

Note: The system will allow to set any other combinations of terms also (by editing the stage term while disbursing the loan in LN521), provided the above mentioned rules are adhered to.

Max. IOI Term Allowed

[Mandatory, Numeric, Three]

Type the maximum term allowed for the Interest Only Installment stage.

The Interest only repayment period for a loan account depends upon the principal repayment capacity of the customer. For example: For a loan account of 10 years, if the customer's income is sufficient to make the principal repayment in 24 months than the IOI stage can be defined as 96 months. Therefore, IOI stage for a loan account is part of credit decision and the IOI term maintained in this field overrides the maintenance done at product level.

Note: You can modify this field only in case the schedule is not mapped to any loan account.

Stage No	[Display] This column displays the serial number for the stages. There can be a maximum of 99 stages defined for an account schedule.
Stage Name	[Display] This column displays the stage name. Ideally the stages could be mentioned as IOI , EPI or IPI or FPI or PMI.
Installment Rule	[Display] This column displays the installment rule applicable to each stage.
Int Rule	[Display] This column displays the name of the interest rule applicable to each stage.
Interest Rate	[Display] This column displays the interest rate applicable to each stage. It displays up to 10 digits after decimal.
Payments/Terms	[Display] This column displays the period in months for the maximum term allowed applicable to each stage.
Installment Frequency	[Display] This column displays the installment frequency applicable to each stage in the schedule. The installment frequency indicates the repayment frequency of the Principal component of the installment.
Interest Frequency	[Display] This column displays the interest frequency applicable to each stage in the schedule. The interest frequency indicates the repayment frequency of the Interest component of the installment.

12. Click the **Ok** button.
13. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
14. The details are added once the record is authorised.

Note: If the selected schedule to be modified/Deleted is already linked to any loan account the system will not permit modification of such a schedule. The message: "Deletion/Modification of Schedule Type linked to Account not allowed" is displayed.

Note: The PMI (Post Maturity Interest) stage is mandatory as the last stage for the schedule entered.

10.11. LNM90 - Loan Commitment Fee Plan Maintenance

Using this option you can define the Interest Rule, Product Interest Rates, and Commitment Fee charging frequency for a Term Loan Product. The commitment fee period will have two values :

- **Loan End Term** - All the loan accounts will have the commitment end date as the Loan End Date for the product where the commitment fee period is defined as Loan End Date. The commitment end date changes automatically when there is a change in the loan term. After account opening, the commitment end date = Loan Account opening date + loan term. This date is non-modifiable in the Commitment Schedule at the loan account level.
- **User Defined term** - All the loan accounts will have the commitment end date as the Account opening date + user defined term for the product where the commitment fee period is defined as User Defined term. After Account opening the commitment end date = Loan Account opening date + user defined term. You can modify the date in this option.

At the account level using the **Loan Account Commitment Schedule Details Maintenance** (Fast Path: LN090) option, it is possible to modify the commitment period. The commitment fee computation will be from the commitment start date and on every month end, the commitment fee will be levied to the Loan account. The commitment Fee arrear will be raised in the Loan Account on the month end even if the Loan Account is not disbursed. If the commitment end date is equal to Loan term, the commitment fee will be levied until the Loan maturity date. The commitment fee will be levied on the date of EFS/Loan closure/Write off date/Loan Maturity date if the same is earlier than the month end of the commitment end date. If the sanctioned amount is increased/decreased during the life of the loan, commitment fee calculation from that date will consider the increased/decreased commitment amount.

For more information refer to the [Example 01](#) provided at the end of this chapter.

Bank Code	[Mandatory, Pick List] Select the bank code from the pick list. Bank code is a unique code assigned to a bank.
Bank Name	[Display] This field displays the name of the bank for which the network is maintained.
Effective Date	[Mandatory, Pick List, dd/mm/yyyy] Select the date from which the new net worth will be effective from the pick list. The effective date can be the current system date or future date. The effective date can also be back dated, but there will be no recomputation / revalidation of the limit. If the effective date is the current system date, the transactions done after the maintenance of the new record will be processed based on the value in the new record. If the effective date is a future date, the new values will take effect from the effective date mentioned.
Network Currency	[Display] This field displays the currency of the network. The HO currency will be the default network currency.
Network Amount	[Mandatory, Numeric, 13, Two] Type the network of the bank in the network currency maintained.
Remarks	[Optional, Alphanumeric, 80] Type the reason for the change in network.

3. Click the **Add** button.
4. Select the bank code from the pick list.
5. Enter the effective date, network amount and remarks.

10.14. BAM55 - Transaction Limits Maintenance

Using this option you can maintain global limits for giving warning to the teller and rejecting the transaction. **FLEXCUBE** supports limit definition at customer / product / MCA / account level.

- If customer level is selected, the transaction limits will be defined for a given customer type / all customers.
- If product level is selected, the transaction limits will be defined at a product level. These limits will default to the account level.
- If MCA level is selected, the transaction limits will be defined for a particular MCA Number.
- If account level is selected, the transaction limits that are defaulted from the product level can be modified. Transaction limits cannot be added at the account level.

Through this maintenance, you can modify the per day transaction limit for a group of transactions created in the back end. Whenever a transaction is executed by the account holder through any e-transaction during the day, then the transaction amount will be validated with the unutilized balance of the Per day limit (U) maintained in this option against the corresponding group, based on the transaction mnemonic and e-channel type of that account. The transaction amount after being validated at the account level, will be validated against the total e-channel limit applicable at the LOB to which the customer belongs during online transaction processing only if the **Apply consolidated E-channel Limit** check box is selected at the LOB level (LOB of primary holder in case of joint accounts) in the **Line of Business Master** (Fast Path: BA431) option.

If the product currency and the branch currency are different and the channel transaction limits are defined in the branch currency then, when the transaction is initiated through a channel then the transaction amount will be converted to the branch currency at the transaction rate and then it will be validated with the unutilised per day limit for that specific transaction mnemonic as defined in this option.

For Example:

Branch currency is INR, product currency is USD, the unutilised transaction limit against the task code of ATM cash withdrawal is 80,000 INR at account level. Customer initiates an ATM cash withdrawal of 1000 USD, then it will be converted to INR using transaction rate say 41, $1000 \times 41 = 41000$. It will be compared with the unutilised transaction limit which is 80000. After this the transaction will be validated at customer level in similar way and if validated the unutilised balance will reduce by 41000 INR ie. 39000 INR at account level. Unutilised customer level limit will also get reduced to the extent of INR 41000.

All the E-channel limits consolidated limit at LOB level and individual limits at CASA account level will be reset and the amount utilized against each limit will be zeroised whenever the system/process date changes.

Definition Prerequisites

- [CIM08 - Customer Types Maintenance](#)
- [BA318 - Group Code Master](#)
- [BAM15 - Transaction Mnemonic Code](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the bank global limits

1. Type the fast path **BAM55** and click **Go** or navigate through the menus to **Global Definitions > Master > Transaction Limits Maintenance**.
2. The system displays the **Transaction Limits Maintenance** screen.

Field Description

Field Name	Description
Customer	[Optional, Radio Button]

Level	Select the Customer Level option to define e-channel limits at customer (type) level. This is the general global definition and will be applicable to all the customers accounts opened in the system.
Product Level	[Optional, Radio Button] Select the Product Level option to define e-channel limits at CASA product level. The limits at the specific product level are to be defined only if the products have separate limits to be tracked. This will be an additional check over and above the customer level limit.
MCA	[Optional, Radio Button] Select the MCA option to define the limits at Multi Currency Account level. The limits at the specific MCA level are to be defined only if the MCA have separate limits to be tracked. This will be an additional check over and above the customer and product level limit. This limit will be applicable for all the Accounts opened under that MCA. If this limit is set then system will ignore limit defined at customer and/or product level, if any, for the account.
Account Level	[Optional, Radio Button] Select the Account Level option to modify e-channel limits at CASA account level. If this option is selected, the limit check will be done for all amount based validations, for the channel based transactions.

Customer Information

The user has to maintain global bank limit for a customer type or for all customers i.e., data should be entered in atleast one of the two fields.

These fields are enabled only if the **Customer Level** option is selected.

Customer Type	[Conditional, Pick List] Select the appropriate customer type for which channel transaction limit needs to be defined from the pick list.
All Customers	[Conditional, Check Box] Select the All Customers check box to define transaction limit for all customers.

Product Information

Product Code	[Conditional, Pick List] Select the CASA product code from the pick list to define channel transaction limit at product level. This field is enabled only if the Product level option is selected. This field displays the product code under which the CASA account is opened if Account Number is entered in the account information grid.
Product Name	[Display] This field displays the name of the product selected in the corresponding field.

Multi Currency Account Information

MCA Number	[Conditional, Numeric, 20] Type the CASA/TD/RD multi currency account number. This field is enabled if the MCA level option is selected.
MCA Name	[Display] This field displays the name of the multi currency account holder selected in the MCA number field.

Account Information

Account Number	[Conditional, Numeric, 16] Type the valid CASA account number for which the e-transaction limit needs to be modified. This field is enabled only if the Account level option is selected.
Account Name	[Display] This column displays the short name of the primary account holder.

Effective Date

Effective Date	[Mandatory, Pick List, dd/mm/yyyy] Select the effective date from the pick list. Effective date should be equal to or greater than system process date.
-----------------------	---

3. Click the **Add** button.
4. Select the level at which the bank global parameters are to be maintained.
5. Select the customer type, product code or account number, depending on the level selected.
6. Enter the Transactions and aggregate limits information.

Field Description

Column Name Description

Limit Groups Information

Limit Group No	<p>[Mandatory, Pick list]</p> <p>Select the limit group number from the pick list. The system displays the limit group name in the adjacent field.</p> <p>Limit group number is a unique number for following combinations - All customers - effective date, customer type - effective date, product - effective date, MCA number - effective date, account number - effective date.</p>
Transaction Group	<p>[Display]</p> <p>This field displays the master list that contains all the transaction groups created in the system.</p>
Select	<p>[Optional, Check box]</p> <p>Select the Transaction Group check box to select the particular transaction.</p> <p>This check box is enabled by clicking N in the Select field . On selecting the check box against the transaction group for selection the value will change from N to Y.</p>
Currency of limit	<p>[Mandatory, Drop down]</p> <p>Select the currency code in which limit is to be maintained from the drop-down list .</p> <p>Limit will be tracked in the specified currency. If the transaction currency is not equal to limit currency, then system will do conversion of transaction amount using mid rate.</p>
Transaction Limit and Limit Type	<p>[Mandatory, Drop down]</p> <p>Select the limit type from the drop down list.</p> <p>The behavior of restriction when the daily limit is breached will derived from the value of limit type.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None - No restriction on limit for the transaction. • Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions. • Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively. • Rejection - System will give reject the transaction if the limit is breached.
Transaction Limit and Level 1	<p>[Conditional, Numeric, 20]</p> <p>Type the amount of transaction limit.</p> <p>For maximum amount of limit, type zero in this field.</p> <p>This field is disabled if the Limit Type is selected as None or Transaction Allowed check box is un selected. For other limit type this field will be enabled and mandatory.</p>
Transaction Limit	<p>[Conditional, Numeric, 20]</p>

and Level 2 Type the amount of transaction limit. For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection Transaction Allowed** check box is un-selected. For other limit type this field will be enabled and mandatory..

Daily Limit and Limit Type

[Mandatory, Drop down]

Select the limit type from the drop down list.

The behavior of restriction when the daily limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively.
- Rejection - System will reject the transaction if the limit is breached.

Daily Limit and Level 1

[Conditional, Numeric, 20]

Type the amount of daily limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Transaction Allowed** check box is un-selected. For other limit type this field will be enabled and mandatory.

Daily Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of daily limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled and mandatory.

Level 2 daily limit amount should be greater than Level 1 daily limit amount.

Monthly Limit and Limit Type

[Mandatory, Drop down]

Select the limit type from the drop down list.

The behavior of restriction when the quarterly limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit

for rejecting the transaction on breach of limit respectively.

- Rejection - System will give reject the transaction if the limit is breached.

Monthly Limit and Level 1

[Conditional, Numeric, 20]

Type the amount of monthly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None**. For other limit type this field will be enabled.

Monthly Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of monthly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled. Level 2 monthly limit amount should be greater than level 1 quarterly limit amount.

Quarterly Limit and Limit Type

[Mandatory, Drop down]

Select the limit type from the drop down list.

The behavior of restriction when the quarterly limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively.
- Rejection - System will give reject the transaction if the limit is breached.

Quarterly Limit and Level 1

[Conditional, Numeric, 20]

Type the amount of quarterly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None**. For other limit type this field will be enabled.

Quarterly Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of quarterly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled. Level 2 quarterly limit amount should be greater than level 1 quarterly limit amount.

Half Yearly Limit and

[Mandatory, Drop down]

Limit Type

Select the limit type from the drop down list.

The behavior of restriction when the half yearly limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively.
- Rejection - System will give reject the transaction if the limit is breached.

Half Yearly Limit and Level 1

[Conditional, Numeric, 20]

Type the amount of half yearly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None**. For other limit type this field will be enabled.

Half Yearly Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of half yearly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled.

Yearly Limit and Limit Type

[Mandatory, Drop down]

Select the limit type from the drop down list.

The behavior of restriction when the yearly limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively.
- Rejection - System will give reject the transaction if the limit is breached.

Yearly Limit and Level 1

[Conditional, Numeric, 20]

Type the amount of yearly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None**. For other limit type this field will be enabled.

Yearly Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of yearly limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled.

Inter-branch Transaction Limit and Limit Type

[Mandatory, Drop down]

Select the limit type from the drop down list.

The behavior of restriction when the inter branch daily limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively.
- Rejection - System will give reject the transaction if the limit is breached.

Inter-branch Transaction Limit and Level 1

[Conditional, Numeric, 20]

Type the amount of inter branch transaction limit. For maximum amount of limit, type 0.

This field is disabled if the **Limit Type** is selected as **None**. For other limit type this field will be enabled.

Inter-branch Transaction Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of inter branch transaction limit.

For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled.

Level 2 inter branch transaction limit amount should be greater than level 1 inter branch transaction limit amount.

Inter-branch Daily Limit and Limit Type

[Mandatory, Drop down]

Select the limit type from the drop down list.

The behavior of restriction when the inter branch daily limit is breached will derived from the value of limit type.

The options are:

- None - No restriction on limit for the transaction.
- Warning - System will give warning message to the teller if the limit is breached. This is applicable for OTC transactions.
- Warning and Restriction - User can maintain two levels of limit for transaction. Level 1 limit for giving warning and Level 2 limit for rejecting the transaction on breach of limit respectively.

- Rejection - System will give reject the transaction if the limit is breached.

Inter-branch Daily Limit and Limit Type

[Conditional, Numeric, 20]

Type the amount of inter branch daily limit. For maximum amount of limit, type 0 in this field.

This field is disabled if the **Limit Type** is selected as **None**. For other limit type this field will be enabled.

Inter-branch Daily Limit and Level 1

[Mandatory, Pick List, dd/mm/yyyy]

Select the effective date from the pick list.

The effective date is by default the system date.

Inter-branch Daily Limit and Level 2

[Conditional, Numeric, 20]

Type the amount of inter branch daily limit.

For maximum amount of limit, type 0.

This field is disabled if the **Limit Type** is selected as **None** or **Warning** or **Rejection**. For other limit type this field will be enabled and mandatory.

Level 2 inter branch daily limit amount should be greater than level 1 inter branch daily limit amount.

8. Click the **Ok** button.
9. The system displays the message "Record Added...Authorisation Pending..Click Ok to continue". Click the **OK** button.
10. The bank global limits are added once the record is authorized.

10.15. BAM73 - Bank Customer Limit Maintenance*

Using this option allows you can maintain the limit for specific customers. For a customer, different limits can be set for doing the transaction on different type of delivery channels.

Field Description

Field Name	Description
------------	-------------

Customer Information

Search Criteria

[Mandatory, Drop-Down]

Select the search criteria, to search for the customer, from the drop-down list.

The options are:

- Customer short name
- Customer IC Identification criteria (IC) arrived at by the bank during customer addition
- Customer ID- Unique identification given by the bank

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customer's short name or IC then

any of the letter (s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering "Geo" in the **Search String** field.

Cust IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Home Branch

[Display]

This field displays the short name of the branch, where the customers account is opened.

The customer signature record along with other customer papers will reside in this branch

These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.

Full Name

[Display]

This field displays the full name of the customer.

The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

Short Name

[Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

The customer short name can be changed through the **Change Customer Name/IC Number** (Fast Path: 7101) option.

Channel and Aggregate Limits Information

Channel Id

[Mandatory, Pick List]

Select the channel ID and the description for the channel from the pick

list.

Effective Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the effective date from the pick list.

The effective date is by default the system date.

The user can manually change the date from when the change in status is to be effected.

This date has to be a future date or a date greater than the present system date.

Aggregate Per Transaction Limit

[Optional, Numeric, 13, Two]

Type the aggregate limit of per transaction.

Aggregate Per Day Limit

[Optional, Numeric, 13, Two]

Type the aggregate limit on per day transaction.

This amount should be equal to or greater than the aggregate per transaction limit.

Aggregate Per Day Limit Registered

[Optional, Numeric, 13, Two]

Type the aggregate limit per day for registered customer.

The total of per day transaction limit registered and per day transaction limit unregistered must not exceed the maintained aggregate per day limit.

Aggregate Per Day Limit UnRegistered

[Optional, Numeric, 13, Two]

Type the aggregate limit per day for unregistered customer.

The total of per day transaction limit unregistered and per day transaction limit registered must not exceed the maintained aggregate per day limit.

3. **Click the Add button.**
4. **Select the search criteria from the drop-down list.**
5. **Type the search string, press the <Tab> key. The system displays a list of customers that match the search criterion.**
6. **Select the customer from the pick list. The customer details are displayed in the screen.**
7. **Enter the channel and aggregate limits information.**

Column Name	Description
Group Name	[Display] This column displays the group name of the customer maintained in a particular limit.
Per Transaction Limit(R)	[Optional, Numeric, 13, Two] Type the limit of per transaction for the registered customer. Per transaction limit should not exceed the maintained aggregate per transaction limit. This limit is maintained to check the funds transfer transaction between two registered parties in the system.
Per Day Limit(R)	[Optional, Numeric, 13, Two] Type the limit of per day for the registered customer. Per day limit should be equal or greater than the maintained aggregate per transaction limit. This limit is maintained to check the maximum amount allowed in a single day for funds transfer transaction between two registered parties in the system.
Per Month Limit(R)	[Optional, Numeric, 13, Two]

Type the limit of per month for the registered customer.

Per month limit should be more than the maintained per day limit.

This limit is maintained to check the maximum amount allowed in a month for funds transfer transaction between two registered parties in the system.

Per Transaction Limit(U)

[Optional, Numeric, 13, Two]

Type the limit of per transaction for the unregistered customer.

Per transaction limit should not exceed the maintained aggregate per transaction limit.

This limit is maintained to check the maximum amount allowed in a single funds transfer transaction between two unregistered parties in the system.

Per Day Limit(U)

[Optional, Numeric, 13, Two]

Type the limit of per day for the unregistered customer.

Per day limit should be equal or greater than the maintained aggregate per transaction limit unregistered.

This limit is maintained to check the maximum amount allowed in a single day for funds transfer transaction between two unregistered parties in the system.

Per Month Limit(U)

[Optional, Numeric, 13, Two]

Type the limit of per month for the unregistered customer.

Per month limit should be more than the maintained per day limit.

This limit is maintained to check the maximum amount allowed in a month for funds transfer transaction between two unregistered parties in the system.

9. Click the **Ok** button.
10. The system displays the message "Record Added...Authorisation Pending..Click Ok to continue". Click the **OK** button.
11. The bank global limits are added once the record is authorised.

10.16. LMB01 - Bank Limit Setup

Using this option you can set up limits/exposure towards the specified risk factors. You can set up the bank limit related to tracking the economic factors that affect the bank's credit decision like banks exposure to a country, to a particular currency, etc.

The search tab is provided in the Bank Limit Setup screen option to display the limit ID, description and exposure towards the risk factor and corresponding risk code selected.

Definition Prerequisites

- [UDF01 - User Defined Fields](#)
- [UDF02 - UDF Task Code Linkage](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add bank limits

1. Type the fast path **LMB01** and click **Go** or navigate through the menus to **Global Definitions > Limit Management > Bank Limit Setup**.
2. The system displays the **Bank Limit Setup** screen.

Bank Limit Setup

Field Description

Field Name	Description
------------	-------------

Limit Definition

Limit Code	[Mandatory, Alphanumeric, 30] Type the unique identification number of the limit.
-------------------	--

Description	[Mandatory, Alphanumeric, 80] Type the description for the limit code selected in the corresponding field.
--------------------	---

Revolving	[Display] This field displays whether the limit is revolving or not. If the check box is selected the limit is revolving. If it is not selected the limit is treated as adhoc and any withdrawal and utilization reduces the available amount. If the entire amount is utilized at one time then the limit is not available for any future use, even after repayment.
------------------	--

Currency Restricted	<p>[Optional, Check Box]</p> <p>Select the Currency Restricted check box to allow the user to define the currencies.</p> <p>These currencies are used for opening the account and attaching the limits.</p> <p>If the Currency Restricted check box is not selected then user can select all the currencies maintained under Currency Master are available for limit.</p>
Breach Action	<p>[Display]</p> <p>This field displays the breach action for the limit.</p> <p>By Default, the breach action for Bank limit is Ignore.</p>
Start Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the effective date of the limits from the pick list.</p> <p>The start date is a future date and cannot be prior to the processing date.</p>
End Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the last valid date of the limit from the pick list. The status is set to Expire for limit and sub limits on the end date. However system allows the user to credit the accounts and force debit</p>
Limit Revision Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the date on which the account is due for review from the pick list.</p>

3. Click the **Add** button.
4. Enter the limit code and press the <Tab> key.
5. Enter the limit description, start date, end date, and limit revision date.

10.21. LMC05 - Multi limit Plan Setup

Using this option you can set up a new plan. The bank can set up/add the Plan ID and combine the products that it offers under the particular plan. Based on the plan ID defined over here and the customer ID, the limit tree is generated. In the context of multi limits, following risk factors form the limit tree:

- Customer ID
- Plan ID
- Facility Type
- Sub Facility Type

The Plan ID has a choice of the following sub-limits:

- Revolving Line: It is a normal revolving loan
- End of Period Line: It is a revolving loan with 100 % of outstanding as MAD and Zero % interest
- Amortizable Term Loan Line: It is a normal amortizable term loan

Definition Prerequisites

- [LNM11 - Product Master Maintenance](#)
- [LNM98 - Schedule Type](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To setup multi limit plan

1. Type the fast path **LMC05** and click **Go** or navigate through the menus to **Global Definitions > Limit Management > Multi limit Plan Setup**.
2. The system displays the **Multi limit Plan Setup** screen.

10.22. LMC01 - Customer Limit Setup

Using this option you can set up the process and rules governing the limit management during its life cycle for each customer or a group of customers.

The overall limit for all the customer groups is divided into limits and sub limits based on the risk factors like customer ID, facility, credit type, collateral, branch code and product code. Each of these limits and sub-limits have its own characteristics such as revolving, exchangeable, renewable, period, restrictions and exclusions. System maintains and monitors the characteristics of the limits attached to each of the risk factor.

Limit can be added, deleted or modified at any level without disturbing the entire system. However, there are certain restrictions to ensure the logical flow of the limit maintenance.

Definition Prerequisites

- [8053 - Customer Addition](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add customer limits

1. Type the fast path **LMC01** and click **Go** or navigate through the menus to **Global Definitions > Limit Management > Customer Limit Setup**.
2. The system displays the **Customer Limit Setup** screen.

Customer Limit Setup

Field Description

Field Name

Description

Customer Selection

[Mandatory, Radio Button]

Click the appropriate option based on whether the customer limit is to be set up for a single customer or a group of customers.

The options are:

- Customer
- Customer Group

Customer Information

Customer Search Criteria

[Mandatory, Drop-Down]

Select the search criteria to search for the customer from the drop-down list.

The options are:

- Customer short name

- Customer IC Identification criteria (IC) arrived at by the bank during customer addition.
- Customer ID- Unique identification given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customers' short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.

For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

ID

[Display]

This field displays the ID of the customer.

A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

IC

[Display]

This field displays the identification code of the customer.

A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Full Name

[Display]

This field displays the full name of the customer.

Short Name

[Display]

This field displays the short name of the customer.

The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.

The customer short name can be changed through the **Change Customer Name/IC Number** (Fast Path: 7101) option.

Limit Definition

Limit Code

[Mandatory, Alphanumeric, 30]

Type the limit code.

It is a unique identification number to identify and differentiate the limits of various customers.

Description	[Mandatory, Alphanumeric, 70] Type the limit code description. The description related to the limit code is displayed.
Parent Limit Code	[Pick List] Select the parent limit code of the customer from the pick list.
Revolving	[Optional, Check Box] Select the Revolving check box to set the limit as revolving. If it is not selected the limit is treated as adhoc and any withdrawal and utilization reduces the available amount. If the entire amount is utilized at one time then the limit is not available for any future use, even after repayment.
Currency Restricted	[Optional, Check Box] Select the Currency Restricted check box to allow the user to define the currencies. These currencies are used for opening the account and attaching the limits. If the Currency Restricted check box is not selected user can select all the currencies maintained under Currency Master .
Breach Action	[Mandatory, Drop-Down] Select the breach action from the drop-down list. The options are: <ul style="list-style-type: none"> • Error • Ignore • Override • Warning
Limit Status	[Display] This field displays the limit status. The options are: <ul style="list-style-type: none"> • Normal • Frozen • Overdue • Expired
Transferred Allowed	[Optional, Check Box] Select the Transferred Allowed check box to transfer the available limits within the group or sub group of limits.
Freeze	[Optional, Check Box] Select the Freeze check box to temporarily unavail the amount.
Start Date	[Mandatory, Pick List, dd/mm/yyyy] Select the effective date of the limits from the pick list.

The start date is the future date and cannot be prior to the processing date.

End Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the last valid date of the limit from the pick list.

The status is set to **Expire** for limit and sub limits on the end date. However system allows the user to credit the accounts and force debit.

Revision Date

[Mandatory, Pick List]

Select the date on which the account is due for review from the pick list.

Auto Freeze Limit

[Optional, Check Box]

Select the **Auto Freeze Limit** check box to temporarily unavail the amount.

The user has to manually select it to change the limit status.

Pass Contingent Entries

[Conditional, Check Box]

Select the **Pass Contingent Entries** check box to pass contingent entries at limit level.

This check box will be enabled only for parent limit i.e. for a limit for which **Parent Limit Code** field is blank.

If this field is selected then **FLEXCUBE** will check if contingent asset GL code for limit and contingent liability GL code for limit are maintained in the **Bank Master Maintenance** (Fast Path: BAM08) option. If this field is not selected the contingent entries will not be passed at limit level as well as at the individual account level even though the contingent asset GL code for limit and contingent liability GL code for limit are maintained.

This field when selected will override the one defined at the product level for Loan / CASA accounts opened under the limit.

Frequency

[Display]

This field displays the frequency for contingent entries.

The contingent entries for the transactions in the account will be passed on month ends at parent limit level. However for specific events as described below the contingent entries will be passed in the specific EOD:

- Limit sanction- of parent limit
- Limit expiry- of parent limit
- Deletion of limit- of parent limit
- Account closure- of individual child accounts
- EFS
- Account write off
- OD limit expiry
- OD Account Closure

- OD write off

3. Click the **Add** button.
4. Select the **Customer** option or **Customer Group** option.
5. Select the customer for whom the limits are being set.
6. Enter the limit details such as limit code and name, parent limit code, breach action, start date, end date and revision date.

Risk Code

[Display]

This column displays the parent risk code for the parent limit.

Description

[Display]

This column displays the description maintained for the selected parent risk code.

Associate Limit Id

[Display]

This column displays the code of the associated limit for which the risk factor and the risk code is enabled.

Limit Details

Risk Factor

[Mandatory, Pick List]

Select the risk factor for the maintained limit from the pick list.

Description

[Display]

This column displays the description maintained for the selected risk factor.

Risk Code

[Mandatory, Pick List]

Select the risk code for the selected risk factor from the pick list.

Risk code is the value associated with selected risk factors. For e.g. for Risk Factor Branch, the risk codes will be the values maintained in the **Branch Master**.

Description

[Display]

This column displays the description maintained for the selected sub limit risk code.

Delete

[Optional, Check Box]

Select the **Delete** check box to delete the corresponding risk factor and risk code.

Description

Limit Amount

Limit Ccy

[Mandatory, Drop-Down]

Select the limit currency from the drop-down list.

The Limit Ccy is validated with the currencies maintained in the system for all limits.

Limit Amount

[Mandatory, Numeric, 12]

Type the limit amount.

The limit amount is validated with the parent limit amount. The limit amount should not exceed the parent limit amount.

Borrowed Amount

[Display]

This field displays the total amount borrowed by the limit.

Lent Amount

[Display]

This field displays the total amount lent by the limit.

Alert Min Limit (%)

[Mandatory, Numeric, Three]

Type the alert minimum limit percentage.

An alert report is generated on EOD, if the utilization for the limit is less than the defined percentage.

Alert Max Limit (%)

[Mandatory, Numeric, Three]

Type the alert maximum limit percentage.

An alert report is generated on EOD, if the utilization for the limit is greater than the defined percentage.

10.24. LMS03 - Limit Manual Transfer

Using this option you can transfer the limit amount online within the limits setup for a customer or a customer group. The transferred amount is available for utilization by the beneficiary limit for a defined period after which the limit is re-transferred online or after a certain period.

Definition Prerequisites

- [LMC01 - Customer Limit Setup](#)

Modes Available

Not Applicable

To perform a manual limit transfer

1. Type the fast path **LMS03** and click **Go** or navigate through the menus to **Global Definitions > Limit Management > Limit Manual Transfer**.
2. The system displays the **Limit Manual Transfer** screen.

Limit Manual Transfer

The screenshot shows a web application window titled "Limit Manual Transfer*". The window contains three main sections for data entry:

- Beneficiary Limit Details:** Includes fields for Limit Code (with a dropdown arrow), Limit Desc, Limit Amt (0.00), and Available Amt (0.00).
- Provider Limit Details:** Includes fields for Limit Code (with a dropdown arrow), Limit Desc, Limit Amt (0.00), and Available Amt (0.00).
- Manual Transfer Details:** Includes fields for Transfer Amount (0.00), Transfer Date (15/02/2008), and Period(In Days).

At the bottom right of the window, there are three buttons: "OK", "Close", and "Clear".

Field Description

Field Name	Description
Beneficiary Limit Details	
Limit Code	[Mandatory, Pick List] Select the limit code, to which the amount is transferred, from the pick list. This is the limit code of the beneficiary.
Limit Desc	[Display] This field displays the description of the limit corresponding to the limit code.
Limit Amt	[Display] This field displays the maximum limit amount setup for the beneficiary limit code.
Available Amt	[Display] This field displays the available amount. It is the difference between the limit amount and the utilized amount. The available amount is updated online.
Provider Limit Details	
Limit Code	[Mandatory, Pick List] Select the limit code, from which the amount is transferred, from the pick list. This is the limit code of the provider. The limit code is available in the pick list, if the Transfer Allowed check box is selected in the Customer Limit Setup (Fast Path: LMC01) option.
Limit Desc	[Display] This field displays the description of the limit corresponding to the limit code.
Limit Amt	[Display] This field displays the maximum limit amount set up for the provider limit code.
Available Amt	[Display] This field displays the available amount. It is the difference between the limit amount and the utilized amount. The available amount is updated online.
Manual Transfer Details	
Transfer Amount	[Mandatory, Numeric, 13, Two]

Type the amount that is to be transferred from the provider limit to the beneficiary limit.

The transfer amount cannot exceed the available amount of the provider limit.

Transfer Date

[Display]

This field displays the date on which the amount is transferred.

By default the current system date is displayed.

Period (in Days)

[Mandatory, Numeric, Three]

Type the number of days for which the transfer amount is available for utilization by the beneficiary limit.

In case of online transfers, the transfer period is 0.

In case of periodic transfers, the transfer period is greater than zero.

3. Select the beneficiary limit code and the provider limit code from the pick list.

4. Enter the transfer amount and the period.

11. Collateral Definition

In **FLEXCUBE Retail**, collateral security covers something of value, given or pledged as security for a debt or an obligation.

“Collateral” refers to all property, including the proceeds thereof, heretofore assigned, transferred or pledged to the bank by the customer as collateral for loans/overdraft. It also refers to other extensions of credit, and all Capital Stock, Mortgage Collateral, Securities Collateral and other Collateral, including the proceeds thereof, which are now or hereafter pledged to the bank.

A bank can define all attributes of their products.

FLEXCUBE Retail enables classification of all the collaterals in the system into the following broad categories:

Sr No	Category	Description of Collaterals
1	Property	All property type collaterals such as house, apartment, land etc
2	Automobile	All automobiles such as cars, buses, scooters, bikes, cycles etc
3	Deposit	All internal FLEXCUBE Time deposits present in the Time Deposit module
4	Financial Security	All financial securities such as shares, debentures, bonds etc

5	Insurance	All insurance policies issued by insurance companies
6	Bill	All bills which are committed for payment
7	Non-Standard	All collaterals which do not fall under any of the broad categories described above example jewellery

Each of the above categories can be sub-classified into collateral codes wherein the common characteristics of the collaterals are codified under one collateral code. Each of the collateral defined in the system are linked to one collateral code.

11.1. BAM39 - Collateral Codes Maintenance

Using this option you can maintain various types of collaterals which could be stored in the system. Collaterals which are going to be accepted as security for a loan or overdraft will have to fall under one of the collateral codes.

The collateral details like type, valuation level, insurance type, review period, etc are maintained in this option.

Definition Prerequisites

- [BAM56 - Currency Codes Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a collateral code

1. Type the fast path **BAM39** and click **Go** or navigate through the menus to **Global Definitions > Collateral > Collateral Codes Maintenance**.
2. The system displays the **Collateral Codes Maintenance** screen.

Field Description

Field Name

Description

Collateral Code

Collateral Code

[Mandatory, Numeric, Five]

Select the collateral code from the pick list.

The collateral code is a unique, number which represents the collateral.

Once added, this field cannot be modified or amended.

Name of Collateral

[Mandatory, Alphanumeric, 40]

Type the description for the collateral code.

Currency

[Mandatory, Drop-Down]

Select the collateral currency from the drop-down list.

The collateral and the account to which the collateral is attached should have the same currency.

This validation is done when the collateral is being attached to an account.

The currency is maintained in the **Currency Codes Maintenance** (Fast Path: BAM56) option.

Once added, this field cannot be modified or amended.

Collateral Details

Collateral Type

[Mandatory, Drop-Down]

Select the type of collateral from the drop-down list.

The options are:

- Property
- Legal Guarantee
- Personal Guarantee
- Automobile
- Deposit
- Financial Security
- Non Standard (any other collateral which does not fit any other type)
- ASN
- Insurance (which is taken as collateral)
- Bills
- Recurring Deposit

Valuation Level

[Conditional, Drop-Down]

Select the valuation level for the collateral from the drop-down list.

The options are:

- Master – The value of collaterals that are highly volatile in the market are valued at the master value. These collaterals require updating or monitoring on regular basis. For example, the price of shares and debentures. The market price of all the Reliance shares held as collateral will be the same.
- Detail – The value will be specific to the collateral that is attached. The prices of the collaterals are more stable. For example, the price of the property differs from location to location.

This field is disabled, if the **Legal Guarantee** and **Personal Guarantee** options are selected from the **Collateral Type** drop-down list.

Deeds Tracking Required

[Optional, Check Box]

Select the **Deeds Tracking Required** check box if the deeds are with any external authority and requires tracking.

The expected date for receiving the deeds is specified in the **Collateral Header Maintenance** (Fast Path: BAM74) option.

For more information on adding collateral headers, refer to the **Collateral Header Maintenance** (Fast Path: BAM74) option.

A report is generated for the deeds that are not received by the bank.

Insurance Type

[Conditional, Drop-Down]

Select the insurance type from the drop-down list.

The insurance type is validated against the option selected in the **Collateral Type** field.

For example, if the **Automobile** option is selected from the **Collateral Type** drop-down list, then the **Automobile Insurance** option should be selected from the drop-down list .

For example, if the **Financial Security** option is selected from the **Collateral Type** drop-down list, then the **No Insurance** option should be selected from the drop-down list, as insurance cover is not required for these collaterals.

This field is disabled, if the **Deposit** and **Recurring Deposit** options are selected from the **Collateral Type** drop-down list

Second Charge Allowed

[Optional, Check Box]

Select the **Second Charge Allowed** check box to enable the system to accept the collateral with second charge as collateral.

Third Party Charge Allowed

[Optional, Check Box]

Select the **Third Party Charge Allowed** check box to enable the system to accept the third charge.

Third charge is allowed when the security holder and the person who is taking the loan are two separate people and the security holder is giving his assets as collateral for the loan.

Readily Realisable Security

[Optional, Check Box]

Select the **Readily Realisable Security** check box if the collateral can be easily realized in cash.

This field is validated against for the calculation of provision for **Credit Risk Rating** (CRR).

Collateral Review Period

[Mandatory, Numeric, Three]

Type the frequency at which the collateral should be reviewed.

You can review the collateral in days, months and years.

For example, type 1 and select the **Year** option if you want to review the collateral every year.

A report is generated when the collateral is due for review.

Accounting

Pass Contingent Entries

[Optional, Check Box]

Select the **Pass Contingent Entries** check box to execute the contingent entries.

Contingent Asset

[Conditional, Numeric, Nine]

Type the contingent asset. It is the value of the contingent asset.
This field is enabled if the **Pass Contingent Entries** check box is selected.

Contingent Liability [Conditional, Numeric, Nine]

Type the contingent liability. It is the value of the contingent liability.
This field is enabled if the **Pass Contingent Entries** check box is selected.

3. Click the **Add** button.
4. Enter the collateral code and press the <Tab> key.
5. Enter the collateral details.
6. Enter the accounting details.

Field Description

Field Name	Description
Original Value	[Mandatory, Numeric, 11, Two] Type the original value of the collateral. The specified amount must be in the range of minimum and maximum amount.
Date of Valuation	[Mandatory, Pick List, dd/mm/yyyy] Select the date of original valuation from the pick list
Last Value	[Mandatory, Numeric, 11, Two] Type the last value of the collateral. This is the value of collateral which is taken into consideration when linking the collateral to an asset.
Date of Valuation	[Mandatory, Pick List, dd/mm/yyyy] Select the date of last valuation from the pick list.

Market Value	<p>[Mandatory, Numeric, 11, Two]</p> <p>Type the market value of the collateral.</p> <p>The specified amount must be in the range of minimum and maximum amount.</p>
Valuation Source	<p>[Optional, Alphanumeric, 30, Pick List]</p> <p>Type the source of the valuation. The valuation description corresponding to the valuation source code is displayed in the adjacent field.</p>
Valuation Edition	<p>[Optional, Numeric, 30]</p> <p>Type the edition of the recent collateral valuation done.</p>
Valuation Supplement	<p>[Mandatory, Numeric, 30]</p> <p>Type the valuation supplement of the asset.</p>
Floating Collateral	<p>[Optional, Check Box]</p> <p>Select the Floating Collateral check box to float the collateral between the loan account and the CASA over draft account.</p> <p>If the check box is selected, the following actions take place:</p> <ul style="list-style-type: none"> • The defined collateral is shared across the Loans and the CASA account. • On increase or decrease of the collateral value, the drawing power of the CASA account gets adjusted accordingly. <p>For Example: Assume that single collateral worth 100,000 USD is attached to a Loan account and also to a CASA overdraft limit sanctioned for 50,000 USD each. Till the loan is fully disbursed there would be no drawing power for the OD account. After the loan is fully disbursed and to the extent of the principal component of the loan being repaid, the drawing power of the overdraft account increases accordingly. In other words, with floating collateral attached as mentioned above, the user can utilize the amount to the extent of principal repayment in the loan, through a withdrawal from the CASA account.</p>

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria, to search for the customer, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer short name • Customer IC Identification criteria (IC) arrived at by the bank during customer addition • Customer ID- Unique identification given by the bank <p>The customers selected as Guarantor in Customer Account Relationship Maintenance (Fast Path: CI142) are displayed in the search criteria.</p>
Search String	<p>[Mandatory, Pick List]</p> <p>Select the search string, to search for a customer, corresponding to the</p>

search criteria selected in the **Search Criteria** field, from the pick list.

If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list. For example, the customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.

IC	[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Home Branch	[Display] This field displays the home branch details of the customer
Full Name	[Display] This field displays the full name of the customer.
Short Name	[Display] This field displays the short name of the customer.
Duration	
From Date	[Mandatory, Pick List, dd/mm/yyyy] Select the start date of the guarantee from the pick list.
To Date	[Mandatory, Pick List, dd/mm/yyyy] Select the end date of the guarantee from the pick list.
Include In IRR Calculation	[Optional, Check Box] Select the Include In IRR Calculation check box if the banks prefer to include the premium value in the TAEG calculation. If this check box is clear then the banks prefer to exclude the premium value from TAEG calculation.
Status	[Mandatory, Drop Down]

Select the status of the guarantee from the drop-down list.

The options are:

- Cancelled
- Renewed
- Invoked
- Delinquent
- Expired
- Open

Comments

[Optional, Alphanumeric, 240]

Type the comments for collateral.

6. Click the **Ok** button.
7. The system displays the message "Record Added...Authorisation Pending..Click Ok to continue". Click the **Ok** button.
8. The collateral header is maintained successfully once the record is authorized.

Note: The various tabs are enabled according to the option selected in the **Collateral Code** field.

11.4. BAM63 - Product Collateral Linkage

Using this option you can create a linkage between products and collateral codes. You can control the type of collaterals which can be linked to accounts under a product. Multiple collateral codes can be linked to any product.

You can link a FCY TD collateral to a FCY loan account provided the currency of both collateral and product are the same.

Oracle FLEXCUBE also supports linking of TD collateral to product even though their currencies differ. However, the system supports only for products in local currency and TD in foreign currency.

For example:

The local currency of the branch assumed in this example is – INR:

Product Currency	Collateral Currency	Linkage
INR	USD	Allowed
INR	EURO	Allowed
USD	USD	Allowed
EUR	EUR	Allowed
INR	INR	Allowed
EUR	USD	Disallowed
GBP	EUR	Disallowed
USD	INR	Disallowed

Definition Prerequisites

- [BAM39 - Collateral Codes Maintenance](#)
- [LNM11 - Product Master Maintenances](#)
- [CHM01 - CASA Product Master Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add product collateral linkage

1. Type the fast path **BAM63** and click **Go** or navigate through the menus to **Global Definitions > Collateral > Product Collateral Linkage**.
2. The system displays the **Product Collateral Linkage** screen.

11.5. BAM84 - Financial Security Maintenance

Using this option you can maintain details of all financial securities approved by the bank. Multiple financial securities can be defined under a collateral code with category as Financial security.

The records in this maintenance are feeds coming from the stock exchanges containing the value of each security as quoted in the stock exchange. The values in this table are used to revalue the financial security collaterals defined in the system.

Definition Prerequisites

- [BAM39 - Collateral Codes Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add financial security code

1. Type the fast path **BAM84** and click **Go** or navigate through the menus to **Global Definitions > Collateral > Financial Security Maintenance**.
2. The system displays the **Financial Security Maintenance** screen.

Field Description

Field Name	Description
------------	-------------

Currency

Financial Security Code

[Mandatory, Numeric, Five]

Type the code which the bank assigns for each type of financial security.

For example: Code 1 can be used for the definition of shares of company ABC Ltd, Code 2 can be assigned to the shares of the company XYZ Ltd, etc.

Currency

[Display]

The field displays the currency of the code after you select the appropriate collateral code in the Collateral Code field.

Currency for the collateral is defined in the **Collateral Codes Maintenance** (Fast Path: BAM39) option.

Collateral Code

[Mandatory, Drop-Down]

Select the collateral code for the financial security from the drop-down list.

The system accepts collaterals that are defined as **Financial Security** and is valued at the master level in the **Collateral Codes Maintenance** (Fast path: BAM39) option.

Sector Code

[Mandatory, Drop-Down]

Select the sector code from the drop-down list.

The financial security collateral will belong to the specified sector.

The options are:

- Commercial Bank
- Merchant Bank
- Finance Company
- Discount House
- Industrial House

Quoted

[Optional, Check Box]

Select the **Quoted** check box if the security is quoted in the stock exchange.

Security Name

[Mandatory, Alphanumeric, 40]

Type the description for the financial security code.

This information is for reference purpose.

Face Value

[Mandatory, Numeric, 20]

Type the face value of the security.

For example, if you are defining the shares of a company and the face value of the share is 100, then type 100 as the face value of the financial security.

Market Value

[Mandatory, Numeric, 20]

Type the market value of the security.

Market value is the per unit value of the financial security as quoted in the stock exchange or the market place.

Last Valuation Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the last valuation date from the pick list.

The last valuation date is the date on which the value of the financial security was last updated.

Unit Description

[Mandatory, Alphanumeric, 10]

Type the description of the unit of the financial security.

Name of Issuer

[Mandatory, Alphanumeric, 40]

Type the name of the issuer of the financial security.

Instrument Identification

[Mandatory, Alphanumeric, 15]

Number

Type the identification number of the instrument.

This is the identification of the financial security.

For example, it can be the code assigned to the security by the exchange or by the rate feed provider.

3. Click the **Add** button.
4. Enter the financial security code.
5. Select the collateral code and the sector code from the drop-down list.
6. Enter the security name, face value, market value of the collateral.
7. Enter the last valuation date, unit description, issuer name and instrument identification number.

Field Description

Field Name

Description

Insurance Plan Code

[Mandatory, Numeric, Three]

Type the insurance plan code.

The insurance plan code is a unique number, which represents the insurance plan.

Once added, this field cannot be modified or amended.

Linkage Type

[Mandatory, Drop-Down]

Select the linkage type from the drop-down list.

The linkage type is the type of linkage the insurance policy is linked.

The options are:

- As Collateral: The insurance policies under the plan can be used as collateral; the linkage will be as collateral. The collateral can be shared.
- As Insurance: The linkage will be specific to one account and the

insurance policy will not be shared by multiple accounts.

- For a Collateral: The insurance will be attached to only collateral. The insurance will not be shared by different accounts

Currency

[Mandatory, Drop-Down]

Select the currency, in which the premium will be paid to the insurance company, from the drop-down list.

In the current version premium can be paid only in the local currency.

The currency maintained in the **Currency Codes Maintenance** (Fast Path: BAM56) option.

Once added, this field cannot be modified or amended.

Insurance Plan Type

[Mandatory, Drop-Down]

Select the insurance plan type from the drop-down list.

The options are:

- Life Insurance
- Property Insurance
- Automobile Insurance
- Unemployment Insurance
- Disability Insurance
- Health Insurance
- Education Insurance
- Group Insurance

Insurance Plan Name

[Mandatory, Alphanumeric, 40]

Type the description for the insurance plan code.

This information is for reference purpose.

Insurer Name

[Mandatory, Alphanumeric, 40]

Type the name of the insurance company that is offering the service.

Premium Definition

Premium Reminder

[Mandatory, Numeric, Three]

Type the premium reminder advice format code.

This code indicates the advice to be sent to the customer intimating that the insurance premium is due for payment.

Service Charge Code

[Mandatory, Pick List]

Select the service charge code from the pick list.

Premium Asset GL

[Mandatory, Numeric, Nine]

Type the premium asset GL code.

This GL account is affected when the bank pays the insurance premium due on the collateral on behalf of the customer. The asset GL

balance is reduced with the premium amount after the amount is recovered from the customer.

This is an asset type GL.

**Premium Remittance
GL**

[Mandatory, Numeric, Nine]

Type the premium remittance GL code.

This GL is affected if the bank collects the premium amount in advance from the customer. The bank remits this amount to the insurance company.

This is a liability type of GL.

**Suspended Premium
Asset GL**

[Mandatory, Numeric, Nine]

Type the suspended premium asset GL code.

This GL gets credited if the insurance being paid in advance belongs to a suspended account.

**Premium Reminder/
Expiry Lead days**

[Mandatory, Numeric, Three]

Type the premium reminder/expiry lead days.

This is the number of days before which an advice or reminder has to be sent to the customer about the due date for payment of insurance premium or the expiry of the insurance cover.

**Premium Calculation
Basis**

[Mandatory, Drop Down]

Select the premium calculation basis from the drop-down list.

The options are:

- Fixed
- % of Insured Amount
- % of Outstanding Loan Principal
- % of Outstanding Loan Balance
- % of the Sanction Amount

Fixed

[Conditional, Numeric, Nine, Two]

Type the fixed amount.

It allows the user to fix the premium calculation basis. This field is enabled only if the premium calculation basis is selected as **Fixed**.

Annual Percentage

[Conditional, Numeric, 10]

Type the annual percentage.

Percentage

[Mandatory, Numeric, 10]

Type the monthly percentage.

Premium Frequency

[Mandatory, Drop-Down]

Select the frequency, at which the premium has to be paid under this plan, from the drop-down list.

The options are:

- Monthly
- Bi-monthly
- Quarterly
- Four-Monthly
- Half-Yearly
- Annual
- Every Due Date

This field will be validated against while specifying the frequency of the deduction or billing of the insurance premium.

Premium Date Basis [Mandatory, Drop-Down]
 Select the premium date basis from the drop-down list.
 The options are:

- Calendar
- Anniversary

Anniversary Day [Conditional, Numeric, Two]
 Type the anniversary day.
 This field is enabled after selecting the premium date base as **Anniversary**.

Offset Month [Optional, Numeric, Two]
 Type the offset month.

Remittance Details

Account Type [Mandatory, Drop-Down]
 Select the account type from the drop-down list.
 The options are:

- External
- Internal

Savings Account No [Conditional, Numeric, 16]
 Type the savings account number of the customer of the same bank.
 This field is enabled only if the **Account Type** field is selected as **Internal**.

Counter Party ID [Conditional, Pick List]
 Select the counter party ID from the pick list.
 This field is enabled only if the mode selected is **External**.

Account No [Display]
 This field displays the account number of the counterparty.

Bank/Branch Code [Display]

This field displays the bank/branch code of the counterparty customer.

Other Details

Claim Settlement GL [Optional, Numeric, Nine]
Type the claim settlement GL number.

Policy Expiry Advice [Mandatory, Numeric, Three]
Type the policy expiry advice format code.
This code indicates the advice to be sent to the customer intimating the expiry of the insurance policy.

3. Click the **Add** button.
4. Enter the insurance plan code and press the **<Tab>** key.
5. Select the linkage type and currency from the pick list.
6. Select the plan type from the drop-down list and enter the plan name for the insurance plan code.
7. Enter the premium details, remittance details, and other relevant details.

Field Description

Field Name	Description
Insurance Policy ID	<p>[Display]</p> <p>This field displays the insurance policy id. It is a system generated ID.</p> <p>In the Modify and Inquiry mode, this field is Numeric and accepts 10 characters.</p> <p>In the Delete, Cancel, Amend, and Authorize mode, this field is a pick list.</p>
Insurance Policy Number	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the insurance policy number.</p> <p>This is the external input number.</p>
Insurance Plan Code	<p>[Mandatory, Pick List]</p> <p>Select the insurance plan code from the pick list.</p> <p>This field displays the description of the plan, adjacent to the plan code.</p>

The insurance plan code is defined in the **Insurance Master Maintenance** (Fast Path: BAM45) option.

Linkage Type

[Display]

This field displays the type of linkage the insurance policy is linked.

The options are:

- As Collateral: The insurance policies under the plan can be used as collaterals; the linkage will be as collateral. The collateral can be shared.
- As Insurance: The linkage will be specific to one account and the insurance policy will not be shared by multiple accounts.
- For a Collateral: The insurance will be attached to only collateral. The insurance will not be shared by different accounts

Shared

[Display]

This field displays the data based on the linkage type. If the linkage type is "As Collateral" then it displays **Yes**, it displays **No** if the linkage type is "As Insurance" and "For Insurance".

Cover Value

[Mandatory, Numeric, 13, Two]

Type the total amount for which the insurer is covered.

Assured Value

[Mandatory, Numeric, 13, Two]

Type the assured value of the policy.

The value should be greater than zero.

Billing Account Number

[Display]

This field displays the billing account number.

Insurance Type

[Display]

This field displays the insurance type.

The options are:

- Life Insurance
- Automobile Insurance
- Property Insurance
- Term Insurance
- Unemployment Insurance
- Disability Insurance
- Health Insurance
- Group Insurance
- Education Insurance

Insurance Effective Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the insurance start date from the pick list.

Claim received Till Date	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the claim amount received till date.</p>
Maturity Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the maturity date of the policy from the pick list</p>
Policy Status	<p>[Display]</p> <p>This field displays the policy status .</p> <p>The options are:</p> <ul style="list-style-type: none"> • Active • Renewed • Expired
Cash Surrender Value	<p>[Display]</p> <p>This field displays the cash surrender value.</p> <p>It is the amount paid by the insurance company, if the insurance policy is surrendered.</p>
Policy Details	<p>[Display]</p> <p>This field displays the brief description of the insurance policy.</p>
Include In IRR Calculation	<p>[Optional, Check Box]</p> <p>Select the Include In IRR Calculation check box, if the banks prefer to include the premium and guarantee value in the TAEG calculation.</p> <p>If this check box is clear then the banks prefer to exclude the premium value from TAEG calculation.</p>
Coverage Percentage	<p>[Display]</p> <p>This field displays the percentage of insurance covered for an account.</p> <p>The rate should be greater than 0% and less than 100%.</p>
Customer Details	
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in</p>

another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.

Home Branch	[Display] This field displays the name of the home branch where the loan account is opened and maintained.
Full Name	[Display] This field displays the full name of the customer. The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.
Short Name	[Display] This field displays the short name of the customer. The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option. The customer short name can be changed through the Change Customer Name/IC Change (Fast Path: 7101) option.
Premium Details	
Last Premium Paid	[Display] This field displays the last premium paid.
Premium Calculation Basis	[Display] This field displays the premium calculation basis from the insurance plan master.
Premium Amount	[Display] This field displays the premium amount. The premium amount value is applicable for fixed premiums. The value cannot be modified for fixed premium insurance.
Premium Frequency	[Display] This field displays the premium frequency. The premium frequency is the premium payment day. It can be monthly, quarterly, half yearly, yearly, etc.
Premium Date Basis	[Display] This field displays the premium date basis.
Next Premium Date	[Display] This field displays the date on which the next premium should be paid.
Premium Rate Details	
Annual Contribution Rate	[Mandatory, Numeric, Three, Six] Type the annual contribution rate. It is the premium rate paid every year. This field is enabled only if insurance plans with premium calculation methods as '% of Insured

Amount' and '% of Loan Principal) and '% of loan outstanding' is selected. In the case of '% of Insured Amount', the value entered in the insurance plan master is displayed. User can modify the value, if required.

Individual Premium Rate

[Mandatory Numeric, Three, Six]

Type the individual premium rate.

It is the rate at which the interest is to be paid for each premium. Individual Premium rate is calculated by dividing the Annual Contribution Rate by the number of premium payments per year. No of premium payments is calculated by the system from the premium frequency.

Rate Factor Basis

[Mandatory, Numeric, Three]

Type the rate factor basis.

Rate Effective Date

[Mandatory, Pick List, dd/mm/yyyy]

Select the rate effective date from the pick list. It is the effective date of the interest.

3. Click the **Add** button.
4. Enter the insurance policy number and press the <**Tab**> key.
5. Select the insurance plan code from the pick list.
6. Enter the cover value, assured value, and the billing account number.
7. Enter the insurance effective date, maturity date.
8. Enter the relevant policy details, customer details, premium details and premium rate details.

12.3. BAM67 - Collateral Insurance Cross Ref Maintenance

In case of secured loans the collaterals offered may be insured in which case the bank would like to facilitate the customer by maintaining all the details of the insurance policy.

It is imperative that the bank ensures that the collateral is fully insured since the bank has provided finance against the collateral. Ideally it is important to also ensure that the premium for the policy is paid well in time.

Using this option all the details of the policy are captured including the details of assured value, premium due date, maturity date of the policy, premium billing account, etc.

Definition Prerequisites

12.5. CHM56 - Insurance Xref Maintenance

Using this option you can define the insurance related parameters for a flexible RD (Savings/TPD) product. You can define the maximum age for a flexible RD (Savings/TPD) product and the percentage share value which will be credited to the Savings TPD account.

Example:

- Installment due date – 05-05-2008
- Installment Amount – 10,000
- Percentage of installment amount to be credited to the Savings/TPD account defined at product level - 90%

Thus following entries will be passed:

GL Head	Dr / Cr	Amount
CASA source account	Dr	10,000
Savings/TPD Account	Cr	10,000
Savings/TPD Account	Dr	1,000
Primajaga Insurance Account	Cr	1,000

The system will internally process this transaction.

Definition Prerequisites

12.6. Collections

Collections

12.7. CLN00 - Work Flow Master

Workflow refers to the process followed by a collector in an attempt to collect outstanding dues from customers. It is a sequential collection of actions, activities and states and the movement of a case from one state to another.

While trying to recover the outstanding amount from the customer, the case goes through various stages. For e.g. Customers promise to pay/ Customer breaks PTP / Call customer on the mobile. Each of these stages through which the case goes are known as State in **Oracle FLEXCUBE**.

Using this option you can define the flow of activities, actions and states.

12.9. CLN02 - Collector Setup*

Using this option you can define Users in **FLEXCUBE** who may perform various jobs like administration, system maintenance or repayment or collections. For users performing collection activities, they need to be defined as Collectors in the system.

The collector is a key user who performs follow-ups on delinquent cases. There can be multiple collectors defined for a supervisor, but every collector should have at least one supervisor. The supervisor defined can also be a collector and can perform regular follow up actions depending on the cases assigned.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a collector master

1. Type the fast path **CLN02** and click **Go** or navigate through the menus to **Global Definitions > Collection > Collector Setup**.
2. The system displays the **Collector Setup** screen.

Collector Setup

Field Description

Field Name	Description
Collector Definition	
Collector Code	[Mandatory, Pick List, 12] Select the collector code from the pick list. The user code selected is defined as a user in FLEXCUBE .
Collector Name	[Display] This field displays the user name based on the code selected in the corresponding field.
Supervisor (Y/N)	[Display] This field displays whether the collector is a supervisor or not.
Admin. Supervisor Code	[Conditional, Pick List] Select the admin supervisor code from the pick list. This field allows the user to select the supervisor. The supervisor

defined in the collector master is the administrative senior of the collector.

This field is mandatory only if the Supervisor field is not selected.

Collector Type	[Mandatory, Pick List] Select the collector type from the pick list. The collector can be Internal 'I' or External 'E' collector. It allows the user to only enter 'I' and 'E' characters.
Max Cases	[Mandatory, Numeric, Three] Type the maximum numbers of cases that can be assigned to a collector. A collector cannot be assigned more cases than the value specified in this field.
Leave From	[Display] This field displays the dates when the collector will be on leave. System does not allow allocation of cases to the collector during this period.
Leave To	[Display] This field displays the dates when the collector will be on leave. System does not allow allocation of cases to the collector during this period.
Override Action(Y/N)	[Optional, Check Box] Select the Override Action(Y/N) check box if the collector has the authority to change the next action. If this field is selected for a collector then he can override the automated next action while taking the follow up, i.e., he can add his desired next action.
Authorized To Stop Penalty(Y/N)	[Optional, Check Box] Select the Authorized To Stop Penalty(Y/N) check box if the collector has the authority to stop the penalty applied on the account.

Column Name	Description
--------------------	--------------------

Collector Groups

Collector Group Code	[Mandatory, Pick List] Select the collector group from the pick list. The user selects the collector group code for which the collectors are to be assigned. The values are defined in the collector group setup. User can attach one or more collector group.
Collector Group name	[Display] This field displays the selected collector group name.

3. Click the **Add** button.
4. Select the collector code and collector type from the pick list.
5. Enter the maximum number of cases and other collector details.

6. Click the **+** button to add the details of the collector setup.
7. Select the collector group code from the pick list.

12.11. CLN04 - Queue Definition*

Using this option you can define parameters for delinquent cases. One queue can have single or multiple parameters.

By defining these queues delinquent cases will be segregated among collector groups. These parameters can be overdue days, overdue amount, area, etc. Cases allocated to a queue will be then allocated among multiple collectors.

Each queue will have priority set. Cases which cannot be allocated to any collector will be allocated to Exception Collector. Delinquent cases, which don't fall under any specified queue, is assigned to Exception Queue. The exception queue system has to be defined through this setup.

Definition Prerequisites

- [CLN01 - Collector Group Setup](#)

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add queue definition

1. Type the fast path **CLN04** and click **Go** or navigate through the menus to **Global Definitions > Collection > Queue Definition**.
2. The system displays the **Queue Definition** screen.

12.17. CLN10 - Special Codes Setup

Using this option you can highlight exceptional cases and specify special codes. You can assign only one special code to an agreement.

The fraudulent cases or the disputed cases or the cases with VIP involvement need to be sorted out carefully. Such cases are handled by exceptional collectors who must provide valid reasons, and are then highlighted as exceptional cases.

Definition Prerequisites

12.18. CLN11 - Promise Setup*

Using this option you can define criteria's for promises taken by the collectors.

For each collector group the promise criteria will be defined. During the time of follow up collectors take follow up action. For the action taken if the result is PTP (Promise To Pay) then the collector will take promises based on the information entered in this form with respect to the collector group he/she belongs to.

Definition Prerequisites

- [CLN01 - Collector Group Setup](#)

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add promise setup details

1. Type the fast path **CLN11** and click **Go** or navigate through the menus to **Global Definitions > Collection > Promise Setup**.
2. The system displays the **Promise Setup** screen.

12.19. CLN13 - Result / Workflow Master

During the time of follow up the collector takes an action against which the result is fetched. The result is fetched from the **Action/ Result Setup** (Fast Path: CLN06) option. On taking result the record is saved and the agreement stays in the same workflow state.

Using this option you can change or let the agreement remain in the same workflow state.

For e.g. If the result obtained is "X" and workflow state of the agreement is "A", then after saving the record the agreement should move to workflow state "B" and if nothing is specified then the agreement will remain in the same workflow state.

Definition Prerequisites

12.22. XF001 - Collection Parameters Maintenance

Using this option you can set up parameterization of account movement to collection.

You can define the required parameters separately for each product code. It also allows you to set different type of movements to collection parameters at product level by defining various parameters such as, Number of unpaid installments, Unpaid amount compared to installment, Unpaid amount compared to outstanding principal, Number of successive unpaid installments and overdue days. If any of the criteria's are met the account is hand off for collection.

Definition Prerequisites

13. Asset Classification Definitions - Writeoff Maintenance

Advance or loan granted by a bank is vulnerable to risk. It is important for every bank to know the quality of its advances portfolio. Current Central Bank regulation makes it mandatory for banks to adopt a very stringent approach in terms of ensuring timely repayment of principal and interest by its borrowers. Accordingly, banks have to grade each asset account and also make sufficient provision for possible bad debts both for its secured and unsecured advances. **FLEXCUBE Retail** provides the flexibility to define the parameters for Asset classification, the provisioning frequencies, assigning CRR codes and defining accrual status, i.e., whether the interest earned on an advance is to be treated as Normal Interest or Suspended interest, etc.

13.1. ACM01 - Asset Classification Global Parameters

Using this option you can maintain global asset classification and provisioning related parameters. The following details are stored at the Bank Level:

- Level of classification : NPA to be tracked at account level
- Classification frequency and treatment on holidays
- Provisioning frequency

Definition Prerequisites

- [BAM20 - Bank Codes Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry.

To add asset classification global parameters

1. Type the fast path **ACM01** and click **Go** or navigate through the menus to **Global Definitions > AC > Asset Classification Global Parameters**.

Field Description

Field Name	Description
Bank Code	<p>[Mandatory, Numeric, Three]</p> <p>Type the unique bank code used to identify a bank.</p> <p>Central Bank assigns a bank code for each bank. The bank code defined in Oracle FLEXCUBE can be the same code assigned by the Central Bank.</p> <p>For more information on defining bank code refer to Bank Codes Maintenance (Fast Path: BAM20) option.</p>
Bank Name	<p>[Display]</p> <p>This field displays the name of the bank corresponding to the bank code.</p>
NPA Tracking Level	<p>[Mandatory, Drop-Down]</p> <p>NPA Tracking level is defaulted to account level only.</p>

Account - Individual accounts of a customer will have respective CRR and will not adopt the Customer CRR.

Classification Frequency

[Mandatory, Drop-Down]

Select the classification frequency from the drop-down list.

The accounts are classified according to the period selected in this field.

The options are:

- Daily
- Monthly
- Quarterly
- Half-Yearly
- Yearly

For example, if the frequency is set as **Daily**, the accounts will be classified into various categories as and when they qualify for it. In other cases, **Monthly/Quarterly/Half-Yearly/Yearly**, the classification will be done at the end of respective periods.

Period Start Month

[Conditional, Drop-Down]

Select the starting month of the period, used for defining the classification cycle, from the drop-down list.

This field is enabled only if the **Classification Frequency** field is selected as **Quarterly/Half-Yearly/Yearly**.

Holiday Treatment

[Mandatory, Drop-Down]

Select the holiday treatment from the drop-down list.

The holiday treatment determines the behavior in case the classification due falls on a holiday.

The options are:

- Classify on previous working day - The account will be classified on the previous working day.
- Classify on next day - The account will be classified on the next day.

Exclude OD With FD Collateral

[Optional, Check Box]

Select the **Exclude OD With FD Collateral** checkbox if the OD accounts secured by FD as collateral are to be exempted from NPA tracking and subsequent provisioning norms if OD account is going into NPA because of arrears DPD.

Provisioning

Provisioning Frequency

[Mandatory, Drop-Down]

Select the provisioning frequency from the drop-down list.

The provision frequency determines the frequency of the periods at which the provisioning will be done, in case of an automatic provisioning scenario.

The options are:

- Daily
- Monthly
- Quarterly
- Half-Yearly
- Yearly

If the frequency is set as **Daily**, the accounts will be provided for every movement of CRR and/or account balance. In other cases like **Monthly/Quarterly/Half-Yearly/Yearly**, the provisioning will be done at the end of respective periods.

Period Start Month

[Conditional, Drop-Down]

Select the starting month of the period, used for defining the classification cycle, from the drop-down list.

This field is enabled only if the **Classification Frequency** field is selected as **Quarterly/Half-Yearly/Yearly**.

3. Click the **Add** button.
4. Enter the bank code and the name of the bank.
5. Select the NPA tracking level, classification frequency, holiday treatment and provisioning details from the drop-down lists.

13.2. ACM02 - Asset Classification Preferences

Using this option you can determine the preference set for the product with respect to CRR movement, provisioning and claw-back.

You can control the nature of movement (manual or automatic), nature of entries to be passed during the provisioning, nature of claw-back option to be enabled and the type of arrears to be clawed back.

The possible matrix between forward and reverse movement is:

Nature of forward movement	Reverse Movements Allowed
No Tracking	No Tracking
Manual	Manual
Automatic	Automatic or Manual

The plan is attached to a product. If the plan has the **Exclude from writeoff** check box selected, then for all OD/ Loan accounts opened under the products that have this plan attached will be excluded from the automatic write-off process.

Field Description

Field Name	Description
Pref Plan Id	<p>[Mandatory, Numeric, Three] Type the preference plan code.</p> <p>It is a unique plan code given for asset classification, which would determine the preference set for the product with respect to CRR movement, provisioning and claw-back.</p>
Name	<p>[Mandatory, Alphanumeric, 30] Type a name for the plan code.</p>
Movement	
Forward Movement	<p>[Mandatory, Drop-Down] Select the forward movement from the drop-down list.</p> <p>This field refers to the forward movement from a better CRR category to a worse CRR category.</p>

The options are:

- No Tracking
- Manual
- Automatic
- Semi Automatic

Reverse Movement

[Conditional, Drop-Down]

Select the reverse movement from the drop-down list.

This field refers to the backward movement from a worse CRR category to a better CRR category. The system enables this field if the **Automatic** option is selected in the **Forward Movement** drop-down list.

The options are:

- No Tracking
- Manual
- Automatic
- Semi Automatic

Reverse Movement Control Flag

[Conditional, Drop-Down]

Select the reverse movement control flag from the drop-down list.

This field determines whether a reverse movement should occur on payment of all the arrears by the borrower, or if sufficient repayment has been made by the borrower to move the account to the next best CRR.

This field is enabled if the **Automatic** or **Manual** or **Semi Automatic** option is selected from the **Forward Movement** field.

The options are:

- None
- Realization of all arrears
- Classification Plan

If the **Realization of all arrears** option is selected, the system will not switch the account to a better CRR, unless all the arrears are paid off. This validation will be enforced even in a manual movement scenario.

If the **Classification Plan** option is selected, the system will move the account to the CRR category in which the account falls based on the classification rules.

For example: Assume a rule where an account is classified as **Substandard**, if it has arrears more than 30 days old and **Doubtful** if it has arrears more than 60 days old.

If there is an account with two arrears aged 45 and 90 days respectively then this account should be classified as **Doubtful** according to the above rule.

If the arrear aged 60 days has been paid off, then there would be reclassification of the account. The reclassification of the account will

be based on the above-mentioned flag.

If the flag is **Realization of all arrears**, the account will continue to remain **Doubtful** as the account still has an arrear and all arrears have not been paid.

If the flag is **Classification Plan**, the account will be re-classified as Substandard as according to the classification rule an account with dues more than 30 days and less than 60 days old should be classified as Substandard.

Note: The reverse movement control flag is considered only if the plan followed by the account has arrears as one of the criteria as classification. In other cases, the control will work as a warning only and will not prevent reverse movement.

Provisioning

Provision

[Conditional, Drop-Down]

Select the provisioning parameter from the drop-down list.

The provisioning parameter determines whether the provisioning on the account would be **Automatic** or **Manual**.

The options are:

- No Tracking
- Manual
- Automatic

If the **Automatic** option is selected, the system will calculate and store the provision at the frequency set in the **Provisioning Frequency** parameter. This flag, however, will not mean that the system passes the GL entries for the provision amount. Automatic Provision will just ensure calculation of provision.

If the **Manual** option is selected, the system will not do any calculation of provision on a periodic basis but the user will have the option to maintain any provision amount against the account/accounts under products where the provisioning is set as manual.

This field is disabled if the **No tracking** option is selected in the **Forward Movement** field.

GL Entries Provisioning

[Conditional, Drop-Down]

Select the GL entries provisioning parameter from the drop-down list.

The GL entries provisioning will be the deciding factor for provisioning entries in either Automatic or Manual.

The options are:

- Yes
- No

If the **Yes** option is selected, the system will automatically pass the GL entries for the provision, or the user can manually calculate it.

This field is disabled if the **No Tracking** option is selected from the **Provision** field.

Claw-Back

Claw Back Option

[Conditional, Drop-Down]

Select the claw-back option from the drop-down list.

The options are:

- No Clawback
- All outstandings:-Select this option for the system to determine whether the unrealised arrears should be transferred to the suspended GL accounts or not.
- Current financial year:- Select this option for the system to transfer the unrealized arrears of the current financial year only, to the suspended GL accounts. The unrealised arrears of the earlier period will not be moved to the suspended GL accounts.

This field is enabled if the **Automatic** or **Manual** or **Semi Automatic** option is selected in the **Forward Movement** drop-down list.

Arrears Claw Back

[Conditional, Check Box]

Select the appropriate check boxes corresponding to arrears to be claw-backed.

The options are:

- Interest Arrears
- Penalty Arrears
- Other Arrears
- Diverting Interest Arrears
- Post Maturity Interest Arrears
- SC/ Fee Arrears
- Compounding Interest Arrears

It is disabled if the **No Clawback** option is selected in the **Claw-back Option** drop-down list.

Write-Off

Exclude From Auto Writeoff

[Optional, Check Box]

Select the **Exclude From Auto Writeoff** check box to exclude all accounts to which this plan will be applicable from the automatic write off process.

The value specified in this option will be defaulted at account level in the **Automatic Write off Account Maintenance** (Fast Path: AC005) option.

Global Parameters

NPA Tracking Level

[Display]

This field displays the NPA tracking level.

This system defaults the value selected in the Asset Classification

Global Parameters (Fast Path: ACM01) option.

This system defaults the value selected in the **Asset Classification Global Parameters** option.

The system displays the information tracking level as to whether the classification is borrower wise, i.e., Customer Level or facility wise, i.e., Account Level.

Classification Frequency

[Display]

This field displays the classification frequency.

The system displays the information of frequency at which the NPA classification will be done.

The system defaults the value selected in the **Asset Classification Global Parameters** (Fast Path: ACM01) option.

This field can be modified at the preference level, if the NPA tracking level is set to **Account** in the **Asset Classification Global Parameters** (Fast Path: ACM01) option.

Period Start Month

[Display]

This field displays the start month that defines the classification cycle.

This field is disabled, if the frequency selected in the **Classification Frequency** field is daily or monthly.

The system defaults the value selected in **Asset Classification Global Parameters** (Fast Path: ACM01) option.

This field can be modified at the preference level, if the NPA tracking level is set to **Account** in the **Asset Classification Global Parameters** (Fast Path: ACM01) option.

Holiday Treatment

[Display]

This field displays holiday treatment flag that determine the behavior in case the classification falls due on a holiday. This field can be modified at the preference level, if the NPA tracking level is set to **Account** in the **Asset Classification Global Parameters** (Fast Path: ACM01) option.

Global Provisioning

Provisioning Frequency

[Display]

This field displays the provisioning frequency parameter that defines the period at which the provisioning will be done in case of **Automatic** provisioning.

This field can be modified at the preference level, if the NPA tracking level is set to **Account** in the **Asset Classification Global Parameters** (Fast Path: ACM01) option.

Period Start Month

[Display]

This field displays the start month that defines the provisioning cycle.

This field is disabled, if the frequency selected in the **Classification Frequency** field is daily or monthly.

This field can be modified at the preference level, if the NPA tracking level is set to **Account** in the **Asset Classification Global**

Parameters (Fast Path: ACM01) option.

3. Click the **Add** button.
4. Enter the preference plan id and the name.
5. Enter the movement, provisioning, claw-back, write off, global parameters and the global provisioning details.

13.3. ACM03 - Asset Classification Codes Maintenance

FLEXCUBE enables classification of an asset into one of the Credit Risk Ratings (also known as CRR) depending upon the performance of the asset.

Using this option you can define the various categories along with the relevant provisioning percentages for secured and unsecured portions of the asset. The record with the lowest CRR Code (numeric value) will be treated as the best category, and the one with the highest CRR Code as the worst. You can maintain the appropriation sequence type corresponding to each CRR.

Definition Prerequisites

Not Applicable

Modes Available

Modify, Inquiry.

To modify asset classification codes

1. Type the fast path **ACM03** and click **Go** or navigate through the menus to **Global Definitions > AC > Asset Classification Codes Maintenance**.
2. The system displays the **Asset Classification Codes Maintenance** screen.

Field Description

Column Name

Description

CRR Code

[Mandatory, Numeric, Four]

Type the unique Credit Risk Rating (CRR) code.

The CRR code is maintained at the bank level.

CRR Description

[Mandatory, Alphanumeric, 16]

Type a distinct description for the credit risk rating.

Accrual Status

[Display]

This column displays the current accrual status of the loan account.

The options are:

- Normal – The account is open and regular.
- Suspended – The account is suspended when an account

becomes NPL, based on the set up in the CRR codes attached to the product. A suspended account has arrears for a long period.

Provision Rate Secured Central Bank

[Mandatory, Numeric, Three, Five]

Type the percentage at which the secured portion of the account is maintained with the particular CRR.

The provision rate is used for automatic calculation of provision.

Provision Rate Unsecured Central Bank

[Mandatory, Numeric, Three, Two]

Type the percentage at which the unsecured portion of the account is maintained with the particular CRR.

The provision rate is used for automatic calculation of provision.

The outstanding principal balance is taken as the base for provisioning.

Provision Rate Secured Bank Internal

[Mandatory, Numeric, Three, Two]

Type the provision rate secured for secured loans.

Provision Rate Unsecured Bank Internal

[Mandatory, Numeric, Three, Two]

Type the provision rate unsecured for secured loans.

Provision Rate UnColl. Int.

[Mandatory, Numeric, Three, Two]

Type the percentage of provisioning to be done for the uncollected interest.

Flag Appropriation Sequence

[Mandatory, Drop-Down]

Select the flag appropriation sequence from the drop-down list.

The options are:

- Sequence 1: This option corresponds to the product level PL appropriation sequence.
- Sequence 2: This option corresponds to the product level or account level NPL appropriation sequence.

This sequence type will be assigned to an account if the account is in the corresponding CRR stage (performing /non performing stage).

Delete

[Toggle]

Click the toggle status to change the value to **Y**, to delete the appropriate CRR codes from the services.

By default, the system displays the value **N**.

3. Click the **Modify** button.
4. Double-click the appropriate CRR code that you want to modify from the list.
5. Modify the CRR description, provision rate secured, provision rate unsecured and provision rate uncoll. interest for the selected CRR code.
6. Click the **Add** button and enter the relevant information in the various columns.

13.4. ACM05 - Asset Classification Plan Maintenance

Using this option you can set up one or more criteria's that will govern asset classification under certain asset classification plans linked to products. Classification can be undertaken on one or more criteria namely number of days for which the arrears are overdue, erosion in collateral value due to collateral revaluation, inactivity in the account for a predefined period, TOD / Overline condition on the account, etc.

Having selected the criteria, the respective tabs will get enabled and you will have to define rules under every one of those criteria vis-à-vis the CRR codes maintained at the Bank Level.

Definition Prerequisites

- [ACM03 - CRR Codes Maintenance](#)
- [ACM08 - CRR Code - GL Cross Reference Maintenance](#)

Modes Available

Add, Modify, Delete, Inquiry.

To add asset classification plan details

1. Type the fast path **ACM05** and click **Go** or navigate through the menus to **Global Definitions > AC > Asset Classification Plan Maintenance**.
2. The system displays the **Asset Classification Plan Maintenance** screen.

Erosion Criteria

[Mandatory, Drop-Down]

Select the erosion criteria from the drop-down list.

The options are:

- Market Value Against Original Value: In case of Realizable
- Value Against Original Value, the % erosion will be calculated as follows:

$$\% \text{ Erosion} = (\text{Original Value} - \text{Market Value}) * 100 / \text{Original Value}$$

- Last Assessed Value against Original Value: In case of
- Last Assessed Value against Original Value, the % erosion

- will be calculated as follows:

$$\% \text{ Erosion} = \frac{(\text{Original Value} - \text{Last Assessed Value}) * 100}{\text{Original Value}}$$

- Market Value Against Last Value: In case of Realizable
- Value Against Last Assessed Value, the % erosion will be
- calculated as follows:

$$\% \text{ Erosion} = \frac{(\text{Last Assessed Value} - \text{Market Value}) * 100}{\text{Last Assessed Value}}$$

In the above cases, all primary collaterals linked to the account

will be considered for calculation of the original value, last assessed value or the original value in percentage, in which the respective collateral has been linked to the account.

Accrual Status	[Display] This column displays the accrual status corresponding to the CRR code.

12. Click the **Save** button.
13. The system displays the message "Record Added". Click the **OK** button.
14. The system displays the **Plan Code** tab.
15. To add more rules, click the **Add** button.
OR
Click the **Ok** button.
16. The system displays the message "Authorisation Required. Do you want to continue".
Click the **OK** button.
17. The system displays the **Authorization Reason** screen.
18. Enter the relevant information and click the **Ok** button.
19. The system displays the message "Record Authorized". Click the **OK** button.

13.5. ACM04 - Product CRR Codes Maintenance

Using this option you can maintain the provision rates for secured and unsecured assets for the selected product and CRR code. The provision rates can be defined for both the internal and central bank.

Definition Prerequisites

- [ACM03 - Asset Classification Codes Maintenance](#)
- [LNM11 - Product Master Maintenances](#)

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add product CRR codes

1. Type the fast path **ACM04** and click **Go** or navigate through the menus to **Global Definitions > AC > Product CRR Codes Maintenance**.
2. The system displays the **Product CRR Codes Maintenance** screen.

Field Description

Field Name	Description
Plan ID	[Mandatory, Pick List] Select the unique identification code of the plan from the pick list.
Product Code	[Mandatory, Pick List] Select the product code from the pick list. The product code that is being assigned should be within the range for CASA module as specified in the internal FLEXCUBE table ba_prod_acct_info .

Column Name	Description
CRR Codes	[Mandatory, Pick List] Select the unique Credit Risk Rating (CRR) code from the pick list. The CRR code is maintained at the bank level.

CRR Description	[Display] This column displays the distinct description for the credit risk rating.
Accrual Status	[Display] This column displays the current accrual status of the loan account. The options are: <ul style="list-style-type: none"> • Normal – The account is open and regular. • Suspended – The account is suspended when an account becomes NPL, based on the set up in the CRR codes attached to the product. A suspended account has arrears for a long period.
Provision Rate Secured Central	[Mandatory, Numeric, Three, Five] Type the regulatory provisioning rate stipulated by the central bank applicable on secured assets/ loans.
Provision Rate Unsecured Central	[Mandatory, Numeric, Three, Five] Type the regulatory provisioning rate stipulated by the central bank applicable on unsecured assets/ loans.
Provision Rate Secured Bank	[Optional, Numeric, Three, Five] Type the regulatory provisioning rate stipulated by the bank applicable on secured assets/ loans.
Provision Rate Unsecured Bank	[Optional, Numeric, Three, Five] Type the regulatory provisioning rate stipulated by the bank applicable on unsecured assets/ loans.
Provision Rate UnColl. Int.	[Optional, Numeric, Three, Five] Type the percentage of provisioning to be done for the uncollected interest.
Delete	[Toggle] Click the toggle status to change the value to Y , to delete the appropriate CRR codes from the services. By default, the system displays the value N . A CRR code can be deleted in the Modify mode.

3. Click the **Add** button.
4. Enter the plan id and name.
5. Select the product code from the pick list.
6. Click the **Add** button to add a product CRR code
7. Enter the CRR code, provision rate secured central, provision rate unsecured central, provision rate secured bank, provision rate unsecured bank and provision rate uncoll. interest.

14. Clearing Definition

Clearing operations form an integral part of any bank. **FLEXCUBE Retail** supports all the aspects of a clearing function, viz., inward clearing, outward clearing, inward and outward returns. It also supports correspondent banking arrangement wherein the bank can define a correspondent bank for a particular sector for clearing inward or outward cheques. Similarly, it can act as the correspondent bank in its sector for the defined correspondent banks.

14.1. STM59 - Settlement Bank Parameters

Using this option you can define the settlement and clearing parameters at the bank level such as:

- Various GL codes to be used by the clearing and settlement module
- Instrument and routing mask structures
- Unclaimed months for clearing instruments

This option is also used to define whether the asset type of accounts should be force debited for insufficient fund conditions during the inward clearing process. Only one row is allowed in this setup table for the entire bank.

Definition Prerequisites

- [GLM02 - Chart of Accounts](#)
- [BAM20 - Bank Codes Maintenance](#)

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To modify the settlement bank parameters

1. Type the fast path **STM59** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Settlement Bank Parameters**.
2. The system displays the **Settlement Bank Parameters** screen.

Field Description

Field Name

Description

Bank Code

[Mandatory, Pick List]

Select the bank code from the pick list.

The bank code is the code of the bank in which **Oracle FLEXCUBE** is being implemented. There will be only one row in the settlement bank parameters.

Default Outward Clearing Type

[Optional, Numeric, Three]

Type the default outward clearing type.

The bank can define a default outward clearing type for all the inward clearing rejects. Whenever an inward clearing instrument is rejected and the instrument has to be sent as a part of outward clearing, then the outward clearing process has to be run for the default outward clearing type for processing inward reject instruments.

IB Credit GL

[Optional, Numeric, Nine]

Type the inter bank credit GL code.

Inter branch GL is used when clearing transactions are performed from a branch different from the account branch. The inter branch GL acts as a routing GL through which the transaction is passed between branches.

The credit inter branch transactions are recorded in this GL. This should normally be the same as the IB Credit GL setup in the **Bank Master Maintenance** (Fast Path: BAM08) option.

This is a liability type of GL.

IB Debit GL

[Optional, Numeric, Nine]

Type the inter bank debit GL code.

Inter branch GL is used when clearing transactions are performed from a branch different from the account branch. The inter branch GL acts as a routing GL through which the transaction is passed between branches.

The debit inter branch transactions are recorded in this GL. This should normally be the same as the IB Debit GL setup in the **Bank Master Maintenance** (Fast Path: BAM08) option.

This is a liability type of GL.

Suspense Credit GL

[Optional, Numeric, Nine]

Type the suspense credit GL.

When a cheque is rejected in inward clearing, entries are passed to suspense debit GL and subsequently reverse entries are passed in the suspense credit GL when the cheque is returned in outward clearing.

This is a liability type of GL.

The entered GL account should be the Miscellaneous Credit implemented GL. Both the GLs should be of similar type either implemented GL or Normal GL.

Suspense Debit GL

[Optional, Numeric, Nine]

Type the suspense debit GL.

When a cheque is rejected in inward clearing, entries are passed to suspense debit GL and subsequently reverse entries are passed in the suspense credit GL when the cheque is returned in outward clearing.

This is a liability type of GL.

The entered GL account should be the Miscellaneous Debit implemented GL. Both the GLs should be of similar type either implemented GL or Normal GL.

CFC Credit GL

[Optional, Numeric, Nine]

This field is currently not used.

The CFC GLs are defined in the **Endpoint Master Maintenance** (Fast Path: BAM29) option.

CFC Debit GL

[Optional, Numeric, Nine]

This field is currently not used.

The CFC GLs are defined in the **Endpoint Master Maintenance** (Fast Path: BAM29) option.

**Cheque Purchase
Credit GL**

[Optional, Numeric, Nine]

Type the cheque purchase credit GL code.

This GL is credited when a cheque that has already been purchased before gets cleared in the value date clearing. During value date clearing, the cheque purchase GL is credited and the CFC GL is debited.

This is a asset/liability type GL.

**Cheque Purchase
Debit GL**

[Optional, Numeric, Nine]

Type the cheque purchase debit GL code.

This GL is debited when the cheque is purchased and the CASA account is credited for the same.

This is an asset/liability type GL.

**Outstation Clrg Credit
GL**

[Optional, Numeric, Nine]

This field is currently not used.

**Outstation Clrg Debit
GL**

[Optional, Numeric, Nine]

This field is currently not used.

**Undistributed Salary
Credit GL**

[Optional, Numeric, Nine]

This field is currently not used.

**Undistributed Salary
Debit GL**

[Optional, Numeric, Nine]

This field is currently not used.

**Bankers Cheque Paid
GL**

[Optional, Numeric, Nine]

Type the banker's cheque paid GL code.

During inward clearing of banker's cheque, credit entries are passed to this GL with the contra being passed to Banker's Cheque Issue GL. System assumes that all the issuers of Banker's Cheque coming via Inward clearing are the same.

This is a liability type GL.

**Bankers Cheque
Issue GL**

[Optional, Numeric, Nine]

Type the banker's cheque issue GL code.

During inward clearing of banker's cheque, debit entries are passed to this GL with the contra being passed to Banker's Cheque Paid GL. System assumes that all the issuers of Banker's Cheque coming via Inward clearing are the same.

This is a asset type GL.

**Demand Draft Paid
GL**

[Optional, Numeric, Nine]

Type the demand draft paid GL code.

During inward clearing of demand drafts, credit entries are passed to this GL with the contra being passed to Demand Draft Issue GL.

System assumes that all the issuers of Demand Drafts coming via Inward clearing are the same.

This is a liability type GL.

**Demand Draft Issue
GL**

[Optional, Numeric, Nine]

Type the demand draft issue GL code.

During inward clearing of demand drafts, debit entries are passed to this GL with the contra being passed to Demand Drafts Paid GL. System assumes that all the issuers of Demand Drafts coming via Inward clearing are the same.

This is a liability type GL.

**Travelers Cheque
Issue GL**

[Optional, Numeric, Nine]

This field is currently not used.

**Inward Clearing Force
Dr**

[Optional, Drop-Down]

Select the appropriate force Debit option during inward clearing.

Based on the parameter in this field, the system will process the inward clearing cheque for debiting a CASA account for a cheque received in inward clearing when the CASA account does not have sufficient funds to honor the cheque.

This field is editable in the Modify mode.

The options are:

- None
- No Force Debit - Reject the cheque and return it in the next outward clearing run
- Always Force Debit - Post the cheque into the account by creating TOD or Overline
- Amt_OD_Limit > 0 - Post the cheque only if the account has valid OD limits
- Flg_OD_Fac = Y - Post the cheque only if OD limits, expired or otherwise, are present on the account
- Force Dr -Asset Accounts - The asset type of accounts will be force debited in case of NSF during the inward clearing process run. This is not applicable to liability kind of accounts.

**Inward Direct Credit
GL**

[Optional, Numeric, Nine]

Type the inward direct credit GL code.

When Inward Direct Credit instruments are processed, system will pass debits to this GL with the contra being passed to the customer account.

This is an asset type GL.

SI Issued GL

[Optional, Numeric, Nine]

This field is currently not used.

Contingent Dr GL

[Optional, Numeric, Nine]

	Type the contingent debit GL code. Contingent entries are passed when a cheque is processed via OCC. In case of imbalance in these entries, the balancing entry is passed automatically by the system in the End of day.
Suspense Contingent Cr GL	[Optional, Numeric, Nine] Type the suspense contingent credit GL code. Contingent entries are passed when a cheque is processed via OCC. In case of imbalance in these entries, the balancing entry is passed automatically by the system in the End of day.
Routing Number Mask	[Optional, Numeric, Nine] Type the routing number mask, specifying the structure of the routing number. By default, the system displays generates the routing number in the SSSBBBbbb format, where <ul style="list-style-type: none"> • SSS – Sector Code • BBB – Bank Code • bbb – Branch Code
GL Account Number Mask	[Optional, Alphanumeric, 16] Type the GL account number mask, specifying the structure of the GL account number. By default, the system specifies BBBBCCCCGGGGGGG where: <ul style="list-style-type: none"> • BBBB – Branch Code • CCCC – Currency Code • GGGGGG – GL account number.
Instrument Number Mask	[Optional, Numeric, 12] Type the instrument number mask, specifying the structure of the instrument reference number generated automatically for Banker's Cheque, Demand Draft and Telegraphic Transfer. By default, the system displays generates the instrument number in the IIIFTSSSSSS format, where <ul style="list-style-type: none"> • III – Issue Branch code with leading zeros • F – Issued at branch or host (1 or 2) • T – Type of instrument • SSSSSS - Type of instrument
Number of Stale Months for cheques	[Optional, Numeric, Three] Type the number of months after which a cheque is marked as stale. At the time of liquidation the system calculates the stale period and rejects the instrument if it has crossed the stale period. The system does not keep track of the stale instruments.
IC Narrative	[Optional, Numeric, Three]

Modification Period	<p>Type the number of days for which the inward clearing narration can be modified in the statement for clearing cheques.</p> <p>An external file containing the changed narration can be uploaded within the period starting from the inward clearing date so that the default narration of inward clearing instruments can be changed.</p>
Dormancy Months	<p>[Optional, Numeric, Three]</p> <p>Type the number of months from the original issue date, after which a DD/BC will be moved to dormancy.</p> <p>The dormancy feature is used only for DD or BC.</p> <p>The dormancy months will be greater than or equal to stale months. It should be equal to or less than the unclaimed months.</p>
Contingent entry for late Deposit/Payment Received	<p>[Optional, Check Box]</p> <p>Select the check box to enable the system to generate the contingent entry for late deposits and payment received.</p>
Dormancy GL	<p>[Optional, Numeric, Nine]</p> <p>Type the dormancy GL code.</p> <p>The DD/BC will be moved to the new GL on qualifying for dormancy.</p> <p>This is a liability type of GL.</p>
Late Clrg Contingent Dr GL	<p>[Display]</p> <p>This field displays the contingent debit entries for late clearing.</p> <p>It is a liability type GL.</p>
Past Due GL	<p>[Optional, Numeric, Nine]</p> <p>Type the past due GL code.</p> <p>The DD/BC will be moved to the new GL after the due date.</p>
Late Clrg Contingent Cr GL	<p>[Display]</p> <p>This field displays the contingent credit entries for late clearing.</p> <p>It is an asset type GL.</p>
Transit GL Entry	<p>[Optional, Check Box]</p> <p>Select the Transit GL Entry check box to enable the contingent GL's and pass the entries.</p>
Debit Past Due GL	<p>[Optional, Check Box]</p> <p>Select the Debit Past Due GL check box if the due GL is to be moved to past due GL.</p>
Intercity Expense GL	<p>[Mandatory, Numeric, Nine]</p> <p>Type the intercity expense GL.</p> <p>This GL will be debited when the inward clearing file contains instrument types related to Debit Notes. This is not an implemented GL type.</p>
Batch Size	<p>[Mandatory, Numeric, Five]</p>

Type the branch batch size.

To support extraction of a fixed number of records in a batch, the user can define the branch batch size eg. 200.

ECS Inward Debit GL [Mandatory, Numeric, Nine]

Type the ECS inward debit GL code.

ECS Inward Debit Return GL [Mandatory, Numeric, Nine]

Type the ECS inward debit return GL code.

3. Click the **Modify** button.
4. Select the bank code from the pick list.
5. Modify the various GL details.

14.2. BAM41 - Sector Master

Using this option you can define all those clearing sectors in which the bank would have its branches dealing within the clearing system. These sectors have to be defined before setting up branches.

Sectors are referred to in **Oracle FLEXCUBE** operations of clearing such as Cheque Deposits, Inward Clearing, etc. The Central bank of the country allocates a unique code for each of the clearing sectors in the country.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a sector code

1. Type the fast path **BAM41** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Sector Master**.
2. The system displays the **Sector Master** screen.

Sector Master

Field Description

Field Name	Description
Sector Code	<p>[Mandatory, Numeric, Five]</p> <p>Type the sector code.</p> <p>Sector code is a unique number representing the clearing sector assigned by the central bank of the country.</p> <p>Once added, this field cannot be modified or amended.</p>
Sector Name	<p>[Mandatory, Alphanumeric, 30]</p> <p>Type the sector name.</p>
Enable Speed Clearing	<p>[Optional, Check Box]</p> <p>Select the check box to enable speed clearing for a particular sector.</p>

3. Click the **Add** button.
4. Enter the sector code and name.

14.3. STM97 - Correspondent Bank Master Maintenance

Using this option you can define a correspondent bank for a particular sector for clearing inward or outward cheques.

A bank acting as a correspondent bank has to be set up as an endpoint for the purpose of processing cheques in the **Endpoint Master Maintenance** (Fast Path: BAM29) option.

If a bank has an out-station cheque for clearing, depending on the clearing sector to which the clearing house belongs, this cheque will be sent to the correspondent bank defined for that particular sector.

Definition Prerequisites

- [BAM20 - Bank Codes Maintenance](#)
- [BAM56 - Currency Code Maintenance](#)
- [BAM14 - Rewards and Service Charges definition](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the correspondent bank master

1. Type the fast path **STM97** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Correspondent Bank Master Maintenance**.
2. The system displays the **Correspondent Bank Master Maintenance** screen.

Field Description

Field Name	Description
Correspondent Bank Code	[Mandatory, Pick List] Select the correspondent bank code from the pick list. Bank codes are defined in the Bank Codes Maintenance (Fast Path: BAM20) option.
Correspondent Branch Code	[Mandatory, Numeric, Four] Type the correspondent branch code for the selected bank code.
Currency	[Display] This field displays the local currency. This is the currency in which the bank accepts the clearing instrument.
Clearing Sector	[Mandatory, Drop-Down] Select the clearing sector, for which you want to define the corresponding bank, from the drop-down list. The clearing sector is a geographical location within which the clearing

happens. A corresponding bank or clearing house will be allocated to a clearing sector. All the clearing within a sector is allocated through this clearing house or correspondent bank.

Address 1	[Mandatory, Alphanumeric, 35] Type the primary address of the corresponding bank.
Corr. Bank ICC Cr GL	[Optional, Numeric, Nine] Type the corresponding bank ICC credit GL code. It is an asset or a liability GL defined by the bank which gets credited when the ICC instrument logged on behalf of a correspondent bank gets realised as a part of the local outward clearing process.
Address 2	[Optional, Alphanumeric, 35] Type the secondary address of the corresponding bank.
Corr. Bank OCC Dr GL	[Optional, Numeric, Nine] Type the corresponding bank OCC debit GL code. When cheques are sent to correspondent bank for clearing in those regions where the bank does not have its own branch doing the clearing, this GL is credited by DD or payment from correspondent bank. On receipt of funds, the realization of the OCC instrument is done during which the customer's account is credited and this GL is debited. It is an asset or a liability GL.
Corr. Bank ICC SC Code	[Conditional, Pick List] Select the service charge code from the pick list. The origin bank acting as the correspondent bank for its clearing sector will levy service charges for the outward clearing services provided by them. This field is enabled only if the Corr. Bank ICC Cr GL field is not blank.
Contingent Credit GL	[Conditional, Numeric, Nine] Type the contingent credit GL code. The contingent GL is credited when the correspondent bank instrument is dispatched. This is a contingent liability type GL. This field is mandatory for outward clearing but optional for inward clearing.
Corr. Bank OCC SC Code	[Conditional, Pick List] Select the service charge code from the pick list. The correspondent bank will levy service charges for the inward clearing services provided to the origin bank. This field is enabled only if the Corr. Bank ICC Dr GL field is not blank.

Contingent Debit GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the contingent debit GL code.</p> <p>The contingent debit GL is debited when the correspondent bank instrument is dispatched.</p> <p>This is a contingent liability type GL.</p> <p>This field is mandatory for outward clearing but optional for inward clearing.</p>
No. of Lead Days	<p>[Optional, Numeric, Five]</p> <p>Type the number of lead days.</p> <p>Lead days indicate the number of days before which the bill has to be dispatched.</p>
Outward Bill Sent for Collection Cr GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the outward bill sent for collection credit GL code.</p> <p>When a bill belonging to a customer of the bank is sent for collections, this GL is credited with the proceeds of bill amount.</p> <p>This field is enabled if the lead days entered are greater than zero. Also this field then becomes mandatory.</p> <p>It is a contingent asset or a liability GL.</p>
Inward Bill Realization Cr GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the inward bill realization credit GL code.</p> <p>When a bill drawn on a customer of the bank is received for collection, this GL will be credited by debiting customer's account.</p> <p>This field is enabled if the lead days entered are greater than zero. Also this field then becomes mandatory.</p> <p>It is an asset or a liability GL.</p>
Outward Bill Sent for Collection Dr GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the outward bill sent for collection credit GL code.</p> <p>When a bill belonging to a customer of the bank is sent for collections, this GL is debited with the proceeds of bill amount on realization of the bill and customer account is credited.</p> <p>This field is enabled if the lead days entered are greater than zero. Also this field then becomes mandatory.</p> <p>It is a contingent asset or a liability GL.</p>
Outward Bill Realization Dr GL	<p>[Conditional, Numeric, Nine]</p> <p>Type the outward bill realization debit GL code.</p> <p>When the proceeds of the bill drawn on a customer of the bank is received from collection, this GL will be debited and the proceeds are remitted to the correspondent bank.</p> <p>This field is enabled if the lead days entered are greater than zero. Also this field then becomes mandatory.</p> <p>It is an asset or a liability GL.</p>

3. Click the **Add** button.
4. Select the correspondent bank code from the pick list.
5. Enter the correspondent branch code and select the currency and clearing sector from the drop-down list.
6. Enter the address, SC code details, number of lead days and the various GL details for the selected correspondent bank code.

14.4. STM50 - Clearing Branch - Cross Reference

Clearing Branch-Cross Reference is required to indicate the branch which shall do the clearing operations for the other retail branch(es) of the bank falling under the same sector.

Centralised clearing is a setup where one clearing branch does the clearing operations for other branches. Decentralized clearing is a setup where each branch performs the clearing for itself. The clearing branch is the single point of contact with the clearing house for all the respective branches.

Using this option you can maintain a cross-reference table between the originating branch-endpoint combination, and the corresponding clearing branch. Centralised and / or decentralised setup can be enabled through this setup.

Definition Prerequisites

- [BAM03 - Branch Master Maintenance](#)
- [BAM29 - End Point Master Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the clearing branch cross-reference

1. Type the fast path **STM50** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Clearing Branch - Cross Reference**.
2. The system displays the **Clearing Branch - Cross Reference** screen.

Field Description

Field Name	Description
Origin Branch	<p>[Mandatory, Pick List]</p> <p>Select the origin branch from the pick list.</p> <p>The branch name is displayed in the adjacent field.</p> <p>This is the retail branch where the clearing instruments such as cheques are handled.</p>
End point	<p>[Mandatory, Drop-Down]</p> <p>Select the endpoint from the drop-down list.</p> <p>The endpoint is a clearing house or a correspondent bank to which the cheques are sent or received to / from sent to for clearing purposes. The end points are added and maintained in the End Point Master Maintenance (Fast Path: BAM29) option.</p>
Clearing Branch	<p>[Mandatory, Pick List]</p> <p>Select the clearing branch from the pick list</p>

The clearing branch name is displayed in the adjacent field.

Clearing branch is the service branch that will clear cheques for all the branches of the bank under the same sector. In a decentralized set up each branch may clear its own cheques for the same or different endpoints. In a centralised set up there will be a common branch acting as a clearing branch.

Participate in OC

[Optional, Check Box]

Select the checkbox if the branch clearing operations are to be performed in a centralized set up with ACH.

These branches can by pass marking of late clearing and can directly run the OC.

3. Click the **Add** button.
4. Select the origin branch and the clearing branch from the pick list and the end point from the drop-down list.

5. Click the **Ok** button.

6. The system displays the message "Record Added...Authorisation Pending..". Click the **Ok** button.
7. The clearing branch cross reference is added once the record is authorised.

Example

In a centralised clearing set up all branches in a sector, as defined in the Endpoint Clearing branch maintenance send their cheques to Branch A (The clearing branch). The clearing branch forwards these cheques for further processing through the clearing Endpoint appointed by the Central Bank of the country. For each branch and endpoint combination, it would be required to maintain branch A as the clearing branch. For branch A both the origin branch and the clearing branch would be maintained as branch A.

Let us assume the following set up for clearing branch:

Origin Branch: Branch A (sector 400)

Endpoint: Clearing Endpoint 1

Clearing Branch: Branch A (sector 400)

Following set up for Endpoint Float:

Origin sector: 400

Destination Sector: 400

Bank: 0

Endpoint: Clearing Endpoint 1

Clearing Type: - Hi Value

Float Days Customer: 0 Days

Float Days Bank: 0 Days

Outstation: N

For a Hi-Value, the realization of the cheque would be on the same day for local clearing. Since the cheque has to go to Clearing Endpoint 1 for clearing and has the origination branch as Branch A, the clearing branch for this cheque is Branch A itself.

The float days will be calculated based on the set up in endpoint float master for origin sector 400 and destination sector 600 for clearing type Hi Value and Float Days being 0 Days (as an Example).

14.5. STM60 - ACH Branch Cross Reference Maintenance

In areas where branches clear cheques through an Automated Clearing House (ACH), the ACH assigns a unique branch code for all the branches, of all the banks, in the same sector.

Using this option you can maintain a cross reference between internal branch code and their ACH-assigned branch numbers, so that **Oracle FLEXCUBE** can correctly interpret the ACH branch number.

Definition Prerequisites

- [BAM03 - Branch Master Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the ACH branch cross reference

1. Type the fast path **STM60** and click **Go** or navigate through the menus to **Global Definitions > Clearing > ACH Branch Cross Reference Maintenance**.
2. The system displays the **ACH Branch Cross Reference Maintenance** screen.

14.7. BAM27 - Calendar For End Point

Endpoints represent the clearing houses of the Central Bank of the country common for all the banks or clearing agencies of the bank. In case the bank does not have a clearing house membership, it would have arrangements with other correspondent banks for doing their clearing. In such cases, the correspondent bank doing the clearing will be the end point. All clearing instruments need to flow through an End point.

The holiday details of the endpoint can be maintained using the Calendar For Endpoint option. The composite calendar is generated using the Endpoint calendar and the clearing branch calendar via the **Composite Calendar Generation** (Fast Path: BAM33) option. This composite calendar is taken into consideration for automatic calculation of value date of the cheque. The user can generate composite calendars for the bank and endpoints using **Composite Calendar Generation** option. A composite calendar determines working days for the bank or endpoints as a whole.

Composite Calendar is generated for the following:

- Bank Calendar – The calendar is generated after taking into consideration all the calendars defined for the branches using the **Bank Calendar Maintenance**. This calendar is taken into consideration for determining the next working day for the system when the system is processing the End of Day batch process.
- Endpoint Clearing branch Calendar - The calendar is generated after taking into consideration the calendars of endpoints and the clearing branches. This calendar is taken into consideration for automatic determination of value date of the check which has to be sent for outward clearing.

8. The calendar for endpoint id is added once the record is authorised.

14.8. BAM33 - Composite Calendar Generation

Using this option you can generate composite calendars for the bank and endpoints. A composite calendar determines working days for the bank or endpoints as a whole.

Composite Calendar is generated for the following:

- Bank Calendar – The calendar is generated after taking into consideration all the calendars defined for the branches using the Bank Calendar Maintenance. This calendar is taken into consideration for determining the next working day for the system when the system is doing the End of Day batch process.
- Endpoint Clearing branch Calendar - The calendar is generated after taking into consideration the calendars of endpoints and the clearing branches. This calendar is taken into consideration for automatic determination of value date of the cheque which has to go for outward clearing.

Definition Prerequisites

- [BAM03 - Branch Master Maintenance](#)
- [BA090 - Bank Calendar Maintenance](#)
- [BAM29 - End Point Master Maintenance](#)
- [BAM27 - Calendar For Endpoint](#)

Modes Available

Not Applicable

To generate a composite calendar

1. Type the fast path **BAM33** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Clearing > Composite Calendar Generation**.
2. The system displays the **Composite Calendar Generation** screen.

Composite Calendar Generation

Field Description

Field Name	Description
Bank Calendar Generation	<p>[Mandatory, Radio Button]</p> <p>Click Bank Calendar Generation to generate the bank calendar.</p> <p>The calendar for the bank is generated by combining the individual calendars maintained for all branches. A working day of one branch is considered as a working day for the bank since EOD has to be run for that day. This calendar is used for setting the next working day after EOD processing.</p>
Endpoint-Clearing Branch Composite Calendar	<p>[Mandatory, Radio Button]</p> <p>Click Endpoint-Clearing Branch Composite Calendar to generate the endpoint-clearing branch composite calendar.</p> <p>This calendar combines the clearing branch calendar and the endpoint calendar for determining the working days of the endpoint and the bank. The composite calendar is required to calculate the value date based on the float days set up.</p> <p>A holiday for the endpoint or the clearing branch will result in the</p>

holiday for the composite entity.

End Point Code

[Conditional, Drop-Down]

Select the end point code from the drop-down list.

This field is enabled only if the **Endpoint-Clearing Branch Composite Calendar** option is selected.

3. Click the **Bank Calendar Generation** option to generate a bank calendar.
OR
Click the **Endpoint-Clearing Branch Composite Calendar** to generate composite calendar and select the endpoint code from the drop-down list.

Composite Calendar Generation

Composite Calendar Generation*

Bank Calendar Generation

Endpoint - Clearing Branch Composite Calendar

End Point Code :

OK Close Clear

4. Click the **Ok** button.
5. The system displays the message "Calendar has been successfully created...". Click the **OK** button.

Note: This procedure must be repeated every time the bank calendar or the endpoint calendar is modified.

14.9. STM54 - Routing Branch Maintenance

Using this option you can maintain the list of all banks and all of their branches in various sectors from whom the outward clearing cheques are expected to be deposited in the bank.

During cheque deposit, the routing number is validated against this maintenance and the split of drawee bank name, branch name and the sector name is displayed. If a specific routing number of a drawee bank is not maintained, then the system will not allow the teller to perform cheque deposit transaction, which implies that the Instrument belongs to an invalid bank/branch/sector.

Example 1

If a bank has set up a new branch in the city and this is to be added to the clearing set up for processing cheques,

The bank code for e.g. is (as per Bank Master): 402 and name: DEMO Bank Ltd.

New Branch added with code is (as per Branch Master): 112

Branch name maintained is (as per Branch Master): Branch A

The sector in which the branch will perform clearing is (as per Branch and Sector Codes Master): 600

The new routing number would therefore be 600402112 (as per the Routing Number mask mentioned at Settlement Bank Parameters Maintenance)

This would mean customer is depositing a cheque, of an account belonging to the same bank.

The above stated example will stand similar for a Drawee bank

Example 2

The drawee bank code for e.g. is (as per Bank Codes Maintenance): 400 and name: IMPLI Bank Ltd.

Drawee Branch code is (as per Routing Branch Master Maintenance): 100

Drawee Branch name is (as per Routing Branch Master Maintenance): Branch B

The sector in which the Branch will perform clearing is (as per Branch and sector codes Master): 600

The new routing number would therefore be 600400100 (as per the Routing Number mask mentioned at Settlement Bank Parameters Maintenance)

This would mean customer is depositing a Cheque, of an Account not belonging to the same bank.

Definition Prerequisites

- [BAM41 - Sector Master](#)
- [BAM20 - Bank Codes Maintenance](#)

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the routing branch details

1. Type the fast path **STM54** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Routing Branch Maintenance**.

2. The system displays the **Routing Branch Maintenance** screen.

Routing Branch Maintenance

Field Description

Field Name	Description
------------	-------------

Bank Code	<p>[Mandatory, Pick List]</p> <p>Select the bank name in routing number from the pick list.</p> <p>The pick list lists the banks added in the bank codes maintenance. For more information on adding a bank code, refer to the Bank Codes Maintenance (Fast Path: BAM20) option.</p>
Sector Code	<p>[Mandatory, Pick List]</p> <p>Select the clearing sector code containing the bank's branches from the pick list.</p> <p>Sector codes are defined in the Sector Master (Fast Path: BAM41) option.</p>

Column Name	Description
Branch Code	[Mandatory, Numeric, Four] Type the branch code which forms a part of the routing number. This code will be included in the routing number.
Branch Name	[Mandatory, Alphanumeric, 31] Type the branch name corresponding to the Branch Code.
InterCity CLG	[Toggle] Click the toggle status to Y if the bank branch participates in intercity clearing. By default, the system displays the value as N .
Delete	[Toggle] Click the toggle status to Y to delete the routing branch details By default, the system displays the value as N .

3. Click the **Add** button.
4. Select the bank code and sector code from the pick list.
5. Click the **Add** button and enter the data in the branch code, branch name fields.

Note:The user can delete a routing branch from the **Add** mode before the record is authorised.

14.10. STM70 - Routing Number Details

Using this option you can capture the details for every routing number.

The details captured here will be part of the outgoing payment extracts based on the destination routing number. The routing number combination should be defined in **Routing Branch Maintenance** (Fast Path: STM54) option prior to this. You have to capture BI Office Code, City Code, Province Code and Bank type for every routing number.

Note: There is no processing involved with this maintenance and Payments module will refer this at the time of outgoing payment extract generation.

14.11. STM58 - Instrument Type Xref

Using this option you can maintain a cross-reference between the predefined **Oracle FLEXCUBE** instrument types and the instruments used at the clearinghouse.

This ensures that the instrument type which appears on the MICR line, and **Oracle FLEXCUBE** functionality is not affected by the instrument variations in different countries. These instruments have specific reference to the modules.

For example, if a savings account cheque is presented for inward clearing, then based on internal instrument type as determined using this Instrument Type Xref maintenance, the **Oracle FLEXCUBE** system will try to fetch the cheque number from the Savings Module and not in Bankers Cheque Module or Demand Drafts Module.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the instrument type Xref details

1. Type the fast path **STM58** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Instrument Type Xref**.
2. The system displays the **Instrument Type Xref** screen.

Internal Instrument Type	<p>[Mandatory, Drop-Down]</p> <p>Select the internal instrument type, to which the site/clearing house instrument corresponds, from the drop-down list.</p> <p>By default, the system displays the value in this field as None.</p>
Description	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the name of the instrument.</p>
Transaction Mnemonic	<p>[Mandatory, Pick List]</p> <p>Select the transaction mnemonic from the pick list.</p> <p>This is the mnemonic of the transaction for which the new instrument</p>

type is added.

For example, for an instrument like cheque – transaction mnemonic would be 6501

Pass Consolidated Entry

[Optional, Check Box]

Select the **Pass consolidated entry** check box to enable the bank to pass consolidated entries to the accounts for the instruments at the time of inward processing.

3. Click the **Add** button.
4. Enter the site instrument code.
5. Select the internal instrument type from the drop-down list and enter the description.
6. Select the transaction mnemonic code from the pick list.

Instrument Types Xref

The screenshot shows a window titled "Instrument Type Xref*" with the following fields and controls:

- Site Instrument Type :
- Internal Instrument Type : - Description :
- Transaction Mnemonic :
- Pass Consolidated Entry :

At the bottom, there is a "Record Details" section with the following fields:

Input By	Authorized By	Last Mnt. Date	Last Mnt. Action	Authorized
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="checkbox"/>

Below the record details are radio buttons for: Add (selected), Modify, Delete, Cancel, Amend, Authorize, and Inquiry. At the bottom right are buttons for Ok, Close, and Clear.

7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorisation Pending..". Click the **Ok** button.

9. The instrument type is added once the record is authorised.

14.12. STM56 - Site Reject Code Xref

When a cheque gets returned via clearing, it has to be sent back to the clearing house with reject reason. This reject reason should be one of the reject reasons, identified by a code, as outlined by the clearing house.

When **FLEXCUBE** rejects a cheque, it assigns an internal reject reason code to the same.

Using this option you can maintain the cross reference between the reject reason codes of the clearing house and the **FLEXCUBE** reject codes .

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

14.13. BAM28 - Endpoint Float Maintenance

Using this option you can enable the system to automatically associate an endpoint code with the bank float days for a cheque deposited into the system. This option determines the float days in which the cheque will be cleared or realized, after the customer deposits a cheque in his account.

For a combination of origination sector code, destination sector code, bank code and outward clearing type, one can define the number of float days to be associated with the cheque and the SC to be applied along with the Endpoint to which the cheque is sent for clearing.

Definition Prerequisites

- [BAM29 - End Point Master Maintenance](#)
- [STM64 - Clearing Type Maintenance](#)
- [BAM20 - Bank Codes Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add new endpoint float details

1. Type the fast path **BAM28** and click **Go** or navigate through the menus to **Global Definitions > Clearing > End Point Float Maintenance**.
2. The system displays the **Endpoint Float Maintenance** screen.

Field Description

Field Name	Description
Origin Sector	<p>[Mandatory, Pick List]</p> <p>Select the origin sector code from the pick list.</p> <p>The origin sector has to be set up for all the sectors where the bank has branches.</p> <p>The sector code is added and maintained in the Sector Master (Fast Path: BAM41) option.</p> <p>A sector code is attached to each branch of the bank using the Branch Master Maintenance (Fast Path: BAM03) option.</p>
Destination Sector	<p>[Mandatory, Pick List]</p> <p>Select the destination sector from the pick list.</p> <p>This indicates the sector to which the cheque has to go for clearing. The provider account resides in this clearing sector.</p>
Bank	<p>[Mandatory, Pick List]</p>

Select the bank code from the pick list.

Select the bank code as zero to include all the banks in a particular origination sector - destination sector combination.

Select a specific bank code if you want to define a separate service charge or float days for a particular bank.

The bank codes are added in the **Bank Codes Maintenance** (Fast Path: BAM20) option.

Outward Clearing Type

[Mandatory, Drop-Down]

Select the outward clearing type from the drop-down list.

The outward clearing type is defined in the **Clearing Type Maintenance** (Fast Path: STM64) option.

For a combination of origination sector, destination sector, bank code and outward clearing type, one can define the endpoint to which the cheque will go for clearing and the clearing float days.

End Point Code

[Mandatory, Drop-Down]

Type the endpoint code.

Endpoint code is a unique number representing the clearing house/correspondent bank code to where the cheque will be sent for clearing.

Transit Float Days

[Mandatory, Numeric, Two]

Type the number of days to be defined for transit for instruments from the branch to the centralised clearing branch.

Transit days expire in the BOD of each day.

Float Days Customer

[Mandatory, Numeric, Three]

Type the float days for a customer.

This is the number of working days after which the customer account will get clear credit. Credit is given to a customer when the value date clearing process is run on a particular day.

Float Days Bank

[Mandatory, Numeric, Three]

Type the float days for a bank.

This is the number of days after which the bank would receive credit for an outward clearing cheque. For purposes of safety or returns processing, the bank may chose to give credit to the customer some days after they receive credit.

The bank float days must be less than or equal to the customer float days.

Service Charge

[Optional, Drop-Down]

Select the service charge, which is applicable for the transaction, from the drop-down list.

The service charge is added in the **Service Charge Code Maintenance** (Fast Path: BAM14) option.

Outstation

[Optional, Check Box]

Select the **Outstation** check box if the clearing is outstation clearing where the time taken for clearing is long or uncertain.

Credit Interest On

[Mandatory, Radio Button]

Select the appropriate option to indicate when the interest should be credited, i.e., when the interest should be calculated.

The options are:

- Default Date - Credit interest will be calculated on the default date. Default date indicates that calculation of interest should be based on the set up at the product level, i.e., at book balance or collected balance
- Posting date – Cheque will be posted into the account on the posting date and hence credit interest will be applicable on the uncleared funds.
- Value Date - Credit interest will be calculated on the value date and no interest is payable on the uncleared funds.

By default, the system selects the **Posting Date** option.

Debit Service Charge On

[Mandatory, Radio Button]

Select the appropriate option to indicate when the service charge should be debited, i.e., when the service charge should be levied.

The options are:

- Default Date
- Posting date
- Value Date

Minimum Amount For Clearing Type

[Optional, Numeric, 13, Two]

Type the minimum amount for the selected type of clearing.

3. Click the **Add** button.
4. Select the origin sector, destination sector and bank from the pick list and the outward clearing and end point code from the drop-down list.
5. Select the date on which the interest has to be credited and service charge has to be debited.
6. Enter the float days for the customer and the bank and the minimum amount.
7. Select the service charge from the drop-down list.
8. Select the check box if the clearing is outstation.

14.14. STM64 - Clearing Type Maintenance

Using this option you can define a clearing type for the outward clearing cheques.

All outward clearing or inward clearing return cheques need to be tagged with a clearing type so that they can be picked up when outward clearing is run for an endpoint and clearing type combination. Apart from enabling multiple outward clearing runs for an endpoint, a clearing type enables the bank to give different float days for an originating sector and destination sector combination.

Definition Prerequisites

GL**

[Mandatory, Numeric, 10]

Type the Advance Interest Received GL code.

Advance Interest Received' is the interest amount recovered in advance at the time of discounting the post dated cheque.

This is a liability type GL.

Interest Income GL

[Mandatory, Numeric, 10]

Type the Interest Income GL code.

The discounted interest income is credited to this GL.

This is an income type GL.

**Penal Int. Receivable
GL**

[Mandatory, Numeric, 10]

Type the Penal Int. Receivable GL code.

When discounted post dated cheque return has been passed to PDC purchase pastdue GL, penal interest is charged on account depending on penal interest capitalization frequency. It is used for accrual frequency.

This is an asset type GL.

Penal Int. Income GL

[Mandatory, Numeric, 10]

Type the Penal Int. Income GL code.

This is used for income GL for the penal interest.

This is an income type GL.

**Penal Int. Accrual
Freq**

[Mandatory, Drop-Down]

Select the penal interest accrual frequency option from the drop-down list.

Once the cheque is returned, penalty interest will start accruing. The frequency at which penalty interest is accrued is specified in the field.

The options are:

- Daily
- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

**Penal Int.
Capitalization Freq**

[Mandatory, Drop-Down]

Select the penal interest capitalization frequency from the drop-down list.

The options are:

- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

Int. Accrual basis

[Mandatory, Drop-Down]

Select the interest accrual basis for calculating the discounted interest from the drop-down list.

The drop-down list, lists seven different types of interest accrual methods.

The interest accrual methods and their calculation characteristics are defined as follows:

- Actual/Actual - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- Actual/365 - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years.
- Actual/360 - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- Euro 30/360 - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- US 30/360 - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- Euro 30/Actual - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- US 30/Actual - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as

denominator.

Penal Int. Accrual basis

[Mandatory, Drop-Down]

Select the penal interest accrual frequency for calculating penal interest from the drop-down list.

The penal interest accrual methods and their calculation characteristics are defined as follows:

- Actual/Actual - Actual days in a month will be taken as numerator and actual days in a year will be taken as denominator.
- Actual/365 - Actual days in a month will be taken as numerator and 365 days in a year will be taken as denominator. This affects interest calculations for the leap years.
- Actual/360 - Actual days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- Euro 30/360 - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. 360 days in a year will be taken as denominator.
- US 30/360 - 30 days in a month will be taken as numerator and 360 days in a year will be taken as denominator.
- Euro 30/Actual - 30 days in a month will be taken as numerator for all months except February. Actual number of days in February will be considered for calculation. Actual days in a year will be taken as denominator.
- US 30/Actual - 30 days in a month will be taken as numerator for all months. Actual days in a year will be taken as denominator.

Amortization Frequency

[Mandatory, Drop-Down]

Select the amortization frequency for paying back the discounted amount from the drop-down list.

This is the frequency which is recognized from Advance Interest Received GL and posted to Interest Income GL.

The options are:

- Daily
- Monthly
- Bi-Monthly
- Quarterly
- Half-Yearly
- Yearly

Waive Unamortized Interest

[Mandatory, Check Box]

Select the **Waive Unamortized Interest** check box to waive unamortized interest.

When the Post Dated cheque purchase is cancelled, the unamortized amount can be credited back to the account or it will be credited to the income. If the check box is selected, the amount will go to the customer account. If the check box is not selected, the amount will go to the income GL.

Int. Indx Code

[Optional, Drop-Down]

Select the interest index code from the drop-down list.

Penal Int. Indx Code

[Optional, Drop-Down]

Select the penal interest index code from the drop-down list.

PDC Force Debit

[Optional, Drop-Down]

Select the PDC force debit from the drop-down list.

The options are:

- **NO FORCE DEBIT:** If the account does not have enough balance then it will not be force debited but moved to PDC past due GL.
- **ALWAYS FORCE DEBIT:** The account will be always force debited. This is subject to the product set up.

3. Click the **Add** button.
4. Enter the plan code and the plan name.
5. Enter the plan code details.

14.17. STM74 - Restricted Clearing Types Maintenance

All types of clearing are maintained in the **Clearing Type Maintenance** (Fast Path: STM64) option. All of these clearing types may not be available at a particular end point. For instance High value clearings are available only in metros, in such a case many of the clearing types maintained can create unnecessary confusion in the branches other than metros. Using this option you can restrict the availability of the clearing type for the originating branch.

For Example: Using this option the bank can add the Regular and Inward Returns or High Value Clearing types as restricted clearing type for Branch A. If Customer X deposits a high value cheque in this branch, it will not be processed as this clearing type for the branch is restricted.

Definition Prerequisites

- [STM64 - Clearing Type Maintenance](#)

Modes Available

Add, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#) .

To add restricted clearing types

1. Type the fast path **STM74** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Restricted Clearing Types Maintenance**.
2. The system displays the **Restricted Clearing Types Maintenance** screen.

15. Payments

15.1. PM008 - Network Master

Using this option, the attributes of a network are maintained .A network will represent a logical end-point for payment transactions. It will also be associated with a network adapter.The GLs corresponding to the defined network and the maximum batch size allowed through a network will also be defined here.

If the network entries are required to be passed in a specified branch then it should be maintained for each network type as the designated branch.

Definition Prerequisites

- [BAM14 - Rewards and Service Charges definition](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the network master

1. Type the fast path **PM008** and click **Go** or navigate through the menus to **Global Definitions > Payments > Network Master**.
2. The system displays the **Network Master** screen.

Field Description

Field Name	Description
Network Id	[Mandatory, Numeric, 16] Type the Id of the network. This Id is assigned by the user and must be unique across all networks defined in the system.
Network Name	[Mandatory, Alphanumeric, 40] Type the name of the network ID selected in the corresponding field.
Network Description	[Mandatory, Alphanumeric, 240] Type the textual description of the network.
Network Type	[Mandatory, Drop-Down] Select the network type from the drop-down list. The options are:

- Others Network
- SWIFT Network

Network Adapter	[Mandatory, Pick List] Select the network adapter from the pick list. It is the ID of the adapter to which this network is linked, i.e., the physical channel to/from which payment messages will be sent/received.
Full Day - Window Period	
Start Time:(HH24:MM:SS)	[Optional, Numeric, Six, HH24:MM:SS] Type the time of the day when the network opens for transactions on a full day.
End Time:(HH24:MM:SS)	[Optional, Numeric, Six, HH24:MM:SS] Type the time of the day when the network closes for transactions on a full day.
Half Day - Window Period	
Start Time:(HH24:MM:SS)	[Optional, Numeric, Six, HH24:MM:SS] Type the time of the day when the network opens for transactions on a half day.
End Time:(HH24:MM:SS)	[Optional, Numeric, Six, HH24:MM:SS] Type the time of the day when the network closes for transactions on a half day.
Network Receivable GL	[Mandatory, Pick List] Select the network receivable GL from the pick list. This is the mirror account of the network. It is an Asset type of GL.
Network Payable GL	[Mandatory, Pick List] Select the network payable GL from the pick list. This is the mirror account of the network . It is a Liability type of GL.
Network Suspense GL	[Mandatory, Pick List] Select the network suspense GL from the pick list. It is an Asset/Liability type of GL.
Service Charge Package	[Optional, Pick List] Select the service charge package from the pick list. This is the list of all the service charges levied by the network.
Network Mask	This field is for future use.

Contracting Bank Account No.	[Optional, Alphanumeric, 50] Enter the contracting bank account number. It is the nostro account to which the network should be mapped.
Reference No Generator	[Mandatory, Drop-Down] Select the reference number from the drop-down list. It is a stored procedure on the basis of which the system generates reference numbers for that particular network transaction.
Maximum Batch Size	[Conditional, Numeric, 30] Type the maximum batch size for the network. This field is enabled only if SKN options are selected in the Network Type field.
Pass Network Branch	[Optional, Check Box] Select the Pass Network Branch check box to select designated branch in absence of centralization.
Designated Branch	[Conditional, Drop-Down] Select the designated branch from the drop-down list. This field is enabled only if the Pass Network Branch option is selected.

3. Click the **Add** button.
4. Enter the network Id and name.
5. Select the network adapter, network receivable, payable, and suspense GL from the pick list.
6. Enter the start time and end time depending on the processing requirement of the day.

15.3. PM007 - Payments Network Adapter

Using this option, a payments network adapter will be defined for a physical channel on which payment transactions can be sent or received. A network adapter could be associated to:

- A specific TCP/IP port on a specific server
- A specific queue on a specific server
- A specific file folder on a specific server

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add payment network adapter

1. Type the fast path **PM007** and click **Go** or navigate through the menus to **Global Definitions > Payments > Payments Network Adapter**.
2. The system displays the **Payments Network Adapter** screen.

Payments Network Adapter

Field Description

Field Name	Description
Adapter ID	[Mandatory, Alphanumeric, 10] Type the adapter ID of the network. The network adapter ID should be unique across all the network adapters defined in the system.
Adapter Name	[Optional, Alphanumeric, 100] Type the adapter name.
Description	[Optional, Alphanumeric, 300] Type a brief description of the adapter.
Communication Mode	[[Mandatory, Drop-Down] Select the communication mode from the drop-down list. It is the type of adapter or the communication mode of the adapter through which the adapter is interacting.

The options are:

- TCP/IP
- MQ
- DATA FILE

Adapter Direction

[Mandatory, Drop-Down]

Select the payment direction of the adapter from the drop-down list.

The options are:

- Incoming
- Outgoing

3. Click the **Add** button.
4. Enter the adapter Id and name.
5. Select the communication mode and the adapter direction from the drop-down list.

6. Enter the required information in the various tabs.

TCP/IP

The screenshot shows a software window titled "Payments Network Adapter" with a yellow header. The window contains several input fields and dropdown menus. At the top, there are fields for "Adapter ID:" (value: 25), "Adapter Name:" (value: TCP), "Description:" (value: TCP/IP), and "Communication Mode:" (value: TCP/IP). Below these are "Adapter Direction:" (value: Incoming) and a tabbed interface with "TCP/IP" selected. The "Incoming" section has "IP Address/Hostname:" (value: 10.32.65.76) and "Listen Port:" (value: 23). The "Outgoing" section has "IP Address/Hostname:" and "Despatch Port:" fields. At the bottom, there is a "Record Details" section with fields for "Input By", "Authorised By", "Last Mnt. Date", "Last Mnt. Action", and "Authorised". The "Authorised" field has a small square icon. The bottom of the window features a toolbar with buttons: Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, Ok, Close, and Clear.

Field Description

Field Name	Description
------------	-------------

This tab is enabled only if the **Communication Mode** is TCP/IP.

Incoming

IP Address/Hostname	[Conditional, Alphanumeric, 120] Type the IP address or the hostname of the system from where it is accessing the information. This field is enabled only if the Adapter Direction is selected as Incoming .
----------------------------	--

Listen Port	[Conditional, Numeric, 10] Type the port number from where the data is received. This field is enabled only if the Adapter Direction is selected as Incoming .
--------------------	--

Outgoing

IP [Conditional, Alphanumeric, 120]

Address/Hostname

Type the IP address or the hostname of the system to which the data or the information is sent.

This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.

Despatch Port [Conditional, Numeric, 10]

Type the port number from where the data is sent.

This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.

MQ

The screenshot shows the 'Payments Network Adapter' configuration window. At the top, there are fields for 'Adapter ID' (25), 'Adapter Name' (TCP), 'Description' (TCP/IP), 'Communication Mode' (MQ), and 'Adapter Direction' (Incoming). Below these are tabs for 'TCP/IP', 'MQ', and 'DATA FILE'. The 'MQ' tab is active, showing two sections: 'Incoming' and 'Outgoing'. The 'Incoming' section has fields for 'Queue Manager' (2), 'Channel' (4), 'Request Queue' (21), 'Response Queue' (22), 'Queue Manager IP Address/Hostname' (122.32.54.76), and 'Queue Manager Port' (85). The 'Outgoing' section has empty fields for the same parameters. At the bottom, there is a 'Record Details' section with fields for 'Input By', 'Authorised By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorised'. The 'Authorised' field has a checkbox. At the very bottom, there are buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', 'Inquiry', 'Ok', 'Close', and 'Clear'.

This field is enabled only if the **Adapter Direction** is selected as **Incoming**.
- Response Queue** [Conditional, Alphanumeric, 40]
Type the name for the response queue.
This field is enabled only if the **Adapter Direction** is selected as **Incoming**.
- Queue Manager IP Address/Hostname** [Conditional, Alphanumeric, 120]
Type the IP Address/Hostname of the system where MQ is installed.
This field is enabled only if the **Adapter Direction** is selected as **Incoming**.
- Queue Manager Port** [Conditional, Alphanumeric, 10]
Type the port number on which the MQ receives requests.
This field is enabled only if the **Adapter Direction** is selected as **Incoming**.

Outgoing

- Queue Manager** [Conditional, Alphanumeric, 40]
Type the name of the queue manager for the MQ channel.
This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.
- Channel** [Conditional, Alphanumeric, 22]
Type the channel ID.
This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.
- Request Queue** [Conditional, Alphanumeric, 40]
Type the name for the request queue.
This field is enabled only if the **Adapter Direction** is selected as

Outgoing.

Response Queue

[Conditional, Alphanumeric, 40]

Type the name for the response queue.

This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.

Queue Manager IP Address/Hostname

[Conditional, Alphanumeric, 120]

Type the IP Address/Hostname of the system where MQ is installed.

This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.

Queue Manager Port

[Conditional, Alphanumeric, 10]

Type the port number on which the MQ sends requests.

This field is enabled only if the **Adapter Direction** is selected as **Outgoing**.

7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorisation Pending..Click Ok to continue". Click the **Ok** button.
9. The payment network adapter is added successfully once the record is authorised.

15.4. PM003 - Network Selection Rules

Using this option you can maintain the network between source and the destination sectors. The minimum and maximum amount allowed through a network and cut off time will be defined here. All the permissible networks are maintained in the **Network Master** (Fast Path: PM008) option.

On the basis of file type, the network ID of the incoming network through which the file has come will be determined with the help of network message translator defined during day zero setup. With the file type and network ID pair, the incoming network is resolved. You can maintain the individual transaction level limits for the credits coming through each of the defined network to decide whether both the name and account number needs to be matched or only the account number should be matched before passing the credit to the account.

Definition Prerequisites

- [PM008 - Network master](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add network selection rules

1. Type the fast path **PM003** and click **Go** or navigate through the menus to **Global Definitions > Payments > Network Selection Rules**.
2. The system displays the **Network Selection Rules** screen.

Field Description

Field Name	Description
------------	-------------

Network Selection ID	[Mandatory, Alphanumeric, 30] Type the Id of the network. This Id is assigned by the user. This Id must be unique across all the networks defined in the system.
-----------------------------	--

Network ID	[Mandatory, Pick List] Select the ID of the network which is assigned by the user from the pick list. This id is unique across all the networks defined in the system. It is used to determine the type of network from where the transaction originates.
-------------------	---

Payment Type	[Mandatory, Drop-Down] Select the payment type from the drop-down list.
---------------------	--

Payment Transaction Code	[Mandatory, Pick List] Select the code of the payment transaction from the pick list.
---------------------------------	--

Bank Name	[Mandatory, Pick List] Select the name of the bank from the pick list.
Branch Name	[Mandatory, Pick List] Select the name of the branch from the pick list.
Clearing Type	[Mandatory, Drop-Down] Select the clearing type offered by the network from the drop-down list.
Remit Ccy	[Mandatory, Drop-Down] Select the type of currency to be remitted from the drop-down list.
Time	
Start Time	[Mandatory, Numeric, HH:MM:SS] Type the time of the day when the network is opened for transactions.
End Time	[Mandatory, Numeric, HH:MM:SS] Type the time of the day when the network is closed for transactions.
Source	
From Zone ID	[Mandatory, Pick List] Select the source zone id from the pick list. It is the unique identification of the source zone to which the circle belongs.
From Circle ID	[Mandatory, Pick List] Select the unique Id of the source circle from the pick list. The circle ID must be unique amongst all the ID's defined in the system.
Destination	
To Zone ID	[Conditional, Pick List] Select the destination zone id from the pick list. It is the unique identification of the destination zone to which the circle belongs.
To Circle ID	[Conditional, Pick List] Select the unique Id of the destination circle from the pick list. The circle ID must be unique amongst all the ID's defined in the system.
Amount	
Minimum Amount	[Optional, Numeric, 13, Two] Type the minimum amount for which the network configuration can be selected.
Maximum Amount	[Mandatory, Numeric, 13, Two] Type the maximum amount for which the network configuration can be selected.

Limit Amount for Name Validation

[Conditional, Numeric, 13, Two]

Type the limit amount for name validation.

The user can define the transaction limit for the specific payment type - source combination, above which the name and account number both will be checked for an incoming payment credit.

If a perfect match of name is not found, a predefined name matching logic like the following ones will be applied :

- Ignore the salutation like PROF, DR, Dr, Mr., Mrs., Miss, etc.
- Ignore all special character such as, - /. space, etc.

If the name does not match even after this, **FLEXCUBE** will send the transaction to the repair queue. This limit amount will always be in terms of LCY. So for any incoming payments the amount will be converted to LCY at the file level itself, using the standard rates (including the spread) and accordingly the amount will be checked with the limit.

The beneficiary name will not be matched with the account name if the transaction amount is below this limit before posting the credit to the account. But checking the account number and other account level validations will be performed.

This field is enabled only if the **Incoming Payment** option is selected in the **Payment Type** field.

3. Click the **Add** button.
4. Enter the network selection Id and press the <**Tab**> key.
5. Select the network Id, payment type and payment transaction code.
6. Enter the other network configuration details.

15.5. PM029 - Float Configuration

Using this option you can determine the time taken for the counterparty to receive the funds for an outgoing payment.

In case of an incoming payment, it determines the time required for the customer account to be credited. It can also be used to define floats for a specific payment type of network combination between two sectors.

Definition Prerequisites

- [PM004 - Bank Branch Directory](#)
- [PM008 - Network Master](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add float configuration details

1. Type the fast path **PM029** and click **Go** or navigate through the menus to **Global Definitions > Payments > Float Configuration**.
2. The system displays the **Float Configuration** screen.

Float Configuration

Field Description

Field Name	Description
Float ID	[Mandatory, Alphanumeric, 16] Type the Id of the float network. This Id is assigned by the user. This Id must be unique across all the networks defined in the system.
Float Config Name	[Mandatory, Alphanumeric, 40] Type the description of the float ID which is selected by the user in the Float ID field.
Payment Type	[Mandatory, Drop-Down] Select the type of payment from the drop-down list.
Payment Transaction Code	[Mandatory, Pick List] Select the code of the payment transaction from the pick list. It is the sub-category of a payment type. Only the transactions related to or mapped to the payment type selected will be displayed.

Network ID	[Mandatory, Pick List] Select the ID of the network through which the payment transaction is initiated from the pick list.
Bank Name	[Mandatory, Pick List] Select the name of the bank participating in the network from the pick list. The bank name is maintained in the Bank Branch Directory (Fast Path: PM004) option.
Branch Name	[Mandatory, Pick List] Select the name of the branch participating in the network from the pick list. The branches pertaining to the bank name selected will be displayed. The bank name is maintained in the Bank Branch Directory (Fast Path: PM004) option.
Clearing Type	[Mandatory, Drop-Down] Select the appropriate clearing type offered by the network from the drop-down list.
Remit Ccy	[Mandatory, Drop-Down] Select the type of currency in which the payment transaction will take place from the drop-down list.
Float Days	
Counterparty	[Mandatory, Numeric, Three] Type the time it would take for the counterparty to receive the funds through the payment transaction.
Network	[Mandatory, Numeric, Three] Type the number of working days that the selected network takes. The message is dispatched on the network to make the funds available to the counterparty's bank, in case of an outgoing payment.
Customer	[Mandatory, Numeric, Three] Type the number of days that a bank takes to make funds available to its customer. It is used to calculate the customer credit date.
Source	
From Zone ID	[Mandatory, Pick List] Select the unique Id of the source zone to which the circle belongs from the pick list. A zone is used to segregate a payment area geographically. A group of circles can form a zone.
From Circle ID	[Optional, Pick List]

Select the unique Id of the source circle from the pick list.

The circles report to a zone ID.

The circle ID must be unique amongst all the ID's defined in the system.

Destination

To Zone ID

[Mandatory, Pick List]

Select the unique Id of the destination zone to which the circle belongs from the pick list.

Field Description

Field Name	Description
IFSC Code	<p>[Mandatory, Alphanumeric, 11]</p> <p>Type the the bank branch's IFSC code. It is a unique code used for NEFT and RTGS transactions.</p> <p>The code consists of 11 Characters:</p> <ul style="list-style-type: none"> • First 4 digits represent the entity i.e bank • Fifth digit is defaulted to '0' (Zero) for future use • Last 6 digits represent the branch identity
Bank Code	<p>[Mandatory, Alphanumeric, Four]</p> <p>Type the bank code of the bank branch for which the IFSC code is being maintained.</p>
Bank Name	<p>[Mandatory, Alphanumeric, 150]</p> <p>Type the name of the bank.</p>

Branch Name	[Mandatory, Alphanumeric, 150] Type the name of the branch.
Branch Address	[Mandatory, Alphanumeric, 150] Type the address of the branch. You can enter the address in four lines.
City	[Mandatory, Alphanumeric, 150] Type the name of the city in which the branch is located.
State	[Mandatory, Alphanumeric, 150] Type the name of the state in which the branch is located.
Country	[Mandatory, Pick List] Select the name of the country in which the bank is located from the pick list.
Zip Code	[Mandatory, Alphanumeric, 10] Type the zip code of the branch.
Phone No.	[Mandatory, Numeric, 45] Type the phone number of the branch.
Internal Clearing	[Optional, Check Box] Select the Internal Clearing check box if the clearing is an Internal Clearing. If the bank-branch is marked for internal clearing, then transactions are settled against the Nostro account maintained against this bank-branch and need not be sent to the network.
Agent Code	[Mandatory, Numeric, 30] Type the agent code. This is the correspondent bank code. This is applicable only if there is no common network between our bank and branch code. An independent entry for this (correspondent) bank-branch is expected to be present in the Bank/branch directory.
Date of Inception	[Mandatory, Pick List, dd/mm/yyyy] Select the date when the bank branch becomes operative from the pick list.
BI Code	[Optional, Numeric, Four] Type the BI code corresponding to the bank code. This is the Bank Indonesia (central bank) office code specific to the bank code.
Zone Id	[Optional, Pick List] Select the ID of the zone under which the bank is defined from the pick list.

Circle Id	[Mandatory, Pick List] Select the ID of the Circle within the Zone ID, under which the bank is defined, from the pick list.
Nostro Account	[Conditional, Numeric, 10] Type the nostro account number. This field is enabled only if the Internal Clearing check box is selected.
Network Details	
Network	[Mandatory, Pick List] Select the network ID in which the bank branch participates from the pick list.
Direct/Indirect	[Mandatory, Drop-down] Select whether the bank is direct or indirect participant from the drop-down list. The options are: <ul style="list-style-type: none"> • Direct • Indirect
Direct Addressable	[Toggle] This field indicates whether the bank branch is directly addressable bank branch. If the value is Y it indicates that the bank is directly addressable.
Direct Participant Bank	[Optional, Pick List] Select the name of the bank which is a direct participant in the network from the pick list.
Direct Participant Branch	[Optional, Pick List] Select the name of the branch which is a direct participant in the network from the pick list.
Clearing Code	[Optional, Alphanumeric, 150] Type the clearing code. It allows the user to select the type of clearing.
Address Code	[Optional, Alphanumeric, 32] Type the address code of the direct participant in the network.
IBAN Mandatory	[Toggle] If the value is Y it indicates that the IBAN ⁹ is mandatory.

3. Click the **Add** button.

⁹(International Bank Account Number: It is a unique account number that is used to identify a customer's account in a financial institution internationally.)

4. Enter the IFSC code and press the <Tab> key.
5. Enter the bank name, branch name, address of bank.
6. Click the + button and add the network details.

15.8. PM002 - Payments Transaction Definition

A payment transaction represents a unique combination of a payment type and the service that it provides to the initiator of the transaction. It uniquely describes a payment message. For example, a customer requesting transfer of funds to a customer in another bank, a Utility Company requesting collection of bill payments from accounts of its subscribers in another bank.

Using this option you can define the various payment transactions. The hold debit behavior can also be defined in this screen. Example: If you select the payment type as **SWIFT Outgoing Payment**, the SWIFT messages will be processed in FCR and sent through FCC.

Definition Prerequisites

Field Description

Field Name	Description
Intermediary GL Account No	[Mandatory, Pick List] Select the intermediary GL account, to which the funds for a payment transaction can be credited or debited, from the pick list. It is a liability type GL and also used as the ISB GL.
DD Agreement Mandatory	[Optional, Check Box] Select the DD Agreement Mandatory check box to make the existence of a DD agreement for the customer and account as mandatory when an outgoing or incoming DD is processed.
SC Mnemonic Linkage	[Optional, Drop-Down] Select the SC code attached to the payment transaction from the drop-down list. It should be ensured that the mnemonics used for the various payment transactions are not used by any of the modules.
Expiry Days Request	[Conditional, Numeric, Five]

	Type the expiry days request in number of days. This field is enabled only if Outgoing Request For Debit (ORFD) option is selected in the Payment Type field.
Expiry Days Response	[Conditional, Numeric, Five] Type the expiry days response in number of days. This field is enabled only if ODD option is selected in the Payment Type field.
Comments	[Optional, Alphanumeric, 200] Type the brief description of the payment transaction.
Pass Contingent Entries	[Optional, Check Box] Select the Pass Contingent Entries check box to enable the system to pass contingent entries.
Charge Bearer	[Conditional, Drop-Down] Select the party to be charged for a particular payment from the drop-down list. This field is enabled only if the SWIFT transactions are selected in the Payment Type field. The options are: <ul style="list-style-type: none"> • BEN • SHA • OURS The SC code can be appropriately defined for such payment types for the FLEXCUBE Retail to charge the relevant SC.
Suspense GL Account No	[Optional, Pick List] Select the suspense GL account number from the pick list.
Back Dating	
Allowed	[Optional, Check Box] Select the Allowed check box to allow configuration of a back date at the payment transaction level.
Maximum Back Days	[Conditional, Numeric, Five] Type the maximum number of days to which back dating is allowed. This field is enabled only if the Allowed check box is selected.
Future Dating	
Allowed	[Optional, Check Box] Select the Allowed check box to allow configuration of a future date at the payment transaction level.
Maximum Future Days	[Conditional, Numeric, Five] Type the maximum number of days to which transaction can be value

dated in future.

This field is enabled only if the **Allowed** check box is selected.

Hold Debit Behaviour

Place Hold

[Optional, Check Box]

Select the **Place Hold** check box to indicate whether a hold is required to be placed on the customer account prior to the debit.

Hold Basis

[Conditional, Drop-Down]

Select the basis on which the hold will be placed on the customer account after the payment transaction from the drop-down list.

The options are:

- By Activation Date
- On Dispatch Date
- By Instruction Date

This field is enabled if the **Place Hold** check box is selected.

Hold Offset Days

[Conditional, Numeric, Five]

Type the number of days for which the hold will be placed on the customer account after the payment transaction.

This field is enabled if the **Place Hold** check box is selected.

Unclear-Credit Behaviour

Affect Unclear Balance

[Optional, Check Box]

Select the **Affect Unclear Balance** check box to indicate whether the unclear balance has to be marked on the customer account prior to the credit.

Unclear Balance Basis

[Conditional, Drop-Down]

Select the basis on which the unclear balance will be placed on the customer account after the payment transaction from the drop-down list.

This field is enabled only if the **Affect Unclear Balance** check box is selected.

Unclear Balance Offset Days

[Conditional, Numeric, Five]

Type the number of offset days for which the unclear balance will be placed on the customer account after the payment transaction.

This field is enabled only if the **Affect Unclear Balance** check box is selected.

Float Calculation Basis

[Conditional, Drop-Down]

Select the basis on which float will be calculated from the drop-down list.

The options are:

- By Activation Date

- By Counter party Value Date

This field is enabled only if the **Affect Unclear Balance** check box is selected.

Dispatch Behaviour

Dispatch Basis

[Optional, Drop-Down]

Select the basis on which the dispatch date is calculated from the drop-down list.

The options are:

- Activation Date
- Customer Value Date

Dispatch Offset Days

[Optional, Numeric, Five]

Type the number of days by which the dispatch date can be offset.

The values can be positive or negative.

Reject Transaction Code

Reject Txn Code

[Optional, Pick List]

Select the reject transaction code from the pick list.

Contingent Parameters

This tab is enabled only if the **Pass Contingent Entries** check box is selected in the **Main** tab screen.

15.13. PM020 - Mandate Definition

Using this option you can maintain the details of the mandates. The bank needs to obtain mandate from the customer, to initiate the payment transactions at pre-determined future time or frequency or for such future transactions for which customer is willing to give one-time acceptance in advance.

Definition Prerequisites

- [PM019 - Counterparty Master Maintenance](#)
- [PM004 - Bank Branch directory](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add mandate definition

1. Type the fast path **PM020** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Payment Transactions > Mandate Definition**.
2. The system displays the **Mandate Definition** screen.

Mandate Definition

Field Description

Field Name

Description

Search By

[Mandatory, Drop-Down]

Select the criteria to search for the customer from the drop-down list.

The options are:

- Customer short name
- Customer IC - Identification criteria (IC) input during customer addition.
- Customer ID- Unique identification no for every customer given by the bank.

Search String

[Mandatory, Alphanumeric, 20]

Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

If the search criterion is specified as customers' short name or IC then any of the letter(s) of the name can be entered. If the search criterion is

specified as customers' ID then customer ID can be entered.

The system displays the pick list of all those customers matching this criteria. The user may choose the appropriate customer from the existing customer list.

Customer IC	[Display] This field displays the identification code of the customer. The identification code of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.
Customer ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This is unique to a customer across the system and is used for searching and tracking the customer in the system.
Short Name	[Display] This field displays the short name of the customer. The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.

3. **Click the Add button.**
4. **Select the Search By criteria from the drop-down list.**
5. **Enter the search criteria and press the <Tab> key.**
6. **Select the appropriate customer from the displayed list.**

Field Description

Field Name	Description
Agreement ID	[Optional, Pick List] Select the agreement id from the drop-down list. The agreement ID is the unique identification number for a mandate received from the customer.
Start Date	[Mandatory, Pick List, dd/mm/yyyy] Select the date from which the mandate is executed from the pick list. The agreement start date can be current or future date, but it cannot be a past date. The user cannot modify the start date after it is entered.
End Date	[Mandatory, Pick List, dd/mm/yyyy] Select the end date of the mandate execution from the pick list. The agreement end date can only be a future date. The user can modify the end date.

Payment Transaction Code	[Mandatory, Pick List] Select the payment transaction code from the pick list.
Debit/Credit Flag	[Mandatory, Drop-Down] Select the type of flag from the drop-down list. The options are: <ul style="list-style-type: none"> • Credit • Debit
Customer Details	
Account No	[Mandatory, Pick List] Select the account number, which will be affected by the mandate, from the pick list.
Name	[Display] This field displays the name of the customer.
Counter Party Details	
Linked Entity	[Optional, Drop-Down] Select the type of external entity affected by the mandate from the drop-down list. The options are: <ul style="list-style-type: none"> • Counter Party • Others <p>If the Counter Party option is selected in this field, the details for counter party needs to be maintained in the Counterparty Master Maintenance (Fast Path: PM019) option.</p>
Entity ID	[Conditional, Pick List] Select the entity id from the pick list. This field is enabled if the Counter Party option is selected in the Linked Entity field.
CounterParty Name	[Mandatory, Alphanumeric, 120] Type the name of the counterparty. The name of counterparty is populated by the system if the Linked Entity is selected as Counter Party , if the Linked Entity is selected as Others , then the user has to enter the counter party name.
CounterParty Account No	[Mandatory, Alphanumeric, 36] Type the account number of the linked entity. The account number is populated by the system if the Linked Entity is selected as Counter Party , if the Linked Entity is selected as Others then the user has to enter the account number.
Creditor ID	[Mandatory, Alphanumeric, 55]

Type the creditor ID involved in loan related transaction.
This field is used for sending or receiving messages.

Counter Party Sr No

[Display]

This field displays the serial number of the mandate attached to a customer.

Institution ID

[Mandatory, Pick List]

Select the ID of the bank/branch in which the account of the linked entity is maintained from the pick list.

The institution ID is populated by the system if the Linked Entity is selected as **Counter Party**, if the Linked Entity is selected as **Others** then the user has to enter the institution ID.

Bank Name

[Display]

This field displays the name of the bank in which counterparty account is maintained.

This field is linked with the Institution ID field.

Address

[Mandatory, Alphanumeric, 155]

Type the address of the linked entity.

The address is populated by the system if the Linked Entity is selected as **Counter Party**, if the Linked Entity is selected as **Others** then the user has to enter the address.

Branch Name

[Display]

This field displays the name of the branch of bank in which counterparty account is maintained.

This field is linked with the Institution ID field.

City

[Optional, Alphanumeric, 50]

Type the name of the city of the linked entity.

The name of the city is populated by the system if the Linked Entity is selected as **Counter Party**, if the Linked Entity is selected as **Others** then the user has to enter the name of the city.

Zip

[Optional, Numeric, 10]

Type the zip code of the city of the linked entity.

The zip code of the city is populated by the system if the Linked Entity is selected as **Counter Party**, if the Linked Entity is selected as **Others** then the user has to enter the zip code of the city.

State

[Optional, Alphanumeric, 120]

Type the name of the state in which city of the linked entity lies.

The name of the state is populated by the system if the Linked Entity is selected as **Counter Party**, if the Linked Entity is selected as **Others** then the user has to enter the name of the state.

Country

[Optional, Drop-Down]

Select the name of the country in which state of the linked entity lies

from the drop-down list.

The name of the country is populated by the system if the Linked Entity is selected as **Counter Party**, if the Linked Entity is selected as **Others** then the user has to enter the name of the country.

Per Transaction Limit

[Optional, Numeric, 12]

Type the limit up to which customer has authorised bank to perform transaction under mandate.

The system will reject any transaction above that limit.

Frequency

[Optional, Drop-Down]

Select the frequency in which the mandate is performed from the drop-down list.

The options are:

- One Time - Only one transaction will be performed under the mandate
- Recurring - Multiple transactions will be performed under the mandate

Status

Mandate Status

[Display]

This field displays the mandate status.

Last Action

[Display]

This field displays the mandate last action.

Mandate Auth Status

- O - Others

If linked entity type is counter party, details for counterparty need to be maintained in the **Counterparty Master Maintenance** (Fast Path: PM019) option.

Entity ID	[Display] This column displays the counterparty ID, if Counter Party option is selected for linked entity in the Mandate Details tab. This is disabled for other type of linked entities in the Mandate Details tab.
Beneficiary Name	[Display] This column displays the name of the beneficiary.
Beneficiary Account No	[Display] This column displays the account number of the linked entity.
Agreement Start Date	[Display] This column displays the agreement start date from which the mandate is executed.
Agreement End Date	[Display] This column displays the agreement end date which is the end date for a mandate execution.

7. Click the **Close** button.

15.14. PMM01 - Payment Site Reject Code Xref

Using this option you can maintain all the reject reasons. An internal reject reason code is assigned to each rejected payment by **FLEXCUBE**.

The cross-reference between the reject reason codes assigned by the payments clearing house / central bank and the **FLEXCUBE** reject codes is maintained using this option. You can map the internal reject codes with the one provided on-site.

15.15. PM038 - Payment Window Period Modification

Interbank settlements and outgoing payment transactions can be executed within the defined time frame. Using this option you can define the timeline for initiating and authorizing the outgoing payment transaction. The transaction will not be successful, if the record is not authorized within the maintained timeline. This maintenance is applicable only for the current process date.

15.16. PM039 - Payment Transaction Attributes

The outward payment transaction can be initiated within a set time frame. The success of the outgoing payment transaction depends on several external factors like, settlement conducting entity, the payment network etc. Using this option you can maintain the various attributes for an outgoing payment transaction like, authorization level, limit amount for the transaction etc.

The window time maintenance is not applicable for an inward payment transaction, as only messages with respect to discrepant incoming payments are received. These transactions can be honored by checking the received messages.

16. Inventory Definitions

Once the types of inventory item is defined, the bank has to maintain the stock record of each inventory to initiate the tracking system. Each stock in the inventory list has to be given a unique code, which can be used to identify the stock with the issuer, currency and inventory type. Printed inventories are procured from external agencies that are appointed by the bank, for which the bank needs to maintain the identification of the suppliers.

The key features of the inventory module definitions in **FLEXCUBE Retail** are as follows:

- To initiate the inventory tracking system, a unique identity is given to each inventory.
- The bank or branch can identify and maintain its approved list of suppliers.
- A particular branch can be designated to operate as the inventory controller for any other branch or group of branches.

16.1. IVM01 - Stock Codes

After defining the inventory items, a Stock Code is assigned to each inventory item. The stock code is a manually generated unique combination of the inventory type, currency code, and issuer code which a bank/branch assigns to each inventory item.

Using this option you can assign stock code to inventory items which is the basic step required for initiating the inventory tracking system in **Oracle FLEXCUBE**.

Field Description

Field Name

Description

Stock Code

[Mandatory, Alphanumeric, 10]

Type the stock code.

Stock code is a manually generated unique number, which enables the bank to track the inventory.

A stock code has to be unique in the system and will always be linked to an issuer code and currency code. User can have as many stock codes as required for maintaining the inventories. Each stock code is linked to the specific stock type.

Stock Type

[Mandatory, Drop-Down]

Select the stock type from the drop-down list.

The drop-down lists all the inventory items which are pre-defined in **FLEXCUBE**.

Stock types are factory shipped definition having some peculiar attributes and lifecycles. All the stock codes under the particular stock

type will have same lifecycle events though the stock codes are different.

Currency Code

[Mandatory, Drop-Down]

Select the currency code for the inventory from the drop-down list.

The various currencies of the bank are defined using the **Currency Codes Maintenance** (Fast Path: BAM56) option or in **FLEXCUBE Corporate** depending upon the implementation.

Issuer Code

[Mandatory, Drop-Down]

Select the issuer code, on which a bank can draw a particular instrument, from the drop-down list.

A stock code will always be linked to an issuer code and currency code.

Issuer codes are defined using the **Issuer Maintenance** (Fast Path: BAM09) option. For stocks of the same bank (like DD), the issuer code has to be that of the bank itself. For non-financial stocks (like account opening forms), currency code can be left blank.

Stock Short Name

[Mandatory, Alphanumeric, 20]

Type the short name for the inventory.

Stock Desc.

[Mandatory, Alphanumeric, 40]

Type the description for the stock.

This information is for reference purposes.

Stock Lot Of

[Mandatory, Drop-Down]

Select the combination of the stock lot from the drop-down list.

The tracking will be done for every stock code at the specified unit level.

The options are:

- Leaves
- Booklet

If a booklet type of stock has to be tracked to the leaf level then the stock has to be specified as **Leaves**.

For example, cheque books fall under the **Leaves** type. So the stock type should be specified as **Leaves**. Whereas stock type for stocks like Passbooks can be specified as Booklet as their tracking will not be done at the leaf (page) level.

The units can be further categorized as follows:

- Standard
- Special
- Others

The above categorization is used for extraction of cheque book data for cheque book printing. This classification is made use of in the **Cheque Book Issue Maintenance** (Fast Path: CHM37) option.

Tracking Level	<p>[Mandatory, Drop-Down]</p> <p>Select the level at which the stock will be tracked from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • User • Branch • Bank • None <p>The tracking level can be assigned to a stock depending on the inventory type and its usage.</p> <p>Certain stocks do not require tracking. The tracking level for such stocks can be specified as None.</p> <p>For Example, if a particular stock is tracked at the branch level, then the next available unused instrument number for any user will be picked up from the list of unused instruments available at the branch level. If the tracking is at the user level, then the next available unused instrument number for a user will be picked up from the list of unused instruments available with that user.</p>
Auto Serial No	<p>[Optional, Check Box]</p> <p>Select the Auto Serial No check box to set the Auto Serial Number flag.</p> <p>The start serial number for a new request is automatically generated (at the time of placing an order) by incrementing the maximum serial number of the currently available stocks, depending upon the tracking level of the stock.</p>
Denm. Tracking	<p>[Optional, Check Box]</p> <p>Select the Denm. Tracking check box to enable the Denomination Details tab.</p> <p>The denomination details tab enables you to keep a denomination wise track of the stock levels for certain inventory.</p> <p>The maximum different denominations that can be specified for each individual stock code is 20.</p>
Excess Level	<p>[Conditional, Numeric, 10]</p> <p>Type the excess level for the inventory.</p> <p>Excess level is the maximum quantity of an inventory that can be physically maintained at the tracking level.</p> <p>If the inventory crosses this limit, the Excess Stock report can be generated.</p> <p>This field is disabled if the Denm Tracking check box is selected.</p>
Re-order Level	<p>[Conditional, Numeric, 10]</p> <p>Type the re-order level of inventory.</p> <p>This is the limit after which the system automatically places a request for the stock. The request will automatically be placed for Min. order</p>

Level.

This field is disabled if the **Denm Tracking** check box is selected.

Min. Order Level

[Conditional, Numeric, 10]

Type the minimum order level of inventory.

This is the minimum number of inventory for which the request has to be placed.

This field is disabled if the **Denm Tracking** check box is selected.

Accounting Required

[Mandatory, Check Box]

Select the check box to maintain the accounting entries related to inventory.

GL Code

[Mandatory, Pick List]

Select the appropriate GL code from the pick list.

Length Of Inventory Number

[Mandatory, Numeric, Five]

Type the inventory number which defines the maximum length of the inventory. It cannot be more than 20.

If the value of this field is greater than 20 or equal to zero, the system will give an error message.

There are some inventory for which inventory number will be defined as alphanumeric whereas in FCR the inventory number will be stored as numeric value. The inventory number will either contain all numeric values (e.g. 10001 or 00001) or inventory number will be alphanumeric and always starting with alphabets (e.g. A0001 or A1001).

Column Name

Description

Denomination Details: This grid is enabled if the Denomination Tracking check box is selected.

Srl. No.

[Display]

This column displays the running serial number.

Denomination Value

[Mandatory, Numeric, 10]

Type the denomination value.

Description

[Mandatory, Alphanumeric, 20]

Type the description of the denomination.

Excess Level

[Mandatory, Numeric, 10]

Type the excess level for the inventory.

Excess level is the maximum quantity of an inventory that can be physically maintained at the tracking level.

If the inventory crosses this limit, the **Excess Stock** report can be generated.

Re-order Level

[Mandatory, Numeric, 10]

Type the re-order level of inventory.

This is the limit after which the system automatically places a request for the stock. The request will automatically be placed for **Min. order Level**.

Min. Order Level

[Mandatory, Numeric, 10]

Type the minimum order level of inventory.

This is the minimum number of inventory for which the request has to be placed.

3. Click the **Add** button.
4. Enter the stock code and press the <Tab> key.
5. Select the stock type, currency code and issuer code from the drop-down list.
6. Enter the stock short name, and description.
7. Select the stock lot of and the tracking level from the drop-down list.
8. Select the **Denm. Tracking** check box and enter the denomination details.
OR
Enter the excess level, reorder level and the minimum order level.
9. Select the **Accounting Required** check box and select the GL code from the pick list.

16.2. IVM02 - Supplier Codes

A supplier code is a manually generated unique code assigned to each supplier. Supplier code is maintained for the vendor which is an external agency appointed by the bank/branch, from whom the bank procures various printed inventory items. Inventory procurement is handled outside the OFCR, and supplier codes are not maintained in the OFCR. Inventory management till the inventory is issued/linked to MCA is handled by the external system.

The bank/branch can identify and maintain its approved suppliers list by assigning supplier codes.

Field Description

Field Name

Description

Supplier Code

[Mandatory, Alphanumeric, 10]

Type the supplier code.

The supplier code is a manually generated unique number. The specified code enables you to track the supplier.

Once added, this field cannot be modified or amended.

Supplier Short Name

[Mandatory, Alphanumeric, 20]

Type the short name for the supplier.

For example, SB_Sons for Smith Barney and Sons.

Supplier Name

[Mandatory, Alphanumeric, 100]

Type the full name of the supplier.

Supplier Address1

[Mandatory, Alphanumeric, 35]

Type the first line of the supplier address.

Supplier Address2	[Optional, Alphanumeric, 35] Type the second line of the supplier address.
Supplier Address3	[Optional, Alphanumeric, 35] Type the third line of the supplier address.
City	[Mandatory, Alphanumeric, 35] Type the name of the city, where the supplier has his office. This field is part of the supplier address.
State	[Mandatory, Alphanumeric, 35] Type the name of the state where the supplier has his office. This field is part of the supplier address.
Country	[Mandatory, Pick List] Select the name of the country, where the supplier has his office, from the pick list. This field is part of the supplier address.
Zip	[Mandatory, Alphanumeric, 15] Type the zip code. This field is part of the supplier address.
Registration Date	[Mandatory, Pick List, dd/mm/yyyy] Select the registration date of the supplier from the pick list.
Registration No	[Mandatory, Numeric, 15] Type the registration number of the supplier.
Telephone	[Optional, Alphanumeric, 15] Type the telephone number of the supplier.
Mobile	[Optional, Alphanumeric, 15] Type the mobile number of the supplier.
Fax	[Optional, Alphanumeric, 15] Type the fax number of the supplier.

16.3. IVM03 - Inventory Branch Cross Reference

Using this option you can enable / disable the inventory controller branch for request, order, issue and receipt of stocks on behalf of other inventory branches. A particular branch can be designated to operate as the inventory controller for any other branch or group of branches. Similarly, any other branch can control inventory for this particular branch.

Depending on a bank's operation policies, the workflow for each branch varies as follows:

- Some branches may place orders through central inventory.
- Some branches may place orders for certain inventory items themselves
- Some branches may act as inventory repository for other branches, and order and issue inventory to them.

Definition Prerequisites

- [BAM03 - Branch Master Maintenance](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add inventory branch cross reference details

1. Type the fast path **IVM03** and click **Go** or navigate through the menus to **Global Definitions > Inventory > Inventory Branch Cross Reference**.
2. The system displays the **Inventory Branch Cross Reference** screen.

Field Description

Field Name	Description
Inventory Branch	
Branch Code	[Mandatory, Pick List] Select the branch code from the pick list. Each code uniquely identifies a different branch. Branches are defined in FLEXCUBE using the Branch Master Maintenance (Fast Path: BAM03) option
Branch Name	[Display] This field displays the name of the branch.
Select All Branches	[Optional, Radio Button] Click the Select All Branches option to choose the inventory branch as the inventory controller or repository, for all the branches.
Allowed Branches	[Optional, Radio Button]

Click the **Allowed Branches** option to choose and create a list of bank/branches, for which the inventory branch can operate as an inventory controller.

Column Name	Description
Branch Name	[Mandatory, Drop-Down] Select the branch, for which the inventory branch should operate as an inventory controller, from the drop-down list.
Branch Code	[Display] This field displays the branch code of the branch selected in the Branch Name column. Every branch has a unique code. Branches in FLEXCUBE are defined using the Branch Master Maintenance (Fast Path: BAM03) option.
Allow Request	[Toggle] Click the toggle status, to change the value in the column to Y , to allow the inventory controller to place a request on behalf of the selected branch. By default, this column displays N .
Allow Order	[Toggle] Click the toggle status to change the value in the column to Y to allow the inventory controller to place a purchase order on behalf of the selected branch. By default, this column displays N .
Allow Issue	[Toggle] Click the toggle status to change the value in the column to Y to allow the inventory controller to act as a receiving branch and issue stock to the selected branch. By default, this column displays N .
Allow receive	[Toggle] Click the toggle status to change the value in the column to Y to allow the selected branch to receive stock from the supplier. By default, this column displays N .
Delete(y/n)	[Toggle] Click the toggle status to change the value in the column to Y to delete the branch from the list of branches for the inventory controller branch. By default, this column displays N .

3. Click the **Add** button.
4. Select the branch code from the pick list.
5. Click the **Select All Branches** to choose the inventory branch as the inventory controller or repository for all the branches.

OR

Click the **Allowed Branches** to choose and create a list of bank/branches for which the inventory can operate as an inventory controller.

6. Click the **+** button to add inventory branch cross references details.
7. Select the branch name from the drop-down list.
8. Click the toggle status in the appropriate fields to change the value.

17. Remittance Definition

Remittance is sending of money from one place to another. For this purpose various instruments commonly known as Bankers Cheque, Demand Drafts and Traveller's Cheque are used. A bank may have its presence locally or internationally in which case the issuer of the instruments for that sector will be the bank itself. In the absence of a presence for a particular sector the bank may have suitable correspondent banking arrangements with other bank/s. All the details of the banks own branches, including other banks can be maintained in **FLEXCUBE Retail** using the Bank Remittance Maintenance, Issuer Maintenance and Demand Draft details maintenance.

17.1. BAM09 - Issuer Maintenance

Using this option you can define issuer's of various instruments such as Traveler's Cheques, Demand Draft and Banker's Cheque for their respective currencies. You can create and maintain the Traveler's Cheques, Demand Draft and Banker's Cheque issue data.

Transactions for remittance instruments can be performed only for the issuers and the issuer currencies maintained for the particular instrument type. If the bank acts as an issuer, it should be maintained as an issuer, with its appropriate code.

17.3. BAM80 - Bank Remittance Maintenance

Banks may receive requests from their clients for remittance of funds to various places where it may not have its presence in all the sectors in a particular country or outside the country. In such conditions, the bank can appoint a correspondent bank where it has presence in that sector, and will act as an agent for remitting the money to the requested destination, on behalf of the bank, which appointed them.

Using this option **Oracle FLEXCUBE** allows you to maintain an agent's bank details for remittances.

Sector Code	<p>[Mandatory, Pick List]</p> <p>Select the sector code from the pick list.</p> <p>A sector is defined for the purpose of clearing instruments. A sector consists of a number of branches and end points.</p> <p>The sector code is added and maintained in the Sector Master (Fast Path: BAM41) option.</p> <p>A sector code is attached to each branch of the bank using the Branch Master Maintenance (Fast Path: BAM03) option.</p> <p>A sector code is attached to branches of other banks using the Routing Branch Maintenance (Fast Path: STM54) option.</p>
Bank Name	<p>[Mandatory, Drop-Down]</p> <p>Select the bank name from the drop-down list.</p> <p>The drop-down lists all the banks, which are added and authorised in the Bank Codes Maintenance (Fast Path: BAM20) option..</p>

Branch Code	[Mandatory, Numeric, Five] Type the branch code for which the agent is being set. The value in this field is not validated.
Agent's Nearest Branch	[Optional, Alphanumeric, 25] Type the full name of the agent's nearest branch.
Address City	[Optional, Alphanumeric, 35] Type the name of the city where the agent's branch is located. This is also a part of the agent's address.
Address Line 1	[Optional, Alphanumeric, 35] Type the first line of the address of the agent's branch.
Address Line 2	[Optional, Alphanumeric, 35] Type the second line of the address of the agent's branch.
Address Line 3	[Optional, Alphanumeric, 35] Type the third line of the address of the agent's branch.
Address State	[Optional, Alphanumeric, 35] Type the name of the state where the agent's branch is located.
Address Country	[Optional, Pick List] Select the name of the country, where the agent branch is located, from the pick list.
Address Zip Code	[Optional, Alphanumeric, 10] Type the zip code.

3. Click the **Add** button.
4. Select the sector code from the pick list and the name of the bank from the drop-down list.
5. Enter the branch code and the agent's nearest branch.
6. Enter the address.

18. Service Charge Definitions

Service charges are charges levied by banks for services rendered, or for collecting fees/stamp duty, etc., on behalf of the Government or other agencies. They represent the non-interest income of the banks and financial institutions. Service Charges can be defined, based on a number of factors like turnover, transaction amount, or for certain conditions over a period of time, or on certain number of transactions or a combination of some of these factors.

The key features of the Service Charge module in **FLEXCUBE Retail** is based on the following factors:

- Centralised Service Charge calculation and processing into a common module to be used as a service by all the processing modules.
- Support for Package definition. Charges to be linked to a package providing the flexibility to have multiple charges at the customer, account, product, maintenance and transaction levels.
- Provide flexibility to define preferential charges and parameters at the account level, in order to support Relationship Pricing for Retail Customers.
- Provide a completely flexible and parameterized solution for definition and calculation of various types of charges that the bank may want to define.
- Provide the required flexibility in dealing with charges that cannot be collected due to insufficient funds.
- Provide charging based on occurrences of predefined system events.
- Provide to apply Service Charge variances on holidays and time zones.
- Support to charging based on special formulae for charges, which do not fit into the standard framework.

- Provide aggregation facility for various criteria that lead to levy of charges based on balances, turnover, etc.
- Provide for comprehensive inquiry detailing the Service Charge history for an account.

18.1. BAM14 - Rewards and Service Charges definition

Using this option, you can define various service charges that may be levied, as per its operational policies, on the various services or transactions that the customers may perform.

Each of these service charges is distinctive, and calculated and charged differently for different transactions, at different time intervals, based on certain policies of the bank. You can also set up reward codes, which is the reverse of a charge and is actually a credit to the user. A unique service charge code may be assigned, for each service charge that is defined, so that its characteristics can be mapped to this code. These service charge codes can then be attached to transactions, events, products, etc.

Note: If the **End of Period + Track Online** option is selected from the **SC Charge Type** drop-down list, then the charges field in the transaction screen will display the SC amount as Zero. SC amount can change between the SC displayed at the time of transaction and SC getting charged at EOP(at the time of charging it will look at the SC amount at SC code).

Definition Prerequisites

- [GLM02 - Chart of Accounts](#)
- [RL002 - Rule Definition Master Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add service charge code

1. Type the fast path **BAM14** and click **Go** or navigate through the menus to **Global Definitions > Service Charge > Rewards and Service Charges definition**.
2. The system displays the **Rewards and Service Charges definition** screen.

Field Description

Field Name	Description
Service Charge Code	<p>[Mandatory, Numeric, Five]</p> <p>Type the service charge code.</p> <p>SC code is a unique number, to be manually generated by the bank.</p> <p>Once added, this field cannot be modified or amended.</p>
Currency	<p>[Mandatory, Drop-Down]</p> <p>Select the currency in which the service charge is levied from the drop-down list.</p> <p>The currency maintained using the Currency Definition (Fast Path: BAM25) option gets populated in the drop-down list.</p>
SC Name	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the service charge name.</p>
Amortisable	<p>[Optional, Check Box]</p> <p>Select the Amortisable check box if the defined fee / service charge is</p>

amortisable.

This check box defines the nature of fees but does not trigger amortisation of fees.

If this check box is selected, the **Amortisation Details** tab gets enabled.

Nature of Charge

[Optional, Drop-Down]

Select the nature of charge, i.e., the category of the service charge from the drop-down list.

The options are:

- Commission
- Fees
- Rewards
- Service Charge
- Taxes

Commission and Service Charge are income/profit made by a bank in return for the services offered by them.

Fees and Taxes are amount levied on public by the Government or other agencies.

The charge cannot be **Reward** if the **Amortisable** checkbox is selected.

SC Type

[Mandatory, Drop-Down]

Select the service charge type from the drop-down list.

The options are:

- Fixed - SC is charged as a fixed amount
- Percentage - A percentage of transaction amounts with a minimum and maximum amount to be charged is specified.
- Tiered - SC is tiered based on either transaction amount or number of transactions. Further more, each tier is defined to have a fixed rate or a percentage of amounts, with a minimum and maximum amount to be charged. The tiered type SC can be in the following 2 ways:

Incremental - In incremental calculation the transaction amount is broken down as per the range of amount mentioned in Tiers and Service Charge is levied for each part of the transaction amount. E.g. Consider a DD worth 15000. Assume that amount range for Tier 1 is 10000 and for Tier 2 it is 20000. Here the total transaction amount will be broken and for the first 10000 SC will be charged at the rate applicable to Tier 1 and for the remaining 5000 the SC will be charged as applicable to Tier 2.

Cumulative slab - In cumulative calculation it is identified in which Tier amount range does the entire transaction amount fits and the SC is levied accordingly. E.g. For a DD worth 15000 the SC will be levied at the rate defined for Tier with amount range say 20000.

NSF Treatment

[Conditional, Drop-Down]

Select the Non Sufficient Funds (NSF) treatment from the drop-down list.

If the **Amortisable** check box is selected, the **Force Debit** option will be selected by default in this field. If the **Amortisable** check box is not checked then all the existing options of the drop-down will be available for the user to select.

The option selected in this field will enable the calculation of the service charge in an NSF condition, wherein the balance in the account is in-sufficient to debit the service charge.

The options are:

- Part Debit/Part Hold – The CASA account is debited for the available funds. A Service Charge Income GL entry is passed for the recovered funds. A hold is marked on the account for the un-recovered amount. The hold amount is increased to the extent of the un-recovered amount.

All the accounts marked with the hold (Hold with earmark type as Service Charge) are checked during the beginning of day (BOD) process. If the funds are available, the CASA account is debited with the hold amount, the hold is deleted and a Service Charge Income GL entry is passed for the hold amount.

If the funds are not available at BOD, the account will be checked for hold till the funds are available or till the hold is manually deleted.

For example a fixed SC of 100 is charged for a transaction of 1000 and the NSF treatment is specified as Part Debit, Part Hold.

If the CASA account holder performs a debit transaction of 1000, a fixed SC of 100 is charged. His account balance is 1060. The account will be debited for 1060, where 60 is the part debit for the SC and a hold is placed on the account for the balance 40. During the next BOD the accounts marked with hold are checked. If the funds are available the hold is deleted and the account is debited for the hold amount. If the funds are not available the accounts will be subsequently checked for funds every time the BOD process is executed.

- Force Debit – The CASA account will be debited for the full amount and the balance in the account will be brought to negative.
For example, a fixed SC of 100 is charged for a transaction of 1000 and the NSF treatment is specified as Force Debit. If the CASA account holder performs a debit transaction of 1000, a fixed SC of 100 is charged. His account balance is 1060. The system will charge the account with 100 for service charge. The account balance will be brought down to -40
- Part Debit/Part Hold
- Hold – A hold is placed on the CASA account for the full amount of the service charge. All the accounts marked with the hold (Hold with earmark type as Service Charge) are checked during the beginning of day (BOD) process. If the funds are available, the CASA account is debited with the hold amount, the hold is deleted and a Service Charge Income GL entry is passed for the hold amount.

If the funds are not available at BOD, the account will be checked for hold till the funds are available or till the hold is manually deleted.

For example, a fixed SC of 100 is charged for a transaction of 1000 and the NSF treatment is specified as Full Hold. The CASA account holder performs a debit transaction of 1000 and a fixed SC of 100 is charged. His account balance is 1060. The system places a hold of 100 on the account. During the next BOD the accounts marked with hold are checked. If the funds are available the hold is deleted and the account is debited for the hold amount. If the funds are not available the accounts will be subsequently checked for funds every time the BOD process is executed.

- Part Debit/Part Waive - The CASA provider account will be debited with the available balance and the recoverable amount will be waived. For example, a fixed SC of 100 is charged for a transaction of 1000 and the NSF treatment is specified as Part Debit Part Waive. The CASA account holder performs a debit transaction of 1000 and a fixed SC of 100 is charged. His account balance is 1060. The system will debit the account with 60 for service charge and waive the recoverable amount of 40.
- Reject Transaction - The system will not allow the actual transaction to take place if there are insufficient funds in the account to levy the service charge. For example, a fixed SC of 100 is charged for a transaction of 1000 and the NSF treatment is specified as Reject Transaction. The CASA account holder performs a debit transaction of 1000 and a fixed SC of 100 is charged. His account balance is 1060. The system will reject the transaction as there are insufficient funds in the account to levy the service charge.
- Waive SC – The system will waive the service charge if there are insufficient funds in the account to levy the service charge. For example, a fixed SC of 100 is charged for a transaction of 1000 and the NSF treatment is specified as Waive SC. The CASA account holder performs a debit transaction of 1000 and a fixed SC of 100 is charged. His account balance is 1060. The system will waive the service charge as there are insufficient funds in the account to levy the service charge.

This field will be disabled if **Rewards** option is selected in the **Nature of Charge** field.

SC GL Code

[Mandatory, Numeric, Nine]

Type the GL code for service charge, from the pre-defined GL codes.

When the account is debited for service charge a corresponding credit entry is passed in the SC GL code.

In case the nature of charge is Service charge or commission, the GL code will be an Income GL code. Else it will be a liability GL code.

In case the nature of charge is Rewards, the GL code will be an Expense type GL code.

SC Charge Type

[Mandatory, Drop-Down]

Select the SC charge type from the drop-down list.

The options are:

- End of Period + Track Online - SC will be tracked online, i.e., counters for the account will be updated online but, SC will be charged at the defined end of period, i.e., monthly, yearly, etc.
- Online - SC is calculated and debited online from the account. The system displays the value in the SC Linkage Type field as Others.
- End Of Day - SC will be calculated and the account will be debited only at the end of the day. The system displays the value in the SC Linkage Type field as Others.
- End of Period - SC will be calculated using the frequency and anniversary at the account level and debited at end of period. The system displays the value in the SC Linkage Type field as Periodic.
- End of Period + Earmark Online - SC will be calculated using the frequency and anniversary at account level and debited at end of period, but account will be earmarked or tagged, so that at the time of debit of account Non Sufficient Funds (NSF) situation is not encountered. The system displays the value in the **SC Linkage Type** field as **Others**.

Suspended GL Code

[Mandatory, Numeric, Nine]

Type the suspended GL code.

When the non-performing account is debited for service charge a corresponding credit entry is passed in the suspended SC GL code.

SC Linkage Type

[Display]

This field displays the SC Linkage type.

The value in this field depends on the option selected in the **SC Charge Type** field.The value will be displayed as **Others** if the following options are selected in the **SC Charge Type** field:

- Online
- End of Day
- End of Period + Earmark Online
- End of Period + Track Online

The value will be displayed as **Periodic** if the **End of Period** option is selected in the **SC Charge Type** field.**SC Calc Method**

[Conditional, Drop-Down]

Select the service charge rate from the drop-down list.

This field will be enabled only if the **Percent** option is selected in the **SC Type** field.

The options are:

- Net: If this option is selected, the calculation for SC amount will be $Txn \cdot (r/100)$
- Gross: If this option is selected, the calculation for SC amount will be $Txn \cdot 1/r \cdot \{1 + (r/100)\}$

Additional SC

[Optional, Drop-Down]

Select the additional service charge to be levied from the drop-down list.

If the Main SC is Amortisable, then selection of only such SC which are defined as Amortisable are allowed as Additional SC. If the Main SC is 'Not-Amortisable' then selection of any SC (amortisable / not-amortisable) will be allowed as 'Additional SC'.

An additional service charge or Value Added Tax (VAT) can be levied when a certain service charge is levied. The additional SC can be selected from the existing Service Charge (SC) Codes list. The Additional SC could be in the same currency as the defined Service Charge (SC) Code or in the local currency of the bank. If an additional SC is already attached to the selected additional service charge code, the system displays the message 'The SC selected has an additional SC attached. The calculation is not recursive'.

Additional SC will always be calculated as a fixed amount or percentage of main SC amount and will not be calculated based on the transaction amount.

If nature of the charge is reward then, this field will allow only Positive SC (Reward) to be attached. If nature of the charge is service charge, then this field will allow only service charge to be attached.

Cumulative Flag

[Optional, Drop-Down]

Select the cumulative flag from the drop-down list.

This flag will determine the way the additional SC will be added to the total sc applied.

The options are:

- Cumulative
- Non-Cumulative

Additional SC Behaviour

[Optional, Drop-Down]

Select the additional service charge behaviour from the drop-down list.

This field will determine the applicability of the additional charge.

The options are:

- Inclusive
- Exclusive

EOP Recompute

[Optional, Check Box]

Select the **EOP Recompute** check box to recompute the service charge at the end of period.

Min Balance Override Flag	<p>[Optional, Check Box]</p> <p>Select the Min Balance Override Flag check box to enable flexibility to override the minimum balance.</p> <p>If the option is selected, the system provides the flexibility to override the minimum balance limit which is defined for every account when service charge is levied in a NSF situation.</p> <p>In an NSF (Non Sufficient Fund) situation, there are insufficient funds in the account to levy the service charge. If this flag is checked, the minimum balance limit is not considered for levying the service charge.</p> <p>The transaction succeeds even if the available balance (excluding minimum balance) is insufficient to cover the debit amount (service charge).</p> <p>For example, the account holder performs a debit transaction of 1000 and a fixed SC of 100 is charged. His account balance is 2050 with a minimum balance limit of 1000. If the flag is selected, the system allows the transaction to succeed even if the minimum balance limit is violated.</p>
Override alert Flag	<p>[Optional, Check Box]</p> <p>Select the Override alert Flag check box to receive an alert when the account has insufficient funds.</p> <p>The alert message box enables the user to either proceed with the transaction or cancel it. If the user proceeds, the account balance will go below the minimum balance limit and Force Debit NSF treatment will be applied.</p> <p>The option is applicable for transactions like Cheque Book Issue and Stop Cheque.</p>
Rule ID	<p>[Optional, Pick List]</p> <p>Select the rule for levying the service charge from the pick list.</p> <p>You can define a bank specific rule for levying service charge. A rule ID can be created with a specific formula or special functions on which the service charge will be calculated and levied using the Rule Definition Maintenance option.</p>
Default SC in Offline Mode	<p>[Optional, Pick List]</p> <p>Select the default SC in offline mode.</p> <p>The online type SC is linked to an online type of transaction. If the transaction is performed while branch is in offline mode, the rule cannot be evaluated as host database is unavailable. In such cases, this SC (which will not be a rule based SC) will be charged by the system.</p>
Reward Amortisation Flag	<p>[Conditional, Check Box]</p> <p>Select the reward amortisation check box.</p> <p>This field is displayed only if the Rewards option is selected in the Nature of Charge field.</p>
Reward Amortisation GL Code	<p>[Conditional, Numeric, Nine]</p>

Type the general ledger code for reward amortisation.

This field is displayed only if the **Rewards** option is selected in the **Nature of Charge** field.

Book Income on Designated Branch

[Conditional, Check Box]

Select this check box to book income for the designated branch.

During EOD, service charges will be booked in the designated branch. If the designated branch is different from the account branch, inter-branch accounting entries will be passed.

This field is enabled if the **Commission** option is selected from the **Nature of Charge** drop-down list and if the **End of Period + Track Online, End of Period + Earmark Online** and **End of Period** options are selected from the **SC Charge Type** drop-down list.

Designated Branch

[Conditional, Numeric, Five]

Type the designated branch.

This field is enabled if the **Book Income On Designation Branch** check box is selected.

3. Click the **Add** button.
4. Enter the service charge code and select the currency from the drop-down list.
5. Enter the name and the GL code of the service charge and the suspended GL code.
6. Select the nature of charge, NSF treatment and additional service charge from the drop-down list.

Description

Waiver if Minimum Balance is Maintained

[Optional, Check Box]

Select the **Waiver if Minimum Balance is Maintained** check box to waive the service charge if the minimum balance of the account is maintained.

Waiver Minimum Balance Comparison Factor

[Conditional, Drop-Down]

Select the comparison factor to waive service charge, if minimum balance is maintained, from the drop-down list.

This field is enabled if the **Waiver if Minimum Balance is Maintained** check box is selected.

The options are:

- Current Balance – The system compares the available balance at the time of computation of SC with the minimum balance amount at the Service Charge level.
- Previous End of Day Balance – The system compares the previous day's EOD balance with the minimum balance amount

at the Service Charge level.

- * Avg Balance during the capitalization cycle
- *Min Balance during capitalization cycle
- * Max Balance during the Capitalization cycle
- Weighted Avg Bal during Capitalization cycle - On selection of this option, the weighted average of the daily balances are taken in to account .A weighted average take in to account the duration for which a balance has remained in account during the capitalization cycle.

*Balances are calculated from the End of Day balances

**Level at which
Balance is to be

Field Description

Field Name

Description

Free Transaction Treatment

[Mandatory, Drop-Down]

Select the free transaction treatment from the drop-down list.

The options are:

- None – Indicates that no free transactions are permitted.
- Count Based – Indicates that the free transactions allowed are count based. E.g. 4 cheque withdrawals are free in a month, for all additional withdrawals thereafter a SC of USD 2 per withdrawal will be charged.
- Amount based – Indicates that the free transactions allowed are amount based. E.g. ATM withdrawals up to USD 15,000 are free per month, for all additional withdrawals, a 1% of the excess amount will be charged.
- Count OR Amount Based– Indicates that the free transactions allowed are amount based or count based, i.e., there is an option between the number of free transactions or amount of free transaction. For example, 4 ATM withdrawals or withdrawal

up to USD 5,000 per month is free, a charge of USD 2 per additional withdrawal and a charge of 1% of the excess amount for additional withdrawals during the month.

- Count And Amount Based - Indicates that the free transactions allowed are amount based and count based, i.e., this is the combination of count and amount of free transactions allowed. For example, 4 ATM withdrawals and withdrawal up to USD 5,000 per month is free, a charge of USD 2 per additional withdrawal and a charge of 1% of the excess amount for additional withdrawals during the month.

Free Transaction Amount

[Conditional, Numeric, 13, Two]

Type the amount up to which the service charges will not be charged.

This field will be enabled if the following options are selected in the **Free Transaction Treatment** field.

- Amount Based
- Count or Amount
- Count And Amount

No. of Free Transactions

[Conditional, Numeric, Five]

Type the number of transactions up to which the service charges will not be charged.

This field will be enabled if the following options are selected in the **Free Transaction Treatment** field.

- Count Based
- Count or Amount
- Count And Amount

Field Description

Field Name

Description

Fixed Amount

[Conditional, Numeric, 13, Two]

Type the amount which will be charged as service charge for a transaction.

This field will be enabled if you select the **Fixed** option in the **SC Type** field.

The value in this field is defaulted as 0.00. If no amount is specified the system saves the fixed amount as 0. This field cannot be blank.

Transaction Percentage

[Conditional, Numeric, 13, Two]

Type the percentage of transaction amount which will be charged as service charge for a transaction.

This field will be enabled if you select the **Percentage** option in the **SC Type** field.

The value in this field is defaulted as 1. If no percentage is specified the system saves the transaction percentage as 1. This field cannot be blank.

Minimum Amount

[Conditional, Numeric, 13, Two]

Type the minimum amount which can be levied as service charge.

This field will be enabled if you select the **Percentage** option in the **SC Type** field.

If the calculated service charge is less than the specified minimum amount, the minimum amount is levied as the service charge.

For example, the service charge is calculated at 1% of the transaction amount and the minimum amount is specified as 50. Service charge for a transaction amount of 1000 will be calculated at 10. The calculated service charge is lesser than the specified minimum amount. Thus the system levies a service charge of 50.

Maximum Amount

[Conditional, Numeric, 13, Two]

Type the maximum amount which can be levied as service charge.

This field will be enabled if you select the **Percentage** option in the **SC Type** field.

If the calculated service charge is more than the specified maximum amount, the maximum amount is levied as the service charge.

For example, the service charge is calculated at 1% of the transaction amount and the maximum amount is specified as 90. Service charge for a transaction amount of 10000 will be calculated at 100. The calculated service charge is more than the specified maximum amount. Thus the system levies a service charge of 90.

Field Description

Field Name

Description

Tier Fixed / Rate

[Conditional, Drop-Down]

Select the rate at which the tiered service charge will be levied from the drop-down list.

The options are:

- Fixed
- Rate

Cumulative

[Mandatory, Radio Button]

Click **Cumulative** to enable the cumulative calculation of the service charge.

In the cumulative type of calculation, the system identifies the tier in which the complete transaction amount falls and the service charge applicable to that tier is levied.

For example, a DD worth 15000 is to be issued. The amount range for Tier 1 is 10000 and for Tier 2 it is 20000. The SC will be levied at the rate defined for Tier 2 with amount range as 20000 as the entire 15000

falls in the tier 2 range.

Incremental

[Mandatory, Radio Button]

Click **Incremental** to enable the incremental calculation of the service charge.

In the incremental type of calculation, the transaction amount is broken down as per the range of amount specified in the **Tiers** and service charge is levied for each part of the transaction amount.

For example, a DD worth 15000 is to be issued. The amount range for Tier 1 is 10000 and for Tier 2 it is 20000. Here the total transaction amount will be broken and for the first 10000 service charge will be levied at the rate applicable to Tier 1 and for the remaining 5000 the service charge will be charged as applicable to Tier 2.

SC Base Indicator

[Conditional, Drop-Down]

Select the base on which the service charge will be calculated from the drop-down list.

The options are:

- None
- Amount based – The service charge will be calculated on the transaction amount.
- Transaction Number Base - The service charge will be calculated on the number of transactions.

Part Amt Flag

[Conditional, Check Box]

Select the Part Amt Flag check box to levy the service charge on part amount.

This check box is enabled if the following options are selected:

- **Tiered** option in the **SC Type** field.
- Amount Based option in the SC Base Indicator field.
- Tier type should be **Cumulative**.

The total transaction amount is divided into equal parts and the SC is levied to these parts.

For example, 2 is SC amount for part amount of 1000, then for DD worth 2000 the service will be levied as 4.

Column Name	Description
Amount/No OfTxns	[Conditional, Numeric, 13, Two] Type the amount/ number of transactions for the tier. The subsequent tiers should have values greater than the preceding one. For example, if the amount for tier 1 is 10000 then the amount for tier 2 should be more than 10000.
SC Amount/Rate	[Conditional, Numeric, 13, Two]

Type the amount/rate of service charge, which is applicable, depending upon what has been selected for Tier Fixed / Rate.

Part Amount

[Conditional, Numeric, 13, Two]

Type the part amount.

This field will be enabled if the **Part Amount Flag** is selected.

The service charge is applicable to a part of the total amount. The total amount is divided as equal parts of part amount and the SC is levied to these parts.

For example, if 2 is SC amount for part amount of 1000, then for DD worth 2000 the service will be levied as 4.

Minimum Amount

[Conditional, Numeric, 13, Two]

Type the minimum amount which is to be levied as service charge.

This field will be enabled if the **Part Amount Flag** is selected.

If the calculated service charge is less than the specified minimum amount, the minimum amount is levied as the service charge.

For example, the service charge is calculated at 1% of the transaction amount and the minimum amount is specified as 50. Service charge for a transaction amount of 1000 will be calculated at 10. The calculated service charge is lesser than the specified minimum amount. Thus the system levies a service charge of 50.

Maximum Amount

[Conditional, Numeric, 13, Two]

Type the maximum amount which is to be levied as service charge.

This field will be enabled if the **Part Amount Flag** is selected.

If the calculated service charge is more than the specified maximum amount, the maximum amount is levied as the service charge.

For example, the service charge is calculated at 1% of the transaction amount and the maximum amount is specified as 90. Service charge for a transaction amount of 10000 will be calculated at 100. The calculated service charge is more than the specified maximum amount. Thus the system levies a service charge of 90.

Field Description

Field Name

Description

Amortisation GL

[Mandatory, Numeric, Nine]

Type the GL code ,where the amortisable fees deducted from account will be parked till they are realized as real income.

It is a liability type of GL.

Generally it should be a system GL, where the user initiated transactions will not be allowed.

Minimum Amount for Amortisation

[Mandatory, Numeric, 13, Two]

Type the minimum amount of total fees collected to be eligible for amortisation.

If the fees as per the related SC collected from an OD or a loan account is less than the value specified in this field, then such fees will not be amortised even if it is amortisable in nature.

If the value is greater than the value specified in this field, then such fees will be amortised over the term of the loan or up to the expiry of the OD account.

Year Base	[Display] This field displays the frequency of booking amortisable fees to income GL. By default, Calendar is displayed.
Amortisation Frequency	[Display] This field displays the frequency of amortisation of fees. By default, Monthly option is displayed.
Rounding Method	[Mandatory, Drop-Down] Select the rounding method from the drop-down list. The options are follow: <ul style="list-style-type: none"> • Round • Cutoff • Raise
Nearest Amount to Round	[Mandatory, Drop-Down] Select the factor till which the amount will be rounded from the drop-down list. The options are follow: <ul style="list-style-type: none"> • 1 • 10 • 100 • 1000
Accrual Basis	[Display] This field displays the basis of accrual of fees to be amortized. By default, Actual/Actual option is displayed. The accrual basis is used for calculating at the time of amortization, and there will not be any accrual or schedule of such amortization.

8. Click the **Ok** button.
9. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
10. The service charge code details are added once the record is authorised.

18.2. BAM15 - Transaction Mnemonic Codes

Using this option you can maintain transaction-related information . **FLEXCUBE** comes with all the pre-defined transactions shipped from the development factory.

This maintenance is used for linking a service charge applicable to the transaction or attaching an advice format to the transaction. All transactions, supported in all modules, are centrally defined.

Definition Prerequisites

Not Required

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add transaction mnemonic code

1. Type the fast path **BAM15** and click **Go** or navigate through the menus to **Global Definitions > Master > Transaction Mnemonic Codes**.
2. The system displays the **Transaction Mnemonic Codes** screen.

Field Description

Field Name	Description
Transaction Code	<p>[Mandatory, Numeric, Four]</p> <p>Type the unique code that will represent the transaction.</p> <p>This code acts like the fast path. The fast path is a mnemonic, which allows the user to access the screens/ transactions directly, bypassing the requirement to access the same via the FLEXCUBE hierarchical menu.</p>
Transaction Literal	<p>[Mandatory, Alphanumeric, Three]</p> <p>Type the short description of the transaction.</p> <p>A literal is like a short name for the transaction.</p> <p>For example, the literal that can be used for debit of service charge can be SCD. This could appear in Customer Statement.</p>
Description	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the description of the transaction.</p>

Debit/Credit Code	<p>[Mandatory, Radio Button]</p> <p>Click the appropriate type of transaction.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None - For Inquiry type transactions • Debit - For transactions which cause a debit to account • Credit - For transactions which cause a credit to account <p>The system, by default, assigns None as the transaction type if the field is blank.</p>
Advice Format Code	<p>[Mandatory, Numeric, Three]</p> <p>Type the advice code format.</p> <p>This field is currently not used for any processing.</p>
Transaction Type	<p>[Mandatory, Numeric, Three]</p> <p>Type the transaction code type.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 1 - General Debit • 2 - Debit Interest • 3 - Service Charge • 4 - Tax Deduction • 11 - General Credit <p>By default, the system assigns 0 as the transaction code type if the field is blank.</p>
Base Transaction Code	<p>[Optional, Pick List]</p> <p>Select the base transaction code for a particular mnemonic from the pick list.</p> <p>The current transaction code will then behave similar to the base transaction code during batch transactions.</p>
Base Description	<p>[Display]</p> <p>This field displays the transaction description for the base transaction mnemonic.</p>
Internal Transaction Attributes	
Transaction Category	<p>[Optional, Drop-Down]</p> <p>Select the transaction category from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer • Internal • System
Transaction Mode	<p>[Optional, Drop-Down]</p>

Select the transaction mode from the drop-down list.

The options are:

- Cash
- Clearing
- Inquiry
- Maintenance
- Transfer

Channel

[Optional, Drop-Down]

Select the channel through which the transaction will take place from the drop-down list.

The options are:

- Internet
- ATM
- Teller
- Batch
- POS
- TBS

Module

[Optional, Drop-Down]

Select the module in which the transaction will be included from the drop-down list.

The options are:

- CASA
- Customer
- GL
- Inventory
- Loans
- Clearing
- Deposits
- Branch
- APS

3. Click the **Add** button.
4. Enter the transaction code and press the **<Tab>** key.
5. Enter the literal and the description of the transaction, advice format, transaction type and the internal transaction attributes.
6. Select the debit/credit code for the transaction.

18.3. BAM18 - Event Master Maintenance

Using this option, you can define several events (E.g. Inter bank Transaction) that may take place during an account life cycle at some point of time and link them to the various pre-defined Event Type (E.g. TD Maturity).

Using the Event Master Maintenance, you can:

- Maintain the list of events in the system.
- Define various attribute of the event, i.e., action type.
- Maintain a cross reference for the charges to be levied on occurrence of events.
- Enable or disable tracking of particular events by the system.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a event code

1. Type the fast path **BAM18** and click **Go** or navigate through the menus to **Global Definitions > Service Charge > Event Master Maintenance**.
2. The system displays the **Event Master Maintenance** screen.

Event Master Maintenance

Field Description

Field Name

Description

Event Code

[Mandatory, Numeric, Five]

Type the unique code that will represent the event.

Once added, this field cannot be modified or amended.

Action Type

[Mandatory, Drop-Down]

Select the action type from the drop-down list.

This is the action that must occur when the event takes place.

The options are:

- Alert
- Charge
- Information

For events where the action is specified as Charge, the service charges are levied as defined in the SC package attached to the event.

Then the system verifies if there are any variances at the customer level or the account level. If yes, then the service charges are calculated and debited to the account considering the variances applicable.

Event Details

Event Name	[Mandatory, Alphanumeric, 40] Type the event name. Two different events can have the same product name. These events can be distinguished by the event code. For example, Inter bank Transaction
Event Type	[Mandatory, Pick List] Select the event type from the pick list. For example, if you select Term Deposit Maturity, a Service charge will be levied when there is an Interbank Transaction involved while redeeming a TD.
Parameter 1	[Display] This field displays the first parameter of the event.
Parameter 2	[Display] This field displays the second parameter of the event.
Parameter 3	[Display] This field displays the third parameter of the event.
Tracking Flag	[Optional, Check Box] Select the Tracking Flag check box to enable the system to track the defined event so that it is considered for service charge calculation. If the check box is not selected the event will not be considered for service charge calculation.

3. Click the **Add** button.
4. Enter the code and name for the event.
5. Select the action type from the drop-down list and the event type from the pick list.

18.4. BAM19 - Additional Dormancy Parameter Maintenance

Using this option the dormancy parameters can be maintained. The plans can be attached at CASA/TD product level as per the business requirements. The single dormancy plan can be attached to multiple CASA / TD products. The dormancy plan attached to the product will be applicable for all the sub accounts opened under that product. The two different sub accounts under one MCA can have two different dormancy plans.

You can not change the dormancy plan code once attached to the product but it can be modified. If the plan code already attached to the product is modified then it will be applicable for the sub accounts opened under that product in future. The changes can be applicable for those sub accounts which are marked as Dormant or Unclaimed.

Definition Prerequisites

Not Applicable

Modes Available

Add by Copy, Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To maintain the dormancy parameter

1. Type the fast path **BAM19** and click **Go** or navigate through the menus to **Global Definition > Master > Additional Dormancy Parameter Maintenance**.
2. The system displays the **Additional Dormancy Parameters Maintenance** screen.

Field Description

Field Name	Description
Dormancy Plan Code	[Mandatory, Numeric, Four] Type the unique plan code number.
Name	[Mandatory, Alphanumeric, 40] Type the name of the dormancy plan code.
Dormancy Processing Parameters	
Dormancy Transfer Value	[Mandatory, Numeric, Five] Type the number of dormancy transfer units after which an account will be converted to a dormant account. An account becomes dormant after a specified period if no transactions are performed on an account by the customer within that period.
Dormant Deposit Credit GL	[Mandatory, Numeric ,10] Type the GL code for recording dormant amounts on accounts having credit balance. The balances of all the dormant accounts will be recorded in this general ledger code. During dormancy processing, the credit balance of dormant

account gets transferred to this GL account, once the status of the account is changed to dormant. This GL account will be credited and the liability account will be debited with the dormant account balance. This will be liability type GL account.

Dormant Deposit Debit GL

[Mandatory, Numeric ,10]

Type the GL code for recording dormant amounts on accounts having debit balance.

The balances of all the dormant accounts will be recorded in this general ledger code. During dormancy processing, the debit balance of dormant account gets transferred to this GL account, once the status of the account is changed to dormant. This GL account will be debited and the asset account will be debited with the dormant account balance. This will be asset type GL account.

Dormancy Processing Frequency

[Mandatory, Drop-Down]

Select the dormancy processing frequency from the drop-down list.

It is the interval at which the system will run the dormancy processing to identify and mark the account as dormant.

The options are:

- Daily
- Monthly
- Quarterly
- Half-Yearly
- Yearly.

This parameter is also be used to identify the probable dormant account which may get dormant during the period till the next dormancy processing run.

For example, if the dormancy processing frequency is 'monthly', then system will identify all the probable accounts which may turn dormant in the next month.

Dormancy Processing Basis

[Conditional, Drop -Down]

Select the dormancy processing basis from the drop-down list.

The options are:

- Calendar : If this option is selected dormancy processing will be done at month-end.
- Anniversary : If this option is selected dormancy processing will be done on some specified date.

This field is enabled if the **Dormancy Processing Frequency** is **Monthly** or above.

Anniversary Day

[Conditional, Numeric,Two]

Type the anniversary date of dormancy processing. The Value should be between 1 to 31.

This field is enabled only if the **Anniversary** option is selected in the

Dormancy Processing Basis field.

Dormancy Processing Offset Month

[Conditional, Drop-Down]

Select the dormancy processing offset month from the drop down list . Values from January to December.

This field is enabled if **Dormancy Processing Frequency** is **Quarterly** and above and the start month as entered here will start the count of months from the financial year.

Dormancy Threshold Amount

[Mandatory, Numeric, 20]

Type the dormancy threshold amount.

If the book balance of the account is equal to or greater than the threshold amount, then that account will not be considered for dormancy processing.

Dormancy Notice lead Transfer Value

[Mandatory, Numeric, 5]

Type the value for the lead days for notice generation prior to account becoming dormant. Bank defines lead period to generate notice for dormancy to the customer.

During the notice period, the teller will intimate the customers to approach the bank and perform some financial transaction to avoid the account status turning to dormant.

Common Parameters

Stop Interest Accrual

[Optional, Checkbox]

Select the stop interest accrual checkbox when account status is changed to dormant and unclaimed. Interest accrual will be stopped till the time account status is dormant and unclaimed.

Stop Periodic SC

[Optional, Checkbox]

Select the Stop Periodic SC check box to keep the periodic SC, if any, pending during the period account status is dormant and unclaimed.

Transfer Unit

[Mandatory, Drop down]

Select the transfer unit from the drop-down list. The value in this field is the unit in which the Dormancy Notice Transfer Value, Dormancy Transfer Value and Unclaimed Transfer value should be read.

The options are:

- M - Month
- Y - Year
- D - Day

By default the value will be from dormancy transfer unit field.

GL balances Movement

[Optional, Check Box]

Select the GL balances movement checkbox to stop the movement of GL balance from Liability to Dormant GL.

Unclaimed Processing Parameters

**Unclaimed
Transfer Value**

[Mandatory, Numeric, 5]

Type the number of Unclaimed transfer units.

A dormant account will be marked as Unclaimed Deposit and the balance will be transferred to the Unclaimed Deposits GL account after the unclaimed transfer period. The unclaimed transfer value is exclusive of the dormancy transfer value.

For example,

Dormancy transfer unit – Year

Dormancy transfer value – 1

Unclaimed transfer value – 5

The customer opens an account on January 1 2004. He does not perform any transactions on the account. The system will change the status of the account to dormant on December 31, 2004. The system will transfer the balance of the dormant account to the unclaimed deposits GL on December 31, 2008.

**Unclaimed
Deposit Credit GL**

[Mandatory, Numeric, 10]

Type the GL code for recording unclaimed amounts on accounts under this product. This GL is referred as non business income (suspense income GL). The balances of all the unclaimed accounts will be recorded in this general ledger code. During unclaimed processing, system will change the status of the dormant account to unclaimed account and the credit balance of dormant account GL will get transferred to this GL account. This GL account will be credited and the dormant deposit credit GL account will be debited with the unclaimed account balance. The actual CASA account should not be closed and only GL entries should be posted and balance inquiry should show the balance of the unclaimed Status CASA account. This will be income type GL account.

**Unclaimed
Deposit Debit GL**

[Mandatory, Numeric, 10]

Type the GL code for recording the reversal of the unclaimed amounts on the accounts under this product.

This GL is referred as non business expense (suspense expense GL). The balances of all the unclaimed accounts will be reversed in this general ledger code. During reactivation of the unclaimed account, system will change the status of the unclaimed account to normal account and the credit balance of unclaimed account will get transferred from this GL account to product GL account. This GL account will be debited and the product liability GL account will be credited with the unclaimed account balance. This will be expense type GL account.

**Unclaimed
Processing
Frequency**

[Mandatory, Drop-Down]

Select the unclaimed processing frequency from the drop-down list.

It is the interval at which the system will run the unclaimed processing to identify and mark the account as unclaimed.

The options are:

- Daily
- Monthly
- Quarterly
- Half-Yearly
- Yearly

Unclaimed Processing Basis

[Conditional, Drop-Down]

Select the unclaimed processing basis from the drop-down list.

The options are:

- Calendar – If this option is selected Unclaimed processing will be done at month-end .
- Anniversary - If this option is selected Unclaimed processing will be done on some specified date.

This field is enabled if the **Unclaimed Processing Frequency** is **Monthly** or above.

Anniversary Day

[Conditional, Numeric, Two]

Type the anniversary date of Unclaimed processing.

This field is enabled only if the **Anniversary** option is selected in the **Unclaimed Processing Basis** field.

Unclaimed Processing Offset Month

[Conditional, Drop - Down]

Select the Unclaimed processing offset month from the drop down list - Values from JAN to DEC.

This field is enabled only when **Unclaimed Processing Frequency** is **Quarterly** and above and the start month as entered here will start the count of months from the financial year

Perform Account Closure on Unclaimed Processing

[Optional, Checkbox]

Select the **Perform Account Closure on Unclaimed Processing** check box if on unclaimed processing, the base **FLEXCUBE** process of closing the CASA account is not required. By default this is selected.

Dormancy/Unclaimed Reactivation Parameter

Accrue Pending Interest

[Conditional, Check Box]

Select the **Accrue Pending Interest** check box if the catch-up interest accrual is required on reactivation of dormant or unclaimed account to normal status..

This field is enabled if the **Stop Interest Accrual** check box is selected.

3. Click the **Add** button.
4. Enter the dormancy parameter details for maintenance.

18.5. BAM22 - Bank FATCA Parameters*

This maintenance is used for defining the bank level FATCA details if FATCA is applicable.

The participating status maintained will be from one of the values defined in FATCA classification maintenance (Fast Path: BAM11) for customer class – bank.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a new user defined entity

1. Type the fast path **BAM22** and click **Go** or navigate through the menus to **Global Definitions > Master > Bank FATCA Parameters**.
2. The system displays the **Bank FATCA Parameters** screen.

Bank FATCA Parameters

Field Description

Field Name	Description
Bank Code	[Mandatory, Input] Bank code defined in Bank Master Maintenance (FP: BAM08)]
FATCA Applicable	[Optional, Checkbox]

Check Box Y – FATCA Applicable, N – FATCA Not applicable
Checked Status – Y , Unchecked Status – N Default Value – N

Participating Status

[Conditional mandatory (if FATCA applicable checkbox is ticked), Picklist]
The field would record the banks own FATCA Classification.
List of Values from FATCA classification maintenance for
customer class – bank.

**GIN (Global Intermediary
Identification Number)**

[Conditional (if FATCA applicable checkbox is ticked), Alphanumeric, 35]
GIIN will be assigned to a participating FFI or registered
deemed-compliant FFI (incl. a U.S. branch of such an entity)
for purposes of identifying such entity to withholding agents.

**EIN (Employer identification
number)**

[Conditional (if FATCA applicable checkbox is ticked),
Alphanumeric, 35]
The employer identification number issued to the bank by I
RS would be recorded here. This field is not mandatory as
all statuses do not need an EIN.

Date of Issue/ Agreement

[Conditional mandatory (if FATCA applicable checkbox is ticked),
YYYYMMDD]
This date would record the date EIN was issued by IRS or the date
on which the bank entered into an agreement with IRS.

Date of Expiry

[Conditional mandatory (if FATCA applicable checkbox is ticked),
YYYYMMDD]
Some of the Classification requires the re-validation of EIN
periodically. This date would record the date on which the EIN
is to be revalidated.

Remarks/ Comments

[Optional, Alphanumeric, 120]

Any remarks/comments or observations regarding the Bank's
FATCA Classification.

6. Click the **Ok** button.
7. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **Ok** button.

18.6. SCM01 - SC Package Definition

Using this option you can levy multiple service charges for certain products, transactions, maintenance's or events. You can waive SCs based on total number or amount of transaction of a particular transaction type.

Service Charge Package is a pack of multiple Service Charge Codes that can be linked to

- Transactions - Cash deposit, Cash withdrawal, etc.
- Tasks - OD Limit setup, etc.
- Reports - Ad-hoc statement, etc.
- Events - Cheque return, Temporary OD, etc.
- Customer
- Transactions and account combination

Definition Prerequisites

- [BAM14 - Rewards and Service Charges definition](#)
- [BAM15 - Transaction Mnemonic Codes](#)
- [SMM03 - Task Profiles Maintenance](#)
- [BAM18 - Event Master Maintenance](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add service charge package

1. Type the fast path **SCM01** and click **Go** or navigate through the menus to **Global Definitions > Service Charge > SC Package Definition**.
2. The system displays the **SC Package Definition** screen.

Field Description

Field Name	Description
Package Code	<p>[Mandatory, Alphanumeric, Five]</p> <p>Type the service charge package code.</p> <p>SC package code is a unique number to be manually assigned at the time of creation.</p> <p>Once added, this field cannot be modified or amended.</p>
Package Name	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the SC package name.</p> <p>Two different service charge packages can have the same product name. These packages can be distinguished by the SC package code.</p>
Deviation Rule	<p>[Optional, Pick List]</p> <p>Select the deviation rule from the pick list.</p> <p>This contains the rule which will be applicable to deviate from the entire SC codes in the SC package.</p>

Account level counters, across transactions also can be set up using the deviation rule; these will be applicable for all the SC codes mentioned in the package.

3. Click the **Add** button.
4. Enter the code and name for the package.
5. Select the deviation rule from the pick list.

The screenshot shows the 'SC Package Definition' window. At the top, there are input fields for 'Package Code' (containing '25'), 'Package Name' (containing 'SC package'), and 'Deviation Rule'. Below these are three tabs: 'Package Summary' (selected), 'Add/Modify SC', and 'Entity Based SC Details'. The main area contains a table with the following columns: 'Srl.No.', 'Linkage Type', 'Linkage Code', 'SC Code', 'CCY', 'Description', 'Priority', 'Variance rule', 'Variance Value', and 'Delete'. Below the table are 'Up' and 'Down' buttons on the left, and 'Add' and 'Delete' buttons on the right. At the bottom, there is a 'Record Details' section with fields for 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. The bottom-most bar contains radio buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry', along with 'Ok', 'Close', and 'Clear' buttons.

6. The system displays the **Package Summary** tab screen.
7. Click the **Add** button to enable the **Add/Modify SC** tab screen.
8. The system displays the **Add/Modify SC** tab screen.
9. Enter the required information in the tab.

Add/Modify SC

The **Package Summary** tab is display only, and is used only to view the summary. In **Add/Modify** tab all the details are displayed and more data will be entered for each SC.

Field Description

Field Name	Description
SC Code	[Mandatory, Drop-Down] Select the SC codes available for selection from the drop-down list. All SC codes applicable within a package can be selected here to define the entire SC package. SC Codes will continue to be maintained at SC Codes maintenance only. Free counters will also be maintained at SC Codes only.
Code	[Display] This field displays the code corresponding to the SC code selected.
Currency	[Display] This field displays the currency in which the service charge is levied.
Description	[Display] This field displays the name of the SC code as the description for the service code.

Linkage Type	<p>[Mandatory, Drop-Down]</p> <p>Select the linkage type from the drop-down list.</p> <p>It defines the type of trigger, on which the SC is to be charged.</p> <p>The options in the drop-down list are:</p> <ul style="list-style-type: none"> • SCTXN : If this option is selected, service charge will be triggered based on the transaction committed • SCEVENT : If this option is selected, service charge will be triggered based on event. Example: interest event • SCMNT : If this option is selected, service charge will be triggered based on maintenance • SCREPROT : If this option is selected, service charge will be triggered based on reports • SCPERIODIC : If this option is selected, service charge will be triggered based on periodic SC • SCADDNL : If this option is selected, service charge will be triggered based on additional SC maintained
Linkage Code	<p>[Mandatory, Pick List]</p> <p>Select the linkage code from the pick list.</p> <p>Depending on the linkage type, this code links the trigger for charging SC.</p> <p>For e.g. for linkage type transaction, Cash Deposit, cash withdrawal type of transactions will be displayed.</p>
Priority	<p>[Display]</p> <p>This field displays the service charge priority.</p> <p>By default, the priority is set in sequence in which the service charge is added.</p> <p>In an NSF situation, the system levies the service charges in the specified priority.</p>
Cycle Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the cycle frequency for periodic SC from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Daily • Monthly • Bi-Monthly • Quarterly • Half-Yearly • Yearly
Cycle Type	<p>[Mandatory, Drop-Down]</p> <p>Select the cycle type for periodic SC from the drop-down list.</p>

The options are:

- Anniversary - SC is charged on the date mentioned.
- Calender - SC is charged at the end of the capitalization period.
- None

Anniv Day	[Conditional, Drop-Down] Select the anniversary day frequency of service charge capitalization, from the drop-down list. The drop down list has values from 1 to 31. This field is enabled if the Anniversary option is selected in the Cycle Type field.
Anniv Month	[Conditional, Drop-Down] Select the month on which SC will get capitalised from the drop-down list. The drop-down list has value from 1 to 12. This field is enabled if the Anniversary option is selected in the Cycle Type field.
VarianceRule	[Optional, Pick List] Select the variance rule from the pick list. These are rules available which could be set up for defining preferential SC for a particular mnemonic. Using these rules, separate conditions can be set up for applying SC for that particular transaction mnemonic.
Variance Value	[Optional, Numeric, 13, Two] Type the incremental value for the SC, if the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.

Note: User can input either Variance Rule or Variance Value.

10. Click the **Save** button.
11. The system displays the **Package Summary** tab screen.

Package Summary

The **Package Summary** tab displays all the service charges added or selected to create a package.

Field Description

Column Name	Description
Srl.No.	[Display] This column displays the serial number for the service charge details.
Linkage Type	[Display] This column displays the linkage type. It defines the type of trigger, on which the SC is to be charged. For e.g. transaction, event, maintenance, report, periodic, etc.
Linkage Code	[Display] This column displays the linkage code. Depending on the linkage type, this code will be exact trigger for charging SC. For e.g. for linkage type transaction, Cash Deposit, cash withdrawal type of transactions will be displayed.
SC Code	[Display]

	This column displays the SC codes.
CCY	[Display] This column displays the currency in which the service charge is levied.
Description	[Display] This column displays the name of the SC code as the description for the service code.
Priority	[Display] This column displays the priority for the service code. By default, the priority is set in sequence in which the service charge is added. In an NSF situation, the system levies the service charges in the specified priority.
Variance rule	[Display] This column displays the rules available which could be set up for defining preferential SC for a particular mnemonic. Using these rules, separate conditions can be set up for applying SC for that particular transaction mnemonic.
Variance Value	[Display] This column displays the incremental value for the SC. If the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.
Delete	[Toggle] Click the toggle status to change the value to Y if you want to delete the SC package. By default, the system displays the value as N .

12. Enter the required information in the **Entity Based SC Details** tab.

Entity Based SC Details

Although, **Entity based SC** can be linked to their respective maintenances, they can be waived or deviated through **SC Package Definition** option.

The advantage of this will be:

- Bank can see the complete pricing of a particular product in a single screen.
- It will be possible to override the default SC package with the new SC package, which again includes all SCs to be charged along with the transactions or events with which SCs are associated.
- It will be possible to do waivers of SCs based on total number or amount of transactions of a particular transaction type, i.e., bank could also bundle transactions across channels like Cash/Cheques/ATM/Internet Banking, etc. The purpose of having this maintenance is to facilitate SC levy based on number (counters) of transactions, events and Facilities and transaction amounts.

SC codes can be maintained and varied for entities such as:

- Issuer Master - It will be set up at Issuer Master and all the issuer codes, along with the SCs attached to it, can be viewed and varied from this maintenance.
- Endpoint Master - It will have a SC maintained, which can be viewed and varied from this maintenance.
- Correspondent Bank Master - It will continue to have a SC maintained which can be viewed and varied from this maintenance.
- Employer /Company Master - SC code will continue to be set up at Employer / Company Master and can be viewed and varied from this maintenance.
- Reminder Plan - SC code will continue to be set up at Loan Reminder Plan and can be viewed and varied from this maintenance.
- Clearing Minimum Maintenance - SC code will be set up at Clearing Minimum Maintenance (Fast Path: STM55) and can be viewed and varied from this maintenance.
- Similarly, the SC codes can be maintained for Deduction Plan also.

- Daily
- Monthly
- Bi-Monthly
- Quarterly

- Half-Yearly
- Yearly

EMPLOYER

EmployerCode	[Display] This column displays the identification code of the employer.
EmployerName	[Display] This column displays the name of the employer.
SCCode	[Display] This column displays the SC codes applicable.
Variance rule	[Display] This column displays the rule applicable for defining preferential SC for a particular mnemonic.
Variance Value	[Mandatory, Numeric, 13, Two] Type the variance value, if the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.

UTILITY COMPANY

CompanyCode	[Display] This column displays the identification code of the company.
CompanyName	[Display] This column displays the name of the company.
SCCode	[Display] This column displays the SC codes applicable.
Variance rule	[Display] This column displays the rule applicable for defining preferential SC for a particular mnemonic.
Variance Value	[Mandatory, Numeric, 13, Two] Type the variance value, if the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.

REMINDER PLAN

ReminderCode	[Display] This column displays the identification code of the reminder.
ReminderSrl	[Display] This column displays the serial number of the reminder.
SCCode	[Display]

	This column displays the SC codes applicable.
SCCcy	[Display] This column displays the currency of the service charge.
Variance rule	[Display] This column displays the rule applicable for defining preferential SC for a particular mnemonic.
Variance Value	[Mandatory, Numeric, 13, Two] Type the variance value, if the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.

DEDUCTION PLAN

PlanCode	[Display] This column displays the identification code of the plan.
PlanSrl	[Display] This column displays the serial number of the plan.
PlanName	[Display] This column displays the name of the plan.
SCCCode	[Display] This column displays the SC codes applicable.
SCCcy	[Display] This column displays the currency of the service charge.
Variance rule	[Display] This column displays the rule applicable for defining preferential SC for a particular mnemonic.
Variance Value	[Mandatory, Numeric, 13, Two] Type the variance value, if the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.

CLEARING MIN

TransactionCode	[Display] This column displays the identification code of the transaction.
ClearingMinAmt	[Display] This column displays the minimum clearing amount.
TxnCcy	[Display] This column displays the transaction currency.
SCCCode	[Display]

This column displays the SC codes applicable.

SCCcy

[Display]

This column displays the currency of the service charge.

Variance rule

[Display]

This column displays the rule applicable for defining preferential SC for a particular mnemonic.

Variance Value

[Mandatory, Numeric, 13, Two]

Type the variance value, if the preferential service charge is maintained as incremental over the existing SC for the particular transaction or maintenance.

13. Click the **Ok** Button.
14. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** Button.
15. The service charge package is added once the record is authorised.

Note: SC Package attached to Transactions and Events also form part of the SC Package for the Product and are later defaulted to the Account.

Example 01

Position of a CASA account is as follows;

Transaction	Transaction Currency	Customer ID	SC amount	SC Charge type
Flexcube	LCY	Same	1.5	End of Period + Earmark Online
Flexcube	LCY	Different	2.0	End of Period + Earmark Online
Flexcube	FCY	Same	1.5	End of Period + Earmark Online
Flexcube	FCY	Different	2.0	End of Period + Earmark Online

Step 1

UDE's will be defined using **UDE Master Maintenance** (Fast Path : RL001)

- UDE A to fetch the Source Account Customer ID
- UDE B to fetch the Destination Account Customer ID
- UDE C to fetch the transaction currency

Step 2

Rule ID's will be defined with multiple conditions as mentioned in the above grid using the **Rules Definition Maintenance** (Fast Path : RL002) option.

Step 3

Define four SC codes 101 ,102,103 and 104 (**Rewards and Service Charges definition** (Fast Path : BAM14)) as required.

Step 4

Define a SC package S1 and attach the above SC codes where linkage type as SCTXN (**SC Package Definition** (Fast Path : SCM01))

Step 5

The SC package is then attached to the product and then any account opened under this product will inherit this SC package and the appropriate SC charges will be charged for the defined transaction mnemonic after rule evaluation.

18.7. SCM04 - SC Variances Maintenance

Using this option you can define an entirely new Service Charge to override an originally defined Service Charge.

The variances need to be defined only for the exception conditions that would be encountered. This is a two-step process involving the following:

- Define a new Service Charge Code reflecting the differences in Service Charge parameters.
- Set up the newly defined Service Charge to override the original Service Charge for the exception condition, using the Service Charge Variances Maintenance.

Exceptions can be defined as:

- Global Variance - Here it is possible to define exception criteria's such as a particular product, branch, event or transaction for a defined Service charge.

Definition Prerequisites

- [BAM14 - Rewards and Service Charges definition](#)
- [CIM08 - Customer Type Maintenance](#)
- [BAM18 - Event Master Maintenance](#)
- [BAM17 - Branch Type Maintenance](#)
- [CHM01 - CASA Product Master Maintenance](#)
- [TDM01 - TD Product Master](#)
- [LNM11 - Product Master Maintenances](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add service charge variance

1. Type the fast path **SCM04** and click **Go** or navigate through the menus to **Global Definitions > Service Charge > SC Variances Maintenance**.
2. The system displays the **SC Variances Maintenance** screen.

Field Description

Field Name	Description
Product Code	<p>[Mandatory, Drop-Down]</p> <p>Select the product code, to which the variance will be applicable, from the drop-down list.</p> <p>The drop-down lists all the authorised products in FLEXCUBE Retail.</p>
Branch Type	<p>[Optional, Drop-Down]</p> <p>Select the branch type, to which the variance will be applicable, from the drop-down list.</p>
Customer Type	<p>[Mandatory, Drop-Down]</p> <p>Select the customer type, if the SC variance is applicable only for a certain type of customer, from the drop-down list.</p>
Event Code	<p>[Conditional, Pick List]</p> <p>Select the event code from the pick list.</p> <p>This event will be an exception to the defined SC code, i.e., applicable</p>

for variance.

You can select either an event code or a transaction code.

Transaction Code

[Conditional, Drop-Down]

Select the transaction code from the drop-down list.

This transaction will be an exception to the defined SC code, i.e., applicable for variance.

You can select either an event code or a transaction code.

Day

[Mandatory, Drop-Down]

Select the day of the week, on which the variance will be applicable, from the drop-down list.

Start Time

[Optional, Numeric, hhmm]

Type the start time for the variance.

The variance will be applicable to the specified exception conditions only after this time of the day.

Time can be any digit between 0 - 2400.

End Time

[Optional, Numeric, hhmm]

Type the end time for the variance.

The variance will be applicable to the specified exception conditions only till this time of the day.

Time can be any digit between 0 - 2400.

Holiday

[Optional, Check Box]

Select the **Holiday** check box to apply the holiday charges on the day on which the system has declared a holiday in the originating branch, for the various transactions in the ATMs.

If the user does not select the check box then the transactions occurring on the holiday at ATM and belonging to the originating branch will have the debit of charges as applicable to the time of usage. Debit charges will not be applicable to the transactions occurring on a holiday in the general business hours to out of business hours, if the holiday SC is set up as first SC.

Variance Details

The **Variance Details** tab is used to enter details such as Start Date, End Date, the Priority at which the variance is applicable, etc. You can specify whether the SC will be charged as a fixed amount or a percentage of the transaction amount or whether another SC will overrule the present SC, when the variance conditions are encountered.

Field Description

Field Name	Description
Fixed Variance	[Conditional, Numeric, 16] Type the service charge amount if the service charge is a fixed amount.
Percentage Variance	[Conditional, Numeric, Six] Type the percentage variance if the service charge amount is a percentage of the total transaction amount. For example, 2% of the transaction amount.
Override SC	[Conditional, Drop-Down] Select the service charge, which will overrule the service charge when the exception conditions specified in the Variance Criteria tab are encountered, from the drop-down list. This field will be enabled if selected service charge is of positive type (Rewards), then override service charge should be of only Positive type. If the selected service charge is of positive type (Rewards), then

override service charge should be of only Positive type.

If the selected service charge is of Charge type, then override service charge should also be of Charge Type.

- Variance Start Date** [Mandatory, Pick List, dd/mm/yyyy]
Select the start date for the variance from the pick list. The variance will be applicable to the specified exception conditions only after this date.
- Variance End Date** [Mandatory, Pick List, dd/mm/yyyy]
Select the end date for the variance from the pick list.
The variance will be applicable to the specified exception conditions only till this date.
End Date should always be greater than start date.
- Priority Code** [Mandatory, Numeric, Five]
Type the variance priority for the exception.
Priority should be unique across the service charge code and currency combination.

7. Click the up arrow button to increase the priority of the selected variance detail.
8. Click the down arrow button to decrease the priority of the selected variance detail.
9. Click the - button to delete the selected record in the **Global Variance** tab.
10. Click the **Ok** button.
11. The system displays the message "Record Added....Authorisation Pending...Click Ok to Continue". Click the **Ok** button.
12. The service variance details are added once the record is authorised.

18.8. SCM09 - SC Product XRef Maintenance

Using this option you can link the different SC packages to a product. If a SC package is defined at the product level, you will have to maintain that package in this option. If the SC package defined at a product level is modified, changed or deleted, the product level SC package will continue to exist in this option.

All these product level SC packages will be available for attachment at account level using the **Account Level SC Package Maintenance** (Fast Path: SCM08) option.

Definition Prerequisites

18.9. Central Bank Reporting Definition

Reports form an important part of any banking institution. A strong reporting tool enables a bank to ascertain its financial position as it provides an insight into potential business areas and ways to mitigate risk. Current banking policies framed by the Central Bank of the country makes it mandatory for all the banks to furnish reports in a pre defined format. **FLEXCUBE Retail** provides a solution to customize such reports using the Central Bank report definition. The user can define reports module wise, i.e., Customer Information, Current/Savings, Loans and Term Deposits using the user defined field maintenance under the Central Bank Reporting Definitions.

18.10. BA078 - CBR Label Maintenance

Using this option you can associate each of the **FLEXCUBE** user defined internal fields with a label as required .

You can control its content by classifying it as numeric or alphanumeric and ensuring that the content is selected only from the pick list, if required. If any of the fields are defined as mandatory, then the system will ensure that the value for that field is captured before the user does any operation on any record.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a reporting code label

1. Type the fast path **BA078** and click **Go** or navigate through the menus to **Global Definitions > Master > CBR Label Maintenance**.
2. The system displays the **CBR Label Maintenance** screen.

CBR Label Maintenance

Field Description

Field Name	Description
Module	<p>[Mandatory, Drop-Down]</p> <p>Select the module, for which you want to maintain the CBR pick lists, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer Information • Current/Savings • Loans • Term Deposit <p>The labels will be displayed in a pick list for accounts in the selected module. A module can hold up to 14 labels.</p>
Label	<p>[Mandatory, Alphanumeric, 30]</p> <p>Type the description of the CBR label.</p> <p>This name will be displayed while maintaining CBR codes for</p>

accounts.

Mandatory

[Optional, Check Box]

Select the **Mandatory** check box if the maintenance of the label is mandatory. This field is enabled when you add an appropriate label. If the check box is selected, the system will make the maintenance of the values in this label mandatory at the account level.

Alphanumeric/Numeric

[Mandatory, Radio Button]

Select the appropriate option to denote the value that the codes will take under the label.

The options are:

- Numeric - The label will take a numeric value
- Alphanumeric – The label will take an alphanumeric value.

You can maintain up to seven numeric or alphanumeric labels.

Pick List Mandatory

[Optional, Check Box]

Select the **Pick List Mandatory** check box to indicate that the field is a mandatory pick list. If not selected, it will be free formatted field.

Available Field Name

[Display]

This field displays the internal field name.

This field is displayed when you select an option in the Numeric/Alphanumeric field.

When a new label is created, the system assigns an internal field that will hold the values assigned under that label for an account.

3. Click the **Add** mode.
4. Select the module name from the drop-down list.
5. Enter the name of the label.
6. Select the parameters of the fields like mandatory, alphanumeric, numeric, pick list mandatory.

18.12. User Defined Fields

User Defined Fields

UDF01 - User Defined Fields

While working with **FLEXCUBE**, there are additional fields which are required to be used, either for convenience or to suit the requirements of the bank. This option, allows the user to add fields based on the specifications.

Based on the requirement and the nature of the field, you can specify default values and validations for the field. **FLEXCUBE** validates all entries made to the field against the validations defined for a field.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add a user defined field

1. Type the fast path **UDF01** and click **Go** or navigate through the menus to **Global Definitions > User Defined Fields > User Defined Fields**.
2. The system displays the **User Defined Fields** screen.

User Defined Fields

Field Description

Field Name

Description

Field Definition

Field Name

[Mandatory, Alphanumeric, 255]

Type the logical name for the UDF.

It is unique and is used for distinguishing between two UDFs with same labels.

Field Tag

[Display]

This field displays the field tag.

This is auto-generated name which is used by FLEXCUBE to identify the UDF. This name is generated based on the field type.

Screen Label

[Mandatory, Alphanumeric, 40]

Type the name of the UDF that is displayed on the screen to which it is attached.

Field Category	<p>[Mandatory, Drop-Down]</p> <p>Select the category for the UDF from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Account - Available for account related maintenances such as the Account Master Maintenance (Fast Path: CH021) option. • Task - Available for all other transactions. • Customer - Available for customer related maintenances such as the Customer Master Maintenance (Fast Path: CIM09) option.
Field Type	<p>[Mandatory, Drop-Down]</p> <p>Select the basic field type for the UDF from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Number • Text • Date
Field Description	<p>[Mandatory, Alphanumeric, 255]</p> <p>Type an optional description for the UDF.</p> <p>This is visible at the time of performing the transaction in a tooltip.</p>
Editable	<p>[Optional, Check Box]</p> <p>Select the Editable check box if the UDF is editable.</p>
Mandatory	<p>[Optional, Check Box]</p> <p>Select the Mandatory check box if the UDF is mandatory.</p> <p>This decides whether a UDF can be empty or not.</p>
Additional Validations	<p>[Optional, Check Box]</p> <p>Select the Additional Validations check box to allow validation on the UDF.</p> <p>This decides whether validations are allowed on the UDF or not. Once this check box is selected, the Validation tab gets enabled.</p> <p>The validation can be provided through pre-created SQL functions.</p>
LOV	<p>[Mandatory, Radio Button]</p> <p>Click LOV to enable the LOV tab where a Static drop-down or Dynamic pick list can be created for the UDF.</p>
Derivation	<p>[Mandatory, Radio Button]</p> <p>Click Derivation to enable the Derivation tab where a query can be created for getting the UDF value from some database tables or by executing a pre-created SQL function.</p>

3. Click the **Add** button.

4. Enter the field definition details.

5. Enter the required information in the various tabs.

Field Definition

The **Field Definition** tab allows the user to define some basic screen level validations for the UDF, based on the field types selected.

Field Description

Field Name	Description
------------	-------------

Length (Applicable only for Field Type Text)

Fixed Length

[Optional, Check Box]

Select the **Fixed Length** check box to enable the **Fixed Length** field.

If the check box is selected, the **Min Length** and **Max Length** fields are disabled.

Min Length

[Conditional, Numeric, Three]

Type the minimum length that UDF value must have.

If the **Fixed Length** check box is selected, the **Min Length** and **Max Length** fields are disabled.

Mask

[Mandatory, Drop-Down]

Select the mask that is applicable on the UDF from the drop-down list.

The options are:

- Numeric - Allows only numeric data to be entered
- Alphabetic - Allows only alphabetic data to be entered
- Alphanumeric - Allows both alphabetic and numeric data to be entered

Fixed Length

[Conditional, Numeric, Three]

Type the fixed length for the UDF.

This field is enabled if the Fixed Length check box is selected.

Max Length

[Conditional, Numeric, Three]

Type the maximum length that UDF value can have.

If the **Fixed Length** check box is selected, the **Min Length** and **Max Length** fields are disabled.

Date

These fields are enabled only if the Field Type is selected as Date.

Back Date

[Optional, Check Box]

Select the **Back Date** check box to allow the UDF to take back dated values.

This check box decides whether the UDF can take back dated values or not.

Future Date

[Optional, Check Box]

Select the **Future Date** check box to allow the UDF to take future dated values.

This check box decides whether the UDF can take future dated values or not.

Back Days

[Conditional, Numeric, Four]

Type the number of days the UDF value can take before the posting date.

This field is enabled only if the **Back Date** check box is selected.

Future Days

[Conditional, Numeric, Four]

Type the number of future days the UDF value can take after the posting date.

This field is enabled only if the **Future Date** check box is selected.

Range

Min Value

[Conditional, Numeric, Six, Two]

Type the minimum value that the UDF can have.

This field is enabled only if the **Field type** is selected as **Number**.

Max Value

[Conditional, Numeric, Six, Two]

Type the maximum value that the UDF can have.

This field is enabled only if the **Field type** is selected as **Number**.

Values

Default Value

[Mandatory, Numeric, Six, Two]

Type the value that the UDF must have initially at the time of performing the transaction. This value is defaulted on the screen where the UDF is attached.

LOV - Static

The LOV - Static UDF will have a static drop down of all the items created in this tab.

Field Name

Description

Dynamic

[Mandatory, Radio Button]

Click **Dynamic** to create a dynamic pick list.

In the **Add** mode once this option is selected, a grid is displayed where a query can be defined to get a pick list of values. In the **Inquiry** mode, the query defined in this tab, is displayed for the UDF being inquired on.

Picklist

Branch

[Mandatory, Radio Button]

Click **Branch** if the query created for the dynamic LOV, is to be executed on the branch database.

Host

[Mandatory, Radio Button]

Click **Host** if the query created for the dynamic LOV, is to be executed on the host database.

From Table	[Mandatory, Pick List] Select a table from the pick list. The pick list contains a list of tables available based on the database option selected.
Select Column	[Mandatory, Pick List] Select the appropriate column available for the selected table from the pick list. Two columns are available for selection. The value of the first column is the UDF value. The second column may or may not be used. It can be used to fetch up some supporting description or supporting data from the same table which will help the user to select the appropriate row from the pick list.

Column Name	Description
Keyword	[Conditional, Drop-Down] Select the keyword from the drop-down list. The default value is Where for defining a where clause. The other options are: <ul style="list-style-type: none"> • And • Or
([Toggle] Click the column, to provide open braces to the where clause. It toggles between open bracket and nothing at all.
L . H . S	[Conditional, Pick List] Select the left hand side of the where clause from the pick list. The pick list displays the various columns of the table along with their data type.
Condition	[Conditional, Drop-Down] Select the condition for the query from the drop-down list. The options are: <ul style="list-style-type: none"> • = - Equal To. • > - Greater Than • < - Less Than. • <= - Less Than Equal To. • >= - Greater than Equal To. • != - Not Equal To.
R . H . S	[Conditional, Pick List] Select the right hand side of the where clause from the pick list.

The user can choose the value as a field from a screen, a table, a constant or an existing UDF.

) [Toggle]

Click the column, to provide close braces to the where clause. It toggles between close bracket and nothing at all.

Delete [Toggle]

Click the toggle status of the field to Y, if the field can be deleted. The default value of this field is N.

Query [Display]

This column displays the query when the **Validate** button is clicked. Validate button combines the different parts of the query and shows a preview in the **Query** field.

Derivation - Query

The query that is created in this tab will be run at the time of performing the transaction and return the value to the UDF control.

Field Description

Field Name	Description
Query	[Mandatory, Radio Button] Click the Query option to create a query that will run at the time of performing the transaction and will return the value to the UDF control.
Query	
Branch	[Mandatory, Radio Button] Click Branch if the query created for derivation will be executed on the branch database.
Host	[Mandatory, Radio Button] Click Host if the query created for derivation will be executed on the host database.
From Table	[Mandatory, Pick List] Select a table from the pick list. The pick list contains a list of tables available based on the database option selected.
Select Column	[Mandatory, Pick List] Select the appropriate column from the pick list. The value of column is the UDF value. The pick list displays a list of columns available for the table selected.

Column Name	Description
Keyword	[Conditional, Drop-Down] Select the keyword from the drop-down list. The default value is Where for defining a where clause. The other options are: <ul style="list-style-type: none">• And• Or
([Toggle] Click the column, to provide open braces to the where clause. It toggles between open bracket and nothing at all.
L . H . S	[Conditional, Pick List] Select the left hand side of the where clause from the pick list. The pick list displays the various columns of the table along with their data type.
Condition	[Conditional, Drop-Down] Select the condition for the query from the drop-down list.

The options are:

- = - Equal To.
- > - Greater Than
- < - Less Than.
- <= - Less Than Equal To.
- >= - Greater than Equal To.
- != - Not Equal To.

R . H . S

[Conditional, Pick List]

Select the right hand side of the where clause from the pick list.

The user can choose the value as a field from a screen, a table, a constant or an existing UDF.

)

[Toggle]

Click the column, to provide close braces to the where clause. It toggles between close bracket and nothing at all.

Delete

[Toggle]

Click the toggle status of the field to Y, if the field can be deleted.

The default value of this field is N.

Query

[Display]

This column displays the query when the Validate button is clicked.

Validate button combines the different parts of the query and shows a preview in the Query field.

Derivation - Function

The function that is created in this tab will be run at the time of performing the transaction and will return the value to the UDF control.

19.3. BS007 - Basel II Picklist Maintenance

FLEXCUBE needs to define certain codes for enabling data capture at various levels, viz., customer, collateral, account, etc. These codes are defined as factory shipped values. The pick list values for these codes are maintained by the banks.

This enables the bank to define the pick list based on the requirements. These codes are used to capture the customer level, account level and collateral level values at different stages.

Using this option you can maintain the Basel II codes and the pick list values for these codes.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add basel II codes and pick list values

1. Type the fast path **BS007** and click **Go** or navigate through the menus to **Global Definitions > Basel II > Basel II Picklist Maintenance**.
2. The system displays the **Basel II Picklist Maintenance** screen.

Field Description

Field Name	Description
Securitization Pool ID	[Mandatory, Alphanumeric, 30] Type the unique identification number to identify the securitization pool.
Securitization Tranche Name	[Mandatory, Alphanumeric, 80] Type the unique name of the securitization tranche.
Parent Securitization Pool	[Optional, Check Box] Select the Parent Securitization Pool check box to pool to parent securitization.
Parent Securitization Pool ID	[Mandatory, Pick List] Select the ID of the parent securitization pool from the pick list. The pick list displays a list of parent ID's only.
Tranche Details	
Tranche Seniority Rank	[Optional, Numeric, Four] Type the seniority rank number for the securitization tranche.
Tranche Face Value	[Optional, Numeric, 12] Type the original value of the securitization note.
Credit Enhancement Level	[Optional, Numeric, Six, Two] Type the appropriate credit enhancement level. It is the amount of credit exposures subordinate to the securitization tranche, expressed as a percentage of the total underlying asset pool.
Tranche Thickness	[Optional, Numeric, Six] Type the tranche thickness. The securitization tranche expressed as a percentage of the total underlying asset pool.
Tranche Loss Position Rank	[Optional, Numeric, Four] Type the rank position of the tranche loss. The loss position of the retained securitization note within the waterfall.
Tranche External Rating	[Mandatory, Alphanumeric, Eight] Type the rating published by agencies such as Moodys, Standard and Poors, the Banque de France system, etc. This rating is for the securitization tranche.
Tranche Rating Agency	[Mandatory, Pick List] Select the name of the rating agency providing the securitization tranche rating from the pick list.
Tranche Short Term	[Optional, Check Box]

Rating Indicator Select the **Tranche Short Term Rating Indicator** check box to rate as short term indicator.

Securitization Details

Securitization Investment Status [Optional, Pick List]
Select the code for the investment status of the securitization tranche from the pick list.

Regulatory Counterparty Basel II Approach [Mandatory, Pick List]
Select the Basel II reporting approach used for the underlying assets of securitization pool from the pick list.

Securitization Structure Type [Mandatory, Pick List]
Select the structure type for the securitization pool from the pick list.

Securitization Structure Subtype [Optional, Pick List]
Select the structure subtype for the securitization pool from the pick list.

Securitization Primary Bank Role [Mandatory, Pick List]
Select the primary bank role for the securitization pool from the pick list.

Securitization Early Amortization Type [Optional, Pick List]
Select the early amortisation type for securitization pool from the pick list.

Spread Factors

Implicit Support Indicator [Mandatory, Check Box]
Select the **Implicit Support Indicator** check box to support the implicit indicator.

Average 3 Month Excess Spread [Optional, Numeric, 12]
Type the cash residual amount left at the end of (typically) the exercise of the waterfall, for a securitization pool.

Excess Spread Trap Point [Optional, Numeric, Five, One]
Type the excess spread trap point.
Trapping point may be set to 4.5% where transaction does not require excess spread to be trapped.

Pool Face Value [Optional, Numeric, 12]
Type the total face value amount of the underlying asset pool for a securitization.

Effective Exposures [Mandatory, Numeric, Nine]
Type the effective number of exposures for a securitization pool.

Internal Indicator [Mandatory, Check Box]
Select the **Internal Indicator** check box to provide .

This field is mandatory for securitizations.

Face Values

Committed Retail Revolving Face Value

[Optional, Numeric, 12]

Type the committed retail revolving face value.

It is used for calculating a weighted average CCF for the structure, for a securitization pool.

Uncommitted Retail Revolving Face Value

[Optional, Numeric, 12]

Type the uncommitted retail revolving face value.

It is used for calculating a weighted average CCF for the structure, for a securitization pool.

Committed Other Revolving Face Value

[Optional, Numeric, 12]

Type the committed other revolving face value.

It is used for calculating a weighted average CCF for the structure, for a securitization pool.

Uncommitted Other Revolving Face Value

[Optional, Numeric, 12]

Type the uncommitted other revolving face value.

It is used for calculating a weighted average CCF for the structure, for a securitization pool.

3. Click the **Add** button.
4. Enter the securitization pool Id and press the <Tab> key.
5. Enter the securitization tranche name.
6. Enter the tranche details, securitization details, spread factors and face values.

Customer Name	[Display] This field displays the name of the customer to whom the account belongs.
Rating Group	[Display] This field displays the name of the rating group. The rating groups are maintained in FCC and replicated to FCR linked to all the non-retail customers.
Branch	[Display] This field displays the branch in which the account is opened.
Product Name	[Display]

This field displays the name of the product.

Currency

[Display]

This field displays the currency of the product.

Loan and CASA OD Accounts

BIC Code

[Mandatory, Pick List]

Select the BIC code of the industry of the account from the pick list.

EC Booking SBU

[Mandatory, Pick List]

Select the SBU where the exposure was booked from the pick list.

The SBU with the highest available level should be used.

Exposure Type

[Mandatory, Pick List]

Select the nature of an exposure from the pick list

E.g. loan, credit derivative, etc.

Product

[Mandatory, Pick List]

Select the product for the exposure from the pick list.

Repayment Type

[Mandatory, Pick List]

Select the repayment pattern. from the pick list

It is combined with maturity for the EC calculation to reflect the timing of future cash flows.

Sector

[Mandatory, Pick List]

Select the sector for the exposure from the pick list.

Company Code

[Mandatory, Pick List]

Select the codes which represent the legal structure of the bank from the pick list.

Profit Center

[Mandatory, Pick List]

Select the profit centre from the pick list.

The valid values are defined in the policy document.

Portfolio

[Mandatory, Pick List]

Select the portfolio of the loan or the CASA OD account of the customer from the pick list.

PIT EDF

[Mandatory, Pick List]

Select PIT EDF from the pick list.

The current expected one year default frequency. This is the EDF used in the risk tendency calculation.

Where an SBU does not have separate EDFs for TTC and PIT then the PIT should be set to the TTC EDF.

Industry Code

[Conditional, Pick List]

Select the industry code. from the pick list

The Industrial classification of exposure counter party.
This field is mandatory for non-retail.

Real Estate Loans

Original Property Index Factor

[Conditional, Pick List]

Select the original property index factor from the pick list.

This field is mandatory, for residential real estate exposures and where LTV percentage cannot be provided.

Last Property Index Factor

[Mandatory, Pick List]

Select the last property index factor from the pick list.

IBB Approach Exposures

IRB Asset Class

[Conditional, Pick List]

Select the IRB asset class from the pick list.

It is the group's interpretation of the EU's Basel II category, for the IRB approaches.

This field is mandatory for exposures reported under IRB approaches only.

PD TTC Value

[Conditional, Numeric, One, Four]

Type the PD TTC value.

The through-the-cycle probability of default, before floor adjustments.

This field is mandatory for exposures reported under IRB approaches only.

PD Model ID Code

[Conditional, Pick List]

Select the identification code for the PD model in the group risk models database from the pick list.

This field is mandatory for exposures reported under IRB approaches only.

LGD Downturn Value

[Conditional, Numeric, 4 decimal places]

Type the downturn LGD value, before floor adjustments.

This field is mandatory for exposures reported under IRB approaches only.

LGD Model ID Code

[Conditional, Pick List]

Select the identification code for the LGD model in the Group Risk models database from the pick list.

This field is mandatory for exposures reported under IRB approaches only.

Maturity Years

EAD Downturn Gross Amount

[Conditional, Pick List]

Select the EAD downturn gross amount from the pick list.

The downturn exposure at default, calculated in accordance with the CRD, pre accounting offsets and before floor adjustments.

This field is mandatory for exposures reported under IRB approaches only.

EAD Downturn Net Amount

[Conditional, Pick List]

Select the EAD downturn net amount from the pick list.

The downturn exposure at default, calculated in accordance with the CRD, post accounting offsets and before floor adjustments.

This field is mandatory for exposures reported under IRB approaches only.

EAD Model ID Code

[Conditional, Pick List]

Select the identification code for the EAD model in the Group Risk models database from the pick list.

This field is mandatory for exposures reported under IRB approaches only.

SBU Sub-Analysis

[Optional, Pick List]

Select the grouping within SBU from the pick list.

Securitization and Asset Class

Parent Securitization Pool ID

[Conditional, Pick List]

Select the parent securitization pool id from the pick list.

The identifier of the parent securitization pool for this exposure - i.e. the securitization pool for which this exposure is underlying.

This field is mandatory for securitized exposures only.

Standardized Asset Class

[Conditional, Pick List]

Select the standardized asset class from the pick list.

The group's interpretation of the EU's Basel II category, for the standardized approach.

Guarantor Standardized Asset Class

[Conditional, Pick List]

Select the guarantor standardized asset class from the pick list.

The group's interpretation of the EU Basel II category of the guarantee for this exposure, for the standardised approach.

This field is mandatory for **non retail** only.

3. Click the **Add** button.
4. Enter the account number and press the **<Tab>** key.
5. Enter the Loan and CASA OD account details.
6. Enter the real estate loans, IBB approach exposures, securitization and asset class details.

Field Description

Field Name	Description
Collateral Code	[Mandatory, Pick List] Select the collateral code from the pick list. It is the code associate with automobile, finance, bills collaterals. The collateral codes are displayed from the Collateral Codes Maintenance (Fast Path: BAM39) option.
Collateral Name	[Display] This field displays the collateral name corresponding to the code.
Collateral Currency	[Display] This field displays the currency of the corresponding collateral code.
Collateral Details	
Collateral Relief Claimed	[Optional, Check Box] The collateral relief claimed.
Collateral Type for Basel II	[Mandatory, Pick List] Select the collateral type from the pick list.
Standardized eligible collateral indicator	[Optional, Check Box] Select the Standardized eligible collateral indicator check box if the collateral is eligible under Basel II.
IRB eligible collateral indicator	[Optional, Check Box] Select the IRB eligible collateral indicator check box if the collateral is eligible under Basel II.
Collateral Rating Agency	[Conditional, Pick List] Select the name of the collateral rating agency from the pick list. This field is mandatory only if the Collateral Relief Claimed check box is selected.
Collateral Rating	[Optional, Pick List] Select the external rating of the financial collateral issue from the pick list.
Haircut collateral Percentage	[Optional, Numeric, Five] Type the haircut collateral percentage.
Haircut currency mismatch percentage	[Optional, Numeric, Five] Type the appropriate haircut for currency mismatch between the exposure and the collateral.
Haircut maturity mismatch percentage	[Optional, Numeric, Five] Type the appropriate haircut for the maturity mismatch between the exposure and the collateral.

Total haircut collateral percentage

[Optional, Numeric, Five]

Type the total haircut collateral percentage.

It includes the haircut collateral and haircut currency mismatch.

Total collateral amount post haircuts

[Optional, Numeric, 12]

Type the total collateral amount post haircuts.

It is the total of the collateral amounts for the collateral item that are applicable to the exposure, after applying the haircuts.

This is determined by applying the 'total haircuts on the collateral percentage' to the 'total collateral amount pre-haircuts'.

3. Click the **Add** button.
4. The system displays the message "This action will clear all data on the screen. Do You Want to continue?". Click the **Yes** button.
5. Select the collateral code from the pick list.
6. Select the collateral type and collateral rating agency code from the pick list.
7. Enter the other collateral details.

19.8. BS020 - BASEL II Data Capture Screen

Using this option you can capture additional data related to the transactions for which BASEL II reporting is required.

Typically transactions to loan accounts like disbursement, repayment, EFS etc. require additional data capturing for reporting purpose. In case of CASA OD, the additional data can be captured for all debit / credit transactions other than interest and charge debit. For data capturing, the transactions IDs will be available in this option for input / modification on the date of the transaction and will not be available for input / modification on the subsequent days.

Definition Prerequisites

- Existence of transactions in CASA OD / Loan accounts for Basel II reporting

Modes Available

Add By Copy, Add, Modify. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To capture additional data for BASEL II reporting

1. Type the fast path **BS020** and click **Go** or navigate through the menus to **Global Definitions > Basel II > BS020 - BASEL II Data Capture Screen**.
2. The system displays the **BASEL II Data Capture Screen** screen.

20. Other Definition

Under Other definitions all other maintenances like Local Office Master, State Codes, Currency Float, Transaction X-Ref, GL Codes Cross Reference, Bank Calendar Maintenances, etc., can be defined.

20.1. ACM08 - CRR Code - GL Cross Reference Maintenance

This maintenance is used to define the cross reference between CRR code and GL code. The purpose is to use separate GL's for passing of principal accounting entries when an account obtains a particular CRR codes. In case if the GL is not defined against a CRR code then no principal accounting entry will be passed for that CRR code..

Modes Available

Add, Modify, Delete, Inquiry.

To define cross reference details

1. Type the fast path ACM08 and click Go or navigate through the menus to Global Definitions > AC > CRR Code - GL Cross Reference Maintenance.
2. The system displays the CRR Code - GL Cross Reference Maintenance **screen**.

20.2. BAM81 - Company Master Maintenance

Using this option you can maintain details of all companies/service providers (for e.g. utility companies, employers, credit card companies) for whom the bank wants to provide bulk credit/debit services.

A file containing the details is received from the company and is uploaded into **FLEXCUBE**. At the time of file upload for billing from utility companies, system will debit/credit immediately all the transactions dated for that day's process date. The future dated transactions in the file will be taken up for processing during BOD of the process date.

The details in the company master is used for applying service charges on the company, nature of processing to be done in case of insufficient funds in customer accounts, company account number to pass the contra entry, etc.

In case of the billing file upload when there are insufficient funds in the customer account, system will try to recover the funds from the customer in the subsequent day's BOD, till the maximum number of retries set at the company level are exhausted. Re-try will take place during BOD operations. The recovery account number will be debited for remaining additional recovery in the event of partial debits or insufficient fund scenario.

Definition Prerequisites

Field Description

Field Name	Description
------------	-------------

Company Details

Company Code	[Mandatory, Numeric, Five] Type the unique company code for the utility service provider or employer.
External Company Code	[Mandatory, Alphanumeric, 10] Type the unique company code for the utility service provider or employer. By default, the system displays the code entered in the Company Code field.
Company Name	[Mandatory, Alphanumeric, 40] Type the full name of the Utility Service Provider or employer.
Contact No	[Optional, Numeric, 30] Type the contact number of the Utility Service Provider or employer.

City	[Optional, Character, 35] Type the city to which the Utility Service Provider or employer belongs.
Address	[Optional, Alphanumeric, 35, Three Lines] Type the address of the Utility Service Provider or employer. The address can be mentioned in three lines..
State	[Optional, Character, 35] Type the state of the Utility Service Provider or employer.
Country	[Optional, Character, 35] Type the country of the Utility Service Provider or employer.
Postal Code	[Optional, Alphanumeric, 10] Type the postal code of the Utility Service Provider or employer.
Check Digit	
Validation Required	[Mandatory, Drop-Down] Select the validation from the drop-down list. It allows the user to attach the validation routine for the company. The options are: <ul style="list-style-type: none"> • No Validation required • Validate for Virtual account number • Consumer number validation
Routine	[Conditional, Pick List] Select the routine from the pick list. Validation of complex logic for the virtual account number is done by routine. This field is enabled if the Consumer number validation option is selected in Validation Required drop-down list.
Weight String	[Conditional, Numeric, 13] Type the weight string. It is used to perform the check sum algorithm on the virtual account number belonging to the customers registered with the company. This field is enabled if the Validate for Virtual account number option is selected from the Validation Required drop-down list.
Modulo	[Conditional, Numeric, Two] Type the modulo string. It is used to perform the check sum algorithm on the virtual account number belonging to the customers registered with the company. This field is enabled if the Validate for Virtual account number option is selected from the Validation Required drop-down list..
Upload Type	[Mandatory, Drop-Down]

Select the upload type from the drop-down list.

The options are:

- BILLING
- SALARY

Bill Type

[Optional, Drop-Down]

Select the bill type for the company code from the drop-down list.

The options are:

- Charity
- Credit Card
- Electricity Bill
- Fixed Phone
- Insurance Payment
- Mobile Phone
- Water
- Others

One company code can be linked to only one bill type.

The user has to select **Others** as the bill type, if the bill type for the company is not falling in any of the defined categories.

Customer ID

[Optional, Numeric, 10]

Type the **FLEXCUBE** customer id of the company.

This is required only for reporting.

No. Of Days For Salary DrawDown

[Conditional, Numeric, Five]

Type the number of days for the salary drawdown. If the salary upload is done and loan drawdown instructions are maintained for a credit CASA account from this company master, then the number of days defined here will be used in the future to decide the arrears raised. Accordingly the hold will be created at the time of salary upload.

The loan account is linked to the CASA Salary account using the **Loan Pay Instruction Setup Maintenance** via the salary option.

This field is enabled if the **Salary** option is selected from the **Upload Type** drop-down list.

Extraction Frequency

[Optional, Drop-Down]

Select the extraction frequency from the drop-down list.

It is the frequency at which the consolidated file/report has to be extracted to indicate the success/reject transactions. This is used for extracting billing information for handoff to utility companies.

The options are:

- Daily
- Weekly

- Fortnightly
- Monthly
- Bi-monthly
- Quarterly
- Half Yearly
- Yearly

Payment Frequency

[Optional, Drop-Down]

Select the payment frequency from the drop-down list.

It is the frequency of the file upload expected.

The options are:

- Daily
- Weekly
- Fortnightly
- Monthly
- Bi-monthly
- Quarterly
- Half Yearly
- Yearly

System will give a warning if the file is being uploaded at a date falling within the frequency as calculated since the last upload.

Type of Retries

[Conditional, Drop-Down]

Select the type of retry, in case of unsuccessful transaction, from the drop-down list.

This field is enabled if the **Billing** option is selected from the **Upload Type** drop-down list.

The options are:

- Full Debit - System will keep trying till it is able to do a debit of the account for the full bill amount
- Partial Debit - System will debit the account during retry even if partial amount of bill is available in the account.

No. of Retries

[Conditional, Numeric, Two]

Type the number of retries in case of unsuccessful transaction.

This field is enabled if the **Billing** option is selected from the **Upload Type** drop-down list.

SC for Successful Txns

[Optional, Drop-Down]

Select the service charge to be applied in case of a successful transaction from the drop-down list. It is valid for debits in case of billing file and credits in case of salary file.

Service Charges are defined using **the Rewards and Service Charges Definition (Fast Path: BAM14)** option.

SC for Rejected Txns [Optional, Drop-Down]
Select the service charge to be applied in case of a rejected transaction from the drop-down list.
It specifies whether SC for rejected transactions needs to be charged to the company, customer or both. If the Both option is selected, SC charge will be levied on Company and Customer.

Default Account Settings

It is the account/GL which will be debited or credited for all successful cases of the salary upload or billing file respectively.

Account Type [Mandatory, Drop-Down]
Select the type of account maintained by the **Utility Service Provider** from the drop-down list.
The options are:

- CASA
- GENERAL LEDGER

Hold Days [Conditional, Numeric, Three]
Type the hold number of days.
It allows the user to hold the CASA account fund for the defined number of days. By default this field is disabled, if CASA account is selected then this field gets enabled. User cannot set the hold days value as zero (0).
This field is enabled if the **CASA** option is selected from the **Account Type** drop-down list.

Type of Hold Days [Conditional, Drop-Down]
Select the type of hold days from the drop-down list.
The options are:

- Working Days: It will hold the amount for number of bank working days.
- Calendar Days: It will hold the amount for the number of actual days count.

This field is enabled if the **CASA** option is selected from the **Account Type** drop-down list.

Account Number [Mandatory, Numeric, 16]
Type the CASA or GL account number.

Account Title [Display]
This field displays the account title in case of CASA account and GL account name in case of GL account, depending upon the account number entered above.

Account [Conditional, Pick List]

Branch Select the branch code for the GL account number entered in the corresponding field, from the pick list.
This field displays the home branch where the CASA account is opened if the **CASA** option is selected in the **Account Type** field.

Account Currency [Conditional, Drop-Down]
Select the account currency for the GL account from the drop-down list.
This field displays the currency assigned to the CASA product at the product level, if the **CASA** option is selected in the **Account Type** field.

Bridge/Recovery GL

It is the account/GL which will be debited or credited for all unsuccessful cases of the salary upload or billing file respectively.

Account Type [Conditional, Drop-Down]
Select the type of account maintained by the Utility Service Provider from the drop-down list.
The options are:

- CASA
- General Ledger

Account Number [Conditional, Numeric, 16]
Type the CASA or GL account number.

Account Title [Display]
This field displays the account title in case of CASA account and GL account name in case of GL account, depending upon the account number entered above.

Account Branch [Conditional, Numeric, Four]
Type the account branch code.
This field displays the home branch where the CASA account is opened if the **CASA** option is selected from the **Account Type** drop-down list.

Account Currency [Conditional, Drop-Down]
Select the account currency for the GL account from the drop-down list.
This field displays the currency assigned to the CASA product at the product level, if the **CASA** option is selected in the **Account Type** field.

3. Click the **Add** button.
4. Enter the company code and press the <Tab> key.

20.3. BAM05 - Billing Master Maintenance

Bank provides direct debit services to the customers for payment of utility bills. Both the beneficiary company details and the customer mandates need to be maintained in the system for this facility.

Using this option registration of beneficiary / intermediary details can be done. The bank enters into an agreement with the beneficiary company and registers the company details. In certain cases, the beneficiary company enters into an agreement with intermediary company and the bank enters into an agreement for direct debits with intermediary companies who collect the proceeds on behalf of the service provider. The SC details defined in this maintenance is used for applying service charges for successful or rejected transactions. The **Direct Debit Registration** (Fast Path: BAM06) option is used for direct debit mandate registration using CASA or credit card accounts.

Definition Prerequisites

Description

Beneficiary Details

Beneficiary Code	[Mandatory, Numeric, Five] Type the beneficiary code which is unique across the bank.
Beneficiary Name(Branch & Internet)	[Mandatory, Alphanumeric, 70] Type the beneficiary name which will be used for branch and Internet registration.
Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the beneficiary name.
Merchant Number	[Mandatory, Numeric, Eight] Type the merchant number of the beneficiary which is provided by an external system.

Agreement Number	<p>[Optional, Alphanumeric, 16]</p> <p>Type the agreement number.</p> <p>It is a legal agreement number between the beneficiaries (or intermediary) and the bank. This number will be unique for every beneficiary company.</p>
Agreement Status	<p>[Optional, Drop-Down]</p> <p>Select the agreement status from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Active • InActive <p>By default the system displays the value as Active.</p> <p>Mandate upload and addition is not allowed if the agreement status is Inactive.</p> <p>There is no impact on the existing mandates if the agreement status is modified from active to inactive or vice-versa.</p>
Address	<p>[Optional, Alphanumeric, 35]</p> <p>Type the address of the beneficiary.</p>
City	<p>[Optional, Character, 35]</p> <p>Type the name of the city of the beneficiary.</p>
State	<p>[Optional, Character, 35]</p> <p>Type the name of the state of the beneficiary.</p>
Country	<p>[Optional, Alphanumeric, 35]</p> <p>Type the name of the country of the beneficiary.</p>
Zip Code	<p>[Optional, Numeric, 20]</p> <p>Type the zip code of the beneficiary.</p>
Contact Number	<p>[Optional, Numeric, 10]</p> <p>Type the contact number of the beneficiary.</p>
SC Details	
SC for Successful Txns	<p>[Optional, Drop-Down]</p> <p>Select the service charges to be applied in case of successful transactions from the drop-down list.</p>
Settlement Account Number	<p>[Mandatory, Numeric, 16]</p> <p>Type the CASA beneficiary account number in which the settlement of the direct debit mandate will be credited.</p> <p>This account is unique for a valid beneficiary agreement.</p>
SC for Rejected Txns	<p>[Optional, Drop-Down]</p> <p>Select the service charges to be applied in case of rejected</p>

transactions from the drop-down list.

SC Recovery Account Number

[Conditional, Numeric, 16]

Type the CASA account number to which the service charges will be debited.

This CASA account number can also belong to the beneficiary / intermediary company.

This field is enabled if the value is selected in either **SC for Successful Txns** or **SC for Rejected Txns** drop-down list.

Additional Details

Payment Amount Floor Limit

[Mandatory, Numeric, 13, Two]

Type the limit above which the direct debit payment will be rejected.

For example, if the limit is set as 3500, then amounts above this limit will be rejected.

Service Recipient Number Nature

[Mandatory, Pick List]

Select the service recipient number type that has to be validated during mandate registration (in the **Direct Debit Registration** (Fast Path: BAM06) option) from the pick list.

For example, in the agreement with the beneficiary and the bank, the beneficiary can mention that the bank should always accept the national ID number of the payer during direct debit registration.

Mandate Acceptance

[Mandatory, Drop-Down]

Select the location where mandate will be accepted from the drop-down list.

The options are:

- At the Beneficiary Office – If this option is selected, direct debit mandates will be accepted only at the beneficiary office.
- At the Bank - If this option is selected, direct debit mandates will be accepted only at the bank.
- At the Beneficiary office and Bank - If this option is selected, direct debit mandates will be accepted at the bank as well as the beneficiary office.

External Reference Number

[Mandatory, Numeric, 20]

Type the external reference number.

It is required to achieve transformation of file received from the beneficiary company in **Oracle FLEXCUBE** format.

Reference to Additional Terms & Condition Document

[Optional, Check Box]

Select the **Reference to Additional Terms & Condition Document** check box if additional set of agreement documents are to be provided to the payer.

3. Click the **Add** button.
4. Enter the beneficiary code and press the **<Tab>** key.

5. Enter the beneficiary name, merchant number and agreement number.
6. Select the agreement status from the drop-down list.
7. Enter the other beneficiary details, SC details and additional details.

20.6. BAM83 - MIS Xref Maintenance

Using this option you can link and maintain the MIS related information at the product, account and transaction level in **ORACLE FLEXCUBE**, since MIS is maintained in **FLEXCUBE Corporate**.

An MIS Class belonging to the Customer type helps you generate your profitability report for a customer. Similar reports can also be generated based on MIS Class belonging to transaction type . Maximum of 10 MIS classes can be defined at each of the customer, product and transaction level.

After linkage, these MIS codes are automatically linked by **FLEXCUBE** to the GL entries generated due to transaction posting on the accounts. These GL entries along with MIS information are handed over to MIS module from where MIS reports can be generated.

In **Oracle FLEXCUBE** system, MIS codes can be linked at three levels namely:

- Customer MIS- The bank may want a profitability report based on the type of industry (manufacturing, agriculture, mining, financial institutions, etc.) to which a customer belongs. To achieve this, the bank should define Industries as an MIS class, and link various MIS codes to the class for each industry type: manufacturing, agriculture, mining, financial institution, etc. This MIS class should be of Customer type. When a customer is created in FCR, the respective MIS code applicable for the respective MIS class is linked in **Customer Master Maintenance** (Fast Path: CIM09) option.
- Product MIS - The bank may want a profitability report based on the type of product (Vehicle Loan, Property loan, etc). To achieve this, the bank should define Product Type as an MIS class, and link various MIS codes to the class for each Product Type class: Automobile loan, Lorry loan, scooter loan, etc. This MIS class should be of Product type. When a product is created in FCR, the respective MIS code applicable for the respective MIS class is linked in MIS Xref Maintenance.
- Transaction MIS- The bank may want a profitability report based on the nature of transaction. MIS codes are linked at the transaction code level.

Definition Prerequisites

- [CHM01 - CASA Product Master Maintenance](#)
- [TDM01 - TD Product Master](#)
- [LNM11 - Product Master Maintenance](#)
- Transaction Code Maintenance
- MIS Class Code Maintenance
- MIS Code Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add MIS cross reference details

1. Type the fast path **BAM83** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > MIS > MIS Xref Maintenance**.
2. The system displays the **MIS Xref Maintenance** screen.

Field Description

Column Name

Description

MIS Class

[Display]

This column displays the list of MIS classes that are set up and downloaded from **FLEXCUBE Corporate** (FCC). MIS class code is an identifier for the kind of entity that is identified as the basis for MIS reporting.

You can define multiple codes under an MIS class. An MIS class in **FLEXCUBE Retail** can belong to one of the following types:

- Customer type - An MIS class belonging to the customer type helps you generate your profitability for a customer.
- Transaction type - MIS class belonging to the transaction type helps you generate your profitability report based on transactions.

MIS Code

[Mandatory, Drop-Down]

Select the code to be set up under an MIS class from the drop-down

list.

MIS cost code is an identifier for the notional cost of a transaction, which can be linked to an account or a contract. An MIS Code can be called an entity for which you want profitability reports. Each MIS Code will report to an MIS Class.

You can define a maximum of 10 codes under an MIS class.

Refinance Details

Refinance Rate From [Conditional, Radio Button]

Click the appropriate refinance rate from option.

The refinance (transfer pricing) rate is taken from a pool code or the account level has a specific refinance rate.

The options are:

- Pool Code
- Account Level

This field is enabled when **Account Number** option is selected in the **MIS Type** drop-down list.

Pool Code [Conditional, Pick List]

Select the pool code from the pick list.

This field is enabled only if the **Product Level** option is selected in the **MIS Type** field.

A pool is an entity that lends or borrows funds. It is useful for calculating refinance rates. A pool code is attached to an MIS Group.

Account Level Refinance Details

The account level refinance details are enabled only if the Account Level option is selected in the Refinance Rate From field.

Rate Type [Conditional, Drop-Down]

Select the account level refinance rate from the drop-down list.

The options are:

- Fixed
- Floating

Interest Index [Conditional, Pick List]

Select the account level refinance interest index from the pick list.

This field is enabled only if the **Rate Type** is selected as **Floating**.

Interest Rate [Display]

This field displays the refinance interest rate. It displays up to 10 digits after decimal.

Spread [Conditional, Numeric, Three, 10]

Type the spread/variance over the benchmark interest index. It accepts negative values. It displays up to 10 digits after decimal.

This field is enabled only if the **Rate Type** is selected as **Floating**.

Net Refinance Rate

[Conditional, Numeric, Three, 10]

Type the net refinance rate.

This field is enabled only if the **Rate Type** is selected as **Fixed**. It displays up to 10 digits after decimal.

If the floating rate type is selected, the net refinance rate is defaulted to net index rate and the spread.

MIS class code is an identifier for the kind of entity that is identified as the basis for MIS reporting.</p> <p>You can define multiple codes under an MIS class. An MIS class in FLEXCUBE Retail can belong to one of the following types:</p> <ul style="list-style-type: none">• Customer type - An MIS class belonging to the customer type helps you generate your profitability for a customer.• Transaction type - MIS class belonging to the transaction type helps you generate your profitability report based on transactions.
MIS Code	<p>[Display]</p> <p>This column displays the code to be set up under an MIS class.</p> <p>MIS cost codes is an identifier for the notional cost of a transaction, which can be linked to an account or a contract. An MIS Code can be called an entity for which you want profitability reports. Each MIS Code will report to an MIS Class.</p> <p>You can define a maximum of 10 codes under an MIS class.</p> <ol style="list-style-type: none">6. Click the Ok button.7. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the OK button.8. The MIS cross reference details are added once the record is authorised.

20.7. BAM91 - FIS Bank Params Maintenance*

Banks may have interface systems to support some of its operations for example loans against shares system, cash management system, payroll system, etc. In this case there will be accounting entries which will have to be passed in **Oracle FLEXCUBE** as the accounts are maintained in **FLEXCUBE**.

Using this option, a bridge GL will be the interface GL between the **FLEXCUBE** and the interface system to simplify the reconciliation process. The FIS interface flag in **Bank Master** option has to be ticked to enable this option.

Definition Prerequisites

- [BAM20 - Bank Codes Maintenance](#)
- [GLM02 - Chart of Accounts](#)

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add FIS bank parameters

1. Type the fast path **BAM91** and click **Go** or navigate through the menus to **Global Definitions > Other > FIS Bank Params Maintenance**.
2. The system displays the **FIS Bank Params Maintenance** screen.

21.3. BAM78 - Third Party Company Details

Using this option you can define a set of GL's for different company ID's like insurance company, notary etc. to track for third party fee transaction. You can collect the insurance/notary fees from the Loan/CASA accounts using the **Third Party Fee Collection** (Fast Path: BAM79) option and will be credited to the account payable GL defined in this option.

You can define the threshold days for unclaimed processing. This will be the number of days after which the funds will move from account payable GL to unclaimed GL, and account receivable GL to unclaimed receivable GL. The same GL's can be used for different company ID's. In the event of insufficient funds in the CASA account (CASA account in over line stage or the possibility of going to a over line stage by the fee debit) the accounts receivable GL defined for the company is debited for the amount unavailable in the CASA account (basically the short fall amount). **Oracle FLEXCUBE** will apply an internal hold on the CASA account for the amount unavailable and will attempt recovery of the hold on every BOD, the hold will be removed after recovery.

If the amount is not available in the CASA account, till the expiry of the threshold days for unclaimed processing, the hold on the CASA account will be automatically removed on the EOD when the threshold days expire. The shortfall amount that remains unrecovered in such cases will move to the expense GL. **Oracle FLEXCUBE** will recover the net available balance in CASA account on threshold expiry date, and debit the expense GL for unrecovered amount and credit the total to Account receivable GL.

Definition Prerequisites

- [GLM02 - Chart of Accounts](#)

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add third party company details

21.4. BAM79 - Third party Collection/Remittance

Using this option you can enter the Loan/CASA accounts for collection of insurance/notary fees for the selected company ID. You can input fees amount to be collected along with an appropriate narration.

The fee collected will be stored with the value date, company ID and account number, based on whether the fee is collected for a loan account or a CASA OD account. The amount collected is credited to the accounts payable GL which pertains to the company defined in the **Third Party Company details** (Fast Path: BAM78) option. On receipt of the bill from the third party company, you can input the Loan/CASA account number from which the fee was collected and select the company ID.

In the **Remit** tab, the system displays the original fee amount collected and the balance unremitted along with the transaction dates. You can reverse partial amounts from the account payable GL. These funds can be remitted to the company either by transfer to CASA account or by transfer to GL. The fee amount is debited from the account payable GL.

Definition Prerequisites

21.5. BA101 - Custom Functions Maintenance

Using this option, several custom functions are defined and applied through logical set of instructions (routines) for calculating values across various modules.

E.g. Bank may have a customized interest calculation method to be applied to all term deposits in post maturity stage. The calculation is hardcoded and stored as a routine in backend. System is directed to the requisite routine by a function maintained in this screen e.g. Post Maturity Interest routine. Similar functions are maintained for IC validations, penalty , service charges, etc.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete and Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To maintain custom functions

1. Type the fast path **BA101** and click **Go** or navigate through the menus to **Transaction Processing > Other > Custom Functions Maintenance**
2. The system displays the **Custom Functions Maintenance** screen.

21.7. BAM07 - Pay Receivable Account Maintenance

Using this option, pay and receivable accounts can be defined in **ORACLE FLEXCUBE** for each currency as a CASA account. Different pay and receivable accounts can be maintained for each external system.

Entries will be passed for all the Cross currency transactions done in **ORACLE FLEXCUBE** to the pay and receivable account by **Oracle FLEXCUBE** interface. The external systems will maintain the respective CASA pay and receivable account numbers to be used for posting the pay and receivable entries and reversal.

Definition Prerequisites

- CASA accounts with dedicated product types

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the pay receivable account

1. Type the fast path **BAM07** and click **Go** or navigate through the menus to **Global Definitions > Master > Pay Receivable Account Maintenance**.
2. The system displays the **Pay Receivable Account Maintenance** screen.

21.8. ECM01 - ECS Company Details Maintenance

ECS is a mode of electronic funds transfer from one bank account to another bank account, using the services of a Clearing House. It is normally used for Bulk Transfers from one account to many accounts or vice-versa. Using this option you can maintain the details of all companies/service providers (for e.g. utility companies) to whom the bank wants to provide bulk debit services. ECS service is provided to companies/ service providers which have been authorized by RBI.

Note: A company code cannot be deleted, if a ECS Mandate is maintained for a particular CASA account under the Company code.

Definition Prerequisites

21.9. LNM51 - Loan Product - CASA Product Xref for Offset

Oracle FLEXCUBE supports principal offset option for loan accounts. The principal offset option allows the system to deduct the existing credit balance of CASA account from the principal balance of loan account for the purpose of interest calculation on loan account.

Using this option you can create cross reference between a set of loan products and CASA products to support principal offset. Once the products are cross referenced, you can use the **Loan Account - Offset Account Xref** (Fast Path: LN051) option to link the CASA and loan accounts.

Definition Prerequisites

- [CHM01 - CASA Product Master Maintenance](#)
- [LNM11 - Product Master Maintenances](#)- Principal Offset Allowed check box selected

Modes Available

Add, Delete, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To create a cross reference between loan and CASA product

1. Type the fast path **LNM51** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Loan Account Transactions > Other Transactions > Loan Product - CASA Product Xref for Offset**.
2. The system displays the **Loan Product - CASA Product Xref for Offset** screen.

21.10. BA121 - Product/ MCA/ Sub Account Task Code Restriction Xref

In **Oracle FLEXCUBE**, during Day 0 setup a list of transaction mnemonics which are disallowed for certain products is maintained in the table `ba_prod_txn_mnem_xref`. These product level restrictions are propagated and are applicable to all the accounts opened under the products.

Using this option you can maintain a list of transaction mnemonics disallowed for a certain product codes. You can add the transaction mnemonics in case the same is not a part of the existing Day 0 list.

At the time of an online transaction, on entering the account number, system will validate whether the specific transaction mnemonic is disallowed for the product code of the account number entered. If the transaction mnemonic is allowed for that product code, then the transaction will be successfully completed or else an error will be displayed.

Definition Prerequisites

21.13. BA124 - Product- IB Transactions Restriction Xref

Using this option, user can setup and maintain product level restrictions. User can select the product and maintain the restrictions. If product level restrictions are maintained, this will get defaulted to account level during account opening. Account can be opened either using account opening APIs or bulk account opening GEFU or accounts (TD/RD) can be opened in the core batch.

User can modify,delete or inquire the new product level maintenance. The system can reject the transactions for all the accounts opened under that product.

Definition Prerequisites

21.14. BA125 - Product to Product Transfer Restrictions xref

This option is used to maintain the cross reference between 'To Product' and 'From Product'.

The customer can have only one active basic account (account opened under a product having product class as 'Basic Account') in bank. Hence, while doing MCA package transfer, system will reject the product transfer if the MCA package transfer is from non basic account to basic account and the customer is already having a basic account in open status in the bank.

21.15. BA126 - Product Class to Product Class Fund Transfer Restriction Xref

This option is used to maintain the fund transfer restriction between “To Product Class” and “From Product Class” (an account of FCY cash product class and other account of FCY remittance) product class and vice versa. This restriction will be applicable for all the products under the product classes irrespective of the currency of the products and can be maintained between different product classes of CASA and TD modules.

Following restrictions can be maintained using this screen:

- CASA to CASA online fund transfers
- CASA to CASA fund transfers done through GEFU
- CASA to CASA fund transfers done through Batch
- CASA Closeout withdrawal transfer to CASA
- TD Pay-in by transfer from CASA (Online, GEFU and batch)
- TD Redemption by transfer to CASA (Online and batch)
- TD Interest payout by transfer to CASA (Online and batch)
- TD Redemption by reinvestment to TD (Online and batch)
- TD Interest to payout by reinvestment to TD (Online and batch)
- TD to CASA - sweep in debit

22. Pricing Definitions

22.1. PR001 - Tier Look-up Definition

Using this option you can maintain tier definition codes. It can be tiered or non - tiered. The tiers for pricing are defined as per the business policy of the bank. Tiers can be set up on the basis of amount of loan, term of the loan or combination of both term and tenor. Tiers can also be maintained arbitrarily without following any basis. The tier definition is independent of the rate type and the tier criteria is always cumulative.

Tier definition is linked to a rate type by using the **Rate Chart Maintenance** (Fast Path: PR002) option. It can be linked either to a fixed rate or a variable rate or both portions of a rate chart, and can be reused across rate charts.

If any modifications are done to an existing tier look up definition, the changes are not reflected in the existing rate charts to which it is mapped. Only new rate charts created using the revised tier lookup definition are impacted. But if an existing rate chart is modified with a new effective date, the changes to the tier lookup definition used in that rate chart will be applicable.

Note: Tier lookup definition cannot be deleted if it is mapped to a rate chart.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the tier definition code

1. Type the fast path **PR001** and click **Go** or navigate through the menus to **Global Definitions > Pricing > Tier Look-up Definition**.
2. The system displays the **Tier Look-up Definition** screen.

9. The tier definition code is added once the record is authorised.

22.2. PR002 - Rate Chart Maintenance

The pricing setup calculates the margin of premium or discount that needs to be charged as per the defined evaluation parameter in the system. The evaluated margin is then added or deducted from the base rate maintained under rate chart. Using this option you can setup a rate chart. A rate chart is a combination of various price points guided by the tier criteria defined in the **Tier Look-up Definition** (Fast Path: PR001) option. Each tier look up definition needs to be linked to a rate type. You can define fixed or variable rate offering or a combination in a single rate chart.

If the pricing policy is tiered, then the pricing points of the rate chart are setup corresponding to the defined tiers. If the pricing policy is non-tiered, a single base rate as fixed/variable rate offering is defined.

Definition Prerequisites

- [PR001 - Tier Look up Definition](#)

Modes Available

Add By Copy, Add, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

option.

Start Term [Conditional, Numeric, Three]
Type the fixed start term.
The term defined in each slab is the start term of that slab.
The term range for each slab = Term defined in the subsequent slab – Term defined in the current slab.
For Example:
First slab: 12
Second slab: 24
Third slab: 36
The term range for first slab is from 12 to 23.
The term range for second slab will be 24 to 35
The term range for third slab will be any term >= 36
This field is enabled, if rate chart type is tiered and the **Tiered - Term Based** or **Tiered - Amount Term Based** option is selected from the **Tier Criteria** drop-down list in the **Tier Look-up Definition** (Fast Path: PR001) option.

Interest Index [Mandatory, Pick List]
Select the interest index code from the pick list.
The pick list displays the list of authorised index codes available for loan.
If the rate offering is tiered, then the base rate applicable for the amount/ tier is selected.
If the rate offering is non-tiered, then the single base rate is selected.

Interest Description [Display]
This column displays the description of the interest index code selected in the corresponding column.

Interest Rate [Display]
This column displays the interest rate applicable for the index code selected. It displays up to 10 digits after decimal.

Narration [Optional, Alphanumeric, 40]
Type the narration.

The amount defined in each slab is the start amount of that slab.

The amount range for each slab = Amount defined in the subsequent slab – Amount defined in the current slab

For Example:

First slab : 0

Second slab : 30,000

Third slab 50,000

The amount range for first slab is from 0 to 29999

The amount range for second slab will be 30000 to 49999

The amount range for third slab will be any amount >= 50,000

This field is enabled, if rate chart type is tiered and the **Tiered - Amount Based** or **Tiered - Amount Term Based** option is selected from the **Tier**

Criteria drop-down list in the **Tier Look-up Definition** (Fast Path: PR001) option.

Start Term	<p>[Conditional, Numeric, Three]</p> <p>Type the variable start term.</p> <p>The term defined in each slab is the start term of that slab.</p> <p>The term range for each slab = Term defined in the subsequent slab – Term defined in the current slab.</p> <p>For Example:</p> <p>First slab: 12</p> <p>Second slab: 24</p> <p>Third slab: 36</p> <p>The term range for first slab is from 12 to 23.</p> <p>The term range for second slab will be 24 to 35</p> <p>The term range for third slab will be any term >= 36</p> <p>This field is enabled, if rate chart type is tiered and the Tiered - Term Based or Tiered - Amount Term Based option is selected from the Tier Criteria drop-down list in the Tier Look-up Definition (Fast Path: PR001) option.</p>
Interest Index	<p>[Mandatory, Pick List]</p> <p>Select the interest index code from the pick list.</p> <p>The pick list displays the list of authorised index codes available for loan.</p> <p>If the rate offering is tiered, then the base rate applicable for the amount/ tier is selected.</p> <p>If the rate offering is non-tiered, then the single base rate is selected.</p>
Interest Description	<p>[Display]</p> <p>This column displays the description of the interest index code selected in the corresponding column.</p>
Interest Rate	<p>[Display]</p> <p>This column displays the interest rate applicable for the index code selected. It displays up to 10 digits after decimal.</p>
Narration	<p>[Optional, Alphanumeric, 40]</p> <p>Type the narration.</p>

10. Click the **Ok** button.
11. The system displays the message "Record Added... Authorisation Pending..". Click the **Ok** button.
12. The rate chart details are added once the record is authorised.

22.3. PR003 - Rate Chart Validity Maintenance

Using the **Rate Chart Maintenance** (Fast Path: PR002) option, you can define fixed or variable or a combination of both type of rates in a single rate chart. The fixed rates defined in a rate chart are offered for a certain period. Using this option, you can define the offer closure date and the rate expiry date for a rate chart. These dates are applicable only for the fixed rate offered in the rate chart.

If the validity period is set for a rate chart, the fixed rate is applicable on the loan from the date of disbursement to the expiry date of the rate. Any modifications to the validity period impacts all new loan accounts opened and existing loan accounts are impacted only during the rate chart (product) swaps.

Definition Prerequisites

- [PR002 - Rate Chart Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To define rate chart validity period

1. Type the fast path **PR003** and click **Go** or navigate through the menus to **Global Definitions > Pricing > Rate Chart Validity Maintenance**.
2. The system displays the **Rate Chart Validity Maintenance** screen.

22.4. PR004 - Margin Codes Setup

Using this option you can define margin codes. The margin codes are mapped against the parameters maintained in the **Evaluation Rule Maintenance** (Fast Path : PR007) option. The margins can be linked in the Evaluation rule only if they are effective on that day. Any changes to the margin will impact only new loan accounts opened using the revised margins. You can modify the margin percentage with a new effective date, but the changes to the attributes of the margin code will come into effect only on the effective date.

Definition Prerequisite

22.5. PR005 - Discount Rate setup

Banks can offer rate discounts to customers through account level variance or product level variance. However interest rates can be defined as fixed or variable. Using this option you can setup discounts for various base rates. You can setup multiple discounts for various base rates with different effective dates. Any modifications to the existing discounts is applicable only on new loan accounts.

Note: For discontinuing offering the discounts, the discount structure should be maintained as zero with a new effective date.

22.6. PR006 - Evaluation Parameter Setup

Using this option you can maintain evaluation parameters. Any attribute of the loan which plays a role in determination of the price offering for the loan, is set as an evaluation parameter. The evaluation parameter can be a system parameter i.e. present in **Oracle FLEXCUBE** or an external parameter such as Rate Type, Loan Total term, Loan Amount etc. The parameters defined through this option are then used to set a evaluation rule using the **Evaluation Rule Maintenance** (Fast Path: PR007) option. Depending upon the evaluation parameters and the evaluation rule defined, the pricing setup calculates the pricing value for a product.

Note: You can modify or delete existing parameters only if they are not used in the evaluation rule for rate chart / margin/ discount.

Definition Prerequisites

- [PR009 - Pricing Lookup Maintenance](#)

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add the evaluation parameters

1. Type the fast path **PR006** and click **Go** or navigate through the menus to **Global Definitions > Pricing > Evaluation Parameters Setup**.
2. The system displays the **Evaluation Parameters Setup** screen.

22.7. PR007 - Evaluation Rule Maintenance

Using this option you can create evaluation rule for the determination of rate chart, margin and discount. The evaluation rule is executed for determination of the appropriate rate chart, margin and discount on the loan account as per the parameters defined in the **Evaluation Parameter Setup** (Fast Path: PR006) option. Multiple evaluation rules can be maintained for each rate chart, margin and discount eg. you can set multiple evaluation rules, for each line of business within loans like mortgages, personal loans etc. A grid is formed for each combination of the parameter values. The bank maintains a rate chart / margin / discount only for applicable combination of parameter values.

22.9. PR009 - Pricing Lookup Maintenance

Using this option you can create and set values for user defined parameters which play a role in determination of the price offering for the loan. The properties of the parameter created in this option is defined in the **Evaluation Parameter Setup** (Fast Path: PR006) option.

Definition Prerequisites

Not Applicable

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to [Standard Maintenance Procedures](#).

To add lookup type details

1. Type the fast path **PR009** and click **Go** or navigate through the menus to **Global Definitions > Pricing > Pricing Lookup Maintenance**.
2. The system displays the **Pricing Lookup Maintenance** screen.

Pricing Lookup Maintenance

The screenshot shows the 'Pricing Lookup Maintenance*' application window. At the top, there are two input fields: 'Lookup Type:' and 'Lookup Type Description:'. Below these is a table with two columns: 'Lookup Code' and 'Lookup Description'. The table is currently empty. At the bottom of the table area, there are two small buttons: a plus sign (+) and a minus sign (-). Below the table is a 'Record Details' section with five fields: 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. At the very bottom, there is a row of radio buttons for different modes: 'Add By Copy', 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry' (which is selected). To the right of the radio buttons are four buttons: 'UDF', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
Lookup Type	[Mandatory, Alphanumeric, 40] Type the evaluation parameter which will determine eligible rate offerings.
Lookup Type Description	[Mandatory, Alphanumeric, 40] Type additional information of the evaluation parameter.

Column Name	Description
Lookup Code	[Mandatory, Alphanumeric, 40] Type the lookup code. It is the value of the evaluation parameter.
Lookup Description	[Mandatory, Alphanumeric, 40] Type the description for the lookup code.

3. Click the **Add** button.
4. Enter the lookup type and description for the lookup type.
5. Click the **+** button to add the details.
6. Enter the lookup code and the description.

22.10. PR010 - Subsidy Margin Codes Setup

Using this option you can setup subsidy margin codes. These codes are then attached while creating a loan account. Subsidy can be granted for full or partial loan term. The system validates that the subsidy term is less than or equal to the term of the loan account being attached.

While opening an account you can only attach the subsidy codes that are active on the current process date. For backdated account opening the system validates whether the plan was available on the backdate.

Definition Prerequisites

23. Attributes

23.1. APM01 - Attributes Parameter Maintenance

This maintenance is used to define attribute at various levels and also for defining the transaction behavior when this attribute is present at customer, sub-account, card, passbook or certificate.

The attribute levels are as follows –

- Customer
- Sub-account
- Card
- Passbook
- Certificate

First Attribute ID will be 1 after which it will be a running serial number.

Incase if any row is deleted in between during addition of attributes then accordingly the attribute ID will change.

Attribute based transaction behavior (disallow debit/disallow credit) is applicable for CASA, TD and RD accounts. Also, such transaction behavior based on attribute will be validated for both online and batch transactions.

Modes Available

ADD, Modify, Cancel, Amend, Authorize, Inquiry.

To maintain attributes parameter

1. Type the fast path **ACM01** and click **Go** or navigate through the menus to **Global Definitions > Master > Attributes Parameter Maintenance**.
2. The system displays the **Attributes Parameter Maintenance** screen.

 This field will be auto populated.

Attribute Name

[Mandatory,Input,Alphanumeric,120]

Enter the name of the attribute.

Disallow Debit

[Optional]

Specify 'Y' to disallow debit transactions when this attribute is present.

By default the value will be 'N'.

Card, passbook and certificate attribute will be validated only if transaction is being done using card number/passbook number/certificate number.

Disallow Credit

[Optional]

Specify 'Y' to disallow credit transactions when this attribute is present.

By default the value will be 'N'.

Card, passbook and certificate attribute will be validated only if transaction is being done using card number/passbook number/certificate number.

Delete

[Optional]

Specify 'Y' to delete a particular attribute. By default the value will be 'N'.

This field will be available only in add mode.

3. Click the **Add** radio button to add new record.
4. Enter the appropriate details & click the OK button.
5. The new record will get added once it is authorized.

23.2. APM02 - Attribute Channel Exception Maintenance

This maintenance is used to define channel exception for an attribute at various levels i.e. at customer, sub-account, card, passbook or certificate.

If an attribute is maintained for a particular channel in this screen, then that particular attribute will not be validated when transaction is done through that particular channel. E.g. If channel is maintained as 'branch', attribute level as 'Sub account' and attribute ID as 'Court order', then while doing a transaction through branch channel on a sub account having attribute 'court order', attribute will not be validated for disallow debit/credit behavior.

Definition Prerequisites

[APM01 - Attributes Parameter Maintenance](#)

Modes Available

Add, Modify, Delete, Inquiry.

To maintain Attribute Channel Exception

1. Type the fast path **APM02** and click **Go** or navigate through the menus to **Global Definitions > Master > Attribute Channel Exception Maintenance**.
2. The system displays the **Attribute Channel Exception Maintenance** screen.

23.3. APM03 - Attributes Co-existence Restriction Maintenance

This maintenance is used to define co-existence restriction for attributes at various levels i.e. at customer, sub-account, card or passbook, certificate.

E.g. Assume that attribute level is 'customer', attribute name is 'court order', restricted attribute level is 'sub account ' and restricted attribute name is 'stop payment'. Then, if customer is applied with attribute 'court order' sub accounts under that particular customer ID cannot be applied with restricted attribute 'Stop payment'.

An upload is also provided for maintaining the co-existence restriction in bulk. Every time this upload is done through file upload (FP: BA452), existing data will be overwritten.

Definition Prerequisites
