U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

# **Table of Contents**

| 1. Preface                                       |   |

|  |   |

# 1. Preface

# 1.1. Intended Audience

This document is intended for the following audience:

- Customers
- Partners

# 1.2. Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc</a>.

# 1.3. Access to OFSS Support

https://support.us.oracle.com

# 1.4. Structure

This manual is organized into the following categories:

*Preface* gives information on the intended audience. It also describes the overall structure of the User Manual

Chapters are dedicated to individual transactions and its details, covered in the User Manual

# 1.5. Related Information Sources

For more information on Oracle FLEXCUBE Core Banking Release11.5.0.0.0, refer to the following documents:

Oracle FLEXCUBE Core Banking Licensing Guide

# 1.1. 8057 - Safe Box Allotment

Using this option you can allot a safe deposit box.

When a new safe deposit box is being allotted, the transaction processing application performs a check, using the given Customer IC and the category type, on the centralized customer information database.

A maximum of three customers can be related to a safe deposit box at the time of account opening.

The account opening includes the following steps:

- Check for customer existence: Check existence of all the customers linked to the account.
- Open Account: Allot a new safe deposit box using the Safe Box Allotment Screen option.
- Specify Account Operating Instructions.
- Customer Account Linking: A maximum of three customers can be linked to the account using this option. If there are more than three customers to be linked to the account, the same needs to be linked using the Customer Account Relationship Maintenance (Fast Path: CI142) option.

#### **Definition Prerequisites**

- BAM17 Branch Type Maintenance
- CHM01 CASA Product Master Maintenance
- BAM97 Currency Codes Cross Reference
- BAM30 Tax Codes Maintenance
- CIM08 Customer Type Maintenance
- 8053 Customer Addition
- CI142 Customer Account Relationship Maintenance
- IVM01 Stock Codes
- SBM01 Safe Deposit Box product and inventory cross reference
- IVM03 Inventory Branch Cross Reference
- IVM04 Stock Branch Cross Reference
- IV001 Stock Transactions

#### Modes Available

Not Applicable

#### To allot a safe box deposit

- 1. Type the fast path **8057** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Safe Box Allotment**.
- 2. The system displays the Safe Box Allotment screen.

| Field Name   | Description  |
|--------------|--|
| Branch Name  | [Display]  |
|              | This field displays the branch name in which the account is opened.  |
|              | The account opening procedure can be either centralized or<br>decentralized. In a centralized setup, one centralized<br>processing center will open accounts for all branches of a<br>region. The user has to select the name of the centralized<br>processing branch in case of centralized setup for account<br>opening. In Decentralized setup, the transaction processing<br>branch name is displayed. |
| Product Name | [Mandatory, Drop-Down]   |
|              | Select the product name under which the account is to be opened from the drop-down list.   |
|              | The drop-down list has a list of authorised SDB account products available for the selected branch. SDB account products are defined using the <b>CASA Product Master</b><br><b>Maintenance</b> (Fast Path: CHM01) option.   |

| Field Name           | Description  |  |  |  |  |  |
|----------------------|--|--|--|--|--|--|
| Product Ccy          | [Display]  |  |  |  |  |  |
|                      | This field displays the currency assigned to the product at the time of product definition.  |  |  |  |  |  |
|                      | This is the default currency for the product and cannot be modified.   |  |  |  |  |  |
| A/C No               | [Display]  |  |  |  |  |  |
|                      | This field displays the account number at the time of account opening, if the account number generation is set as Automatic.   |  |  |  |  |  |
|                      | The structure of the account number can be defined according to the requirements of the bank.  |  |  |  |  |  |
| A/C Title            | [Display]  |  |  |  |  |  |
|                      | This field displays the account title.   |  |  |  |  |  |
|                      | The account title is defaulted to the short name of the primary customer.  |  |  |  |  |  |
|                      | This field is displayed on successful account creation.  |  |  |  |  |  |
| Serial No            | [Display]  |  |  |  |  |  |
|                      | This field displays the serial number, if the automatic account generation is enabled for the bank.  |  |  |  |  |  |
|                      | Type the appropriate serial number if automatic account generation is disabled for the bank.   |  |  |  |  |  |
| Doing Business       | [Optional, Alphanumeric, 100]  |  |  |  |  |  |
| As(DBA)              | Type the description which indicates the operating relationship of the customer at the account level.  |  |  |  |  |  |
| Customer Information |  |  |  |  |  |  |
| Customer IC          | [Mandatory, Pick List]   |  |  |  |  |  |
|                      | Type the identification code of the customer.  |  |  |  |  |  |
|                      | A customer IC along with customer type is a unique method<br>of customer identification across the bank (covering all<br>branches). Based on the IC and Customer Type, the system<br>can identify the customer as an existing customer even when<br>the customer opens a new account in another branch. A<br>social security number, passport number, birth certificate or<br>corporate registration can be used as a customer IC. |  |  |  |  |  |

| Field Name       | Description   |
|------------------|---|
| Category         | [Mandatory, Drop-Down]  |
|                  | Select the category of the customer from the drop-down list.  |
|                  | For example, Tax Paying Individual, Church, Foreign<br>Corporate, etc. A user can select multiple customer types to<br>segregate the customers using the <b>Customer Types</b><br><b>Maintenance</b> (Fast Path: CIM08) option. Further processing<br>such as tax applicable, SC charges, etc., are levied based on<br>the customer type. |
| ІС Туре          | [Display]   |
|                  | The IC type of the customer, based on the category to which the customer belongs.   |
|                  | It is maintained in the <b>Customer Types Maintenance</b> (Fast Path: CIM08) option.  |
| Short Name       | [Display]   |
|                  | This field displays the short name of the customer displayed from the <b>Customer Addition</b> (Fast Path: 8053) option.  |
|                  | The customer short name can be changed through the <b>IC No – Short Name Change</b> (Fast Path: 7101) option.   |
| Birth / Reg Date | [Display]   |
|                  | This field displays the birth or registration date of the customer after validation.  |
|                  | If the customer already exists, then the Birth/Reg Date is displayed. Else the <b>Customer Addition</b> (Fast Path: 8053) option is displayed where more details about the customer can be entered.   |
| Relations        | [Mandatory, Drop-Down]  |
|                  | Select the appropriate relation from the drop-down list.  |
|                  | The customer is linked to the account by way of a relations tag.  |
|                  | This list contains different relations. For example, Sole Owner, Joint And First, Joint and Other and other relations.  |
|                  | For successful account opening transaction, a customer with primary relationship viz. Sole Owner, Joint And First, or Joint Or First must be linked.  |
|                  | If primary relationship linked is Joint And First or Joint or First, customer with secondary relationship viz. Joint and other or Joint or other must be linked to the account.   |
|                  | A maximum of three customers can be linked to an account<br>in the account-opening screen. <b>Customer Account</b><br><b>Relationship Maintenance</b> (Fast Path: Cl142) option can be<br>used to attach additional customers to the accounts.  |

| Field Name            | Description   |
|-----------------------|---|
| Customer ID           | [Display]   |
|                       | This field displays the customer ID.  |
|                       | A customer ID is an identification number, generated by the<br>system after customer addition is completed successfully.<br>This running number, unique to a customer across the<br>system, is generated after the system has identified the<br>customer IC and Customer Category combination to be non-<br>existent in the system. This ID is used for searching and<br>tracking the customer in the system. |
| Officer ID            | [Mandatory, Drop-Down]  |
|                       | Select the officer ID from the drop-down list.  |
|                       | Each account can be assigned to a separate officer. The officer who is assigned to an account will act as the relationship officer for the account.   |
|                       | The officer ID are created using the User Profile Maintenance (Fast Path: SMM02) option.  |
| Date of               | [Optional, dd/mm/yyyy]  |
| Allotment(dd/mm/yyyy) | Type the process date of allotment of the safe deposit box to the customer.   |
| Rental Period (in     | [Mandatory, Numeric, Two]   |
| months)               | Type the period for which the SDB is allocated to the customer.   |
| Date of               | [Display]   |
| Expiry(dd/mm/yyyy)    | This field displays the date on which the validity of the safe deposit box ends.  |
|                       | The expiry date depends on the rental period and is displayed accordingly.  |
| Number of Rentals to  | [Mandatory, Numeric, Three]   |
| be waived             | Type the number of rentals to be waived.  |
|                       | The waiver would include the rental portion only and not the allotment fees. The number of rentals once entered cannot be modified later. However if required, the period can be extended by using the <b>SC Package Changes at Account</b> (Fast Path: SCM03) option to waive for a further period.  |
| Deposit Amount        | [Mandatory, Numeric, 10]  |
|                       | Type the amount of deposit paid by the customer to avail of the SDB facility.   |
|                       | The deposit amount will be returned to the customer on SDB closure.   |
| Deposit Remarks       | [Mandatory, Alphanumeric, 30]   |
|                       | Type the remarks related to the SDB deposit made.   |

- 3. Select the product name from the drop down list.
- 4. Select the customer IC and the relation.
- 5. Click the Val. Customer button.
- 6. For an existing customer, the system displays the message "Existing Customer...Proceed with data entry".
- 7. Click the **Ok** button to open another account for the existing customer.
- 8. Select the officer ID from the drop-down list and enter the rental period in years and the number of rentals to be waived.
- 9. Enter the deposit amount and remarks.

- 10. Click the **Ok** button.
- 11. The system displays the message "Authorisation required. Do You Want to Continue?". Click the **Ok** button.
- 12. The system displays the Authorization Reason screen.
- 13. Enter the relevant information and click the Grant button.
- 14. The system displays the account number. Click the **Ok** button.

# 1.2. SB001 - Safe Box Usage Log

Using this option, you can capture the time and other relevant details of the safe box operation. You can enter the details related to safe box user and witness details. The system also provides safe box details such as safe box type, date of allotment, date of expiry, safe box status, etc.

The witness / user details tab displays the details of the witness or user for the action of access or drill respectively. However, the witness details are mandatory to maintain at the time of drilling operation.

#### **Definition Prerequisites**

• 8057 - Safe Box Allotment

#### Modes Available

Add By Copy, Add, Modify, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

#### To add safe box usage log

- Type the fast path SB001 and click Go or navigate through the menus to Transaction Processing > Account Transactions > SDB Account Transactions > Other Transactions > Safe Box Usage Log.
- 2. The system displays the Safe Box Usage Log screen.

# 1.3. SB002 - Customer Waitlist

Using this option you can maintain the list of prospective customers who have requested for safe boxes.

You can also capture, modify, delete or inquire the customers who have requested for the safe boxes. It is maintained at branch level. The teller can also maintain the priority for safe box allotment and the priorities are high, medium and low.

#### **Definition Prerequisites**

- 8053 Customer Addition
- 8057- Safe Box Allotment

#### Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

#### To add a customer waitlist

- 1. Type the fast path **SB002** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Waitlist**.
- 2. The system displays the **Customer Waitlist** screen.

| Customer | Waitlist |

### **Field Description**

| Field Name              | Description  |
|-------------------------|--|
| Serial Number           | [Display]  |
|                         | This field displays the serial number.   |
|                         | The serial number is a unique number generated by the system.<br>The number will be incremental for each safe box. |
| Date of Logging         | [Mandatory, Pick List, dd/mm/yyyy]   |
|                         | Select the date on which the branch logs in the details of the customer, from the pick list.                       |
| Safe Box Type           | [Mandatory, Drop-Down]   |
|                         | Select the type of safe box from the drop-down list.   |
| Branch                  | [Mandatory, Pick List]   |
|                         | Select the branch in which the customer has the safe box from the pick list.                                       |
| Existing Customer       | [Optional, Check Box]  |
|                         | Select the <b>Existing Customer</b> check box if the customer is an existing customer.                             |
| Allocation Priority     | [Mandatory, Drop-Down]   |
|                         | Select the priority in which the safe box will be allocated from the drop-down list.                               |
|                         | The options are:   |
|                         | • High   |
|                         | Medium   |
|                         | • Low  |
|                         | By default the system displays the priority as Medium.   |
| <b>Customer Details</b> |  |
| All the customer inform | nation related fields are Display fields for an existing customer.   |
| Search Criteria         | [Conditional, Drop-Down]   |
|                         | Select the search criteria to search for the customer from the drop-down list.                                     |
|                         | This field is enabled if the <b>Existing Customer</b> check box is selected.                                       |
|                         | The options are:   |
|                         | Customer short name: The short name of the customer.   |
|                         | Customer Ic: The unique code for customer identification.  |

• Customer ID: The unique identification given by the bank.

| Field Name    | Description  |
|---------------|--|
| Search String | [Conditional, Alphanumeric, 20]  |
|               | Type the search string, to search for a customer, corresponding to the search criteria selected in the <b>Search Criteria</b> field.   |
|               | This field is enabled if the <b>Existing Customer</b> check box is selected.   |
|               | If the search criterion is specified as customer's short name or<br>customer IC. then any part of the short name or customer Ic. can<br>be entered. The system displays the pick list of all those<br>customers having those letters in their respective criteria. |
|               | Select the appropriate customer from the existing customer list.   |
|               | For example, The customer's short name is George Abraham.<br>One can search the above customer by entering Geo in the<br><b>Search String</b> field.   |
| Customer ID   | [Display]  |
|               | This field displays the unique customer identification number assigned to the customer.  |
| Name          | [Conditional, Alphanumeric, 40]  |
|               | Type the full name of the customer.  |
|               | The name of the customer is displayed, if the <b>Existing Customer</b> check box is selected.  |
| Address1      | [Conditional, Alphanumeric, 35]  |
|               | Type the first line of the address of the customer.  |
|               | The address of the customer is displayed, if the <b>Existing</b><br><b>Customer</b> check box is selected.   |
| Address2      | [Conditional, Alphanumeric, 35]  |
|               | Type the second line of the address of the customer.   |
|               | The address of the customer is displayed, if the <b>Existing</b><br><b>Customer</b> check box is selected.   |
| Address3      | [Conditional, Alphanumeric, 35]  |
|               | Type the third line of the address of the customer.  |
|               | The address of the customer is displayed, if the <b>Existing</b><br><b>Customer</b> check box is selected.   |
| City          | [Conditional, Alphanumeric, 35]  |
|               | Type the name of the city or emirate where the customer resides.   |
|               | The address of the customer is displayed, if the <b>Existing</b><br><b>Customer</b> check box is selected.   |

| Field Name   | Description  |
|--------------|--|
| Zip          | [Conditional, Numeric, Five, Four]   |
|              | Type the zip code of the city where the customer resides.  |
|              | The zip code is displayed, if the <b>Existing Customer</b> check box is selected.  |
|              | It is divided into two sections. The first section contains the first 5 numeric characters (this is the basic zip code) and the second part contains the remaining 4 numeric characters of the zip code. |
| Country      | [Conditional, Pick List]   |
|              | Select the name of the country where the customer resides from the pick list.  |
|              | The country name is displayed, if the <b>Existing Customer</b> check box is selected.  |
| State        | [Conditional, Pick List]   |
|              | Select the name of the state or emirate where the customer resides from the pick list.   |
|              | The state name is displayed, if the <b>Existing Customer</b> check box is selected.  |
| Phone Number | [Conditional, Numeric, Three, Three, Four]   |
|              | Type the phone number of the customer.   |
|              | The phone number of the customer is displayed, if the <b>Existing Customer</b> check box is selected.  |
| E-mail       | [Conditional, Alphanumeric]  |
|              | Type the e-mail address of the customer.   |
|              | The e-mail address of the customer is displayed, if the <b>Existing</b><br><b>Customer</b> check box is selected.  |
| Remarks      | [Optional, Alphanumeric, 40]   |
|              | Type the remarks for the event.  |

- 3. Click the **Add** button.
- 4. Select the safe box type, branch and the allocation priority from the drop-down list.
- 5. Select the search criteria from the drop-down list.
- 6. Enter the search string and press the **<Tab> or <Enter>** key and select the customer from the pick list.
- 7. Enter the remark for the waitlist customer.

# 1.5. 1701 - Rent Payment Inquiry

Using this option you can pay rent for a safe deposit box.

The modes of rent payment are:

- Cash
- Cheque
- Account Transfer
- GL

Depending on the option selected in the Payment Mode drop-down list, the system displays the relevant transaction screen and requisite particulars have to be eneterd. You can also perform a backdated rent payment but the mode supported for this back dated credit will be through GL only.

#### **Definition Prerequisites**

- BAM97 Currency Codes Cross Reference
- BAM32 Transaction Rate Cross Reference
- 8051 CASA Account Opening
- 8057- Safe Box Allotment Screen
- STM59 Settlement Bank Parameters
- STM54 Routing Branch Maintenance

#### Modes Available

Not Applicable

#### To view rent payment

- Type the fast path 1701 and click Go or navigate through the menus to Transaction Processing > Account Transactions > SDB Account Transactions > Transfer > Rent Payment Inquiry.
- 2. The system displays the Rent Payment Inquiry screen.

|                              | The amount displayed in this field would be a total of all charges<br>other than rent and penalty. However, the bifurcation can be seen<br>in the enquiry mode of charges history of the usage screen.   |
| Penalty Arrears              | [Display]  |
|                              | This field displays the calculated penalty arrears that have been charged to the account.  |
|                              | This field will be showing the total of the penalty amount which is<br>due till date. Since the penalty is always on cash basis, there<br>would be no accrued penalty arrears. The method of calculation<br>of penalty is mentioned under SC head. |
| Allocation Fee               | [Display]  |
|                              | This field displays the allocation fee, if any, that is payable by the customer.   |
|                              | Once the allocation fee has been paid, then the value displayed in this field will be zero.  |
| UnBilled Penalty<br>Interest | This field is for future use.  |
| Upto                         | This field is for future use.  |
| Payment                      |  |
| Total Due                    | [Display]  |
|                              | This field displays the total amount due from the customer.  |
| 3. Enter the allotr          | ment number and press the <b><tab> or <enter></enter></tab></b> key.   |

4. Select the payment mode, number of advance rents and the penalty from the drop-down list.

#### **Rent Payment Inquiry**

| Field Name  | Description  |
|-------------|--|
| Account No  | [Display]  |
|             | This field displays the account number.  |
|             | The name of the CASA holder is populated adjacent to the account number.   |
| Account Ccy | [Display]  |
|             | This field displays the currency assigned to the product under which the account is opened.  |
|             | All the entries posted in the account are in the account currency.   |
|             | For example, if the currency assigned to a CASA product is USD, then by default the account opened under that product has USD as its account currency. |

| Field Name    | Description   |
|---------------|---|
| Txn Ccy       | [Mandatory, Drop-Down]  |
|               | Select the transaction currency from the drop-down list.  |
|               | The transaction currency is the currency in which the transaction will take place.  |
|               | While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.   |
| Acct Ccy Rate | [Display]   |
|               | This field displays the rate at which the account currency is converted to the local currency of the bank.  |
|               | The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.  |
|               | If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.  |
| Txn Ccy Rate  | [Display]   |
|               | This field displays the rate at which the transaction currency is converted to the local currency of the bank.  |
|               | The teller's right to change the transaction currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.  |
|               | If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.  |
| Account Amt   | [Display]   |
|               | This field displays the cash to be deposited.   |
|               | The amount will be calculated in the account currency. The system posts the entries to the accounts in the account currency.  |
|               | If the local currency of the bank is different from the account<br>currency of the customer, the amount entered in the <b>Txn Amount</b><br>field is converted to the account currency at the specified<br>exchange rate. If the currency of the local bank and the account<br>currency are the same, the amount in the <b>Txn Amount</b> field and<br>the <b>Account Amt</b> field will be the same. |
|               | Account currency is the currency assigned to the product at the product level, under which the account is opened.   |
|               | If the currency assigned to a CASA account product is USD (US Dollar), the account opened under that product has USD as its account currency.   |

| Field Name        | Description  |
|-------------------|--|
| Txn Amount        | [Display]  |
|                   | This field displays the transaction amount.  |
|                   | The transaction amount is the amount that will be deposited in the account.  |
|                   | The amount is entered in the transaction currency for depositing cash. The cash deposit amount is converted into the account currency, to facilitate the bank to make relevant entries in their respective accounts. |
| User Reference No | [Display]  |
|                   | This field displays the reference number that is entered by the user.  |
| Narrative         | [Mandatory, Alphanumeric, 120]   |
|                   | Type the narration.  |
|                   | This field displays the default narration based on the transaction.<br>The user can change the narration, if required.   |

|                     |                    |                |     |         | OK | Cancel  |

| Field Name    | Description   |
|---------------|---|
| Account No    | [Display]   |
|               | This field displays the CASA number of the customer.  |
|               | The adjacent field displays the short name of the primary customer to the account.  |
| Account Ccy   | [Display]   |
|               | This field displays the currency assigned to the product, under which the account is opened. By default, it is defaulted from the account details maintained.   |
|               | All the entries are posted in the account in the account currency based on the exchange rate set up for the transaction. The exchange rate values must be defined and downloaded.                         |
|               | For example, if the currency assigned to a CASA product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.  |
| Txn Ccy       | [Mandatory, Drop-Down]  |
|               | Select the transaction currency from the drop-down list.  |
|               | By default, it displays the account currency as the transaction currency.   |
|               | While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank. |
| Acct Ccy Rate | [Display]   |
|               | This field displays the rate at which the account currency is converted to the local currency of the bank.  |
|               | The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.                  |
|               | If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.  |
| Txn Ccy Rate  | [Display]   |
|               | This field displays the rate at which the transaction currency is converted to the local currency of the bank.  |
|               | The teller's right to change the transaction currency rate within range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.                |
|               | If the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.  |

| Field Name        | Description   |
|-------------------|---|
| Txn Amount        | [Display]   |
|                   | This field displays the transaction amount in the local currency of the bank.   |
| Account Amt       | [Display]   |
|                   | This field displays the amount which will be reflected on the CASA.   |
|                   | If the local currency of the bank is different from the account<br>currency of the customer, the amount of the transaction entered<br>in the <b>Txn Amount</b> field will get converted in the currency of the<br>account at the exchange rate specified above. If the currency of<br>the local bank and that of the account is the same, the amount<br>will be same for both the <b>Amount</b> field as well as the <b>Account</b><br><b>Amount</b> field. |
|                   | The account amount is derived as follows:   |
|                   | Account Amount = Txn Amount * Txn Ccy Rate / Account Ccy<br>Rate  |
| User Reference No | [Display]   |
|                   | This field displays the reference number that is input by the user.   |
| Narrative         | [Mandatory, Alphanumeric, 120]  |
|                   | Type the narration.   |
|                   | This field displays the default narration based on the transaction.   |

10. The system displays the **Instrument Details** screen.

|                  |                         |          |              |  |

| Field Name    | Description   |
|---------------|---|
| Clearing Type | [Mandatory, Drop-Down]<br>Select the clearing type from the drop-down list.   |
|               | The bank can set up multiple clearing types, where cheques that<br>are required to be cleared at different times of the day are<br>deposited so that they can be treated differently. All processes for<br>a cheque from outward clearing, running of value date, and<br>marking late clearing, etc., takes place on the basis of the<br>clearing type. |

| Field Name     | Description  |  |  |  |  |  |  |
|----------------|--|--|--|--|--|--|--|
| Cheque No      | [Mandatory, Numeric, 12]   |  |  |  |  |  |  |
|                | Type the cheque number which is present on the MICR line of the instrument.  |  |  |  |  |  |  |
|                | When the cheque is deposited into any payees account, the cheque number is used to ensure that the duplicate entries are not made in the system (that the same cheque is not deposited multiple times in the system.). On deposit of every cheque, cheque number, routing number and drawer account number (all the three are present on the MICR line) are used to check for the presence of duplicate instrument. If duplicate instruments are found, cheque deposit will be rejected unless the earlier cheques are all marked as Returned. |  |  |  |  |  |  |
| Cheque Literal | [Mandatory, Drop-Down]   |  |  |  |  |  |  |
|                | Select the cheque literal from the drop-down list.   |  |  |  |  |  |  |
|                | The options are:   |  |  |  |  |  |  |
|                | Drawing Voucher Deposit  |  |  |  |  |  |  |
|                | Guaranteed Cheque Deposit  |  |  |  |  |  |  |
|                | House Cheque Deposit   |  |  |  |  |  |  |
|                | Local Cheque Deposit   |  |  |  |  |  |  |
|                | MO/PO Deposit  |  |  |  |  |  |  |
|                | Outstation Cheque Deposit  |  |  |  |  |  |  |
|                | This field is not used in any processing.  |  |  |  |  |  |  |
| Cheque Date    | [Mandatory, Numeric, dd/mm/yyyy]   |  |  |  |  |  |  |
|                | Type the cheque date, which is present on the instrument.  |  |  |  |  |  |  |
|                | This date has to be less than or equal to current posting date.<br>This date is used in checking validity of the instrument.<br>Instruments become stale if the cheque date is prior to the<br>current posting date by the stale period (defined in the <b>Settlement</b><br><b>Bank Parameters</b> (Fast Path: STM59) option).  |  |  |  |  |  |  |
|                |  |  |  |  |  |  |  |

| Field Name     | Description  |  |  |  |  |  |
|----------------|--|--|--|--|--|--|
| Routing No     | [Mandatory, Numeric, Nine]   |  |  |  |  |  |
|                | Type the routing number against which the cheque has been drawn.   |  |  |  |  |  |
|                | The routing number is a combination of the bank code, the branch code, and the sector code from where the instrument was drawn.  |  |  |  |  |  |
|                | The combination can be obtained from the <b>Routing Branch</b><br>Maintenance (Fast Path: STM54) option.   |  |  |  |  |  |
|                | Routing Number = Sector Code / Bank Code + Branch Code   |  |  |  |  |  |
|                | For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.   |  |  |  |  |  |
|                | For an inward clearing cheque, this routing number should belong<br>to the bank. The order, in which the codes in the routing number<br>are to be entered, is determined by the set up using the<br><b>Settlement Bank Parameters</b> (Fast Path: STM59) option.   |  |  |  |  |  |
| Bank           | [Display]  |  |  |  |  |  |
|                | This field displays the bank name to which the cheque belongs, corresponding to the bank code extracted from the routing number.   |  |  |  |  |  |
| Branch         | [Display]  |  |  |  |  |  |
|                | This field displays the branch name from where the cheque is drawn, corresponding to the branch code and bank code extracted from the routing number.  |  |  |  |  |  |
| Sector         | [Display]  |  |  |  |  |  |
|                | This field displays the clearing sector name to which the cheque<br>branch belongs, corresponding to the sector code extracted from<br>the routing number. Sector Codes are defined using Sector<br>Master option.   |  |  |  |  |  |
| Drawer Acct No | [Mandatory, Numeric, 14]   |  |  |  |  |  |
|                | Type the drawer account number.  |  |  |  |  |  |
|                | The drawer account number is the account number of the person<br>who has issued the cheque. The drawer account, generally<br>printed on the cheque leaf is the account from where the funds<br>will come into the nominee account. If the cheque is drawn on a<br>different bank, the drawer account number will not be validated<br>by the system. If the cheque is drawn on your own bank, the<br>system will validate the drawer account number for its<br>correctness. |  |  |  |  |  |

| Field Name      | Description   |  |  |  |  |  |
|-----------------|---|--|--|--|--|--|
| Value Date      | [Display]   |  |  |  |  |  |
|                 | This field displays the value date of the cheque.   |  |  |  |  |  |
|                 | When a cheque is deposited on an account, the system uses the routing number to check the float days from the <b>Endpoint Float</b><br><b>Maintenance</b> (Fast Path: BAM28) option and the working days from the <b>Calendar for End Point</b> (Fast Path: BAM27) option to generate the value date of the cheque. |  |  |  |  |  |
|                 | The value date is the date on which the cheque is expected to be cleared. On the value date, the system updates the customer's available balance and credits the account with the cheque amount and reduces the un-cleared funds on the account.  |  |  |  |  |  |
|                 | For more information on maintaining value date, refer to the <b>Clearing Definitions</b> chapter in the <b>Definitions Users Guide</b> .  |  |  |  |  |  |
| Late Clearing   | [Display]   |  |  |  |  |  |
|                 | This field displays the values Y or N for late clearing.  |  |  |  |  |  |
|                 | The options are:  |  |  |  |  |  |
|                 | Y: If the late clearing is marked   |  |  |  |  |  |
|                 | N: If the late clearing is not marked   |  |  |  |  |  |
|                 | This field displays <b>Y</b> when a customer deposits a cheque after the clearing cut-off time is over, for current posting date for the selected clearing type.  |  |  |  |  |  |
|                 | The instruments that are deposited in late clearing will be considered as Late for clearing. Such instruments will be treated as deposit for the next working date for all value date calculation.  |  |  |  |  |  |
| Chg. Commission | [Display]   |  |  |  |  |  |
|                 | This field is currently not used in any processing.   |  |  |  |  |  |
| Reg CC Float    | [Optional, Drop-Down]   |  |  |  |  |  |
| Package         | Select the float package defined under regulation CC from the drop-down list.   |  |  |  |  |  |

## **Rent - Payment By Transfer From Savings**

| Field Name | Description  |
|------------|--|
| Allot No   | [Display]  |
|            | This field displays the safe deposit box allotment number for which the rent payment is being made   |
|            | The short name of the primary customer of the CASA is populated adjacent to the account number.  |
| From Acct  | [Display]  |
| Currency   | This field displays the currency assigned to the product, under which the account is opened.   |
|            | All the entries posted in the account are in the account currency.   |
|            | For example, if the currency assigned to a CASA product is USD (US Dollar), the account opened under that product has USD as its account currency, by default. |

| Field Name        | Description  |  |  |  |  |  |
|-------------------|--|--|--|--|--|--|
| Savings Account   | [Mandatory, Numeric, 14]   |  |  |  |  |  |
| No                | Type the account from which the funds will be transferred.   |  |  |  |  |  |
|                   | The short name of the primary customer of the CASA is populated adjacent to the account number.  |  |  |  |  |  |
|                   | If the 'from' and 'to' accounts do not belong to the same customer, the system will give a warning to that effect.   |  |  |  |  |  |
| Saving Acct Ccy   | [Display]  |  |  |  |  |  |
|                   | This field displays the currency assigned to the product, under which the account is opened.   |  |  |  |  |  |
|                   | All the entries posted in the account are in the account currency.   |  |  |  |  |  |
|                   | For example, if the currency assigned to a CASA product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.                           |  |  |  |  |  |
| From Ccy Rate     | [Display]  |  |  |  |  |  |
|                   | This field displays the rate at which the account currency is converted to the local currency of the bank.   |  |  |  |  |  |
|                   | The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. |  |  |  |  |  |
|                   | If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.   |  |  |  |  |  |
| To Ccy Rate       | [Display]  |  |  |  |  |  |
|                   | This field displays the rate at which the account currency is converted to the local currency of the bank.   |  |  |  |  |  |
|                   | The teller's right to change the account currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable. |  |  |  |  |  |
|                   | If the account currency and the local currency are same, the field takes the default value as 1, which cannot be modified.   |  |  |  |  |  |
| Rent Amount       | [Display]  |  |  |  |  |  |
|                   | This field displays the rent amount based on the value entered in the <b>Txn Amount</b> field. This is the amount that will be credited as rent.   |  |  |  |  |  |
|                   | The value in this field is calculated by the system using the amount entered in the From Amount, From Currency Rate, To Currency Rate and SC fields.                                     |  |  |  |  |  |
| Txn Amount        | [Display]  |  |  |  |  |  |
|                   | This field displays the amount that will be debited from the provider account.   |  |  |  |  |  |
| User Reference No | [Optional, Alphanumeric, 30]   |  |  |  |  |  |
|                   | Type the user reference number.  |  |  |  |  |  |

| Field Name | Description  |  |  |  |  |  |
|------------|--|--|--|--|--|--|
| Narrative  | [Mandatory, Alphanumeric, 120]   |  |  |  |  |  |
|            | Type the narration.  |  |  |  |  |  |
|            | This field displays the default narration based on the transaction.<br>The user can change the narration, if required. |  |  |  |  |  |

|                            |  |  |  |  |  |

- 12. The system displays the message "Authorisation required. Do You Want to continue?". Click the **OK** button.
- 13. The system displays the Authorization Reason screen.
- 14. Enter the relevant information and click the **Grant** button.
- 15. The system displays the message "Transaction Sent For Authorisation". Click the **Ok** button.
- 16. The system displays the transaction sequence number. Click the **Ok** button.

## **1.6. SB004 - Account Closing Balance Information**

Account closure is a two-step process.

Using this option you can retrieve the account closing details and close an account, and then perform the Closeout Withdrawal from the branch.

The status of the account changes to account closed today, after this transaction is processed. The next step of actual payout from the branch has to accompany this transaction, so that the account is marked as closed.

You have to close or delete all the account facilities like overdraft limit, SI, sweep in and others before marking the account for closure. The accounts with debit balance or uncleared funds cannot be closed.

#### **Definition Prerequisites**

• 8057- Safe Box Allotment

#### Modes Available

Not Applicable

#### To view account closing balance information

- Type the fast path SB004 and click Go or navigate through the menus to Transaction Processing > Account Transactions > SDB Account Transactions > Other Transactions > Account Closing Balance Information.
- 2. The system displays the Account Closing Balance Information screen.

- 5. Click the **Ok** button.
- 6. The system displays the message "Authorisation Required. Click Ok to continue". Click the **OK** button.
- 7. The system displays the Authorization Reason screen.
- 8. Enter the appropriate information and click the **Ok** button.
- 9. The system displays the message "The account has been closed successfully". Click the **Ok** button.

## 1.7. 1720 - SDB Close Out Balance Inquiry

Using this option, you can refund the advance rent paid for the safe deposit box at the time of its closure. The closure of an account should first be reflected in the Host database, after which the close out withdrawal activity is allowed. On successful completion, the safe box balance is set to zero.

Depending on the option selected in the Refund Mode drop-down list the system displays the relevant transaction screen and the user has to enter the required particulars.

#### **Definition Prerequisites**

- BAM09 Issuer Maintenance
- STM59 Settlement Bank Parameters
- STM54 Routing Branch Maintenance
- BAM14 Rewards and Service Charge Code MaintenanceSB004 Account Closing Balance Information
- 8057- Safe Box Allotment

#### Modes Available

Not Applicable

|---------------|---|
| Acct Amt      | [Display]   |
|               | This field displays the balance amount in the account at the time of closure. This amount will be in the account currency.  |
| Charges (Lcy) | [Display]   |
|               | This field displays the charges levied by your bank on whom the Banker's cheque is drawn.   |
|               | The charges will be denominated in the local currency of your bank.   |
|               | The service charge codes are added and maintained in the <b>Rewards and Service Charge Code Maintenance</b> (Fast Path: BAM14) option.  |
|               | The service charges can be attached at the product level, transaction mnemonic level or at the issuer maintenance level.  |
|               | The service charges are levied in the local currency of the bank.<br>The system displays the total of all the service charges if more<br>than one SC code is attached to the transaction.   |
| Cheque Amount | [Display]   |
|               | This field displays the amount of Banker's cheque that will be issued to the nominee.   |
|               | This amount is in the currency of the transaction and includes the charges as well as the Banker's cheque amount.   |
| Cheque Date   | [Mandatory, dd/mm/yyyy]   |
|               | Type the cheque date.   |
|               | This field, by default displays the posting date as cheque date, on which the Banker's cheque is issued.  |
| Serial No     | [Display]   |
|               | This field displays the serial number.  |
|               | For a remittance instrument such as a banker's cheque or a DD,<br>at the time of issue, the system generates a serial number<br>comprising the branch code and a running serial number.   |
|               | The serial number for each instrument type is maintained<br>separately and on reversal of an instrument issue, the instrument<br>serial number will not be reused for the next instrument issue.  |
|               | When an instrument comes for clearing, it may be referred by the MICR number, which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which <b>FLEXCUBE Retail</b> tracks the instrument uniquely. |

| Field Name        | Description  |
|-------------------|--|
| Micr No           | [Mandatory, Alphanumeric, 12]  |
|                   | Type the MICR number.  |
|                   | For every remittance instrument, it is necessary to maintain the MICR number that will be printed on the instrument, if the instrument is expected to come for clearing through inward clearing.   |
|                   | A cross-reference is maintained with the system generated serial<br>number, so that the instrument can be tracked by the system,<br>whether it is liquidated or enquired upon by the MICR number or<br>the serial number.  |
| Routing No        | [Mandatory, Numeric, Nine]   |
|                   | Type the routing number against which the cheque has been drawn.   |
|                   | The routing number is a combination of the bank code and the branch code.  |
|                   | The combination can be obtained from the <b>Routing Branch</b><br>Maintenance (Fast Path: STM54) option.   |
|                   | Routing Number = Sector Code / Bank Code + Branch Code   |
|                   | For a deposited cheque, this routing number is used by the system to determine the float days and thus the value date of the instrument.   |
|                   | For an inward clearing cheque, this routing number should belong<br>to the bank. The order, in which the codes in the routing number<br>are to be entered, is determined by the set up using the<br><b>Settlement Bank Parameters</b> (Fast Path: STM59) option. |
| Beneficiary Name  | [Mandatory, Alphanumeric, 40]  |
|                   | Type the name of the beneficiary for the banker's cheque.  |
| Passport / IC No  | [Mandatory, Alphanumeric, 14]  |
|                   | Type the passport or IC number.  |
|                   | This is an identification collected from the beneficiary of the banker's cheque at the time of liquidation.  |
| Beneficiary Addr  | [Mandatory, Alphanumeric, 40]  |
|                   | Type the contact address of the beneficiary.   |
|                   | This is normally needed for record purposes and provided as an additional information.   |
| User Reference No | [Optional, Alphanumeric, 30]   |
|                   | Type the user reference number assigned to the customer.   |

| Field Name | Description   |
|------------|---|
| Narrative  | [Mandatory, Alphanumeric, 120]  |
|            | Type the narration.   |
|            | This field displays the default narration, based on the transaction.<br>The user can change the narration, if required. |

| Field Name    | Description   |
|---------------|---|
| Allotment No  | [Display]<br>This field displays the allotment number that is being closed. The<br>name of the CASA holder is populated adjacent to the account<br>number.  |
| Account Ccy   | The close out withdrawal settlement will be made for this account.<br>[Display]<br>This field displays the currency assigned to the product at the<br>product level, under which the account is opened.<br>All the entries are posted in the account in the account currency.<br>The exchange rate values must be defined and downloaded.<br>For example, if the currency assigned to a TD product is USD<br>(US Dollar), the account opened under that product has USD as<br>its account currency by default |
| Txn Ccy       | [Mandatory, Drop-Down]<br>Select the transaction currency from the drop-down list.<br>This field, by default, displays the account currency as the<br>transaction currency.<br>While posting the transaction entries to the account, the<br>transaction currency is converted into the account currency and<br>for posting the GL entries it is converted into the local currency of<br>the bank.   |
| Acct Ccy Rate | [Display]<br>This field displays the rate at which the account currency is<br>converted to the local currency of the bank.<br>The teller's right to change the account currency rate within a<br>range is configurable at the bank level. If such rights are not<br>assigned to the teller, this field becomes non-editable.<br>If the account currency and the local currency are same, the field<br>takes the default value as 1, which cannot be modified.   |
| Txn Ccy Rate  | [Display]<br>This field displays the rate at which the transaction currency is<br>converted to the local currency of the bank.<br>The teller's right to change the transaction currency rate within<br>range is configurable at the bank level. If such rights are not<br>assigned to the teller, this field becomes non-editable.<br>If the transaction currency and the local currency are same, the<br>field takes the default value as 1, which cannot be modified.                                       |

| Field Name        | Description   |
|-------------------|---|
| GL Acct No        | [Mandatory, Pick List]  |
|                   | Select the GL account number to which the close out funds will be transferred from the pick list.   |
|                   | The description of the GL account is populated adjacent to the GL account number.   |
| Account Amt       | [Display]   |
|                   | This field displays the net balance of the CASA account at the time of closure.   |
|                   | This amount is calculated in the CASA account currency.   |
| Txn Amount        | [Display]   |
|                   | This field displays the close out amount to be paid, in the transaction currency.   |
|                   | The close out withdrawal amount is calculated in the account<br>currency, to facilitate the bank to make relevant entries in their<br>respective accounts. The amount is converted into the<br>transaction currency for the payout of the close out withdrawal<br>amount. |
| Reference No      | [Optional, Numeric, 30]   |
|                   | Type the appropriate reference number of the transaction.   |
| User Reference No | [Optional, Alphanumeric, 30]  |
|                   | Type the user reference number assigned to the customer.  |
| Narrative         | [Mandatory, Alphanumeric, 120]  |
|                   | Type the narration.   |
|                   | This field displays the default narration, based on the transaction.<br>The user can change the narration, if required.   |

- 9. Click the **Ok** button.
- 10. The system displays the message "Authorisation required. Do you want to continue?". Click the **OK** button.
- 11. The system displays the Authorization Reason screen.
- 12. Enter the appropriate information and click the **Grant** button.
- 13. The system displays the transaction sequence number. Click the **Ok** button.
