This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

This software and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third party content, products and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third party content, products or services.

New Features in Contract Management 14.1

New features include:

- Update custom fields in drawing revisions
- Search by package number in submittals
- Update drawing revision number
- Search line item and description fields
Update Custom Fields in Drawing Revisions

When you select the New Revision option in the Record Drawings dialog box, any custom field associated with the drawing is activated for editing.
Search by Package Number in Submittals
You can search for submittal packages by package number in the Submittal Package - Select dialog box.
Exclude Actions, Alerts for Closed and Rejected Projects

New options in the Define Alerts dialog box allow you to globally exclude actions and alerts associated with closed or rejected projects from the refresh process. This reduces the amount of time required by the refresh process and removes actions or alerts associated with closed or rejected projects from the Actions or Alerts objects on the Control Center page.
Update Drawing Revision Number

When editing a drawing revision, the Revision Number field is activated for editing.
Search Line Item and Description Fields
In Contract Information logs, you can search in the Line Item Number and Description fields.

Click Find to search in Line Item No. and Description fields.
Technical Enhancements

Support for Multiple Microsoft SharePoint and Oracle WebCenter Content Core Capabilities (WCCC) Repository Configurations: Using the Primavera Administrator utility, you can create multiple SharePoint or WCCC repository configurations, each with its own configuration name and connection specifications.

Specify Microsoft SharePoint and Oracle WebCenter Content Core Capabilities (WCCC) Repositories per project: In the Contract Management Administration application, you can specify the SharePoint or WCCC content repository for each project individually rather than globally.

Support for CMIS-compliant content management systems: Contract Management can connect to CMIS-compliant content management systems as an alternative to the Microsoft SharePoint and Oracle WebCenter Content Core Capabilities (WCCC) content repositories.

Korean language support: The user interface now supports Korean.
