2. Introduction

The dash board of a business user displays all the transactions that have been initiated or any action has been taken on the transaction by the user.

The Authorization transaction is useful in case of a business user needs to get its transactions authorized by a higher authority. The authorization transaction helps reduce the level of risk and increase the security thereby reducing the chances of wrong transactions being authorized by a corporate user with wrong amount or wrong data.

Business user Authorization works on the Maker Checker concept wherein a maker i.e. initiator of the transaction initiates the transaction. The rule is created stating what type of transactions will go for authorization to what level of authorizers. Thus the transactions are available for authorization to the respective authorizers.

The types of Authorizations are defined on day zero like sequential or non sequential Authorization depending upon the number of Authorizers. While creating the rules for authorization one can also define the number of authorizers in a list for authorization.

The Business user Authorization transaction includes transactions like Initiated transactions, View transactions, View Drafts and Templates, View Authorization Transactions.

3. Initiated Transactions

This transaction displays all self initiated transactions along with the current status of the transactions & number of transaction count for each type with specific status.

To view initiated transactions

1. Log on the **Internet Banking** Application
2. Navigate through the menus to **Transaction Activities > Transactions.** The system displays **View Initiated Transactions** screen.

View Initiated Transactions

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.
