2. Login

Using the **Login** screen user can log on to the Oracle FLEXCUBE Direct Banking application. By default, the security keyboard option is checked. This enables the user to access the interface through a virtual keyboard appearing on the screen by either clicking or hovering on the keys. Alternatively, the user can clear the security keyboard option and can use the keyboard. Security Keyboard can be used only for **Password** field.

To log on to the Oracle FLEXCUBE Direct Banking application

1. Enter the appropriate URL of the application provided in the address bar of browser.
2. The system displays the login screen of the **Oracle FLEXCUBE Direct Banking** application.

4. Click the **Sign In** button to log in to the application. The system displays the home page.

3. Role Management

3.1. Create Role

Using the **Create Role** option, the corporate administrator can create roles. By creating a role, an administrator can map various transactions to the user types/channels. Corporate administrator can create role only from the transactions assigned to the customer profile while creating/modifying the customer profile.

Note: Role Created by Corporate admin can only be modified by corporate admin.

To create a role

Logon to the **Internet Banking** application.

1. Navigate through the menus to **Admin Transactions > Create Role**. The system displays the **Create Role** screen.

Create Role

7. Click the **OK** button. The system displays the **Create Role** screen.

3.2. Modify Role

Using the Modify Role option, the corporate administrator can modify an active role for the accessible user types and channels. The administrator can search for the required role by entering the search criteria. The system displays all the transactions specified under the role on modify role initiation. The corporate administrator can add/remove the transactions from only those roles which are created by the corporate administrator. Thus, only roles created by corporate admin can be modified by the corporate administrator. Only those transactions can be added to the role which is mapped to the customer profile of the corporate administrator.

To modify a Role

1. Logon to the **Internet Banking** application.
2. Navigate through the menus to **Admin Transactions > Modify Role**. The system displays the **Modify Role** screen.

Modify Role

It allows you to change/modify transaction types and access levels (initiation/authorization/view) assigned to a selected role

7.2. Manage Rules

Using the **Manage Rules** option, the corporate administrator can manage the authorisation rules.

To manage a rule

1. Logon to the **Internet Banking** application.
2. Navigate through the menus to **Admin Transactions > Manage Rule**. The system displays the **Manage Rules** screen.

Manage Rules

The screenshot shows the 'Manage Rules' interface. At the top right, the timestamp is '13-01-2011 14:57:02 GMT +0530'. Below the header, there is a search bar containing 'User Type: CORPORATE USER'. At the bottom right, there are three buttons: 'View | Modify' and 'Create'.

Field Description

Field Name	Description
User Type	[Display] This field displays the user type for which the rule is to be created.

3. Click the **View/ Modify** button. The system displays the **Manage Rules** screen with the search result.
OR
Click the **Create** button. The system displays the **Manage Rules - Create** screen

Manage Rules

The screenshot shows the 'Manage Rules - Create' interface. At the top right, the timestamp is '23-08-2010 00:10:42 GMT -1000'. The form contains the following fields and options:

- Entity: FLEXCUBE DIRECT BANKING
- User Type: CORPORATE USER
- Customer Id: 333000028
- Rule ID generated by the application
- Note: * -- Internet Channel, ^ -- SMS Banking (Mobile), + -- Browser Based Mobile, # -- Java Application Based Mobile
- Define Rule:**
 - Maker: All
 - Customer Id: All
 - Transaction: All
 - Branch: All
 - Account ID: All
 - Currency: US DOLLAR(USD)
 - Amt From: []
 - Amt To: []
- Authorisation Required:
- List ID: [Select] (repeated five times)

At the bottom right, there are 'Back' and 'Create' buttons.

Field Description

Field Name	Description
Entity	[Display] This field displays the name of the entity.
User Type	[Display] This field displays the type of the user.
Customer Id	[Display] This field displays the customer ID.
Define Rule	
Maker	[Optional, Drop-Down] Select the maker user from the drop-down list. If no maker user ID is specified, then this rule is applied to all the users for the selected corporate ID.
Customer Id	[Optional, Drop-Down] Select the customer ID from the drop-down list.
Transaction	[Optional, Drop-Down] Select the type of transaction from the drop-down list.
Branch	[Optional, Drop-Down] Select the branch from the drop-down list. The drop-down lists all the branches where the linked accounts are opened.
Account ID	[Optional, Drop-Down] Select the account ID from the drop-down list.
Currency	[Mandatory, Drop-Down] Select the currency from the drop-down list in which the authorization limit is to be defined.
Amt From	[Mandatory, Numeric, 11] Type the minimum transaction amount. Enter this amount, if amount-based authorisation criterion is to be set.
Amt To	[Mandatory, Numeric, 11] Type the maximum transaction amount. Enter this amount, if amount-based authorisation criterion is to be set.

Field Name	Description
Authorization Required	[Optional, Check Box] Select the Authorization Required check box to set the rule for authorization.

8.2. User BTID Map

Using this option you are allowed to assign the bulk file template. In addition it allows setting up of the sensitive data check. Mapping of BTID is a mandatory step for you to enable the step of uploading the file. You can map only bulk file templates which are mapped to the primary customer ID.

For Bulk Registration:

Navigate through **Bulk Management > User BTID Map**.

Note: If the **User BTID Mapping required** check box in **User Profile** is not selected, you would not be available in this transaction. All the Bulk Types mapped to the customer in **Bulk Registration** would be available by default. This option allows you to map/un map the bulk transaction ID's.

10. Mail Box

The Mailbox option is an integrated communication system within the internet banking system for you to communicate with the bank and vice versa. It allows you to view all the notifications, alert messages and general messages sent by the bank; allows you to send messages to the bank and view the sent messages.

Like popular e-mail clients that you may have used, the Mailbox offers an Inbox - where you can view messages and notifications sent to you, a Send Message facility using which you can send messages to the bank and a Sent folder, which allows you to view all the sent items.

Mail Box functionality is subdivided into the following sub-sections:

- Viewing received messages (Inbox)
- Viewing sent messages (Sent Messages)
- Sending messages(Compose)

10.1. Viewing Received Message

The Inbox folder stores all the bulletin messages sent to you. You can view the individual messages by clicking on the sender's name. The following procedure explains the steps to access Inbox and view a message stored within it.

Messages

Mailbox 23-08-2010 16:31:51

10.3. Sending Messages

To communicate with the bank authorities, the Mailbox offers a message sending option. You can write about any problems that you may have faced, errors in the system, transactions that may have not completed and any other issues and address them to the bank. It is a very effective method of communicating with the bank.

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.
