1 Introduction

About This Guide

This guide contains information about the subject areas in Oracle Transactional Business Intelligence for Procurement, their associated job and duty roles, and the business questions that they provide answers to. For your reference:

- Subject areas are the building blocks of your analytics and reports based upon them. Analytics are built by choosing an appropriate subject area that has information that answers the business question you're analyzing. Technically, subject areas are a grouping of information pieces called data objects that relate to each other in a particular context.
- - Job roles inherit duty roles. To control access to the subject areas, copy the predefined job roles associated with the subject area to create custom roles, and assign them to users.

For more information about custom roles and their use with predefined roles, see [Guidance for Assigning Predefined Roles](#) in the Oracle Fusion Cloud Applications Securing Applications guide.

2 Subject Areas

Overview

This chapter provides information on the subject areas with data you maintain in Oracle Fusion Cloud Procurement. These subject areas, with their corresponding data, are available for you to use when creating and editing analyses and reports. The information for each subject area includes:

- Description of the subject area.
- Business questions that can be answered by data in the subject area, with a link to more detailed information about each business question.
- Job roles and duty roles that can be used to secure access to the subject area, with a link to more detailed information about each job role and duty role.
- Primary navigation to the work area that is represented by the subject area.
- Time reporting considerations in using the subject area, such as whether the subject area reports historical data or only the current data. Historical reporting refers to reporting on historical transactional data in a subject area. With a few exceptions, all dimensional data are current as of the primary transaction dates or system date.
- The lowest grain of transactional data in a subject area. The lowest transactional data grain determines how data are joined in a report.
- Special considerations, tips, and things to look out for in using the subject area to create analyses and reports.

Enterprise Contracts - Contracts Real Time

Description

This subject area provides real-time information on sell side and buy side contracts. It includes details on contract headers, contract lines, and fulfillment lines.

Business Questions

This subject area can answer the following business questions:

- *What are the contracts with pending invoices?*
- *What is the count of contracts and of contract amounts for a given supplier?*
- *What are the active contracts by contract type?*
- *What contracts are expiring in the next 30 days?*
- *What are the contracts with named policy deviations?*

Job Roles

The following job roles secure access to this subject area:

- *Customer Contract Administrator*
- *Customer Contract Manager*
- *Customer Contract Team Member*
- *Enterprise Contract Administrator*
- *Enterprise Contract Manager*
- *Enterprise Contract Team Member*
- *Supplier Contract Administrator*
- *Supplier Contract Manager*
- *Supplier Contract Team Member*

Duty Roles

The following duty roles secure access to this subject area:

- *Enterprise Contracts Transaction Analysis Duty Role*

Primary Navigation

Navigator > Contract Management

Time Reporting

This subject area supports historical reporting.

Time dimension is linked to Contract Header Start Date.

Transactional Grain

Special Considerations

None.

OTBI Performance Real Time

Description

Analyze OTBI analysis and dashboard usage and performance, including logical and physical database SQL, execution time, and errors. View the last six months of OTBI usage and performance trends, commonly used subject areas, and report errors. This subject area provides data to monitor and diagnose OTBI reporting performance. Historical data older than six months is purged each week.

Business Questions

This subject area can answer the following business questions:

- *Which analyses have low usage because of poor performance?*
- *Which analyses have the longest response time?*
- *What are the most commonly used OTBI subject areas?*
- *Which analyses have high data row count?*
- *Which analyses reached OTBI max row limit?*
- *What are the common execution errors in the past month?*
- *What are the least-used OTBI subject areas?*
- *How many analyses and dashboards failed in the past month?*
- *What is the analysis total execution time and row count?*
- *What are the long-running analyses in the past month?*
- *Which subject areas are used frequently in ad-hoc OTBI analyses?*
- *How many database SQLs are executed by an analysis?*
- *What is the database SQL execution time and row count?*
- *What is the OTBI execution time histogram in the past month?*

Job Roles

The following job roles secure access to this subject area:

- *Application Implementation Consultant*
- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *OTBI Report Performance Transactional Analysis Duty*

Primary Navigation

Not applicable

Time Reporting

This subject area supports six-month usage history data.

Time dimension is linked to "Time"."Report Start Date".

Transactional Grain

This subject area returns data at the grain of a query execution and database physical SQL.

Special Considerations

This subject area contains six months of query execution data. Each OTBI query execution can generate multiple database SQL statements. Usage data volume grows over time, so use proper filters to narrow reporting data load. Because this subject area has no data security, you're advised to secure user access to it.

OTBI Usage Real Time

Description

Analyze six months of subject area and analysis usage trends and patterns with a simpler and lighter-weight selection of OTBI usage metrics, including for example user, report and subject area usage patterns. Historical data older than six months is purged each week.

Business Questions

This subject area can answer the following business questions:

- *What is the execution history of dashboard X in the past month?*
- *Which analyses have low usage in the past three months?*
- *How many predefined OTBI analyses have been run in the past month?*
- *How many OTBI SOAP web services have been run in the past month?*
- *How many custom OTBI analyses have been run in the past month?*
- *How many users run OTBI analyses?*
- *What are the top N most frequently-run OTBI analyses?*
- *How many ad-hoc OTBI analyses have been run in the past month?*
- *Who are the top N OTBI users?*
- *What is the weekly OTBI analysis usage trend?*

Job Roles

The following job roles secure access to this subject area:

- *Application Implementation Consultant*
- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *OTBI Report Usage Transactional Analysis Duty*

Primary Navigation

Not applicable

Time Reporting

This subject area supports six-month usage history data.

Time dimension is linked to "Time"."Report Start Date".

Transactional Grain

This subject area returns data at the grain of a query execution.

Special Considerations

This subject area contains six months of usage history. It doesn't contain database SQL execution details so it has less data volume.

Procurement - Implemented Change Orders Real Time

Description

This subject area provides real-time information on change orders that have been implemented for purchase orders, blanket agreements, and contract agreements.

Business Questions

This subject area can answer the following business questions:

- *What is the count of blanket and contract agreements with implemented change orders?*

Job Roles

The following job roles secure access to this subject area:

Procurement - Pending Change Orders Real Time

Description

This subject area provides real-time information on change orders that are pending, including pending change orders for purchase orders, blanket agreements, and contract agreements. It includes details on the pending change order headers, line details, change schedules, price break details, and change order distribution details.

Business Questions

This subject area can answer the following business questions:

- *What is the count of pending change order headers for blanket agreements?*
- *What is the count of pending change order lines for purchase orders by procurement business unit and change reason?*

Job Roles

The following job roles secure access to this subject area:

Procurement - Procure To Pay Real Time

Description

This subject area provides real-time spend information on requisitions, purchase orders, invoices, and receipts.

Business Questions

This subject area can answer the following business questions:

- *What are the invoice withholding amounts?*
- *What are the nonrecoverable exclusive taxes?*
- *What are the delivered quantities and amounts?*
- *What are the prorated freight amounts?*
- *What are the requested quantity, amount, and price per requisition?*
- *What are the recoverable and nonrecoverable exclusive taxes?*
- *What are the invoice amounts?*
- *What are the open ordered amounts per purchase order?*
- *What are the order quantity, amount, purchasing price, and open ordered quantity per purchase order?*
- *What are the requested amount and price deviations?*
- *What are the recoverable exclusive taxes per purchase order?*

Job Roles

The following job roles secure access to this subject area:

- *Accounts Payable Manager*

Procurement - Purchasing Agreements Real Time

Description

This subject area provides real-time information on purchasing blanket agreements and contract agreements. The analysis includes header and line level details, order creation options, notification controls, price breaks, and retroactive pricing for blanket agreements.

Business Questions

This subject area can answer the following business questions:

- *What is the agreed amount for a contract?*
- *How many blanket agreements will expire in the next six months?*
- *How long has an agreement been inactive?*
- *What is the released amount for a contract?*

Job Roles

The following job roles secure access to this subject area:

Procurement - Purchasing Real Time

Description

This subject area provides real-time information on purchase orders. It includes details on the items or services being procured, estimated costs, quantities, delivery schedules, and accounting distributions. The data is measured at different levels of granularity, such as purchase order quantity at the purchase order line level, scheduled quantity and received quantity at the schedule line level, and distribution ordered amount and billed amount by distribution.

Business Questions

This subject area can answer the following business questions:

- *What are the open purchase orders with delayed delivery?*
- *What are the top purchase orders by the number of days for which they are unprocessed?*
- *Which purchase orders have a nonstandard clause?*
- *What are the ordered amount and invoiced amount by purchase order distribution?*

-
- *What is the expected delivery schedule for open purchase orders for a given item?*
 - *What is the split in the total purchased amount by purchase order charge account?*
 - *What are the top 10 open purchase orders for a given supplier?*

Job Roles

The following job roles secure access to this subject area:

- *Buyer*
- *Category Manager*
- *Procurement Contract Administrator*
- *Procurement Manager*
- *Purchase Analysis*

Duty Roles

- *Purchase Order Transaction Analysis Duty*

Primary Navigation

Navigator > Procurement

Time Reporting

This subject area supports historical reporting.

Time dimension is linked to Purchase Order Version Document Date.

Transactional Grain

Not available

Special Considerations

Predefined metrics, such as Ordered Quantity, don't get refined when used with Spend Classification attributes because the Spend Classification integration is at the distribution level of each purchase requisition, purchase order, and invoice. If you use these attributes with predefined metrics, note that the attributes won't change the values of the metrics.

Procurement - Requisitions Real Time

Description

This subject area provides real-time information on purchase requisitions. It includes details on purchase requisition line quantities, requisition line amounts, approval times, and requisition accounting distributions. The data is measured at the requisition header, requisition line, and requisition distribution levels.

Business Questions

This subject area can answer the following business questions:

- *What is the count of requisition lines across buyers by requisition line status?*
- *Who are the top 10 buyers in the requisition pool by count of requisition lines?*
- *What is the count of days for which a buyer has not processed the requisition lines?*
- *What are the requisition lines in process for a given buyer by requisition line status?*
- *What are the unprocessed and processed requisition lines by buyer?*

Job Roles

The following job roles secure access to this subject area:

- *Buyer*
- *Procurement Contract Administrator*
- *Procurement Manager*
- *Purchase Analysis*

Duty Roles

The following duty roles secure access to this subject area:

- *Purchase Requisitions Transaction Analysis Duty*

Primary Navigation

Navigator > Procurement

Time Reporting

This subject area supports historical reporting.

Time dimension is linked to Requisition Header Creation Date.

Transactional Grain

Not available

Special Considerations

Predefined metrics, such as Requisition Line Fulfilled Days, don't get refined when used with Spend Classification attributes because the Spend Classification integration is at the distribution level of each purchase requisition, purchase order, and invoice. If you use these attributes with predefined metrics, note that the attributes won't change the values of the metrics.

Procurement - Spend Real Time

Description

This subject area provides real-time information on spending patterns for procurement organizations with both direct and indirect spend. Topics analyzed include spend by supplier, business unit, item, buyer, category, commodity, etc. It provides calculated metrics to track payables performance, spend-related metrics, invoice price, invoice price variance, and invoice distribution.

Business Questions

This subject area can answer the following business questions:

- *What is the spend distribution by buyer?*
- *What is the spend by item?*
- *What are the top 10 spends by supplier?*
- *What are the top 10 spends by category?*

Job Roles

The following job roles secure access to this subject area:

- *Accounts Payable Manager*
- *Accounts Payable Specialist*
- *Accounts Payable Supervisor*
- *Buyer*
- *Procurement Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *Spend Transaction Analysis Duty Role*

Primary Navigation

Navigator > Procurement

Time Reporting

This subject area supports historical reporting.

Time dimension is linked to Invoice Header Invoice Date.

Transactional Grain

Not available

Special Considerations

Predefined metrics, such as SLA Rounding Entered Amount, don't get refined when used with Spend Classification attributes because the Spend Classification integration is at the distribution level of each purchase requisition, purchase order, and invoice. If you use these attributes with predefined metrics, note that the attributes won't change the values of the metrics.

Security - Audit Real Time

Description

Provides real-time information on audit details related to security. For example, when a custom role was created, when roles were assigned to specific users, or when roles were given specific function or data privileges.

Business Questions

This subject area can answer the following business questions:

- *What are all the data security privileges that a specific user added?*
- *Which roles were added with a specific functional security policy, and who added them?*

Job Roles

The following job roles secure access to this subject area:

- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *Security Transaction Analysis Duty*

Primary Navigation

Tools > Security Console

Time Reporting

This subject area does not support history data.

Transactional Grain

Not applicable.

Special Considerations

This subject area can't be used to create a cross-subject area analysis. Don't mix data from different folders within this subject area either. For example, keep data from the Data Security Policy Audit folder separate from the Instance Set Audit folder. If you need to combine data from different folders, use a union operation or create a report instead of an analysis.

Security - Roles and Privileges Real Time

Description

Provides real-time information about the security setup in the application. This subject area is independent of the pillar and can be used to report on roles and details across pillars like HCM, ERP, SCM and so on.

Use this subject area to report on role categories, roles, functional security policies, data security policies, and the users assigned to the roles.

You can report on the correlation between the objects like the roles that are directly assigned to another role, the roles that are inherited by the virtue of the directly assigned roles, or the functional and data security policies that are directly assigned to the roles.

For a given user, all the roles that have been assigned can also be reported.

Business Questions

This subject area can answer the following business questions:

- *Which data security policy would provide access to the data I need to see?*
- *Can I view and edit a particular page? If yes, which functional security policy do I need to provide to a user who needs similar access?*
- *I have not added a specific role to a user, but the user seem to have this job role. Can I trace how has this been inherited by the user?*
- *Why am I not able to view certain subject areas with my login credentials?*
