1. Creating Property File for Oracle FLEXCUBE Investor Servicing

1.1 Introduction

This chapter explains the steps to create property files for Oracle FLEXCUBE Investor Servicing Application.

1.2 Creating Property File

To create the property file for Oracle FLEXCUBE Investor Servicing, follow the steps given below:

1. Launch Oracle FLEXCUBE Investor Servicing Installer.

🛃 Oracle FLEXCUBE Universal Installer	
Oracle FLEXCUBE Investor Servicing	ORACLE
Welcome To Oracle FLEXCUBE Select the option for installation	
Cross Schema Grants Oracle FLEXCUBE Oracle FLEXCUBE Investor Servicing Oracle FLEXCUBE Gateway Open Development Tool Open Development Tool Oscheduler Oracle FLEXCUBE Gateway Open Development Tool Open Developmen	
Log Back	Next Exit

2. Choose 'Oracle FLEXCUBE IS'. Click 'Next'.

3. The following screen is displayed:

🚣 Oracle FLEXCUBE Uni	versal Installer		- • •
Oracle FLEXC	JBE Investor Servicing		ORACLE
Welcome To Oracle Choose Oracle FLE>	FLEXCUBE (CUBE Component for installation.		
Property File			
Database Build Application			
Deploy Application			
File Seperator Style	Linux		
Application Server	Weblogic 👻		
DataBase Server	Oracle 👻		
Log		Back	ext Exit

- 4. Choose the option 'Property File'.
- 5. Specify the following details:

Operating System

Specify the operating system in which you are creating the property file. Choose the appropriate one from the drop-down list

Application Server

Specify the application server in which you are creating the property file. Choose the appropriate one from the drop-down list.

Database Server

Specify the database server in which you are creating the property file. Choose the appropriate one from the drop-down list.

Once you have specified the details, click 'Next' to continue. The following screen is displayed.

🕌 Oracle FLEXCUBE Universal Installer	- • •
Oracle FLEXCUBE Investor Servicing	ORACLE
Welcome To Oracle FLEXCUBE Choose Oracle FLEXCUBE Component for installation.	
Default Installation	
○ Custom Installation	
Default Installation: Most of the property values are defaulted and user input requested for them. Very few screens shown.	ut is not
Custom Installation: User input required for each of the property or default be accepted. All the property screens are shown.	values shown to
Log Back	Next Exit

In this screen, choose either Default or Custom installation.

Default – Only the minimum list of details are asked for. Insulation plug-in is de-selected. SSO is by default No.

Choose the available plugins for includi	ng them in the current installation.	
Plugin Description	Include	
BPEL	V	
Oracle Flexcube Testing WorkBench	V	
DMS	∠	
DMS REPORTS	► ►	

If you select 'Default Installation' options and click 'Next', the following window is displayed:

If there are any issues with the default values then, the property file created can be loaded and choosing custom Installation option it can be corrected.

If you click 'Custom Installation' option and click 'Next' button, the following screen is dispalyed:

🕌 Oracle FLEXCUBE Universal Installer	
Oracle FLEXCUBE Investor Servicing	ORACLE
Default Installation Choose the Deployment option specified.	
Centralized Centralized- For Centralized installation there will only one setup.	
Log Back	Next Exit

Click 'Next' to continue Custom – All details are to be provided.

🙆 Oracle FLEXCUBE Universal Installer	
Oracle FLEXCUBE Investor Servicing	ORACLE
Property File Creation	
Specify the Property File path.	
Centralized Property File	
For Modifying the Existing Property file specify the path else leave the pa for loading the default property file.	ath unchanged
Log Back	Next Exit

6. Specify the following details:

Centralized Property File

The property file needs to be built before the EAR file. If you are creating a new property file, leave the field blank. If you wish to modify an existing property file, you can manually specify the location of the property file.

1.2.1 Setting Oracle FLEXCUBE Investor Servicing Plug-ins

Default Installation steps are as below

BPEL and RTT should be chosen explicitly while, other plug-ins are defaulted. Insulation is not there.

Default Installation Choose the available plugins for includi	ng them in the current installation	
Plugin Description	Include	
BPEL	V	
Oracle Flexcube Testing WorkBench	v	
DMS		
DMS REPORTS	×	

Once you have selected the plug-ins, click 'Next'. You will be navigated to the 'Common Properties' screen

Custom Installation steps are as below

This section describes the process of setting plug-ins.

1. You can select the plug-ins from the following screen.

Oracle FLEXCUBE Universal Installer		- • ×	
Oracle FLEXCUBE Investor Servicing		ORACLE	
Property File Creation			
Choose the available plugins for includin	g them in the current installa	tion.	
Plugin Description	Include		
Oracle Flexcube Testing Workbench	V		
Insulation	V		
Document Management System	V		
Scheduler	V		
Reports	V		
BPEL	~		
Is Scheduler Standalone			
Log	Back	Next Exit	

- You need to select the plug-ins to be included in the installation. Check the box against the required plug-ins. The following plug-ins are available for Oracle FLEXCUBE Investor Servicing:
 - BPEL
 - Document Management System
 - Reports
 - Scheduler
 - Regression Testing Tool
 - Insulation

Note: If scheduler is required then, one can chose if scheduler is required as standalone.

For to choose standalone scheduler, one should go through scheduler option of building the EAR and deploy the EAR ahead of FCIS application

Scheduler URL: The value for the URL should be the scheduler URL that will be available once scheduler application is deployed.

3. Once you have selected the plug-ins, click 'Next'. You will be navigated to the 'Common Properties' screen.

1.2.2 Setting Common Properties

This section describes the process of setting common properties of Oracle FLEXCUBE Investor Servicing.

Default Installation steps are as below

🕌 Oracle FLEXCUBE Universal Installer		
Oracle FLEXCUBE Invest	ORACLE	
Default Installation Current screen provides an option fo	r modifying the Common property valu	ues.
Debug Logs Required	Yes 🔻	
Work Area	/BrnDbgs/	
Signature Path	(BrnDbgs/	
Excel Path	/BrnDbgs/	
Log	Back	Next Exit

Debug

If you require debug option, select 'Yes' from the drop-down list. If you do not require debug option, select 'No'.

Signature Path

Specify the location at which the signature images will be placed.

Excel Path

Specify the location at which the excel files will be generated.

On click on Next, details mentioned under section '**Setting Email Details**' needs to be followed. Please refer to that section for further flow in Default Installation option.

ORACLE

Custom Installation steps are as below

1. The installer displays the 'Common Properties' screen.

🙆 Oracle FLEXCUBE Universal	💁 Oracle FLEXCUBE Universal Installer			
Oracle FLEXCUBE	Oracle FLEXCUBE Investor Servicing			ORACLE
Property File Creation				
Current screen provides	an option for	modifying the Con	nmon property	values.
Debug Logs Required	No 💌			
Work Area	(BrnDbgs/			
Signature Path	(BrnDbgs/			
Excel Path	(BrnDbgs/			
Data Source	jdbc/fcjdevE	DS		
Request Time Out	1800000	In milli seconds		
Connection Time Out	3600	In Seconds		
Session Time Out	1800	In Seconds		
LOV Fetch Required				
Max Image Size	1048576	In Bytes		
Log			Back	Next Exit

2. The following are the common properties required for FCIS Application:

Debug

If you require debug option, select 'Yes' from the drop-down list. If you do not require debug option, select 'No'.

Signature Path

Specify the location at which the signature images will be placed.

Excel Path

Specify the location at which the excel files will be generated.

Data Source

Specify the JNDI location which points to SMS schema The standard format is 'jdbc/fcisdevDS'.

Request Time Out

Specify the database request timeout value in seconds. This is the maximum number of seconds the database will wait for a query to return the result.

Connection Time Out

Specify the database connection timeout value in seconds. This is the maximum number of seconds the application will wait for a connection to the database to open.

LOV Fetch Required

If you check this box, the option lists in Oracle FLEXCUBE Investor Servicing will display the matching values based on the first characters that you enter in a field. That is, if you specify the first three characters of a value to be entered in an option list and tab out, the system will display the complete list of values that are matching the first three characters.

If you do not check this, option lists will not show the matching values based on the first few characters. You need to specify the complete value against the field.

3. Click 'Next'. The following screen is displayed.

If you check the box, then click 'Next' and the following screen is displayed:

External User Login Required

Check this box to enable user login using MSAD/LDAP user ID.

If you check this box, the user can login using MSAD/LDAP server user ID as well as using FCIS user ID.

Authentication Type

Select the authentication type from the adjoining drop-down list. This is the type of external server that is used. You can select one of the following options:

- MSAD (Microsoft Active Directory)
- LDAP (Lightweight Directory Access Protocol)

By default, 'MSAD' is selected; however, you can change it.

5. The default option is MSAD; however, you can change it.

If you check the box, then the installer navigates to the following screen on clicking 'Next' button.

No.	Name	Value	
1	LDAP SERVER URL	LDAP:#10.10.10.10:111	
2	LDAP SSL ENABLED		
3	SECURITY AUTHENTICAT	Simple	
4	DOMAIN NAME	I-FLEX.COM	
5	LDAP SERVER TIMEOUT	0	

6. Specify the following details:

LDAP Server URL

Specify the URL to access the LDAP server where the external user lds or passwords are maintained.

LDAP SSL Enabled

Check this box if the LDAP server is SSL enabled.

Note: If you check this box, then you need to specify the SSL port in the field 'LDAP SERVER URL'.

Security Authentication Type

Depending on the authentication mechanism supported by the LDAP server, you need to select one of the following:

- Simple (in most cases)
- Strong

Note: Different servers support different authentication mechanisms. By default, the security authentication type is 'Simple; however, you can change it.

Domain Name

Specify the domain name.

ORACLE

LDAP Server Timeout

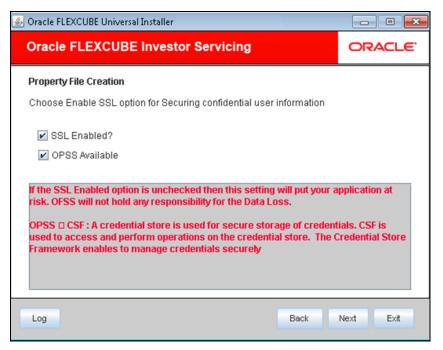

Specify the LDAP server timeout in milliseconds.

Note: Note the following:

- By default, the LDAP server timeout is zero; however, you can change this.
- You must enter a positive integer value. For example, 1000, 10000, 5000, etc.
- If the value specified is zero or less, it indicates that no read timeout is specified. Then, the wait for the response infinite until it is received.

Once you have specified the above details, click 'Next'.

7. The following screen is displayed:

8. Specify the following details.

SSL Enabled

Indicate whether SSL is enabled or not. If SSL is required, choose 'Yes'. If SSL is not enabled, the Installer will pop-up a window.

Choose	Option 💌
?	Are you sure you want to change the setting to SSL Enabled? The current security settings will put your application at risk.
	Yes No

However, it is recommended that you enable SSL.

OPSS Available

OPSS is available only for weblogic and is not supported for Websphere.

9. IF OPSS available is checked for weblogic the symmetric key is not stored in the property file for security reasons. If OPSS available is unchecked the symmetric key is available in the property file and a warning message is displayed to the user. Click 'Next'. You will be navigated to the next screen.

1.2.3 Setting Language Properties

This section describes the process of setting language packs of Oracle FLEXCUBE Investor Servicing.

1. The system displays the following screen.

🕌 Oracle FLEXCUBE Ur	niversal Installer :			- • •	
Oracle FLEXC	UBE Investor Serv	vicing		ORACLE	
Property File Creation Choose the Native Language Support parameters for Oracle FLEXCUBE					
Language	ENGLISH 💌	ISO Code	en

CopyRights	Oracle FLEXCUBE Im nbsp; Copyright © 20 iates. All rights reserv	07, 2016, Oracle an			
Log		Ba	ck	Vext Exit	

2. Specify the following details.

Language

Specify the language in which you wish to see Oracle FLEXCUBE Investor Servicing. English is the default language. However, based on the requirement, you can set a different language. Choose the appropriate one from the drop-down list.

Based on the language selected, the installer displays the ISO code.

Application Title

Specify the application title.

E.g.: FLEXCUBE IS

Version

Specify the application version.

E.g.: 12.0.0

Copy Rights

Specify the copyright details.

- E.g.: Copyright@2007-2012 Oracle Financial Software Services Limited. All rights reserved.
- 3. Once you have specified the details, click 'Next'. You will be navigated to the CSS setting screen.

1.2.4 Setting CSS Style

This section describes the process of setting CSS style.

1. The following screen is displayed.

Property File Cr Choose the Cas	ation cading Style Sheets from the list bellow	Ν.
Css Style	Default 💌	
Name	Flexblue	
Custom - Custo	It CSS Provided by Oracle FLEXCUBE ner specific CSS can also be develope he tool specific documents for more de	ed using the CSS tool

2. Specify the following details:

CSS Style

Specify the CSS style to be used. You can choose one of the following CSS styles:

- Default choose this to apply the default style provided along with Oracle FLEXCUBE Investor Servicing
- Custom choose this to apply a custom style

Name

Specify the name of the CSS style.

3. Once you have specified the above details, click 'Next'. You will be navigated to the Hashing Algorithm Count Settings screen.

1.2.5 Setting Hashing Algorithm Iteration Count

This section describes the method of setting hashing algorithm iteration count.

1. The following screen is displayed.

Property File Creation		
Current screen provides an option for	or modifying Hashing Algorithm Itera	tion Count.
Hashing Algorithm Iteration Count	10000	
Security Key for Encryption Logic	oraclefinancialsolutions	
Hashing algorithm iteration count de	e-optimizes the time required for logi	n into the
	ncreases the password guessing time his iteration count value needs to be	
Customer acceptence for delay in lo		oor buood on the
Security Key is used for Encryption I	Logic	
becanly ney is used for Encryption	Logic	

2. Specify the following details:

Hashing Algorithm Iteration Count

Specify the hashing algorithm iteration count. This count implies the time required for logging into the application. An increase in this count increases the login time.

3. Once you have specified the details, click 'Next'.

1.2.6 Setting Email Details

This section describes the method to configure email details.

1. The following screen is displayed.

No.	Name	Value	
1	Host	samplename.mail.com	
2	Userld	infra	
3	User Password	•••••	
4	JNDI Name	mail/FCUBSMail	

2. Specify the following details.

Host

Specify the SMTP host name.

User ID

Specify the user ID.

User Password

Specify the user password.

JNDI Name

Specify the JNDI name.

3. Once you have specified the above details, click 'Next'.

1.2.7 Setting FCIS UBS Adapter Properties

Only for Custom Installation

This section describes the FCIS UBS Adapter properties setup.

🕌 Oracle FLEXCUBE Univ	versal Installer		- • •
Oracle FLEXCU	BE Investor Servicing		ORACLE
Property File Creatio	n des an option for specfying Call	Out Adapter Propert	ies.

2	Inbound Queue Name	MDB_QUEUE			
3	ADAPTER Queue Connection				
Log		Back	Next Exit		

ORACLE

Specify MDB Data source, Queue name and Queue Connection Factory.

1.2.8 Setting Oracle IPM Adapter Properties

In case you have included DMS in the installation, you need to set the Oracle IPM adapter properties. Navigate to 'Oracle IPM DMS Properties' screen.

1. Set the server type in the following screen.

🕌 Oracle FLEXCUBE Universal Installer	
Oracle FLEXCUBE Investor Servicing	ORACLE
Property File Creation Choose the adapter for enabling Document management system.	
Server Type Oracle IPM Oracle IPM - Document Management System with Server Type has Oracle Process Management	Image and
Log	Next Exit

2. Choose 'Oracle IPM' as the server type.

3. Click 'Next, the following screen is displayed.

ounom	screen provides an opt	tion for modifying the DMS/IPM property values.	
No.	Name	Value	
1 L	ogin Service Address	http://10.10.10.10:1010/imaging/ws/LoginService	
2 D	Document Service Ad	http://10.10.10.10:1010/imaging/ws/DocumentServi	
3 D	Document Content Se	http://10.10.10.10:1010/imaging/ws/DocumentCont	
4 IF	PM User Name	*****	
5 IF	PM Password	•••••	
6 IF	PM Application Name	OFSS	
7 H	Http Session Maintain	v	

4. Specify the following details:

Login Service Address

This is the endpoint address of the web service (OracleIPM.WebService.EndpointAddress).

Document Service Address

This is the URL to which the Oracle IPM adapter uploads the documents (OracleIPM11G.DocumentService.EndpointAddress).

Document Content Service Address

This is the URL to which the Oracle IPM adapter uploads the documents (OracleIPM11G.DocumentConetntService.EndpointAddress).

Note: For websphere application server, the above three service address must end with "?wsdl"

Example for Login Service Address:

Webpshere: http://10.10.10.1010/imaging/ws/LoginService?wsdl

Weblogic: http://10.10.10.1010/imaging/ws/LoginService

ORACLE

Similarly, this is applicable for Document Service Address and Document Content Service Address as well.

IPM User Name

This is the user name accessing Oracle IPM (OracleIPM11G.Authentication.UserName).

IPM Password

This is the password for the above IPM user name (OracleIPM11G.Authentication.Password).

IPM Application Name

This indicates the license that provides login rights to Oracle IPM (OracleIPM11G.Application).

HTTP Session Maintain

This checkbox indicates whether HTTP session to be maintained or not (OracleIPM11G.MaintainSession).

Once you have specified the above details, click 'Next'.

1.2.9 Configuring Scheduler

Only for Custom Installation

This section describes the method to configure scheduler data source. The following screen is displayed.

Oracle FLEXCUBE Universal Installer		
Oracle FLEXCUBE Investor Serv	icing	ORACLE
Property File Creation Current screen provides an option for Schedu	ler configuration	
Scheduler Datasource	jdbc/fcjSchedu	llerDS
Scheduler Log Rotation Interval	WEEKLY	-
Provide the Scheduler Datasource Name in the Provide the Scheduler Log Rotation Value To Scheduler Log to another file at specific time	move old	ince.
Log	Back	Next Exit

5. Specify the Scheduler Datasource which Oracle FLEXCUBE Investor Servicing will access.

6. Click 'Next'. The following screen is displayed.

4	Oracle FLEXCUBE Universal Installer		
	Oracle FLEXCUBE Investor Se	rvicing	ORACLE
	Property File Creation Current screen provides an option for config	guring Scheduler Destination (Queue.
	Notify Destination	QUEUE]
1	Queue Name Queue Connection Factory	NOTIFY_DEST_QUEUE	Secure
	Notify Queue Location	Internal 💌	
	Log	Back	Next Exit

7. Specify the following details:

Notify Destination

Specify the notify destination. Choose one of the following options:

- QUEUE
- TOPIC

Queue Name

Set 'NOTIFY_DEST_QUEUE' as the destination queue name.

Queue Connection Factory

Set 'NotifyDestTCF' as the queue connection factory.

Secure

Check this box to indicate that it is a secured queue connection factory. If you check this box, you will be prompted to specify the caller ID and caller password as shown in the following screen.

Property File Creation		
Current screen provides an option fo	or configuring Scheduler Destinat	ion Queue.
Notify Destination	QUEUE	-
Queue Name	NOTIFY_DEST_QUEUE	
Queue Connection Factory	NotifyDestQCF	✓ Secure
Caller ID		
Caller Password		
Notify Queue Location	Internal 💌	

Caller ID

Specify the caller ID for the secured queue connection factory.

Caller Password

Specify the password for the caller ID to access the secured queue connection factory.

Note: If the queue connection factory is not secured, i.e., if you have not checked the box 'Secure', the installer will not display the fields 'Caller ID' and 'Caller Password'. You need not provide these details in that case.

Notify Queue Location

Specify the notify queue location. Choose one of the following options:

- Internal
- External

Note: For Oracle WebLogic application server, the notify queue location should be selected as 'Internal'. If you choose 'Internal' as the 'Notify Queue Location', the screen provided in the following step will not be displayed. You will be navigated to next step where you can specify the notify deferred queue name and connection factory.

8. If you choose 'External', you will be navigated to the following screen.

No.	Name	Value	
1 F	Provide Url	iiop://localhost:1010	
2 8	Security Principal	•••••	
3 8	Security Credential	•••••	

9. You need to specify the following details of the external queue.

Provider URL

Specify the provide URL (iiop://localhost:1010).

1010 is the default IIOP port.

Security Principal

Specify the login ID to access the application server.

Security Credentials

Specify the password to access the application server.

10. Click 'Next' to proceed with scheduler configuration.

Note: If you choose 'Internal' as the 'Notify Queue Location', you will be directly navigated to the following screen. In that case, the installer will not show the screen explained in the previous step.

🕌 Oracle FLEXCUBE Universal Installer

1.2.10 Setting EMS Properties

Only for Custom Installation except EMS FTP/FTPS

You will be navigated to the 'Scheduler EMS Properties' screen. Here, you need to set the EMS details.

- 1. Set the EMS properties:
- 2. Specify the following details:

Property File Creation Current screen provides an option for Scheduler EMS Queue configuring.			
No.	Name	Value	
1	Incoming Dead Letter Queue Name	EMS_QUEUE_DLQ	^
2	Incoming backup Queue Name	EMS_QUEUE_BACK	
3	Incoming Queue Connection Factory	EmsQcf	=
4	Secure Incoming Queue Connection		
5	Incoming Queue Caller Id		
6	Incoming Queue Caller Password		
7	Outgoing Dead Letter Queue Name	EMS_QUEUE_DLQ	
8	Outgoing Queue Connection Factory	EmsQcf	•

Incoming Dead Letter Queue Name

Set 'EMS_QUEUE_DLQ' as the incoming dead letter queue name.

Incoming Backup Queue Name

Set 'EMS_QUEUE_BACK' as the incoming backup queue name.

Incoming Connection Factory

Specify the name of the incoming connection factory to which EMS listens. You need to create this connection factory at the application server.

For details on connection factory creation, follow the steps described for creation of notify connection factories.

Secure Incoming Queue Connection

Check this box to indicate that it is a secured queue connection.

Incoming Queue Caller ID

Specify the caller ID for the secured queue connection.

Incoming Queue Caller Password

Specify the caller password for the secured queue connection.

Outgoing Dead Letter Queue Name

Set 'EMS_QUEUE_DLQ' as outgoing dead letter queue name.

OutGoing Connection Factory

Specify the name of the outgoing connection factory to which EMS listens. You need to create this connection factory at the application server.

For details on connection factory creation, follow the steps described for creation of notify connection factories.

Secure Outgoing Queue Connection

Check this box to indicate that it is a secured outgoing queue connection.

Outgoing Queue Caller ID

Specify the caller ID for the secured queue connection.

Outgoing Queue Caller Password

Specify the caller Password for the secured queue connection.

Outgoing Queue Provider URL

In case EMS OUT MDB is to be configured to queue, you need to specify the URL for outgoing provider based on the application server. By default, the Installer displays the outgoing queue provider URL for Oracle WebLogic.

This value is application server dependent.

The details of Outgoing Queue Provider URL to be used for different application servers are given below:

Application Server	EMS Out Initial Context Factory
Oracle WebLogic	t3:// <ip_adress>:port E.g.: t3://10.10.10.10:1010 Here, 10.10.10.10 represents the local host and 1010 to the target server default port (AdminServer/ManagedServer).</ip_adress>
IBM WebSphere	iiop:// <ip_adress>:port E.g.: iiop://10.10.10.10:1010 Here, 1010 represents the default iiop port</ip_adress>

ORACLE

Queue Principal

If EMS OUT MDB has to be configured to queue, you need to specify the EMS out queue principal. This is the user name for the application server in which the queue is configured.

Queue Credential

If EMS OUT MDB has to be configured to queue, you need to specify the EMS out queue credential. This is the password for the above user name created for application server in which the queue configured.

Incoming Queue Name

Specify the name of the incoming queue for which EMS is configured. By default, this is set as 'NOTIFY_QUEUE_DLQ'.

Outgoing Queue Name

Specify the name of the outgoing queue for which EMS is configured. By default, this is set as 'NOTIFY_QUEUE_DLQ'.

SFMS Incoming Queue

Specify the SFMS Incoming Queue.

RTGS Incoming Queue

Specify the RTGS incoming Queue.

3. Once you have specified the above details, click 'Next'.

-	erty File Creation		
Curre	nt screen provides an option for S	cheduler EMS FTP/FTPS con	figuring.
No.	Name	Value

For Default Installation following screen is shown.

No.	Name	Value
1	Server	10.10.10
2	Userid	OFSS
3	Password	•••••

4. Specify the following details:

File Transfer Mode FTPS

Specify the mode of transferring files to EMS. Choose one of the following:

- FTPS(defaulted in default installation)
- SFTP
- HTTP

Server

Specify the server IP address for the selected file transfer mode.

User ID

Specify the user ID to access the server of the file transfer mode.

Password

Specify the password to for the above user ID.

File Type

Specify the type of file that is transferred. By default, the Installer sets it as '.txt'.

SWIFT Message Delimiter

Specify the character which is used as the message delimiter.

ORACLE

SWIFT Message Terminator

Specify the character which is used as the message terminator.

5. Once you have specified the above details, click 'Next'. The following screen is displayed.

6. Specify the following details:

Signature Block

Check this box to enable signature block.

Keystore File Name

Specify the keystore file name.

Keystore Alias Name

Specify the keystore alias name.

Keystore Password

Specify the keystore password.

7. Once you have specified the above details, click 'Next'.

1.2.11 Setting BIP and BIP Advice Report

Only for Custom Installation

This screen describes how to create the property file. Here, you need to set the BIP and BIP Advice report details.

1. The following screen is displayed:

🍰 Oracle FLEXCUBE Universal Installer		- • •			
Oracle FLEXCUBE Investo	r Servicing	ORACLE			
Property File Creation Current screen provides an option for Scheduler BIP and BIP Advice report.					
Bip Queue Name Bip DeadLetter Queue Name	INTERNAL_BIPREPORT_QUEUE				
BipAdvice Queue Name BipAdvice DeadLetter Queue Name	INTERNAL_BIPADVREPORT_QU				
Queue connection factory	BIPQCF	Secure			
Log	Back	Next Exit			

2. Specify the following details to set the EMS properties:

BIP Queue Name

Specify the BIP queue name as 'INTERNAL_BIPREPORT_QUEUE'.

BIP DeadLetter Queue Name

Specify the BIP deadletter queue name as 'INTERNAL_BIP_QUEUE_DLQ'.

BIPAdvice Queue Name

Specify the BIP advice queue name as 'INTERNAL_BIPADVREPORT_QUEUE'.

BIPAdivce DeadLetter Queue Name

Specify the BIP adivce dead letter queue name as 'INTERNAL_BIP_ADVICE_QUEUE_DLQ'.

Queue Connection Factory

Specify the queue connection factory as 'BIPQCF'.

Secure

Check this box to indicate that it is a secured deffered queue connection factory. If you check this box, you will be prompted to enter the caller ID and caller password as shown in the following screen.

Property File Creation		
Current screen provides an option for	Scheduler BIP and BIP Advice report.	
Bip Queue Name	INTERNAL_BIPREPORT_QUEUE]
Bip DeadLetter Queue Name	INTERNAL_BIP_QUEUE_DLQ]
BipAdvice Queue Name	INTERNAL_BIPADVREPORT_QUEUE]
BipAdvice DeadLetter Queue Name	INTERNAL_BIP_ADVICE_QUEUE_DLQ]
Queue connection factory	BIPQCF	Secure
Caller ID]
Caller password		
Caller password		

- 3. Specify the caller ID and caller password for the secured queue connection factory.
- 4. Once you have specified the above details, click 'Next'.

1.2.12 Setting GI Upload Properties

Only for Custom Installation

This screen describes how to specify the GI upload property details. Here you need to set the GI Upload properties.

1. The following screen is displayed:

🛛 Oracle FLEXCUBE Universal Installer					
Oracle FLEXCUBE Inv	estor Servicing	ORACLE			
Property File Creation Current screen provides an que	eue configuration details for Scheduler G	il Upload.			
Queue Name Dead Letter Queue Name Queue connection factory	INTERNAL_GI_UPLOAD_QUEUE	Secure			
Log	Back	Next Exit			

2. Specify the following details:

Queue Name

Specify the queue name as 'INTERNAL_GI_UPLOAD_QUEUE'.

Dead Letter Queue Name

Specify the dead letter queue name as 'INTERNAL_GI_UPLOAD_DLQ'.

Queue Connection Factory

Specify the queue connection factory as 'GI_UPLOAD_QCF'.

Secure

Check this box to indicate that it is a secured deffered queue connection factory. If you check this box, you will be prompted to enter the caller ID and caller password as shown in the following screen.

🚣 Oracle FLEXCUBE Universal Inst	taller	
Oracle FLEXCUBE In	vestor Servicing	ORACLE
Property File Creation Current screen provides an qu	eue configuration details for Scheduler C	N Upload.
Queue Name Dead Letter Queue Name Queue connection factory Caller ID Caller Password	INTERNAL_GI_UPLOAD_QUEUE INTERNAL_GI_UPLOAD_DLQ GI_UPLOAD_QCF	✓ Secure
Log	Back	Next Exit

- 3. Specify the caller ID and caller password for the secured queue connection factory.
- 4. Once you have specified the above details, click 'Next'.

1.2.13 Setting Report Properties

This section describes the methods to set report properties.

1. The following screen is displayed.

-	erty File Creation nt screen provides an optio	n for OFTW Details	
No.	Name	Value	
1	OFTW Recording Type	REMOTE	
2	OFTW User	infra	
3	OFTW Password	•••••	
4	OFTW Provider URL	t3://ip:port	

2. Click 'Next' to navigate to next page.

-	Property File Creation Current screen provides an option for modifying the Oracle BI Publisher properties.				
No.	Name	Value			
1	Server End Point	http://10.10.10.10:0101/xmlpserver/s	ervices/v2/R		
2	Name Space	http://xmlns.oracle.com/oxp/service/PublicReport			
3	User Name	Administrator			
4	Password	•••••			
5	Reports Advice Spool Path	/ReportsSpool			
6	Advice Type	NATIVE			
7	BIP Server Version	11g			
8	BIP Time Zone	IST			

3. Specify the following details:

Server End Point

Specify the BIP end point.

If BIP Server Version is 10g, the server end point should end with 'PublicReportService_v11'.

Eg: BIP_END_POINT=http://<bip server url>/xmlpserver/services/PublicReportService_v11

If BIP Server Version is 11g, the server end point should end with 'PublicReportService?WSDL'.

Eg: BIP_END_POINT=http://<bip server url>/xmlpserver/services/PublicReportService?WSDL

Name Space

Specify the BIP name space.

By default, the installer displays 'http://xmlns.oracle.com/oxp/service/PublicReportService'.

User Name

Specify the BIP user name. By default, the Installer displays 'Administrator'.

Password

Specify the password for the above user name. By default, the Installer sets it as 'Administrator'.

Reports Spool Path

Specify the reports spool path. By default, the Installer displays 'D:\\BrnDbgs\\ADV\\'.

Advice Type

Specify the advice type. You can choose one of the following:

- NATIVE This advice type is used for generating advices in text format
- BIP This advice type is used for generating advices in PDF format.

BIP Server Version

Specify the qualified BIP server version. You can select the appropriate one from the drop-down list.

BIP Time Zone

Specify valid Time Zone for the BIP server. You can select the appropriate one from the dropdown list.

4. Once you have specified the above details, click 'Next'.

1.2.14 Setting BPEL Properties

If you have included BPEL option in the setup, then you need to set the BPEL properties.

1. Set the BPEL properties.

	Property File Creation Current screen provides an option for modifying the BPEL property values.				
No.	Name	Value			
1	Factory Initial	weblogic.jndi.WLInitialContextFactory		-	
2	Provide Url	t3://10.10.10.10:0101			
3	Security Principal	oc4jadmin			
4	Security Credentials	•••••		=	
5	Soa Partition Name	default			
6	Domain Password	•••••			
7	Dedicated Connection				
8	BPEL Relam Name	FLEXCUBE		-	

2. Specify the following details:

Factory Initial

Specify the factory initial.

Provider URL

Specify the URL of the server. Enter the IP address, target server port (AdminServer/ManagedServer) and the context root.

Security Principal

Specify the user name to access the application server where BPEL is installed.

Security Credential

Specify the password for the above user name.

Soa Server Name

Specify the Soa Server Name. By default it will be the Installer sets it to 'default'.

ORACLE

Domain Password

Specify the domain password for which SOA server is extended

Dedicated Connection

Check this box to indicate that this connection is not used for other purposes.

BPEL Realm Name

Specify the BPEL realm name.

BAM URI

Specify the BAM URI.

BPM Installed

Check this box if the BPM is installed.

3. Once you have specified the above details, click 'Next'.
