

ORACLE® HYPERION PROFITABILITY AND COST MANAGEMENT

Release 11.1.2.4.000

Error Message Reference

ORACLE®

The following is a list of error messages with causes and actions for Oracle Hyperion Profitability and Cost Management.

EPMPKM-00001: Unknown error.

Cause: A Web Application error occurred, but no corresponding message was found

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-00002: Unknown error: {0}.

Cause: A Web Application error occurred, but no corresponding message was found

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-00003: Unexpected error.

Cause: An unexpected error occurred.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-00004: Failed to get configuration.

Cause: An exception occurred while retrieving the application configuration.

Action: Refer to the server log files for more information.

Level: 1

Type: ERROR

EPMPKM-00005: Audit error.

Cause: An unexpected error occurred while retrieving information required for auditing.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-00006: Initialization of audit client failed.

Cause: Unable to access the Audit service.

Action: Verify the configuration for the Foundations Services is correct.

Level: 1

Type: ERROR

EPMPCM-00007: Form validation failed: "{0}".

Cause: Data entered into a field within the Form is invalid.

Action: Enter data in the correct format.

Level: 1

Type: ERROR

EPMPCM-00008: "{0}" is required.

Cause: The field is required for completion of the current form

Action: Enter a value for the required field.

Level: 1

Type: ERROR

EPMPCM-00009: "{0}" must be an integer.

Cause: An integer value must be entered into this field

Action: Enter a numeric value without a decimal.

Level: 1

Type: ERROR

EPMPCM-00010: "{0}" must be less than {1} symbol.

Cause: The length of the value entered into the field is too long.

Action: Reduce the length of the value entered into the field.

Level: 1

Type: ERROR

EPMPCM-00013: Traceability Diagram

Cause: An error occurred while exporting the traceability diagram.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00014: Failed to load version information from "{0}"

Cause: Unable to determine the version for Hyperion Profitability and Cost Management

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00015: SSOfilter configuration: {0} = {1}

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00016: Failed to get RDB connection information from registry

Cause: The Shared Services registry is not valid.

Action: Run the EPM configurator to determine the configuration state for the Profitability application.

Level: 1
Type: ERROR

EPMP-00017: Failed to convert object

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-00018: Failed to get value for ""{0}"" from RegistryHelper

Cause: The Shared Services registry is not valid.
Action: Run the EPM configurator to determine the configuration state for the Hyperion Foundation.
Level: 1
Type: ERROR

EPMP-00019: Cannot get WebServer configuration. Please make sure Workspace and web server are configured and then restart Profitability application server.

Cause: WebServer configuration is not available.
Action: Verify that Workspace and web server are configured and then restart the application server where the Profitability service is installed.
Level: 1
Type: ERROR

EPMP-00020: Cannot get Essbase configuration from Registry. Please make sure Essbase is configured and then restart Profitability application server.

Cause: The Essbase configuration is invalid in the registry.
Action: Verify that Essbase is configured properly using the Configurator and then restart the application server where the Profitability service is installed.
Level: 1
Type: ERROR

EPMP-00021: Application with name ""{0}"" already exists.

Cause: The application name is already registered.
Action: Choose a different application name.
Level: 1
Type: ERROR

EPMP-00022: Project ""{0}"" does not exist.

Cause: The Shared Services Project does not exist.
Action: Choose a different project for the application.
Level: 1
Type: ERROR

EPMP-00023: Cannot delete temp file ""{0}""

Cause: A temporary file on the file system could not be deleted.
Action: Verify that there are no existing locked files in the operating system and restart the application server where the Profitability service is installed.
Level: 1

Type: ERROR

EPMPCM-00024: Failed to get Essbase connection information from registry

Cause: The Essbase installation has an invalid configuration.

Action: Verify the state of the Essbase installation using the Configurator.

Level: 1

Type: ERROR

EPMPCM-00025: Failed to get HSS connection information from registry

Cause: Hyperion Shared Services has an invalid configuration.

Action: Verify the state of Hyperion Shared Services using the Configurator.

Level: 1

Type: ERROR

EPMPCM-00026: Resource not found for message ""{0}""

Cause: A resource bundle file was not found.

Action: Verify the state of the Profitability configuration using the Configurator.

Level: 1

Type: ERROR

EPMPCM-00027: Failed to update registry on application server startup

Cause: Could not successfully update registry

Action: Verify the configuration state for the Hyperion products using the Configurator.

Level: 1

Type: ERROR

EPMPCM-00028: ValidationEngine is not available in the context

Cause: The error cause is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00030: The context parameter cannot be null

Cause: The error cause is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00031: Unexpected authenticationType value: {0}

Cause: Unable to authenticate the SSO Token with Essbase. The SSO Token may be stale.

Action: Verify that SSO Token timeout settings are appropriate for the installation.

Level: 1

Type: ERROR

EPMPCM-00032: Scripts execution time (ms): {0}

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00033: Validation resources are not found

Cause: An error occurred while reading validation XML files.

Action: Restart the application server where the Profitability service is installed.

Level: 1

Type: ERROR

EPMPCM-00034: Validation resources parsing error

Cause: An error occurred while reading validation XML files.

Action: Verify that the Profitability application is installed and configured properly using the Configurator.

Level: 1

Type: ERROR

EPMPCM-00035: Validator error

Cause: An error occurred during validation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00036: Schema type information is not found for the node: {0}

Cause: The cause of the error is unknown.

Action: Refer to the server log files for more information.

Level: 1

Type: ERROR

EPMPCM-00037: Cannot find type to instantiate with node TypeNameInfo: {0}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00038: No NodeUnmarshaller could be found to unmarshall node: {0}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00039: Unexpected error: {0}.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00040: Failed to instantiate configuration class {0}.

Cause: The Shared Service registry is invalid.

Action: Verify that the Hyperion Foundation is properly configured using the Configurator.

Level: 1

Type: ERROR

EPMPCM-00042: Command executor failed while executing the following template: {0}

Cause: An SQL statement failed during execution
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00043: Exception getting ""{0}"" field value.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00044: Removing of the temporary copy of file has failed. Temporary file is "{0}".

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00045: Failed to initialize DMS Execution Context

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00046: Unique Id generated for this execution is : {0}

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00047: Product database rolled back successfully.

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00048: Exception when trying to rollback product database connection for execution: {0}

Cause: An exception occurred during rollback of a database transaction.
Action: Refer to the server log files for more information.
Level: 1
Type: ERROR

EPMPCM-00049: Staging database rolled back successfully.

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00050: Exception when trying to rollback staging database connection for execution: {0}

Cause: An exception occurred while performing a database rollback operation on the Staging database.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00051: Unknown database type: {0}

Cause: You are running against an unsupported database type.

Action: Reconfigure Profitability for one of the supported database types.

Level: 1

Type: ERROR

EPMPCM-00052: POV is required.

Cause: Point of View was not selected.

Action: Select a valid Point of View and retry the operation.

Level: 1

Type: ERROR

EPMPCM-00053: Stage is required.

Cause: The Profitability application does not have the required number of stages defined.

Action: Define an additional stage for the application.

Level: 1

Type: ERROR

EPMPCM-00054: Layer is required.

Cause: A layer was not selected.

Action: Select a layer and retry the operation.

Level: 1

Type: ERROR

EPMPCM-00055: "{0}" should not contain characters: "{1}".

Cause: The characters identified by the message are not valid for the specified field.

Action: Enter values that are valid for the specified field.

Level: 1

Type: ERROR

EPMPCM-00056: Product Schema mismatch detected. Profitability and Cost Management version {0} requires Product Schema version {1}. Detected schema version: {2}. A recent software upgrade may have been incorrectly applied. Please contact your system administrator.

Cause: The profitability product database was not properly upgraded to match the recent software upgrade.

Action: Run the appropriate upgrade script described in the README included with the recent upgrade.

Level: 1

Type: ERROR

EPMPCM-00057: The host name "{0}" for the SHARED_SERVICES_WEBAPP does not match the name for any installed host component. This is a problem with the installation and/or configuration.

Cause: The host name under which profitability was originally configured has changed or no longer accessible.

Action: Reconfigure and/or reinstall profitability.

Level: 1

Type: ERROR

EPMPCM-00100: No parameters passed on invocation.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00101: All the expected parameters are not passed on class invocation. The list of parameters to be passed in order are as below:

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-00102: Exiting Java program with status {0}.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00103: The version being upgraded from is not a valid starting point: {0}

Cause: The Profitability version of the environment being upgraded is not appropriate for the upgrade being run.

Action: Refer to the Upgrade documentation to verify requirements for the environment to be upgraded.

Level: 1

Type: ERROR

EPMPCM-00104: Verified that the version being upgraded from is a valid starting point.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00105: Upgrade from version lower than 11.1.1.3.XX is not supported.

Cause: You are running the upgrade for an environment that is not at the appropriate version.

Action: Refer to the upgrade documentation for more information.

Level: 1

Type: ERROR

EPMPCM-00106: This is not a supported from version: {0}

Cause: You are running the upgrade for an environment that is not at the appropriate version.

Action: Refer to the upgrade documentation for more information.

Level: 1

Type: ERROR

EPMPCM-00107: Detected a valid upgrade from version of 11.1.1.4.XX.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00108: Detected a valid maintenance install version of 11.1.2.X.XX.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00109: Detected an Oracle Hyperion Profitability and Cost Management database version that is not at the correct 11.1.1.4.XX version level.

Cause: You are running the upgrade for an environment that is not at the appropriate version.

Action: Refer to the upgrade documentation for more information.

Level: 1

Type: ERROR

EPMPCM-00110: Detected an Oracle Hyperion Profitability and Cost Management database version that is not at the correct 11.1.2.X.XX version level.

Cause: You are running the upgrade for an environment that is not at the appropriate version.

Action: Refer to the upgrade documentation for more information.

Level: 1

Type: ERROR

EPMPCM-00111: Invalid existing product version passed: {0}

Cause: The cause of the error is unknown.

Action: Contact Oracle Support for assistance.

Level: 1

Type: ERROR

EPMPCM-00112: No applications are available in Oracle Hyperion Profitability and Cost Management database to apply EPMA metadata changes.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00113: Imposing the uniqueness of Import Configuration name with in an application.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00114: Imposing the uniqueness of Import Configuration name with in an application completed successfully.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00115: Updating Model Preferences to migrate from Essbase physical host names to Essbase cluster names.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00116: Migrating from Essbase physical host names to Essbase cluster names completed successfully.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00117: Updating Model Preferences to migrate from APS physical host names to APS nodes.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00118: Migrating from APS physical host names to APS nodes completed successfully.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00119: No Essbase Cluster name could be found for the following Essbase host name: {0}. Please select the appropriate cluster name using Model Preferences screen.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-00120: No applications found which use connection type as APS to connect to Essbase . So, no changes made to the database for APS node name re-hosting.

Cause:

Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00121: Applying EPMA metadata changes for application: {0}

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00150: Incident error

Cause: Refer to the server logs for information regarding the error cause.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00151: Error when processing import for Single Source Calculation Rules:

Cause: The import could not connect to the Stage database or could not successfully execute a SQL command.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00152: Error when processing import of Single Source Calculation Rules:

Cause: An error occurred while importing Single Source calculation rules.
Action: Refer to the import and server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00153: Error when processing import for Multi Source Calculation Rules:

Cause: An error occurred during import of Multi Source Calculation Rules.
Action: Refer to the import and server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00154: Error when processing import of Multi Source Calculation Rules:

Cause: An error occurred during import of Multi Source Calculation Rules.
Action: Refer to the import and server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00200: Permission is set to read-only. Contact the system administrator.

Cause: An attempt was made to add a permission to a read-only collection
Action: Contact the system administrator.
Level: 1
Type: ERROR

EPMPCM-00201: No SSO token available in current context.

Cause: Unable to authenticate the user
Action: Contact the system administrator

Level: 1
Type: ERROR

EPMPCM-00202: Failed to get user information from current context.

Cause: A user was not provided.
Action: Login with a valid user.
Cause: Unable to authenticate the user
Action: Contact the system administrator
Level: 1
Type: ERROR

EPMPCM-00203: User is not authorized for this action.

Cause: The user does not have permission to perform this action.
Action: Contact the system administrator
Level: 1
Type: ERROR

EPMPCM-00204: User is not authorized for the following action: {0} {1}.

Cause: The user does not have permission to perform this action.
Action: Contact the system administrator
Level: 1
Type: ERROR

EPMPCM-00205: SSO token is null or empty

Cause: An error occurred while attempting to authenticate the session.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00206: SSL configuration not found in registry. Using non-SSL configuration

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMPCM-00207: Failed to initialize CSS API

Cause: A security authentication error occurred.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00900: Variable Manager error.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-00901: Error add variables: {0}.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMPCM-01000: RDB unexpected error.

Cause: An unexpected error occurred during a database operation.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMPCM-01001: No destinations found for assignment rule: {0}.

Cause: There are no destinations found for the assignment rule.

Action: Redefine the assignment rule.

Level: 1
Type: ERROR

EPMPCM-01002: Number of stages is limited to {0}.

Cause: The maximum number of stages has been reached.

Action: In order to create a new stage for this application you must first delete an existing stage for this application.

Level: 1
Type: ERROR

EPMPCM-01005: Failed to load application preferences. Application id: {0}.

Cause: The application preferences could not be retrieved for this application.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMPCM-01006: Error fetching the list for the given query.

Cause: An error has occurred during a database query.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMPCM-01007: Error fetching the list for the given native query.

Cause: An error has occurred while executing a database query.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMPCM-01008: Failed to delete installation from RDB. installationId={0}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMPCM-01009: Failed to delete application preference from RDB. preferenceNameId={0}

Cause: The failure to remove the application preference prevents a successful removal of the application

Action: The RDB administrator needs to manually remove the affected rows.

Level: 1
Type: ERROR

EPMP-01010: Failed to delete preference name from RDB. preferenceNameId={0}

Cause: The failure to remove the application preference prevents a successful removal of the application

Action: The RDB administrator needs to manually remove the affected rows.

Level: 1
Type: ERROR

EPMP-01011: Preference name "{0}" is not found in the database. Check HPM_PREFERENCE_NAME table.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-01012: There are more than one property with name "{0}". Using first value only.

Cause:

Action:

Level: 1
Type: NOTIFICATION

EPMP-01013: Error loading dimension member properties for dimPropId: {0}, cubeType: {1}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-01014: Error loading dimension properties for dimId: {0}, cubeType: {1}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-01015: Error loading dimension members

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-01016: Error loading installation with id:{0}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-01017: Error loading installations

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-01018: Error loading dimension member group with dimension members {0}

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-01019: No driver found for rule based assignment source ""{0}""

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMP-01020: No driver found for assignment source ""{0}""

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMP-01021: Error saving importDbConnection ""{0}""

Cause: A database error occurred while saving the Import Configuration.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-01022: Error saving installation ""{0}""

Cause: A database error occurred while saving information about the installation.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-01023: Error saving preference ""{0}""

Cause: A database error occurred while saving a preference.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-01024: Duplicate name.

Cause: The Data Entry view name already exists.
Action: Use a different name for the data entry view.
Level: 1
Type: ERROR

EPMP-01025: Dimension member group #0 has more than one associated driver.

Cause: The Dimension Member tuple is associated with more than one driver.
Action: Remove driver associations from the Dimension Member tuple so that only one remains.
Level: 1

Type: ERROR

EPMPCM-01027: More than one driver dimension found

Cause: Multiple dimensions are designated as the Driver dimension for the stage.

Action: Delete the stage and recreate it so that it has only a single Driver dimension.

Level: 1

Type: ERROR

EPMPCM-01029: Exception when trying to open a connection.

Cause: Unable to connect to the profitability database.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-01036: Exception when getting application: ""{0}"".

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-01037: Dimension with id "{0}" not found in application.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-01038: SQL Error: {0}

Cause: A database error has occurred during the execution of a SQL statement.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-01039: Dimension property ""{0}"" not found.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-01040: Exception when loading Stage Balancing view. More than one view found for application.

Cause: There are multiple references for the Stage Balance view within the Profitability Temporary Objects metadata.

Action: Contact Oracle Support for assistance.

Level: 1

Type: ERROR

EPMPCM-01041: Exception when getting stage for application ""{0}""

Cause: The stages defined for the application are missing or invalid.

Action: Recreate the stages for the application.

Level: 1

Type: ERROR

EPMP-01042: The driver selection is not found

Cause: An error occurred while saving or loading a Driver Selection.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-01043: The assignment rule is not found

Cause: An error occurred while saving or loading an Assignment Rule.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-01044: Mandatory property ""{0}"" not found.

Cause: An error occurred during the save or load of a Program Rule.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02000: Unexpected error from Essbase.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02001: Essbase Database Not Found.

Cause: The Essbase application could not be found.

Action: If the Essbase application was removed you will need to recreate it using the appropriate deploy database operation from within Profitability.

Level: 1

Type: ERROR

EPMP-02002: Cannot connect to Essbase Server.

Cause: The Essbase server cannot be accessed.

Action: Restart the Essbase server and verify that it is accessible.

Level: 1

Type: ERROR

EPMP-02003: Error disconnecting from Essbase Server.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-02004: Error setting base member ""{0}"" for member: ""{1}""

Cause: An error occurred during an update of the essbase database.

Action: Verify that the dimension for the member is correct in the cube.

Level: 1

Type: ERROR

EPMPCM-02005: Application or database name is null

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02007: Could not create alias table ""{0}""

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02008: Error creating application ""{0}"" on the Essbase server

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02009: Unexpected attribute type: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02010: Error creating database ""{0}"" on the Essbase server

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02011: Error creating dimension ""{0}""

Cause: An error occurred while trying to create a dimension in Essbase.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02012: Error deleting application ""{0}"" in Essbase

Cause: An error occurred while trying to delete an Essbase application.

Action: Verify that the Essbase application is not locked. You may also need to restart the Essbase service. Refer to the server logs for more information

Level: 1

Type: ERROR

EPMPCM-02013: Error associating base dim ""{0}"" to attribute dimension ""{1}""

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02014: Error creating attribute dimension ""{0}""

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02015: Error saving outline

Cause: An error occurred while saving an Essbase outline.

Action: Verify that the Essbase outline is not locked. You may also need to restart the Essbase service. Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02016: Error getting list of applications from the server

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02017: Error getting list of databases from the server

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information

Level: 1

Type: ERROR

EPMP-02018: Error opening outline

Cause: An error occurred while opening an Essbase outline.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02019: Outline not set

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02020: Cannot set outline auto configure property

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02022: Error copying object ""{0}"" to the server.

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02023: Error deleting object ""{0}""

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02024: Error running calculation script ""{0}""

Cause: An error occurred while running a profitability calculation script.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02025: Error loading file ""{0}"" from server

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02027: Error validating script: ""{0}""

Cause: The calculation script has errors.

Action: Verify the contents of the calculation script located on the Essbase server. Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02028: Error executing script: ""{0}""

Cause: An error occurred during the execution of a calculation script.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02031: Error getting information for file ""{0}"" of type ""{1}""

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02032: Cannot remove Essbase Databases for application removal.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-02033: Failed to set cube as active, error code {0}

Cause: An error has occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02034: Failed to begin update in Essbase, error code {0}

Cause: An error has occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02035: Failed to finish update in Essbase, error code {0}

Cause: An error has occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02036: Failed to send data to Essbase, error code {0}

Cause: An error has occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02037: Not connected to Essbase

Cause: Unable to access the Essbase server.

Action: Verify that the Essbase server is available and restart it if necessary. Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02038: Error running MDX query.

Cause: An error occurred while running an MDX query in Essbase.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02039: Mdx result contains more than one value

Cause: An MDX query returned an invalid result.

Action: Contact Oracle Support for assistance.

Level: 1

Type: ERROR

EPMPCM-02040: Error setting root member to dynamic calc for dimension {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02041: Error setting ess dimension in MBDimension

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02042: Error setting root member formula: {0} for dimension: {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02043: Error setting hierarchy {0} to dynamic

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02044: Error setting alias for root member of dimension: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02045: Error setting UDA: {0} for root member of dimension: {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02046: Error setting consolidation type for member: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02047: Error setting formula for member: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02048: Error adding child: {0} to member: {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02049: Error setting member solve order for member: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPKM-02050: Error updating property values for member: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02051: Error setting dynamic calc for member: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02052: Error setting member property share option to {0} for member: {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02053: Error getting parent name

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02054: Possible duplicate attribute member: {0} found in the same attribute dimension: {1}.

This is not supported.

Cause: Multiple members in the Attribute dimension have the same name.

Action: Remove the redundant members in the Attribute dimension from the source so that each member has a unique name. Then redeploy the profitability application and retry the operation.

Level: 1

Type: ERROR

EPMP-02055: Appropriate attribute member: {0} not found in the attribute dimension: {1}

Cause: The Essbase outline has invalid references.

Action: Verify that the source profitability application dimension model is valid and redeploy. Then retry the operation.

Level: 1

Type: ERROR

EPMP-02056: Error associating attribute member: {0} to base member: {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-02057: Error setting alias for member: {0}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02058: Error setting UDA: {0} for member: {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02059: Error setting two pass calc to {0} for member {1}

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02060: Error setting hierarchy type for member: {0} to: {1} | -----

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02061: Cube is null

Cause: An error occurred while accessing the Essbase cube

Action: Verify that Essbase is available and restart if necessary. Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02062: An error occurred during outline creation

Cause: An error occurred while creating the Essbase outline.

Action: Verify that the outline for the application is not locked within Essbase and restart Essbase if necessary. Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02063: Traceability error

Cause: The Traceability graph generated an invalid MDX query.

Action: Contact Oracle Support for assistance.

Level: 1

Type: ERROR

EPMPCM-02064: Error deleting alias tables

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02065: Error deleting alias tables

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02066: Error cleaning dimension

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02067: Error getting Traceability nodes.

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02068: Error getting Traceability stages.

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02069: Error loading data into Essbase.

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02070: Error trying to connect to Essbase.

Cause: An error occurred while trying to connect to Essbase

Action: Verify that Essbase is available and restart the Essbase service if necessary.

Level: 1

Type: ERROR

EPMPCM-02071: Error adding child: {0} to root member of dimension: {1}.

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02072: Not possible to restore data. Some dimension was removed from Essbase cube or new dimension was added to Essbase cube after last backup.

Cause: A dimension was added or removed from the Essbase cube after the most recent backup.

Action: Redeploy the Essbase cube from within Profitability so that it matches the Profitability dimension model.

Level: 1

Type: ERROR

EPMPCM-02073: Incorrect file name : "{0}".

Cause: An error occurred during an Essbase operation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02074: Incorrect outline structure. Some of dimensions should be dense and have actual size less or equal then {0} for successful export.

Cause: The Dimension Storage Type for some dimensions in the outline is incorrect.

Action: Correct the Dimension Storage Type for dimensions and redeploy the dimension model to profitability. Then retry the operation.

Level: 1

Type: ERROR

EPMPCM-02075: Number of errors that occurred during loading data in cube "{0}" of application "{1}" equals {2}.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-02076: Import failed. Essbase cube: "{0}"; Essbase application: "{1}".

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02077: Export failed. Essbase cube: "{0}"; Essbase application: "{1}".

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02078: Error deleting Essbase artifacts: {0}.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02079: An attempt to get application locale has failed. Essbase application: "{0}".

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-02080: Export has not been performed. The reporting cube has no data. Essbase cube: "{0}"; Essbase application: "{1}".

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-02081: Import has not been performed. Data file is not found. Essbase cube: "{0}"; Essbase application: "{1}".

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-02082: Artifacts deletion has not been performed. Data file is not found. Essbase cube: "{0}"; Essbase application: "{1}".

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-02084: Essbase Registry error.

Cause: The Essbase Registry is either invalid or not available.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02085: Error setting comment for member: {0} to: {1}

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02100: Essbase error: {0}.

Cause: An Essbase exception occurred.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-02110: Concurrent Calculation is on but calculation scripts were generated for non-concurrent calculation. Regenerate calculation scripts or turn off Concurrent Calculation.

Cause: There is an incompatibility between the Concurrent Calculation option and the Calculation Script generation

Action: Regenerate the Calculation Scripts or turn off Concurrent Calculation.

Level: 1

Type: ERROR

EPMPCM-02111: Concurrent Calculation is off but calculation scripts were generated for concurrent calculation. Re-generate calculation scripts or turn on Concurrent Calculation.

Cause: The Concurrent Calculation option is not compatible with the calculation script generation.

Action: Re-generate calculation scripts or turn on Concurrent Calculation.

Level: 1

Type: ERROR

Level: 1
Type: NOTIFICATION

EPMP-03035: Error occurred while removing serialization execution rights

Cause: An issue with the database set up and configuration
Action: Review specific message and contact the DBA for your system.
Cause: Internal implementation error.
Action: Contact Oracle Support and provide this error message.
Level: 1
Type: ERROR

EPMP-04000: Unexpected error in business logic.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-04002: Driver selection already exists.

Cause: The Driver selection is already defined for the dimension tuple.
Action: No action is necessary.
Level: 1
Type: ERROR

EPMP-04003: Unsupported xml encoding in assignment rule.

Cause: The assignment rule is invalid.
Action: Delete the assignment rule and recreate it.
Level: 1
Type: ERROR

EPMP-04004: Application does not exist: {0}.

Cause: The selected profitability application does not exist.
Action: Choose a different profitability application for the operation.
Level: 1
Type: ERROR

EPMP-04005: Stage id {0} is not found.

Cause: The selected stage does not exist. It was possibly deleted in a separate session.
Action: Navigate away from the page and then return to refresh the stages. It may also be necessary to logout of the profitability application and then log back in.
Level: 1

Type: ERROR

EPMPCM-04007: Driver formula is missing.

Cause: The formula for the driver is empty or invalid.

Action: Review the driver formula for errors.

Level: 1

Type: ERROR

EPMPCM-04008: Validation failed for the following rules: {0}.

Cause: The error cause is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-04009: The formula provided has incorrect number of variables. Expected: {0}, found: {1}.

Cause: The formula has an incorrect number of variables.

Action: Edit the formula to remove the invalid variables.

Level: 1

Type: ERROR

EPMPCM-04010: Template contains unequal variables with the same name: {0} and {1}.

Cause: The formula contains 2 variables of the same name but with different attributes.

Action: Edit the formula to remove the invalid variables.

Level: 1

Type: ERROR

EPMPCM-04011: Dimension member id {0} is not found.

Cause: A referenced Dimension Member no longer exists.

Action: Redeploy the application.

Level: 1

Type: ERROR

EPMPCM-04012: Driver ""{0}"" has no layer selected.

Cause: The defined driver is invalid.

Action: Delete and recreate the driver.

Level: 1

Type: ERROR

EPMPCM-04013: Incorrect filter type: {0}

Cause: A Driver filter is invalid.

Action: Delete and recreate the filter.

Level: 1

Type: ERROR

EPMPCM-04014: It is not allowed to start import for target application with appld = {0} in the context of application with appld = {1}

Cause: You are trying to run an import for an application that is different than the application in which you are currently active

Action: Navigate to the appropriate application and run the import from there.

Level: 1

Type: ERROR

EPMP-04015: More than one measure dimension found.

Cause: The dimension model for this application has multiple dimensions of type Measure.

Action: Edit the model source for this application and remove the redundant Measure dimensions. Then redeploy the application.

Level: 1

Type: ERROR

EPMP-04016: No Valid Assignment Value.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-04017: Error creating SQL Server document.

Type: NOTIFICATION

EPMPCM-04038: Begin processing import artifact: ""{0}"".

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-04039: Done processing import artifact: ""{0}"".

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-04040: Assignment is not found.

Cause: The selected Assignment no longer exists. It is possible that it was deleted in another session.

Action: Select a different assignment for the operation.

Level: 1

Type: ERROR

EPMPCM-04041: This assignment rule was used in Bulk Edit to create driver exceptions or assignment rule selections. It cannot be deleted until those references are deleted first. You can use the assignment rule again in a bulk edit deletion operation to remove them if they are no longer needed.

Cause: The selected assignment rule was used to create driver exceptions or assignment rule selections.

Action: Delete the driver exceptions and assignment rule selections associated with this Assignment Rule before trying to delete it again.

Level: 1

Type: ERROR

EPMP-04042: The point of view you are trying to edit does not exist.

Cause: The selected point of view no longer exists. It is possible that it was deleted in a separate session.

Action: Select a different point of view for your operation.

Level: 1

Type: ERROR

EPMP-05001: Measure ""{0}"" is not found

Cause: The selected Measure dimension name does not exist in the model.

Action: Choose a different Measure dimension name for the operation.

Level: 1

Type: ERROR

EPMP-05002: Stage Balance View does not exist for application ""{0}"".

Cause: The required permissions have not been granted to the product schema.

Action: Please review the Product Schema section of the HPCM Administrators Guide.

Cause: The tables registered within the Model Data Schema are defined incorrectly.

Action: Please the Model Data Repository validation to identify the source of the issue.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-05003: Error creating Stage Balancing Report query.

Cause: An error occurred while creating the Stage Balancing Report query.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-05004: ERROR: Unable to create Stage Balance View due to inconsistent Data Precision and Scale for Measure columns on the source table ""{0}"".

Cause: The Measure columns on the source table have inconsistent data precision and scale.

Action: Alter the source table so that the Measure columns have consistent data precision and scale and then rerun the operation.

Level: 1

Type: ERROR

EPMP-05005: ERROR: Unable to create Stage Balance View: The Source Stage table ""{0}"" requires the SELECT privilege "with grant option".

Cause: The source stage table in the Data Model schema has not been granted to the Profitability product schema with the grant option.

Action: Grant select on the source stage table in the Data Model schema to the profitability Product schema with grant option.

Level: 1

Type: ERROR

EPMPCM-05006: Warning: Potential problem for Stage Balance View creation: The HPCM Product User may not have the ""{0}"" privilege on the Model Data schema.

Cause: The profitability Product schema does not have the required privilege for the Model Data schema.

Action: Grant the privilege to profitability Product schema and retry the operation.

Level: 1

Type: ERROR

EPMPCM-05007: Warning: Potential problem for Stage Balance View creation: The HPCM Product User may not have the Create View privilege.

Cause: The profitability Product schema does not have the Create View privilege.

Action: Grant the Create View privilege to the Product schema.

Level: 1

Type: ERROR

EPMPCM-05008: ERROR: Cannot calculate Destination Measure Balances.

Cause: A database error occurred while attempting to create the Stage Balance view.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-05009: Point of View was deleted by another user

Cause: Trying to delete POV group which is not present

Action: Refresh the screen

Level: 1

Type: ERROR

EPMPCM-06000: Validation failed.

Cause: The cause of the error is unknown.

Action: Contact Oracle support for more information

Level: 1

Type: ERROR

EPMPCM-06001: Assignment rule validation successful.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-06002: Stage is not found: {0}.

Cause: The Assignment Rule definition is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06003: Dimension is not found: {0}.

Cause: The Assignment Rule definition is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06004: Dimension member is not found: {0}.

Cause: The Assignment Rule definition is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06005: Attribute is not found: {0}.

Cause: The Assignment Rule definition is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06006: UDA is not found: {0}.

Cause: The Assignment Rule definition is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06007: Assignment rule validation started.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-06008: Assignment rule validation finished.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-06009: Dimension member does not exist in the destination dimension at level 0. Dimension Member: {0}. Destination Dimension : {1}.

Cause: A Dimension Member referenced in the Assignment Rule no longer exists.

Action: Resave the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06010: Dimension is not part of the source stage: {0}. Dimension Name: {1}.

Cause: The Assignment Rule is invalid.

Action: Delete and re-create the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06011: Unexpected number of dimensions: {0}. Destination stage has {1} dimension(s).

Cause: The Assignment Rule is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMPCM-06012: Point of View already exists.

Cause: The selected point of view already exists.

Action: No action is necessary.

Level: 1

Type: ERROR

EPMPCM-06013: Duplicate assignment.

Cause: The selected assignment already exists.

Action: No action is necessary.

Level: 1

Type: ERROR

EPMPCM-06014: Duplicate driver name: {0}

Cause: The driver already exists.

Action: No action is necessary.

Level: 1

Type: ERROR

EPMPCM-06015: Invalid assignment: destination cannot be the same as source.

Cause: The source and destination stage for an assignment cannot be the same stage.

Action: Select a different destination or source stage and save the assignment.

Level: 1

Type: ERROR

EPMPCM-06016: Assignment rule selection cannot be saved. Cause: The source node context selected has explicit assignments defined.

Cause: The selected source node context has explicit assignments.

Action: Delete the explicit assignments for the selected source node and then save the Assignment.

Level: 1

Type: ERROR

EPMPCM-06017: Assignment cannot be saved. Cause: There are assignment rule selections already defined.

Cause: Assignment Rule Selections and explicit Assignments cannot both exist for the same Stage, Dimension Members and Point of View combination.

Action: Remove the Assignments or Assignment Rule Selections and re-try the save.

Level: 1

Type: ERROR

EPMPCM-06018: Duplicate assignment rule name: {0}

Cause: The Assignment Rule name already exists.

Action: Use a different name and try the save again.

Level: 1

Type: ERROR

EPMPCM-06019: Dimension member group #{0} has more than one associated driver.

Cause: The dimension tuple has multiple associations for the same Driver name.

Action: Remove the redundant driver associations for the dimension member tuple.

Level: 1
Type: ERROR

EPMPCM-06020: Duplicate stage name: {0}

Cause: The stage name already exists.
Action: Choose a different name for the stage.
Level: 1
Type: ERROR

EPMPCM-06021: Stage does not have dimensions: {0}

Cause: A Stage must have at least one dimension to be valid.
Action: Add at least one dimension to the stage before attempting to save the stage definition.
Level: 1
Type: ERROR

EPMPCM-06022: Validation of staging credentials failed.

Cause: The connection information to the stage schema is invalid.
Action: Provide valid connection information to the stage schema and retry the operation.
Level: 1
Type: ERROR

EPMPCM-06042: Assignment rule for the first stage is not allowed.

Cause: The Assignment Rule is defined on the first stage.
Action: Delete the Assignment Rule and recreate it on a stage that is not the first stage.
Level: 1
Type: ERROR

EPMPCM-06043: Cannot open contribution report from stage "{0}" to "{0}" because the stage does not support intrastage allocations.

Cause: The stage has incorrect intrastage designation.
Action: Edit the stage so that it has the correct intrastage designation.
Level: 1
Type: ERROR

EPMPCM-06044: Duplicate table name: {0}

Cause: The table name is already registered for the profitability application.
Action: Choose a different name for the table registration.
Level: 1
Type: ERROR

EPMPCM-06045: Duplicate calculation rule name "{0}"

Cause: The calculation rule name already exists.
Action: Choose a different name for the Calculation Rule.
Level: 1
Type: ERROR

EPMPCM-06046: Validation of calculation rule "{0}" failed. The length of description should be less than 255 characters

Cause: The description for the Calculation Rule is greater than 255 characters.
Action: Limit the description to less than or equal to 255 characters for the Calculation Rule.

Level: 1
Type: ERROR

EPMPCM-06047: Validation of calculation rule "{0}" failed. The length of tag should be less than 255 characters

Cause: The import file has illegal tags for the calculation rule. This can occur when the import file has been manually modified.

Action: Re-export the calculation rule from the source application and then try the import again.

Level: 1
Type: ERROR

EPMPCM-06048: Validation of calculation rule "{0}" failed. The calculation sequence should be greater than 1 and less than or equal to 9999.

Cause: The calculation sequence for the calculation rule in the import file has invalid values. This can occur when the import file is manually modified.

Action: Re-export the calculation rule from the source application and re-try the import.

Level: 1
Type: ERROR

EPMPCM-06049: Validation of calculation rule "{0}" failed. The pov dimension members are not valid.

Cause: The point of view selected for the Calculation Rule does not exist.

Action: Create the missing point of view and retry the operation.

Level: 1
Type: ERROR

EPMPCM-06050: Validation of driver "{0}" failed. Driver basis type is null or empty.

Cause: The Driver does not have a basis type.

Action: Edit the Driver so that it has a basis type and save it. Then retry the operation.

Level: 1
Type: ERROR

EPMPCM-06061: There are assignments of the rule on the stage {0}. You must set a stage that occurs after the stage {0}.

Cause: You are trying to change the stage for the assignment rule to a stage that is not allowed.

Action: Use a different stage with an order that occurs after the source stage and retry the operation.

Level: 1
Type: ERROR

EPMPCM-06064: Column used in a data filter does not have a valid registration: {0}

Cause: The data filter on the assignment rule is invalid.

Action: Delete and recreate the data filter for the assignment rule.

Level: 1
Type: ERROR

EPMP-06065: Duplicate Rule name. Calculation Program Rule name {0} already exists for the current Point of View

Cause: Saving a Rule with a name that already exists for another Rule in the same Point of View.

Action: Change the Rule name.

Level: 1

Type: ERROR

EPMP-06066: Invalid assignment rule ""{0}"" selection. Dimension member does not exist in the destination dimension at level 0. Dimension Member: {1}. Destination Dimension : {2}.

Cause: A Dimension member referenced in the Assignment Rule no longer exists.

Action: Resave the Assignment Rule.

Level: 1

Type: ERROR

EPMP-06067: Same as source dimension ""{0}"" is not found in the previous stages.

Cause: The Assignment Rule is invalid.

Action: Delete and recreate the Assignment Rule.

Level: 1

Type: ERROR

EPMP-06068: Unknown calculation rules type "{0}"

Cause: The Calculation Rule defined in the import file is invalid.

Action: Export the Calculation Rules from the source system again and retry the import.

Level: 1

Type: ERROR

EPMP-06069: Validation of calculation rule "{0}" failed. The driver "{1}" does not exist.

Cause: The driver referenced in the Calculation Rule does not exist.

Action: Create the driver and retry the operation.

Level: 1

Type: ERROR

EPMP-06070: Validation of calculation rule "{0}" failed. The source assignment rule "{1}" is invalid.

Cause: The source assignment rule referenced in the Calculation Rule does not exist.

Action: Create the source assignment rule and re-try the operation.

Level: 1

Type: ERROR

EPMP-06071: Validation of calculation rule "{0}" failed. The destination assignment rule "{1}" is invalid.

Cause: The destination assignment rule referenced in the Calculation Rule does not exist.

Action: Create the destination assignment rule and retry the operation.

Level: 1

Type: ERROR

EPMP-06072: Validation of calculation rule "{0}" failed. There are more than 5 source assignment rules

Cause: The Calculation Rule references more than 5 source assignment rules.

Action: Remove the extra source assignment rules so that a maximum of 5 remain for the Calculation Rule and then retry the operation.

Level: 1

Type: ERROR

EPMPCM-06073: Validation of calculation rule "{0}" failed. There are more than 5 destination assignment rules

Cause: The Calculation Rule references more than 5 destination assignment rules.

Action: Remove the extra source assignment rules so that a maximum of 5 remain for the Calculation Rule and then retry the operation.

Level: 1

Type: ERROR

EPMPCM-06074: Validation of calculation rule "{0}" failed. The driver type "{1}" can not be assigned.

Cause: The Driver type of the assigned driver is not Calculation Measure

Action: Remove the driver from the Calculation Rule.

Level: 1

Type: ERROR

EPMPCM-06075: The calculation rule "{0}" will not be imported as it already exists.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-06076: The import of calculation rule "{0}" failed because it contains two or more drivers which has the same destination measure member.

Cause: The Calculation Rule in the import file is associated with multiple drivers with the same measure member.

Action: In the source for the import file verify that the Calculation Rule is defined correctly, export the Calculation Rule and then retry the import.

Level: 1

Type: ERROR

EPMPCM-06078: The validation of calculation rule "{0}" failed because it contains more than 5 drivers.

Cause: The Calculation Rule contains more than 5 drivers.

Action: Remove the extra drivers and retry the operation.

Level: 1

Type: ERROR

EPMPCM-06079: The POV does not exist.

Cause: The selected point of view does not exist. It is possible that it was deleted in another session.

Action: Choose a different point of view and retry the operation.

Level: 1

Type: ERROR

EPMPCM-06080: The artifact "{0}" is empty.

Cause: The source import file has an entry for an empty artifact.

Action: Export the artifacts from the source system and then retry the import.

Level: 1

Type: ERROR

EPMPCM-06081: The calculation rule ""{0}"" cannot be saved. A calculation rule of type "Calculated Measures" can not refer to the drivers which write to the same destination measure.

Cause: The Calculation Rule references multiple drivers that write to the same destination measure.

Action: Edit the calculation rule so that each referenced driver writes to a different destination measure and then retry the operation.

Level: 1

Type: ERROR

EPMPCM-06083: Validation failed.

Cause: The same as source validation failed for the Assignment Rule.

Action: Alter the assignment rule definition to pass validation.

Cause: Unable to validate the Assignment Rule.

Action: Alter the assignment rule definition to pass validation.

Level: 1

Type: ERROR

EPMPCM-06091: Given Rule is null

Cause: Received an empty Rule object and cannot continue with the process

Action: Review the hpcm.log file for actual cause of the error

Level: 1

Type: ERROR

EPMPCM-06092: Calculation Rule does not exist. It may have been deleted in another session.

Cause: It is possible that the Calculation Rule has been deleted by another user

Action: Refresh the screen and try the operation again

Level: 1

Type: ERROR

EPMPCM-06094: Given Target POV is null

Cause: Received an empty POV object and cannot continue with the process

Action: Review the hpcm.log file for actual cause of the error

Level: 1

Type: ERROR

EPMPCM-06095: Rule Set does not exist. It may have been deleted in another session.

Cause: It is possible that the Rule Set has been deleted by another user

Action: Refresh the screen and try the operation again

Level: 1

Type: ERROR

EPMPCM-06096: The calculation Rule Set "{0}" already exists.

Cause: The given Rule Set name already exists for the POV

Action: Provide another Rule Set name and resubmit the operation

Level: 1

Type: ERROR

EPMPKM-06097: Given Rule Set is null

Cause: Received an empty Rule Set object and cannot continue with the process

Action: Review the hpcm.log file for actual cause of the error

Level: 1

Type: ERROR

EPMPKM-06102: Duplicate Rule Set name. Calculation Program Rule Set {0} already exists for this point of view

Cause: Saving a Rule Set with a name that already exists for another Rule Set in the same point of view.

Action: Change the Rule Set name.

Level: 1

Type: ERROR

EPMPKM-06200: Duplicate import configuration name: "{0}" in application: {1}

Cause: The import configuration name already exists for the application.

Action: Choose a different name for the import configuration.

Level: 1

Type: ERROR

EPMPKM-06300: No dimensions selected for the Model View.

Cause: At least one dimension must be selected to create a model view

Action: Select the dimension before saving the model view

Level: 1

Type: ERROR

EPMPKM-06301: Model View has invalid dimension : {0}

Cause: The dimension that was used in the Model View has been deleted

Action: Review and correct the Model View information

Level: 1

Type: ERROR

EPMPKM-06303: Model View is null.

Cause: Received an empty Model View object and cannot continue with the process

Action: Review the hpcm.log file for actual cause of the error

Level: 1

Type: ERROR

EPMPKM-06305: Model View with name {0} already exists for the current application.

Cause: Saving a Model View with a name that already exists for another Model View in the same Application

Action: Change the Model View name.

Level: 1

Type: ERROR

EPMPKM-06400: No POV dimension member group found.

Cause: The selected point of view does not exist.

Action: Select a different point of view.

Level: 1
Type: ERROR

EPMPCM-06401: Source measures dimension member is null or empty.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-06402: Source measures dimension member not found.

Cause: The source measure dimension member does not exist. It is possible that it was deleted from the model.
Action: Retry the operation.
Level: 1
Type: ERROR

EPMPCM-06501: The dimension "{0}" no longer exists in the application.

Cause: A dimension that existed when the Smart View query was created no longer exists.
Action: Edit the Smart View query to remove the invalid dimension and retry the operation.
Level: 1
Type: ERROR

EPMPCM-06502: The member "{0}" no longer exists in the dimension "{1}".

Cause: A dimension member referenced in the Smart View query no longer exists.
Action: Remove the member from the Smart View query and retry the operation.
Level: 1
Type: ERROR

EPMPCM-06503: The query does not contain any selection for the dimension "{0}".

Cause: A dimension in the Smart View query has no member selection.
Action: Select a member for the dimension and retry the operation.
Level: 1
Type: ERROR

EPMPCM-06504: Duplicate query name: {0}.

Cause: The Smart View query name already exists.
Action: Choose a new name.
Level: 1
Type: ERROR

EPMPCM-06601: There are no dimensions of type "Point of View" defined for this application. An application must have at least 1 Point of View dimension.

Cause: The dimension model being deployed does not have any Point of View dimensions.
Action: Add at least one Point of View dimension to the model source and redeploy the application.
Level: 1
Type: ERROR

EPMPCM-06602: Point of View dimension order is incorrectly defined. Point of View dimensions must have a POV dimension order of 1-4 with out any gaps.

Cause: The Point of View dimensions in the model view source do not have consecutive order values.

Action: Edit the order for the Point of View dimensions in the model source so that the order is consecutive from 1-4 with no gaps.

Level: 1

Type: ERROR

EPMPCM-06603: The "{0}" dimension does not have the member NoMember as the last generation 2 member.

Cause: The last generation 2 member of the dimension is not named NoMember.

Action: Edit the dimension so that the last generation 2 member is named NoMember and redeploy the application.

Level: 1

Type: ERROR

EPMPCM-06604: There are no business dimensions defined for this application.

Cause: The application being deployed does not have any dimensions designated as business dimensions.

Action: Edit the model source so that there is at least one business dimension for the application and redeploy.

Level: 1

Type: ERROR

EPMPCM-06605: The dimension "{0}" has shared or duplicate members inside the primary hierarchy. The duplicate member names are "{1}"

Cause: The first generation 2 member of the dimension is considered the primary hierarchy and cannot have any shared or duplicate members.

Action: Edit the first generation 2 member of the dimension so that there are no shared or duplicate members and redeploy the application.

Level: 1

Type: ERROR

EPMPCM-06606: Dimension "{0}" was selected to deploy but does not have a DIMTYPE user defined attribute specified for it.

Cause: You have selected a dimension to deploy that does not have a Dimension Type designated for it in the Essbase Master cube.

Action: Assign one of the allowed Dimension Type values as a User Defined Attribute for the dimension and redeploy the application.

Level: 1

Type: ERROR

EPMPCM-06607: Application "{0}" does not have a single Measures type dimension.

Cause: The application being deployed does not have a dimension of type Measure.

Action: Edit the Essbase Master cube so that one dimension has been designated with the Measure Dimension Type and redeploy the application.

Level: 1

Type: ERROR

EPMPKM-06608: Application "{0}" does not have a single Allocation Type dimension.

Cause: The application being deployed does not have a dimension of type Allocation Type.

Action: Edit the Essbase Master cube so that one dimension has been designated with the Allocation Type Dimension Type and redeploy the application.

Level: 1

Type: ERROR

EPMPKM-06609: Application with name "{0}" already exists.

Cause: The application name being deployed already exists.

Action: Choose a different application name for the application deploy.

Level: 1

Type: ERROR

EPMPKM-06610: Invalid application name: "{0}".

Cause: The application name selected for deploy is null or blank.

Action: Specify a non-blank application name for the deploy.

Level: 1

Type: ERROR

EPMPKM-06611: Multiple Point of View dimensions share the same Point of View dimension order.

Cause: Multiple dimensions within the Essbase Master cube have been designated with the same Point of View order.

Action: Verify that each of the Point of View dimensions in the Essbase Master cube has a unique order value as part of the Dimension Type assigned to it and redeploy the application.

Level: 1

Type: ERROR

EPMPKM-06612: The Point of View dimension "{0}" is already deployed with a Point of View order number that does not match the number in this deploy.

Cause: The Point of View order for the Dimension in the Essbase Master cube does not match the Point of View order of the Dimension when it was originally deployed.

Action: Edit the Point of View order for the Dimension in the Essbase Master cube so that it matches the order of the dimension that is deployed.

Level: 1

Type: ERROR

EPMPKM-06613: Dimension "{0}" does not have a user defined Dimension Type attribute defined for it in Essbase.

Cause: The Dimension selected to be deployed does not have a Dimension Type designation.

Action: Assign the Dimension a Dimension Type User Defined Attribute in the Essbase Master cube and redeploy the application.

Level: 1

Type: ERROR

EPMPKM-06614: The deployed Dimension Type for Dimension "{0}" does not match the dimension type of this dimension in the Essbase Master Cube.

Cause: The Dimension Type of the Dimension in the Essbase Master cube does not match the Dimension Type in the deployed application.

Action: Edit the Dimension in the Essbase Master cube so that the assigned Dimension Type matches the Dimension Type in the deployed application.

Level: 1

Type: ERROR

EPMPCM-06615: Dimension "{0}" is not valid in this application because dimensions of type "AllocationType" are not valid in an application of type "Profitability-Detail".

Cause: You have selected a Dimension of type Allocation Type to deploy for a Detailed Profitability application.

Action: Do not select Dimensions of type Allocation Type when deploying a Detailed Profitability application.

Level: 1

Type: ERROR

EPMPCM-06616: The following Point of View members became non-Level 0 but are used in defined Point of Views: "{0}". Please delete the Point of Views before redeploying.

Cause: Members in Point of View dimensions in the Essbase Master cube have changed level such that they invalidate existing Point of Views defined in the profitability application.

Action: Delete the Point of Views defined in the profitability application that reference members that have changed level in the Essbase Master cube.

Level: 1

Type: ERROR

EPMPCM-06617: The following Point of View members are being deleted but are used in defined Point of Views: "{0}". Please delete the Point of Views before redeploying.

Cause: Members in Point of View dimensions in the Essbase Master cube that are referenced in existing Point of Views in the application have been removed.

Action: Delete the Point of Views defined in the profitability application that reference members that have been removed in the Essbase Master cube.

Level: 1

Type: ERROR

EPMPCM-06618: Cannot delete dimension members "{0}" which belong to the source or destination measures dimension and where there are existing drivers defined that reference one of those members. To delete these members, first delete all existing Drivers that reference the members and then redeploy the application.

Cause: Measure members referenced in drivers have been removed from the Essbase Master cube.

Action: Delete drivers that reference removed Measure Members from the application.

Level: 1

Type: ERROR

EPMPCM-06619: Dimension Name "{0}" is invalid. The first character of the name must be a letter.

Cause: A Dimension from the Essbase Master cube with an invalid name has been selected for deploy.

Action: Edit the Dimension in the Essbase Master cube so that the first character of the name is a letter.

Level: 1

Type: ERROR

EPMPCM-06620: Application "{0}" does not have a Rule type dimension.

Cause: Essbase Master Cube does not have a Rule type dimension

Action: Create a dimension of Rule type and redeploy the application

Level: 1

Type: ERROR

EPMPCM-06621: Application "{0}" does not have a Balance type dimension.

Cause: Essbase Master Cube does not have a Balance type dimension

Action: Create a dimension of Balance type and redeploy the application

Level: 1

Type: ERROR

EPMPCM-06622: The dimension "{0}" has duplicate members. The duplicate member names are "{1}"

Cause: The Master cube has duplicate dimension member names for a dimension.

Action: Remove the duplicate member names and re-try the application deploy.

Level: 1

Type: ERROR

EPMPCM-06630: Dimension {0} in the Source for Rule {1} does not have a member selected.

Cause: All dimensions must be selected with at least one member before enabling the Rule

Action: Select the above dimension.

Level: 1

Type: ERROR

EPMPCM-06631: Dimension {0} in the Destination for Rule {1} does not have a member selected.

Cause: All dimensions must be selected with at least one member before enabling the Rule

Action: Select the above dimension.

Level: 1

Type: ERROR

EPMPCM-06632: Offset for Rule {0} does not have a Level 0 member selected for at least one dimension.

Cause: At least one level 0 member must be selected to use the offset functionality

Action: Select a level 0 member.

Level: 1

Type: ERROR

EPMPCM-06633: Driver for Rule {0} does not have a member selected for at least one dimension.

Cause: At least one level 0 member must be selected to use the driver functionality

Action: Select a level 0 member.

Level: 1

Type: ERROR

EPMPCM-06636: Following Dimension is no longer available for use:{0}.

Cause: Dimension has been deleted in the Essbase.

Action: Review the Artifact and make necessary changes

Level: 1

Type: ERROR

EPMPCM-06637: Dimension {0} has invalid member {1}.

Cause: One or more Dimension Member(s) have been deleted in the Essbase.

Action: Review the Artifact and make necessary changes

Level: 1

Type: ERROR

EPMPCM-06638: Dimension {0} has invalid non level-0 member {1}.

Cause: Dimension has invalid non level-0 member.

Action: Review the Artifact and make necessary changes

Level: 1

Type: ERROR

EPMPCM-06639: Dimension {0} has one or more invalid Member(s).

Cause: One or more Dimension Member(s) have been deleted in the Essbase.

Action: Review the Artifact and make necessary changes

Level: 1

Type: ERROR

EPMPCM-06640: Warning: The root member for Dimension {0} is set as Label Only, so Member {1} will not consolidate to the top of the dimension.

Cause: Dimension has invalid non Primary Root Hierarchy members.

Action: Review the Artifact and make necessary changes

Level: 1

Type: WARNING

EPMPCM-06641: Dimension {0} is selected in both Rule Set Context and Global Context. To avoid the redundancy, save the Rule Set or remove the member selection from Global Context

Cause: Same dimension is selected in both the Rule Set Context and Global Context

Action: Remove the dimension selection either from the Rule Set Context or the Global Context

Level: 1

Type: ERROR

EPMPCM-06642: The artifact has invalid members

Cause: There are one or more dimensions with invalid members

Action: Review each dimension and select correct dimension members

Level: 1

Type: ERROR

EPMPCM-06643: Dimension {0} is selected in both Rule and Rule Set Context. To avoid the redundancy, save the Rule or remove the Member selection from Rule Set Context

Cause: The same dimension is selected in both the Rule and Rule Set Context

Action: Remove the dimension selection from either the Rule or the Rule Set Context

Level: 1

Type: ERROR

EPMPCM-06644: Dimension {0} is selected in both Rule and Global Context. To avoid the redundancy, save the Rule or remove the Member selection from Global Context

Cause: The same dimension is selected in both the Rule and Global Context

Action: Remove the dimension selection from either the Rule or the Global Context

Level: 1

Type: ERROR

EPMPCM-06645: Artifact has one or more invalid Dimension(s)

Cause: One or more dimensions have been deleted in the Essbase.

Action: Review the Artifact and make necessary changes

Level: 1

Type: ERROR

EPMPCM-06651: Impact Analysis For Dimension "{0}"

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-06652: There are {0} new members in this deployment.

Cause:

EPMPCM-09037: Application not found.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-09038: Unknown artifact: {0}.

Cause: The artifact type being imported is not a valid artifact type for the target application. It is possible that the export file was edited manually thus causing this problem.

Action: Recreate the export file again from the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09039: Parsing artifact query failed.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-09040: Incorrect format of input file on line: {0}.

Cause: The source file being imported is invalid.

Action: Recreate the import file by exporting the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09041: Error importing drivers

Cause: An error occurred while importing.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-09042: Driver type "{0}" not found

Cause: The Driver entry in the import file has an invalid Driver type for this application.

Action: Create the import file again by reexporting from the source application and retry the operation.

Level: 1

Type: ERROR

EPMP-09043: Artifact stream contains {0} zero bytes.

Cause: The import file is invalid.

Action: Create the import file again by reexporting from the source application and retry the operation.

Level: 1

Type: ERROR

EPMP-09044: Artifact query is empty.

Cause: The import file is invalid.

Action: Create the import file again by reexporting from the source application and retry the operation.

Level: 1

Type: ERROR

EPMP-09045: Cannot get application id from request

Cause: An error occurred during export.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-09046: Error building artifact XML

Cause: An error occurred during export.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-09048: Import of POV "{0}" failed. POV state "{1}" not found.

Cause: The Point of View entry in the source import file has an invalid state assigned to it.

Action: Recreate the import file by exporting from the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09049: Import of driver "{0}" failed. Driver type "{1}" not found.

Cause: The Driver entry in the source import file has an invalid Driver Type assigned to it.

Action: Recreate the import file by exporting from the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09050: Import of driver "{0}" failed. Driver basis type "{1}" not found.

Cause: The Driver entry in the source import file has an invalid Driver Basis Type assigned to it.

Action: Recreate the import file by exporting from the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09051: Import of driver "{0}" failed. Layer "{1}" not found.

Cause: The Driver entry in the source import file has an invalid Layer assigned to it.

Action: Recreate the import file by exporting from the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09052: Import of application preference "{0}" failed. Application preference name not found.

Cause: The Application Preference name referenced in the import source file does not exist in the target application. The Profitability version from which the source import file was created does not match the Profitability version of the target application.

Action: Verify that the Profitability version for the source import file matches the Profitability version of the target application.

Level: 1

Type: ERROR

EPMP-09053: Import of assignment rule "{0}" failed. Stage "{1}" not found.

Cause: The Assignment Rule being imported references a stage that does not exist for the application. It is possible that a previous import of the stages for this application was not successful.

Action: Create the stage required by the Assignment Rule and retry the import.

Level: 1

Type: ERROR

EPMP-09054: Import of stage "{0}" failed. Dimension "{1}" not found.

Cause: The import stage table data refers to a Dimension name that does not exist in the target application.

Action: Correct the dimension name in the stage table data and re-try the import.

Level: 1

Type: ERROR

EPMP-09055: Failed to import {0} out of {1} artifacts.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-09056: Import of driver "{0}" failed. No layer found.

Cause: The Driver entry from the source import file does not have a valid Layer assigned to it.

Action: Recreate the import file by exporting from the source application and then retry the operation.

Level: 1

Type: ERROR

EPMP-09057: Parser error. Bad formatted token: {0}

Cause: The source import file is invalid.

Action: Recreate the import file by exporting from the source application and then retry the operation.

Level: 1

EPMPCM-09126: Attribute dimension member is not found: {0}

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-09127: The next POV members became non level-0 but are used in available POV: {0}. Delete the POV first and try again

Cause: Members referenced in existing Point of Views are now non-level 0 in the source dimension model.

Action: Delete the referenced Point of Views from the application and try the operation again.

Level: 1

Type: ERROR

EPMPCM-09128: You are going to delete POV dimension members "{0}" that are used in available POV. Delete POV first and try again

Cause: Members referenced in existing Point of Views have been deleted from the source dimension model.

Action: Delete the referenced Point of Views from the application and try the operation again.

Level: 1

Type: ERROR

EPMPCM-09129: You are going to delete Point of View dimension(s) "{0}" that are used in defined Point of Views. Delete defined Point of Views first and try again

Cause: The Point of View dimension(s) being deleted are referenced in defined Point of Views.

Action: Delete the defined Point of Views and then re-try the operation.

Level: 1

Type: ERROR

EPMPCM-09130: You are going to add POV dimension(s) "{0}" but there are some already defined POVs. Delete existing POV first and try again

Cause: Existing Point of Views in the application will become invalid due to the Point of View dimension structure changes in the source dimension model.

Action: Delete all of the existing Point of Views from the application and then try the application deploy again.

Level: 1

Type: ERROR

EPMP-09131: You are going to delete dimensions "{0}" that are used in available stages. Delete stages first and try again

Cause: Dimensions used in existing stages in the application have been removed from the source dimension model.

Action: Delete stages that reference the dimensions and then try the application deploy again.

Level: 1

Type: ERROR

EPMP-09132: Dimension(s) "{0}" of type Regular are referenced in existing Point of Views. Delete the Point of Views and try again

Cause: Dimensions marked with the Regular type are used in existing Point of Views for the application.

Action: Delete the existing Point of Views and try the application again again.

EPMPCM-09144: Warning: Driver measure "{0}" is deleted. Driver formulas which referred the measure were updated with default measures.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-09145: Data Entry view [{0}] member "{1}" not found in Model, skipping.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-09146: Error adding Data Entry view [{0}] :

Cause: An exception occurred during the deploy for saving a Data Entry view.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-09147: Error creating standard view:: {0}.

Cause: An exception occurred during the deploy for saving a Data Entry view.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-09148: Exception while posting request to Call Back URL : {0}.

Cause: An error occurred during application deployment.

Action: Verify that the EPMA server is running. It may be necessary to restart it.

Level: 1

Type: ERROR

EPMPCM-09149: You are deleting dimensions "{0}" which are user-defined measures. Delete the user-defined measures in your application first and try again

Cause: You are deleting dimensions in an Application of type Detail that are referenced in a registered table as a Measures dimension.

Action: Reregister the table to remove the Measure dimension references and then try the deploy again.

Level: 1

Type: ERROR

EPMPCM-09150: Application deployment SUCCEEDED. There were Model Data Registration artifacts that were deleted to complete this deployment: {0}

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-09151: Cannot delete dimension members "{0}" which belong to the source or destination measures dimension and where there are existing drivers defined. To delete these members, first delete all existing Drivers in your application and then redeploy the application. Any existing model data registrations of deleted measure members will be removed automatically by the deploy.

Cause: You are deleting dimension members referenced in existing Drivers.

Action: Delete the existing drivers that reference the dimension members and try the application deploy again.

Level: 1

Type: ERROR

EPMPCM-09152: Cannot delete dimensions "{0}" because they are registered in Table Registration.

Cause: Dimensions referenced in table registration are being deleted.

Action: Reregister the tables to remove the references to the dimensions and try the application deploy again.

Level: 1

Type: ERROR

EPMPCM-09153: Cannot deploy because attribute dimension names "{0}" have an invalid first character. Only lowercase and uppercase letters can be used as the first character for an attribute dimension name.

Cause: The attribute dimension names have an invalid first character.

Action: Correct the attribute dimension name first character to be a lowercase or uppercase letter.

Level: 1

Type: ERROR

EPMPCM-09154: Application is not an Enterprise Performance Management Architect application. Skipping data synchronization.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMPCM-09155: Performing post deployment activities.

Cause:

EPMPCM-09991: an error processing the given property

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-09992: Import of POV "{0}" failed. Any POV member from "{1}" not found.

Cause: An error occurred during Point of View import.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-10000: No Assignment Rule found for the following parameters: "{0}"

Cause: The Assignment Rule is invalid.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-10001: The Assignment Rule "{0}" doesn't have any Dimension Selection

Cause: The Assignment Rule does not have any Dimension selection.

Action: Edit the Assignment Rule and add a dimension selection. Then retry the operation.

Level: 1

Type: ERROR

EPMPCM-10002: The Assignment Rule has a Filter type "{0}" that can not be supported by the Detail Profitability Engine

Cause: The Filter Type for the Assignment Rule is invalid for Detailed Profitability.

Action: Delete the invalid filter for the Assignment Rule and retry the operation.

Level: 1

Type: ERROR

EPMPCM-10003: Calculation process definition missing for the current period and layer

Cause: Calculation Process seeded data is missing from the Profitability database for this application.

Action: Redeploy the application and retry the operation.

Level: 1

Type: ERROR

EPMPCM-10004: Stage table is not registered for Detailed Profitability application.

Cause: A table referenced in a stage is no longer registered in the Profitability application.

Action: Reregister the table and then try the operation again.

Level: 1

Type: ERROR

EPMPCM-10100: The destination table must have a primary key constraint.

Cause: The table being registered does not have a primary key constraint.

Action: Create a primary key constraint for the table and retry the registration.

Level: 1

Type: ERROR

EPMPCM-10101: The WORKING column must be present on the destination table.

Cause: The destination table does not have a column named WORKING of numeric data type.

Action: Add a column named WORKING with a numeric data type to the table and reregister the table.

Level: 1

Type: ERROR

EPMPCM-10102: The WORKING column on the destination table must be numeric datatype.

Cause: The WORKING column on the destination table is not of numeric data type.

Action: Alter the WORKING column on the destination table so that it is numeric data type.

Level: 1

Type: ERROR

EPMPCM-10103: The HPM_POV_DIM_MEM_GRP column must be present on the destination table or the user must register all POV columns on the destination business object.

Cause: The Destination table does not have one of the required Point of View columns.

Action: Add either the HPM_POV_DIM_MEM_GRP column or register all of the Point of View columns on the destination table.

Level: 1

Type: ERROR

EPMPCM-10104: The HPM_POV_DIM_MEM_GRP column on the destination table must be numeric datatype.

Cause: The HPM_POV_DIM_MEM_GRP column on the destination table is not numeric data type.

Action: Alter the HPM_POV_DIM_MEM_GRP column so that it is numeric data type.

Level: 1

Type: ERROR

EPMPCM-10105: The source stage dimension ""{0}"" is no longer registered on the source stage table or the joined lookup tables.

Cause: The dimension referenced on the source stage is not present on the source stage or joined lookup table.

Action: Add the dimension to the source stage table or joined lookup tables and reregister the table.

Level: 1

Type: ERROR

EPMPCM-10106: The destination stage dimension ""{0}"" is no longer registered on the destination stage table or the joined lookup tables.

Cause: The dimension referenced on the destination stage is not present on the destination stage or joined lookup table.

Action: Add the dimension to the destination stage table or joined lookup tables and reregister the table.

Level: 1

Type: ERROR

EPMPCM-10107: The column associated with the dimension ""{0}"" no longer exists on the table.

Cause: A Stage dimension is not referenced on any of the registered business object in Model Data Registration.

Action: Add the dimension to a registered business object in Model Data Registration.

Level: 1

Type: ERROR

EPMPCM-10108: The measure member ""{0}"" is defined more than once on the lookup table ""{1}"" and its joined business object ""{2}.""

Cause: There are multiple references for a Measure dimension member in Model Data Registration for the same lookup table and joined business object

Action: Verify that each measure dimension member is referenced only once for a given lookup table and joined business object.

Level: 1

Type: ERROR

EPMPCM-10109: The dimension ""{0}"" is defined more than once on the lookup table ""{1}"" and its joined business object ""{2}.""

Cause: The same dimension is registered multiple times on a lookup table or its joined business object.

Action: Verify that a each generic dimension is registered only once for a given lookup table or its joined business object.

Level: 1

Type: ERROR

EPMPCM-10110: The stage dimension column ""{0}"" for the destination table or its joined lookup tables must have the same column datatype as the ID column in the HPM_DIMENSION_MEMBER table.

Cause: A registered dimension column on the destination table does not have the correct data type.

Action: Verify that the data type for each registered dimension column on the destination stage table has a data type which is identical to the ID column on the HPM_DIMENSION_MEMBER table.

Level: 1

Type: ERROR

EPMP-10111: The column associated with the measure member ""{0}"" no longer exists on the table.

Cause: A registered measure member column no longer exists on the physical database object used in the Model Data Registration.

Action: Add the missing column to the database object used for that Model Data Registration.

Level: 1

Type: ERROR

EPMP-10115: The HPM_POV_DIM_MEM_GRP column must be present on the source table or the user must register all POV columns on the source business object.

Cause: The Destination table does not have one of the required Point of View columns.

Action: Add either the HPM_POV_DIM_MEM_GRP column or register all of the Point of View columns on the source table.

Level: 1

Type: ERROR

EPMP-10116: The HPM_POV_DIM_MEM_GRP column on the source table must be numeric datatype.

Cause: The data type for the HPM_POV_DIM_MEM_GRP column on the source table is invalid.

Action: Alter the source table so that the HPM_POV_DIM_MEM_GRP column has a numeric datatype.

Level: 1

Type: ERROR

EPMP-10117: The HPM_POV_DIM_MEM_GRP column on the source table must be numeric datatype.

Cause: The HPM_POV_DIM_MEM_GRP column on the source table is not numeric data type.

Action: Alter the HPM_POV_DIM_MEM_GRP column on the source table so that it is numeric data type.

Level: 1

Type: ERROR

EPMP-10118: Dimension ""{0}"" of the source stage must be registered upon the table associated with the source stage.

Cause: A dimension on the source stage is not registered on the source table for that stage.

Action: Register all dimensions of the source stage on the source table.

Level: 1

Type: ERROR

EPMP-10119: Source stage must have a stage table associated with it.

Cause: The Source stage does not have an associated Source table.

Action: Edit the Source stage so that it has an associated Source table.

Level: 1

Type: ERROR

EPMP-10120: Destination stage must have a stage table associated with it.

Cause: The Destination stage does not have a destination table associated with it.

Action: Edit the Destination stage so that it has an associated destination table.

Level: 1
Type: ERROR

EPMPCM-10121: Dimension "{0}" of the destination stage must be registered upon the table associated with the destination stage.

Cause: A dimension from the destination stage is not registered on the destination table.
Action: Verify that all dimensions on the destination stage are registered on the destination table.
Level: 1
Type: ERROR

EPMPCM-10122: Column "{0}" is used as a source stage dimension and is not a part of the source table index.

Cause: A column on the source table is registered as a Dimension column, but is not part of a unique index on that table.
Action: Verify that all columns registered as type Dimension are included in a unique index for the source table.
Level: 1
Type: ERROR

EPMPCM-10123: Column datatype mismatches between joined columns. Column name is "{0}", fact column type is "{1}", lookup column type is "{2}"

Cause: A column name designated as a join column between a lookup table and a fact table does not have the same data type on each table.
Action: Verify that any column name designated as a join column exists on both tables and has the same data type.
Level: 1
Type: ERROR

EPMPCM-10124: There is missing data in the lookup table "{0}" in the column "{1}"

Cause: The fact table that joins with the lookup table reference Lookup values that do not exist in the Lookup table.
Action: Add the missing Lookup values to the Lookup table or delete the rows from the fact table with the incorrect reference.
Level: 1
Type: ERROR

EPMPCM-10125: Unknown error: {0}

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMPCM-10126: One or more measures referenced in a driver formula are not registered. Run Model Validations for Drivers to identify the unregistered measures.

Cause: One or more measure members referenced in a driver formula are not registered in Model Data Registration.
Action: Run Model Validations for Drivers to identify the unregistered measures.
Level: 1

Type: ERROR

EPMPCM-10127: Formula is not valid.

Cause: An exception occurred while reading a driver formula.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-10128: No column on the Destination stage table is registered as a measure column that maps to the Assign To Destination Measure for the Driver ""{0}"".

Cause: The Assign to Destination Measure for a given Driver is not registered as a measure column on the Destination stage table.

Action: Register a measure column on the Destination stage table for the Assign To Destination Measure of the Driver.

Level: 1

Type: ERROR

EPMPCM-10129: Primary key for the Destination stage table is not registered.

Cause: The unique index to be used as the primary key for the Destination stage table is not registered in Model Data Registration.

Action: Edit the registration for the destination table so that an index is designated as the primary key.

Level: 1

Type: ERROR

EPMPCM-10131: Destination table is not defined.

Cause: There is no destination stage table associated with the Destination stage, or the specified destination stage table is no longer registered in Model Data Registration.

Action: Verify that the destination stage has a valid destination stage table.

Level: 1

Type: ERROR

EPMPCM-10132: Exception when creating a synonym {0} for the table {1} in the schema {2}. Error details are: {3}.

Cause: An exception occurred while attempting to create a synonym.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-10133: Cannot find a measure column on the source stage table that matches the measure component "{0}" on the source tuple.

Cause: The source table is missing a Measure column.

Action: Add a column for the missing measure and re-register the source table.

Level: 1

Type: ERROR

EPMPCM-10134: There is a non-synonym database object, i.e. a table or a view with the same name as the synonym being created. Change the synonym name.

Cause: An error occurred while attempting to create a database synonym.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-10135: There is already a synonym with the same name in the database. But the synonym in the database references a wrong database object. It points to the object ""{0}"" in the schema ""{1}"".

Cause: There is an existing synonym of the same name that points to a different database object than the object.

Action: Drop the existing synonym of the specified name and retry the operation.

Level: 1

Type: ERROR

EPMPCM-10136: No jobs found.

Cause: Delete job has been called but no jobs have been specified to be deleted.

Action: Retry the operation and verify that there are jobs selected for delete.

Level: 1

Type: ERROR

EPMPCM-10137: View ""{0}"" is invalid or does not exist.

Cause: A Model Data Registration object references a database view that does not physically exist in the database or has errors.

Action: Verify that the view referenced in the Model Data Registration is a valid view in the database.

Level: 1

Type: ERROR

EPMPCM-10138: View ""{0}"" contains a join. Views with a join in the primary select clause cannot be registered as a Destination table.

Cause: The database view referenced in Model Data Registration contains a join in the primary select clause.

Action: Recreate the view so that there is no join in the primary select clause.

Level: 1

Type: ERROR

EPMPCM-10139: View ""{0}"" contains an illegal keyword. Views with UNION, GROUP BY, DISTINCT, MINUS, EXCEPT and INTERSECT cannot be registered as a Destination table.

Cause: The database view referenced in Model Data Registration contains unsupported keyword or keywords.

Action: Recreate the view so that the unsupported keywords are no longer present in the view definition.

Level: 1

Type: ERROR

EPMPCM-10140: Short Name property value ""{0}"" of dimension ""{1}"" should be unique over existing "Reporting Dimensions".

Cause: The designated short name is assigned to multiple Reporting dimensions for this application.

Action: Assign a unique short name for each Reporting dimension.

Level: 1

Type: ERROR

EPMPCM-10141: Short Name property value ""{0}"" of dimension ""{1}"" should be unique over existing "Attribute Dimensions".

Cause: The designated short name is assigned to multiple Attribute dimensions for this application.

Action: Assign a unique short name for each Attribute dimension.

Level: 1

Type: ERROR

EPMPCM-10142: Destination measure ""{0}"" in the driver definition does not have a valid registration.

Cause: There is no registered column on the destination stage table for a destination measure referenced in a driver.

Action: Register a column for the destination measure on the destination stage table.

Level: 1

Type: ERROR

EPMPCM-10143: Measure member ""{0}"" in the driver formula does not have a valid registration.

Cause: The driver formula references a Measure member name that is not registered for the business object.

Action: Register the Measure member name on the business object specified in the formula.

Level: 1

Type: ERROR

EPMPCM-10147: The dimension ""{0}"" on the source stage table or its joined lookup tables is no longer registered in the dimension model..

Cause: The designated Dimension is no longer present in the dimension model.

Action: Verify that the dimension exists in the dimension model and redeploy the Profitability application.

Level: 1

Type: ERROR

EPMPCM-10148: The dimension ""{0}"" on the destination stage table or its joined lookup tables is no longer registered in the dimension model.

Cause: The designated Dimension is no longer present in the dimension model.

Action: Verify that the dimension exists in the dimension model and redeploy the Profitability application.

Level: 1

Type: ERROR

EPMPCM-10149: No source stage exists. Create a source stage.

Cause: There is no stage defined for the Profitability application.

Action: Define as source and destination stage for the Profitability application.

Level: 1

Type: ERROR

EPMPCM-10150: No destination stage exists. Create a destination stage.

Cause: The Profitability application only has a single stage defined.

Action: Define two stages for the Profitability application. The second stage is the destination stage.

Level: 1

Type: ERROR

EPMPCM-10151: The dimension member ""{0}"" on the source stage table is no longer registered in EPMA.

Cause: A dimension member that maps to a registered column on the source table has since been removed from the Dimension model.

Action: Re-register the source table to remove the invalid column.

Level: 1

Type: ERROR

EPMPCM-10153: The source measure dimension ""{0}"" must be one of the dimensions associated with source stage.

Cause: The Source Measures Dimension specified on Model Data Registration is not a dimension of the Source stage.

Action: Add the dimension to the Source stage.

Level: 1

Type: ERROR

EPMPCM-10155: Registered table column ""{0}"" does not exist in the source table ""{1}."

Cause: A column registered on the source table no longer physically exists on the database table. This can occur when if the column was dropped from the table after model data registration was completed.

Action: Unregister the column from the table using Model Data Registration.

Level: 1

Type: ERROR

EPMPCM-10156: Registered table column ""{0}"" does not exist in the target table ""{1}."

Cause: A column that was registered for a table has since been physically removed from the table in the database.

Action: Re-register the table to remove the invalid column.

Level: 1

Type: ERROR

EPMPCM-10157: Registered table column ""{0}"" does not exist in the lookup table ""{1}."

Cause: A column that was registered for a lookup table has since been physically removed from the table in the database.

Action: Re-register the lookup table to remove the invalid column.

Level: 1

Type: ERROR

EPMPCM-10158: Measure column ""{0}"" of ""{1}"" table has invalid registration. Destination measure columns should be mapped only by destination measure dimension members.

Cause: The measure column on the table does not map to a member of the Destination measures dimension.

Action: Modify the registration for the column so that it maps to a member of the Destination measures dimension.

Level: 1
Type: ERROR

EPMPCM-10159: None of the destination measure dimension members has a mapping to a registered column.

Cause: None of the members in the destination measures dimension is mapped to a registered column.

Action: Register a measure column that maps to a member of the destination measures dimension using Model Data Registration.

Level: 1
Type: ERROR

EPMPCM-10160: Override Total Driver Value measure ""{0}"" in the driver definition does not have a valid registration.

Cause: The measure member specified for Override Total Driver Value does not map to any column in Model Data Registration.

Action: Modify the Override Total Driver Value measure member so that it maps to a member with a registered column.

Level: 1
Type: ERROR

EPMPCM-10161: Assign To measure ""{0}"" is not allowed to be mapped to a column on a lookup table.

Cause: The Assign To Measure member of a driver maps to a lookup table column.

Action: Modify the Assign To Measure member so that it maps a fact table column.

Level: 1
Type: ERROR

EPMPCM-10162: Short Name property value ""{0}"" length should not exceed 10 symbols for "Reporting Dimensions".

Cause: The Short Name property length for a Reporting dimension is greater than 10 characters.

Action: Modify the Short Name property for all Reporting dimensions so that the length is less than or equal to 10 characters.

Level: 1
Type: ERROR

EPMPCM-10163: Short Name property value ""{0}"" length should not exceed 30 symbols for "Attribute Dimensions".

Cause: The Short Name property length for an Attribute dimension is greater than 30 characters.

Action: Modify the Short Name property for all Attribute dimensions so that the length is less than or equal to 30 characters.

Level: 1
Type: ERROR

EPMPCM-10164: Source measures are not allowed in object calculation drivers.

Cause: An Object Calculation driver contains a reference to a Source measure member.

Action: Remove references to Source measure members from the Object Calculation driver.

Level: 1

Type: ERROR

EPMPCM-10165: No Model Data Schema is selected. Select one before continuing.

Cause: The Model Data Schema property in Model Summary - Model Level Preference is not specified.

Action: Select a Model Data Schema for the application in the Model Summary - Model Level Preference page.

Level: 1

Type: ERROR

EPMPCM-10168: The system table ""{0}"" does not exist in the currently selected Model Data Schema. Ensure that all stage tables exist in the selected Model Data Schema prior to calculation.

Cause: The table specified for the stage does not physically exist in the Model Data Schema. This occurs when the table is dropped from the Model Data Schema after registration was completed.

Action: Recreate the missing table or modify the stage so that it points to a valid registered table.

Level: 1

Type: ERROR

EPMPCM-10169: Comment length should not exceed 255 symbols.

Cause: The specified comment is greater than 255 characters.

Action: Verify that the comment is less than or equal to 255 characters.

Level: 1

Type: ERROR

EPMPCM-10170: The product schema does not have UPDATE privileges on the destination stage table ""{0}."

Cause: The Profitability product schema does not have UPDATE privileges on the destination stage table in the model data schema.

Action: Grant the UPDATE privilege on the destination stage table to the Profitability product schema.

Level: 1

Type: ERROR

EPMPCM-10171: The product schema does not have SELECT privileges on the table ""{0}."

Cause: The Profitability product schema does not have SELECT privileges on the specified table.

Action: Grant the SELECT privilege on the specified table to the Profitability product schema.

Level: 1

Type: ERROR

EPMPCM-10172: The HPCM Product User may not have the ""{0}"" privilege on the Model Data Schema.

Cause: The Profitability product user is missing the specified privilege.

Action: Grant the specified privilege to the Profitability product user.

Level: 1

Type: ERROR

EPMPCM-10173: The HPCM Product User may not have the CREATE VIEW privilege.

Cause: The Profitability product user is missing the specified privilege.

Action: Grant the specified privilege to the Profitability product user.

Level: 1

Type: ERROR

EPMPCM-10174: All of measure columns on the table ""{0}"" are not of the same precision and scale.

Cause: Registered measure columns on the specified table do not have identical precision and scale.

Action: Alter the specified table so that all registered measure columns have identical precision and scale.

Level: 1

Type: ERROR

EPMPCM-10175: There are no measures mapped on the source stage table ""{0}."

Cause: The specified source stage table has no registered measure column.

Action: Register a measure column for the specified source stage table.

Level: 1

Type: ERROR

EPMPCM-10176: There are two driver measures mapped to the destination stage table column ""{0}"".

Cause: The Driver measure for multiple drivers map to the same registered destination stage column.

Action: Verify that each Driver measure maps to a unique destination stage column.

Level: 1

Type: ERROR

EPMPCM-10177: There are no drivers in the sequence range for calculation rule ""{0}."

Cause: There are no drivers selected within the start and end sequence range of the specified calculation rule.

Action: Edit the specified calculation rule so that at least one driver is designated in the sequence range.

Level: 1

Type: ERROR

EPMPCM-10178: There are no enabled calculation rules to calculate.

Cause: None of the calculation rules for the application are enabled.

Action: Verify that at least one calculation rule is enabled and then retry the calculation.

Level: 1

Type: ERROR

EPMPCM-10179: The product schema does not have SELECT with GRANT OPTION privileges on the table ""{0}."

Cause: The Profitability product schema does not have the SELECT with GRANT OPTION privilege on the specified table.

Action: Grant the SELECT with GRANT OPTION privilege to the Profitability product schema on the specified table.

Level: 1

Type: ERROR

EPMPCM-10180: The LCM export of Calculation Rules being imported is incorrect.

Cause: The Calculation Rules being imported have failed validation.

Action: Refer to the LCM import validation errors for more information.

Level: 1

Type: ERROR

EPMPCM-10181: The first sequence priority is greater than last sequence priority

Cause: The first sequence priority value is greater than the last sequence priority.

Action: The first sequence priority value must be less than the last sequence priority.

Level: 1

Type: ERROR

EPMPCM-10182: Invalid sequence priority values

Cause: The first and/or last sequence priority values are null for a Calculation Rule..

Action: Verify that there is a valid number assigned to both the first sequence and last sequence values for each Calculation Rule.

Level: 1

Type: ERROR

EPMPCM-10184: Illegal value for driver sequence, the sequence value should be greater than 1 and less than 2147483647.

Cause: The driver sequence is invalid.

Action: Verify that the driver sequence is a number between 1 and 2147483647.

Level: 1

Type: ERROR

EPMPCM-10185: The Data Filter has invalid expressions.

Cause: The Data Filter for an Assignment Rule has invalid expressions.

Action: Verify that the Data Filter for the Assignment Rule contains only valid expressions.

Level: 1

Type: ERROR

EPMPCM-10186: The Short Name ""{0}"" is not a legal Short Name. Short Names cannot be Database Reserved words, cannot have non-alphanumeric characters, and the first character cannot be a number.

Cause: The specified Short Name contains illegal characters or is a database reserved word.

Action: Verify that all Short Names are not database reserved words, have only alphanumeric characters and the first character is not a number.

Level: 1

Type: ERROR

EPMPCM-10201: Null passed as attribute name.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMPCM-10202: Invalid template group.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1
Type: ERROR

EPMP-10203: Null passed as template group name.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-10204: Template Group already exists.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-10206: Null value passed as template name.

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-10207: Invalid template name

Cause: The cause of the error is unknown.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-10300: Process task xml is not valid. The task type is ""{0}""

Cause: Seeded data for the specified task type is invalid.
Action: Contact Oracle Support for assistance.
Level: 1
Type: ERROR

EPMP-10301: HPM job record not found. Job id: ""{0}"".

Cause: A job record is missing from the database.
Action: Refer to the server logs for more information.
Level: 1
Type: ERROR

EPMP-10303: Only jobs with status 'Running' can be stopped.

Cause: The status of the selected job is not appropriate for termination.
Action: Select a different job or wait until the job status is set to Running.
Level: 1
Type: ERROR

EPMP-10304: Job was interrupted by user. Task Flow ID : ""{0}"".

Cause:
Action:
Level: 1
Type: NOTIFICATION

EPMP-10305: Calculation Pre script failed.

Cause: An exception occurred during execution of a user script designated to run prior to the calculation.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-10310: Task ""{0}"" is not found.

Cause: The cause of the error is unknown.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-10350: Duplicate driver operation type name: {0}

Cause: There is duplicate data in the Calculation Configuration seed data.

Action: Contact Oracle Support for assistance.

Level: 1

Type: ERROR

EPMP-10400: Bulk Edit terminated: No Sources provided for Bulk Edit Id ""{0}""

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-10401: Bulk Edit terminated: No Model Context exists for Bulk Edit Id ""{0}""

Cause: The Bulk Edit cannot proceed because there is missing metadata for the application.

Action: Refer to the server logs for more information.

Type: ERROR

EPMP-20002: Invalid layer name: ""{0}"".

Cause: The specified layer name is not valid.

Action: Specify either Cost or Revenue as the layer name.

Level: 1

Type: ERROR

EPMPCM-20003: Invalid dimension member group combination: "{0}", "{1}", "{2}", "{3}".

Cause: The input dimension member combination is not valid.

Action: Correct the input dimension member combination.

Level: 1

Type: ERROR

EPMPCM-20004: Invalid stage name: ""{0}"".

Cause: The specified stage name does not exist for the application.

Action: Create the stage in the application and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20006: Invalid Data Options selection. Please select either 'Archive Data Before Deploy' or 'Archive Data and Reload After Deploy'.

Cause: The user has selected invalid Data Options.

Action: Select either 'Archive Data Before Deploy' or 'Archive Data and Reload After Deploy' as the Data Option and the retry the operation.

Level: 1

Type: ERROR

EPMPCM-20007: Invalid Data Options selected. 'Archive Data Before Deploy', 'Archive Data and Reload After Deploy' or 'Delete Data Archive After Reload' cannot be selected when 'Replace Database' is selected.

Cause: Invalid Data Options selected.

Action: Verify that the Replace Database option is compatible with the selected Data Options.

Level: 1

Type: ERROR

EPMPCM-20008: POV information not specified.

Cause: A Point of View was not specified.

Action: Specify a Point of View and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20009: Application name not specified.

Cause: An Application name was not specified.

Action: Specify an Application name and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20010: Import configuration name not specified.

Cause: An Import Configuration name was not specified.

Action: Specify an Import Configuration name and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20011: Layer name not specified.

Cause: A Layer name was not specified.

Action: Specify a Layer name and retry the operation.

Level: 1

Type: ERROR

EPMP-20012: No genealogy calculation paths specified.

Cause: No genealogy calculation paths were specified.

Action: Specify a genealogy calculation path and retry the operation.

Level: 1

Type: ERROR

EPMP-20013: No selections made to copy POV data.

Cause: One or more of the required options for the Copy POV data service was not specified.

Action: Specify all required options for the Copy POV data service and retry the operation.

Level: 1

Type: ERROR

EPMP-20014: Stage name not specified.

Cause: A stage name was not specified.

Action: Specify a stage name and retry the operation.

Level: 1

Type: ERROR

EPMP-20015: Cube type not specified.

Cause: A Cube type was not specified.

Action: Specify a Cube type and retry the operation.

Level: 1

Type: ERROR

EPMP-20016: Parameter ""{0}"" cannot be null.

Cause: A required parameter for the web service was not specified.

Action: Refer to the server logs for more information.

Level: 1

Type: ERROR

EPMP-20017: More than one POV group retrieved for the specified dimension member group ""{0}"".

Cause: The cause of the error is unknown.

Action: Contact Oracle Support for assistance.

Level: 1

Type: ERROR

EPMP-20019: Application type not specified.

Cause: An Application Type was not provided for the operation.

Action: Provide an Application Type for the operation.

Level: 1

Type: ERROR

EPMP-20020: Invalid option(s) selected when performing Copy POV for a Detailed Profitability application. Only Driver Selections, Assignments and/or Stage Object Calculations can be selected.

Cause: The Copy POV web service was invoked with invalid options.

Action: Allowed options for the Copy POV web service include only Driver Selections, Assignments and/or Stage Object Calculations. Reselect one or more allowed options and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20021: Invalid Calculation Rules option selected for a Standard Profitability application.

Cause: One of the selected options is not allowed for use with Standard Profitability.

Action: Verify that the options selected for the operation are allowed for Standard Profitability applications and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20022: Invalid operation for application type: ""{0}""

Cause: An option has been selected that is not allowed for the given application type.

Action: Verify that the options selected for the operation are allowed for the application type and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20023: No Bulk Edit operation specified.

Cause: The web service call does not specify any Bulk Edit operations.

Action: Verify that a Bulk Edit operation is specified and retry.

Level: 1

Type: ERROR

EPMPCM-20024: Source assignment rules not specified.

Cause: No source assignment rules are specified for the web service call.

Action: Specify one or more source assignment rules for the web service and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20025: Destination assignment rules not specified.

Cause: No destination assignment rules are specified for the web service call.

Action: Specify one or more destination assignment rules for the web service and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20026: Drivers not specified.

Cause: No drivers are specified for the web service call.

Action: Specify one or more drivers for the web service and retry the operation.

Level: 1

Type: ERROR

EPMPCM-20027: Destination assignment rules specified for Add/Remove Drivers.

Cause: Destination Assignment Rules have been specified for an Add/Remove Drivers operation.

Action: Verify that the web service is called with allowable options and retry the operation.
Level: 1
Type: ERROR

EPMPCM-20028: Drivers specified for Add/Remove assignment rules.

Cause: Driver were specified for an Add or Remove Assignment rule operation.
Action: Do not specify Drivers when running an Add or Remove Assignment rule operation.
Level: 1
Type: ERROR

EPMPCM-20029: Source/Destination Assignment rules specified when 'Remove All' option is selected.

Cause: You have specified contradictory options for the web service call.
Action: If the Remove All option is specified, you cannot also specify individual Source/Destination Assignment rules. Correct the web service options and retry the operation.
Level: 1
Type: ERROR

EPMPCM-20030: Drivers specified when 'Remove All' option is selected.

Cause: You have specified contradictory options for the web service call.
Action: If the Remove All option is specified, you cannot also specify individual Drivers. Correct the web service options and retry the operation.
Level: 1
Type: ERROR

EPMPCM-20031: More than one driver specified for 'Add Drivers' operation.

Cause: Multiple drivers were specified for the Add Driver web service call.
Action: Specify a single Driver and retry the operation.
Level: 1
Type: ERROR

EPMPCM-20032: Invalid selection of 'Remove All' flags for Add Drivers/Assignment rules operation.

Cause: You have specified contradictory options for the web service call.
Action: The Remove All option cannot be selected when calling the web service for Add Drivers/Assignment rules.
Level: 1
Type: ERROR

EPMPCM-20033: Invalid assignment rule name: ""{0}""

Cause: You have specified an invalid assignment rule name for the web service call.
Action: Specify a valid assignment rule name for the web service call and retry.
Level: 1
Type: ERROR

EPMPCM-20034: Invalid driver name: ""{0}""

Cause: A you have specified an invalid driver name for the web service call.
Action: Specify a valid driver name for the web service call and retry.
Level: 1
Type: ERROR

EPMPCM-20035: ""{0}"" is not a valid source assignment rule.

Cause: You have specified an invalid name for source assignment rule.

Action: Specify a valid source assignment rule name for the web service call and retry.

Level: 1

Type: ERROR

EPMPCM-20036: ""{0}"" is not a valid destination assignment rule.

Cause: You have specified an invalid name for destination assignment rule.

Action: Specify a valid destination assignment rule name for the web service call and retry.

Level: 1

Type: ERROR

EPMPCM-20037: Driver: ""{0}"" of type: Object Calculation cannot be selected for Bulk Edit operation.

Cause: You have specified an invalid Driver for the Bulk Edit operation.

Action: Specify a Driver of a type that is not Object Calculation for the web service call and retry.

Level: 1

Type: ERROR

EPMPCM-20038: Invalid reporting dimension name: ""{0}""

Cause: The dimension name or short name specified does not map to a valid dimension for this application.

Action: Specify a dimension name or short name that is valid for the application and retry.

Level: 1

Type: ERROR

EPMPCM-20039: Model data schema is not defined for application: ""{0}"".

Cause: The specified application does not have a model data schema defined.

Action: Define a model data schema for the application and retry.

Level: 1

Type: ERROR

EPMPCM-20040: No reporting dimension available for application: ""{0}"".

Cause: No reporting dimensions have been defined for the specified application.

Action: Designate one or more reporting dimensions for the application and retry.

Level: 1

Type: ERROR

EPMPCM-20041: Short name missing for dimension: ""{0}"".

Cause: The specified dimension does not have an assigned Short Name.

Action: Designate a Short Name for the dimension and retry.

Level: 1

Type: ERROR

EPMPCM-20042: Model POV is not defined.

Cause: You did not specify a Model Point of View for the web service call.

Action: Specify a Model Point of View and retry.

Level: 1

Type: ERROR

EPMPCM-20043: No Data POV(s) are defined.

Cause: You did not specify a Data Point of View for the web service call.

Action: Specify a Data Point of View and retry.

Level: 1

Type: ERROR

EPMPCM-20044: Create Contribution Detail, Create Detailed Calculated Driver Tables or Run a single Calculation Rule sequence cannot be specified when 'Execute Calculations' is not selected.

Cause: You have specified contradictory options for the web service call.

Action: You must selected 'Execute Calculations' if you specify one or more of the following options: Create Contribution Detail, Create Detailed Calculation Driver Tables or Run a Single Calculation Rule Sequence. Verify that the web service options are compatible and retry.

Level: 1

Type: ERROR

EPMPCM-20047: Invalid dimension member name: ''{0}''.

Cause: You have specified an invalid dimension member name for the web service call.

Action: Specify a valid dimension member name and retry.

Level: 1

Type: ERROR

EPMPCM-20048: Select either the Cost or Revenue layer.

Cause: You have specified an invalid Layer for the web service call.

Action: Specify either Cost or Revenue for the Layer and retry.

Level: 1

Type: ERROR

EPMPCM-20049: Select at least one delete parameter (Driver Selections or Assignments).

Cause: The Clear Point of View web service is being invoked without specifying a parameter for what is to be cleared.

Action: Specify the appropriate delete parameter (Driver Selections, Driver Exceptions, Assignment Rule Selections, Assignments or Calculation Rules) and retry.

Level: 1

Type: ERROR

EPMPCM-20050: Select the stages to be affected.

Cause: No stages were specified for the operation.

Action: Specify one or more stages and retry.

Level: 1

Type: ERROR

EPMPCM-20051: No calculation rule sequence is specified when Run a single calculation rule sequence is selected.

Cause: The option to Run a Single Calculation Rule Sequence was selected without specifying a sequence.

Action: Specify a Calculation Rule Sequence and retry.

Level: 1

Type: ERROR

EPMP-20052: Calculation rule sequence is specified when Run a single calculation rule sequence is not selected.

Cause: A Calculation Rule Sequence value was specified without selecting to Run A Single Calculation Rule Sequence.

Action: Specify to Run A Single Calculation Rule Sequence and retry.

Level: 1

Type: ERROR

EPMP-20053: The calculation sequence should be greater than 1 and less than or equal to 9999.

Cause: The specified Calculation Rule Sequence is an invalid value.

Action: Specify a value between 1 and 9999 for the Calculation Rule Sequence and retry.

Level: 1

Type: ERROR

EPMP-20054: Clear POV can only clear data for the Source Stage of a Detailed application.

Cause: An invalid Stage was specified for a Clear Point of View operation.

Action: Only the Source Stage can be specified for a Detailed Profitability application Clear Point of View operation. Specify a valid Source Stage and retry.

Level: 1

Type: ERROR

EPMP-20055: Invalid Rule Set name: "{0}".

Cause: The Rule Set name is not available in the system for the given artifact

Action: Provide the correct Rule Set name and resubmit the operation

Level: 1

Type: ERROR

EPMP-20056: Invalid Rule name: "{0}".

Cause: Rule name is not available in the system for the given artifact

Action: Provide the correct Rule name and resubmit the operation

Level: 1

Type: ERROR

EPMP-20101: LCM Import will not import Model Data Schema preferences as the Model Data Schema is already set.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-20102: LCM Import will not import tables if they are already registered.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-20103: LCM Import will not import table joins if they already exist.

Cause:

Action:

Level: 1

Type: NOTIFICATION

EPMP-20106: LCM Import will not import Calculation Process Definition if it already exists.

Cause:

Action:

Level: 1

Type: NOTIFICATION
