Supported Platforms .....	2
Supported Languages .....	2
Defects Fixed in This Release .....	2
Known Issues .....	4
Documentation Updates .....	6
Documentation Feedback .....	6
Accessibility Considerations .....	7

## Purpose

This document includes important, late-breaking information about this release of Oracle Hyperion Shared Services. Review this Readme thoroughly before installing Oracle Enterprise Performance Management System.

## Installation Information

Late-breaking information about the installation of EPM System products is provided in the *Oracle Enterprise Performance Management System Installation and Configuration Readme*. Review this information thoroughly before installing EPM System products.

## Supported Platforms

Information about system requirements and supported platforms for EPM System products is available in spreadsheet format in the *Oracle Enterprise Performance Management System Certification Matrix*. This matrix is posted on the Oracle Fusion Middleware Supported System Configurations page on Oracle Technology Network (OTN):

<http://www.oracle.com/technetwork/middleware/ias/downloads/fusion-certification-100350.html>

## Supported Languages

Information about supported languages for EPM System products is available in spreadsheet format on the Translation Support tab in the *Oracle Enterprise Performance Management System Certification Matrix*. This matrix is posted on the Oracle Fusion Middleware Supported System Configurations page on OTN:

<http://www.oracle.com/technetwork/middleware/ias/downloads/fusion-certification-100350.html>

## Defects Fixed in This Release

This section includes defects fixed in Release 11.1.2.4.000. To review the list of defects fixed between earlier releases, use the Defects Fixed Finder. This tool enables you to identify the products you own and your current implementation release. With a single click, the tool quickly produces a customized report of fixed-defect descriptions with their associated platforms and patch numbers. This tool is available here:

<https://support.oracle.com/oip/faces/secure/km/DocumentDisplay.jspx?id=1292603.1>

## General

- 18064688—EPM System does not support SQL Server 2008 Cluster.
- 18482611—Oracle Hyperion Financial Management and Oracle Hyperion EPM Architect cannot be accessed over Secure Socket Layer (SSL) in EPM System Release 11.1.2.3.500 environment.
- 18826287—Unable to send email at the completion of taskflow.
- 17551289—In environments where SSL offloading is implemented, you are not able to browse Oracle Hyperion Reporting and Analysis folder tree using Oracle Smart View for Office over the default HTTP port (80).

## Shared Services

- 18184326—Shared Services application deployment fails if EPM System is configured to use a SQL Server 2008 cluster as the database.
- 18727579—A 404 error is thrown when users access the Shared Services URL (`http://server:port/interop`) in EPM System Release 11.1.2.3.500 environments.
- 18795110—Application group within Shared Services cannot be expanded if the group contains a large number of applications.
- 19562569—Shared Services Administrators get the logged on user is not provisioned for this application error message when opening the Assign Access Control screen of Oracle Hyperion Shared Services Console to provision users with Financial Management roles.
- 19598009/19635889—While provisioning users with roles from a Financial Management application, Shared Services lists the security classes of a different Financial Management application than the one selected by the user.
- 19621764—Users who are not provisioned with Administrator role are able to access tasks that only Shared Services administrators can perform.
- 17941897—Attempts to simultaneously execute several calculation scripts for 12 POVs, results in some scripts failing with the following error:  

```
java.sql.SQLException: ORA-01418: specified index does not exist
```
- 19603750/19585161—Some reports are available to users who are not provisioned with Shared Services Administrator role.
- 19432584—Running `FCMPS3500.bat` after applying Oracle Hyperion Financial Close Management Release 11.1.2.3.500 fails with the following exception:  

```
Logging configuration class  
"oracle.core.ojdl.logging.LoggingConfiguration" failed  
oracle.core.ojdl.logging.LoggingConfigurationException: ODL-52042:  
undefined property: ${EPM_ORACLE_INSTANCE}.
```
- 19951765—When using Internet Explorer 8 to access the Oracle Hyperion Shared Services Console, you cannot move users from the Available Users list to Assigned Users list while editing group properties.

# Lifecycle Management

## General

- 18381496—If the Max Errors Threshold value in **Migration Options** in Oracle Hyperion Shared Services is set to a value above 5000, import operations using Oracle Hyperion Enterprise Performance Management System Lifecycle Management fail with the following error:  

```
EPMLCM-13000: Service currently not available
```
- 19440536—If Internet Explorer is set to use Portuguese Brazil (PT-BR) locale, the Migration Status report does not display content.
- 16434199—A logging error can occur when an artifact change report attempts to write to an Oracle Essbase log file.

## Planning

- 19393524—Replace and Merge options are not available in Lifecycle Management to import Planning dimensions.
- 17991704—Exported Oracle Hyperion Planning data form with a Japanese name does not display correctly.
- 18094911—Null pointer exception is thrown after you edit an outline artifact.

## Known Issues

The following are the noteworthy known issues of this release.

## Shared Services

- 20317851—Internet Explorer becomes unresponsive while entering special characters into Manage taskflow screen using a German keyboard.
- 18641365—User is not correctly provisioned if you import the provisioning data of a user who was deleted from EPM System after exporting the provisioning data.

## Taskflow

- 20317851—Internet Explorer becomes unresponsive while entering special characters into Manage taskflow screen using a German keyboard.
- 19456805—In multi-stage taskflows, clicking once does not allow the user to proceed to the desired stage.
- Attempt to save a taskflow that uses HU as the application and Execute as the action fails with the following error:

```
[APP: SHAREDSEVICES#11.1.2.0] [URI:
/interop/framework/workflow/saveTaskFlow] [SRC_CLASS:
com.hyperion.ces.ui.SaveTaskFlow] [SRC_METHOD: execute] Error in Processing
the TaskFlow XML Taskflow cannot be saved as the command defined in SEFILE
does not exist in the Path
```

- 18726993—In deployments where a Oracle Hyperion Financial Management instance belongs to multiple clusters, taskflows created in a cluster fail to execute in other clusters.

## Lifecycle Management

- 20125759—Lifecycle Management exports the Oracle Hyperion Interactive Reporting job output even if the job export option is set to false <Options option="exportJobOutput" Value="false"/>.
- 20049215—After a considerable period into a Planning application import process, Lifecycle Management fails and displays the `Services currently not available` error.

**Workaround:** If application import is failing after 10 hours, increase your webs server timeout setting (default is 10 hours). For Oracle HTTP Server, you edit `mod_wl_ohs.conf` to change the value of timeout setting.

- 19962812—Deployment Metadata export fails if the Oracle Essbase cluster name includes the underscore character (`_`).
- 19474436—If the target application contains an outline, Lifecycle Management does not update the outline during incremental outline updates.
- 19454862—Import of Account dimension fails with the following error:  
An error occurred importing artifact (Account).[[  
com.hyperion.planning.HspRuntimeException: LCM migration failed for the  
following reason - You cannot set Shared or Label Only Data Storage with a  
formula on member "Reimbursements Model"Shared Member IP\_Days can not be  
added or updated.
- 19539548—Lifecycle Management command line utility does not allow runtime changing of application name.
- 19210921/19079099—Lifecycle Management imports using the replace mode does not replace dimension.
- 19181906—Folders that Lifecycle Management create under `EPM_ORACLE_INSTANCE/diagnostics/logs/migration` are not automatically deleted when the migration process ends.
- 18748719—While importing security settings, Lifecycle Management may apply security setting to the wrong folder if another data form folder with an identical name is present in the Planning application.
- 18531693—Lifecycle Management does not migrate provisioning data in Japanese localized environments.
- 18389444—Lifecycle Management import/export operations do not update aliases in Oracle Hyperion Planning applications.

- 16881461—Oracle Hyperion Enterprise Performance Management System Lifecycle Management does not copy multiple selections from the dimension while migrating taskflow from release 11.1.2.1.600 to release 11.1.2.2.303.

## Documentation Updates

### Accessing EPM System Product Documentation

Find the latest EPM System product guides in the Oracle Help Center (<https://docs.oracle.com/en/>). To access documents to view or download, click the Applications icon. In the Applications Documentation window, select the EPM tab, and then click the Enterprise Performance Management link.

You can also find deployment-related documentation on the Oracle Technology Network (<http://www.oracle.com/technetwork/index.html>) and on the Oracle Software Delivery Cloud website ([http://edelivery.oracle.com/EPD/WelcomePage/get\\_form](http://edelivery.oracle.com/EPD/WelcomePage/get_form)). Or you can visit the EPM System Documentation Portal (<http://www.oracle.com/us/solutions/ent-performance-bi/technical-information-147174.html>). There, you'll find links to My Oracle Support, EPM Supported Platform Matrices, and more.

### Online Help in Internet Explorer

Some tables and text may display incorrectly in online help when using Internet Explorer 9.

### Copying and Pasting Code Snippets from PDFs

When you cut and paste code snippets from a PDF file, some characters can be lost during the paste operation, making the code snippet invalid. Workaround: Cut and paste from the HTML version of the document.

### Documentation Feedback

Send feedback on product documentation to the following email address:

EPMdoc\_ww@oracle.com

## Accessibility Considerations

Our goal is to make Oracle products, services, and supporting documentation accessible to the disabled community. EPM System products support accessibility features, which are described in the product's *Accessibility Guide*. Find the most up-to-date version of this guide in the Oracle Enterprise Performance Management System Documentation Library on the Oracle Technology Network (<http://www.oracle.com/technology/documentation/epm.html>).

In addition, this Readme file is accessible in HTML format.
