This chapter provides a brief description of the SGG-MDM.Manage Device Remote Connect (Echelon) business process and associated process diagrams. This includes:

- Brief Description
**Brief Description**

**Business Process:** 5.6.3.4b SGG-MDM.Manage Device Remote Connect (Echelon)

**Process Type:** Process

**Parent Process:** 5.6.3 SGG-MDM.Manage Devices

**Sibling Processes:** 5.6.3.1b SGG-MDM.Manage On-Demand Read (Echelon), 5.6.3.6b SGG-MDM.Manage Device Device Status Check (Echelon)

This process gets initiated when a 3rd Party application (E.g. Customer Care and Billing application), makes a request for a Device Remote Connect or a MDM or SGG Authorized User manually requests for a Device Remote Connect within SGG system. SGG initiates Remote Connect by communicating with respective Echelon Head-End System that in turn communicates with the Smart Meter device, for device connection, and sends response back to SGG. Head-End System also checks load status and collects meter read from Smart Meter device, if required, as part of Device Remote Connect process.
Chapter 2

Detailed Business Process Model Description

This chapter provides a detailed description of the SGG-MDM.Manage Device Remote Connect (Echelon) business process. This includes:

- Business Process Diagrams

Integration Layer

3.3 Receive and Process Message

Take No Further Action

2.1 Communicate and Transform Message

10.3 Send Response "Connect Failed" to Requester

10.2 Cancel Outstanding Completion Events

4.9 Cancel Outstanding Outbound Communication

10.1 Transition Activity to Discard State

OIAF
5.6.3.4b SGG-MDM.V2.0.0. Manage Device Remote Connect (Echelon). Manage Manual Connect Device Completion Event

### Manual Connect Device Completion Event Process

1. **Request Device Completion Event**
   - 10.4 Select Completion Event Type and Populate Data
   - 11.4 Request to Execute
   - 11.5 Transition Device Connect Completion Event to Executed State
   - 12.6 Transition Device Connect Completion Event to Executed State
   - 13.7 Update Device Install Event to Connect State
   - 8.9 Update Device Install Event to Connect State
   - Take No Further Action

2. **Review Event**
   - Delete?
   - Discard?
   - Update?
   - Execute?
   - Validate and Delete Device Connect Completion Event in Pending State

5.6.3.4b SGG-MDM.Manage Device Remote Connect (Echelon) Page 9

Detailed Business Process Model Description 2-12
Manage Device Remote Connect (Echelon) Description

This section includes detailed descriptions of the steps involved in the SGG-MDM.Manage Device Remote Connect (Echelon) business process, including:

- 1.0 Gather Requirements to Create Command
- 1.1 Select Command Activity Type
- 1.2 Select Device and Populate Command Execution Data
- 1.3 Submit Request
- 1.4 Communicate and Transform Remote Connect Command to SGG Format
- 1.5 Add to JMS Queue
- 1.6 Call Web service
- 1.7 Identify Device and Head-End (Service Provider)
- 1.8 Determine if Device is Smart Device
- 1.9 Determine Method to Create Remote Connect Activity
- 2.0 Determine Send Method and Send Error Message
- 2.1 Communicate and Transform Message
- 2.2 Receive and Process Message
- 2.3 Determine Activity Type
- 2.4 Validate Required Data
- 2.5 Create Remote Connect Activity in Pending State
- 2.6 Validate Ability to Process Command and Transition Activity to Validate State
- 2.7 Transition Activity to Validation Error State and Log Error
- 2.8 Transition Activity to Connection Ready State
- 3.0 Evaluate Availability of Command Execution Date and Time
- 3.1 Review Activity in Eff. Date State
- 3.2 Request to Delete Activity
- 3.3 Delete Activity
- 3.4 Request to Discard Activity
- 3.5 Populate Changes and Request to Update
- 3.6 Update Activity
- 3.7 Request to Connect Device
- 3.8 Transition Activity to Connection Ready State
- 3.9 5.6.3.6b SGG-MDM.Manage Device Device Status Check (Echelon)
- 4.0 Transition Activity to Connection Ready State
- 4.0.1 Evaluate Request if Meter Read is Required
- 4.1 5.6.3.1b SGG-MDM.Manage On-Demand Read (Echelon)
- 4.2 Transition Activity to Connection Ready State
- 4.3 Transition Activity to Communication in Progress State
- 4.4 Evaluate Wait Period for Response
- 4.4 Evaluate Wait Period for Response
- 4.5 Transition Activity to Communication Error State and Log Error
- 4.6 Review Activity in Comm. In Progress State
- 4.7 Request to Retry Activity
- 4.8 Transition Activity to Retry State
- 4.9 Cancel Outstanding Outbound Communication
- 5.0 Initiate Remote Connect Outbound Communication
- 5.1 Create Outbound Communication in Pending State
- 5.2 Validate Ability to Process Outbound Communication and Transition to Validate State
- 5.3 Transition Outbound Communication to Validation Error State and Log Error
- 5.4 Populate Connect Request Details and Transition to Awaiting Response State
- 5.5 Create and Send Outbound Communication Message to Echelon Head-End System
- 5.6 Communicate and Transform Message to Echelon Format
- 5.7 Receive and Process Request Message
- 5.8 Receive and Process Device Connect Request
- 5.9 Analyze Message and Send Acknowledgement
- 6.0 Communicate and Transform Acknowledgement to SGG Format
- 6.1 Evaluate Acknowledgement
- 6.2 Log Error and Transition to Response Error State
- 6.3 Evaluate Wait Period for Response
- 6.4 Log Error and Transition to Response Error State
- 6.5 Review Outbound Communication
- 6.6 Request to Discard
- 6.7 Transition Outbound Communication to Discard State
- 6.8 Populate Changes and Request to Update
- 6.9 Update Outbound Communication
- 7.0 Request to Retry
- 7.1 Transition Outbound Communication to Retry State
- 7.2 Send Remote Connect Response to Echelon Head End System
- 7.3 Receive and Process Remote Connect Response to Echelon SGG
- 7.4.1 Identify Response Message and Processing Method
- 7.5 Pre-process Inbound Message
- 7.6 Create Inbound Communication in Pending State
- 7.7 Validate Ability to Process Inbound Communication and Transition to Validate State
- 7.8 Transition Inbound Communication to Validation Error State and Log Error
- 7.9 Transition to Create Completion Event State
- 8.0 Validate and Create Device Connect Completion Event in Pending State
- 8.1 Transition Inbound to Completed State
- 8.2 Transition Outbound Communication to Completed State
- 8.3 Transition Activity to Execution Completion Event State
- 8.4 Transition Meter Read Completion Event to Executed State
- 8.5 Preprocess IMD
- 8.6 Transition Device Connect Completion Event to Executed State
- 8.7 Update Device Install Event to 'Connect' State
- 8.8 Transition Activity to Completion Event Error State and Log Error
- 8.9 Transition Activity to Waiting for Measurement State
- 9.1 4.2.1.2 MDM.Manage VEE and VEE Exceptions
- 9.2 Retrieve and Store Final Measurements
- 9.3 Retrieve and Store Initial Measurements
- 9.4 Monitor IMD Availability within Allowable Period
- 9.5 Transition Activity to Wait Expired Error State and Log Error
- 9.6 Review Activity Waiting for Measurement
- 9.7 Request to Complete
- 9.8 Transition Activity to Completion State
- 9.9 Create and Send Connect Success Notification to Requester
- 10.0 Create and Send Meter Read to Requester
- 10.1 Transition Activity to Discard State
- 10.2 Cancel Outstanding Completion Events
- 10.3 Send Response “Command Failed” to Requester
- 10.4 Analyze Requirements to Create Event
- 10.5 Select Completion Event Type and Populate Data
- 10.6 Request to Create Completion Event
- 10.7 Review Event
- 10.8 Request to Delete Event
- 10.9 Delete Completion Event
- 11.0 Request to Discard Event
- 11.1 Transition to Discard State and Discard Completion Event
- 11.2 Request to Update Event
- 11.3 Update Completion Event
- 11.4 Request to Execute
- 11.5 Gather Requirements to Cancel Command
- 11.6 Select Cancel Command Activity Type
- 11.7 Populate Cancel Command Execution Data
1.0 Gather Requirements to Create Command

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

Actor/Role: MDM or SGG Authorized User
**Description:** MDM or SGG Authorized User analyzes requirements and gathers information required to create Remote Connect command.

### 1.1 Select Command Activity Type

See [Manage Device Remote Connect (Echelon) Page 1](#) on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User selects Activity Type to create a Remote Connect command request.

### 1.2 Select Device and Populate Command Execution Data

See [Manage Device Remote Connect (Echelon) Page 1](#) on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User selects the device and populates required data such as request effective date, request expiration date, etc. User also indicates if the command is optional, if future disconnect command is present, and can even indicate if start measurement is to be retrieved as part of connect process.

### 1.3 Submit Request

See [Manage Device Remote Connect (Echelon) Page 1](#) on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User submits request using manual request screen.

### 1.4 Communicate and Transform Remote Connect Command to SGG Format

See [Manage Device Remote Connect (Echelon) Page 1](#) on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** Integration Layer

**Description:** Integration Layer facilitates the communication between the 3rd Party application and the SGG application. It receives the Remote Connect request, transforms, and converts the request into format compatible with SGG Application.

### 1.5 Add to JMS Queue

See [Manage Device Remote Connect (Echelon) Page 1](#) on page 2-2 for the business process diagram associated with this activity.
### 1.6 Call Web service

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** Integration Layer

**Description:** Integration Layer calls web services to process further the Remote Connect request.

### 1.7 Identify Device and Head-End (Service Provider)

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Generic Device Connect Processing

**Actor/Role:** SGG

**Description:** SGG initiates pre-processing of the Remote Connect request that came from 3rd Party Application. It attempts to read the request message and determines the Device for which the connect request is made, and the Head-End system that communicates with the device.

### Entities to Configure

<table>
<thead>
<tr>
<th>Device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head-End System (Service Provider)</td>
</tr>
</tbody>
</table>

### Business Objects

<table>
<thead>
<tr>
<th>Business Objects</th>

</thead>
<tbody>
<tr>
<td>D1-GenericConnect</td>
</tr>
<tr>
<td>D1-DDR (Determine Device and Recipient)</td>
</tr>
</tbody>
</table>

### Entities to Configure

<table>
<thead>
<tr>
<th>Device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Device Configuration</td>
</tr>
</tbody>
</table>

### 1.8 Determine if Device is Smart Device

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Generic Device Connect Processing

**Actor/Role:** SGG

**Description:** The application determines whether the request for Remote Connect is for Smart Device or not.

**Note:** Currently application processes requests for Smart Devices only. Service Requests functionality will be included in later releases.
1.9 Determine Method to Create Remote Connect Activity

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Generic Device Connect Processing

**Actor/Role:** SGG

**Description:** SGG determines the method to create Activity if the device is found to be a Smart Device.

### Entities to Configure

- Device Configuration
- Service Provider

### Business Objects

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-GenericConnect</td>
<td>D1-CDCSRTBO (Transform to Connect Command Request or Connect Service Request Transaction BO)</td>
</tr>
</tbody>
</table>

2.0 Determine Send Method and Send Error Message

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG determines the method to send the error message to 3rd Party application and sends it.

**Note:** Sending mechanism could be different and depends on application landscape. Currently it is determined based on customer requirements.

2.1 Communicate and Transform Message

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** Integration Layer

**Description:** Integration Layer receives the outbound message from SGG, transforms, and converts it into format compatible with 3rd Party Application.
2.2 Receive and Process Message

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** 3rd Party application  
**Description:** 3rd Party Application receives message from SGG and processes it.

### 2.3 Determine Activity Type

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Pre-process Activity  
**Actor/Role:** SGG  
**Description:** SGG identifies the Activity Type to be assigned to the Activity to be created.

**Note:** Typically system has different Activity types configured to reflect different business scenarios, and currently the system will select the Activity type related to Connect command action.

#### Entities to Configure

<table>
<thead>
<tr>
<th>Activity Type</th>
<th>To Do Type</th>
<th>To Do Role</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-DETACTTYP (Determine Activity Type)</td>
</tr>
</tbody>
</table>

### 2.4 Validate Required Data

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Pre-process Activity  
**Actor/Role:** SGG  
**Description:** SGG validates the availability and correctness of required information. Usually, system checks for Requester information, Device information, Effective Date/Time and Expiration Date/Time, etc.

#### Entities to Configure

| Device | Edge Application Details |
2.5 Create Remote Connect Activity in Pending State

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG creates Remote Connect Activity in 'Pending' state.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-GINPVAL (Common Input Validation)</td>

</tr>
<tr>
<td></td>
<td>D1-MFRSMVAL (Measurement Fields for Retrieve Start)</td>
</tr>
<tr>
<td></td>
<td>Measurement Validation</td>
</tr>
</tbody>
</table>

2.6 Validate Ability to Process Command and Transition Activity to Validate State

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Validate Ability to Process Command

**Actor/Role:** SGG

**Description:** SGG validates ability to process Remote Connect request. Typically, system validates current Device connection status, Presence of at least one Scalar MC, Ability of Head-End to support On-demand Read, Ability of Head-End to perform Connect, and also checks if already any Connect command or Disconnect command is issued, etc.

<table>
<thead>
<tr>
<th>Entities to Configure</th>

</tbody>
</table>

### 2.7 Transition Activity to Validation Error State and Log Error

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Group:** Validate Ability to Process Command

**Actor/Role:** SGG

**Description:** If any error occurs during validations, SGG transitions the Activity to 'Validation Error' state and logs an error.

### 2.8 Create To Do

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** Once an error is logged, SGG creates a 'To Do' entry for the Authorized User.
2.9 Send Response "Command Received" and Transition to Wait for Eff. Date State

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

Actor/Role: SGG

Description: SGG sends command received acknowledgement to the 3rd party requester.

<table>
<thead>
<tr>
<th>Entities to Configure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing Role</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>

</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-RRER (Send Received Response to External Requester)</td>
</tr>
<tr>
<td>D1-RemoteConnectType</td>
<td>D1-CTDEBOE (Create To Do Entry for BO in Error)</td>
</tr>
</tbody>
</table>

3.0 Evaluate Availability of Command Execution Date and Time

See Manage Device Remote Connect (Echelon) Page 1 on page 2-2 for the business process diagram associated with this activity.

Actor/Role: SGG

Description: If command's effective date and time is available, SGG uses it to determine execution date and time. If the effective Date and Time is not available, SGG processes the Outbound Communication immediately. If effective Date and Time is in the future System it waits in 'Wait for Effective Date' state, else, it processes the Outbound Communication.

<table>
<thead>
<tr>
<th>Customizable Processes</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-CRWT (Command Request Wait - Monitor)</td>
</tr>
</tbody>
</table>
3.1 Review Activity in Eff. Date State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User reviews and analyzes the Activity.

3.2 Request to Delete Activity

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** If MDM or SGG Authorized User determines that the Activity is not required, Authorized User requests to delete Activity record.

3.3 Delete Activity

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG deletes the Activity.

**Note:** Once an Activity record is deleted it is permanently removed from the system and cannot be recovered. This option is not recommended for common business practice.
3.4 Request to Discard Activity

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User if determines that the Activity is not required, Authorized User requests to discard it.

3.5 Populate Changes and Request to Update

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User modifies Activity data and requests to perform appropriate updates.

3.6 Update Activity

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG updates the Activity with data populated by Authorized User.

3.7 Request to Connect Device

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User
Description: If command's effective date and time is in the future and MDM or SGG Authorized User identifies the need to execute command immediately, Authorized User requests to initiate the command processing.

### 3.8 Transition Activity to Connection Ready State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG transitions the Activity to 'Connection Ready' state to initiate outbound communication when command effective date and time has reached. The other possible option of transition and initiation is when the Authorized User manually makes a request.

#### Customizable Processes

- D1-CRWT (Command Request Wait - Monitor)

#### Entities to Configure

- Effective Date and Time

### 3.9 5.6.3.6b SGG-MDM.Manage Device Device Status Check (Echelon)

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG determines the processing method for Device Status Check Outbound Communication and initiates status check. Please refer to process 5.6.3.6b SGG-MDM.Manage Device Device Status Check (Echelon) Command for further details.

#### Business Objects

- D1-RemoteConnect

#### Available Algorithms

- D1-WAITEFFDT (Wait for Effective Date)
- D1-CLCOC (Create Load Check Outbound Communication)
4.0 Transition Activity to Connection Ready State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG transitions the Activity to 'Connection Ready' state.

---

**Business Object**

D1-RemoteConnect

---

### 4.0.1 Evaluate Request if Meter Read is Required

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG evaluates and checks if there exists any request to retrieve measurement.

---

**Business Objects**

<table>
<thead>
<tr>
<th>Business Object</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-CODROC (Create On-Demand Read for Start Measurement)</td>

</table>

---

### 4.2 Transition Activity to Connection Ready State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG transitions the Activity to 'Connection Ready' state.
4.3 Transition Activity to Communication in Progress State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG transitions Activity to 'Communication in Progress' state to monitor response for the outbound communication.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>F1-AT-RQJ (Transition to Default Next Status)</td>
</tr>
</tbody>
</table>

4.4 Evaluate Wait Period for Response

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG periodically checks if the Activity expiration wait time configured for monitoring the response has expired or not.

**Customizable Processes**

- D1-CRWT (Command Request Wait - Monitor)

**Entities to Configure**

- Activity Type

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-WTTMOUTEX (Wait Time Out - Transition to Exception)</td>
</tr>
</tbody>
</table>

4.5 Transition Activity to Communication Error State and Log Error

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG
**Description:** If the wait time for outbound communication response has expired, SGG transitions the Activity to 'Communication Error' state and logs an error.

**Business Object**

D1-RemoteConnect

### 4.6 Review Activity in Comm. In Progress State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User reviews and analyzes the Activity.

**Business Object**

D1-RemoteConnect

### 4.7 Request to Retry Activity

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User requests to recreate the Outbound Communication process.

**Business Object**

D1-RemoteConnect

### 4.8 Transition Activity to Retry State

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG transitions Activity to 'Retry' state.

**Business Object**

D1-RemoteConnect

### 4.9 Cancel Outstanding Outbound Communication

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

**Actor/Role:** SGG
Description: SGG cancels any existing outstanding Outbound Communications.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-COOC (Cancel Outstanding Outbound Communication)</td>
</tr>
</tbody>
</table>

5.0 Initiate Remote Connect Outbound Communication

See Manage Device Remote Connect (Echelon) Page 2 on page 2-3 for the business process diagram associated with this activity.

Actor/Role: SGG

Description: SGG determines the processing method for Remote Connect Outbound Communication and initiates the Outbound Communication process.

<table>
<thead>
<tr>
<th>Entities to Configure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Outbound Communication Processing Method</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-CRCOC (Create Remote Connect Outbound Communication)</td>
</tr>
</tbody>
</table>

5.1 Create Outbound Communication in Pending State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

Group: Outbound Communication Process

Actor/Role: SGG

Description: SGG creates Remote Connect Outbound Communication in 'Pending' state.

<table>
<thead>
<tr>
<th>Entities to Configure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Outbound Communication Processing Method</td>
</tr>
<tr>
<td>Outbound Communication Type</td>
</tr>
</tbody>
</table>

<table>
<thead>

<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D1-CRCOC (Create Remote Connect Outbound Communication)</td>
</tr>
<tr>
<td></td>
<td>D1-GDRFFPA (Default required fields from Parent Activity)</td>
</tr>
</tbody>
</table>
5.2 Validate Ability to Process Outbound Communication and Transition to Validate State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** SGG validates ability to process Outbound Communication. Typically, system checks for communication type.

### Entities to Configure

Outbound Communication Type

### Business Objects

<table>
<thead>
<tr>
<th>Business Object</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D1-VAL.COMTP (Validate Communication Type)</td>
</tr>
<tr>
<td></td>
<td>F1-AT-RQJ (Transition to Default Next Status)</td>
</tr>
</tbody>
</table>

5.3 Transition Outbound Communication to Validation Error State and Log Error

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** If any error occurs during validations, SGG transitions the Outbound Communication to 'Validation Error' state and logs an error.

### Business Object

D4-ConnectLoad

5.4 Populate Connect Request Details and Transition to Awaiting Response State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** SGG transitions Outbound Communication to 'Awaiting Response' state and populates Remote Connect Outbound Communication message details.
5.5 Create and Send Outbound Communication Message to Echelon Head-End System

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** SGG creates Outbound Communication and sends it to Head-End System.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D4-PCLRSD (Populate Connect Load Request Send Detail)</td>
</tr>
</tbody>
</table>

5.6 Communicate and Transform Message to Echelon Format

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Group:** Integration Layer (SGG BPEL)

**Actor/Role:** SGG

**Description:** Integration layer of SGG facilitates the communication between the SGG and Echelon Head-End System. It receives the Outbound Communication request, transforms, and converts the request into format compatible with Head-End System.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D4-COUTMSGC (Create Outbound Message For Connect Load)</td>
</tr>
</tbody>
</table>

5.7 Receive and Process Request Message

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** Head-End System

**Description:** Head-End System receives the Remote Connect request and processes it.

**Note:** This is external and outside the Oracle SGG environment.
### 5.8 Receive and Process Device Connect Request

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Actor/Role:** Smart Meter  
**Description:** Smart Meter Device receives request from Head-End System for Remote Connect and processes it.  
**Note:** This is external and outside the Oracle SGG environment.

### 5.9 Analyze Message and Send Acknowledgement

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Actor/Role:** Head-End System  
**Description:** Head-End System on receipt of Remote Connect request from SGG, analyzes, and sends a real-time acknowledgement back to SGG.

### 6.0 Communicate and Transform Acknowledgement to SGG Format

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Group:** Integration Layer (SGG BPEL)  
**Actor/Role:** SGG  
**Description:** Integration layer of SGG facilitates the communication between the Head-End System and SGG. It receives the synchronous acknowledge, transforms, and converts the acknowledgement into format compatible with SGG.

### 6.1 Evaluate Acknowledgement

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Actor/Role:** SGG  
**Description:** SGG evaluates acknowledge and checks the success of sending Outbound Communication.

### Business Objects Available Algorithms

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D4-EVALRESP (Evaluate Response)</td>
</tr>
</tbody>
</table>

### 6.2 Log Error and Transition to Response Error State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.
Group: Outbound Communication Process
Actor/Role: SGG
Description: SGG logs error and transitions Outbound Communication to Response Error state.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D4-EVALRESP (Evaluate Response)</td>
</tr>
</tbody>
</table>

6.3 Evaluate Wait Period for Response

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

Group: Outbound Communication Process
Actor/Role: SGG
Description: SGG periodically checks if the Outbound Communication expiration wait time configured for monitoring the response has expired or not.

<table>
<thead>
<tr>
<th>Customizable Processes</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-COMM (Batch Control for Communications)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Entities to Configure</th>
</tr>

</tbody>
</table>

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D1-TIMEOUT (Time Out)</td>
</tr>
</tbody>
</table>

6.4 Log Error and Transition to Response Error State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

Group: Outbound Communication Process
Actor/Role: SGG
Description: SGG logs error and transitions Outbound Communication to Response Error state.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
<td>D1-TIMEOUT (Time Out)</td>
</tr>
</tbody>
</table>
6.5 Review Outbound Communication

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User reviews and analyzes the Outbound Communication.

---

**Business Object**

D4-ConnectLoad

6.6 Request to Discard

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User if determines that the Outbound Communication is not required, Authorized User requests to discard it.

---

**Business Object**

D4-ConnectLoad

6.7 Transition Outbound Communication to Discard State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** SGG transitions Outbound Communication to 'Discard' state.

**Note:** When an Outbound Communication is 'Discarded' it still remains in the system database and is not removed, hence, this is the preferred business practice to perform.

---

**Business Object**

D4-ConnectLoad

6.8 Populate Changes and Request to Update

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process
**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User modifies Outbound Communication data and requests to perform appropriate updates.

---

**Business Object**

D4-ConnectLoad

---

### 6.9 Update Outbound Communication

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** SGG updates the Outbound Communication with data populated by Authorized User.

---

**Business Object**

D4-ConnectLoad

---

### 7.0 Request to Retry

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User requests to recreate the Outbound Communication.

---

**Business Object**

D4-ConnectLoad

---

### 7.1 Transition Outbound Communication to Retry State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process

**Actor/Role:** SGG

**Description:** SGG transitions Outbound Communication to 'Retry' state.
7.2 Send Remote Connect Response to Echelon Head End System

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process
**Group:** Inbound Communication Process
**Actor/Role:** Smart Meter
**Description:** Smart Meter Device sends response for the remote connect request received.

**Note:** This is external and outside the Oracle SGG environment.

7.3 Receive and Process Remote Connect Response to Echelon SGG

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process
**Group:** Inbound Communication Process
**Actor/Role:** Head-End System
**Description:** Head-End System receives the response from Smart Meter and processes a response for SGG.

**Note:** This is external and outside the Oracle SGG environment.

7.4 Communicate and Transform Remote Connect Response to Echelon SGG Format

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process
**Group:** Inbound Communication Process
**Group:** Integration Layer (SGG BPEL)
**Actor/Role:** SGG
**Description:** Integration layer of SGG facilitates the communication between the Head-End System and SGG. It receives the response, transforms, and converts the response into format compatible with SGG.

7.4.1 Identify Response Message and Processing Method

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process
**Group:** Inbound Communication Process
**Actor/Role:** SGG
Description: SGG identifies the inbound command completion event message and determines appropriate processing method.

Note: The SGG uses device event seeder to perform this action.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-DeviceEventSeeder</td>

</table>

7.6 Create Inbound Communication in Pending State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

Group: Outbound Communication Process

Group: Inbound Communication Process

Actor/Role: SGG

Description: SGG creates Inbound Communication in 'Pending' state.
7.7 Validate Ability to Process Inbound Communication and Transition to Validate State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Group:** Inbound Communication Process  
**Actor/Role:** SGG  
**Description:** SGG validates ability to process Inbound Communication. Typically, it checks for Communication Type, determines the outbound communication that initiated it and links to it and also evaluates the status of Remote Connect event success status.

### Entities to Configure

- Inbound Communication Type

### Business Objects

<table>
<thead>
<tr>

</table>

7.8 Transition Inbound Communication to Validation Error State and Log Error

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Group:** Inbound Communication Process  
**Actor/Role:** SGG  
**Description:** If any error occurs during validations, SGG transitions the Inbound Communication to 'Validation Error' state and logs an error.

### Business Object

- D4-ConnectLoadNtf
7.9 Transition to Create Completion Event State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

Group: Outbound Communication Process
Group: Inbound Communication Process
Actor/Role: SGG

Description: SGG transitions Inbound Communication to 'Create Completion Event' state.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoadNtf</td>
<td>F1-AT-RQf (Transition to Default Next Status (Java))</td>

8.1 Transition Inbound to Completed State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

Group: Outbound Communication Process
Group: Inbound Communication Process
Actor/Role: SGG

Description: SGG transitions Inbound Communication to 'Completed' state.
### 8.2 Transition Outbound Communication to Completed State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Group:** Inbound Communication Process  
**Actor/Role:** SGG  
**Description:** SGG transitions Outbound Communication to 'Completed' state and updates Event Date/Time.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoadNtf</td>
<td>F1-AT-RQJ (Transition to Default Next Status (Java))</td>
</tr>
</tbody>
</table>

### 8.3 Transition Activity to Execution Completion Event State

See Manage Device Remote Connect (Echelon) Page 3 on page 2-4 for the business process diagram associated with this activity.

**Group:** Outbound Communication Process  
**Actor/Role:** SGG  
**Description:** SGG Activity to 'Execution Completion Event' state. In this state, SGG transitions its Completion Events to 'Executed' state.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>

### 8.7 Update Device Install Event to 'Connect' State

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

**Actor/Role:** SGG  
**Description:** SGG updates the install event state to Connect.
### 8.8 Transition Activity to Completion Event Error State and Log Error

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** If any errors are encountered while transitioning Completion Events to 'Executed' state, SGG transitions Activity to 'Completion Event Error' state and logs an error.

#### Business Objects

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>

</tbody>
</table>

---

### 9.4 Monitor IMD Availability within Allowable Period

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG monitors if the IMD measurement becomes available in allowable window period.

---

**Customizable process**

D1-CRWT (Command Request Wait - Monitor)
9.5 Transition Activity to Wait Expired Error State and Log Error

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** If IMD is not available within the Wait time and it expires, SGG transitions Activity to 'Wait Expired' state and logs an error.

### Entities to Configure

<table>
<thead>
<tr>
<th>Activity Type</th>
</tr>
</thead>

9.6 Review Activity Waiting for Measurement

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User can review and analyze the Activity.

### Business Object

| D1-RemoteConnect |

9.7 Request to Complete

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User

**Description:** While the Activity is in 'Waiting for Measurement' state, MDM or SGG Authorized User can process the Activity immediately by making a manual 'Request to Complete' to SGG.
9.8 Transition Activity to Completion State

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

Actor/Role: SGG

Description: SGG transitions Activity to 'Completed' state.

<table>
<thead>
<tr>
<th>Business Object</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>F1-AT-RQJ (Transition to Default Next Status (Java))</td>
</tr>
</tbody>
</table>

9.9 Create and Send Connect Success Notification to Requester

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

Actor/Role: SGG

Description: SGG creates the message and sends Connect Device success notification to Requester based on the processing method.

<table>
<thead>
<tr>
<th>Business Object</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-SRCNTEA (Send Remote Connect Notification to Edge Application)</td>
</tr>
</tbody>
</table>

10.0 Create and Send Meter Read to Requester

See Manage Device Remote Connect (Echelon) Page 4 on page 2-5 for the business process diagram associated with this activity.

Actor/Role: SGG

Description: SGG creates the message and sends Meter Read message to Requester based on the processing method.

<table>
<thead>
<tr>
<th>Business Object</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-SODRTEA (Send Start Measurement to Edge Application)</td>
</tr>
</tbody>
</table>
10.1 Transition Activity to Discard State

See Manage Device Remote Connect (Echelon) Page 5 on page 2-6 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG transitions Activity to 'Discard' state indicating that it cannot be further used. However, it remains in the system.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-TPATOF (Transition Parent Activity To Failed)</td>
</tr>
</tbody>
</table>

10.2 Cancel Outstanding Completion Events

See Manage Device Remote Connect (Echelon) Page 5 on page 2-6 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** When Activity is discarded, SGG cancels any existing outstanding Completion Events.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-COCE (Cancel Outstanding Completion Events)</td>
</tr>
</tbody>
</table>

10.3 Send Response “Command Failed” to Requester

See Manage Device Remote Connect (Echelon) Page 5 on page 2-6 for the business process diagram associated with this activity.

**Actor/Role:** SGG

**Description:** SGG creates the message and sends Meter Read message to Requester based on the processing method.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td>D1-FRER (Send Fail Response to External Requester)</td>
</tr>
</tbody>
</table>

10.4 Analyze Requirements to Create Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User analyzes requirements and gathers information required to create Connect Device Completion Event.
Note: In general, creating Connect Device Completion Event manually is not the practical business practice.

10.5 Select Completion Event Type and Populate Data

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User selects the event type as Connect Device Completion Event and populates the required data.

10.6 Request to Create Completion Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User makes a request to SGG to create Connect Device Completion Event.

10.7 Review Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User can review and analyze the Connect Device Completion Event created.

10.8 Request to Delete Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User if determines that the Connect Device Completion Event is not required, Authorized User requests to delete it.
10.9 Delete Completion Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process  
**Actor/Role:** SGG  
**Description:** SGG deletes the Connect Device Completion Event.

11.0 Request to Discard Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process  
**Actor/Role:** MDM or SGG Authorized User  
**Description:** MDM or SGG Authorized User if determines that the Connect Device Completion Event is not required, Authorized User requests to discard it.

11.1 Transition to Discard State and Discard Completion Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process  
**Actor/Role:** SGG  
**Description:** SGG transitions Connect Device Completion Event to 'Discard' state.
11.2 Request to Update Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User modifies Connect Device Completion Event data and requests to perform appropriate updates.

### Business Object

<table>
<thead>
<tr>
<th>D1-Completion Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-Connect Device</td>
</tr>
</tbody>
</table>

11.3 Update Completion Event

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** SGG

**Description:** SGG updates the Connect Device Completion Event with data populated by Authorized User.

### Business Object

<table>
<thead>
<tr>
<th>D1-Completion Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-Connect Device</td>
</tr>
</tbody>
</table>

11.4 Request to Execute

See Manage Device Remote Connect (Echelon) Page 6 on page 2-7 for the business process diagram associated with this activity.

**Group:** Manual Connect Device Completion Event Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** MDM or SGG Authorized User requests to transition Connect Device Completion Event to 'Executed' state.

### Business Object

<table>
<thead>
<tr>
<th>D1-Completion Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-Connect Device</td>
</tr>
</tbody>
</table>

11.5 Gather Requirements to Cancel Command

See Manage Device Remote Connect (Echelon) Page 7 on page 2-8 for the business process diagram associated with this activity.
**11.6 Select Cancel Command Activity Type**

See Manage Device Remote Connect (Echelon) Page 7 on page 2-8 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User  
**Description:** MDM or SGG Authorized User selects Activity Type as 'Cancel Command' to cancel Connect command request.

---

**11.7 Populate Cancel Command Execution Data**

See Manage Device Remote Connect (Echelon) Page 7 on page 2-8 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User  
**Description:** MDM or SGG Authorized User populates the required data such as request expiration date, recipient information, etc.

---

**11.8 Communicate and Transform Remote Connect Cancel Command to SGG Format**

See Manage Device Remote Connect (Echelon) Page 7 on page 2-8 for the business process diagram associated with this activity.

**Actor/Role:** Integration Layer  
**Description:** Integration layer facilitates the communication between the 3rd Party application and the SGG application. It receives the Cancel Command request, transforms, and converts the request into format compatible with SGG application.

---

**11.9 Identify Remote Connect Activity based on Transaction ID**

See Manage Device Remote Connect (Echelon) Page 7 on page 2-8 for the business process diagram associated with this activity.

**Actor/Role:** SGG  
**Description:** SGG identifies the Remote Connect Activity to cancel based on the transaction ID, which was created in SGG when the request originally came from 3rd party application and sent later to 3rd party application. However, in case of manual request from Authorized User, the Activity is identified based on manual selection while populating the required data for cancel command request.

---

**12.0 Analyze Error and Work To Do**

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

**Actor/Role:** MDM or SGG Authorized User  
**Description:** MDM or SGG Authorized User analyzes the error logged and respective To Do created to determine the corrective action and to perform work.
### 12.1 Request to Delete

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

**Group:** Inbound Exception Process  
**Actor/Role:** MDM or SGG Authorized User  
**Description:** If MDM or SGG Authorized User determines that the Inbound Communication is not required, Authorized User can request to delete it.

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
</table>
| D1-RemoteConnect  
| D4-ConnectLoad  
| D4-ConnectLoadNtf |

### 12.2 Delete Inbound Communication

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

**Group:** Inbound Exception Process  
**Actor/Role:** SGG  
**Description:** SGG deletes Inbound Communication.

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoadNtf</td>
</tr>
</tbody>
</table>

### 12.3 Request to Discard

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

**Group:** Inbound Exception Process  
**Actor/Role:** MDM or SGG Authorized User  
**Description:** MDM or SGG Authorized User, if determines that the Inbound Communication is not required, Authorized User can request to discard it.

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoadNtf</td>
</tr>
</tbody>
</table>
12.4 Complete To Do(s)

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

Actor/Role: SGG  
Description: SGG finds all non-completed To Do entries and completes them.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
<td></td>
</tr>
<tr>
<td>D4-ConnectLoad</td>

</tr>
<tr>
<td>D4-ConnectLoadNtf</td>
<td></td>
</tr>
</tbody>
</table>

12.5 Transition Inbound Communication to Discard State

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

Group: Inbound Exception Process  
Actor/Role: SGG  
Description: SGG transitions Inbound Communication to 'Discard' state

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoadNtf</td>
</tr>
</tbody>
</table>

12.6 Log Error and Transition Outbound Communication to Response Error State

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

Group: Inbound Exception Process  
Actor/Role: SGG  
Description: SGG logs error and transitions Outbound Communication to Response Error state.

<table>
<thead>
<tr>
<th>Business Objects</th>
<th>Available Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoadNtf</td>
<td>D1-FAILPCOUT (Fail Parent Outbound Activity)</td>
</tr>
</tbody>
</table>

12.7 Request to Validate

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

Group: Inbound Exception Process  
Actor/Role: MDM or SGG Authorized User
Description: If Authorized User wants to reprocess the inbound communication, can request to validate it.

### 12.8 Transition to Validate State and Initialize Reprocessing

See Manage Device Remote Connect (Echelon) Page 8 on page 2-9 for the business process diagram associated with this activity.

**Group:** Inbound Exception Process  
**Actor/Role:** SGG  
**Description:** SGG transitions Inbound Communication to 'Validate' state and initializes reprocessing.

#### Business Objects

</tbody>
</table>

### 13.1 Request to Delete

See [Manage Device Remote Connect (Echelon) Page 8](#) on page 2-9 for the business process diagram associated with this activity.

**Group:** Outbound Exception Process  
**Actor/Role:** MDM or SGG Authorized User  
**Description:** If MDM or SGG Authorized User determines that the Outbound Communication is not required, Authorized User can request to delete it.

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>
</tr>
</tbody>
</table>

### 13.2 Delete Outbound Communication

See [Manage Device Remote Connect (Echelon) Page 8](#) on page 2-9 for the business process diagram associated with this activity.

**Group:** Outbound Exception Process  
**Actor/Role:** SGG  
**Description:** SGG deletes Outbound Communication from the system.

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>D4-ConnectLoad</td>

<tbody>
<tr>
<td>D4-ConnectLoad</td>
</tr>
</tbody>
</table>

### 13.8 Request to Revalidate

See Manage Device Remote Connect (Echelon) Page 9 on page 2-10 for the business process diagram associated with this activity.

**Group:** 'Validation Error' Exception Process

**Actor/Role:** MDM or SGG Authorized User

**Description:** If Authorized User wants to reprocess the Activity, can request to validate it.

<table>
<thead>
<tr>
<th>Business Object</th>
</tr>
</thead>
<tbody>
<tr>
<td>D1-RemoteConnect</td>
</tr>
</tbody>
</table>

### 13.9 Transition Activity to Validate State and Initialize Reprocessing

See Manage Device Remote Connect (Echelon) Page 9 on page 2-10 for the business process diagram associated with this activity.

**Group:** 'Validation Error' Exception Process

**Actor/Role:** SGG

**Description:** SGG transitions Activity to 'Validate' state and initializes reprocessing.
14.0 Identify Activity in Validation Error State

See Manage Device Remote Connect (Echelon) Page 9 on page 2-10 for the business process diagram associated with this activity.

**Group:** 'Validation Error' Exception Process

**Actor/Role:** SGG

**Description:** SGG identifies Activity in 'Validation Error' state.

---

14.1 Transition Activity to Retry State

See Manage Device Remote Connect (Echelon) Page 9 on page 2-10 for the business process diagram associated with this activity.

**Group:** 'Communication Error' Exception Process

**Actor/Role:** SGG

**Description:** SGG transitions Activity to 'Retry' state.

---

14.2 Identify Activity in Communication Error State

See Manage Device Remote Connect (Echelon) Page 9 on page 2-10 for the business process diagram associated with this activity.

**Group:** 'Communication Error' Exception Process

**Actor/Role:** SGG

**Description:** SGG identifies Activity in 'Communication Error' state.
14.3 Request to Execute Completion Event

See Manage Device Remote Connect (Echelon) Page 10 on page 2-11 for the business process diagram associated with this activity.
