2.20.2. IT-ReopenInterPrf-Req-IO-MSG.xsd	773
2.20.3. IT-ReopenInterPrf-Res-Full-MSG.xsd	780
2.20.4. IT-ReopenInterPrf-Res-PK-MSG.xsd	793

1.BACKGROUND

Integration of different applications and solutions is a key area in today's systems. A variety of specialized applications deployed on disparate platforms and using different infrastructure need to be able to communicate and integrate seamlessly with FLEXCUBE UBS in order to exchange data. The FLEXCUBE UBS Integration Gateway (referred to as Gateway) will cater to these integration needs.

The integration needs supported by the Gateway can be broadly categorized from the perspective of the Gateway as follows:

1. Inbound application integration – used when any external system needs to add, modify or query information within FLEXCUBE UBS

2. Outbound application integration– used when any external system needs to be notified of the various events that occur within FLEXCUBE UBS

The following sections provide detailed XSD documentation of all operations available in FCUBSInteractionService of IT-Module

2.FCUBSInteractionService

Interaction ServiceInteraction Service
