1. Preface

1.1. Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2. Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3. Access to OFSS Support

<https://support.us.oracle.com>

1.4. Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual

Introduction provides brief information on the overall functionality covered in the User Manual

Chapters are dedicated to individual transactions and its details, covered in the User Manual

1.5. Related Information Sources

For more information on Oracle FLEXCUBE Core Banking Release 11.5.0.0.0, refer to the following documents:

- Oracle FLEXCUBE Core Banking Licensing Guide

2. TD Introduction

The Time Deposit (TD) module in FLEXCUBE Retail has been designed to facilitate easy introduction of new TD products and has the capability to customize system features that makes it possible to rapidly meet increased volumes, changing market scenarios and customer needs.

FLEXCUBE Retail TD module supports the complete life cycle of a Time Deposit account from opening of the account, interest accruals and payments, part redemptions, premature closure, tax deductions and finally maturity of the TD and its subsequent payout or renewal. This system also complies with Islamic Banking Laws, which allows the banks to capture the immense potential of customers in Islamic countries who want to put their financial equity to work based on the concept of profit and risk sharing, rather than fixed income.

2.1.1. Key Features

FLEXCUBE Retail Banking Solution offers the best feature with an interactive interface that gives emphasis to business logic in intelligence form for the financial companies.

- Easily manage new product setup, and the ability to customize your system to set desired defaults for processing
- Capable of combining term based and amount based attributes to define the product rate
- Multiple deposits can be opened under the same account for the same customer
- Interest can be transferred to multiple modes like CASA, TD, GL, etc.
- Fully menu driven and is integrated with the Financial Accounting system
- Premature redemption of the deposit amount in full or partial
- Flexible enough to deduct the tax account-wise or deposit-wise
- Available in major foreign currencies
- Provides multi-location requirements

- The deposit module is compliant with the Islamic Banking Law
- Greater flexibility in defining service charges and waiver of rules
- Deposit Corrections - adjustments to principal and interest amount on redemption/renewal
- Sweep-in and sweep-out processing
- Deposits kept under a Time Deposit account can be pledged as security for the advances to the depositor himself, or to a third party
- Increased accuracy and reliability of compliance report
- Online verification of signature and photos identity
- User-wise security support system
- Instant querying functionality
- Multilevel Password

The system has an inbuilt parameter based coding system to link it up with the financial accounting system.

3. TD Account Opening-Maintenance

3.1. 8054 - Time Deposit Account Opening

Using this option you can open a new time deposit account.

The ideal procedure followed during Time Deposit Account Opening is as follows:

- Check for customer existence: Check for all customers linked to the account.
- Open TD Account
- Specify Account Operating Instructions.
- Add Account Memo (if any).
- Customer Account Linking: A Maximum of three customers can be linked to the account using this option. If there are more than three customers, the same need to be linked to the account.
- Add MIS information to the account, if applicable.
- Add CBR Codes / other user defined information to the account, if applicable.

Note: Tax rates are subject to change if any special tax code is maintained at the customer level. You can view the special tax code from the **Customer Special Tax Code Maintenance** (Fast Path: TDS05) option.

Definitions Prerequisites

- BAM17 - Branch Type Maintenance
- TDM01 - TD Product Master
- BAM97 - Currency Codes Cross Reference
- BAM30 - Tax Codes Maintenance
- 8053 - Customer Addition
- CI142 - Customer Account Relationship Maintenance
- BA524 - Product Code - Product Type Cross Reference

Download

Not Required

Modes Available

Not Applicable

To open a new TD account

1. Type the fast path **8054** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Time Deposit Account Opening**.
2. The system displays the **Time Deposit Account Opening** screen.

Time Deposit Account Opening

Field Description

Field Name	Description
------------	-------------

Branch	<p>[Mandatory, Numeric, Four, Pick List]</p> <p>Type the branch code under which an account is to be opened and select it from the pick list.</p> <p>The name of the branch is displayed in the adjacent field.</p> <p>It is possible for a branch to open an account on behalf of another branch.</p> <p>The branch name as per the SMS set up of the user is defaulted.</p>
Product Name	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate product name, available for the selected branch, from the drop-down list.</p> <p>The product is selected for which the account has to be opened.</p>
Product Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the time of product definition.</p> <p>This is the default currency for the product defined in Customer Addition (Fast Path: 8053) option.</p>

Field Name	Description
A/C No	<p>[Display]</p> <p>This field displays the account number at the time of account opening, if the account number generation is set as "Automatic" in the system pre-load.</p> <p>The structure of the account number is flexible and can be defined based on the requirements of the bank.</p>
A/C Title	<p>[Optional, Alphanumeric, 120]</p> <p>Type the suggested title for the account. This field defaults the full name of the primary customer if you select an existing Customer in Customer IC field and click Validate Customer option. The account title can be different from the full name of the customer entered during customer creation.</p>
Serial No	<p>This field is for future use.</p>
A/C Open Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the date, on which the account is opened, from the pick list.</p> <p>The system by default displays the posting date as the account open date.</p> <p>The system allows backdated account opening of TD.</p>
Restricted A/C	<p>[Optional, Check Box]</p> <p>Select the Restricted A/C check box if the customer is a restricted customer or vice versa.</p> <p>This field is enabled if the customer is not restricted in Customer Account Restriction (Fast Path: CIM21) option.</p> <p>Select the check box if you want the account to be treated as restricted account used only in the home branch.</p> <p>Only tellers with suitable capability will be able to inquire and post transactions into restricted accounts. Normal tellers will not be able to transact on the account.</p>
Customer Information	
Customer IC	<p>[Mandatory, Pick List]</p> <p>Select the identification code of the customer from the pick list.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate, or corporate registration can be used as a customer IC.</p>

Field Name	Description
Category	<p>[Mandatory, Drop-Down]</p> <p>Select the category of the customer from the drop-down list.</p> <p>For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using the Customer Type Maintenance (Fast Path: CIM08) option.</p> <p>Further processing such as tax applicable, service charges, etc. are levied based on the customer type.</p>
IC Type	<p>[Display]</p> <p>This field displays the IC type of the customer, based on the category to which the customer belongs.</p> <p>This is maintained in the Customer Type Maintenance (Fast Path: CIM08) option.</p>
Short Name	<p>[Display]</p> <p>This field displays the short name of the customer.</p> <p>The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p>
Birth / Reg Date	<p>[Display]</p> <p>This field displays the birth or registration date of the customer after validation.</p> <p>If the customer already exists, then the Birth/Reg Date will be automatically defaulted. Otherwise, the Customer Addition (Fast Path: 8053) option will be invoked where more details about the customer need to be entered.</p> <p>For more information, refer to Customer Addition (Fast Path: 8053) option.</p>
Relations	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate relations from the drop-down list.</p> <p>The customer is linked to the account by way of a relations tag.</p> <p>This list contains different relations. For example, Sole Owner, Joint And First, Joint and Other and other relations.</p> <p>For successful account opening transaction, a customer with primary relationship viz. Sole Owner, Joint And First, or Joint Or First must be linked. If primary relationship linked is Joint And First or Joint or First, customer with secondary relationship viz. Joint and other or Joint or other must be linked to the account.</p> <p>A maximum of three customers can be linked to an account in the account-opening screen. Customer Account Relationship Maintenance (Fast Path: CI142) option can be used to attach additional customers to the accounts.</p>

Field Name	Description
Customer ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Taxable Customer Id	<p>[Mandatory, Pick List]</p> <p>Select the taxable customer ID from the pick list.</p> <p>By default it displays the ID of the primary customer.</p>
Waive Service Charge	<p>[Optional, Check box]</p> <p>Select the Waive Service Charge check box, if you want to waive the service charge for the TD account.</p>
Base Tax Code 1	<p>[Mandatory, Drop-Down]</p> <p>Select the tax code 1 set by the bank that will be applicable to the account from the drop-down list.</p>
Base Tax Code 2	<p>[Mandatory, Drop-Down]</p> <p>Select the tax code 2 set by the bank that will be applicable to the account from the drop-down list.</p>
IBAN	<p>[Display]</p> <p>This field displays the new International Bank Account Number generated by the system.</p> <p>The IBAN¹ mask is defined in the Bank Master Maintenance (Fast Path: BAM08) option.</p>

3. Select the branch name and product name from the list.
4. Enter the account opening date.
5. Select the customer IC from the pick list.
6. Select the appropriate category and relations from the drop-down list.
7. Click the **Val Customer** button. The system validates if the customer is an existing customer or a new customer.

¹(International Bank Account Number: It is a unique account number that is used to identify a customer's account in a financial institution internationally.)

8054 - Time Deposit Account Opening

8. For an existing customer, the system displays the message "Existing Customer...Proceed with data entry".
9. Click **Ok** button.
10. The system displays the message "Authorisation Required. Do You Want to continue". Click the **OK** button.
11. The system displays the **Authorization Reason** screen.
12. Enter the relevant information and click the **Grant** button.
13. The system displays the account number. Click the **OK** button.

3.2. TD020 - TD Account Master

Using this option you can change the attributes of a term deposit which has been opened through the **TD Account Opening** (Fast Path: 8054) option.

The system lists the details of the term deposit account in the **Account Details** tab and lists all the deposits opened under the term deposit account in the **Deposit Details** tab.

Note: Tax rates are subject to change if any special tax code is maintained at the customer level. You can view the special tax code from the **Customer Special Tax Code Maintenance** (Fast Path: TDS05) option.

Definition Prerequisites

- 8054 - TD Account Opening

Modes Available

Add By Copy, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the TD account master

1. Type the fast path **TD020** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TD Account Master**.
2. The system displays the **TD Account Master** screen.

TD Account Master

The screenshot displays the 'TD Account Master' interface. At the top, there are fields for 'Account No.', 'Customer Name', 'Customer Id', 'Product', 'Currency', 'Branch', 'Language', and 'Account Status'. Below these are two tabs: 'Account Details' (selected) and 'Deposit Details'. The main area contains a grid of fields for 'Joint Customer 1-3', 'Account Title', 'Opening Date', 'Search Criteria', 'Taxable Customer ID', 'Tax Code 1-2', 'Reason Code', 'Blocked', 'Restricted Account', 'Employee Account', 'Service Charge Waiver', 'Premature Redemption Allowed', 'IBAN', 'Enforcement Authority Name', 'Address Line 1-3', 'State', 'Zip', 'Contact Number 1-2', 'Letter Issue Date', 'Relation', 'Officer', 'Search String', 'Taxable Customer Name', 'Tax Exemption Limit 1-2', 'PassBook Status', 'Address Line 2', 'City', 'Country', 'Contact Number 1', 'Letter Reference Number', and 'Transaction Branch Code'. At the bottom, there is a 'Record Details' section with columns for 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. A toolbar at the very bottom includes buttons for 'Add By Copy', 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', 'Inquiry', 'UDF', 'Ok', 'Close', and 'Clear'.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number of the customer.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Customer Id	[Display] This field displays the ID of the customer who holds the TD Account.
Product	[Display] This field displays the product code and name under which the TD account is initiated.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Branch	[Display] This field displays the name of the home branch where the TD account is opened and maintained.
Language	[Display] This field displays the language code in which the transactions and correspondence for the account will be performed. For example, language will be displayed as ENG where the account language is English.

Field Name	Description
Account Status	<p data-bbox="524 268 626 296">[Display]</p> <p data-bbox="524 310 1127 338">This field displays the current status of the account.</p> <p data-bbox="524 352 716 380">The options are:</p> <ul data-bbox="524 405 1305 953" style="list-style-type: none"> <li data-bbox="524 405 1305 464">• Regular – This account is a regular account opened for various transactions. <li data-bbox="524 485 1305 543">• Account Opened Today - This account is opened on the day of the transaction. <li data-bbox="524 564 1305 623">• Closed – This account includes those deposits which have matured and redeemed. Thus this account is closed. <li data-bbox="524 644 1305 703">• Account Closed Today - This account has been closed on the day of the transaction. <li data-bbox="524 724 1305 783">• Unclaimed - This account has remained unclaimed by the customer. <li data-bbox="524 804 992 831">• Matured - This account has matured. <li data-bbox="524 852 1062 879">• Account Blocked - This account is blocked. <li data-bbox="524 900 1305 959">• Forced Renewal - This account is marked for lien and thus has been force renewed.

3. Click the **Modify** button.
4. Enter the account number and press the **<Tab>** or **<Enter>** key.
5. Modify the required information in the various tabs.

Account Details

The Account Details tab includes the details of the TD account.

The screenshot shows the 'Account Details' tab of the TD Account Master application. The form is divided into several sections:

- Account Information:** Account No (5030000002391), Customer Name (MINIMIGFBFSRTESTBS6), Customer Id (50002202), Product (447 - REINVESTMENT DEPOSITS - RESIDENTS), Currency (INR), Branch (9051 9051 BRN, FSR-R2 TEST SECTOR 1), Language (ENG), and Account Status (ACCOUNT OPEN REGULAR).
- Joint Customer Details:** Fields for Joint Customer 1, 2, and 3, each with a name and relation dropdown.
- Account Title:** MINIMIGFBFSRTEST
- Opening Date:** 03/03/2012
- Taxable Customer Information:** Taxable Customer ID (50002202), Tax Code 1 (201), Tax Code 2 (999), Reason Code (999-NEW LEGAL REASON CODE T), Tax Exemption Limit 1 (10,000.00), and Tax Exemption Limit 2 (10,000.00).
- Address and Location:** Address Line 1, 2, and 3; State (MAHARASHTRA); City (MUMBAI); Country (India); and Transaction Branch Code (240).
- Other Fields:** IBAN (IN187044050300000002), Enforcement Authority Name, Contact Number 1 and 2, Letter Issue Date (01/01/2013), Officer (T62AUTO39051), Search String, PassBook Status (Not Issued), Employee Account, Service Charge Waiver, and Premature Redemption Allowed.
- Record Details:** Input By (T62AUTO39051), Authorized By (S63AUTO39051), Last Mnt. Date (07/03/2012 03:00:13), Last Mnt. Action (Authorize), and Authorized (checked).
- Toolbar:** Includes buttons for Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Joint Customer 1, 2, 3	[Display] This field displays the names of all the account holders, if the TD account is a Joint account.
Relation	[Display] This field displays the relation of the joint customer to the account, whether it is Joint and First or Joint or Other, as specified at the account level.
Account Title	[Optional, Alphanumeric, 120] Type the account title.
Opening Date	[Display] This field displays the date on which the TD account is initiated.

Field Name	Description
Officer	<p>[Display]</p> <p>This field displays the officer who is assigned to the TD account. This officer acts as the relationship manager for the TD Account.</p>
Search Criteria	<p>[Optional, Drop down]</p> <p>Select the search criteria to search for the customer from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer IC - Customer Identification criteria (IC) arrived at by the bank during customer addition. • Customer Id - Unique identification given by the bank

Field Description

Column Name	Description
Original Deposit No	<p>[Display]</p> <p>This column displays the original deposit number.</p> <p>The original deposit number is the source or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal.</p> <p>It will have new deposit running number but will retain the original deposit no of the source deposit.</p>
Renewal No	<p>[Display]</p> <p>This column displays the renewal number.</p> <p>Renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.</p>

Column Name	Description
Deposit No.	<p>[Display]</p> <p>This column displays the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
Value Date	<p>[Display]</p> <p>This column displays the value date of the TD.</p> <p>The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective. The interest calculations for a TD will start from this date.</p>
Deposit Status	<p>[Display]</p> <p>This column displays the deposit status of the TD account.</p>
Maturity Date	<p>[Display]</p> <p>This column displays the maturity date for the deposit.</p>
Term	<p>[Display]</p> <p>This column displays the deposit term.</p> <p>The term of the deposit is the duration or the period in months and days, for which the TD is initiated.</p>
Principal	<p>[Display]</p> <p>This column displays the principal amount of the TD account.</p>
Flg Base For Rate	<p>[Display]</p> <p>This column displays the base amount parameter for calculating the interest.</p> <p>The base option for the deposit is displayed as symbols.</p> <ul style="list-style-type: none"> • I indicates Incremental Amount • S indicates Cumulative for the deposit • C indicates Cumulative for all deposits
Payout Frq	<p>[Display]</p> <p>This column displays the payout frequency, i.e. the time interval at which the interest earned on the deposit is paid out.</p>
Compounding Frq	<p>[Display]</p> <p>This column displays the compounding frequency i.e. the time interval at which the interest earned is compounded to the principal.</p>

Column Name	Description
Interest Index Code	[Display] This column displays the interest index code applicable to the TD. The index code is defined at the product level against the slab in which the TD principal, and term fits in.
Rate Interest	[Display] This column displays the interest rate.
Rate Variance	[Display] This column displays the interest variance specified at the time of initiating the deposit. The new value should be within the minimum and maximum values defined at the product level.
Prod Variance	[Display] This column displays the product variance. The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.
Effective Rate	[Display] This column displays the rate at which interest is paid for the deposit. $\text{Effective Rate} = \text{Interest Rate (at deposit level)} + \text{Interest Variance} + \text{Product Variance}$ The net rate should be within the minimum and maximum interest rate specified at the product level.
Annual Effective Rate	[Display] This column displays the annual effective rate.
Renewal Date	[Display] This column displays the renewal date.

6. Click the **OK** button.
7. The system displays the message "Record Modified...Authorisation Pending.." Click the **OK** button.
8. The account master details are modified once the record is authorized.

3.3. TD021 - Deposit Master

Using this option you can view the attributes for all individual deposits held under a term deposit account. You can also view the customers association with the account and individual deposits, pay in and payout patterns and redemption details.

The **Balances** tab provides balance, interest and tax details.

The deposit level interest variance can be changed in the **Interest Rate** tab. If any RP plan is attached to the deposit, the RP details will be displayed in the **RP Variances** tab.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the deposit details

1. Type the fast path **TD021** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > Deposit Master**.
2. The system displays the **Deposit Master** screen.

				<input type="checkbox"/>

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number for which you want to check the details.
Org Deposit No.	[Mandatory, Pick List] Select the original number from the pick list. The original deposit number is the source or the parent deposit no from which the new deposit is created due to interest payout or due to renewal. It will have new deposit running number, but will retain the original deposit no of the source deposit. Note: The first stage list will display the latest deposit numbers for each deposit under that particular account. A check box has been provided on the top of this pick-list, on selecting which the second stage pick-list will be invoked. This will display all the deposit details such as original number, renewal number, etc.
Deposit No.	[Display] This field displays the running term deposit number. It signifies the number of deposits opened in an account. The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.
Renewal No	[Display] This field displays the renewal number. The renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number explains the chronology of a particular deposit.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Customer Id	[Display] This field displays the customer ID on selecting the account.
Taxable Customer Name	[Display] This field displays the taxable customer name.
Taxable Customer ID	[Display] This field displays the taxable customer ID.

Field Name	Description
Product	[Display] This field displays the name assigned to the TD product, as defined at the product level. This is the product under which the TD account is opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example: If the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Branch	[Display] This field displays the name of the home branch where the TD account is opened and maintained.
Original Receipt No.	[Display] This field displays the first receipt no for the selected Deposit No.
Original Receipt No. Issue Date	[Display] This field displays the first receipt no issue date for the selected Deposit No.
Current Receipt No.	[Display] This field displays the current receipt no for the selected Deposit no.
Current Receipt No. Issue Date	[Display] This field displays the current receipt no issue date for the selected Deposit No.

3. Click the **Modify** button.
4. Enter the account number and press the **<Tab>** or **<Enter>** key.
5. Select the original deposit number from the pick list.

Field Description

Field name	Description
Status	<p>[Display]</p> <p>This field displays the current status of the account.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Regular - This account is a regular account opened for various transactions. • Account Opened Today - This account is opened on the day of the transaction. • Closed - This account is closed. • Account Closed Today - This account has been closed on the day of the transaction. • Unclaimed - This account has remained unclaimed by the customer. • Matured - This account has matured. • Account Blocked - This account is blocked. • Forced Renewal - This account is marked for lien and thus has been force renewed.
Passbook Status Flag	<p>[Display]</p> <p>This field displays the status of the passbook.</p>
Discounted Amount	<p>[Display]</p> <p>This field displays the discounted deposit amount.</p> <p>For discounted deposits, the customer wants the deposits to receive a pre-defined maturity amount.</p> <p>For example, a customer wants to earn a maturity amount of 10,000. The bank will consider the interest adjustments and calculate the initial payment amount, which the customer needs to make. In this case, the maturity amount and the interest are fixed.</p> <p>There are two types of product discounting. They are as follows:</p> <ul style="list-style-type: none"> • Normal Discounted – In normal discounted deposit, the maturity amount is defined along with the interest rate and the initial amount is deposited. Only the principal amount is discounted. Maturity value is decided based on the interest calculation. • True Discounted – In true discounted deposit, even the interest which will be received will be discounted further, and reduced from the initial deposit amount of the normal discounted TD. <p>This field is displayed only when the product under which the account is opened is of the discounted type.</p>

Field name	Description
Lien Amount	<p>[Display]</p> <p>This field displays the lien amount, if there is a lien marked on the deposit.</p> <p>As the deposit is a part of an account, lien on deposit will automatically imply as a partial lien on an account.</p>
Blocked	<p>[Display]</p> <p>This field displays whether the TD account is blocked or vice versa.</p>
Reason	<p>[Display]</p> <p>This field displays the reason for a blocked TD account as specified while blocking the account.</p>
Certificate Issued	<p>[Conditional, Drop-Down]</p> <p>Select the certificate issue status from the drop-down list.</p> <p>This field is enabled if the Certificate check box is selected in the Advices tab screen in the TD Product Master (Fast Path: TDM01) option and certificate has to be issued in the TD Certificate Printing (Fast Path: TD043) option.</p>
Force Renewal Term (in X)	<p>[Optional, Numeric, Four]</p> <p>Type the force renewal term as defined at the product level.</p> <p>The force renewal term will be applicable if there is a lien marked on a deposit. The amount which is marked for lien will be automatically renewed after maturity for the period mentioned in this field.</p> <p>The term can be specified in months, days or in a combination of both as defined at the product level. The term unit is specified next to this field.</p> <ul style="list-style-type: none"> • C - Combination • M - Months • D - Days
Special PMI Processing Blocked status	<p>[Display]</p> <p>This field displays whether the special PMI processing blocked status is to fulfill the TD conditions after the TD maturity.</p>

Field name	Description
Forward Contract Status	<p>[Conditional, Drop-Down]</p> <p>Select the status of forward contract from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Not Maintained • Maintained • Revoked <p>This field is enabled for FCNR deposits.</p>
Forward Contract Reference Note	<p>[Conditional, Alphanumeric, 50]</p> <p>Type the forward contract reference number.</p> <p>This field is enabled if the Maintained option is selected in the Forward Contract Status drop-down list.</p>
Maintained Date	<p>[Display]</p> <p>This field displays the date when the forward contract status was maintained.</p>
Revoked Date	<p>[Display]</p> <p>This field displays the date when the forward contract status was revoked.</p>

Field Description

Field name	Description
Interest Index Code	[Display] This field displays the interest index code applicable to the TD. The index code is defined at the product level against the slab in which the TD principal and term fits in.
Interest Rate	[Display] This field displays the interest rate linked to the interest index code.

Field name	Description
Interest Variance	<p>[Display]</p> <p>This field displays the interest variance specified at the time of creating the deposit.</p> <p>Interest variance change for fixed as well as floating rate for TD products can be carried out using the Backdated Interest Rate Change (Fast Path: TDM48) option.</p> <p>This field can be amended and modified. The new value should be within the minimum and maximum values defined at the product level.</p>
Product Variance	<p>[Display]</p> <p>This field displays the product variance.</p> <p>The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fit in.</p>
Scheme Rate	<p>[Display]</p> <p>This field displays the rate of interest as per the scheme.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>
Net Effective Rate	<p>[Display]</p> <p>This field displays the rate at which interest is paid for the deposit.</p> <p>Net Effective Rate = Interest Rate (at deposit level) + Interest Variance + Product Variance</p> <p>The net rate should be within the minimum and maximum interest rate specified at the product level.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate.</p> <p>AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer. The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>

Balances

This tab displays the balance details of an account, interest details, tax withheld, etc.

Field Description

Field Name	Description
------------	-------------

Interest Accrued	[Display] This field displays the interest accrued on the current principal balance. The interest is calculated from the date of last interest payout or capitalization, or from the date of initiating the TD.
-------------------------	---

Interest Withheld	[Display] This field displays the interest that is withheld. The part of total due interest amount for the current payout cycle held by the bank, in case the customer has to pay interest to the bank.
--------------------------	---

Projected Tax1 On Accrued Int:	[Display] This field displays the tax 1 calculated on the accrued interest. It is calculated on the basis of the amount accounted and the amount in the accrued interest bucket.
---------------------------------------	---

Field Name	Description
Interest Withheld (Total)	[Display] This field displays the total interest withheld amount to date.
Tax Withheld 1 (Total)	[Display] This field displays the total tax 1 deducted from interest against the TD recovered from the customer. This tax is accrued but not remitted to the government. The tax 1 is deducted on the basis of Tax Deduction at Source Flag defined at the product level and the Tax Code attached to the account at the time of account opening.
Projected Tax2 On Accrued Int	[Display] The tax 2 calculated on the accrued interest. It is calculated on the basis of the amount accounted and the amount in the accrued interest bucket.
Interest Compounded To Date	[Display] This field displays the total compounded interest. <i>Interest Compounded to Date = Accumulated Interest earned on the Principal + Interest to Date</i>
Tax Withheld 2 (Total)	[Display] This field displays the total tax 2 deducted from interest against the TD recovered from the customer. This tax is accrued but not remitted to the government. The tax 2 is deducted on the basis of Tax Deduction at Source Flag defined at the product level and the Tax Code attached to the account at the time of account opening.
Balance Uncollected Interest	[Display] This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.
Interest Paid To Date	[Display] This field displays the total interest paid till date to the customer.
Balance Interest Due	[Display] This field displays the interest amount for which the Payout Option is defined as No instructions at the product level, and the proceeds are not collected by the customer.

Field Name	Description
Balance Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit has matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as uncollected principal.</p>
Unclaimed Interest	<p>[Display]</p> <p>This field displays the interest which is due, but not collected by the customer after the grace period.</p> <p>The interest, which is due and is not collected by the customer, gets transferred to the unclaimed GL after the specified grace period.</p>
Balance Principal Due	<p>[Display]</p> <p>This field displays the matured deposit amount for which Maturity Option is defined as No instructions at the product level, and the proceeds are not collected by the customer.</p>
Tax On Accrual 1	<p>[Display]</p> <p>This field displays the tax amount 1 on the last interest accrued.</p>
Unclaimed Principal	<p>[Display]</p> <p>This field displays the principal which is due, but not collected by the customer after the grace period.</p> <p>The principal, which is due and is not collected by the customer, gets transferred to the unclaimed GL after the specified grace period.</p>
Tax On Accrual 2	<p>[Display]</p> <p>This field displays the tax amount 2 on the last interest accrued.</p>
Interest Capitalized To Date	<p>[Display]</p> <p>This field displays the interest that is capitalized till date.</p>
PMI Accrued	<p>[Display]</p> <p>This field displays the accrued PMI.</p> <p>It is the amount accrued after the maturity of deposit in special PMI processing condition. It is displayed as '0', if PMI Accrual is selected as none.</p>
Year End Principal Balance	<p>[Display]</p> <p>This field displays principal balance as on financial year end.</p>

Field Name	Description
Stamp Tax Amount	[Display] This field displays the documentary stamp tax amount calculated by the system.
Maturity Amount	[Display] This field displays the maturity amount of the deposit.

Payout

This tab displays the interest payout details.

The screenshot shows the Oracle Deposit Master application window. The 'Payout' tab is selected and highlighted with a red box. The form contains the following fields:

- Account No.: 3050000001986
- Deposit No.:
- Customer Name: BHAIKAVI
- Product: 301 - FIXED DEPOSIT - RFC - EU
- Original Receipt No.:
- Current Receipt No.:
- Org Deposit No.:
- Renewal No.:
- Customer Id: 100000006
- Branch: 240 SANDOZ - MUMBAI
- Original Receipt No. Issue Date:
- Current Receipt No. Issue Date:

The Payout section (highlighted in red) includes:

- Payout Frequency:
- Compounding:
- Next Payout Date: 01/01/1800
- Next Compounding: 01/01/1800
- Anniversary Start Day:
- Anniversary Start Month:

At the bottom, there is a 'Record Details' table and a toolbar with buttons: Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, UDF, OK, Close, Clear.

Field Description

Field name	Description
Payout Frequency	[Display] This field displays the payout frequency for the deposit.

Field name	Description
Compounding	<p>[Display]</p> <p>This field displays the time interval at which the interest is compounded to the principal, as specified while initiating a TD.</p> <p>For example, if the compounding frequency is specified as Quarterly then the accumulated interest will be added to the principal every three months.</p>
Next Payout Date	<p>[Mandatory, Pick List, mm/dd/yyyy]</p> <p>Select the date, on which the subsequent interest is due to be paid from the pick list.</p> <p>For example, the interest payout frequency is specified as quarterly. If the interest is paid on 31st June '09, the next payout date will be after 3 months i.e.30th September '09.</p>
Next Compounding	<p>[Display]</p> <p>This field displays the date on which the accrued interest is added to the principal.</p> <p>For example, the interest compounding frequency is specified as monthly. If the interest is compounded on 30th June '09, the next compounding date will be after 1 month i.e. 30th July '09.</p>
Anniversary Start Day	<p>[Conditional, Drop-Down]</p> <p>Select the anniversary start date from the drop-down list.</p> <p>For example: If a TD is created on 5th of August then the Anniversary Start Day will be 5th. If the next interest is due after a quarter then the Next Payout Date will be 5th November.</p> <p>This field is enabled if Anniversary option is selected in the Interest Payout basis and Interest Compounding basis in the TD Product Master (Fast Path: TDM01) option.</p>
Anniversary Start Month	<p>[Conditional, Drop-Down]</p> <p>Select the anniversary start month from the drop-down list.</p> <p>For example, if a TD is created on 5th of August then the Anniversary Start month will be August.</p> <p>This field is enabled if Anniversary option is selected in the Interest Payout basis and Interest Compounding basis in the TD Product Master (Fast Path: TDM01) option.</p>

Payin

This tab displays the deposit details.

The screenshot shows the 'Deposit Master*' application window with the 'Payin' tab selected. The window contains the following fields and sections:

- Account Information:** Account No. (02405610000017), Org Deposit No. (1), Deposit No. (1), Renewal No. (1).
- Customer Information:** Customer Name (T SANDEEP REDDY), Customer Id (100000002), Taxable Customer Name (T SANDEEP REDDY), Taxable Customer Id (100000002).
- Product and Branch:** Product (S61 - FIXED DEPOSIT - CV - CLIV), Currency (INR), Branch (240 - WORLI - SANDOZ HOUSE).
- Receipt Information:** Original Receipt No. (2007240), Original Receipt No. Issue Date (31/12/2007), Current Receipt No. (2007240), Current Receipt No. Issue Date (31/12/2007). A 'Generate Duplicate Receipt' button is present.
- Navigation Tabs:** General, Interest Rate, Balances, Payout, **Payin**, Redemption Details, RP Variances, Rule Doc, Additional Details.
- Deposit Details Section:**

Field Description

Field name	Description
Principal Balance	<p>[Display]</p> <p>This field displays the principal amount of the TD. It shows the latest principal on the TD.</p> <p>This is the sum total of the principal amount at the time of initiating, and the compounding interest earned.</p>
Value Date	<p>[Display]</p> <p>This field displays the value date of the TD.</p> <p>The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective. The interest calculations for a TD will start from this date.</p>
Deposit Term (in X)	<p>[Display]</p> <p>This field displays the term in months and days for which the TD is being created.</p>

Field name	Description
Deposit Date	<p>[Display]</p> <p>This field displays the date on which the TD is created.</p>
Base Amount For Deposit Rate	<p>[Display]</p> <p>This field displays the base amount as specified while initiating a TD.</p>
Deposit Maturity Date	<p>[Display]</p> <p>This field displays the maturity date for the new deposit.</p> <p>This date is arrived at by adding the deposit term to the interest start date of the TD.</p> <p>For example, if the interest start date of the TD is 1st January '04 and the TD term is two months, then the maturity date will be 29th February '04.</p> <p>1st January '04 + 2 months = 29th February '04</p>
Balance For Rate Earned	<p>[Display]</p> <p>This field displays the base principal amount, which determines the rate of interest applicable for the deposit.</p> <p>This amount depends on the option selected as Base Amount for Deposit Rate.</p> <p>For example, if the Base Amount for Deposit Rate is selected as Incremental, the deposit amount will be displayed.</p>
Interest Start Date	<p>[Display]</p> <p>This field displays the current process date as the interest start date, by default.</p> <p>The interest start date is the date on which the bank starts accruing interest for the TD.</p> <p>For payin by Cheque, DD or BC, the interest start date is by default the value date of the instrument.</p> <p>An interest start date can be any date on or after the value date of the deposit, and on or before the maturity date of the deposit.</p>
Cheque No.	<p>[Display]</p> <p>This field displays the DD or BC or Cheque number through which the TD amount is paid.</p> <p>When the cheque is deposited into any payee's account, the cheque number is used to ensure that duplicate entries are not made in the system (that the same cheque is not deposited multiple times in the system.). On every deposit of a cheque, cheque number along with the routing number and drawer account number (all the three are present on the MICR line) is/are used to check for the presence of any duplicate instrument. If duplicate instruments are found, cheque deposit will be rejected unless the earlier cheques are all marked as Returned.</p>

Redemption Details

This tab displays the details of redemption of a deposit.

Field Description

Field name	Description
Number of Redemptions to Date	[Display] This field displays the number of redemptions up to the inquiry date. This is equal to the number of times the principal or interest is renewed.
Last Redemption Amount	[Display] This field displays the amount which was last redeemed as a part of the principal.
Redemption Amount to Date	[Display] This field displays the total amount redeemed from the account as a part of the principal.

Field name	Description
Early Redemption Penalty to Date	<p>[Display]</p> <p>This field displays the penalty amount, if penalties are charged for an early redemption.</p> <p>When a deposit is redeemed before maturity, the bank may charge a customer penalty interest. The penalty variance rate and the process of calculation are defined at the product level.</p>
Last Redemption Date	<p>[Display]</p> <p>This field displays the date on which the last redemption has taken place.</p>

RP Variances

This tab displays the relationship pricing variance. For e.g.: If the relationship value is more than 1 crore, additional interest of 0.5% is to be given to the customer.

Field Description

Column Name	Description
Variance Package	<p>[Display]</p> <p>This column displays the variance package applicable to the deposit.</p>

Column Name	Description
Interest Type	[Display] This column displays the interest type applicable to the deposit.
RP Variance Rate	[Display] This column displays the rate of the RP variance.
Rule	[Display] This column displays the rule applicable to the deposit.
Package Dev Rule	[Display] This column displays the package deviation value applicable to the deposit.
Benefit Plan Dev Rule	[Display] This column displays the benefit plan deviation rule applicable to the deposit.

Rule Doc

This tab allows you to view the rule applied on the deposit.

Additional Details

Field Description

Field name	Description
Account No	[Display] This field displays the TD account number.
Initial Maturity Date	[Display] This field displays the maturity date of the initial deposit.
Ccy Code	[Display] This field displays the currency code.
Initial Payment/Deposit Date	[Display] This field displays the initial deposit/payin date.
Branch Code	[Display] This field displays the branch code.
Initial Deposit Amt	[Display] This field displays the initial deposit amount. It shows the original TD deposit principal amount.

Field name	Description
Pay Mode	[Display] This field displays the pay mode of the initial payin.
Description 1	[Optional, Alphanumeric, 100] Type the first instruction maintained for the deposit.
Description 2	[Optional, Alphanumeric, 100] Type the second instruction maintained for the deposit.

7. Click the **OK** button.
8. The system displays the message "Record Modified...Authorisation Pending...". Click the **OK** button.
9. The deposit master details are modified once the record is authorised.

3.4. TD043 - TD Certificate Printing

Using this option you can print a certificate of the deposit under a term deposit account. The deposit can be issued and printed denomination wise, either for entire deposit amount or part deposit amount.

For example, for a deposit worth 5000, you can have a single certificate printed in single denomination for full amount or multiple certificates printed in denominations of 500 for entire amount.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To view the TD certificate printing

1. Type the fast path **TD043** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TD Certificate Printing**.
2. The system displays the **TD Certificate Printing** screen.

TD Certificate Printing

The screenshot shows the 'TD Certificate Printing' window. At the top, there are input fields for 'Account Number', 'Branch', 'Principal Balance' (set to 0.00), 'Account Title', 'Product', and 'Account Currency'. Below these are tabs for 'Customer Details', 'Deposit Details', 'Certificate Details', 'Denomination Details', and 'Inventory Details'. The 'Customer Details' tab is active, showing fields for 'Customer Name 1', 'Customer Name 2', 'Customer Name 3', 'Address', and 'City'. At the bottom right, there are buttons for 'Print', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number of the customer.
Account Title	[Display] This field displays the name of the customer who holds the TD Account.
Branch	[Display] This field displays the name of the home branch where the TD account is initiated and maintained.
Product	[Display] This field displays the code and name assigned to the TD product, as defined at the product level. This is the product under which the TD account is opened.
Principal Balance	[Display] This field displays the TD account principal balance i.e. the sum total of the principal balance of all the term deposits held under the TD account.
Account Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.

3. Enter the account number and press the **<Tab>** or **<Enter>** key.

TD Certificate Printing

The screenshot shows a web application window titled "TD Certificate Printing". At the top, there are several input fields for account information:

- Account Number: 99993010000113
- Branch: HO
- Principal Balance: 120,000.00
- Account Title: SAMEER
- Product: SO1 Resident TD - Regular
- Account Currency: INR

Below this is a tabbed interface with five tabs: "Customer Details", "Deposit Details", "Certificate Details", "Denomination Details", and "Inventory Details". The "Customer Details" tab is active and contains the following fields:

- Customer Name 1: SAMEER PATE (with a dropdown menu set to "Sole Owner")
- Customer Name 2: (empty)
- Customer Name 3: (empty)
- Address: Tlax Annex, Nirlon Complex, Goregaon
- City: Mumbai

At the bottom right of the window, there are four buttons: "Print", "Ok", "Close", and "Clear".

4. Modify the relevant information in the various tab screens.

Customer Details

The customer details tab provides details of the customer and their relationship with the account.

The screenshot shows a software window titled "TD Certificate Printing". At the top, there are several input fields: "Account Number" (99993010000113), "Branch" (HO), "Principal Balance" (120,000.00), "Account Title" (SAMEER), "Product" (301 Resident TD - Regular), and "Account Currency" (INR). Below these is a tabbed interface with "Customer Details" selected. This tab contains fields for "Customer Name 1" (SAMEER PATE, Sole Owner), "Customer Name 2", "Customer Name 3", "Address" (Tillex Annex, Nirlon Complex, Goregaon), and "City" (Mumbai). At the bottom right of the window are buttons for "Print", "Ok", "Close", and "Clear".

Field Description

Field Name	Description
Customer Name 1	[Display] This field displays the name of the customer and the relationship to the account, as specified while opening an account.
Customer Name 2	[Display] This field displays the name of the customer and the relationship to the account, as specified while opening an account.
Customer Name 3	[Display] This field displays the name of the customer and the relationship to the account, as specified while opening an account.
Address	[Display] This field displays the address of the customer.
City	[Display] This field displays the name of the city of the customer.

Deposit Details

The deposit details tab provides details of the deposit renewal number, status, deposit amount, etc.

Original Deposit No	Renewal No	Deposit No	Status	Value Date	Maturity Date	Deposit Amount	Maturity Amount	Payout Mode For Principle	Beneficiary Account For Principle	Payout Mode For Interest	Beneficiary Account For Interest	Selected
1	1	1	Open	31/12/2007	02/01/2009	120,000	134,042.88	Reinvest to Existing Account	99993010000113	Reinvest to Existing Account	99993010000113	N

Field Description

Column Name	Description
-------------	-------------

Original Deposit No

[Display]

This column displays the original deposit number.

The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal.

It will have new deposit running number, but will retain the original deposit no of the source deposit.

Renewal No

[Display]

This column displays the renewal number.

Renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.

Column Name	Description
Deposit No	<p>[Display]</p> <p>This column displays the deposit number.</p> <p>The Deposit Number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
Status	<p>[Display]</p> <p>This column displays the current status of the deposit.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Open – This deposit is open for various transactions. • Opened Today - This deposit is opened on the day of the transaction. • Closed - This deposit has been redeemed and thus is closed. • Closed Today - This deposit has been redeemed and closed on the day of the transaction. • Unclaimed - This deposit is matured and the grace period has ended. Thus it is transferred to the unclaimed GL account. • Matured - This deposit has matured. • Marked for Lien - This deposit is marked for lien. • Blocked - This deposit is blocked. • Forced Renewal - This deposit is marked for lien and thus has been force renewed. • Cheque Pending Clearing – This cheque deposited during the TD Payin is pending for clearing.
Value Date	<p>[Display]</p> <p>This column displays the date on which the deposit is initiated.</p>
Maturity Date	<p>[Display]</p> <p>This column displays the date on which the deposit will mature.</p>
Deposit Amount	<p>[Display]</p> <p>This column displays the available principal balance of the term deposit.</p>
Maturity Amount	<p>[Display]</p> <p>This column displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>

Column Name	Description
Payout Mode For Principle	[Display] This column displays the payout mode for the principal.
Beneficiary Account For Principle	[Display] This column displays the beneficiary account number for the principal amount.
Payout Mode For Interest	[Display] This column displays the payout mode for interest.
Beneficiary Account For Interest	[Display] This column displays the beneficiary account number for the interest.
Selected	[Display] This column displays the certificate printing status of the deposit. <ul style="list-style-type: none"> • Y - Indicates that the deposit is selected for certificate printing. • N - Indicates that the deposit is not selected for certificate printing.

5. Double-click a deposit in the **Deposit Details** tab to view the **Certificate Details** tab.

Certificate Details

The certificate details tab provides various details of the certificate like the date of issue, the type, amount, etc.

The screenshot shows the 'TD Certificate Printing' application window. At the top, there are input fields for Account Number (99993010000113), Branch (HO), Principal Balance (120,000.00), Account Title (SAMEER), Product (301 Resident TD - Regular), and Account Currency (INR). Below these are tabs for Customer Details, Deposit Details, Certificate Details (selected), Denomination Details, and Inventory Details. The Certificate Details tab contains a 'Certificates' section with a 'Deposit Number' field (1) and a table:

Certificate Issue Date	Certificate Type	Certificate No.	Deposit Amount	Certificate Amount	Print?
15/01/2008	1	1	120,000.00	0.00	N

At the bottom of the window are buttons for Print, Ok, Close, and Clear.

Field Description

Field Name **Description**

Certificates

Deposit Number

[Display]

This field displays the deposit number.

The Deposit Number signifies the number of deposits opened in an account.

The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.

Column Name **Description**

Certificate Issue Date

[Display]

This column displays the date on which the certificate is issued.

Column Name	Description
Certificate Type	[Display] This column displays the certificate type. The options are: <ul style="list-style-type: none"> • Initial (I) • Duplicate (D)
Certificate No.	[Display] This column displays the certificate number as specified in the Denominations tab.
Deposit Amount	[Display] This column displays the available principal balance of the term deposit.
Certificate Amount	[Display] This column displays the amount for which the certificate is issued.
Print?	[Toggle] Click the toggle status to Y to print a certificate for a deposit. The default value for toggle status is N .

6. Click the **+** button to navigate to the **Denomination Details** tab to add a new denomination.

Denomination Details

The denomination details tab provides details of the serial number of the TD amount, denomination of amount, etc.

Field Description

Field Name	Description
------------	-------------

Original Deposit Number

[Display]

This field displays the original deposit number.

The Deposit Number signifies the number of deposits opened in an account.

The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.

Deposit Amount

[Display]

This field displays the available principal balance of the term deposit.

Column Name	Description
Sr. No.	[Display] This column displays the serial number for the denominations specified for the certificate.
Denomination	[Mandatory, Numeric, 16] Type the denominations of the TD certificate. The certificates will be issued for the specified denomination. For example 500, 100, etc.
Series Number	[Mandatory, Numeric, 16] Type the serial number of the TD certificate. This is the series of the inventory for the certificates you want to print.
Start No	[Mandatory, Numeric, 16] Type the start number of the series, from which you want to print the certificates. For example, TD certificates for the inventory are in the series of AS123. You want certificates starting from the number 150.
End No	[Mandatory, Numeric, 16] Type the end number of the series. The system by default displays the start number as the end number.
Total Certificates	[Mandatory, Numeric, 16] Type the number of certificates. The system calculates the total certificates based on the start number and end number of the certificates. For example, if you want the certificates in denomination of 500 for a deposit of 5000. You can specify the start number as 100 and the end number as 109. The system calculates the total certificates as 10. This field is editable. The End Number column gets updated if there is any modification in this column.
Net Amount	[Display] This column displays the net amount for which the certificates will be issued. <i>Net Amount = Denomination X Total Certificate.</i>

Inventory Details

The inventory details tab displays information about the stock code, issuer code, etc.

Field Description

Field Name	Description
Stock Code	[Display] This field displays the stock code of the TD certificate.
Stock Sub Type	[Optional, Numeric, 40] Type the sub type of the stock.
Issuer Code	[Optional, Alphanumeric, 22] Type the code of the issuer who has issued the stock.
Currency Code	[Optional, Alphanumeric, 22] Type the code of the currency in which the stock is issued.

1.

7. Enter the required information in the **Denomination Details** tab and click the **Validate** button.
8. The system displays the **Certificate Details** tab. Click the **OK** button.
9. The system displays the message "Authorization required. Do You Want to continue?". Click the **OK** button.
10. The system displays the **Authorization Reason** screen.
11. Enter the required information and click the **OK** button.
12. The system displays the message "Authorisation Successful". Click the **OK** button.
13. Click the **Print** button to print the certificate.
OR
Click the **Close** button.

3.5. TDM24 - Lien Master Maintenance

The bank can mark a lien on the term deposit as a security for a loan or an overdraft. If the lien is marked against a term deposit, customer is not allowed to withdraw the amount from the term deposit which lien is marked.

The different kinds of lien marked are:

- Internal Lien - The internal lien is automatically marked by the system on the term deposit which is kept as collateral. The two types of internal lien are:
- Overdraft – This lien is system-initiated and is marked for online transaction done against a Current and Savings account, which is having insufficient funds and has overdraft facility against a term deposit account.
- Loan / APS – This type of lien is marked as a security for Loan or Loan application. This lien is marked automatically by the system on the deposit when the customer specifies that the term deposit will be kept as collateral against the loans.
- External – This type of lien is marked for external reasons.

A deposit marked for lien will be force renewed on the maturity date irrespective of the maturity instruction specified. This is done as security against the loan or overdraft taken by the customer from the bank.

You can view the different liens which are marked against an individual deposit along with details like the start and expiry date of the lien, the lien amount, type of lien, reason for the lien and the account or instrument number against which the lien is marked. If the internal lien is placed on the principal or the principal + interest amount the system displays the lien marked on the principal and the interest. The propagate option increases the drawing power of the customer for the Current and Savings account.

You can place an external lien on a deposit. The lien will be placed when there is a court order or the term deposit has to be blocked for some external reason. You have to specify the lien amount, the description and the reason for the lien. The start date, end date and the maturity instruction is defaulted by the system.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Add, Modify, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add a lien

1. Type the fast path **TDM24** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > Lien Master Maintenance**.
2. The system displays the **Lien Master Maintenance** screen.

Lien Master Maintenance

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the valid TD account number of the customer.
Account Title	[Display] This field displays the title of the account.
Original Deposit Number	[Mandatory, Pick List] Select the original deposit number, on which the lien will be marked for the TD account, from the pick list.

Field Name	Description
Lien Type	<p>[Optional, Drop-Down]</p> <p>Select the lien type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • APS • External • Corporate • Stock Invest • Loan • Overdraft • Sweep In <p>This field is enabled in the Inquiry mode.</p>
Lien Instrument/Account No	<p>[Display]</p> <p>This field displays the lien instrument / account number.</p>
Lien Number	<p>[Display]</p> <p>This field displays the lien number of the TD account.</p> <p>This field is displayed in the Add mode.</p>
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number that signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p> <p>This field is displayed in the Add mode.</p>
Renewal Number	<p>[Display]</p> <p>This field displays the renewal number that signifies the number of deposits created out of the source deposit either due to renewals or the payouts.</p> <p>This field along with the original deposit number can explain the chronology of a particular deposit.</p> <p>This field is displayed in the Add mode.</p>

Field Name	Description
Lien Status	<p>[Optional, Drop-Down]</p> <p>Select the lien status from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Live Liens, • Expired Lines • All Lines <p>By default it displays "Live Lines". This field is enabled in the Inquiry mode.</p>

3. Click the **Add** button.
4. Type the account number and press the **<Tab>** or **<Enter>** key.
5. Select the original deposit number from the pick list.

Lien Master Maintenance

6. The system enables the **External Lien Maintenance** tab; enter the required information in the tab.

External Lien Maintenance

This tab is used to mark external lien on deposit.

Field Description

Field Name

Description

Lien Type

[Display]

This field displays the lien type.

The field takes a default value as **External**. Only an external lien can be added.

An internal lien is marked automatically by the system.

Lien Date

[Display]

This field displays the date on which the lien is marked.

The system by default displays the current date as the lien start date.

Expiry Date

[Display]

This field displays the date on which the lien will expire.

The system by default displays the deposit maturity date as the expiry date.

Field Name	Description
Lien Amount	[Mandatory, Numeric, 13, Two] Type the lien amount for which the lien will be marked on the TD.
Description	[Mandatory, Alphanumeric, 120] Type the description of the lien.
Maturity Instruction	[Display] This field displays the maturity instruction as Force Renew , by default. A deposit marked for lien is force renewed on maturity irrespective of the maturity instruction defined at the product or account level.
Department Code	[Optional, Pick List] Select the department code from the pick list. The department code is maintained using the LOB Master (Fast Path: BA431) option.
Department Name	[Display] This field displays the department name based on the department code selected in the adjacent field.
In Favour Of	
It is mandatory to select either the Internal or External option.	
Internal	[Optional, Radio Button] Click Internal , if the lien details are to be maintained for an existing customer.
External	[Optional, Radio Button] Click External , if the lien details are to be maintained for an external entity.
Search Criteria	[Conditional, Drop-Down] Select the search criteria from the drop-down list. The options are: <ul style="list-style-type: none"> • Customer Short Name • Customer IC • Customer ID This field is enabled if the Internal option is selected from the In Favour Of section.

Field Name	Description
Search String	<p>[Conditional, Alphanumeric, 40]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p> <p>This field is enabled if the Internal option is selected from the In Favour Of section.</p>
Customer Name	<p>[Conditional, Alphanumeric, 120]</p> <p>Type the customer name.</p> <p>This field is enabled if the External option is selected from the In Favour Of section.</p> <p>If the Internal option is selected from the In Favour Of section, then this field displays the full name of the customer.</p>
Customer ID	<p>[Conditional, Numeric, 10]</p> <p>Type the customer ID.</p> <p>This field is enabled if the External option is selected from the In Favour Of section.</p> <p>If the Internal option is selected from the In Favour Of section, then this field displays the customer Id.</p>
Facility Code	
Collateral Code	<p>[Optional, Pick List]</p> <p>Select the collateral code from the pick list.</p>
Collateral Name	<p>[Display]</p> <p>This field displays the collateral name based on the collateral code selected in the adjacent field.</p>
Reason For Lien	<p>[Mandatory, Drop-Down]</p> <p>Select the reason for the lien to be marked from the drop-down list.</p>
Propagate	<p>[Optional, Check Box]</p> <p>Select the Propagate check box for lien other than an external lien.</p>
Link Reference Serial No	<p>[Optional, Numeric, 40]</p> <p>Type the link reference serial number.</p>

Field Name	Description
Principal Lien Amount	<p>[Display]</p> <p>This field displays the principal TD amount on which the lien is imposed.</p> <p>If the lien is imposed on the principal + interest, this column displays the principal amount on which the lien is imposed.</p>
Serial No	<p>[Optional, Numeric, 40]</p> <p>Type the serial number.</p>
Interest Lien Amount	<p>[Display]</p> <p>This field displays the interest earned on the TD amount on which the lien is marked.</p> <p>If the lien is marked on the principal + interest, then this column displays the interest amount on which the lien is marked else it displays the value as zero.</p>
Purpose Of Lien	<p>[Optional, Alphanumeric, 40]</p> <p>Type the purpose of lien.</p>

7. Click the **OK** button.
8. The system displays the message "Record Added. Authorisation Pending...". Click the **OK** button.
9. The lien details are added once the record is authorised.

To view the liens marked on an account

1. Click the **Inquiry** button.
2. Enter the account number and press the **<Tab>** or **<Enter>** key.
3. Select the original deposit number from the pick list and the lien type from the drop-down list.
4. The system displays the lien master details in the **All Lien Inquiry** tab.

All Lien Inquiry

All types of lien are maintained in the account.

Field Description

Field Name	Description
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Lien Amount	[Display] This field displays the total lien amount placed on the deposit.

Column Name	Description
Original Deposit No	[Display] This column displays the original deposit number. The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number, but will retain the original deposit number of the source deposit.

Column Name	Description
Renewal No	<p>[Display]</p> <p>This column displays the renewal number.</p> <p>The renewal number signifies the number of deposits created out of the source deposit either due to renewals, or the payouts.</p> <p>This field along with the original deposit number can explain the chronology of a particular deposit.</p>
Deposit No	<p>[Display]</p> <p>This column displays the deposit number on which the lien is marked.</p>
Lien No	<p>[Display]</p> <p>This column displays the sequence in which the lien is placed on the deposit.</p>
Type	<p>[Display]</p> <p>This column displays the type of lien, which is marked on the deposit.</p>
Amount	<p>[Display]</p> <p>This column displays the lien amount marked on the deposit.</p>
AC No / Description	<p>[Display]</p> <p>This column displays the appropriate beneficiary account number in case of internal lien.</p> <p>For external lien this field displays the description entered at the time of creation of lien.</p>
Start Date	<p>[Display]</p> <p>This column displays the start date of the lien.</p> <p>The start date is the date on which the lien is marked on the deposit.</p>
Expiry Date	<p>[Display]</p> <p>This column displays the expiry date of the lien.</p>
Maturity Instr.	<p>[Display]</p> <p>This column displays the maturity instruction.</p> <p>A deposit marked for lien is force renewed on maturity irrespective of the maturity instruction defined at the product or account level.</p> <p>The system displays the default maturity instruction as Force Renew.</p>

Column Name	Description
Reason	<p>[Display]</p> <p>This column displays the reason for the lien to be marked on the deposit.</p> <p>This column displays the reason if the lien is external.</p>
Propagate	<p>[Display]</p> <p>This column displays the propagate option.</p> <p>If the propagate option is enabled for the lien, then the field displays Y.</p> <p>If the Principal + Interest option is selected in the Lien Allowed field at the product level and the Propagate check box is checked at the Collateral level, then this option increases the drawing power of the customer.</p> <p>This option is available only for internal lien.</p> <p>For example, a lien is marked on a TD of 1, 00,000 against the drawing power of the CASA account. The drawing power is specified as 50% of the TD. The compounding frequency is yearly and payout is at maturity. For the first year the drawing power of the customer will be 50% of 1, 00,000 i.e. 50,000. At the end of the year the customer earns an interest of 5,000, which will be added to the principal because of compounding effect. The principal will now be 1, 05,000. Thus, the drawing power will increase to 50% of 1, 05,000 i.e. 52,500.</p>
Lien Principal Amount	<p>[Display]</p> <p>This column displays the principal TD amount on which the lien is imposed.</p> <p>If the lien is imposed on the principal + interest, this column displays the principal amount on which the lien is imposed.</p>
Lien Interest Amount	<p>[Display]</p> <p>This column displays the interest earned on the TD amount on which the lien is imposed.</p> <p>If the lien is imposed on the principal + interest, this column displays the interest amount on which the lien is imposed. If the lien is not imposed on the interest this column will be blank.</p>
Department	<p>[Display]</p> <p>This column displays the department name corresponding to the department code maintained for the lien.</p>
In Favour Of	<p>[Display]</p> <p>This column displays the customer name and Id.</p>
Facility Code	<p>[Display]</p> <p>This column displays the collateral code and collateral name.</p>

Column Name	Description

Checker Id	[Display] This column displays the checker ID.

5. Click the **Close** button.

3.6. TD022 - TD Nominee Maintenance

Using this option you can record the nominee details for a deposit held under a term deposit account. You can search for the customer who is appointed as the nominee by the term deposit account holder and record the details.

The nominee details can be added, amended or deleted by choosing the appropriate options.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add TD Nominee

1. Type the fast path **TD022** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TD Nominee Maintenance**.
2. The system displays the **TD Nominee Maintenance** screen.

TD Nominee Maintenance

The screenshot shows the 'TD Nominee Maintenance' application window. The window title is 'TD Nominee Maintenance*'. The interface is divided into several sections:

- Account and Deposit Fields:** Includes 'Account No.', 'Deposit No.', 'Product', 'Customer Id', 'Org Deposit No.', 'Renewal No.', 'Account Currency', and 'Customer Name'.
- Nominee Search Section:** Includes 'Search Criteria' (with a dropdown menu set to 'Customer Short Name'), 'Search String', 'Nominee', and 'Nominee ID'.
- Record Details Table:** A table with columns: 'Input By', 'Authorized By', 'Last Mnt. Date', 'Last Mnt. Action', and 'Authorized'. The table is currently empty.
- Action Buttons:** A row of radio buttons for 'Add By Copy', 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry' (which is selected). To the right are buttons for 'UDF', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number of the customer.
Org Deposit No	[Mandatory, Pick List] Select the original deposit number for which the nominee has to be assigned from the pick list. The original deposit number is the source or the parent deposit number, from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number, but will retain the original deposit no of the source deposit.
Deposit No	[Display] This field displays the running term deposit number. This signifies the number of deposits opened in an account. The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.
Renewal No	[Display] This field displays the renewal number. Renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.
Product	[Display] This field displays the product code and the name, under which the TD account is opened.
Account Currency	[Display] This field displays the currency assigned to the product, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Customer Id	[Display] This field displays the customer ID. A customer ID is an identification number generated by the system after customer addition is completed successfully. The number will be unique to a customer across the system and the customer search can be made on this basis. This is the number, which the system uses to track the customer. The system displays the customer ID, when the customer is validated.

Field Name	Description
Customer Name	<p>[Display]</p> <p>This field displays the full name of the customer, based on the account number entered.</p> <p>The customer name is added in the Customer Addition (Fast Path: 8053) option.</p>
Nominee	
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria to search for the customer from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer Ic - Customer Identification criteria (IC) given by a central authority. • Customer Id - Unique identification given by the bank
Search String	<p>[Mandatory, Alphanumeric, 30, Pick List]</p> <p>Type the search string.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customer's having those letters in their respective criteria. Select the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
Nominee	<p>[Display]</p> <p>This field displays the name of the customer who is appointed as the nominee.</p>
Nominee ID	<p>[Display]</p> <p>This field displays the ID of the customer who is appointed as the nominee.</p>

3. Click the **Add** button.
4. Enter the account number and press the **<Tab>** or **<Enter>** key.
5. Select the original deposit number from the pick list.
6. Select the search criteria from the drop-down list and type the search string and press the **<Tab>** or **<Enter>** key and select the customer from the pick list.

3.7. TD028 - TD Block/Unblock Account Status

Using this option you can change the status of the term deposit account using this option. The account can be marked as blocked and the reason for the same can be specified. A blocked account can be unblocked along with the reason for the action.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To block/unblock the account status

1. Type the fast path **TD028** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > TD Block/Unblock Account Status** .
2. The system displays the **TD Block/Unblock Account Status** screen.

TD Block/Unblock Account Status

The screenshot displays the 'TD Block/Unblock Account Status' screen. It features a light blue background with a white border. At the top, there are two input fields: 'Account No:' and 'Old Account No for Re-Booked TD:'. Below these are several dropdown menus and checkboxes: 'Account Status:', 'Currency:', 'Account Blocked:', 'Reason:', and 'Legal Reason:'. A large section in the middle contains multiple input fields for 'Enforcement Authority Name', 'Address Line 1', 'Address Line 2', 'Address Line 3', 'State', 'City', 'Country', 'Zip', 'Contact Number 1', 'Contact Number 2', 'Letter Issue Date', and 'Transaction Branch Code'. At the bottom, there is a navigation bar with buttons for 'UDF', 'OK', 'Close', and 'Clear'. Below the navigation bar, there is a row of small text labels: 'Card', 'Change Pin', 'Cheque', 'Cost Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', and 'Travellers Cheque'.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number of the customer.
Old Account No for Re-Booked TD	[Conditional, Numeric, 14] Type the TD account number of the customer. The user has to input the same if advice generation for manually re-booked TD is required in EOD and Old TD account number field will be enabled only if the TD has been blocked for legal reason.
Account Status	[Display] This field displays the current status of the account. The options are: <ul style="list-style-type: none"> • Regular - This account is a regular account that is opened for various transactions. • Account Opened Today - This account is opened on the day of the transaction. • Closed - This account is closed. • Account Closed Today - This account has been closed on the day of the transaction. • Unclaimed - This account has remained unclaimed by the customer. • Matured - This account has matured. • Account Blocked - This account is blocked. • Forced Renewal - This account is marked for lien and thus has been force renewed.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Account Blocked	[Optional, Check Box] Select the Account Blocked check box to block the account.

Field Name	Description
Reason	<p>[Optional, Drop-Down]</p> <p>Select the reason for blocking the account from the drop-down list.</p> <p>This field is enabled when the Account Blocked check box is selected.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Failure in Availability • Loan Non-repayment • Others • Special Customer • PA Customer
Legal Reason	<p>[Display]</p> <p>This field displays the legal reason checkbox and this will be based on the reason code maintenance screen (BAM40).</p>
Enforcement Authority Name	<p>[Conditional, Mandatory, Alphanumeric, 120]</p> <p>Type the enforcement authority name.</p>
Address Line 1	<p>[Optional, Alphanumeric, 120]</p> <p>Type the address of the enforcement agency which has directed the hold.</p>
Address Line 2	<p>[Optional, Alphanumeric, 120]</p> <p>Type the address of the enforcement agency which has directed the hold.</p>
Address Line 3	<p>[Optional, Alphanumeric, 120]</p> <p>Type the address of the enforcement agency which has directed the hold.</p>
City	<p>[Conditional, Mandatory, Pick-list]</p> <p>Select the city of the enforcement agency.</p>
State	<p>[Conditional, Mandatory, Pick-list]</p> <p>Select the state of the enforcement agency.</p>
Country	<p>[Conditional, Mandatory, Pick-list]</p> <p>Select the country of the enforcement agency.</p>
Zip	<p>[Conditional, Mandatory, Alphanumeric, 15]</p> <p>Type the zip code.</p>
Contact Number 1	<p>[Optional, Numeric, 15]</p> <p>Type the contact number.</p>

Field Name	Description
Contact Number 2	[Optional, Numeric, 15] Type the contact number.
Letter Reference Number	[Conditional, Mandatory, Alphanumeric, 60] Type the letter reference number.
Letter Issue Date	[Conditional, Mandatory, Alphanumeric, 60] Type the letter issue date to block the TD as directed by the Enforcement Agency. The Date format will be DD/MM/YYYY.
Transaction Branch Code	[Conditional, Mandatory, Alphanumeric, Four, Pick-list] Select the transaction branch code.

Note: The details of the enforcement agency will be displayed, but user can modify the details. If the enforcement agency details are not captured for the old account number then the enforcement agency details will be blank. These fields will be enabled only when the TD is blocked for legal reason.

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the account blocked check box and select the reason from the drop-down list.

TD Block/Unblock Account Status

- 2.

5. Click the **Ok** button.
6. The system displays the message "Authorization required. Do You Want to continue?". Click the **OK** button.
7. The system displays the **Authorization Reasons** screen.
8. Enter the relevant information and click the **Grant** button.
9. The system displays the message "Modification Successful". Click the **OK** button.

3.8. TDM05 - TD Account CBR Codes Maintenance

CBR Codes are user-defined categories to classify customer i.e. accounts for Central Bank reporting purpose. Defining these categories facilitates generating exclusive MIS reports over and above the standard reports available within **Oracle FLEXCUBE**.

Using this option you can link the accounts of customers to the defined categories or CBR codes, as for example Customer Code, Region, Sector, etc.

Definition Prerequisites

- CHM01 - CASA Product Master Maintenance
- BA080 - CBR Pick Lists Maintenance
- BA078 - CBR Label Maintenance
- After defining the TD Product, TD Product Rates must be defined for the newly defined TD Product.

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add a TD account CBR code

1. Type the fast path **TDM05** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > TD Account CBR Codes Maintenance**.
2. The system displays the **TD Account CBR Codes Maintenance** screen.

TD Account CBR Codes Maintenance

Field Description

Field Name	Description
Account No.	[Mandatory, Numeric, 14] Type the TD account number for which you want to assign a CBR code.
Customer Name	[Display] This field displays the customer name based on the account number.
Account Currency	[Display] This field displays the TD account currency.
Branch Name	[Display] This field displays the branch code and branch name where the TD account is opened and maintained.
Account Status	[Display] This field displays the account status. For example, Account Opened Today, Account Closed, etc.

Field Name	Description
Product Name	[Display] This field displays the product name under which the TD account is initiated.
Label	[Display] This field displays the description of the CBR label. The system maintains a pick list of the labels.
Id	[Editable/ Pick List] Enter or select the ID from the pick list.
Description	[Display] This field displays the description for the selected Id.
Label	[Display] Label is a description of the CBR label.
Date	[Pick List] This field displays the date maintained for the TD.

3. Click the **Add** button.
4. Enter the account number and press the **<Tab>** or **<Enter>** key.
5. Enter the required information in the various fields.
6. Click the **OK** button.
7. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **OK** button.
8. The account reporting codes are added once the record is authorised.

3.9. TDM48 - Backdated Interest Rate Change

Using this option you can change the interest rate variance of an existing deposit with effect from a back date. You have the option to give a positive or a negative variance on the existing deposit rate in the screen.

This variance has to be within the interest variance limit defined at the product level. Also, after giving the variance the new interest rate should fall within the minimum and maximum interest rate range defined at the product level. You can specify the effective date for the interest rate change which can be the current date or a back date.

The backdated interest rate change will not be permitted prior to the following

- Last Interest Payout date
- Last Interest Compounding date
- Last Financial year end
- On the day of Pay In of a deposit.
- Value date of the deposit- The date from which the interest will be calculated for a deposit (in case of backdated account opening)
- Deposits with 'Open Today' status
- Interest start date – The date from which the interest calculations will start from a new TD
- Last part Redemption date of the related deposit.

The system will not allow both backdated interest rate change and the term deposit redemption on the same day. You can either redeem the deposit or can set up instruction for backdated interest rate change in a single day for the same deposit i.e. if the redemption is done, backdated interest rate change will not be allowed on the same day or if the backdated interest rate is changed then redemption is not allowed on the same day unless user deletes the rate change instruction. PMI rate changes will not be allowed for this type of change. If a sweep in maintenance exists on the deposit i.e. if the deposit is linked as a sweep in provider to a CASA account, the backdated interest rate change will not be allowed for such a deposit.

Example: Consider the interest rate details for a deposit are as follows:

- Interest Rate - 6% • Interest Variance - +1%
- Product variance - +2% • Net Effective rate - 9%
- Interest Variance set at Product level - -5 to +5 (In Percentage)
- Minimum & Maximum Interest rate for the Product - 2 to 12 (In Percentage)
- Accrual Frequency - Monthly • Interest Payout Frequency - Quarterly
- Last Accrual date - 31st Oct 2007
- Last Interest Payout date - 30th Sep 2007
- Current date - 15th Nov 2007
- On 15th Nov 2007, the user wants to change the interest rate for the said deposit with effect from a back date i.e. from 20th Oct 2007. The user increases the interest variance by 2% w.e.f. 20th Oct 2007 and the Interest variance field will be modified to +3%. The Net Effective interest rate will become 11% for the deposit. In the EOD process, FLEXCUBE will recalculate the accrued interest as per the new interest rate for the period from 20th to 31st Oct, and the

TDM48 - Backdated Interest Rate Change

adjustment entries will be passed. On 30th Nov, the regular accrual will happen for the month of November with the new interest rate.

Definition Prerequisites

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number of the customer.
Deposit Number	[Mandatory, Pick List] Select the deposit number from the pick list for which the backdated variance has to be applied. The system will show a pick list of only those deposits of the chosen account which are existing (regular, blocked/lien). Closed or matured deposits will not be available in the pick list.
Effective date	[Mandatory, Pick List] Select the date from which the backdated interest rate change should be applicable from the pick list. The date can be modified to a back date, but not to a future date. In Inquiry mode, user will be able to choose a date from the pick list. The pick list will only have those dates on which the interest rate change has been done for the deposit.
Account Title	[Display] This field displays the account title of the customer.
Product	[Display] This field displays the product under which the TD account is opened.
Customer Name	[Display] This field displays the name of the customer.
Customer Id	[Display] This field displays the customer Id of the entered account number.
Branch	[Display] This field displays the branch of the TD account.
Currency	[Display] This field displays the currency of the entered TD account.
Last Compounding Date	[Display] This field displays the date on which the last compounding occurred.
Last Redemption Date	[Display] This field displays the last part redemption date for the deposit.
Last Interest Payout Date	[Display] This field displays the last interest payout date for the deposit.

Field Name	Description
Interest Start Date	[Display] This field displays the interest start date for the deposit.
Interest Rate	[Display] This field displays the interest rate linked to the index code attached to the deposit.
Scheme Rate	[Display] This field displays the interest rate applicable on the scheme.
Interest Variance	[Mandatory, Numeric, Three, Six] Type the interest variance. This field by default displays the deposit level variance given at the time of deposit opening. For doing a backdated interest rate change, enter a positive or a negative variance in this field. Positive or negative variance given in this field has to be within the variance defined at the product level. If a variance already exists which is to be modified, the new data input will override the existing variance.
Scheme Variance	[Display] This field displays the interest variance applicable on the scheme. For more details, Refer to Relationship Pricing User Manual .
Product Variance	[Display] This field displays the interest variance defined at the product level for the slab in which TD principal balance and term fits in.
Net Effective Rate	[Display] This field displays the net interest rate which is paid for the deposit. Net Effective = Interest rate + Interest Variance + Product Variance

3. Click the **Add** button.
4. Type the account number and select the deposit number from the pick list.

4. Payin Processing

4.1. 1356 - Mixed Payin

Payin in **Oracle FLEXCUBE** refers to the process of depositing an amount into a term deposit account .

There are two types of Payin:

- Normal Payin: The deposit is done on a newly opened term deposit account
- Add-on or Top-up Payin: The deposit is done on an already active account

The need for Add-on or Top-up Payin can be explained with the following examples:

- For every new deposit that is made, the rate of interest of the new deposit as well as existing deposits can be (re)computed based on the total amount under the parent term deposit account.
- At the time of renewal, you can add additional amounts to the maturity value and club the amounts and make a single deposit with a new principal.
- Sweep-Out amounts from CASA into existing accounts to avoid creation of new term deposit accounts.
- Interest or/and Principal that needs to be either paid out or redeemed can be partly reinvested into the same term deposit account.

A deposit on an account that does not have any prior deposit is automatically detected as a "Normal" payin by the system. Payin can be done by various modes like:

- Cash
- Cheque
- Transfer from CASA
- Transfer from GL
- Bankers Cheque
- Demand Draft

A payin transaction can include deposits made through one or more of the modes listed above.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To define a new mixed payin transaction

1. Type the fast path **1356** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Transfer > Mixed Payin**.
2. The system displays the **Mixed Payin** screen.

Mixed Payin

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number in which you have to make a pay-in.
Principal Balance	[Display] This field displays the principal balance of the TD account. Principal balance is the sum of the principal amount of all the deposits, falling under a single TD account. The account currency is displayed in the adjacent field.
Customer Name	[Display] This field displays the name of the customer who holds the TD account.
Payin Amount	[Display] This field displays the amount for which the new TD is opened. The account currency is displayed in the adjacent field.

Field Name	Description
Txn Ref No	<p>[Display]</p> <p>This field displays the system generated transaction number. This number is unique for every transaction. The transaction number helps a teller to keep track of the various transactions.</p>
Value Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the value date from the pick list.</p> <p>By default, the system displays the current date as the value date. The value date signifies the date from which the TD is effective.</p> <p>The value date and the process date are usually same. However, a value date can be a previous date. The adjustments on the account take place from the value date.</p> <p>In case of past value dating of the deposit, Transfer from CASA and Transfer from GL are the only valid payin modes. Interest payable to the account will be calculated with retrospective effect, and paid to the account.</p>
User Ref No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the transaction reference number as the user reference number.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key.

Acy Rate	<p>[Display]</p> <p>This field displays the rate at which the account currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.</p> <p>The teller's right to change the account currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Acy Cost Rate	<p>[Display]</p> <p>This field displays the account currency cost rate. The cost rate for the account currency is defaulted to the mid rate for the currency.</p>
Payin Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount that you want to payin for opening the TD.</p> <p>This amount is in TD account currency.</p> <p>You need to specify the payin amount when the payin is done through the following mode:</p> <ul style="list-style-type: none"> • Cash • Transfer from CASA • Transfer from GL
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the currency of the cheque from the drop-down list.</p> <p>This field, by default, displays the account currency as the transaction currency.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.</p>
Txn Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.</p> <p>The teller's right to change the transaction currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the transaction currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Txn Cost Rate	<p>[Display]</p> <p>This field displays the cost rate for transaction currency that is defaulted to the mid rate for the currency.</p>

Field Name	Description
Txn Amount	<p>[Display]</p> <p>This field displays the transaction amount.</p> <p>The transaction amount depends on the Txn Ccy selected. When transaction currency is selected, the transaction amount is derived using the appropriate currency conversion rate.</p> <p>For example, if the payin mode is Cheque, the transaction amount should be specified, using which the system calculates and populates the payin amount field automatically, based on transaction currency and transaction rate.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Note: If payin mode is BC/DD, neither the Payin Amount nor the Transaction Amount should be entered. Based on the BC/DD serial no, the system picks the amount of the instrument.</p> </div>
SC Amount	<p>[Display]</p> <p>This field displays the service charge amount when the payin is done in the form of a BC or DD.</p> <p>It is possible to either waive the SC or increase the amount using the SC Details tab.</p>
Net Payin Amount	<p>[Display]</p> <p>This field displays the actual amount in transaction currency that will be paid towards opening a TD, in the chosen payin mode.</p>

5. Depending upon the **Payin Mode** selected the system will enable the relevant tab. For example, if **Cash** is selected from the **Payin Mode** drop-down list then the system will display the **Cash** tab.
6. Double-click the amount in the **Net Payin Amount** column to enable the appropriate tab.
7. Enter the relevant information in the tabs and click the **Save** button.

Cash

Field Description

Field Name	Description
GL Account Number	[Display] This field displays the GL code for cash (as maintained by the bank), which will be debited to pay the amount of the TD. This account will be debited with the pay-in amount.

Field Description

Field Name	Description
------------	-------------

Clearing Type	[Mandatory, Drop-Down]
----------------------	------------------------

Select the clearing type from the drop-down list.

The bank can set up multiple clearing types, where cheques that are required to be cleared at different times of the day are deposited so that they can be treated differently. All processes for a cheque from outward clearing, running of value date, and marking late clearing, etc. happens on the basis of the clearing type.

Interest gets accrued on the TD from the specified value date.

Field Name	Description
Chq No	<p>[Mandatory, Numeric, 12]</p> <p>Type the cheque number which is present on the MICR line of the instrument.</p> <p>When the cheque is deposited into any payee's account, the cheque number is used to ensure that the duplicate entries are not made in the system (that the same cheque is not deposited multiple times in the system.). On deposit of every cheque, cheque number along with the routing number and drawer account number (all the three are present on the MICR line) are used to check for the presence of any duplicate instrument. If duplicate instruments are found, cheque deposit will be rejected unless the earlier cheques are all marked as returned.</p>
Chq Literal	<p>[Mandatory, Drop-Down]</p> <p>Select the cheque literal value from the drop-down list.</p>
Chq Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the cheque date which is present on the instrument from the pick list.</p> <p>The date can also be selected from the calendar.</p> <p>This date has to be less than or equal to current posting date. This date is used in checking validity of the instrument. Instruments become stale if the cheque date is prior to the current posting date by the stale period (defined in Settlement Bank Parameters).</p>
Drawer Acct No	<p>[Mandatory, Numeric, 14]</p> <p>Type the drawer account number.</p> <p>The drawer account number is the account number of the person who has issued the cheque.</p> <p>The drawer account is the account from where the funds will come into the beneficiary account. This number is generally printed on the cheque leaf.</p> <p>If the cheque is drawn on a different bank, the drawer account number will not be validated by the system.</p> <p>If the cheque is drawn on your own bank, the system will validate the drawer account number for its correctness.</p>

Field Name	Description
Routing No	<p>[Mandatory, Numeric, Nine]</p> <p>Type the routing number against which the cheque has been drawn.</p> <p>The routing number is the combination of the bank code and the branch code.</p> <p>The combination can be obtained from the Routing Branch Maintenance (Fast path: STM54) option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>For an inward clearing cheque this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up at Settlement Bank Parameters option.</p>
Bank	<p>[Display]</p> <p>This field displays the bank name corresponding to the bank code extracted from the routing number.</p>
Value Date	<p>[Display]</p> <p>This field displays the value date of the TD.</p> <p>The value date is calculated by the system depending on the information like clearing type, routing number and other clearing definitions done by the bank.</p> <p>The value date signifies the date from which the life of the TD starts i.e. the date from which the TD will be effective. The interest calculations for a TD will start from this date.</p>
Branch	<p>[Display]</p> <p>This field displays the branch name corresponding to the branch code and bank code extracted from the routing number.</p>
Late Clearing	<p>[Display]</p> <p>This field displays the late clearing.</p> <p>If the field displays Y, it means that clearing cut-off for current posting date for the clearing type chosen is already over.</p> <p>The instrument that is being deposited is considered Late for clearing, and the same will be treated as though it is deposited on the next working date for all value date calculations.</p>
Sector	<p>[Display]</p> <p>This field displays the sector name corresponding to the sector code extracted from the routing number.</p>
Chg. Commission	<p>[Display]</p> <p>This field is for future use.</p>

Field Name	Description
Narrative	[Mandatory, Alphanumeric, 40] Type the narration. By default, the system displays TD Cheque Deposited .

XferFrom CASA

Field Description

Field Name	Description
Account Number	[Mandatory, Pick List] Select the account number from the pick list. The appropriate CASA account number from which the TD payin amount is to be debited.
Customer Name	[Display] This field displays the name of the customer who holds the CASA Account.

Field Name	Description
Cheque No	<p>[Optional, Numeric, 12]</p> <p>Type the number of the CASA account cheque given by the customer.</p> <p>This cheque number must be a valid number of an issued, unpaid cheque. All validation applied at the time of cheque withdrawal will be applicable in this case.</p>
Cheque Date	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the cheque date from the pick list.</p> <p>The cheque date is the date written on the instrument. This date has to be less than or equal to the current posting date. This date is used to check the validity of the instrument. Instruments become stale if the cheque date is prior to the current posting date by the stale period defined in Settlement Bank Parameters (Fast Path: STM59) option.</p> <p>If the cheque date is greater than the current posting date, then the cheque has to be treated as a post-dated cheque. Usually, post-dated cheques are not allowed.</p> <p>This field is enabled only if Cheque No is entered.</p>
Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration of the transaction.</p> <p>The system displays the default narration "Payin By CASA". You can change the narration, if required.</p>
Txn Amount	<p>[Display]</p> <p>This field displays the transaction amount in the local currency of the bank.</p>

Field Description

Field Name	Description
Sr. No	[Display] This field displays the row number.
SC Code	[Display] This field displays the unique service code.
Description	[Display] This field displays the SC description.
SC Ccy	[Display] This field displays the currency in which the SC will be charged.
SC Amount	[Display] This field displays the SC amount.

Field Name	Description
Amount (ACY)	<p>[Display]</p> <p>This field displays the service charges levied for issuing the instrument.</p> <p>The charges will be calculated in the account currency. The system posts the entries to the accounts in the account currency.</p> <p>Account currency is the currency assigned to the product at the product level, under which the account is opened.</p> <p>If the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.</p>
Amount (TCY)	<p>[Display]</p> <p>This field displays the service charges levied for issuing the instrument.</p> <p>The charges will be calculated in the transaction currency. This is the amount, which will be deducted from the redemption amount.</p> <p>The transaction currency is the currency in which the customer wants to transact.</p>
Amount (LCY)	<p>[Display]</p> <p>This field displays the service charges levied for issuing the instrument.</p> <p>The charges will be calculated in the local currency of the bank.</p> <p>The local currency of the country where the bank is situated is the local currency of the bank.</p>

9. Click the **Ok** button. The system displays the message "Deposit Number has been created".
10. Click the **OK** button. The system displays the **Document Receipt** screen.
11. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Yes** button.
OR
Click the **Cancel** button.
12. The system displays the **TD Multiple Payout Instructions** (Fast Path: TD039) option.

4.2. 1007 - Quick Payin By CASA

Using this option you can transfer funds from the customer's CASA account to fund a plain transaction for a term deposit account. This option offers a quicker solution to the pay-in requirement for the teller. The teller can alternately use Mixed Payin (Fast Path: 1356) option which offers other mode of pay-in.

Based on the computed transaction amount, FLEXCUBE will check funds availability in the casa account. In case of insufficient funds in the casa, FLEXCUBE will demand a supervisor override for creating TOD / Overline in the casa account.

Definition Prerequisites

- 8054 - Time Deposit Account Opening
- 8051 - CASA Account Opening

Modes Available

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number in which you want to do payin.
Account Ccy	[Display] This field displays the currency assigned to the product at the under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Principal Balance	[Display] This field displays the available principal balance of the deposit.
Casa Account Number	[Mandatory, Numeric, 14, Pick List] Type the CASA account number or select it from the pick list. The name of the account holder is displayed in the adjacent field.
Txn Ccy	[Display] This field displays the amount in the transaction currency.
Acy Rate	[Mandatory, Numeric, Three] Type the rate at which the TD account currency is converted to the local currency of the bank. If the TD account currency is INR, this field displays the rate at which the TD account currency is converted to the local currency of the bank.
Txn Rate	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank.
Txn Amount	[Display] This field displays the transaction amount.
Payin Amount	[Mandatory, Numeric,13,Two] Type the payin amount to be debited from the CASA account in the TD account currency.
Compounding Frequency	[Display] This field displays the compounding frequency. This display is based on the product level entry.
Int Payout Frequency	[Display] This field will display the frequency at which the interest payout will be made in the deposit.

Field Name	Description
Base for Rate	[Display] This field display Incremental as the default option for the Base for Rate .
Maturity Date Factor	[Mandatory , Radio Button] Click on the required maturity date factor. The options are: <ul style="list-style-type: none"> • Term • Maturity Date
Term	
The below fields are enabled if Term option is selected in the Maturity Date Factor field.	
Value Date	[Mandatory, Pick List, dd/mm/yyyy] Select the value date of the TD from the pick list. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective. By default it displays the process date. It can also be a previous date.
Term	[Mandatory, Numeric , Four] Type the term in months and days for which the TD is being created. The term should be within the maximum and minimum limits and should be equivalent to the incremental term that is specified at the product level.
Int. Start Date	[Display] This field displays the date which is same as the Value Date .
Maturity Date	[Conditional, dd/mm/yyyy] Type the maturity date of the TD. This field is enabled if the Maturity Date option is selected in the Maturity Date Factor section.
Rate	
Interest Rate	[Display] This field displays the rate of interest for the new TD account.
Product Variance	[Display] This field displays the product variance. The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.

Field Name	Description
Deposit Variance	<p>[Mandatory, Numeric, Two, Five]</p> <p>Type the interest variance for the new term deposit created under the new TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p> <p>Based on the product definition made for the field Auto/ Force Renew With Deposit Variance in the option TD Product Master (Fast Path: TDM01), the deposit variance will be carried forward to the deposits created by auto / force renewal.</p>
Net Rate	<p>[Display]</p> <p>This field displays the rate at which the interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate, specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>
Scheme Rate	<p>[Display]</p> <p>This field displays the scheme rate.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate.</p>
Next Int Pay Date	<p>[Display]</p> <p>This field displays the next interest payable date.</p>
Next Int Comp Date	<p>[Display]</p> <p>This field displays the next interest compounded date.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>

Field Name	Description
User Ref No	[Optional, Alphanumeric, 40] Type the user reference number.
Txn. Narrative	[Mandatory, Alphanumeric, 40] Type the narration for the transaction. By default, the system displays Payin By CASA .
Business Acquirer Id	[Mandatory, Pick List] Select the business acquirer ID, to save the business acquirer details for the particular transaction, from the pick list. The system by default displays the ID of the teller who has logged in. The pick list displays the list of users linked to the system.
Payout Instructions Details	
Interest Payout Mode	[Mandatory , Drop-Down] Select the interest payout mode from the drop-down list. The options are: <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account
Interest Payout CASA	[Conditional, Numeric, 14] Type the CASA account number to which the interest payout is to be transferred. The name of CASA account holder is displayed in the adjacent field. This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Interest Payout Mode drop-down list.
Interest Payout GL	[Conditional, Numeric, 10] Type the GL account number to which the interest payout is to be transferred. The name of GL account holder is displayed in the adjacent field. This field is enabled and mandatory, if Transfer to GL Account option is selected from the Interest Payout Mode drop-down list.

Field Name	Description
Maturity Instructions	<p>[Mandatory , Drop-Down]</p> <p>Select the maturity instructions from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • No Instructions • Redeem Principal - In this case, the user will setup as redeem P+I • Renew Principal - In this case, the user will setup as Renew P, Payout I <p>Maturity amount gets capture at the time of payin to TD account</p>
Pay Mode	<p>[Conditional, Drop-Down]</p> <p>Select the mode of payment from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account <p>This field is enabled, if Redeem Principal option is selected from the Maturity Instructions drop-down list.</p>
Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Pay Mode drop-down list.</p>
Payout GL	<p>[Conditional, Numeric, 14]</p> <p>Type the GL account number to which the payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Pay Mode drop-down list.</p>

3. Enter the account number and press the <Tab>/Enter key.
4. Select the CASA account number from the pick list.
5. Enter the payin amount.
6. Click on the appropriate maturity date factor.
7. Enter the other relevant details in the **Term** and **Rate** tab.
8. Enter the relevant information in **Payout Instructions Details** tab.

4.3. 1021 - Quick Payin By GL

Using this option you can transfer funds from GL account to make a pay in to a term deposit account. The GL account will be debited for the transaction amount in the TCY.

This option offers a quicker solution to the pay-in requirement for the teller. The teller can alternately use **Mixed Payin** (Fast Path: 1356) option which offers other mode of transfers of making a pay-in.

Definition Prerequisites

- 8054 - Time Deposit Account Opening
- GLM02 - Chart of Accounts

Modes Available

Not Applicable

To transfer fund from GL account

1. Type the fast path **1021** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Transfer > Cash > Quick Payin By GL**.
2. The system displays the Quick Payin By GL screen.

Quick Payin By GL

The screenshot shows the 'Quick Payin By GL' interface with the following fields and sections:

- Account Information:** Account Number, Principal Balance, GL Account Number, Acy Rate, Txn Amount, Compounding Frequency, Base for rate (Incremental Amount), Maturity Date Factor (Term selected).
- Account Ccy:** Account Ccy, Txn Ccy, Txn Rate, Payin Amount, Int Payout Frequency.
- Term Section:** Value Date (31/08/2012), Term (Months, Days), Int. Start Date (31/08/2012), Maturity Date.
- Rate Section:** Interest Rate, Product Variance (0.00000), Deposit Variance (0.00000), Net Rate, Scheme Variance (0.00000), Scheme Rate (0.00000), Annual Equivalent Rate.
- Other Fields:** Next Int. Pay Date, Maturity Amount, Deposit Number, User Ref No, Txn. Narrative (Initial Payin By GL), Business Acquirer Id (TZARTAB).
- Footer:** Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, and buttons for UDF, OK, Close, Clear.

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number for which the pay-in is to be done.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Principal Balance	[Display] This field displays the available principal balance of the deposit. The principal currency is displayed in the adjacent field.
Txn Ccy	[Mandatory, Drop-Down] Select the GL account currency in which the pay-in will be done from the drop-down list. While posting the transaction entries to the account, the GL account currency is converted into the account currency, based on the defined transaction rate.
GL Account Number	[Mandatory, Pick List] Select the account number from the pick list. The TD payin amount will be transferred from this account.
Acy Rate	[Mandatory, Numeric, Three] Type the rate at which the TD account currency is converted to the local currency of the bank. If the TD account currency is INR, this field displays the rate at which the TD account currency is converted to the local currency of the bank.
Txn Rate	[Conditional, Numeric, Three] Type the rate at which the transaction currency is converted to the local currency of the bank. If the transaction currency is set to non INR, this field will default to an appropriate exchange rate with respect to local currency. If the transaction currency is INR and EUR this field will not be allowed to be edited. This field is default to 1 when transaction currency is INR. This field is enabled for editing if the option other than INR and EUR is selected in Txn Ccy drop-down list.

Field Name	Description
Txn Amount	[Display] This field displays the transaction amount.
Payin Amount	[Mandatory, Numeric,13,Two] Type the payin amount to be debited from the CASA account in the TD account currency.
Compounding Frequency	[Display] This field displays the compounding frequency.
Int Payout Frequency	[Display] This field displays the interest payout frequency.
Base for rate	[Display] This field displays the base for rate.
Maturity Date Factor	[Mandatory , Radio Button] Click the required maturity date factor. The options are: <ul style="list-style-type: none"> • Term • Maturity Date
Term	
	The below fields are enabled if the Term option is selected in the Maturity Date Factor field.
Value Date	[Mandatory, Pick List,] This field displays the value date of the TD. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective.
Term	[Mandatory, Numeric , Four] Type the term in months and days for which the TD is being initiated. The term should be within the maximum and minimum limits and should be equivalent to the incremental term that is specified at the product level.
Int. Start Date	[Display] This field displays the interest start date which is same as the value date.
Maturity Date	[Display] This field displays the maturity date. This field is enabled if Maturity Date option is selected in Maturity Date Factor field.

Field Name	Description
Rate	
Interest Rate	[Display] This field displays the rate of interest for the new TD account.
Product Variance	[Display] This field displays the product variance. The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.
Deposit Variance	[Mandatory, Numeric, Two, Five] Type the interest variance for the new term deposit initiated under the new TD account. The variance specified should be within the minimum and maximum variance specified at the product level. Based on the product definition made for the field Auto/ Force Renew With Deposit Variance in the option TD Product Master (Fast Path: TDM01), the deposit variance will be carried forward to the deposits created by auto / force renewal.
Net Rate	[Display] This field displays the rate at which the interest is paid against the deposit. <i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i> The net rate should be within the minimum and maximum interest rate, specified at the product level.
Scheme Variance	[Display] This field displays the interest variance applicable on the scheme.
Scheme Rate	[Display] This field displays the interest rate applicable on the scheme.

Field Name	Description
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate. AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer.</p> <p>It is a regulatory requirement that the bank publishes the AER for the entire deposits product as a part of the product brochures as well as when interest is finally paid out to the customer, the AER is to be published along with the actual interest rate which is paid to the customer. So for all deposits, including CASA, Term Deposits, Notice and structured deposits AER should be computed and displayed. The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>
Next Int. Pay Date	<p>[Display]</p> <p>This field displays the next interest due date.</p> <p>Depending on the Interest Payout Frequency interval specified, the system calculates the next interest due date. Consider the following example: Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Payout Date = 31/03/2004.</p>
Next Int. Comp. Date	<p>[Display]</p> <p>This field displays the next interest compounding date.</p> <p>Depending on the Interest Compounding Frequency duration specified, the system calculates the next interest compounding date. Consider the following example: Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Compounding Date = 31/01/2004.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number.</p> <p>The Deposit Number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
User Ref No	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the user reference number in this field.</p>

Field Name	Description
Txn. Narrative	<p>[Mandatory, Alphanumeric, 120]</p> <p>Type the narration for the transaction.</p> <p>The system displays the default narration "Payin By GL". You can modify the narration, if required.</p>
Business Acquirer Id	<p>[Mandatory, Pick List]</p> <p>Select the business acquirer ID, to save the business acquirer details for the particular transaction, from the pick list.</p> <p>The system by default displays the ID of the teller who has logged in. The pick list displays the list of users linked to the system.</p>

4.4. 1402 - Quick Payin By Cash

Using this option, you can deposit cash in the customer's term deposit account as pay-in. Depending on the transaction amount computed, FLEXCUBE will validate if the cash amount received in the TCY breaches the drawer upper limit set for the teller performing the transaction set at the teller template. FLEXCUBE will give an alert after the transaction completion to the effect that the excess cash would need to be sold to the vault teller

This option offers a quicker solution for term deposit pay-in. You can alternately use the Mixed Payin (Fast Path: 1356) option which offers other modes of transfer for pay-in.

Field Description

Field Name	Description
Account Number	<p>[Mandatory, Numeric, 14]</p> <p>Type the TD account number in which you want to do the pay-in from CASA account.</p> <p>The name of the account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a TD product is USD, the account opened under that product has USD as its account currency.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the principal balance of the TD account.</p> <p>Principal balance is the sum of the principal amount of all the deposits, falling under a single TD account.</p> <p>The account currency is displayed in the adjacent field.</p>
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the TD account currency where the payin is against cash or GL from the drop-down list.</p> <p>This is the currency in which the transaction has to be done.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: In case the TCY is not linked to the GL for GL as a payin mode, FLEXCUBE will give appropriate error message on tab out of the field</p> </div>
Acy Rate	<p>[Mandatory, Numeric, Three]</p> <p>Type the rate at which the TD account currency is converted to the local currency of the bank.</p> <p>If the TD account currency is INR, this field displays the rate at which the TD account currency is converted to the local currency of the bank.</p>
Txn Rate	<p>[Conditional, Numeric, Three]</p> <p>Type the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>If the transaction currency is set to non INR, this field will default to an appropriate exchange rate with respect to local currency.</p> <p>If the transaction currency is INR and EUR this field will not be allowed to be edited. This field is default to 1 when transaction currency is INR.</p> <p>This field is enabled for editing if the option other than INR and EUR is selected in Txn Ccy drop-down list.</p>

Field Name	Description
Txn Amount	[Mandatory, Numeric, 13, Two] Type the transaction amount.
Payin Amount	[Mandatory, Numeric, 13, Two] Type the payin amount to be debited from the CASA account in the TD account currency.
Compounding Frequency	[Display] This field displays the compounding frequency. This display is based on the entry at the product level.
Int Payout Frequency	[Display] This field displays the time interval at which the pay out for the TD will be made. This display is based on the entry at the product level.
Base for rate	[Display] This field displays the base for rate.
Maturity Date Factor	[Mandatory, Radio Button] Click on the appropriate option. The options are: <ul style="list-style-type: none"> • Term • Maturity Date
Term	
Value Date	[Display] This field displays the value date of the TD. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective.
Term	[Conditional, Numeric, Four, Four] Type the term in months and days for which the TD is being initiated. The term should be within the maximum and minimum limits specified at the product level. This field is enabled if the Term option is selected in the Maturity Date Factor field.
Int Start Date	[Display] This field displays the interest start date. It is same as the value date.

Field Name	Description
Maturity Date	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the date on which the new deposit will mature from the pick list.</p> <p>The interest start date determines the maturity date of the deposit.</p> <p>This field is enabled if the Maturity Date option is selected in the Maturity Date Factor field.</p>
Rate	
Interest Rate	<p>[Display]</p> <p>This field displays the rate of interest for the new TD account.</p>
Product Variance	<p>[Display]</p> <p>This field displays the product variance.</p> <p>The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.</p>
Deposit Variance	<p>[Mandatory, Numeric, Two]</p> <p>Type the deposit variance defined for the particular term deposit under the TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p>
Net Rate	<p>[Display]</p> <p>This field displays the rate at which the interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate, specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>
Scheme Rate	<p>[Display]</p> <p>This field displays the scheme rate.</p>

Field Name	Description
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate. AER is the annualized rate of return which the bank pays to the customer.</p> <p>It is a regulatory requirement that the bank publishes the AER for the entire deposits product as a part of the product brochures as well as when interest is finally paid out to the customer, the AER is to be published along with the actual interest rate which is paid to the customer. So for all deposits, including CASA, Term Deposits, Notice and structured deposits AER should be computed and displayed.</p> <p>The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>
Next Int. Pay Date	<p>[Display]</p> <p>This field displays the next interest pay date.</p> <p>Depending on the Interest Payout Frequency interval specified, the system calculates the next interest due date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Payout Date = 31/03/2004.</p>
Next Int. Comp. Date	<p>[Display]</p> <p>This field displays the next interest compounding date.</p> <p>Depending on the Interest Compounding Frequency duration specified, the system calculates the next interest compounding date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Compounding Date = 31/01/2004.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>

Field Name	Description
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number of the customer.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
User Ref No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p>
Txn. Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration for the transaction.</p> <p>The system displays the default narration "Payin By Cash". You can modify the narration, if required.</p>
Business Acquirer Id	<p>[Mandatory, Input]</p> <p>Select the business acquirer id from the pick list.</p> <p>By default, the system displays the teller id that has performed the transaction.</p>
Payout Instructions Details	
Interest Payout Mode	<p>[Mandatory , Drop-Down]</p> <p>Select the interest payout mode from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account
Interest Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the interest payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Interest Payout Mode drop-down list.</p>
Interest Payout GL	<p>[Conditional, Numeric, 10]</p> <p>Type the GL account number to which the interest payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Interest Payout Mode drop-down list.</p>

Field Name	Description
Maturity Instructions	<p>[Mandatory , Drop-Down]</p> <p>Select the maturity instructions from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • No Instructions • Redeem Principal - In this case, the user will setup as redeem P+I • Renew Principal - In this case, the user will setup as Renew P, Payout I <p>Maturity amount gets capture at the time of payin to TD account</p>
Pay Mode	<p>[Conditional, Drop-Down]</p> <p>Select the mode of payment from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account <p>This field is enabled, if Redeem Principal option is selected from the Maturity Instructions drop-down list.</p>
Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Pay Mode drop-down list.</p>
Payout GL	<p>[Conditional, Numeric, 14]</p> <p>Type the GL account number to which the payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Pay Mode drop-down list.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Enter the payin amount.
5. Click on the appropriate maturity date factor.
6. Enter the other relevant details.

UDF OK Close Clear

7. Click the **UDF** button.
8. Enter the relevant details and click the **Validate** button.
9. Click the **Ok** button. The system displays the main screen.
10. Click the **Ok** button.
11. The system displays the message "Authorization Required. Do You want to continue?". Click the **OK** button.
12. The system displays the **Authorization Reason** screen.
13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number. The transaction sequence number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
15. The system displays the **Document Receipt** screen.
16. Select the receipt you want to print and click the **Ok** button.
OR
Click the **Cancel** button.

4.5. 6503 - BC Liquidation Inquiry

The act of depositing amount into a term deposit account is called Payin in **Oracle FLEXCUBE**. This option enables you to directly deposit the BC amount in the customer's term deposit account. This option offers a quicker solution for TD pay-in. You can alternately use the **Mixed Payin** (Fast Path: 1356) option which offers other mode of transfers for pay-in.

You can use this option to transfer the liquidated BC to walk-in customer, customer's account or GL account.

Definition Prerequisites

- Bankers cheque to be issued

To perform quick payin by bankers cheque

3. Type the fast path 6503 and click Go or navigate through the menus to Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Payin By BC.
4. The system displays the BC Liquidation Inquiry screen.

BC Liquidation Inquiry

- Lost/Caution Details: [Text]

Navigation tabs at the bottom: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque.

Action buttons at the bottom right: UDF, OK, Close, Clear.

Field Description

Field Name	Description
Liq Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the liquidation mode for BC from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cancellation - Purchaser of BC wants payment against the instrument. • Payment – Beneficiary of BC wants payment against the instrument. • Refund – Purchaser has lost the instrument and wants the money refunded.
Serial No	<p>[Mandatory, Numeric, 12]</p> <p>Type the FLEXCUBE Retail serial number of the BC to be liquidated.</p> <p>The BC should be a valid BC issued by your bank.</p> <p>For a remittance instrument such as a BC or a DD, at the time of issue, the system generates a serial number automatically comprising the branch code, instrument type and a running serial number.</p> <p>When an instrument comes for clearing, it may be referred by the MICR number, which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which FLEXCUBE Retail tracks the instrument uniquely.</p>
Liq Type	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate mode for type of liquidation from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Against GL • Against Account • Against TD Account
Bank Code	<p>[Display]</p> <p>This field displays the issuer of the BC.</p>
Issuer Branch	<p>[Display]</p> <p>This field displays the branch of the bank that has issued the BC.</p>
BC Ccy	<p>[Display]</p> <p>This field displays the currency in which the BC is issued.</p>

Field Name	Description
BC Amount	<p>[Display]</p> <p>This field displays the amount for the BC. This amount is in the currency of the BC.</p>
BC No	<p>[Display]</p> <p>This field displays the cheque number of the BC.</p> <p>This is the MICR number of the BC. For every remittance instrument, the user needs to maintain an MICR number. This number will be printed on the instrument if the instrument is expected to come in for clearing through an inward clearing. A cross reference is maintained, with the system generated serial number so that the instrument can be tracked by the system, whether it is liquidated / enquired upon by MICR number or the serial number.</p>
Routing No	<p>[Display]</p> <p>This field displays the routing number against which the cheque has been drawn.</p> <p>The routing number is the combination of the bank code and the branch code.</p> <p>The combination can be obtained from the Routing Branch Maintenance (Fast Path: STM54) option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>For an inward clearing cheque this routing number should belong to the bank. The order, in which the codes in the routing number are to be entered, is determined by the set up using the Settlement Bank Parameters (Fast Path: STM59) option.</p>

Field Name	Description
BC Status	<p>[Display]</p> <p>This field displays the status of the BC.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Issued • Cancelled • Paid Through Clearing • Paid by Cash • Paid to Customer account • Suspense • Reversed • Paid by GL • Lost • Unclaimed • Stale <p>Except for BCs marked as lost, all other status are marked by the system itself.</p>
Issue Date	<p>[Display]</p> <p>This field displays the date on which the BC is issued.</p>
Liquidation Date	<p>[Display]</p> <p>This field displays the liquidation date.</p> <p>This field is blank while performing an inquiry.</p>
Issue Mode	<p>[Display]</p> <p>This field displays the mode of issue of the BC. For example, Against Cash, Against GL etc.</p>
Drawee Acct No	<p>[Display]</p> <p>This field displays the drawee account number of the issuer bank.</p>
Beneficiary Name	<p>[Display]</p> <p>This field displays the name of the beneficiary of the BC.</p>
Passport / IC No	<p>[Display]</p> <p>This field displays the identification collected from the beneficiary of the BC.</p>
Beneficiary Address	<p>[Display]</p> <p>This field displays the contact address of the beneficiary.</p>

Quick Payin By BC

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number in which you want to do the pay-in. The name of the account holder is displayed in the adjacent field.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD, the account opened under that product has USD as its account currency.
Principal Balance	[Display] This field displays the principal balance of the TD account. Principal balance is the sum of the principal amount of all the deposits, falling under a single TD account. The account currency is displayed in the adjacent field.

Field Name	Description
Txn Ccy	[Display] This field displays the transaction currency.
Acy Rate	[Display] This field displays the rate at which the account currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.
Txn Rate	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.
Txn Amount	[Display] This field displays the transaction amount.
Payin Amount	[Display] This field displays the payin amount based on the banker's cheque amount.
Compounding Frequency	[Display] This field displays the Compounding Frequency as per the product level.
Int Payout Frequency	[Display] This field displays the Interest Payout Frequency as per the product level.
Base for Rate	[Display] This field displays the base for rate.
Maturity Date Factor	[Mandatory, Radio Button] Click the appropriate option. The options are: <ul style="list-style-type: none"> • Term • Maturity Date
Term	
Value Date	[Display] This field displays the value date of the TD. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective.

Field Name	Description
Term	<p>[Conditional, Numeric, Four, Four]</p> <p>Type the term in months and days for which the TD is being initiated.</p> <p>The term should be within the maximum and minimum limits specified at the product level.</p> <p>This field is enabled if the Term option is selected in the Maturity Date Factor field.</p>
Int Start Date	<p>[Display]</p> <p>This field displays the interest start date.</p>
Maturity Date	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the date on which the new deposit will mature from the pick list.</p> <p>The interest start date determines the maturity date of the deposit.</p> <p>This field is enabled if the Maturity Date option is selected in the Maturity Date Factor field.</p>
Rate	
Interest Rate	<p>[Display]</p> <p>This field displays the rate of interest for the new TD account.</p>
Product Variance	<p>[Display]</p> <p>This field displays the product variance.</p> <p>The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.</p>
Deposit Variance	<p>[Mandatory, Numeric, Two, Five]</p> <p>Type the deposit variance defined for the particular term deposit under the TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p>
Net Rate	<p>[Display]</p> <p>This field displays the rate at which the interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate, specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>

Field Name	Description
Scheme Rate	<p>[Display]</p> <p>This field displays the scheme rate.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate. AER is the annualized rate of return which the bank pays to the customer.</p> <p>It is a regulatory requirement that the bank publishes the AER for the entire deposits product as a part of the product brochures as well as when interest is finally paid out to the customer, the AER is to be published along with the actual interest rate which is paid to the customer. So for all deposits, including CASA, Term Deposits, Notice and structured deposits AER should be computed and displayed.</p> <p>The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>
Next Int. Pay Date	<p>[Display]</p> <p>This field displays the next interest pay date.</p> <p>Depending on the Interest Payout Frequency interval specified, the system calculates the next interest due date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Payout Date = 31/03/2004.</p>
Next Int. Comp. Date	<p>[Display]</p> <p>This field displays the next interest compounding date.</p> <p>Depending on the Interest Compounding Frequency duration specified, the system calculates the next interest compounding date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Compounding Date = 31/01/2004.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>

Field Name	Description
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number of the customer.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
User Ref No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p>
Txn. Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration for the transaction.</p> <p>By default, the system displays Payin By BC.</p>
Business Acquirer Id	<p>[Mandatory, Pick List]</p> <p>Select the business acquirer id from the pick list.</p> <p>By default, the system displays the teller id that has performed the transaction.</p>
Payout Instruction Details	
Interest Payout Mode	<p>[Mandatory , Drop-Down]</p> <p>Select the interest payout mode from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account
Interest Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the interest payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Interest Payout Mode drop-down list.</p>
Interest Payout GL	<p>[Conditional, Numeric, 10]</p> <p>Type the GL account number to which the interest payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Interest Payout Mode drop-down list.</p>

Field Name	Description

Description

Payable Branch

[Display]

This field displays the branch of the bank where the BC is payable. This is defaulted from the **BC Liquidation Inquiry** screen.

GL Ccy

[Mandatory, Drop-Down]

Select the currency from the drop-down list.

GL will be credited in this currency.

Cheque Ccy Rate

[Display]

This field displays the rate at which the cheque currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.

The teller's right to change the cheque currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.

If the cheque currency and the local currency are same, the field takes the default value as 1, which cannot be modified.

Field Name	Description

Field Name	Description
User Reference No	<p>[Optional, Alphanumeric, 40] Type the user reference number. It is used to identify the transaction.</p>
Narrative	<p>[Mandatory, Alphanumeric, 40] Type the description for the transaction. By default, the system displays BC. Liquidation Against Account.</p>
	<ol style="list-style-type: none"> 9. Click the UDF button. The system displays the UDF Details screen. 10. Enter the relevant details and click the Validate button. The system displays the message "Validation procedure completed". 11. Click the Ok button. The system displays the main screen. 12. Click the Ok button. 13. The system displays the transaction sequence number. The transaction sequence number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the Ok button. 14. The system displays the Document Receipt screen. 15. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the Ok button. 16. The system displays the message "Printed Successfully?". Click the Ok button. 17. Click the Cancel button. 18. The system displays the serial number. Click the Ok button.
<p>Note : For more Information on Document Receipt refer to the Common Screens option available in the <i>Oracle FLEXCUBE Introduction User Manual</i>.</p>	

4.6. 6504 - DD Liquidation Inquiry

The act of depositing amount into a term deposit account is called Payin in **Oracle FLEXCUBE**.

After the TD account is opened, the funding is done by doing payin to the deposit account. This option enables you to directly deposit the DD amount in the customer's term deposit account. You can alternately use the **Mixed Payin** (Fast Path: 1356) option which offers other mode of transfers for pay-in.

You can use this option to transfer the liquidated DD to walk-in customer, customer's account or GL account.

Definition Prerequisites

- Demand Draft should be issued

Modes Available

Not Applicable

To perform quick payin by demand draft

1. Type the fast path 6504 and click Go or navigate through the menus to Transaction Processing > Account Transaction > TD Account Transactions > Cash > Quick Payin by DD.
2. The system displays the DD Liquidation Inquiry screen.

Field Description

Field Name	Description
Liquidation Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the reason for liquidation mode from the drop-down list</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cancellation - Select this option if customer who has purchased DD wants to cancel the issued DD and wants the amount to paid. • Payment – Select this option if the beneficiary has approached the bank and wants the proceeds of payment by liquidating DD. • Refund – Select this option when the DD amount has to be refunded to the customer, who has purchased the DD
Serial No	<p>[Mandatory, Numeric, 12]</p> <p>Type the FLEXCUBE Retail serial number of the DD to be liquidated.</p> <p>For a remittance instrument such as a BC or a DD, at the time of issue, the system generates a serial number automatically comprising the branch code, instrument type and a running serial number.</p> <p>When an instrument comes for clearing, it may be referred by the MICR number, which needs to be maintained for each instrument, if it is expected to come through an inward clearing batch. If an instrument is liquidated by the teller, the instrument serial number is sufficient, as this is the number by which FLEXCUBE Retail tracks the instrument uniquely.</p>
Liq Type	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate mode of payment of DD proceeds to beneficiary / purchaser from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Against GL • Against Account • Against TD Account
Bank Code	<p>[Display]</p> <p>This field displays the bank on which the DD is drawn. The list of banks on which DDs can be issued are maintained in the Issuer Maintenance option and downloaded to the branch. Normally banks issue DDs drawn on them.</p>
Payable Branch	<p>[Display]</p> <p>This field displays the branch of the bank where the DD is payable.</p>

Field Name	Description
Issuer Branch	[Display] This field displays the branch of the bank that has issued the DD.
Cheque Ccy	[Display] This field displays the currency in which DD was issued.
Cheque Amount	[Display] This field displays the amount for which the instrument is issued. This amount is in the currency of the instrument.
Cheque No	[Display] This field displays the MICR number of the DD. For every remittance instrument, the user needs to maintain an MICR number. This number will be printed on the instrument if the instrument is expected to come in for clearing through an inward clearing. A cross reference is maintained, with the system generated serial number so that the instrument can be tracked by the system, whether it is liquidated/inquired upon by the MICR number or the serial number.
Routing No	[Display] This field displays the routing number against which the DD has been drawn. The routing number is the combination of the bank code and the branch code. The combination can be obtained from the Routing Branch Maintenance option. <i>Routing Number = Sector Code / Bank Code + Branch Code</i>

Field Name	Description
Cheque Status	<p>[Display]</p> <p>This field displays the status of the DD at the time of liquidation. The options are:</p> <ul style="list-style-type: none"> • Issued • Cancelled • Paid Through Clearing • Paid by Cash • Paid to Customer account • Suspense • Reversed • Paid by GL • Lost • Unclaimed • Stale <p>Except for DDs marked as lost, all other status are marked by the system itself.</p>
Issue Date	<p>[Display]</p> <p>This field displays the date on which the DD was issued.</p>
Liquidation Date	<p>[Display]</p> <p>This field displays the date on which the DD was liquidated. It should be blank if the DD has not been liquidated yet.</p>
Issue Mode	<p>[Display]</p> <p>This field displays the mode of issue of the DD. For example, Against Cash, Against GL etc.</p>
Drawee Acct No	<p>[Display]</p> <p>This field displays the drawee account number.</p>
Beneficiary Name	<p>[Display]</p> <p>This field displays the name of beneficiary in whose favor the DD was drawn.</p>
Passport / IC No	<p>[Display]</p> <p>This field displays the identification details collected from the beneficiary of the DD.</p>
Beneficiary Addr	<p>[Display]</p> <p>This field displays the address of beneficiary in whose favor the DD was drawn.</p>

Field Name	Description
Lost/Caution Details	[Display] This field displays the details that are entered for lost/caution DD's.

3. Select the liquidation mode and the liquidation type from the drop-down list. To make a pay-in through DD select **Against TD Account**.
4. Enter the serial number.
5. Click the **Ok** button. The system displays the message "Do You Want to Continue".

DD Liquidation Inquiry

The screenshot shows the 'DD Liquidation Inquiry' application window. The form includes the following fields and values:

- Liquidation Mode: Payment
- Serial No: 024013000016
- Liq Type: Against TD Account
- Bank Code: (empty)
- Payable Branch: 79 SANTACRUZ - MUMBAI
- Issuer Branch: 240 SANDOZ - MUMBAI
- Cheque Ccy: INR
- Cheque Amount: 4,512.00
- Cheque No: 00000004523
- Routing No: 400240017
- Cheque Status: Issued
- Issue Date: 31/12/2007
- Liquidation Date: (empty)
- Issue Mode: Savings Account
- Drawee Acct No: 0240100000206
- Passport / IC No: d78945
- Beneficiary Name: GANESH
- Beneficiary Addr: MUMBAI
- Lost/Caution Details: (empty)

A dialog box titled 'Microsoft Internet Explorer' is displayed in the center, with the text 'contd : Do you want to continue?' and 'OK' and 'Cancel' buttons.

The bottom navigation bar contains buttons for 'UDF', 'OK', 'Close', and 'Clear'.

6. Click the **Ok** button.
7. The system displays the appropriate screen according to the option selected in the **Liquidation Type** field.
8. Enter the required information in the various screens.

Quick Payin By DD

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number in which you want to do the pay-in. The name of the account holder is displayed in the adjacent field.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD, the account opened under that product has USD as its account currency.
Principal Balance	[Display] This field displays the principal balance of the TD account. Principal balance is the sum of the principal amount of all the deposits, falling under a single TD account. The account currency is displayed in the adjacent field.

Field Name	Description
Txn Ccy	[Display] This field displays the transaction currency.
Acy Rate	[Display] This field displays the rate at which the account currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.
Txn Rate	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.
Txn Amount	[Display] This field displays the transaction amount.
Payin Amount	[Display] This field displays the payin amount based on the DD amount.
Compounding Frequency	[Display] This field displays the compounding frequency selected at the product level.
Int Payout Frequency	[Display] This field displays the interest payout frequency selected at the product level.
Base for rate	[Display] This field displays the base for rate.
Maturity Date Factor	[Mandatory, Radio Button] Click the appropriate option. The options are: <ul style="list-style-type: none"> • Term • Maturity Date
Term	
Value Date	[Display] This field displays the value date. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective.

Field Name	Description
Term	<p>[Conditional, Numeric, Four, Four]</p> <p>Type the term in months and days for which the TD is being initiated.</p> <p>The term should be within the maximum and minimum limits specified at the product level.</p> <p>This field is enabled if the Term option is selected in the Maturity Date Factor field.</p>
Int Start Date	<p>[Display]</p> <p>This field displays the interest start date.</p>
Maturity Date	<p>[Conditional, Pick List, dd/mm/yyyy]</p> <p>Select the date on which the new deposit will mature from the pick list.</p> <p>The interest start date determines the maturity date of the deposit.</p> <p>This field is enabled if the Maturity Date option is selected in the Maturity Date Factor field.</p>
Rate	
Interest Rate	<p>[Display]</p> <p>This field displays the rate of interest for the new TD account.</p>
Product Variance	<p>[Display]</p> <p>This field displays the product variance.</p> <p>The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.</p>
Deposit Variance	<p>[Mandatory, Numeric, Two, Five]</p> <p>Type the deposit variance defined for the particular term deposit under the TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p>
Net Rate	<p>[Display]</p> <p>This field displays the rate at which the interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate, specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>

Field Name	Description
Scheme Rate	<p>[Display]</p> <p>This field displays the scheme rate.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate. AER is the annualized rate of return which the bank pays to the customer.</p> <p>It is a regulatory requirement that the bank publishes the AER for the entire deposits product as a part of the product brochures as well as when interest is finally paid out to the customer, the AER is to be published along with the actual interest rate which is paid to the customer. So for all deposits, including CASA, Term Deposits, Notice and structured deposits AER should be computed and displayed.</p> <p>The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>
Next Int. Pay Date	<p>[Display]</p> <p>This field displays the next interest pay date.</p> <p>Depending on the Interest Payout Frequency interval specified, the system calculates the next interest due date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Payout Date = 31/03/2004.</p>
Next Int. Comp. Date	<p>[Display]</p> <p>This field displays the next interest compounding date.</p> <p>Depending on the Interest Compounding Frequency duration specified, the system calculates the next interest compounding date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Compounding Date = 31/01/2004.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>

Field Name	Description
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number of the customer.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
User Ref No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p>
Txn. Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration for the transaction.</p> <p>The system displays the default narration "Payin By DD".</p>
Business Acquirer Id	<p>[Mandatory, Pick List]</p> <p>Select the business acquirer id from the pick list.</p> <p>By default, the system displays the teller id that has performed the transaction.</p>
Payout Instruction Details	
Interest Payout Mode	<p>[Mandatory , Drop-Down]</p> <p>Select the interest payout mode from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account
Interest Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the interest payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Interest Payout Mode drop-down list.</p>
Interest Payout GL	<p>[Conditional, Numeric, 10]</p> <p>Type the GL account number to which the interest payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Interest Payout Mode drop-down list.</p>

Field Name	Description
Maturity Instructions	<p>[Mandatory , Drop-Down]</p> <p>Select the maturity instructions from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • No Instructions • Redeem Principal - In this case, the user will setup as redeem P+I • Renew Principal - In this case, the user will setup as Renew P, Payout I <p>Maturity amount gets capture at the time of payin to TD account</p>
Pay Mode	<p>[Conditional, Drop-Down]</p> <p>Select the mode of payment from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account <p>This field is enabled, if Redeem Principal option is selected from the Maturity Instructions drop-down list.</p>
Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Pay Mode drop-down list.</p>
Payout GL	<p>[Conditional, Numeric, 14]</p> <p>Type the GL account number to which the payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Pay Mode drop-down list.</p>

Cheque Amount	<p>[Display]</p> <p>This field displays the amount for which the DD is issued.</p> <p>This amount is in the currency of the DD.</p>
Charges (Lcy)	<p>[Display]</p> <p>This field displays the charges in local currency that will be levied for the liquidation of DD.</p> <p>The service charge codes are added and maintained in the Service Charge Code Maintenance option. The service charges can be attached at the product level, transaction mnemonic level or at the issuer maintenance level.</p> <p>The system displays the total of all the service charges if more than one SC code is attached to the transaction. The default SC can be changed by selecting the Service Charge Details button.</p>
Acct Amount	<p>[Display]</p> <p>This field displays the amount that will be finally credited to the CASA account.</p> <p>This amount will be in the currency of the account and will be equal to the DD amount net of charges recovered.</p>

Field Name	Description
User Reference No	[Optional, Alphanumeric, 40] Type the user reference number. It is used to identify the transaction.
Narrative	[Mandatory, Alphanumeric, 40] Type the narration.

DD Liquidation By GL

Field Description

Field Name	Description
GL Ccy	[Mandatory, Drop-Down] Select the GL currency from the drop-down list. This is the currency of the GL that will be credited when the DD is liquidated The GL currency then gets converted to the local currency of the bank for posting of GL entries.

Field Name	Description
Cheque Ccy Rate	<p>[Display]</p> <p>This field displays the rate of conversion to be used for converting the DD currency to the local currency of your bank.</p> <p>The teller's right to change the cheque currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If both the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
GL Ccy Rate	<p>[Display]</p> <p>This field displays the rate of conversion to be used for converting the GL currency to the local currency of the bank.</p> <p>The teller's right to change the GL currency rate within a range is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If both the transaction currency and the local currency are same, the field takes the default value as 1, which cannot be modified.</p>
Charges (Lcy)	<p>[Display]</p> <p>This field displays the charges levied by the bank for liquidating the DD. The charges will be levied in the local currency of the bank.</p>
GL Acct Amount	<p>[Display]</p> <p>This field displays the amount that will be finally credited to the GL account.</p> <p>This amount will be in the currency of the GL and will be equal to DD amount net of charges recovered.</p>
GL Acct No	<p>[Mandatory, Pick List]</p> <p>Select the GL account number which shall be credited with DD liquidation proceeds from the pick list.</p> <p>The adjacent field displays the description of GL.</p>
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p> <p>It is used to identify the transaction.</p>
Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration.</p>

9. Click the **UDF** button. The system displays the **UDF Details** screen.
10. Enter the relevant details and click the **Validate** button. The system displays the message "Validation procedure completed".
11. Click the **Ok** button. The system displays the main screen.
12. Click the **Ok** button.

13. The system displays the transaction sequence number. The transaction sequence number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
14. The system displays the **Document Receipt** screen.
15. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Ok** button.
16. The system displays the message "Printed Successfully?". Click the **Ok** button.
17. Click the **Cancel** button
18. The system displays the serial number. Click the **Ok** button.

4.7. 6505 - Quick Payin By Cheque

Using this option, you can deposit a cheque in the customer's term deposit account as pay-in. This option offers a quicker solution for term deposit pay-in. You can alternately use the Mixed Payin (Fast Path: 1356) option which provides various modes of payin.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To perform quick payin by cheque

1. Type the fast path **6505** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Payin By Cheque**.
2. The system displays the Quick Payin By Cheque screen.

Field Description

Field Name	Description
Account Number	<p>[Mandatory, Numeric, 14]</p> <p>Type the TD account number in which you want to do the pay-in. The name of the account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a TD product is USD, the account opened under that product has USD as its account currency.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the principal balance of the TD account.</p> <p>Principal balance is the sum of the principal amount of all the deposits, falling under a single TD account.</p> <p>The account currency is displayed in the adjacent field.</p>
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the transaction currency from the drop-down list.</p> <p>While posting the transaction entries to the account, the account currency is converted into the account currency, based on the defined transaction rate.</p>
Acy Rate	<p>[Display]</p> <p>This field displays the rate at which the account currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.</p>
Txn Rate	<p>[Conditional, Numeric, Three]</p> <p>Type the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>If the transaction currency is set to non INR, this field will default to an appropriate exchange rate with respect to local currency.</p> <p>If the transaction currency is INR and EUR this field will not be allowed to be edited. This field is default to 1 when transaction currency is INR.</p> <p>This field is enabled for editing if the option other than INR and EUR is selected in Txn Ccy drop-down list.</p>
Payin Amount	<p>[Display]</p> <p>This field displays the initial amount which the customer has to deposit.</p>

Field Name	Description
Txn Amount	[Mandatory, Numeric, 13, Two] Type the transaction amount.
Compounding Frequency	[Display] This field displays the Compounding Frequency as per the entry in the product level
Int Payout Frequency	[Display] This field displays the Int Payout Frequency as per the entry in the product level.
Base for rate	[Display] This field displays the base for rate.
Maturity Date Factor	[Mandatory, Radio Button] Click on the appropriate option. The options are: <ul style="list-style-type: none"> • Term • Maturity Date
Term	
Value Date	[Display] This field displays the value date of the TD. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective.
Term	[Conditional, Numeric, Four, Four] Type the term in months and days for which the TD is being initiated. The term should be within the maximum and minimum limits specified at the product level. This field is enabled if the Term option is selected in the Maturity Date Factor field.
Int Start Date	[Display] This field displays the interest start date. It is same as value date.
Maturity Date	[Conditional, Pick List, dd/mm/yyyy] Select the date on which the new deposit will mature from the pick list. The interest start date determines the maturity date of the deposit. This field is enabled if the Maturity Date option is selected in the Maturity Date Factor field.

Field Name	Description
Rate	
Interest Rate	<p>[Display]</p> <p>This field displays the rate of interest for the new TD account.</p>
Product Variance	<p>[Display]</p> <p>This field displays the product variance.</p> <p>The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.</p>
Deposit Variance	<p>[Mandatory, Numeric, Two]</p> <p>Type the deposit variance defined for the particular term deposit under the TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p>
Net Rate	<p>[Display]</p> <p>This field displays the rate at which the interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate, specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>
Scheme Rate	<p>[Display]</p> <p>This field displays the scheme rate.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate. AER is the annualized rate of return which the bank pays to the customer.</p> <p>It is a regulatory requirement that the bank publishes the AER for the entire deposits product as a part of the product brochures as well as when interest is finally paid out to the customer, the AER is to be published along with the actual interest rate which is paid to the customer. So for all deposits, including CASA, Term Deposits, Notice and structured deposits AER should be computed and displayed.</p> <p>The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>

Field Name	Description
Next Int. Pay Date	<p>[Display]</p> <p>This field displays the next interest pay date.</p> <p>Depending on the Interest Payout Frequency interval specified, the system calculates the next interest due date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly</p> <p>Interest Compounding Frequency = Monthly</p> <p>Deposit initiated date = 31/12/2003</p> <p>Next Interest Payout Date = 31/03/2004.</p>
Next Int. Comp. Date	<p>[Display]</p> <p>This field displays the next interest compounding date.</p> <p>Depending on the Interest Compounding Frequency duration specified, the system calculates the next interest compounding date.</p> <p>Consider the following example:</p> <p>Interest Payout Frequency = Quarterly</p> <p>Interest Compounding Frequency = Monthly</p> <p>Deposit initiated date = 31/12/2003</p> <p>Next Interest Compounding Date = 31/01/2004.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
User Ref No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p>
Txn. Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration for the transaction.</p> <p>By default the system displays Payin By Cheque.</p>

Field Name	Description
Business Acquirer Id	<p>[Mandatory, Pick List]</p> <p>Select the business acquirer id from the pick list.</p> <p>By default, the system displays the teller id that has performed the transaction.</p>
Payout Instructions Details	
Interest Payout Mode	<p>[Mandatory , Drop-Down]</p> <p>Select the interest payout mode from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account
Interest Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the interest payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Interest Payout Mode drop-down list.</p>
Interest Payout GL	<p>[Conditional, Numeric, 10]</p> <p>Type the GL account number to which the interest payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Interest Payout Mode drop-down list.</p>
Maturity Instructions	<p>[Mandatory , Drop-Down]</p> <p>Select the maturity instructions from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • No Instructions • Redeem Principal - In this case, the user will setup as redeem P+I • Renew Principal - In this case, the user will setup as Renew P, Payout I <p>Maturity amount gets capture at the time of payin to TD account</p>

Field Name	Description
Pay Mode	<p>[Conditional, Drop-Down]</p> <p>Select the mode of payment from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Pay By Cheque • Transfer to Savings Account • Transfer to GL Account <p>This field is enabled, if Redeem Principal option is selected from the Maturity Instructions drop-down list.</p>
Payout CASA	<p>[Conditional, Numeric, 14]</p> <p>Type the CASA account number to which the payout is to be transferred.</p> <p>The name of CASA account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to Savings Account option is selected from the Pay Mode drop-down list.</p>
Payout GL	<p>[Conditional, Numeric, 14]</p> <p>Type the GL account number to which the payout is to be transferred.</p> <p>The name of GL account holder is displayed in the adjacent field.</p> <p>This field is enabled and mandatory, if Transfer to GL Account option is selected from the Pay Mode drop-down list.</p>

3. Enter the account number and press the <Tab> or <Enter> key.
4. Click on the appropriate maturity date factor.
5. Enter the other relevant details.

CASA Account Number	[Mandatory, Numeric, 14, Pick List] Type the CASA/FW account number or select it from the pick list. The name of the account holder is displayed in the adjacent field.
Txn Ccy	[display] This field displays the amount in the transaction currency.
Acy Rate	[Mandatory, Numeric, Three] Type the rate at which the TD account currency is converted to the local currency of the bank. If the TD account currency is INR, this field displays the rate at which the TD account currency is converted to the local currency of the bank.
Txn Rate	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank.
Txn Amount	[Mandatory, Numeric, 13, Two] Type the amount in the Transaction amount.
Payin Amount	[Mandatory, Numeric, 13, Two] Type the payin amount to be debited from the CASA account in the TD account currency.
Compounding Frequency	[Display] This field displays the compounding frequency. This display is based on the product level entry.

Field Name	Description
Int Payout Frequency	[Display] This field will display the frequency at which the interest payout will be made in the deposit.
Base for Rate	[Display] This field display Incremental as the default option for the Base for Rate .
Maturity Date Factor	[Mandatory , Radio Button] Click on the required maturity date factor. The options are: <ul style="list-style-type: none"> • Term • Maturity Date <p>Term</p> <p>The below fields are enabled if Term option is selected in the Maturity Date Factor field.</p>
Value Date	[Mandatory, Pick List, dd/mm/yyyy] Select the value date of the TD from the pick list. The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective. By default it displays the process date. It can also be a previous date.
Term	[Mandatory, Numeric , Four] Type the term in months and days for which the TD is being created. The term should be within the maximum and minimum limits and should be equivalent to the incremental term that is specified at the product level.
Int. Start Date	[Display] This field displays the date which is same as the Value Date .
Maturity Date	[Conditional, dd/mm/yyyy] Type the maturity date of the TD. This field is enabled if the Maturity Date option is selected in the Maturity Date Factor section.
Rate	
Interest Rate	[Display] This field displays the rate of interest for the new TD account.

Field Name	Description
Product Variance	<p>[Display]</p> <p>This field displays the product variance.</p> <p>The product variance is the interest variance defined at the product level for the slab in which TD principal balance and term fits in.</p>
Deposit Variance	<p>[Mandatory, Numeric, Two, Five]</p> <p>Type the interest variance for the new term deposit created under the new TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p> <p>Based on the product definition made for the field Auto/ Force Renew With Deposit Variance in the option TD Product Master (Fast Path: TDM01), the deposit variance will be carried forward to the deposits created by auto / force renewal.</p>
Net Rate	<p>[Display]</p> <p>This field displays the rate at which the interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate, specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the scheme variance.</p>
Scheme Rate	<p>[Display]</p> <p>This field displays the scheme rate.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate.</p>
Next Int Pay Date	<p>[Display]</p> <p>This field displays the next interest payable date.</p>
Next Int Comp Date	<p>[Display]</p> <p>This field displays the next interest compounded date.</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>

Field Name	Description
Deposit Number	<p>[Display]</p> <p>This field displays the deposit number.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
User Ref No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number.</p>
Txn. Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration for the transaction.</p> <p>By default, the system displays Initial Payin By CASA.</p>
Business Acquirer Id	<p>[Mandatory, Pick List]</p> <p>Select the business acquirer ID, to save the business acquirer details for the particular transaction, from the pick list.</p> <p>The system by default displays the ID of the teller who has logged in. The pick list displays the list of users linked to the system.</p>

3. Enter the account number and press the **<Tab>**/Enter key.
4. Select the CASA account number from the pick list.
5. Enter the payin amount.
6. Click on the appropriate maturity date factor.
7. Enter the other relevant details.

5. Interest Payout Transaction

5.1. 1337 - TD Interest Payout Inquiry

Interest plan supported by Oracle FLEXCUBE comprises of fixed or floating interest rates, flexi-interest management and different interest payout modes.

Following are the interest rate types:

- **Fixed Rate:** You can specify a flat fixed rate. The interest rate specified at the time of TD opening is treated as final contractual rate until the deposit matures.
- **Floating Rate:** To apply a floating interest rate, it should be linked to an Interest Index Code. Thus, the interest rate at the account level varies with the changes in the index level rate.

Using this option, you can pay interest on time deposit. After viewing the interest to be paid out, you can proceed to perform this interest payment transaction by choosing the appropriate mode of payout.

Note: DD limit amount breach as an exception will be made overrideable in this screen.

Definition Prerequisites

- BAM09 - Issuer Maintenance
- STM59 - Settlement Bank Parameters
- BAM97 - Currency Code Cross Reference
- BAM20 - Bank Codes Maintenance8051 - CASA Account Opening
 - IV001 - Stock Transaction
 - SCM01 - SC Package Definition
 - 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To inquire about interest payout

1. Type the fast path **1337** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Remittance > TD Interest Payout Inquiry**.
2. The system displays the **TD Interest Payout Inquiry** screen.

TD Interest Payout Inquiry

Field Description

Field Name	Description
Account No	<p>[Mandatory, Numeric, 14]</p> <p>Type the TD account number for which the interest has to be paid out.</p> <p>The name of the account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the account is opened.</p> <p>All the entries posted in the account are in the account currency. The exchange rate values must be defined and downloaded.</p> <p>For example, if the currency assigned to a Loan product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p>
Deposit No	<p>[Mandatory, Pick List]</p> <p>Select the term deposit number from the pick list.</p> <p>You can select the Deposit Number for which the interest needs to be paid, in case of deposit level payout.</p>

Field Name	Description
Payout Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the payment mode of TD from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Bankers Cheque • Cash • Demand Draft • Transfer to External Account • Transfer to GL Account • Transfer to Loans Account • Transfer to Savings Account • Transfer to TD Product
Total Interest	<p>[Display]</p> <p>This field displays the total interest amount when you enter the TD account number and deposit number.</p>
Tax Calculated	<p>[Display]</p> <p>This field displays the tax amount which will be deducted from the total interest amount when you enter the TD account number and deposit number.</p>
Net Interest Payout	<p>[Display]</p> <p>This field displays the interest payout amount when you enter the TD account number and deposit number (in case of deposit level payout).</p>

3. Enter the account number and select the deposit no from the pick list.
4. Select the payout mode from the drop-down list.

TD Interest Payout Inquiry

TD Interest Payout Inquiry

Account No: 00447460000025 SAISH

Ok Cancel

5. Click the **Ok** button.
6. The system displays the message "Do You Want to continue?". Click the **Ok** button.
7. Depending upon the payout mode selected the system will display the relevant transaction screen. For example, if you select **Cash** from the **Payout Mode** drop-down list then the system will display that screen.
8. Enter the required information in the displayed screen.

TD Interest Payout - BC

Field Description

Field Name	Description
Account No	<p>[Display]</p> <p>This field displays the account number as specified in the TD Interest Payout Inquiry screen.</p> <p>The name of the TD account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product at the product level, under which the account is opened.</p> <p>All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded.</p> <p>For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.</p>
Deposit No	<p>[Display]</p> <p>This field displays the deposit number for which the interest needs to be paid, as specified in the TD Interest Payout Inquiry screen.</p>

Field Name	Description
Bank Code	<p>[Mandatory, Drop-Down]</p> <p>Select the bank code of the bank, on which the BC will be drawn from the drop-down list.</p> <p>A list of banks on which the BC can be issued is maintained in Issuer Code Maintenance option</p> <p>A bank usually issues a BC of its own bank branch.</p>
Cheque Ccy	<p>[Mandatory, Pick List]</p> <p>Select the cheque currency in which the BC will be issued from the pick list.</p>
Acct Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the account currency is converted to the local currency of the bank.</p> <p>If the account currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Cheque Ccy Rate	<p>[Display]</p> <p>This field displays the rate at which the cheque currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.</p> <p>The teller's right to change the cheque currency rate is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the cheque currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Int Payout Amt	<p>[Display]</p> <p>This field displays the interest amount to be paid to the customer in the account currency.</p> <p>The interest amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts.</p>
Tax Calculated	<p>[Display]</p> <p>This field displays the tax amount which will be deducted from the total interest amount when you enter the TD account number and deposit number.</p>
Net Interest Payout	<p>[Display]</p> <p>This field displays the interest amount to be paid to the customer in the account currency.</p> <p>The interest amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts.</p>

Field Name	Description
Charges (Lcy)	<p>[Display]</p> <p>This field displays the charges levied for issuing the BC.</p> <p>The charges will be denominated in the local currency of the bank. If the charges pertain to our bank, they are attached at the Transaction Mnemonic level. For charges levied by issuer, the attachment is done at Issuer Master Maintenance. Such charges are deducted from the interest payout amount and the BC is issued for the net amount.</p>
Cheque Amount	<p>[Display]</p> <p>This field displays the transaction amount to be paid in the cheque currency.</p> <p>The transaction amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts. The transaction amount is converted into the cheque currency for the payout of the transaction amount.</p>
Cheque Date	<p>[Mandatory, dd/mm/yyyy]</p> <p>Type the issue date of the BC that will be printed on the instrument. This date will be the posting date.</p>
Serial No	<p>[Display]</p> <p>This field displays the serial number of the BC.</p> <p>At the time of issue, for a remittance instrument such as a BC or DD, the system generates a serial number that includes the branch code. The serial number for each instrument type is maintained separately. On reversal of an instrument issue, the instrument serial number is not reused for the next instrument issue.</p> <p>When an instrument comes into clearing, it may be referred to with an MICR number, which needs to be maintained for each instrument, if it is expected through an inward clearing batch. If the teller liquidates an instrument, the instrument serial number enables the system to track the instrument uniquely.</p>
Micr No	<p>[Mandatory, Alphanumeric, 12]</p> <p>Type the MICR number.</p> <p>For every remittance instrument, it is necessary to maintain an MICR number. The MICR number will be printed on the instrument, if the instrument is expected to come in for inward clearing. A cross reference is maintained with the system-generated serial number, to enable the system to track the instrument.</p>

Field Name	Description
Routing No	<p>[Mandatory, Numeric, Nine]</p> <p>Type the routing number against which the cheque has been drawn.</p> <p>The routing number is the combination of the bank code and the branch code.</p> <p>The combination can be obtained from the Routing Branch Maintenance option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>For a cheque deposited, this routing number is used by the system to determine the float days and thus the value date of the instrument.</p> <p>The system may not allow a bank's own cheques to be deposited, thus encouraging the internal bank transactions to be done through transfer of funds. This feature is bank configurable.</p>
Beneficiary Name	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the name of the beneficiary of the BC.</p>
Passport / IC No	<p>[Mandatory, Alphanumeric, 14]</p> <p>Type the passport/IC number collected from the beneficiary of the BC.</p>
Beneficiary Addr	<p>[Optional, Alphanumeric, 35]</p> <p>Type the contact address of the beneficiary.</p>
User Reference No	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number assigned to the customer.</p>
Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration.</p> <p>This field displays the default narration, based on the transaction. The user can change the narration, if required.</p>

Field Name	Description
Int Payout Frq	[Display] This field displays the interest payout frequency.
Compounding Frq	[Display] This field displays the compounding frequency set at the product level.
Base Amount	[Display] This field displays the base amount.
Annual Equivalent Rate	[Display] This field displays the annual equivalent rate. AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer. The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits
Maturity Date Factor	[Mandatory, Radio Button] Click the option button to select the term or maturity date factor. If Maturity Date option is selected FLEXCUBE disables the Term field.
Payout Term	[Mandatory, Alphanumeric, 22] Type the term for which the TD is being maintained. The term should be within the maximum and minimum limits and should be equivalent to a multiple of the incremental term that is specified at the product level.
Maturity Date	[Conditional, Pick List, dd/mm/yyyy] Select the maturity date from the pick list. This field is enabled if the Maturity Date option is selected from the Maturity Date Factor field. The system will calculate the term by the difference between the maturity date and the value date and stamp the term in the related fields.
Int St Date	[Display] This field displays the interest start date.
Redemption Amt	[Display] This field displays the TD interest amount to be credited to the TD product in TD account currency.
Tax Calculated	[Display] This field displays the tax amount which will be deducted from the total interest amount when you enter the TD account number and deposit number.

Field Name	Description
Net Interest Payout	<p>[Display]</p> <p>This field displays the interest amount to be paid to the customer in the account currency.</p> <p>The interest amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts.</p>
Txn Amount	<p>[Display]</p> <p>This field displays the actual redemption amount converted in the TD product currency.</p>
Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration.</p>

9. Click the **OK** button.
10. The system displays the transaction sequence number. The transaction sequence number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
11. The system displays the **Document Receipt** screen.
12. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Ok** button.
13. The system displays the message "Printed Successfully?". Click the **Ok** button.
14. Click the **Cancel** button.
15. The system displays the serial number.

5.2. TD029 - TD Interest Adjustments

This transaction allows you to pay an interest amount, which is different from the amount stipulated by the bank. The amount specified in this screen may be greater or lesser than the interest amount. This change affects the amount of accrued interest against the term deposit in the current accrual cycle. The account is paid with the modified interest amount at the end of the payment or capitalization cycle. If the bank has paid more interest to the customer, that amount needs to be recovered. You can enter the recovered amount in this screen. If the amount is paid to the customer then **Interest Expense GL** is debited through this transaction while if the amount is recovered from the customer, the **Interest Payable GL** is credited.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To perform TD interest adjustments

1. Type the fast path **TD029** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > TD Interest Adjustments**.
2. The system displays the **TD Interest Adjustments** screen.

TD Interest Adjustments

The screenshot shows the 'TD Interest Adjustments*' window. It features a header bar with a yellow background. Below the header, there are several input fields arranged in a grid-like fashion. The fields include 'Account No.', 'Deposit No.', 'Transaction No.', 'Short Name', 'Org Deposit No.', 'Renewal No.', 'Debit/Credit' (a dropdown menu), 'Adjustment Amount', and 'Description'. At the bottom of the window, there is a navigation bar with buttons for 'Card', 'Change Pin', 'Cheque', 'Cost Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', 'Travellers Cheque', 'LDF', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number.
Org Deposit No	[Mandatory, Pick List] Select the deposit number on which the adjustment transaction is to be performed, from the pick list.
Deposit No	[Display] This field displays the deposit number. The deposit number signifies the number of deposits opened in an account. The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.
Renewal No	[Display] This field displays the renewal number. Renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.
Transaction No	[Display] This field displays the transaction number of the TD account.
Short Name	[Display] This field displays the short name of the customer.
Adjustment Details	
Debit/Credit	[Mandatory, Drop-Down] Select the debit or credit interest adjustment from the drop-down list. The options are: <ul style="list-style-type: none"> • Credit <ul style="list-style-type: none"> • Debit A debit in the interest payable account will reduce the interest to be paid to the customer. The credit in the interest payable account will increase the banks interest liability. The debit entry for interest adjustment will take place if there is a credit entry for interest accrued on the account.

Field Name	Description
Adjustment Amount	[Mandatory, Numeric, 13, Two] Type the amount that has to be adjusted in the accrued amount. In case of debit interest adjustment there should be sufficient credit accrual available for setting off the debit.
Description	[Mandatory, Alphanumeric, 40] Type the description of the transaction.

3. Enter the account number and press the <Tab> or <Enter> key.
4. Select the original deposit number from the pick list.
5. Select the debit/credit type from the drop-down list, and enter the adjustment amount and description.

TD Interest Adjustments

6. Click the **Ok** button.
7. The system displays the message "Authorization required. Do You Want to continue?". Click the **OK** button.
8. The system displays the **Authorization Reason** screen.
9. Enter the relevant information and click the **Ok** button.
10. The system displays the message "Interest adjusted". Click the **OK** button.

5.3. TD039 - TD Multiple Payout Instructions

Customer has the flexibility to choose the payout amount and mode in which the redemption proceeds of a term deposit will be received, As per customer requirement multiple modes of payment for interest and principal can be selected.

The multiple payout options which can be set for :

- Interest earned
- Principal Amount
- Premature redemption

You can also set up TD payout instructions to an external account. The instructions can be set for a single or all the deposits in a TD account. In case of premature redemption of a deposit, the interest amount accrued till date will not be paid to the customer. And, if any tax is deducted on the interest amount paid to the customer, then the tax amount also is not refunded to the customer.

Definition Prerequisites

- 8054 - Time Deposit Account Opening
- PM002 - Payments Transaction Definition

Modes Available

Add, Modify, Delete Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add multiple payout instructions

1. Type the fast path **TD039** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > TD Multiple Payout Instructions**.
2. The system displays the **TD Multiple Payout Instructions** screen.

TD Multiple Payout Instructions

Field Description

Field Name	Description
------------	-------------

Account Number	[Mandatory, Numeric, 14] Type the TD account number of the customer, for which the payout instructions have to be specified.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Branch	[Display] This field displays the home branch where the TD account is opened and maintained.
Product	[Display] This field displays the product code.
Principal Balance	[Display] This field displays the TD account principal balance.

Field Name Description

**Account
Currency**

[Display]

This field displays the currency assigned to the product at the product level, under which the account is opened.

For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

All the entries posted in the account are in the account currency.

3. Click the **Add** button.
4. Enter the account number and press the **<Tab>** or **<Enter>** key. The system will fetch all the account information.

TD Multiple Payout Instructions

5. The system enables the **Payout Details** tab.
6. Select the payout type from the drop-down list.
7. Click on the pay mode the drop-down will be active.
8. Select the payout frequency and payout mode from the drop-down list and select the payout date from the pick list. These fields are enabled depending on the selection of Payout Type.
9. Click the **+** button to add a row.

Payout Details

In the Payout Details tab the Payout Type field facilitates you to specify whether the payout instruction is for

- Interest
- Principal amount
- Premature redemption

Depending on the criteria you choose for the payout type, the data fields will alter as explained below.

Field Description

Field Name Description

Payout Type [Mandatory, Drop-Down]
 Select the payout type as Interest from the drop-down list.
 The other options are:

- Principal
- Premature
- Interest

Field Name	Description
Payout Frequency	[Display] This field displays the interest payout frequency for the deposit, if a single term deposit is selected.
All Deposits	[Optional, Check Box] Select the All Deposits check box, to set up payout instructions for all the term deposits initiated under the TD account.
Deposit No.	[Optional, Pick List] Select the TD number from the pick list, to apply the payout instruction to a single term deposit. The pick list, lists all the deposits held under the TD account.
Indicative Amount	[Display] This field displays the indicative amount. The interest amount, if a single Term Deposit number is selected, this field displays the interest amount payable for that deposit along with the currency code. If the All Deposits check box is selected, this field displays the sum total of Interest amount payable for the complete deposit under the TD account along with the currency code.

Column Name	Description
Org. Deposit No	[Display] This column displays the original deposit number. The Original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number, but will retain the original deposit no of the source deposit.
Renewal No	[Display] This column displays the renewal number. Renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.
Deposit No	[Display] This column displays the deposit number. The Deposit Number signifies the number of deposits opened in an account. The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.

Column Name	Description
Priority	<p>[Display]</p> <p>This column displays the payout instruction execution priority. The payout instruction for a term deposit or deposits will be carried out as per the priority.</p> <p>This priority number can be changed to alter the priority of a particular instruction.</p>
Pay Type	<p>[Optional, Drop-Down]</p> <p>Select the pay type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Fixed – a fixed payout amount is specified • Percent – a % of the amount is specified
Amt/Percent	<p>[Mandatory,Numeric,3]</p> <p>Type the amount or percentage value depending on the pay type selected.</p> <ul style="list-style-type: none"> • Percentage - Type a percentage, if the Pay Type is Percent. The value should be equal to or less than 100. <p>[Mandatory,Numeric,13]</p> <ul style="list-style-type: none"> • Fixed - Type an amount, if the Pay Type is Fixed. The value should be less than the payout amount. <p>For example, a customer is specifying payout instructions for the interest earned on the TD and chooses the Pay Type as Percentage. The customer wants to transfer 75% of the interest amount to the loan account and the remaining amount to the CASA account. If the customer earns 1000 as interest amount in a year, 75% of 1000 i.e. 750 will get transferred to the loan account. The remaining 250 i.e. the remaining 25% will get transferred to the CASA account.</p>
Net Amount	<p>[Display]</p> <p>This column displays the available payout amount (principal or interest or premature), for which the payout transaction will be carried out.</p> <p>This amount is displayed in account currency.</p>
Pay Ccy	<p>[Optional, Drop-Down]</p> <p>Select the currency in which the payout is conducted i.e. the transaction currency from the drop-down list.</p>
Pay Amount	<p>[Display]</p> <p>This column displays the net payable amount in the pay currency after applying the conversion rate of the local currency of the bank.</p>
Pay Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the payout mode from the drop-down list.</p>

Reinvest to New Account

The screenshot shows the 'TD Multiple Payout Instructions' window with the 'Reinvest to New Account' tab selected. The window is divided into several sections:

- Account Information:** Account Number (5030000001194), Branch (SANDOZ - MUMBAI), Principal Balance (14,08,070.00), Customer Name (EODACCOUNT), Product (302 FIXED DEPOSIT-RETAIL CORP), and Account Currency (INR).
- Navigation Tabs:** CASA Account, External Account, Loan Account, GL Account, Default Instructions, Interest Summary, Reinvest to New Account (selected), Reinvest to Same Account, Bankers Cheque, Demand Draft, External A/c- NEFT, External A/c- RTGS.
- Interest Summary:** TD Amount (901.68), Txn Amount (901.68), Account Currency (INR), Txn Currency (INR), TD Rate (1.00000), and Txn Rate (1.00000).
- Payout Instructions:** Product (300 FIXED DEPOSIT - RESIDENTS), Variance (0.00000), Renewal Term (0 Months, 0 Days), Payout Frequency (Quarterly), Compounding Frequency (None/At Maturity), and Base for rate (Incremental Amount).
- Record Details:** A table with columns for Input By, Authorized By, Last Mnt. Date, Last Mnt. Action, and Authorized.
- Footer:** Action buttons: Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, Ok, Close, Clear.

Field Description

Field Name

Description

TD Amount

[Display]

This field displays the principal amount of the term deposit or all deposits initiated under the TD Account.

Account Currency

[Display]

This field displays the currency assigned to the product at the product level, under which the account is opened.

For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

All the entries posted in the account are in the account currency.

TD Rate

[Display]

This field displays the rate at which the account currency is converted to the local currency of the bank.

Field Name	Description
Txn Amount	<p>[Display]</p> <p>This field displays the amount in the transaction currency.</p> <p>The transaction currency is the currency in which the customer wants to transact.</p> <p>For example, if the customer wants redemption amount to be paid in EUR (Euro), EUR is the transaction currency.</p>
Txn Currency	<p>[Display]</p> <p>This field displays the currency of the cheque.</p> <p>This field, by default, displays the account currency as the transaction currency.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency and for posting the GL entries it is converted into the local currency of the bank.</p> <p>For example, if the customer wants redemption amount to be paid in EUR (Euro), EUR is the transaction currency.</p>
Txn Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.</p>
Branch	<p>[Mandatory, Numeric, Five, Pick List]</p> <p>Type the TD account branch code.</p>
Customer category	<p>[Display]</p> <p>This field displays the category of the customer.</p>
Product	<p>[Mandatory, Pick List]</p> <p>Select the TD product code number under which the TD account is opened from the pick list.</p>
Staff	<p>[Optional, Check Box]</p> <p>Select the Staff check box, if the customer is the staff of the bank.</p>
Variance	<p>[Mandatory, Numeric, Three, Six]</p> <p>Type the interest variance.</p> <p>The interest variance is validated against the minimum and the maximum variance defined at the product level.</p> <p>It also validates if the interest rate + variance is within the minimum and maximum interest ceiling defined in the TD Product Master.</p>
Renewal Term	<p>[Mandatory, Numeric, Three, Three]</p> <p>Type the term for which the TD is being maintained.</p> <p>The term should be within the maximum and minimum limits and should be equivalent to the incremental term that is specified at the product level.</p>

Field Name	Description
Payout Frequency	[Display] This field displays the time interval, at which the interest for TD will be paid out.
Compounding Frequency	[Display] This field displays the compounding frequency.
Base for rate	[Display] This field displays the base amount.

External A/c - NEFT

The screenshot shows the 'TD Multiple Payout Instructions' form with the following details:

- Account Number:** 5030000001194
- Branch:** SANDOZ - MUMBAI
- Principal Balance:** 14,08,070.00
- Customer Name:** EODACCOUNT
- Product:** 302 FIXED DEPOSIT-RETAIL CORP
- Account Currency:** INR
- Interest Summary:** External A/c - NEFT (highlighted)
- Payment Transaction Code:** * N06
- Payment Type:** OP
- Sender's Account Number:** 02403000000020
- Sender's Account Type:** 10 - Savings Bank
- Account Currency:** (4488)* INR
- Sender Bank Details:**
 - Sending Branch IFSC Code:** (5756)* HDFC002135
 - Originator of Remittance:** (7002) * AISHWARYA RAI
 - Sender to Receiver Information:** (7495) Details: PRATEEKSHA JUHU, MUMBAI, MAHARASHTRA, 401
- Beneficiary Details:**
 - Beneficiary Account Number:** (6061)* 982256TRD
 - Beneficiary Account type:** (6310) 11 - Current Account
 - Beneficiary Branch IFSC code:** (5569) SB123345
 - Beneficiary Customer Name:** (6081) * John
 - Beneficiary Customer Address:** (5565) Park Avenue
- Record Details:** Table with columns: Input By, Authorized By, Last Mnt. Date, Last Mnt. Action, Authorized.

Field Description

Field Name	Description
Payment Transaction Code	[Mandatory, Pick List] Select the payment transaction code from the pick list. These codes are defined in the Payment Transaction Definition (Fast Path : PM002) option.

Field Name	Description
Payment Type	[Display] This field displays the payment type based on the selected payment transaction code.
Sender's Details	
Sender's Account Number	[Mandatory, Alphanumeric, 14] Type the account number from which the payment is originated. It can be an external account number. By default the system displays the TD account number for which the instruction is being maintained. The account number is mapped to the Sending Customer Account Number (6021) field in the NEFT message (NO6).
Sender's Account Type	[Mandatory, Drop-Down] Select the account type from the drop-down list. The options are as follows: <ul style="list-style-type: none"> • 10 - Savings Bank • 11 - Current Account • 12 - Overdraft • 13 - Cash Credit • 14 - Loan Account • 40 - NRE • 52 - Credit Card
Account Currency (4488)	[Display] This field displays the account currency.
Sender Bank Details	
Sending Branch IFSC Code (5756)	[Mandatory, Alphanumeric, 11] Type the sending branch IFSC code. These codes are maintained in the Bank Branch Directory (Fast Path : PM004) option.
Sender to Receiver Information (7495)	[Optional, Alphanumeric, 35] Type the information from the sender to the receiver.
Originator of Remittance (7002)	[Mandatory, Alphanumeric, 35 , Four Lines, Pick List] Type the sending customer account details or select it from the pick list.
Beneficiary Details	

Field Name	Description
Beneficiary Account Number (6061)	[Mandatory, Alphanumeric, 14] Type the beneficiary account number to which the outgoing payment transaction is to be sent.
Beneficiary Customer Name (6081)	[Mandatory, Alphanumeric, 35] Type the receiving customer's account name.
Beneficiary Account Type (6310)	[Optional, Drop-Down] Select the beneficiary account type from the drop-down list. The options are as follows: <ul style="list-style-type: none"> • 10 - Savings Bank • 11 - Current Account • 12 - Overdraft • 13 - Cash Credit • 14 - Loan Account • 40 - NRE • 52 - Credit Card This is the receiving customer's account type.
Beneficiary Customer Address (5565)	[Optional, Alphanumeric, 35, Four Lines] Type the address of the beneficiary customer .
Beneficiary Branch IFSC Code (5569)	[Mandatory, Alphanumeric, 11] Type the beneficiary branch's IFSC code. It is a unique code used for NEFT and RTGS.

External A/c - RTGS

The screenshot shows the 'TD Multiple Payout Instructions' window. At the top, there are input fields for Account Number (5030000001194), Branch (SANDAZ - MUMBAI), Principal Balance (14.08.070.00), Customer Name (EODACCOUNT), Product (302 FIXED DEPOSIT-RETAIL CORP), and Account Currency (INR). Below this is a tabbed menu with 'External A/c - RTGS' highlighted. The main form area contains:

- Payment Transaction Code: * 541
- Payment Type: OP
- Account currency: (4488)* INR
- Ordering customer details: (5500) * 0240300000020, AISHWARYA RAI, PRATEEKSHA JUHU, MUMBAI, MAHARASHTRA, 401
- Receiver Address: ASU12
- Beneficiary Customer Account Number: (5661)* 0002346
- Beneficiary Customer Details: (5561)* John, Park Avenue
- Ordering Institution*: 2.5516
- Ordering Institution IFSC: (5517) HDFC BANK LTD
- Ordering Institution Details: (5516) WORLI - SANDAZ HOUSE
- Sender to Receiver Information code: (7495) 2. FAST
- Code Info: (7495) 123
- Additional Info 1-5: (7495)

 At the bottom, there is a 'Record Details' table with columns for Input By, Authorized By, Last Mnt. Date, Last Mnt. Action, and Authorized. A navigation bar at the very bottom includes buttons for Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, Ok, Close, and Clear.

Field Description

Field Name	Description
Payment Transaction Code	[Mandatory, Pick List] Select the payment transaction code from the pick list. These codes are defined in the Payment Transaction Definition (Fast Path : PM002) option.
Payment Type	[Display] This field displays the payment type based on the selected payment transaction code.
Account Currency (4488)	[Display] This field displays the currency of the account.
Ordering Customer Details (5500)	[Mandatory, Alphanumeric, 35, 4 lines, Pick List] Type the sender's bank account number, name of the sender and address or select it from the pick list.

Field Name	Description
Receiver Address	[Mandatory, Alphanumeric,11] Type the IFSC code of the beneficiary bank receiving the remittance.
Beneficiary Customer Account Number (5561)	[Mandatory, Alphanumeric, 34] Type the beneficiary customer's account number.
Beneficiary Customer Details (5561)	[Mandatory, Alphanumeric, 35, 4 lines] Type the details of the beneficiary customer.
Ordering Institution	[Mandatory, Drop-Down] Select the ordering institution from the drop-down list. The options are: <ul style="list-style-type: none"> • 5517 • 5516
Ordering Institution IFSC (5517)	[Conditional, Alphanumeric,11] Type the ordering institution IFSC code. It is the sending branch's IFSC. This field is enabled if the 5517 option is selected in the Ordering Institution drop-down list.
Ordering Institution Details (5516)	[Conditional, Alphanumeric, 35, 3 lines] Type the ordering institution details such as the name of the exchange house and intermediary institution from which originating banks have received the money. This field is enabled if the 5516 option is selected in the Ordering Institution drop-down list.
Sender to Receiver Info Code (7495)	[Optional, Drop-Down] Select the sender receiver information code from the drop-down list. The options are: <ul style="list-style-type: none"> • NRE • FAST • URGENT
Code Info (7495)	[Optional, Alphanumeric, 25] Type the code related information.
Additional Info 1,2,3,4,5 (7495)	[Optional, Alphanumeric, 35] Type additional information related to the code.

3.

TD039 - TD Multiple Payout Instructions

10. Click the **Save** button. The system displays the relevant **Payout Detail** screen.
11. Click the **Ok** button.
12. The system displays the message "Record Added...Authorisation Pending...Click Ok to Continue". Click the **OK** button.
13. The multiple payout instructions are added once the record is authorised.

6. Redemption

6.1. 1358 - Mixed Redemption

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. FLEXCUBE will allow a TD opened today to be redeemed on the day of account opening. Both part and full redemption will be supported on the day of TD creation. Multiple part redemptions will not be allowed on a single day.

If the customer does not keep a deposit in the bank for a complete term, a penalty interest will be charged to him.

Penalty rate = TD rate as per the product rates + Deposit level variance (special rate) – Product/bank/slab level penalty variance + or - Special penalty variance

The system does not allow partial or premature redemption of a deposit, which is marked for lien for the entire deposit. If a part of the deposit is marked for lien, redemption is allowed only on the remaining amount.

If a deposit matures on a holiday, on full / part redemption of the auto renewed / force renewed deposit on the immediate next working day, the holiday interest will be calculated and paid. For a single maturity deposit, holiday period interest along with the PMI interest (if applicable) will be given if redemption / reinvest to new account / reinvest to existing account is done on any day other than the immediate working day after the holiday.

In case a back dated interest change is carried out for the deposit, the redemption is not permitted on the same day.

To arrive at the net redeem amount, the system performs additions and deductions.

Net Redeem Amount = Redeem Amount + [(Principal Due + Uncollected Principal + Interest Due + Uncollected Interest + PMI on uncollected principal + PMI on uncollected interest + Penalty Interest) - (Pro-Rata interest paid + Tax paid)]

Note: If the penalty routine is defined as not to pay any interest for any premature redemption of Term Deposits, the same will result in reversal of all accrued and compounded interest amounts till the date of redemption. If any interest amount is already paid out to the customer, it will be recovered from the principal amount before calculating the net redemption amount payable to the customer.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To perform TD redemption

1. Type the fast path **1358** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Transfer > Mixed Redemption**.
2. The system displays the **Mixed Redemption** screen.

Mixed Redemption

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number of the customer, which is to be redeemed.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Principal Balance	[Display] This field displays the principal balance of the TD account. Principal balance is the sum total of the principal amount of all the deposits falling under a single TD account. The principal balance of a matured deposit is not included in this column, as once a deposit matures, the principal amount is moved to Outstanding Principal. The account currency is populated adjacent to the principal balance.

Field Name	Description
Txn Ref No	[Display] This field displays the system generated transaction number. This number is unique for every transaction. The transaction number helps a teller to keep track of the various transactions.
Redemption Amount	[Display] This field displays the redemption amount in the account currency. The redemption amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts.
User Ref No	[Display] This field displays the transaction reference number as the user reference number.

- Enter the TD account number and select the deposit number from the adjacent pick list. If no deposits are selected, the system will display all the deposits opened under the TD account in the **Deposit Summary** tab.

- The system displays the **Deposit Summary** tab.

Deposit Summary

The Deposit Summary tab displays the details of the deposits maintained under the TD account. This tab initiates the process for redemption of a deposit. You can choose the deposit to be redeemed, whether full or partial deposit is to be redeemed and specify the redemption amount in case of a partial redemption.

The screenshot shows the 'Mixed Redemption' window. At the top, there are input fields for Account Number (01000000174440), Customer Name (JOHNKENNEDY), Principal Balance (LTL 4,500.00), Txn Ref No (512007113000730019), and Redemption Amount (LTL 4,500.00). Below these are tabs for 'Deposit Summary', 'Redem Details', 'Deposit Details', and 'SC Details'. A table with 13 columns is displayed, containing one row of data. At the bottom left, there are sections for 'Other Transactions' and 'User Defined Fields'. Buttons for 'Validate', 'Payout', 'Ok', 'Close', and 'Clear' are visible.

Original Deposit No	Renewal No	Deposit No	Deposit Status	Redem Mode	Principal Balance	Lien Amount	Outstanding Principal	Outstanding Interest	Redem Amount	Net Redem Amount	Product Penalty Variance	Special Penalty Variance

Field Description

Column Name	Description
Original Deposit No	[Display] This column displays the original deposit number which is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number, but will retain the original deposit no of the source deposit.
Renewal No	[Display] This column displays the renewal number which signifies the number of deposits created out of the source deposit either due to renewals, or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.

Column Name	Description
Deposit No	<p>[Display]</p> <p>This column displays the running Term Deposit Number which signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
Deposit Status	<p>[Display]</p> <p>This column displays the current status of the deposit.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Open - This deposit can be partly or prematurely redeemed. An open account is open for various transactions. • Opened Today - This deposit is opened on the day of the transaction. Part or premature redemption cannot be done for this deposit. • Closed - This deposit has been redeemed and thus is closed. • Closed Today - This deposit has been redeemed and closed on the day of the transaction. • Unclaimed - This deposit is matured and the grace period has ended. It is thus transferred to the unclaimed GL account. This amount cannot be redeemed. If the Redemption Renewal Unclaimed Account check box is selected at the product level, the deposit will be treated as a normal matured deposit and redemption will be allowed. • Matured - This deposit has matured. Partial or premature redemption will not be allowed on this deposit. The system displays the error FCR5458, if you try to perform partial or premature redemption on a matured deposit. For more information, refer to Appendix A • Marked for Lien - This deposit is marked for lien. If a lien is marked on the full amount, part or premature redemption is not allowed. If lien is marked on partial deposit, part or premature redemption is allowed for the remaining amount, which is not marked for lien. • Blocked - This deposit is blocked. Part or premature redemption is not allowed for this deposit. • Forced Renewal - This deposit is marked for lien and thus has been force renewed. Part or premature redemption is not allowed for this deposit. The Redemption Mode column is disabled.

Column Name	Description
Redem Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the redeem mode of the TD account from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Full - Select this option for premature redemption of the deposit. • No Redeem - Select this option for not allowing redemption of the deposit. • Part - Select this option for partial redemption of the deposit.
Principal Balance	<p>[Display]</p> <p>This column displays the principal balance of the TD account in the account currency.</p> <p>The principal balance of a matured deposit is not included in this column as once a deposit matures, the principal amount is moved to the Outstanding Principal column.</p> <p>The account currency is populated adjacent to the principal balance.</p>
Lien Amount	<p>[Display]</p> <p>This column displays the lien amount, if there is a lien marked on a deposit.</p> <p>If a lien is marked on the full deposit amount, the system will not allow you to perform partial or premature redemption.</p> <p>If the lien is marked on the partial deposit amount, part or premature redemption is allowed for the remaining amount not marked for lien. The system will not allow you to select the full redeem mode.</p> <p>The system allows the customer to redeem a partial amount not marked for lien in the incremental value as mentioned at the product level.</p> <p>For example, for a deposit of 10,000, lien is marked on an amount of 5550. The incremental value is 1000. The customer will be allowed to redeem 4000.</p>
Outstanding Principal	<p>[Display]</p> <p>This column displays the principal balances of the matured deposits which are not redeemed.</p>
Outstanding Interest	<p>[Display]</p> <p>This column displays the interest earned on the matured deposits which are not redeemed.</p>

Column Name	Description
Redem Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount to be redeemed.</p> <p>This field is enabled if the Part option is selected from the Redem Mode drop-down list.</p> <p>If the Full option is selected from the Redem Mode drop-down list, then the full deposit amount is displayed in this field.</p>
Net Redem Amount	<p>[Display]</p> <p>This column displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest and service charges (if applicable), from the redeem amount. This is the amount which will be paid to the customer.</p>
Product Penalty Variance	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y, if penalty variance is to be charged for premature redemption of a deposit. The default value is set as N.</p> <p>When a deposit is redeemed before maturity, the bank pays a customer penalty interest, which is lower than the normal interest. The penalty index and the process of calculation are defined at the product level.</p> <p><i>Penalty interest = Current Interest Rate - Penalty variance (which is defined at the bank/product/interest slab level)</i></p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the variance which will be applied over the product/bank/slab level penalty.</p> <p>This field is enabled if the value Y is selected in the Product Penalty Variance field.</p> <p>This field will accept a value within the minimum and maximum variance specified at the product level.</p> <p>If the net interest rate derived after applying the special penalty variance is negative or zero, no interest will be paid for that particular deposit on redemption.</p>

5. Select the redeem mode from the drop-down list and enter the redeem amount for the deposit.
6. Click the **Validate** button.
7. Double-click the net redeem amount column.
8. The system displays the **Deposit Details** tab.

Deposit Details

The Deposit Details tab displays the principal position, the interest earned and deducted information, and calculates the net redemption proceeds of the TD.

Field Description

Field Name	Description
Redemption Amount	[Display] This field displays the premature redemption amount.
+ Principal Due	[Display] This field displays the premature or matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer. Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field. For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which Maturity Option is defined as No instructions at the product level, and the proceeds are not collected by the customer.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on a matured principal, and the proceeds are not collected by the customer.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period).</p> <p>PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Interest Due	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer and the accrued interest if any, that was carried forward at the time of the maturity.</p> <p>Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest amount for which the Payout Option is defined as No instructions at the product level, and the proceeds are not collected by the customer.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on uncollected interest, and the proceeds are not collected by the customer.</p> <p>PMI will be paid to the customer if the Payout Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the net interest paid to the customer, after deducting penalty interest amount charged to the customer for premature redemption of the TD.</p> <p>When a deposit is redeemed before maturity, the bank pays a customer penalty interest, which is lower than the normal interest. The penalty index and the process of calculation are defined at the product level.</p> <p><i>Penalty interest = Current Interest Rate - Penalty variance (which is defined at the bank/product/interest slab level)</i></p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest calculated for the redemption amount based on the slab it would fall into without considering any penalty. It is calculated based on the rate applicable.</p>

Field Name	Description
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameter Level (TDM04).</p>
- Additional Penalty Amount	<p>[Display]</p> <p>It displays the Documentary Stamp Tax amount. On premature closure, system will debit Documentary Stamp Tax amount calculated at the time of TD Account opening from the final proceeds of TD Account.</p>
- Pro-rata Interest Paid Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '04, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '04, the system calculates the interest payable for this deposit from 1st January '04 to 31st May '04. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed. This amount is paid by the bank, to the tax authorities.</p> <p>The tax proceeds are to be recovered by the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed. This amount is paid by the bank, to the tax authorities.</p> <p>The tax proceeds are to be recovered by the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>

Field Name Description

Net Proceeds [Display]
 This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.

Txn Narrative [Mandatory, Alphanumeric, 120]
 Type the default narration based on the chosen redeem mode.

9. Enter the transaction narrative and click the **Save** button.
10. Click the **Payout** button on the **Deposit Summary** tab.
11. The system displays the **Redeem Details** tab.

Redem Details

The **Redem Details** tab helps to specify the redemption mode for the premature redemption of the deposit.

Field Description

Field Name	Description
Net Redem Amount	<p>[Display]</p> <p>This field displays the sum total of the redemption amount for all the deposits that are being redeemed.</p> <p>This amount is displayed in the TD account currency.</p>
Column Name	Description
Sr.No.	<p>[Display]</p> <p>This column displays a serial number for every redemption option or mode that is added.</p>
Redem Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the redeem mode of the TD amount from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Bankers Cheque • Transfer to CASA • Transfer to External Account • Transfer to Loans • Demand Draft • Transfer to GL • Reinvest to New Account
Account Rate	<p>[Display]</p> <p>This column displays the rate at which the account currency is converted to the local currency of the bank. The exchange rate values are defined and downloaded from FCC.</p> <p>The teller's right to change the account currency rate value, is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the account currency and the local currency are same, the field takes a default value as 1, which cannot be modified.</p>
Account Cost Rate	<p>[Display]</p> <p>This column displays the cost rate for the account currency that is defaulted to the mid rate for the currency.</p>

Column Name	Description
Redem Amount	<p>[Optional, Numeric, 13, Two]</p> <p>Type the redemption amount that is to be redeemed to the customer, in the chosen redeem mode.</p> <p>This amount is displayed in the account currency.</p>
Txn Ccy	<p>[Mandatory, Drop-Down]</p> <p>Select the currency of the cheque from the drop-down list.</p> <p>This field, by default, displays the account currency as the transaction currency.</p> <p>While posting the transaction entries to the account, the transaction currency is converted into the account currency, based on the defined transaction rate.</p>
Txn Rate	<p>[Display]</p> <p>This column displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.</p> <p>The teller's right to change the transaction currency rate value, is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the transaction currency and the local currency are the same, the field takes a default value as 1, which cannot be modified.</p>
Txn Cost Rate	<p>[Display]</p> <p>This column displays the cost rate for the transaction currency that is defaulted to the mid rate for the currency.</p>
Txn Amount	<p>[Display]</p> <p>This column displays the redemption amount to be paid in the transaction currency.</p> <p>The redemption amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts. The redemption amount is converted into the transaction currency for the payout of the redemption amount.</p>
SC Amount	<p>[Display]</p> <p>This column displays the service charge amount, if the redemption is done by issuing a BC or DD.</p> <p>You can either waive the SC or increase the amount through the SC Details tab.</p>
Net Txn Amount	<p>[Display]</p> <p>This column displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest and service charges (if applicable) from the redeem amount. This is the amount, which will be paid to the customer in the chosen redeem mode.</p>

12. Click the **+** button to add the **Redeem Mode** option, for premature redemption amount. Click the **-** button, to delete the **Redeem Mode** option.
13. Depending upon the **Redeem Mode** selected the system will display the relevant tab screen. For example, if you select **Cash** from the **Redeem Mode** drop-down list then, the system displays the **Cash** tab screen.
14. Enter the required information in various tab screens.

Cash

If the customer chooses cash as the redemption payout mode, the customer has to personally come to collect the proceeds. Uncollected redeemed cash proceeds are displayed in the principal due field.

Field Description

Field Name	Description
GL Account Number	[Display] This field displays the cash GL account number maintained by the bank.
GL Description	[Display] This field displays the description of the GL Account number.

Field Name	Description
Txn Narrative	[Mandatory, Alphanumeric, 120] Type the narrative value based on the chosen redeem mode.
Redemption Amount	[Display] This field displays the redemption amount to be paid in cash mode.

BankersCheque

If the customer selects Banker's cheque as the redemption mode, the customer can choose the bank at which the BC is payable. The BC is an inward clearing cheque and thus, will come to the issuer bank for clearing. The BC has to be personally collected by the customer. Service charges applicable for issuing a BC are deducted from the redemption amount.

The screenshot shows the 'Mixed Redemption' application window. The top section contains account and customer information. The middle section has tabs for 'Deposit Summary', 'Redem. Details', 'Deposit Details', and 'BC Details', with 'Redem. Details' selected. Below the tabs are fields for 'Reinvest to other Account', 'BankersCheque', and 'Cash'. The main form area includes fields for 'Issuer Code', 'Issue Date', 'Routing No.', 'Serial No.', 'BC No.', 'Passport / IC No.', 'Beneficiary Name', 'Beneficiary Address', and 'Txn Narrative'. A 'User Defined Fields' section is visible at the bottom left. The window has 'Save' and 'Cancel' buttons on the right and 'Ok', 'Close', and 'Clear' buttons at the bottom.

Account Number:	61000000174440	Customer Name:	JOHNKENNEDY
Principal Balance:	LTL 4,500.00	Txn Ref No.:	512007113000730019
Redemption Amount:	LTL 4,500.00	User Ref No.:	512007113000730019
Issuer Code:	Danamon Bank	Bank:	Danamon Bank
Issue Date:	30/11/2007	Branch:	Head Office
Routing No.:	119999	Sector:	Java
Serial No.:	9999220000015		
BC No.:	458637542142		
Passport / IC No.:	PP5867521		
Beneficiary Name:	John Cussack		
Beneficiary Address:	34 Block		
	New Athens		
	New Jersey		
Txn Narrative:	TD. Redemption Payout By BC.		

Field Description

Field name	Description
Issuer Code	<p>[Mandatory, Pick List]</p> <p>Select the issuer code of the bank on which the BC is to be drawn from the pick list.</p> <p>A list of banks on which BC can be issued, is maintained in the Issuer Code Maintenance option and is downloaded to the branch. Normally banks issue BC of their own bank.</p>
Issue Date	<p>[Display]</p> <p>This field displays the date on which the BC is issued.</p>
Routing No	<p>[Conditional, Numeric, Nine]</p> <p>Type the routing number of the bank/branch, on which the BC is drawn.</p> <p>The routing number is the combination of the bank code and the branch code.</p> <p>The combination can be obtained from the Routing Branch Maintenance option.</p> <p><i>Routing Number = Sector Code / Bank Code + Branch Code</i></p> <p>In case of a BC, the routing number should be of the same bank, i.e. the default routing number displayed, as the instrument comes for inward clearing.</p> <p>In case of a DD, the routing number can be modified to the routing number of the bank, where the instrument will go for clearing. The order, in which the codes in the routing number are to be entered, is determined by the set up at Settlement Bank Parameters option.</p> <p>The system may not allow a bank's own cheques to be deposited, thus encouraging the internal bank transactions to be done through transfer of funds. This feature is bank configurable.</p> <p>You must enter data in Routing No and Micr No field or keep both as blank.</p>
Serial No	<p>[Display]</p> <p>This field displays the serial number. For a remittance instrument such as a BC or DD, the system generates a serial number that includes the branch code. The serial number for each instrument type is maintained separately. On reversal of an instrument issue, the instrument serial number is not reused for the next instrument issue.</p> <p>When an instrument comes into clearing, it may be referred to with an MICR number, which needs to be maintained for each instrument, if it is expected through an inward clearing batch. If the teller liquidates an instrument, the instrument serial number enables the system to track the instrument uniquely.</p>

Field name	Description
BC No	[Conditional, Numeric, 12] Type the banker's cheque number. This number is printed on the instrument, if the instrument is expected to come in for inward clearing. A cross reference is maintained with the system-generated serial number, to enable the system to track the instrument.
Passport/IC No	[Mandatory, Alphanumeric, 16] Type the passport/IC number for the identification of the beneficiary.
Beneficiary Name	[Mandatory, Alphanumeric, 35] Type the name of the beneficiary.
Beneficiary Address	[Optional, Alphanumeric, 35] Type the address details of the beneficiary.
Txn Narrative	[Mandatory, Alphanumeric, 120] Type the narrative value based on the chosen redeem mode.
Bank	[Display] This field displays the bank name corresponding to the bank code extracted from the routing number.
Branch	[Optional, Alphanumeric, Five] Type the branch name corresponding to the branch code and bank code extracted from the routing number.
Sector	[Optional, Alphanumeric, Five] Type the sector name corresponding to the sector code extracted from the routing number.

XferToCASA

If the customer selects Transfer to CASA as the redemption mode, the redemption proceeds will be directly transferred to the specified current or savings account, on the date of redemption.

The screenshot shows the 'Mixed Redemption' window with the 'XferToCASA' tab selected. The main form contains the following fields:

- Account Number: 61000000174440
- Principal Balance: LTL 4,500.00
- Redemption Amount: LTL 4,500.00
- Customer Name: JOHNKENNEDY
- Txn Ref No: 512007113000730019
- User Ref No: 512007113000730019
- Navigation tabs: Deposit Summary, Redem Details, Deposit Details, SC Details, Reinvest to other Account, BankersCheque, **XferToCASA**
- CASA A/C: 60000000714840
- Customer Name: JOHNKENNEDY
- Txn Narrative: Redemption By CASA
- Redemption Amount: LTL 4,501.85
- Buttons: Save, Cancel
- Other Transactions section with User Defined Fields.
- Bottom buttons: Ok, Close, Clear

Field Description

Field Name	Description
CASA A/C	[Mandatory, Numeric, 14, Pick List] Select the CASA account number from the pick list. The TD redemption proceeds will be credited to this account.
Customer Name	[Display] This field displays the name of the CASA account holder(s).
Txn Narrative	[Mandatory, Alphanumeric, 40] Type the narrative value based on the chosen redeem mode.
Redemption Amount	[Display] This field displays the redemption amount in the chosen redeem mode. This amount is displayed in the account currency.

XferToExtAcct

If the customer selects Transfer to External account as the redemption mode, the redemption proceeds will be directly transferred to the specified external account, on the date of redemption. The inter-branch GL account for external transfers is defined under TD Bank parameters maintenance.

The screenshot shows the 'Mixed Redemption' application window with the 'XferToExtAcct' tab selected. The window contains the following fields and values:

- Account Number:** 51000000174440
- Customer Name:** JOHNKENNEDY
- Principal Balance:** LTL 4,500.00
- Redemption Amount:** LTL 4,500.00
- Txn Ref No.:** 512007113000730020
- User Ref No.:** 512007113000730020
- Issuer Code:** 11
- External Branch:** (Drop-down menu)
- External Acct No.:** 986733421421
- Redemption Amount:** LTL 500.00
- Txn Narrative:** TD: Redemption By Ext. Xfer.

Buttons for 'Save', 'Cancel', 'Ok', 'Close', and 'Clear' are visible at the bottom of the window.

Field Description

Field name	Description
Issuer Code	[Mandatory, Pick List] Select the issuer code to which the redemption proceeds of the deposit will be transferred from the pick list. This is a GL account maintained by the bank where the redemption proceeds will be temporarily held, until it is transferred to the external account.
External Branch	[Mandatory, Drop-Down] Select the external bank branch number from the drop-down list.
External Acct No.	[Mandatory, Numeric, 14] Type the external account number. The TD redemption proceeds will be credited to this account.

Field name	Description
Txn Narrative	[Mandatory, Alphanumeric, 120] Type the narrative value based on the chosen redeem mode.
Redemption Amount	[Display] This field displays the redemption amount that is to be redeemed to the customer, in the chosen redeem mode. This amount is displayed in the account currency.

XferToLN

If the customer selects Transfer to Loans account as the redemption mode, the redemption proceeds will be directly transferred to the specified loans account, on the date of redemption.

The screenshot shows a 'Mixed Redemption' window with the following fields and values:

- Account Number: 51000000174440
- Principal Balance: LTL 4,500.00
- Redemption Amount: LTL 4,500.00
- Customer Name: JOHNKENNEDY
- Txn Ref No: 512007113000730020
- User Ref No: 512007113000730020
- Loan A/C: 70000001238440
- Customer Name: SATHISH KUMAR
- Txn Narrative: TD. Redemption By Xfer. To LN.
- Redemption Amount: LTL 450.00

Buttons: Save, Cancel, Ok, Close, Clear.

Field Description

Field name	Description
Loan A/C	[Mandatory, Numeric, 14, Pick List] Select the loan account number from the pick list. The TD redemption proceeds will be credited to this account.

Field name	Description
Customer Name	[Display] This field displays the name of the loan account holder.
Txn Narrative	[Mandatory, Alphanumeric, 40] Type the narrative value based on the chosen redeem mode.
Redemption Amount	[Display] This field displays the redemption amount that is to be redeemed to the customer in the chosen redeem mode. This amount is displayed in the account currency.

TXferToGL

If the customer selects Transfer to GL account as the redemption mode, the redemption proceeds will be directly transferred to the specified GL account, on the date of redemption.

The screenshot shows a 'Mixed Redemption' window with the following fields and values:

- Account Number: 51000000174440
- Customer Name: JOHNKENNEDY
- Principal Balance: LTL 4,500.00
- Txn Ref No: 512007113000730020
- Redemption Amount: LTL 4,500.00
- User Ref No: 512007113000730020
- GL Account Number: 330005105
- GL Description: ADDITIONAL SC1 GL
- Txn Narrative: Redemption By GL
- Redemption Amount: LTL 4,250.49

The 'TxferToGL' tab is selected in the 'Deposit Details' section. At the bottom, there are 'Save' and 'Cancel' buttons. A 'User Defined Fields' section is visible at the bottom left.

Field Description

Field name	Description
GL Account Number	[Mandatory, Pick List] Select the GL account number from the pick list. The TD redemption proceeds will be credited to this account.
GL Description	[Display] This field displays the description of the GL account number.
Txn Narrative	[Mandatory, Alphanumeric, 120] Type the narration.
Redemption Amount	[Display] This field displays the redemption amount that is to be redeemed to the customer, in the chosen redeem mode. This amount is displayed in the account currency.

Demand Draft

If the customer selects Demand Draft as the redemption mode, the customer can choose the bank on which, the DD is to be drawn. It is an online transaction and has to be handled accordingly. Service charges applicable for issuing a DD are deducted from the redemption amount.

The screenshot shows the 'Mixed Redemption' form with the following data:

- Account Number: 5100000174440
- Customer Name: JOHNKENNEDY
- Principal Balance: LTL 4,500.00
- Txn Ref No: 512007113000730020
- Redemption Amount: LTL 4,500.00
- User Ref No: 512007113000730020
- Transfer Mode: Demand Draft
- Issuer Code: AMERICAN EXPRESS
- Payable Branch: 0
- Issue Date: 30/11/2007
- Routing No: 1001001
- Bank: Canara
- Branch: CANARA 1
- Sector: Java
- Serial No: 1586734212
- BC No: PP789645
- Passport / IC No: PP789645
- Beneficiary Name: John Cussack
- Beneficiary Address: 34 Block, New Pandrivic, New York
- Txn Narrative: TD, Redemption By DD.

Field Description

Field name	Description
Issuer Code	<p>[Mandatory, Pick List]</p> <p>Select the issuer bank code on which the DD is to be drawn from the pick list.</p> <p>A list of banks on which DD can be issued is maintained in the Issuer Code Maintenance option and is downloaded to the branch. Normally banks issue DD of their own bank.</p>
Payable Branch	<p>[Mandatory, Pick List]</p> <p>Select the bank/branch at which the DD is payable from the pick list.</p>
Issue Date	<p>[Display]</p> <p>This field displays the date on which the DD is issued.</p>
Routing No	<p>[Conditional, Numeric, Nine]</p> <p>Type the routing number of the bank/branch, on which the DD is drawn.</p> <p>The routing number is the combination of the bank code and the branch code. This is an editable field.</p> <p>The combination can be obtained from the Routing Branch Maintenance option.</p> <p>Routing Number = Sector Code / Bank Code + Branch Code</p> <p>In case of a DD, the routing number should be of the same bank, i.e. the default routing number displayed, as the instrument comes for inward clearing.</p> <p>You must enter data in Routing No and Micr No field or keep both as blank.</p>
Bank	<p>[Display]</p> <p>This field displays the bank name corresponding to the bank code extracted from the routing number.</p>
Serial No	<p>[Display]</p> <p>This field displays the serial number. For a remittance instrument such as a BC or DD, the system generates a serial number that includes the branch code. The serial number for each instrument type is maintained separately. On reversal of an instrument issue the instrument serial number is not reused for the next instrument issue.</p> <p>When an instrument comes into clearing, it may be referred to with an MICR number, which needs to be maintained for each instrument, if it is expected through an inward clearing batch. If the teller liquidates an instrument, the instrument serial number enables the system to track the instrument uniquely.</p>
Branch	<p>[Optional, Alphanumeric, Five]</p> <p>Type the branch name corresponding to the branch code and bank code extracted from the routing number.</p>

Field name	Description
BC No	[Conditional, Numeric, 12] Type the banker's cheque number. This number is printed on the instrument, if the instrument is expected to come in for inward clearing. A cross reference is maintained with the system-generated serial number, to enable the system to track the instrument.
Sector	[Optional, Alphanumeric, Five] Type the sector name corresponding to the sector code extracted from the routing number.
Passport / IC No	[Mandatory, Alphanumeric, 16] Type the passport/IC number for the identification of the beneficiary.
Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the name of the beneficiary.
Beneficiary Address	[Optional, Alphanumeric, 35] Type the address details of the beneficiary.
Txn Narrative	[Mandatory, Alphanumeric, 120] Type the narration.

XferToProd

If the customer selects Reinvest to New Account as the redemption mode, the system enables you to reinvest the premature deposit redemption amount to a new TD Account. The new account could be opened under any other FLEXCUBE Retail TD product defined, including the existing TD account product.

Variance, term, compounding frequency and payout frequency for such a new deposit needs to be defined here. The system will initiate a new TD Account under a new TD Product, as per the specifications mentioned here on every payout frequency.

Field Description

Field name	Description
Product	[Mandatory, Pick List] Select the new TD product in which the premature redemption amount of the deposit is to be reinvested from the pick list.
Payout Frequency	[Display] This field displays the payout frequency as per the product setup.
Compounding Frequency	[Display] This field displays the compounding frequency as per the product setup.
Base for rate	[Display] This field displays the base for rate as per the product setup.
Txn Narrative	[Mandatory, Alphanumeric, 120] Type the narrative value based on the chosen redeem mode.
Maturity Date Factor	[Mandatory, Radio Button] Click the option button to select the term or maturity date factor. If Maturity Date option is selected FLEXCUBE disables the Term field.

Field name	Description
Term	
Term	<p>[Conditional, Numeric, Two]</p> <p>Type the term for which the TD is being renewed.</p> <p>The term should be within the maximum and minimum limits specified at the product level.</p> <p>This field is enabled if Term is selected in the Maturity Date Factor field.</p>
Int. Start Date	<p>[Display]</p> <p>This field displays the interest start date.</p> <p>The interest start date is the date on which the bank starts accruing interest for the TD.</p>
Maturity Date	<p>[Display]</p> <p>This field displays the date on which the new deposit will mature.</p> <p>The interest start date determines the maturity date of the deposit.</p> <p>This field is enabled if Maturity Date is selected in the Maturity Date Factor field.</p>
Rate	
Interest Rate	<p>[Display]</p> <p>This field displays the rate of interest for the new TD account. The interest should be within the product limits.</p>
Product Variance	<p>[Display]</p> <p>This field displays the interest variance, defined under the Product Rate Maintenance for the slab under which the TD principal balance and term fall.</p>
Deposit Variance	<p>[Mandatory, Numeric, Three, Six]</p> <p>Type the interest variance for the new term deposit initiated under the new TD account. The variance specified should be within the minimum and maximum variance specified at the product level.</p>
Net Rate	<p>[Display]</p> <p>This field displays the net rate at which interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate specified should be within the minimum and maximum variance specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the interest variance applicable on the scheme.</p>

Field name	Description
Scheme Rate	[Display] This field displays the interest rate applicable on the scheme.
Annual Equivalent Rate	[Display] This field displays the annual equivalent rate. AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer.
Next Int. Pay Date	[Display] This field displays the next interest due date. Depending on the Interest Payout Frequency interval specified, the system will calculate the next interest due date. Consider the following example: Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Payout Date = 31/03/2004
Next Int. Comp. Date	[Display] This field displays the next interest compounding date. Depending on the Interest Compounding Frequency duration specified, the system would calculate the next interest compounding date. Consider the following example: Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date 31/12/2003 Next Interest Compounding Date = 31/01/2004
Maturity	
Maturity Amount	[Display] This field displays the total amount to be received on the maturity of the deposit. This amount is inclusive of the TSD, if any.

15. Click the **Save** button. The system displays the **Redem Details** tab.
16. Click the **Ok** button.
17. The system displays the message "Record added". Click the **Ok** button.
18. The system displays the **Documents Receipt** screen.
19. Select the receipt you want to print and click the **Ok** button.
OR
Click the **Cancel** button.

Example: Negative Special Penalty Variance

Deposit level variance of 1% given at the time of deposit opening

Interest Rate Matrix

Period/ Amount	10000- 50000	50001- 100000	100001- 500000	500000 & above
1 month	5	6	7	8
2 month	6	7	8	9
3 month	7	8	9	10
6 month	8	9	10	11

- At product level, the penalty rate to be used is specified as the Product rate
- Product level penalty variance is -1%
- Customer comes and opens a TD for the period of 6 months, amount is 60000/-
- Deposit level variance given is 1%
- Interest rate applicable to the TD deposit is 9% + 1% = 10%
- Customer visits the branch after 1 month for making a part redemption of 25000/-
- Bank wants to apply a negative special penalty variance of 1.5%

Based on the part redemption amount and the period for which the deposit was kept with the bank, Oracle FLEXCUBE will determine the applicable interest rate for the part amount.

Calculation of the net interest rate will be as follows:

Rate derived as per the Product rates	Product level Penalty Variance	Deposit level Variance	Special Penalty Variance	Net Interest Rate
5%	-1%	+1%	-1.5%	3.5%

6.2. 1310 - Quick Redemption By Cash

Oracle FLEXCUBE provides the customer with the facility to redeem the deposit on instruction before its maturity date. This is termed as premature redemption.

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. FLEXCUBE will allow a TD opened today to be redeemed on the day of account opening. Both part and full redemption will be supported on the day of TD creation. Multiple part redemptions will not be allowed on a single day.

Using this option you can redeem a term deposit and encash the proceeds directly. The teller can alternately use Mixed Redemption (Fast Path: 1358) option which offers other modes of transferring the proceeds.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account by cash

1. Type the fast path **1310** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By Cash**.
2. The system displays the TD Redemption Inquiry screen.

TD Redemption Inquiry

Field Description

Field Name	Description
Account Number	<p>[Mandatory, Numeric, 14] Type the TD account number. The name of the account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display] This field displays the currency assigned to the product at the product level under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.</p>

Field Name	Description
Redemption Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the redemption mode from the drop-down list.</p> <p>The options in the list are:</p> <ul style="list-style-type: none"> • Full Redemption - The entire deposit amount is redeemed. • Part Redemption - You can specify a part of the entire deposit amount to be redeemed.
Original Deposit No.	<p>[Display]</p> <p>This field displays the original deposit number.</p> <p>The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.</p>
Deposit No	<p>[Mandatory, Pick List]</p> <p>Select the term deposit number from the pick list that is to be redeemed.</p>
Renewal No	<p>[Display]</p> <p>This field displays the renewal number of the TD.</p>
Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected as Redemption Mode.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the total lien amount placed on the deposit.</p>

Field Name	Description
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to add any special variance.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured Principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Income	<p>[Display]</p> <p>This field displays the penalty income.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameter Level (TDM04) option.</p>
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>

Field Name	Description
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected interest.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '09, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '09, the system calculates the interest payable for this deposit from 1st January '09 to 31st May '09. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed.</p> <p>The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds. The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>

Field Name	Description
- Tax Deducted 2	[Display] This field displays the tax 2 for the amount to be redeemed. The tax is calculated based on the tax code 2 attached to the account at the time of account opening.
Net Proceeds	[Display] This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.

3. Enter the account number and select the redemption mode from the drop-down list.
4. Select the deposit number from the pick list. In case TD is linked as sweepin provider, the system displays the message " TD is linked as sweepin provider. Do you want to continue?". Click the **Ok** button to continue.
Or
In case of premature redemption, the system displays the message " Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
5. For partial redemption, enter the redemption amount.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.
7. Click the **Ok** button.
8. The system displays the message "Do You want to continue?".

Quick Redemption By Cash

Field Description

Field Name	Description
Account Number	[Display] This field displays the TD account number. The name of the account holder is displayed in the adjacent field.
Account Ccy	[Display] This field displays the account currency for the transaction.
Txn Ccy	[Mandatory, Drop-Down] Select the transaction currency of the account from the drop-down list.
Acy Rate	[Display] This field displays the account currency rate.
Txn Rate	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank.

Field Name	Description
Deposit No	[Display] This field displays the deposit number selected in the TD Redemption Inquiry screen.
Redemption Amount	[Display] This field displays the redemption amount.
Redemption Proceeds	[Display] This field displays the redemption proceeds which are the sum of redemption amount and interest.
Waive Penalty	[Display] This field displays whether any penalty is waived during redemption or not.
Txn Amount	[Display] This field displays the transaction amount. The transaction amount depends on the Transaction Currency selected. When transaction currency is selected, the transaction amount is derived using the appropriate currency conversion rate.
Penalty Variance	[Display] This field displays whether any special penalty variance is added or not.
User Ref No	[Optional, Alphanumeric, 40] Type the user reference number.
Redemption Mode	[Display] This field displays the mode of redemption. The mode of redemption can be full or partial.
Txn Narrative	[Mandatory, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction. You can change the narration if required.

10. Click the **UDF** button. The system displays the **UDF Details** screen.
11. Click the **Validate** button. The system displays the message "Validation procedure completed".
12. Click the **Ok** button.
13. The system displays the message "Authorization Required. Do you want to continue?". Click the **Ok** button.
14. Click the **Ok** button. The system displays the **Quick Redemption By Cash** screen.
15. The system displays the **Authorization Reason** screen.

16. Enter the relevant information and click the **Grant** button.
17. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
18. The system displays the **Document Receipt** screen.
19. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Ok** button.
20. Click the **Cancel** button.

Note 1: For more Information on **Document Receipt** refer to the **Common Screens** option available in the *Oracle FLEXCUBE Introduction User Manual*

Note 2: For more information on **Authorization Transaction** refer to the *Oracle FLEXCUBE Introduction User Manual*.

6.3. 1311 - TD Redemption Inquiry - By BC

Oracle FLEXCUBE provides the customer with the facility to redeem the deposit on instruction before its maturity date. This is termed as premature redemption. A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. The customer cannot redeem the deposit on the date of account opening.

Using this option you can directly redeem a term deposit and transfer the proceeds to a banker's cheque. You can alternately use the **Mixed Redemption** (Fast Path: 1358) option which provides various modes of redemption.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account by bankers cheque

1. Type the fast path **1311** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By BC**.
2. The system displays the TD Redemption Inquiry screen.

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' window with the following fields:

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level under which the account is opened.
Redemption Mode	[Mandatory, Drop-Down] Select the redemption mode from the drop-down list. The options are: <ul style="list-style-type: none"> • Full Redemption - The entire deposit amount is redeemed. • Part Redemption - You can specify a part of the entire deposit amount to be redeemed.
Original Deposit No.	[Display] This field displays the original deposit number. The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.
Deposit No	[Mandatory, Pick List] Select the term deposit number that is to be redeemed from the pick list.
Renewal No	[Display] This field displays the renewal number of the TD.
Current Receipt No	[Display] This field displays the current receipt number of the TD.
Uncollected Principal	[Display] This field displays the uncollected amount. This is the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer. Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer.
Uncollected Interest	[Display] This field displays the uncollected interest. The interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer.

Field Name	Description
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected from the Redemption Mode drop-down list.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the lien amount on the TD, if any.</p>
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Income	<p>[Display]</p> <p>This field displays the penalty income.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameters Maintenance (Fast Path: TDM04).</p>

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected interest.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>

Field Name	Description
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '04, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '04, the system calculates the interest payable for this deposit from 1st January '04 to 31st May '04. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed.</p> <p>The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed.</p> <p>The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>
Net Proceeds	<p>[Display]</p> <p>This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the redemption mode from the drop-down list.
5. Select the deposit number from the pick list.
 In case TD is linked as sweepin provider, the system displays the message " TD is linked as sweepin provider. Do you want to continue?". Click the **Ok** button to continue.
 Or
 In case of premature redemption, the system displays the message " Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.

7. Click the **Ok** button.
8. The system displays the message "Do you want to continue?".

TD Redemption Inquiry

The screenshot displays the 'TD Redemption Inquiry' web application interface. The main form contains the following fields and values:

- Account Number: 5030000002671
- Account Ccy: INR
- Redemption Mode: Full Redemption
- Original Deposit No: 1
- Renewal No: 1
- Uncollected Principal: 1,002.00
- Redemption Amount: 0.00
- Penalty Variance:
- Special Penalty Variance: 0.00
- Account Status: ACCOUNT UNCLAIMED
- Principal Balance: 0.00
- Interest Applicable: 0.00
- Penalty Income: 0.00
- + Uncollected Principal: 1,002.00
- + Uncollected Interest: 0.00
- + PMI On Uncollected Principal: 0.00
- + PMI On Uncollected Interest: 0.00
- + Penalty Interest On Principal: 0.00
- Additional Penalty Amount: 0.00
- Pro-rata Interest Deducted: 0.00
- Tax Deducted 1: 0.00
- Tax Deducted 2: 0.00
- Net Proceeds: 1,002.00
- Service Charge Deduction: 0.00

On the right side of the form, there are additional fields:

- Deposit No: 1
- Current Receipt No.: 2010120240000436
- Uncollected Interest: 0.00
- Lien Amount: 0.00

A confirmation dialog box titled 'Message from webpage' is overlaid on the form, containing the text: 'contd : Do you want to continue?'. The dialog has 'OK' and 'Cancel' buttons.

At the bottom of the application, there is a navigation bar with tabs for: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, and Travellers Cheque. Below the tabs are buttons for 'UDF', 'OK', 'Close', and 'Clear'.

9. Click the **OK** button. The system displays the **Quick Redemption By BC** screen.

Quick Redemption By BC

Field Description

Field Name	Description
Account No	[Display] This field displays the TD account number.
Deposit No	[Display] This field displays the deposit number.
Bank Code	[Mandatory, Drop-Down] Select the bank code from the drop-down list.
Acct Ccy	[Mandatory, Pick List] Select the account currency from the pick list.
Txn Ccy	[Display] This field displays the transaction currency.
Acct Ccy Rate	[Display] This field displays the rate for the account currency.

Field Name	Description
Txn Ccy Rate	[Display] This field displays the rate for the transaction currency.
Txn Amount	[Display] This field displays the amount based on the redeem amount entered.
Redemption Proceeds	[Display] This field displays the redeem amount in transaction currency.
Issue Date	[Display] This field displays the date on which the BC is issued.
Serial No	[Display] This field displays the serial number. For a remittance instrument such as a BC or DD, the system generates a serial number that includes the branch code. The serial number for each instrument type is maintained separately. On reversal of an instrument issue the instrument serial number is not reused for the next instrument issue. When an instrument comes into clearing, it may be referred to with an MICR number, which needs to be maintained for each instrument, if it is expected through an inward clearing batch. If the teller liquidates an instrument, the instrument serial number enables the system to track the instrument uniquely.
BC No	[Optional, Numeric, 12] Type the BC number. This number is printed on the instrument, if the instrument is expected to come in for inward clearing. A cross reference is maintained with the system-generated serial number, to enable the system to track the instrument.
Routing No	[Display] This field displays the routing number.
Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the name of the beneficiary.
Passport / IC No	[Optional, Alphanumeric, 30] Type the passport/IC number for the identification of the beneficiary.
Redemption Amount	[Display] This field displays the redemption amount.

Field Name	Description
Beneficiary Addr	[Optional, Alphanumeric, 35, Three Lines] Type the address details of the beneficiary. The first line is mandatory.
Waive Penalty	[Display] This field displays whether any penalty is waived during redemption or not.
Penalty Variance	[Display] This field displays whether any special penalty variance is added or not.
Redemption Mode	[Display] This field displays the mode of redemption. The mode of redemption can be full or partial.
User Reference No	[Optional, Alphanumeric, 40] Type the user reference number.
Narrative	[Mandatory, Alphanumeric, 40] Type the transaction narration. By default, the system displays Quick Redemption by BC .

10. Click the **Ok** button.
11. The system displays the message "Authorization Required. Do you want to continue?". Click the **Ok** button.
12. The system displays the **Authorization Reason** screen.
13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
15. The system displays the **Document Receipt** screen.
16. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Ok** button.
OR
Click the **Cancel** button.
17. The system displays the serial number.

Note 1: For more Information on Document Receipt, refer to the Common Screens option available in the **Oracle FLEXCUBE Introduction User Manual**.

Note 2: For more information on **Authorization** refer to the **Oracle FLEXCUBE Introduction User Manual**.

6.4. 1312 - Quick Redemption By CASA

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. FLEXCUBE will allow a TD opened today to be redeemed on the day of account opening. Both part and full redemption will be supported on the day of TD creation. Multiple part redemptions will not be allowed on a single day.

Using this option you can redeem a term deposit and credit the proceeds to a CASA Account. The teller can alternately use Mixed Redemption (Fast Path: 1358) option which offers other modes of transferring the proceeds.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account by CASA

1. Type the fast path **1312** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By CASA**.
2. The system displays the TD Redemption Inquiry screen.

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' window with the following fields:

At the bottom, there is a navigation bar with buttons for Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Account Number	<p>[Mandatory, Numeric, 14]</p> <p>Type the TD account number which is to be redeemed</p> <p>The name of the account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.</p>
Redemption Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the redemption mode from the drop-down list.</p> <p>The options in the list are:</p> <ul style="list-style-type: none"> • Full Redemption - The entire deposit amount is redeemed. • Part Redemption - You can specify a part of the entire deposit amount to be redeemed.
Original Deposit No.	<p>[Display]</p> <p>This field displays the original deposit number.</p> <p>The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.</p>
Deposit No	<p>[Mandatory, Pick List]</p> <p>Select the term deposit number from the pick list that is to be redeemed.</p>
Renewal No	<p>[Display]</p> <p>This field displays the renewal number of the TD.</p>
Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>

Field Name	Description
Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer.</p> <p>These uncollected proceeds are displayed in this field.</p>
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected as Redemption Mode.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the total lien amount placed on the deposit.</p>
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: The penalty routine cannot be changed with an effective date. Basically the same penalty routine will be applicable to all deposits irrespective of the penalty routine applicable at time of booking the TD.</p> </div>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured Principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Income	<p>[Display]</p> <p>This field displays the penalty income.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameter Level (TDM04) option.</p>

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected Interest</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>

Field Name	Description
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '09, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '09, the system calculates the interest payable for this deposit from 1st January '09 to 31st May '09. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed. The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed. The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>
Net Proceeds	<p>[Display]</p> <p>This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.</p>

3. Enter the account number and select the redemption mode from the drop-down list.
4. Select the deposit number from the pick list.
Incase TD is linked as sweepin provider, the system displays the message " TD is linked as sweepin provider. Do you want to continue?". Click the **Ok** button to continue.
Or
Incase of premature redemption, the system displays the message " Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
5. For partial redemption, enter the redemption amount.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.
7. Click the **Ok** button.

8. The system displays the message "Do You want to continue?".

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' web application interface. The main form contains the following fields and values:

- Account Number: 5030000002671
- Account Ccy: INR
- Redemption Mode: Full Redemption
- Original Deposit No: 1
- Renewal No: 1
- Uncollected Principal: 1,002.00
- Redemption Amount: 0.00
- Penalty Variance:
- Special Penalty Variance: 0.00
- Account Status: ACCOUNT UNCLAIMED
- Principal Balance: 0.00
- Interest Applicable: 0.00
- Penalty Income: 0.00
- + Uncollected Principal: 1,002.00
- + Uncollected Interest: 0.00
- + PMI On Uncollected Principal: 0.00
- + PMI On Uncollected Interest: 0.00
- + Penalty Interest On Principal: 0.00
- Additional Penalty Amount: 0.00
- Pro-rate Interest Deducted: 0.00
- Tax Deducted 1: 0.00
- Tax Deducted 2: 0.00
- Net Proceeds: 1,002.00
- Deposit No: 1
- Current Receipt No.: 2010120240000436
- Uncollected Interest: 0.00
- Lien Amount: 0.00

A modal dialog box titled 'Message from web page' is displayed in the center, containing the text: 'contd : Do you want to continue?'. It has 'OK' and 'Cancel' buttons.

At the bottom of the application, there is a navigation bar with buttons for 'Card', 'Change Pin', 'Cheque', 'Cost Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', and 'Travellers Cheque'. Below this bar are buttons for 'UDF', 'OK', 'Close', and 'Clear'.

9. Click the **OK** button. The system displays the **Quick Redemption By CASA** screen.

Quick Redemption By CASA

Field Description

Field Name	Description
Account Number	[Display] This field displays the TD account number.
TD Account Ccy	[Display] This field displays the TD account currency.
CASA Account Number	[Mandatory, Pick List] Select the CASA account number from the pick list, to which the redemption of TD is to be done. The name of the customer is displayed in the adjacent field.
Sav Acct Ccy	[Mandatory, Drop-Down] Select the transaction currency of the CASA account from the drop-down list.
TD Acy Rate	[Display] This field displays the TD account currency rate.

Field Name	Description
Sav Acct Rate	<p>[Display]</p> <p>This field displays the rate at which the transaction currency is converted to the local currency of the bank.</p> <p>The exchange rate values must be defined and downloaded. The teller's right to change the transaction currency rate value, is configurable at the bank level. If such rights are not assigned to the teller, this field becomes non-editable.</p> <p>If the transaction currency and the local currency are the same, the field takes a default value as 1, which cannot be modified</p>
Deposit No	<p>[Display]</p> <p>This field displays the deposit number selected in the TD Redemption Inquiry screen.</p>

Txn Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narration.</p> <p>This field displays the default narration, based on the transaction. You can change the narration if required.</p>

11. Click the **Ok** button.
12. The system displays the message "Authorization Required. Do you want to continue?"
Click the **Ok** button.
13. The system displays the **Authorization Reason** screen.
14. Enter the relevant information and click the **Grant** button.
15. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.

Note: For more information on **Authorization** refer to the *Oracle FLEXCUBE Introduction User Manual*.

6.5. 1318 - Quick Redemption By GL

Oracle FLEXCUBE provides the customer with the facility to redeem the deposit on instruction before its maturity date. This is termed as premature redemption.

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. FLEXCUBE will allow a TD opened today to be redeemed on the day of account opening. Both part and full redemption will be supported on the day of TD creation. Multiple part redemptions will not be allowed on a single day.

This option enables you to directly redeem a term deposit and transfer the proceeds to a general ledger account. The teller can alternately use the **Mixed Redemption** (Fast Path: 1358) option which offers other modes of transferring the proceeds.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account by GL

1. Type the fast path **1318** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By GL**.
2. The system displays the TD Redemption Inquiry screen.

TD Redemption Inquiry

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Redemption Mode	[Mandatory, Drop-Down] Select the redemption mode from the drop-down list. The options in the list are: <ul style="list-style-type: none"> • Full Redemption - The entire deposit amount is redeemed. • Part Redemption - You can specify a part of the entire deposit amount to be redeemed.

Field Name	Description
Original Deposit No.	<p>[Display]</p> <p>This field displays the original deposit number.</p> <p>The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.</p>
Deposit No	<p>[Mandatory, Pick List]</p> <p>Select the term deposit number from the pick list that is to be redeemed.</p>
Renewal No	<p>[Display]</p> <p>This field displays the renewal number of the TD.</p>
Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected as Redemption Mode.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the lien amount on the TD, if any.</p>
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>

Field Name	Description
Account Status	[Display] The field displays the account status.
Principal Balance	[Display] This field displays the matured principal amount left uncollected with the bank, and which has no specific payout instructions.
Interest Applicable	[Display] This field displays the interest applicable for the TD.
Penalty Income	[Display] This field displays the penalty income. It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable. The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameters Maintenance (Fast Path: TDM04).
+ Uncollected Principal	[Display] This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer. Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field. For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.
+ Uncollected Interest	[Display] This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.
+ PMI On Uncollected Principal	[Display] This field displays the post-maturity interest earned on the matured uncollected principal. Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.

Field Name	Description
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected interest.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '04, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '04, the system calculates the interest payable for this deposit from 1st January '04 to 31st May '04. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed.</p> <p>The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed.</p> <p>The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>

Field Name	Description
------------	-------------

Net Proceeds	[Display]
---------------------	-----------

This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.

- Enter the account number and select the redemption mode from the drop-down list.
- Select the deposit number from the pick list.
Incase TD is linked as sweepin provider, the system displays the message " TD is linked as sweepin provider. Do you want to continue?". Click the **Ok** button to continue.
Or
Incase of premature redemption, the system displays the message " Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
- Select the **Penalty Variance** check box if special penalty variance is to be added.
- Click the **Ok** button.
- The system displays the message "Do You want to continue?".

Note: For more information on **Authorization** refer to the *Oracle FLEXCUBE Introduction User Manual*.

6.6. 1332 - Quick Redemption By DD

Oracle FLEXCUBE provides the customer with the facility to redeem the deposit on instruction before its maturity date. This is termed as premature redemption. A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. The customer cannot redeem the deposit on the date of account opening.

Using this option you can directly redeem a term deposit and transfer the proceeds to a demand draft. You can alternately use the **Mixed Redemption** (Fast Path: 1358) option which provides various modes of redemption.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To perform quick redemption by DD

1. Type the fast path **1332** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By DD**.
2. The system displays the TD Redemption Inquiry screen.

Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameters Maintenance (Fast Path: TDM04).</p>

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected interest.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>

Field Name	Description
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '04, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '04, the system calculates the interest payable for this deposit from 1st January '04 to 31st May '04. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed.</p> <p>The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed.</p> <p>The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>
Net Proceeds	<p>[Display]</p> <p>This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the redemption mode from the drop-down list.
5. Select the deposit number from the pick list. In case of premature redemption, the system displays the message " Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.
7. Click the **Ok** button.
8. The system displays the message "Do you want to continue?".

9. Click the **OK** button. The system displays the **Quick Redemption By DD** screen.

Quick Redemption By DD

Field Description

Field Name	Description
Payable Branch	[Mandatory, Pick List] Select the branch at which the DD is payable from the pick list.
Bank Code	[Mandatory, Drop-Down] Select the bank code from the drop-down list.
Acct Ccy	[Mandatory, Pick List] Select the account currency from the pick list.
Txn Ccy	[Display] This field displays the transaction currency.
Acct Ccy Rate	[Display] This field displays the rate for the account currency.
Txn Ccy Rate	[Display] This field displays the rate for the transaction currency.

Field Name	Description
Redemption Proceeds	[Display] This field displays the redeem amount.
Txn Amount	[Display] This field displays the amount to be redeemed.
Issue Date	[Display] This field displays the date on which the DD is issued.
Serial No	[Display] This field displays the serial number. For a remittance instrument such as a BC or DD, the system generates a serial number that includes the branch code. The serial number for each instrument type is maintained separately. On reversal of an instrument issue the instrument serial number is not reused for the next instrument issue. When an instrument comes into clearing, it may be referred to with an MICR number, which needs to be maintained for each instrument, if it is expected through an inward clearing batch. If the teller liquidates an instrument, the instrument serial number enables the system to track the instrument uniquely.
Micr No	[Optional, Numeric, 12] This field displays the MICR number The MICR number is a number which is necessary for every remittance instrument. The MICR number will be printed on the instrument, if the instrument is expected to come in for inward clearing. A cross reference is maintained with the system-generated serial number, to enable the system to track the instrument.
Routing No	[Display] This field displays the routing number.
Beneficiary Name	[Mandatory, Alphanumeric, 40] Type the name of the beneficiary.
Passport / IC No	[Optional, Alphanumeric, 30] Type the passport/IC number for the identification of the beneficiary.
Redemption Amt	[Display] This field displays the redemption amount.
Beneficiary Address	[Optional, Alphanumeric, 35, Three Lines] Type the address details of the beneficiary. The first line is mandatory.

Field Name	Description
Waive Penalty	[Display] This field displays whether any penalty is waived during redemption or not.
Penalty Variance	[Display] This field displays whether any special penalty variance is added or not.
Redemption Mode	[Display] This field displays the mode of redemption. The mode of redemption can be full or partial.
User Reference No	[Optional, Alphanumeric, 40] Type the user reference number.
Narrative	[Mandatory, Alphanumeric, 40] Type the narration. By default, the system displays Quick Redemption By DD .

10. Click the **Ok** button.
11. The system displays the message "Authorization Required. Do you want to continue?". Click the **Ok** button.
12. The system displays the **Authorization Reason** screen.
13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction.
15. The system displays the **Document Receipt** screen.
16. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the **Ok** button.
OR
Click the **Cancel** button.
17. The system displays the serial number. Click the **Ok** button.

Note 1: For more Information on **Document Receipt**, refer to the **Common Screens** option available in the **Oracle FLEXCUBE Introduction User Manual**
Note 2: For more information on **Authorization** refer to the **Oracle FLEXCUBE Introduction User Manual**.

6.7. 1333 - Quick Redemption By Reinvesting Existing Account

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. The customer cannot redeem the deposit on the date of account opening.

Using this option you can redeem a term deposit and transfer the proceeds to an existing account. You can alternately use the **Mixed Redemption** (Fast Path: 1358) option which provides various modes of redemption.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account and transfer to an existing account

1. Type the fast path **1333** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By Reinvesting Existing Account**.
2. The system displays the TD Redemption Inquiry screen.

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' window with the following fields:

- Account Number: [Text Box]

At the bottom, there is a navigation bar with buttons: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, UDF, OK, Close, Clear.

1333 - Quick Redemption By Reinvesting Existing Account

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number.
Account Ccy	[Display] This field displays the currency assigned to the product under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Redemption Mode	[Mandatory, Drop-Down] Select the redemption mode from the drop-down list. The options in the list are: <ul style="list-style-type: none">• Full Redemption - The entire deposit amount is redeemed.• Part Redemption - You can specify a part of the entire deposit amount to be redeemed.
Original Deposit No.	[Display] This field displays the original deposit number. The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.
Deposit No	[Mandatory, Pick List] Select the term deposit number that is to be redeemed from the pick list.
Renewal No	[Display] This field displays the renewal number of the TD.
Current Receipt No	[Display] This field displays the current receipt number.
Uncollected Principal	[Display] This field displays the uncollected amount. This is the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer. Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer.

1333 - Quick Redemption By Reinvesting Existing Account

Field Name	Description
Uncollected Interest	<p>[Display]</p> <p>This field displays the uncollected interest.</p> <p>The interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer.</p>
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected from the Redemption Mode drop-down list.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the lien amount on the TD, if any.</p>
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameters Maintenance (Fast Path: TDM04).</p>

1333 - Quick Redemption By Reinvesting Existing Account

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. OR
Click the **Cancel** button.

Note 1: For more information on **Document Receipt**, refer to the **Common Screens** option available in the *Oracle FLEXCUBE Introduction User Manual*.

Note 2: For more information on **Authorization** refer to the *Oracle FLEXCUBE Introduction User Manual*.

6.8. 1336 - Quick Redemption By Reinvesting To New Account

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. The customer cannot redeem the deposit on the date of account opening.

Using this option you can redeem a term deposit and transfer the proceeds to a new account. You can alternately use the **Mixed Redemption** (Fast Path: 1358) option which provides various modes of redemption.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account and transfer to a new account

1. Type the fast path **1336** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Cash > Quick Redemption By Reinvesting To New Account**.
2. The system displays the **TD Redemption Inquiry** screen.

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' window with the following fields:

- Account Number: [Text Box]
- Account Ccy: [Dropdown]
- Redemption Mode: [Dropdown]
- Original Deposit No: [Text Box]
- Renewal No: [Text Box]
- Uncollected Principal: [Text Box]
- Redemption Amount: [Text Box]
- Penalty Variance:
- Special Penalty Variance: [Text Box] 0.00
- Account Status: [Text Box]
- Principal Balance: [Text Box]
- Interest Applicable: [Text Box] 0.00
- Penalty Income: [Text Box] 0.00
- + Uncollected Principal: [Text Box]
- + Uncollected Interest: [Text Box]
- + PMI On Uncollected Principal: [Text Box]
- + PMI On Uncollected Interest: [Text Box]
- + Penalty Interest On Principal: [Text Box]
- Additional Penalty Amount: [Text Box] 0.00
- Pro-rata Interest Deducted: [Text Box]
- Tax Deducted 1: [Text Box]
- Tax Deducted 2: [Text Box]
- Net Proceeds: [Text Box]
- Deposit No: [Text Box]
- Current Receipt No.: [Text Box]
- Uncollected Interest: [Text Box]
- Lien Amount: [Text Box] 0.00

At the bottom, there is a navigation bar with buttons: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, UDF, OK, Close, Clear.

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number.
Account Ccy	[Display] This field displays the currency assigned to the product level under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Redemption Mode	[Mandatory, Drop-Down] Select the redemption mode from the drop-down list. The options in the list are: <ul style="list-style-type: none"> • Full Redemption - The entire deposit amount is redeemed. • Part Redemption - You can specify a part of the entire deposit amount to be redeemed.
Original Deposit No.	[Display] This field displays the original deposit number. The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.
Deposit No	[Mandatory, Pick List] Select the term deposit number that is to be redeemed from the pick list.
Renewal No	[Display] This field displays the renewal number of the TD.
Uncollected Principal	[Display] This field displays the uncollected amount. This is the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer. Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer.

Field Name	Description
Uncollected Interest	<p>[Display]</p> <p>This field displays the uncollected interest.</p> <p>The interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer.</p>
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected from the Redemption Mode drop-down list.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the lien amount on the TD, if any.</p>
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Income	<p>[Display]</p> <p>This field displays the penalty income.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameters Maintenance (Fast Path: TDM04).</p>

1336 - Quick Redemption By Reinvesting To New Account

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected interest.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>

Field Name	Description
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '04, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '04, the system calculates the interest payable for this deposit from 1st January '04 to 31st May '04. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed.</p> <p>The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed.</p> <p>The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>
Net Proceeds	<p>[Display]</p> <p>This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.</p>

3. Enter the account number and press the <Tab> or <Enter> key.
4. Select the redemption mode from the drop-down list.
5. Select the deposit number from the pick list.
 In case TD is linked as sweepin provider, the system displays the message " TD is linked as sweepin provider. Do you want to continue?". Click the **Ok** button to continue.
 Or
 In case of premature redemption, the system displays the message " Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.

1336 - Quick Redemption By Reinvesting To New Account

- Click the **Ok** button.
- The system displays the message "Do you want to continue?".

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' form with the following fields and values:

Account Number:	5030000002671	AUTOUSER.1005
Account Ccy:	INR	
Redemption Mode:	Full Redemption	
Original Deposit No:	1	Deposit No: 1
Renewal No:	1	Current Receipt No.: 2010120240000436
Uncollected Principal:	1,002.00	Uncollected Interest: 0.00
Redemption Amount:	0.00	Lien Amount: 0.00
Penalty Variance:	<input checked="" type="checkbox"/>	
Special Penalty Variance:	0.00	
Account Status:	ACCOUNT UNCLAIMED	
Principal Balance:	0.00	
Interest Applicable:	0.00	
Penalty Income:	0.00	
+ Uncollected Principal:	1,002.00	
+ Uncollected Interest:	0.00	
+ PMI On Uncollected Principal:	0.00	
+ PMI On Uncollected Interest:	0.00	
+ Penalty Interest On Principal:	0.00	
- Additional Penalty Amount:	0.00	
- Pro-rate Interest Deducted:	0.00	
- Tax Deducted 1:	0.00	
- Tax Deducted 2:	0.00	
Net Proceeds:	1,002.00	

A dialog box titled 'Message from webpage' is displayed in the center, containing the text 'contd : Do you want to continue?' and 'OK' and 'Cancel' buttons.

At the bottom of the form, there are tabs for 'Card', 'Change Pin', 'Cheque', 'Cost Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', and 'Travellers Cheque'. Below the tabs are buttons for 'UDF', 'OK', 'Close', and 'Clear'.

- Click the **OK** button. The system displays the **Quick Redemption By Reinvest To New Account** screen.

Quick Redemption By Reinvest To New Account

The screenshot shows a web-based form titled "Quick Redemption By Reinvest To New Account". The form is organized into several sections:

- Account Information:** Account Number (5030000002671), Account Ccy (INR), Acy Rate (1.00000), Deposit No (1), Redemption Proceeds (1,002.00).
- Product and Destination:** To Product (312 BANK RISK PARTICIPAT), To Account Ccy (INR), To Account Number, Payin Amount (1,002.00), Compounding Frequency (At Maturity), Base for rate (Incremental Amount), Maturity Date Factor (Term selected).
- Redemption Details:** Redemption Amount (0.00), Waive Penalty (checked), Penalty Variance (0.00), Redemption Mode (Full Redemption), To Account Ccy Rate (1.00000), To Deposit No.
- Interest and Rates:** Interest Rate (0.00000), Product Variance (0.00000), Deposit Variance (0.00000), Net Rate (0.00000), Scheme Variance (0.00000), Scheme Rate (0.00000), Annual Equivalent Rate (0.00000), Int Payout Frequency (At Maturity), Next Int. Comp. Date.
- Term Section:** Value Date (01/09/2012), Term (0 Months, 0 Days), Int. Start Date (01/09/2012), Maturity Date.
- Other Fields:** Next Int. Pay Date, Maturity Amount (0.00), User Ref No (3332), Txn. Narrative (Redemption To New Acc).

At the bottom, there is a navigation bar with buttons for "UDF", "OK", "Close", and "Clear".

Field Description

Field Name	Description
Account Number	[Display] This field displays the TD account number.
Account Ccy	[Display] This field displays the account currency.
Acy Rate	[Display] This field displays the rate of account currency.
Redemption Amount	[Display] This field displays the redemption amount.
Deposit No	[Display] This field displays the deposit number.
Waive Penalty	[Display] This field displays whether any penalty is waived during redemption or not.

1336 - Quick Redemption By Reinvesting To New Account

Field Name	Description
Redemption Proceeds	[Display] This field displays the redemption proceeds.
Penalty Variance	[Display] This field displays whether any special penalty variance is added or not.
To Product	[Mandatory, Numeric, Three, Pick List] Select the product code in which the premature redemption amount of the deposit is to be reinvested from the pick list.
Redemption Mode	[Display] This field displays the mode of redemption. The mode of redemption can be full or partial.
To Account Ccy	[Display] This field displays the account currency for the account number selected in the corresponding field..
To Account Ccy Rate	[Display] This field displays the account currency rate for the account number selected in the corresponding field.
To Account Number	[Display] This field displays the account number.
To Deposit No	[Display] This field displays the deposit number.
Payin Amount	[Display] This field displays the payin amount.
Compounding Frequency	[Display] This field displays the compounding frequency selected at the product level.
Int Payout Frequency	[Display] This field displays the interest payout frequency selected at the product level.
Base for Rate	[Display] This field displays the base for rate.
Maturity Date Factor	[Mandatory, Radio Button] Click the appropriate option to select the term or maturity date factor. If Maturity Date option is selected FLEXCUBE disables the Term field.

1336 - Quick Redemption By Reinvesting To New Account

Field Name	Description
Term	
Value Date	[Display] This field displays the value date for TD.
Term	[Conditional, Numeric, Two] Type the term for which the TD is being renewed. The term should be within the maximum and minimum limits specified at the product level. This field is enabled if Term is selected in Maturity Date Factor field.
Int. Start Date	[Display] This field displays the interest start date. It is same as the value date.
Maturity Date	[Conditional, Pick List, dd/mm/yyyy] Select the date on which the new deposit will mature from the pick list. This field is enabled if Maturity Date is selected in the Maturity Date Factor field.
Rate	
Interest Rate	[Display] This field displays the rate of interest for the new TD account. The interest should be within the product limits.
Product Variance	[Display] This field displays the interest variance, defined under the Product-Rate Maintenance for the slab under which TD principal balance and term falls.
Deposit Variance	[Mandatory, Numeric, Three, Six] Type the interest variance for the new term deposit initiated under the new TD account. The variance specified should be within the minimum and maximum variance specified at the product level. Based on the product definition made for the field Auto/ Force Renew With Deposit Variance in TD Product Master (Fast Path: TDM01) option, the deposit variance will be carried forward to the deposits created by auto / force renewal.

Field Name	Description
Net Rate	<p>[Display]</p> <p>This field displays the net rate at which interest is paid against the deposit.</p> <p><i>Net Rate = Interest Rate (At deposit level) + Deposit Variance + Product Variance</i></p> <p>The net rate specified should be within the minimum and maximum variance specified at the product level.</p>
Scheme Variance	<p>[Display]</p> <p>This field displays the interest variance applicable on the scheme.</p>
Scheme Rate	<p>[Display]</p> <p>This field displays the interest rate applicable on the scheme.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate.</p> <p>AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer.</p>
Next Int. Pay Date	<p>[Display]</p> <p>This field displays the next interest due date. Depending on the Interest Payout Frequency interval specified, the system calculates the next interest due date.</p> <p>Consider the following example: Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Payout Date = 31/03/2004</p>
Next Int. Comp. Date	<p>[Display]</p> <p>This field displays the next interest compounding date. Depending on the Interest Compounding Frequency duration specified, the system calculates the next interest compounding date.</p> <p>Consider the following example: Interest Payout Frequency = Quarterly Interest Compounding Frequency = Monthly Deposit initiated date = 31/12/2003 Next Interest Compounding Date = 31/01/2004</p>
Maturity Amount	<p>[Display]</p> <p>This field displays the total amount to be received on the maturity of the deposit.</p> <p>This amount is inclusive of the TDS, if any.</p>

Field Name	Description
User Ref No	[Optional, Numeric, 40] Type the user reference number which is used to identify the transaction.
Txn. Narrative	[Mandatory, Alphanumeric, 40] Type the transaction narrative. By default, the system displays Redemption to New Account .
<ol style="list-style-type: none"> 10. Click the Ok button. 11. The system displays the message "Authorization Required. Do you want to continue?". Click the Ok button. 12. The system displays the Authorization Reason screen. 13. Enter the relevant information and click the Grant button. 14. The system displays the transaction sequence number. The transaction number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. 15. The system displays the Document Receipt screen. 16. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do you want to print the document". Click the Ok button. OR Click the Cancel button. 17. The system displays the serial number. 	

Note 1: For more information on **Document Receipt**, refer to the **Common Screens** option available in the *Oracle FLEXCUBE Introduction User Manual*.

Note 2: For more information on **Authorization** refer to the *Oracle FLEXCUBE Introduction User Manual*.

6.9. 1828 - TD Redemption Inquiry

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. The customer cannot redeem the deposit on the date of account opening.

Using this option you can redeem a term deposit and credit the proceeds to a CASA Account. The teller can alternately use Mixed Redemption (Fast Path: 1358) option which offers other modes of transferring the proceeds.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account by CASA

1. Type the fast path **1828** and click **Go** or navigate through the menus to **Transaction Processing > Walkin Transactions > Remittance > Quick Redemption By CASA**.
2. The system displays the **TD Redemption Inquiry** screen.

These uncollected proceeds are displayed in this field.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected Interest</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>

Field Name	Description
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '09, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '09, the system calculates the interest payable for this deposit from 1st January '09 to 31st May '09. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed. The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed. The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>
Net Proceeds	<p>[Display]</p> <p>This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.</p>

3. Enter the account number and select the redemption mode from the drop-down list.
4. Select the deposit number from the pick list. In case of premature redemption, the system displays the message "Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
5. For partial redemption, enter the redemption amount.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.

9. Click the **OK** button. The system displays the **Quick Redemption By CASA** screen.

Quick Redemption By CASA

Field Description

Field Name	Description
Account Number	[Display] This field displays the TD account number.
Account Ccy	[Display] This field displays the TD account currency.
CASA Account Number	[Mandatory, Pick List] Select the CASA account number from the pick list, to which the redemption of TD is to be done. The name of the customer is displayed in the adjacent field.
Txn Ccy	[Display] This field displays the transaction currency.
Acy Rate	[Display] This field displays the TD account currency rate.
Txn Rate	[Display] This field displays the CASA account currency rate.

Field Name	Description
Deposit No	[Display] This field displays the deposit number selected in the TD Redemption Inquiry screen.
Redemption Proceeds	[Display] This field displays the redemption amount.
Txn Amount	[Display] This field displays the transaction amount. The transaction amount depends on the Transaction Currency selected. When the transaction currency is selected, the transaction amount is derived using the appropriate currency conversion rate.
User Reference No	[Display] This field displays the user reference number.
Txn Narrative	[Mandatory, Alphanumeric, 40] Type the narration. This field displays the default narration, based on the transaction. The user can change the narration if required.

10. Click the **Ok** button.
11. The system displays the message "Authorization Required. Do you want to continue?". Click the **Ok** button.
12. The system displays the **Authorization Reason** screen.
13. Enter the relevant information and click the **Grant** button.
14. The system displays the transaction sequence number. The transaction number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.

Note: For more information on **Authorization** refer to the *Oracle FLEXCUBE Introduction User Manual*.

6.10. 2828 - TD Redemption Inquiry

A premature redemption can be done for a part or full deposit amount. A partial or premature redemption of any term deposit can be done, if it is permitted at the product level. The customer cannot redeem the deposit on the date of account opening.

Using this option you can redeem a term deposit and credit the proceeds to a CASA Account. The teller can alternately use Mixed Redemption (Fast Path: 1358) option which offers other modes of transferring the proceeds.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To redeem a TD account by CASA UBS

1. Type the fast path **2828** and click **Go** or navigate through the menus to **Transaction Processing > Walkin Transactions > Remittance > Quick Redemption By CASA UBS**.
2. The system displays the TD Redemption Inquiry screen.

TD Redemption Inquiry

The screenshot shows the 'TD Redemption Inquiry' window with the following fields:

- Account Number: [Text Box]

At the bottom, there is a navigation bar with buttons: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, UDF, OK, Close, Clear.

Field Description

Field Name	Description
Account Number	<p>[Mandatory, Numeric, 14]</p> <p>Type the TD account number which is to be redeemed</p> <p>The name of the account holder is displayed in the adjacent field.</p>
Account Ccy	<p>[Display]</p> <p>This field displays the currency assigned to the product under which the account is opened.</p> <p>All the entries posted in the account are in the account currency.</p> <p>For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.</p>
Redemption Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the redemption mode from the drop-down list.</p> <p>The options in the list are:</p> <ul style="list-style-type: none"> • Full Redemption - The entire deposit amount is redeemed. • Part Redemption - You can specify a part of the entire deposit amount to be redeemed.
Original Deposit No	<p>[Display]</p> <p>This field displays the original deposit number.</p> <p>The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have new deposit running number but will retain the original deposit number of the source deposit.</p>
Deposit No	<p>[Mandatory, Pick List]</p> <p>Select the term deposit number from the pick list that is to be redeemed.</p>
Renewal No	<p>[Display]</p> <p>This field displays the renewal number of the TD.</p>
Current Receipt No.	<p>[Display]</p> <p>This field displays the current receipt number.</p>
Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>

Field Name	Description
Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
Redemption Amount	<p>[Conditional, Numeric, 13, Two]</p> <p>Type the amount of the term deposit that is to be redeemed.</p> <p>This field is enabled if Part Redemption is selected as Redemption Mode.</p>
Lien Amount	<p>[Display]</p> <p>This field displays the total lien amount placed on the deposit.</p>
Penalty Variance	<p>[Optional, Check Box]</p> <p>Select the Penalty Variance check box to if any special variance is to be added.</p> <p>The Special Penalty Variance field is enabled, if this check box is selected.</p> <p>By default this field is selected.</p>
Special Penalty Variance	<p>[Conditional, Numeric, Three, Five]</p> <p>Type the special penalty variance.</p> <p>This field accepts negative variance.</p>
Account Status	<p>[Display]</p> <p>The field displays the account status.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the matured Principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
Interest Applicable	<p>[Display]</p> <p>This field displays the interest applicable for the TD.</p>
Penalty Amount	<p>[Display]</p> <p>This field displays the penalty amount.</p> <p>It is calculated based on the penalty factor defined at the TD bank parameter level. It is the percentage amount for the interest applicable.</p> <p>The modification of the penalty amount is dependent on the minimum and maximum variance limit set at the TD Bank Parameter Level (TDM04) option.</p>

Field Name	Description
+ Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. This is applicable for non-cumulative deposits. Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>
+ PMI On Uncollected Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI On Uncollected Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the uncollected Interest</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period). PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ Penalty Interest On Principal	<p>[Display]</p> <p>This field displays the penalty interest on the principal, if penalty is charged for early redemption.</p>
- Additional Penalty Amount	<p>[Display]</p> <p>This field displays the additional penalty amount.</p>

Field Name	Description
- Pro-rata Interest Deducted	<p>[Display]</p> <p>This field displays the interest, which is already paid or compounded against the deposit amount, which is being redeemed.</p> <p>While redeeming an amount, the system calculates the interest payable from the Interest Start Date to the date of redemption. The interest, which is already paid to the customer or compounded to the principal, i.e. the pro-rata interest, is deducted from the redemption amount.</p> <p>If no interest has been paid to the customer prior to the redemption date, the value of this field will be zero.</p> <p>For example, for a deposit of 10,000 made on 1st January '09, an interest of 100 is paid every month. If this deposit is to be prematurely redeemed on 31st May '09, the system calculates the interest payable for this deposit from 1st January '09 to 31st May '09. Therefore, the interest to be paid will be calculated at 500, out of which 400 is already paid to the customer. This interest, which is already paid to the customer, is deducted from the amount to be redeemed. 400 is the pro rata interest.</p>
- Tax Deducted 1	<p>[Display]</p> <p>This field displays the tax 1 for the amount to be redeemed. The tax proceeds are to be recovered from the customer. The bank will deduct this tax amount from the redemption proceeds.</p> <p>The tax is calculated based on the tax code 1 attached to the account at the time of account opening.</p>
- Tax Deducted 2	<p>[Display]</p> <p>This field displays the tax 2 for the amount to be redeemed. The tax is calculated based on the tax code 2 attached to the account at the time of account opening.</p>
Net Proceeds	<p>[Display]</p> <p>This field displays the net amount to be redeemed. This amount is calculated by adding and deducting the interest (due, uncollected or pro rata), principal (due, uncollected) and tax (if applicable) from the redeem amount. This is the amount, which will be paid to the customer.</p>

3. Enter the account number and select the redemption mode from the drop-down list.
4. Select the deposit number from the pick list. In case of premature redemption, the system displays the message "Premature Redemption of Term Deposit. Do you want to continue?". Click the **Ok** button to continue.
5. For partial redemption, enter the redemption amount.
6. Select the **Penalty Variance** check box if special penalty variance is to be added.

7. Renewal

7.1. 1316 - TD Renewal Inquiry

Using this option a deposit that has matured after a defined time period can be renewed. If maturity instruction of a term deposit is defined as Renew Principal and/or Interest, the term deposit is automatically renewed by the system on the date of maturity.

If no maturity instructions are specified for the term deposit, then the status changes to Matured Deposit. Such deposits can be renewed in this option.

If term deposit is renewed after maturity within grace days defined at product level, the term deposit renewal can be effective from the date of maturity of the term deposit. If such renewal is done after grace days, term deposit renewal is done from the current process date.

This is explained using an example below:

Date of Maturity of TD account	10 th October 2002
Grace days defined for the product	10 days

If customer comes for renewal of the TD before 20th October 2002, the TD renewal can be done from the date of maturity i.e. value date for the renewal can be 10th October 2002.

If customer comes for renewal of the TD after 20th October 2002, say on 25th October 2002, the TD renewal will be done from the current date i.e. 25th October 2002.

If a deposit matures on a holiday and if online renewal is done using this option, on the immediate working day but with the value date as the current process date and not the original maturity date (the holiday), interest will be provided to the customer. Holiday period interest will not be given to the customers if Online renewal of a deposit is done within the grace days defined and if renewal is done after grace days, the holiday period interest along with the PMI interest (if applicable) will be given.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To perform online renewal of TD

1. Type the fast path **1316** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > TD Post Maturity Renew**.
2. The system displays the **TD Renewal Inquiry** screen.

TD Renewal Inquiry

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number, which is to be renewed online.
Account Ccy	[Display] This field displays the currency assigned to the product, under which the account is opened. All the entries are posted in the account in the account currency. The exchange rate values must be defined and downloaded. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.
Deposit No	[Mandatory, Pick List] Select the term deposit number to be renewed from the pick list.

Field Name	Description
Value Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the value date from the pick list.</p> <p>The value date signifies the date from which the life of the TD starts i.e. the date from which the TD is effective. The interest calculations for a TD will start from this date. The system by default displays the current date as the value date.</p> <p>The value date is validated against the grace period defined at the product level.</p> <p>If the matured deposit is renewed during the grace period, the value date can be the maturity date or any other date within the grace period.</p> <p>If the matured deposit is renewed after the grace period, the value date will be the current date.</p>
Principal Due	<p>[Display]</p> <p>This field displays the matured principal amount left uncollected with the bank, and which has no specific payout instructions.</p>
+Interest Due	<p>[Display]</p> <p>This field displays the Interest amount left uncollected with the bank, and which has no specific payout instructions.</p>
+Uncollected Principal	<p>[Display]</p> <p>This field displays the matured deposit amount for which the redemption mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example, a deposit is matured and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as principal due.</p>
+ Uncollected Interest	<p>[Display]</p> <p>This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer.</p> <p>This is applicable for non-cumulative deposits.</p> <p>Interest amounts, which have payout instructions specified as cash, DD or BC, are to be personally collected by the customer. These uncollected proceeds are displayed in this field.</p>

Field Name	Description
+ PMI on Principal	<p>[Display]</p> <p>This field displays the post-maturity interest earned on the matured uncollected principal.</p> <p>Post Maturity Interest (PMI) is the interest earned on matured deposits, for the grace period or between the deposit maturity date and the renewal date (if the renewal is done within the grace period).</p> <p>PMI will be paid to the customer if the Maturity Option is defined as No instructions at the product level.</p>
+ PMI on Interest	<p>[Display]</p> <p>This field displays the post-maturity interest earned on uncollected interest.</p> <p>PMI will be paid to the customer if the Payout Option is defined as No instructions at the product level.</p>
-Tax Withheld	<p>[Display]</p> <p>This field displays the tax deducted for the matured deposit amount which is to be renewed.</p> <p>This tax is accrued but not remitted to the government.</p> <p>The tax is deducted on the basis of tax deduction frequency defined at the product level and the tax code attached to the account at the time of account opening.</p>
Renewal Amount	<p>[Display]</p> <p>This field displays the amount for which the deposit is being renewed</p> <p>This amount is calculated by adding and deducting the interest (due, PMI), principal (due) and tax (if applicable) from the deposit amount.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the deposit number and the value date from the pick list.
5. Click the **Ok** button.
6. The system displays the message "Do you want to continue?".

Deposit No	<p>[Display]</p> <p>This field displays the term deposit number to be renewed.</p>

Field Name	Description
Renewal Amount	[Display] This field displays the amount for which the deposit is being renewed.
Int Payout Frq	[Display] This field displays the time interval at which the interest will be paid out.
Compounding Frq	[Display] This field displays the time interval at which the interest earned on the term deposit principal is compounded to the principal.
Base Amount	[Display] This field displays the Base Amount for the deposit.
Maturity Date Factor	[Mandatory, Radio Button] Click the option button to select the term or maturity date factor.
Renewal Term	[Conditional, Numeric, Four, Four] Type the term for which the TD is being renewed. The term should be within the maximum and minimum limits and should be equivalent to the incremental term that is specified at the product level. The renewal term in months and days should be less than or equal to 1000. This field is enabled if Term option is selected in the Maturity Date Factor field.
Maturity Date	[Display] This field displays the maturity date for the new deposit. This field is enabled if Maturity Date option is selected in the Maturity Date Factor field.
Interest Rate	[Display] This field displays the interest rate applicable for the renewed TD. This rate should be within the interest ceiling defined at the product level.
Int Variance	[Mandatory, Numeric, Two, Five] Type the interest variance. The interest variance validated against the minimum and the maximum variance defined at the product level. It also validates if the interest rate + variance is within the minimum and maximum interest ceiling defined in the TD Product Master (Fast Path: TDM01) option.

Field Name	Description
Net Interest	<p>[Display]</p> <p>This field displays the net interest.</p> <p>The net interest is arrived at by adding the interest variance to the interest rate of the TD.</p> <p><i>New interest rate = Interest rate + Variance</i></p> <p>The system validates if the interest rate + variance is within the minimum and maximum interest ceiling defined in the TD Product Master (Fast Path: TDM01) option.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate.</p> <p>AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer. The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>
Narrative	<p>[Display]</p> <p>This field displays the narration for the transaction.</p>
Business Acquirer Id	<p>[Mandatory, Pick List]</p> <p>Select the business acquirer ID, to save the business acquirer details for the particular transaction, from the pick list.</p> <p>The system by default displays the ID of the teller who has logged in. The pick list displays the list of users linked to the system.</p>

At the bottom of the window, there is a navigation bar with buttons for: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, Travellers Cheque, and a set of control buttons: UDF, OK, Close.

Field Description

Field Name	Description
Account No	[Mandatory, Numeric, 14] Type the TD account number of the customer for which you want to check the balance details.
Account Ccy	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Deposit No	[Mandatory, Pick List] Select the term deposit number from the pick list, for which you want to check the balance.
Customer Name	[Display] This field displays the name of the customer who holds the TD account.
Account Status	[Display] This field displays the current status of the account. The options are: <ul style="list-style-type: none"> • Regular – This account is a regular account that is opened for various transactions. • Account Opened Today - This account is opened on the day of the transaction. • Closed – This account includes those deposits that have matured and redeemed. Thus this account is closed. • Account Closed Today - This account has been closed on the day of the transaction. • Unclaimed - This account has remained unclaimed by the customer. • Matured - This account has matured. • Account Blocked - This account is blocked. • Forced Renewal - This account is marked for lien and thus has been force renewed.

Field Name	Description
Units	<p>[Display]</p> <p>This field displays the principal balance as a multiple of incremental amount defined at the product level.</p> <p>This flexibility of the system enables the bank to accept amounts in multiples of the incremental unit.</p> <p>For example,</p> <p>Incremental Unit defined for the product = 0.01</p> <p>Principal = 4550.88</p> <p>Units = 455088 X 0.01</p>
Closeout Balance	<p>[Display]</p> <p>This field displays the deposit amount that will be given to the customer if the TD is closed on the current transaction date.</p>
Annual Equivalent Rate	<p>[Display]</p> <p>This field displays the annual equivalent rate.</p> <p>AER (Annual Equivalent Rate) is the annualized rate of return which the bank pays to the customer. The calculation of the AER depends on the number of compounding cycles and also the rate of the deposit. AER is calculated at the time of account opening. AER is re-calculated whenever there is a change in the interest rate for the deposits.</p>
Principal Balance	<p>[Display]</p> <p>This field displays the principal amount of the TD.</p> <p>For a Normal Discounted and True Discounted product, the principal balance will be the maturity amount.</p>
Projected Interest	<p>[Display]</p> <p>This field displays the projected interest.</p> <p>For a cumulative deposit, the projected interest is the interest that will be earned on the TD for the full term.</p> <p>For a non-cumulative deposit, the projected interest will be the interest accrued after the last interest payout and before the maturity date of the deposit.</p>
Interest Withheld (Blocked)	<p>[Display]</p> <p>This field displays the interest amount from the current interest payout cycle, which is withheld by the bank.</p> <p>If the TD account is blocked, the interest will be accrued but not paid to the customer. These interest proceeds are reflected in this field.</p>

Field Name	Description
Uncollected Balance	[Display] This field displays the interest for which the payout mode is specified, but the proceeds are not collected by the customer. Interest amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.
Interest Paid To Date (Net of Tax)	[Display] This field displays the interest paid to the customer till date.
Lien Amount	[Display] This field displays the lien amount, if there is a lien marked on the deposit.
Tax 1	[Display] This field displays the Tax 1 set by the bank that will be applicable to the account. The Tax 1 depends on the type of customer and the account.
Maturity Date	[Display] This field displays the maturity date for the new deposit.
Tax 2	[Display] This field displays the Tax 2 set by the bank that will be applicable to the account. The Tax 2 depends on the type of customer and the account. It can be calculated as tax on tax.
Deposit Date	[Display] This field displays the date on which the deposit was made.
Rate of Interest	[Display] This field displays the rate of interest applicable to the selected deposit.
Accrued Interest	[Display] This field displays the interest accrued from the last compounding date to the last accrual date.
Projected Tax1 on Accrued int	[Display] This field displays the tax 1 applicable on the accrued interest.
Projected Tax2 on Accrued int	[Display] This field displays the tax 2 applicable on the accrued interest.
Net Accrued Interest	[Display] This field displays the net accrued interest. Net accrued interest is calculated by deducting projected tax 1 and projected tax 2.

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the deposit number from the pick list and press the **<Tab>** or **<Enter>** key.
5. Click the **Ok** button.
6. The system displays the TD balance details.

At the bottom right, there are buttons for **Investment Schedule**, **Close**, and **Clear**.

Field Description

Field Name	Description
Product Code	[Mandatory, Pick List] Select the TD Product code for which you wish to calculate the earnings on investment, from the pick list.
Name	[Display] This field displays the name assigned to the TD product, as defined at the product level. This is the product under which the TD account is opened.
Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
Amount	
Minimum	[Display] This field displays the minimum amount defined at the product level, that a customer can invest for the TD Product
Maximum	[Display] This field displays the maximum amount defined at the product level that a customer can invest in the given TD Product.
Incremental	[Display] This field displays the incremental amount defined at the product level. The deposit amount can be increased in the multiples of the defined incremental value. For example, Minimum Amount = 5000 Maximum Amount = 15000 Incremental = 1000 The deposit can be initiated for minimum 5000 and it can be incremented only in slabs of 1000. So a deposit can be incremented to 6000 or 7000 but not 5500 or 6500.
Term	
Term Unit	[Display] This field displays the investment term unit as defined at the product level. The duration can be in months or days.

Field Name	Description
Minimum	<p>[Display]</p> <p>This field displays the minimum term defined at the product level, for which investment can be made for TD Product.</p>
Maximum	<p>[Display]</p> <p>This field displays the maximum term defined at the product level, for which the investment can be made for TD Product.</p>
Incremental	<p>[Display]</p> <p>This field displays the incremental term defined at the product level. The deposit term can be increased in the multiples of the defined incremental value.</p> <p>For example,</p> <p>Minimum Term: Months = 1 month</p> <p>Maximum Term: Months = 12 months</p> <p>Incremental Term: Months = 2 months</p> <p>The deposit can be initiated for minimum 1 month and it can be incremented only in slabs of 2 months. So a deposit term can be incremented to 3 or 5 months but not to 2 months.</p>
Interest	
Compounding Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the interest compounding frequency from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None/At Maturity • Monthly • Bi-Monthly • Quarterly • Half-Yearly • Yearly <p>This is the time interval at which the interest earned on the term deposit principal is compounded to the principal. The principle amount increases and hence the subsequent interest amount earned also increases.</p>

Field Name	Description
Payout Frequency	<p>[Mandatory, Drop-Down]</p> <p>Select the interest payout frequency as defined at the product level from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • None/At Maturity • Monthly • Bi-Monthly • Quarterly • Half-Yearly • Yearly <p>This is the time interval at which the interest earned against the invested amount will be paid out.</p>
Discounting Type	<p>[Display]</p> <p>This field displays the discounting type of the TD product.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Not Discounted - In normal deposit, the initial amount is deposited and interest is calculated on the deposit amount. • Normal Discounted – In normal discounted deposit, the maturity amount is defined along with the interest rate and the initial amount is deposited. Only principal amount is discounted. Maturity value is decided based on interest calculation. • True Discounted – In True discounted deposit, even the interest which will be received will be discounted further and reduced from the initial pay in amount of the normal discounted TD.

3. Select the product code from the pick list and press the **<Tab>** or **<Enter>** key.
4. Select the compounding frequency and payout frequency from the drop-down list.

8.3. TD023 - TD Rates History Inquiry

Using this option you can view the interest rates applied to a term deposit during its life cycle.

If the interest rate is defined as **Fixed** at the product level then it displays the same interest rate for all deposits made under the term deposit account.

If the interest rate is defined as Floating, you can view the different rates applied to each deposit placed under the term deposit account.

Definition Prerequisites

- After defining the TD Product, TD Product Rates must be defined for the newly defined TD Product.
- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To view TD rates history

1. Type the fast path **TD023** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TD Rates History Inquiry**.
2. The system displays the **TD Rates History Inquiry** screen.

TD Rates History Inquiry

Field Description

Field Name	Description
Account Details	
Account No	[Mandatory, Numeric, 14] Type the TD account number.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Customer Id	[Display] This field displays the customer ID. A customer ID is an identification number generated by the system after customer addition is completed successfully. The number will be unique to a customer across the system and the customer search can be made on this basis. This is the number, which the system uses to track the customer. The system displays the customer ID, when the customer is validated.
Product	[Display] This field displays the TD product code along with the product name under which the TD account is opened.
Currency	[Display] This field displays the TD account currency.
Branch	[Display] This field displays the home branch where the TD account is opened and maintained.
Deposit No	[Mandatory, Pick List] Select the deposit number from the pick list. The deposit number signifies the number of deposits opened in an account. The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.
From Date	[Mandatory, Pick List, dd/mm/yyyy] Select the start day from which you want to view the term deposit rates history, from the pick list.
To Date	[Mandatory, Pick List, dd/mm/yyyy] Select the end day up to which you want to view the term deposit rates history, from the pick list.

Column Name	Description
TD Rates Inquiry Details	
Account Number	[Display] This column displays the TD account number as specified in the TD Rates History Inquiry screen.
Original Deposit No	[Display] This column displays the term deposit number of the TD account.
Renewal No	[Display] This column displays the renewal number. Renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.
Deposit No	[Display] This column displays the deposit number. The deposit number signifies the number of deposits opened in an account. The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.
Principal Balance	[Display] This column displays the principal amount of the TD.
Balance for Rate Earned	[Display] This column displays the base principal amount, which determines the rate of interest applicable for the deposit. The balance amount gets calculated on the basis of how it is defined at the TD Payin transaction. If the Base for Rate is defined as Incremental then the principal balance and the balance amount remains same. If Base for Rate is defined as Cumulative for the Deposit or Cumulative for All the Deposits then the principal amount and balance amount varies. Thus, the rate earned on all the deposits may increase.
Value Date	[Display] This column displays the value date. The value date is the date from which the term deposit is effective.
Maturity Date	[Display] This column displays the date on which the deposit will mature.

Column Name	Description
Deposit Rate	<p>[Display]</p> <p>This column displays the rate of interest applicable for the term deposit.</p> <p>The deposit rate is based on the term and the amount range defined at the product level.</p>
Deposit Variance	<p>[Display]</p> <p>This column displays the interest variance defined for the particular term deposit under the TD account.</p> <p>The variance specified should be within the minimum and maximum variance specified at the product level.</p>
Deposit Interest Index	<p>[Display]</p> <p>This column displays the interest index code applicable to the TD.</p> <p>This is the index code defined for the product against the slab in which TD principal and term fit in.</p>
Product Variance	<p>[Display]</p> <p>This column displays the Interest Variance defined under Product Rate Maintenance for the slab in which TD principal balance and term fit in.</p>
Effective Date	<p>[Display]</p> <p>This column displays the date from which the net rate (i.e. deposit rate + deposit variance + product variance) defined at the product level is effective.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key
4. Select the deposit number, from date, and to date from the pick list.
5. Click the **OK** button. The system displays the TD rates history details.

Field Description

Field Name

Description

Customer Name

[Display]

This field displays the name of the customer who holds the TD Account.

Account Currency

[Display]

This field displays the currency assigned to the product at the product level, under which the account is opened.

All the entries posted in the account are in the account currency.

For example, if the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency, by default.

Field Name	Description
Account Status	<p>[Display]</p> <p>This field displays the current status of the account.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Regular – This account is a regular account that is opened for various transactions. • Account Opened Today - This account is opened on the day of the transaction. • Closed - This account is closed. • Account Closed Today - This account has been closed on the day of the transaction. • Unclaimed - This account has remained unclaimed by the customer. • Matured - This account has matured. • Account Blocked - This account is blocked. • Forced Renewal - This account is marked for lien and thus has been force renewed.
Branch Name	<p>[Display]</p> <p>This field displays the name of the home branch where the TD account is opened and maintained.</p>
Product Name	<p>[Display]</p> <p>This field displays the name assigned to the TD product, as defined at the product level.</p> <p>This is the product under which the TD account is opened.</p>

Column Name	Description
Original Deposit No	<p>[Display]</p> <p>This column displays the original deposit number.</p> <p>The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have the new deposit running number but will retain the original deposit number of the source deposit.</p>
Renewal No	<p>[Display]</p> <p>This column displays the renewal number.</p> <p>The renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts.</p> <p>This field along with the original deposit number can explain the chronology of a particular deposit.</p>

Column Name	Description
Deposit No	[Display] This column displays the deposit number for which the transaction is performed.
Value Date	[Display] This column displays the value date of the transaction. The value date signifies the date on which the transaction was committed. The value date and the transaction date are usually same. However a value date can be a previous date. The adjustment on the account takes place from the value date. For example: A TD matures on 10th July '04 and has a grace period of 15 days. The renewal transaction takes place on 16th July '04. 16th July is the transaction date. As the TD can be renewed from the maturity date, the value date for that transaction will be 10th July '04.
GL Code	[Display] This column displays the GL code against which accounting entry is posted for every transaction.
GL Name	[Display] This column displays the GL name of the corresponding GL code.
Txn Description	[Display] This column displays the transaction description.
Dr / Cr	[Display] This column displays whether the transaction was a debit or a credit type of transaction.
Acy Amount	[Display] This column displays the amount in the account currency, as defined in the product definition. The transactions on the account are always taken on the account currency.
Lcy Amount	[Display] This column displays the amount in the local currency. The local currency of the country where the bank is situated, is the local currency of the bank. If the account currency and the local currency are the same, the amounts displayed in the Acy Amount field and the Lcy Amount field will be the same. The exchange rate values must be defined and downloaded.

7. Double-click the appropriate column link, to view the details.
8. The system displays the **Details** tab.

Details

The details tab provides information on transaction details like who performed the transaction, the value date, payment mode, etc.

The screenshot shows the 'TD Audit Trail Inquiry' application window. At the top, there are search filters: Account No (5030000000981), All Deposits (checked), Original Deposit No (0), Deposit No (0), Cheque No, Action (All), From Date (15/12/2010), and To Date (20/02/2011). Below these are two tabs: 'Transactions' and 'Details'. The 'Details' tab is active, displaying a form with the following fields:

- Tran Date: 07/09/2011
- Value Date: 15/12/2010
- Posting Date: 15/12/2010
- Mnemonic Code: 1356
- Amount Acy: 1,00,000.00
- Amount Tcy: 1,00,000.00
- Amount Lcy: 1,00,000.00
- Tran Brn Code: 240
- Xfer Branch No:
- Xfer Account No:
- GL Branch: 240
- Description: Mixed Payin
- User Name: TGAGAN
- Batch No: 15
- System Trace No: 2602
- SC Code:
- Rate Acy to Lcy: 1.00000
- Rate Tcy to Lcy: 1.00000
- BC/DD Serial No.:
- Cheque No: 000000000000
- Debit/Credit: 0
- Bank Routing No.:
- Authoriser:
- Payment Mode: Transfer to GL

At the bottom of the window, there is a navigation bar with buttons for Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, and Travellers Cheque. Below this are buttons for UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Tran Date	[Display] This field displays the date on which the transaction has been executed.
User Name	[Display] This field displays the name of the teller/operator who entered the transaction. If the transaction is a system run process, this field displays the user name as system.
Value Date	[Display] This field displays the value date of the transaction.
Batch No	[Display] This field displays the batch under which the transaction has been processed during the EOD.

Field Name	Description
Posting Date	<p>[Display]</p> <p>This field displays the posting date of the transaction.</p> <p>The posting date is the date on which the transaction is posted to the accounts.</p> <p>Usually the transaction date and the posting date is the same, except where the transaction date is a bank holiday.</p> <p>For example: The monthly interest for a TD is paid on the last day of the month. In the month of July, if the date on which the payout has to take place, i.e. 31st July is a holiday, the bank will accrue the interest on the 29th and the payout will take place on the 1st of August.</p> <p>In this case the transaction date will be 1st August and the posting date will be 29th July.</p>
System Trace No	<p>[Display]</p> <p>This field displays the System Reference Audit Trail Number generated by the system for the transaction.</p>
Mnemonic Code	<p>[Display]</p> <p>This field displays the transaction mnemonic code through which this transaction has been entered.</p>
SC Code	<p>[Display]</p> <p>This field displays the service charge code, if service charges are levied to the transaction.</p> <p>The bank may levy service charges when the transaction is done through a banker's cheque or a demand draft.</p>
Amount Acy	<p>[Display]</p> <p>This field displays the amount in the account currency, as defined in the product definition. The transactions on the account are always taken on the account currency.</p> <p>The amount is calculated in the account currency, to facilitate the bank to make relevant entries in their respective accounts.</p>
Rate Acy to Lcy	<p>[Display]</p> <p>This field displays the rate at which the account currency is converted to the local currency of the bank.</p> <p>The exchange rate values must be defined and downloaded.</p>
Amount Tcy	<p>[Display]</p> <p>This field displays the amount in the transaction currency.</p> <p>The transaction currency is the currency in which the customer wants to transact. The exchange rate values are defined and downloaded from FCC.</p> <p>For example: If the customer wants redemption amount to be paid in EUR (Euro), EUR will be the transaction currency.</p>

Field Name	Description
Rate Tcy to Lcy	[Display] This field displays the rate at which the transaction currency is converted to the local currency of the bank. The exchange rate values must be defined and downloaded.
Amount Lcy	[Display] This field displays the amount in the local currency.
BC/DD Serial Number	[Display] This field displays the BC/DD serial number. This serial number will be applied to the Interest, Redemption, Maturity Payout.
Tran Brn Code	[Display] This field displays the branch code where the transaction was executed.
Cheque No	[Display] This field displays the cheque number, if the initial deposit, interest payout or the redemption amount is remitted by cheque.
Xfer Branch No	[Display] This field displays the branch code where the TD is being transferred, in case of a TD transfer.
Debit/Credit	[Display] This field displays whether the transaction is a debit or credit type of transaction, based on the type of transaction performed and the transaction mnemonic.
Xfer Account No	[Display] This field displays the account number where the TD is being transferred, in case of a TD transfer.
Bank Routing No	[Display] This field displays the routing number. The routing number is the combination of the bank code and the branch code.
GL Branch	[Display] This field displays the branch code to which the GL amount is transferred.
Authoriser	[Display] This field displays the identification of the person who authorised the transaction.

Field Name	Description
Description	[Display] This field displays the description of the transaction.
Payment Mode	[Display] This field displays the mode of payment for the transaction.

9. Click the **Close** button.

8.5. TD037 - TD Account Ledger Inquiry

Using this option, you can view the transactions done against a term deposit account, within the specified start date and end date. Customer can ask for the transaction details done on their account at any time during the life of the term deposit. You can use this option to provide the transaction details.

Definition Prerequisites

- After defining the TD Product, TD Product Rates must be defined for the newly defined TD Product.
- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To view the TD account ledger

1. Type the fast path **TD037** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TD Account Ledger Inquiry**.
2. The system displays the **TD Account Ledger Inquiry** screen.

8.8. TD042 - Interest and Principal Payment History

A customer would like to inquire about the interest and principal payout details during the term of the deposit.

Using this option you can view the details of the interest payout and principal redemption done for the deposits under a term deposit account. You can view the payout details for all the deposits under a term deposit account or for an individual deposit. You can also view the details for a selected payout mode.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To view interest and principal payment history

1. Type the fast path **TD042** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > Interest and Principal Payment History**.
2. The system displays the **Interest and Principal Payment History** screen.

Interest and Principal Payment History

The screenshot shows the 'Interest and Principal Payment History' application window. The window title is 'Interest and Principal Payment History*'. The interface includes several input fields for account and customer information, a table with columns for Sr No, Original Deposit No, Renewal No, Deposit No, Payment Type, Interest/Principal Amount, Outstanding Amount, Tax 1, and Tax 2. The table is currently empty. At the bottom, there are navigation buttons: LDF, Inquire, Close, and Clear.

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] Type the TD account number, for which you want to view the interest and principal payment history.
Customer Name	[Display] This field displays the name of the customer who holds the TD Account.
Branch	[Display] This field displays the name of the home branch in which the TD account is opened and maintained.
Product	[Display] This field displays the name assigned to the TD product, as defined at the product level. This is the product under which the TD account is opened.
Principal Balance	[Display] This field displays the TD account principal balance i.e. the sum total of the principal balance of all the term deposits held under the TD account.
Account Currency	[Display] This field displays the currency assigned to the product at the product level, under which the account is opened. All the entries posted in the account are in the account currency. For example: If the currency assigned to a TD product is USD (US Dollar), the account opened under that product has USD as its account currency.
From Date	[Mandatory, Pick List, dd/mm/yyyy] Select the start date of the inquiry from the pick list. This date should not be greater than the end date. This field is validated against the start date of the deposit.
To Date	[Mandatory, Pick List, dd/mm/yyyy] Select the end date of the inquiry from the pick list.
All Deposits	[Optional, Check Box] Select the All Deposits check box to view the interest and principal history for all the individual deposits under the TD account.

Field Name	Description
Deposit No.	<p>[Conditional, Pick List]</p> <p>Select the term deposit number to view the transactions done against that particular term deposit from the pick list.</p> <p>This field is disabled if the All Deposits check box is selected.</p>
Payout Mode	<p>[Optional, Drop-Down]</p> <p>Select the payout mode in which the interest and the principal are paid from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Cash • Bankers Cheque • Add To Principal on Maturity • Transfer to CASA • Transfer to External Account • Transfer to Loan • Demand Draft • Transfer to GL • Reinvest to Other Account • Reinvest to Other Product

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the appropriate from date and to date from the pick list, the deposit number and the payout mode from the drop-down list.

Field Description

Column Name

Description

Sr. No.

[Display]

This column displays the serial number.

The serial number is the row number generated for the deposit information.

Original Deposit No

[Display]

This column displays the original deposit number.

The original deposit number is the source, or the parent deposit number from which the new deposit is created due to interest payout, or due to renewal. It will have a new deposit running number, but will retain the original deposit number of the source deposit.

Column Name	Description
Renewal No	<p>[Display]</p> <p>This column displays the renewal number.</p> <p>The renewal number signifies the number of deposits created out of the source deposit either due to renewals or the payouts. This field along with the original deposit number can explain the chronology of a particular deposit.</p>
Deposit No	<p>[Display]</p> <p>This column displays the deposit number.</p> <p>The deposit number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
Payment Type	<p>[Display]</p> <p>This column displays the payment type.</p> <p>The payment is either for the interest earned on the deposit or the redeemed principal deposit.</p>
Interest/Principal Amount	<p>[Display]</p> <p>This column displays the available principal amount of the deposit.</p> <p>In case of redemption, this amount will be principal amount balance after the redemption.</p>
Outstanding Amount	<p>[Display]</p> <p>This column displays the deposit amount or the interest for which the payment mode is specified, but the proceeds are not collected by the customer.</p> <p>Amounts, which have payout instructions specified as cash, DD or BC, should be personally collected by the customer. These uncollected proceeds are displayed in this field.</p> <p>For example: A deposit is redeemed and the payout mode is defined as cash. The redemption procedures are complete but the cash is not collected by the customer. In this case, the amount is displayed as outstanding amount.</p>
Tax 1	<p>[Display]</p> <p>This column displays the amount of tax deducted on the interest earned on the deposit.</p>
Tax 2	<p>[Display]</p> <p>This column displays the amount of tax deducted on the interest earned on the deposit.</p>

Column Name	Description
Service Charge	<p>[Display]</p> <p>This column displays the amount of service charge applicable, if any.</p> <p>The bank may levy service charges when the transaction is done through a banker's cheque or a demand draft.</p>
Interest Rate	<p>[Display]</p> <p>This column displays the rate at which interest is calculated for the deposit.</p> <p>This rate should be within the interest ceiling defined at the product level.</p>
Status	<p>[Display]</p> <p>This column displays the status of the payout transaction.</p> <p>The various statuses are paid and unpaid.</p>
Interest Index Code	<p>[Display]</p> <p>This column displays the interest index code applicable to the TD. This is the index code defined for the product against the slab in which TD principal and term fit in.</p>

7. Double-click a record to enable the remaining two tabs.

TD Amount	<p>[Display]</p> <p>This column displays the TD amount i.e. the sum total of the principal balance of all the term deposits held under the TD account.</p>
Pay Amount	<p>[Display]</p> <p>This column displays the net payable amount displayed in the pay currency after applying the conversion rate of local currency of the bank.</p> <p>The payment amount is converted into the transaction currency for the payout of the amount.</p> <p>The exchange rate values must be defined and downloaded.</p>
Net Amount	<p>[Display]</p> <p>This column displays the net amount that will be paid to the customer.</p> <p>This amount is calculated by adding outstanding amount and deducting the various interest amounts from the payable amount.</p>

Pay Details

This tab displays the details of the account.

The screenshot shows the 'Interest and Principal Payment History' application window. The title bar reads 'Interest and Principal Payment History*'. The window contains a form with the following fields:

- Account Number : 000000030775
- Branch : HO
- Principal Balance : 15,237.00
- From Date : 31/01/2008
- All Deposits : Deposit No : []
- Customer Name : AMARSINGH
- Product : 599 Testing Product
- Account Currency : INR
- To Date : 10/04/2008
- Payout Mode : Cash

The 'Pay Details' tab is active, showing the following fields:

- From Date : 31/01/2008
- To Date : 15/02/2008
- Beneficiary Name : []
- Beneficiary A/C : 000000030775
- New Product : 599 Testing Product
- Product Variance : 1.00000
- Payable Branch : HO
- New Deposit Number : 2
- Deposit Interest Rate : 0.00000
- Deposit Variance : 0.00000
- Reinvest Date : 15/02/2008
- Reinvest Type : Auto
- Reinvest Term : 12 Months 0 Days
- Maturity Date : 15/02/2009
- Compounding Frequency : []
- Routing Number : 0
- Payout Frequency : Fortnightly
- Discounted Amount : 0.00000
- Base Amount for Rate : Incremental Amount
- Ref. Doc. No. : []
- Issuer Code : []

At the bottom of the window, there is a navigation bar with buttons for 'UDF', 'Inquire', 'Close', and 'Clear'.

Field Description

Field Name	Description
From Date	[Display] This field displays the date on which the deposit is initiated. This is the start date of the deposit.
To Date	[Display] This field displays the maturity date for the deposit.
Beneficiary Name	[Display] This field displays the beneficiary name.
Beneficiary A/C	[Display] This field displays the account number of the beneficiary. This is the account to which the payout proceeds will be transferred, in case the payout mode is Transfer to External account or Transfer to CASA or Transfer to Loan account.

Field Name	Description
New Product	[Display] This field displays the product code and the name, if the payout proceeds are reinvested into a new TD product
Product Variance	[Display] This field displays the product variance. The product variance is the interest variance defined at the TD Product Rate Maintenance (Fast Path: TD060) option for the slab in which the deposit principal balance and term fits in.
Payable Branch	[Display] This field displays the payable branch, if the payout mode is through DD.
New Deposit Number	[Display] This field displays the new deposit number, if the payout proceeds are reinvested into new or existing account.
Deposit Interest Rate	[Display] This field displays the deposit interest rate. This is the rate of interest for the new deposit, if payout proceeds are reinvested.
Deposit Variance	[Display] This field displays the deposit variance. If payout proceeds are reinvested, the interest variance for the new deposit initiated is displayed. The specified variance should be within the minimum and maximum variance limit specified at the product level.
Reinvest Date	[Display] This field displays the date on which the payout proceeds are reinvested into new or existing account.
Reinvest Type	[Display] This field displays the type of reinvestment. The payout proceeds are reinvested into new or existing account.
Reinvest Term	[Display] This field displays the duration of the deposit, if reinvested.
Maturity Date	[Display] This field displays the maturity date of the new deposit, if reinvested.

Field Name	Description
Compounding Frequency	<p>[Display]</p> <p>This field displays the time interval at which the interest earned on the term deposit will be compounded to the principal, if the payout proceeds are reinvested.</p>
Routing Number	<p>[Display]</p> <p>This field displays the routing number of the bank issuing the DD or BC.</p>
Payout Frequency	<p>[Display]</p> <p>This field displays the time interval at which the interest earned on the deposit will be paid out, if the payout proceeds are reinvested.</p>
Discounted Amount	<p>[Display]</p> <p>This field displays the discounted deposit amount.</p> <p>For discounted deposits, the customer allows the deposits to receive a pre-defined maturity amount.</p> <p>For example: A customer wants to earn a maturity amount of 10,000. The bank will consider the interest adjustments and calculate the initial payment amount, the customer needs to make. In this case, the maturity amount and the interest are fixed.</p>
Base Amount for rate	<p>[Display]</p> <p>This field displays the base amount for rate.</p> <p>The base amount for rate is incremental, cumulative for the deposit, or cumulative of all deposits, if the payout proceeds are reinvested.</p>
Ref. Doc. No.	<p>[Display]</p> <p>This field displays the instrument serial number, in case, the payout proceeds are in the form of a cheque, or DD, or BC.</p> <p>A serial number is a system generated number that includes the branch code. The instrument serial number enables the system to track the instrument uniquely.</p>
Issuer Code	<p>[Display]</p> <p>This field displays the issuer code of the DD or BC, if payout proceeds are in the form of a DD or BC.</p>

- Click the **Close** button.

8.9. TD050 - TD Interest Inquiry

Using this option you can view the complete history of interest calculated and the details of the rules applied on a term deposit account. You can view the interest details for all deposits or for a selected deposit.

As a part of relationship pricing, the bank may provide rule based variances for the term deposit interest.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To view the TD interest details

1. Type the fast path **TD050** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TD Interest Inquiry**.
2. The system displays the **TD Interest Inquiry** screen.

TD Interest Inquiry

The screenshot shows the 'TD Interest Inquiry' application window. At the top, there are input fields for 'Account No.', 'Start Date', 'End Date', and 'Deposit No.' (with a search icon). There are also checkboxes for 'All Deposits' and 'Deposit No.'. Below these are two tabs: 'Deposit Details' (selected) and 'Rule Details'. A table with the following columns is displayed: 'Deposit No.', 'From Date', 'To Date', 'Interest Base', 'Effective Rate', 'Interest Variance', 'Interest Amount', 'Interest Type', 'Rule Applied', and 'Number of Days'. The table is currently empty. At the bottom right of the window, there are three buttons: 'Inquire', 'Close', and 'Clear'.

Field Description

Field Name	Description
Account No	[Mandatory, Alphanumeric, 14] Type the TD account number.
All Deposits	[Optional, Check Box] Select the All Deposits check box to perform inquiry for all deposits.
Deposit No	[Conditional, Pick List] Select the deposit number of the TD from the pick list. This field is disabled if the All Deposits check box is selected.
Start Date	[Mandatory, Pick List, dd/mm/yyyy] This field displays the start date from which the interest details are to be viewed. The start date should be less than the process date.
End Date	[Mandatory, Pick List, dd/mm/yyyy] This field displays the date up to which interest details are to be viewed. The end date should be less than the process date.

3. Enter the TD account number and press the **<Tab>** or **<Enter>** key.
4. Select the all deposits check box or the deposit number from the pick list.
5. Select the start date and end date from the pick list.

Column Name	Description
Interest Variance	[Display] This column displays the interest variance defined at the account level.
Interest Amount	[Display] This column displays the interest amount applicable on the TD
Interest Type	[Display] This column displays the interest type applicable on the TD. The options are: <ul style="list-style-type: none"> • N - Normal • P - Penalty. The numeric attached to "P" signifies the historical sequence of the penalty charged .For e.g. P1/ P2 • R - Reversal • M - Maturity
Rule Applied	[Display] This column displays the rule applied to the TD account.
Number of Days	[Display] This column displays the interest base used for number of days to calculate the interest amount.

8. Double-click the **Rule Applied** link to enable the **Rule Details** tab.
9. The system displays the rules applied to the particular deposit number.

Rule Details

The rule details tab displays information about the condition number for the rule, value before rule evaluation, etc.

Field Description

Column Name	Description
Rule	[Display] This column displays the name of the rule applied to the TD account.
Condition No.	[Display] This column displays the valid condition number for the rule which was satisfied for this interest computation.
Reason text	[Display] This column displays the reason for the value returned by the rule.
Original Value	[Display] This column displays the value before the rule evaluation.

Column Name	Description
Rule Effective	[Display] This column displays the rule applicable on the TD.
Final Value	[Display] This column displays the net rate applicable on the TD.

10. Click the **Close** button.

8.10. TD689- Customer Deposit Inquiry

This option is used to show the deposit(s) which is to be redeemed if a particular amount is required by the customer at that point of time. The transaction currency also needs to be specified.

The deposits having the status as 'open today' and 'open regular' are considered for redemption(In **Global Site Maintenance** (FP: BA441), value should be set for macro REDEEM_OPTION).

The deposits redemption can be done by following methods:

- **First In First Out** - Deposit/account created first will be broken first
- **Last In First Out** - Deposit/account created last will be broken first
- **Highest Rate First Out** - Deposit/account with highest rate will be broken first thus, restricting the customer from retaining deposits/accounts with higher rates
- **Lowest Rate First Out** - Deposit/account with lowest rate will be broken first thus, giving more benefit to the customer

Only those deposits of those accounts will be considered where customer is the primary holder.

Net Redemption Amount	[Display] This field displays the amount that will be paid against this deposit after adding interest amount and deducting penalty, if any.

8. Click the **Close** button to close the screen.

8.11. TD070 - Discounted Time Deposit Inquiry*

Using this option you can calculate the initial payin amount, if the account is opened under a discounted product. The initial payin amount for a discounted product is calculated by deducting the interest to be earned from the specified maturity amount.

Customers can specify the amount they wish to earn at maturity, before depositing their money. Consequently the customer would like to know the initial payment to be done, so as to receive the desired maturity amount. This inquiry can be done after an account is opened and before initial payin.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

To inquire on discounted time deposit

1. Type the fast path **TD070** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > Discounted Time Deposit Inquiry**.
2. The system displays the **Discounted Time Deposit Inquiry** screen.

Discounted Time Deposit Inquiry

The screenshot shows the 'Discounted Time Deposit Inquiry' window. It contains the following fields and sections:

- Account Number :** [Text Field]
- Deposit No :** [Text Field]
- Product Code :** [Dropdown Menu]
- Account Details**
 - Principal Balance :** [Text Field] 0.00
 - Deposit Term : [in X]** [Text Field] Months [Text Field] Days
 - Customer Type :** [Text Field]
 - Tax Code :** [Text Field] [Text Field] 0.00000
 - Interest Variance :** [Text Field] 0.00000
- Payin Details**
 - Effective Interest Rate :** [Text Field] 0.00000
 - Discounted Interest :** [Text Field] 0.00
 - Tax Amount : [in Acct Coy]** [Text Field] 0.00 [Dropdown]
 - Tax Amount : [in Tax Coy]** [Text Field] 0.00 [Dropdown]
 - Payin Amount :** [Text Field] 0.00

At the bottom right, there are three buttons: **Inquire**, **Clear**, and **Close**.

Field Description

Field Name	Description
Account Number	<p>[Mandatory, Numeric, 16]</p> <p>Type the TD account number, for which the discounted time deposit inquiry has to be done.</p>
Deposit No	<p>[Mandatory, Pick List]</p> <p>Select the deposit number from the pick list.</p> <p>The Deposit Number signifies the number of deposits opened in an account.</p> <p>The deposit number is incremented every time a new deposit is created in an account. It may or may not be created due to interest payout or renewal.</p>
Product Code	<p>[Display]</p> <p>This field displays the product code.</p> <p>Product code is a unique number. Once assigned, it helps to identify the TD product in FLEXCUBE Retail.</p> <p>The length of the product code is configurable at the bank level.</p>
Account Details	
Principal Balance	<p>[Display]</p> <p>This field displays the principal balance of the TD account.</p> <p>For a discounted product, the principal balance is the maturity amount that the customer will receive at the time of maturity.</p>
Deposit Term: (in X)	<p>[Display]</p> <p>This field displays the deposit term of the TD account.</p> <p>This field displays the deposit term unit as defined at the product level. The duration can be in months or days.</p>
Customer Type	<p>[Display]</p> <p>This field displays the customer type of the TD account, as specified while opening an account.</p>
Tax Code	<p>[Display]</p> <p>This field displays the tax code applicable to the TD account.</p>
Interest Variance	<p>[Display]</p> <p>This field displays the interest variance of TD account.</p> <p>The variance should be within the minimum and maximum interest rate specified at the product level.</p>

Payin Details

Field Name	Description
Effective Interest Rate	<p>[Display]</p> <p>This field displays the rate at which interest is paid for the deposit.</p> <p><i>Net Effective Rate = Interest Rate (at deposit level) + Interest Variance + Product Variance</i></p> <p>The net rate should be within the minimum and maximum interest rate specified at the product level.</p>
Discounted Interest	<p>[Display]</p> <p>This field displays the discounted interest.</p> <p>For a discounted type of product, the interest is calculated and deducted from the maturity amount to derive the initial payin amount.</p> <p>This field displays the gross interest amount which is to be paid to the customer.</p>
Tax Amount: (in Acct Ccy)	<p>[Display]</p> <p>This field displays the tax that will be deducted on the account in account currency.</p> <p>This value is derived on the basis of the gross interest and actual tax rate applicable to the account.</p>
Tax Amount: (in Tax Ccy)	<p>[Display]</p> <p>This field displays the tax that will be deducted on the account in tax currency. This is the currency in which the tax will be paid to the government.</p> <p>The tax currency is defined at the product level.</p>
Payin Amount	<p>[Display]</p> <p>This field displays the initial amount which the customer has to deposit.</p> <p>In normal and true discounted types of product, the maturity amount is pre-defined along with the applicable interest rate.</p> <p>The interest is then deducted from the maturity amount to arrive at the initial payin amount.</p>

3. Enter the account number and press the **<Tab>** or **<Enter>** key.
4. Select the deposit number from the pick list.
5. Click the **Inquire** button.

Discounted Time Deposit Inquiry

The screenshot shows a software window titled "Discounted Time Deposit Inquiry". At the top, there are input fields for "Account Number", "Deposit No.", and "Product Code". Below these are two sections: "Account Details" and "Payin Details".

Account Details:

- Principal Balance: 0.00
- Deposit Term: [in X] Months Days
- Customer Type: [dropdown menu]
- Tax Code: [dropdown menu] 0.00000
- Interest Variance: 0.00000

Payin Details:

- Effective Interest Rate: 0.00000
- Discounted Interest: 0.00
- Tax Amount: [in Acct Coy] 0.00 [dropdown menu]
- Tax Amount: [in Tax Coy] 0.00 [dropdown menu]
- Payin Amount: 0.00

At the bottom right of the window, there are three buttons: "Inquire", "Clear", and "Close".

- The system displays the discounted time deposit details. Click the **Cancel** button to cancel the inquiry.

8.12. TD044 - TD Transactions Inquiry

Using this option, you can view the details of the transactions performed on a term deposit account. Details of a particular deposit number can be viewed by selecting the original deposit number. If the original deposit number is not mentioned, the system displays all the transactions performed on an account.

TD transactions inquiry will show the redemption details online after the newly created TD is redeemed.

9. Tax Processing

9.1. TDS03 - Tax Waiver

Using this option you can define tax waiver for term deposit account(s) of a customer. The tax waiver can be maintained for a specified period. This maintenance is to be done for all accounts of a customer who is exempted from TDS. If the tax waiver is defined for an account, tax is not computed on the interest earned.

If Tax Deduction at Source Flag is defined as No Tax, at the product level, then by default no tax will be deducted from the term deposit account.

If Tax Deduction at Source Flag is defined as Accrued, at the product level then tax is calculated on the basis of accrued interest. In case customer seeks waiver of tax for a specific period, then you can define the period to waive the tax. The Tax Waiver is a yearly maintenance and relevant document for claiming exemption as per applicable taxation rule needs to be provided.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add tax waiver details

1. Type the fast path **TDS03** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > Tax Waiver**.

Column Name	Description
Account No.	<p>[Display]</p> <p>This column displays the TD account number of the customer.</p>

Column Name	Description
Deposit No.	[Display] This column displays the deposit number.
Waiver From	[Display] This column displays the period for which the waiver is applicable. The field is maintained in the Bank Master Maintenance option.
Waiver To	[Display] This column displays the period up to which the waiver will be applicable. The field is maintained in the Bank Master Maintenance option.
Tax Waived	[Optional, Check Box] Select the check box corresponding to the deposit for which tax is to be waived.
Waiver Reason	[Optional, Alphanumeric, 40] Type the waiver reason. By default the system displays the reason based on the type of form submitted. You can change the reason, if required.

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Type the search string and press the **<Tab>** or **<Enter>** key and select the customer from the pick list. The selected customer's detail appears in the relevant fields.
6. Select the branch code from the drop-down list.
7. Enter the financial year and press the **<Tab>** or **<Enter>** key.
8. Select the form submitted from the drop-down list. The system displays the tax waiver details.
9. Click the **UDF** button. The system displays the **UDF Details** screen.
10. Click the **Validate** button. The system displays the message "Validation procedure completed".
11. Click the **Ok** button. The system displays the **Tax Waiver** screen.
12. Click the **Ok** button.
13. The system displays the message "Record Added...Authorisation Pending..". Click the **OK** button.
14. The tax waiver details are added once the record is authorised.

9.2. TDS10 - TDS Remittance

Using this option you can mark the tax deducted against interest paid on current and savings account or term deposit accounts, as remitted to government.

The date of remittance and challan number for remittance is marked against the total tax deducted within the mentioned dates. You can define TDS tax codes with corresponding rates and the exemption limit above which the tax rate is applicable using the **Tax Codes Maintenance** (Fast Path: BAM30) option.

Definition Prerequisites

- Bank Master Maintenance
- TDS transactions in the account

Modes Available

Add, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add TDS remittance details

1. Type the fast path **TDS10** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > TDS Remittance**.
2. The system displays the **TDS Remittance** screen.

TDS Remittance

The screenshot shows the 'TDS Remittance*' application window. It features a top navigation bar with 'Add' and 'Inquire' tabs. The main area contains several input sections:

- Challan Number:** A text input field.
- Branch Information:** Includes 'All Branches' (checkbox), 'Branch Name' (text field with dropdown), 'Tax Type' (dropdown), and 'Tax Code' (text field with dropdown).
- Date of Remittance:** A date picker showing '01/01/1800'.
- Details of Remittance:** A text input field.
- Tax Amounts (TD):** A table with four rows: 'Base Tax', 'Additional Tax 1', 'Additional Tax 2', and 'Remitted Tax in Lcy for TD', each with a value of '0.00'.
- Tax Amounts (CASA):** A table with four rows: 'Base Tax', 'Additional Tax 1', 'Additional Tax 2', and 'Remitted Tax in Lcy for CASA', each with a value of '0.00'.
- Cheque/DD Number:** A text input field.

At the bottom, there is a toolbar with buttons for 'Add By Copy', 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', 'Inquire', 'UDF', 'OK', 'Close', and 'Clear'. The 'Inquire' button is currently selected.

3. Click the **Add** button.
4. Select the branch code from the pick list.
OR
Select the **All Branches** check box.
5. Select the tax code from the pick list.
OR
Select the tax type from the drop-down list.
6. Enter the period of tax deduction.
7. Enter the challan details.

Add

The user can enter details of tax type, challan number and date of remittance for a branch in the Add tab.

8. Click the **Close** button.

9.3. TDS11 - TDS Inquiry

Using this option you can inquire a detailed break-up of the tax deducted from a customer. The details of all such deductions across all accounts can be traced in various sections in this screen.

Definition Prerequisites

- 8054 - Time Deposit Account Opening
- TDM04 - TD Bank Parameters Maintenance
- TDS transactions in the account

Modes Available

Not Applicable

To perform TDS inquiry

1. Type the fast path **TDS11** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TDS Inquiry**.
2. The system displays the **TDS Inquiry** screen.

TDS Inquiry

The screenshot shows the 'TDS Inquiry' window with the following elements:

- Search Criteria:** Customer Short Name (dropdown), Search String (text), Customer Name (text), Customer ID (text), Branch Code (text), Account No. (text), Financial Year (text).
- Tabs:** CustomerWise Details (selected), AccountWise Details, DepositWise Details, Txn Details, Tax Details View, Projected Income View.
- Table Header:**

Branch Code	Branch Name	Cumulative Actual Income	Cumulative Projected Income	Interest Waived	Tax Due 1	Tax Unrecovered 1	Tax Remitted 1	Tax Refunded Amount
-------------	-------------	--------------------------	-----------------------------	-----------------	-----------	-------------------	----------------	---------------------
- Footer:** Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signatures, Travellers Cheque, and buttons for UDF, Inquire, Close, Clear.

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria to search for the customer from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none">• Customer Short Name: Short name of the customer.• Customer IC: Customer Identification criteria (IC) arrived at by the bank during customer addition.• Customer ID: Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20, Pick List]</p> <p>Type a search string according to the selected search criteria.</p> <p>If the search criterion is specified as customer's short name or IC then the beginning letter of the short name or IC can be entered. The pick list will pop up. Choose the beneficiary from the existing customer list.</p> <p>For example, The customer's name is John S Winter. In this case you can specify the short name as Joh.</p>
Customer Name	<p>[Display]</p> <p>This field displays the name of the customer who holds the TD account.</p>
Customer ID	<p>[Display]</p> <p>This field displays the unique customer number generated by Oracle FLEXCUBE as a combination of Customer IC and customer type.</p>
Branch Code	<p>[Optional, Pick List]</p> <p>Select the branch code from the pick list.</p>
Account No.	<p>[Optional, Numeric, 14]</p> <p>Type the TD account number of the customer.</p>
Financial Year	<p>[Mandatory, Pick List]</p> <p>Select the financial year for which you want to make the TDS inquiry from the pick list.</p>

3. Select the search criteria from the drop-down list.
4. Type the search string and press the **<Tab>** or **<Enter>** key and select the customer from the pick list. The selected customer's detail appears in the relevant fields.
5. Select the financial year from the pick list.

Field Description

Column Name

Description

Account No

[Display]

This column displays the account numbers of all the TD accounts of the customer, maintained in a particular branch.

Cumulative Actual Income

[Display]

This field displays the total interest earned on all deposits in the account of the selected branch.

Cumulative Projected Income

[Display]

This column displays the cumulative projected interest.

In case of cumulative deposit, projected interest is the interest which the deposit will be earning for the full term.

While in case of non-cumulative deposit, it is the interest earned after the last payout and the date of maturity. This is inclusive of TDS, if any.

Column Name	Description
Interest Waived	[Display] This column displays the total interest earned on the deposits, under the TD account, for which tax is exempted.
Tax Due 1	[Display] This column displays the total amount deducted as tax 1 for the complete interest earned on all deposits, under a TD account.
Tax Unrecovered 1	[Display] This column displays the tax 1 amount due on the interest earnings, but not deducted during the financial year.
Tax Remitted 1	[Display] This column displays the tax 1 amount paid out to the agency collecting the tax.
Tax Refunded Amount 1	[Display] This column displays the amount of Tax 1 which has been refunded from Tax Refund Screen (Fast Path: TDS14) option.
Tax Due 2	[Display] This column displays the total amount deducted as tax 2 for the complete interest earned on all deposits, under a TD account.
Tax Unrecovered 2	[Display] This column displays the tax 2 amount due on the interest earnings, but not deducted during the financial year.
Tax Remitted 2	[Display] This column displays the tax 2 amount paid out to the agency collecting the tax.
Tax Refunded Amount 2	[Display] This field displays the amount of Tax 2 which has been refunded from Tax Refund Screen (Fast Path: TDS14) option.

8. Double-click the appropriate column link in the AccountWise Details tab, to view the **DepositWise details** tab.

DepositWise Details

This tab displays the details of the tax deducted, remitted, unrecovered, interest waived, etc. in the deposit.

Interest Rate	[Display] This column displays the interest rate for TD.
Projected Interest Income	[Display] This column displays the projected interest income on TD at the time of interest recalculation event.

10. Click the **Close** button.

9.4. TDS12 - Tax Recovery

Using this option you can have a detailed break-up of the tax recovery against a customer.

If the tax is greater than the interest earned, the bank may need to ask the customer to provide another Current and savings or Loan account from where the extra tax amount could be remitted. You can make an inquiry on customer wise, account wise or deposit wise details. The system provides the details like net interest; interest waived, TDS details, refund details, etc.

Definition Prerequisites

- TDM04 - TD Bank Parameters Maintenance
- TDS transactions in the account

Modes Available

Not Applicable

To perform tax recovery

1. Type the fast path **TDS12** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > Tax Recovery**.
2. The system displays the **Tax Recovery** screen.

TDS15 - Inquiry on Projected Tax

Using this option, you can inquire on projected gross interest, tax amounts calculated and the projected net interest for a term deposit.

The tax codes are defined in the **Tax Code Maintenance** (Fast Path: BAM30) option. Using the **Tax Deduction at Source flag** field available in the **TD Product Master** (Fast Path: TDM01) option, you can determine the instance depending on which, tax is to be deducted from the interest earned on the TD. Example: No tax, Tax on accrual, Tax on pay out, etc.

Definition Prerequisites

- 8054 - Time Deposit Account Opening

Modes Available

Not Applicable

To perform inquiry on projected tax

1. Type the fast path **TDS15** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Other Transactions > Inquiry on Projected Tax**.
2. The system displays the **Inquiry on Projected Tax** screen.

Inquiry on Projected Tax

The screenshot shows a software window titled "Inquiry on Projected Tax". The window has a yellow header bar. Below the header, there are several input fields arranged vertically on the left side:

- Account Number: [Text Box] [Dropdown]
- Deposit No : [Text Box] [Dropdown]
- Projected Gross Interest: [Text Box]
- Tax1: [Text Box]
- Tax2: [Text Box]
- Projected Net Interest: [Text Box]

At the bottom right of the window, there are two buttons: "Ok" and "Close".

Field Description

Field Name	Description
Account Number	[Mandatory, Numeric, 14] The account number of the deposit for which you want to view the projected tax.
Deposit No	[Mandatory, Pick List] Select the deposit number from the pick list. It is the deposit number of the deposit for which the inquiry is made, all the deposits under the account number are displayed.
Projected Gross Interest	[Display] The total interest calculated on the deposit amount for the term of the deposit. It is the projected value of the total interest earned on the deposit.
Tax 1	[Display] The tax1 amount calculated on the interest. It is calculated on the basis of the rate applicable for the customer/account.
Tax 2	[Display] The tax2 amount calculated on the interest. It is calculated on the basis of the rate applicable for the customer/account.
Projected Net Interest	[Display] The net interest. It is calculated after deducting tax 1 and tax 2 from the gross interest.

3. Enter the TD account number and press the <Tab> or <Enter> key.
4. Select the deposit number from the pick list.
5. Click the **Ok** button. The system displays the projected tax for the selected deposit.

9.6. TDS21 - TDS Inquiry-Date Based

Using this option you can inquire a detailed break-up of the tax deducted from a customer. The details of all such deductions for a date range can be traced in various sections in this screen.

Definition Prerequisites

- 8054 - Time Deposit Account Opening
- TDS transactions in the account

Modes Available

Not Applicable

To perform TDS inquiry

1. Type the fast path **TDS21** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > TD Account Transactions > Inquiries > TDS Inquiry-Date Based**.
2. The system displays the **TDS Inquiry-Date Based** screen.

TDS Inquiry-Date Based

The screenshot shows the 'TDS Inquiry-Date Based' window. At the top, there are search criteria: 'Customer Short Name' (dropdown), 'Search String' (text box), 'Customer Name' (text box), 'Customer ID' (text box), 'Date From' (calendar), and 'Date To' (calendar with '28/02/2010' selected). Below the search criteria are tabs for 'CustomerWise Details', 'AccountWise Details', and 'Txn Details'. The main area is a table with the following columns: Branch Code, Branch Name, Total Balance, Int Comp/Paid, Tax Deducted, Tax Remitted, and TDS Ref. The table is currently empty. At the bottom, there is a navigation bar with buttons for 'Card', 'Change Pin', 'Cheque', 'Cost Rate', 'Denomination', 'Instrument', 'Inventory', 'Pin Validation', 'Service Charge', 'Signature', 'Travellers Cheque', 'UDF', 'OK', 'Close', and 'Clear'.

Field Description

Field Name	Description
