CHAPTER 5	<i>Managing Corporate Performance Dashboard</i>	21
Overview.....		21
Managing reports.....		21
Corporate Performance Summary.....		21
<i>Key Performance Indicators Flash</i>		21
<i>Premium</i>		22
<i>Policy</i>		22
.....		23
<i>Investment Income</i>		23
<i>Claims</i>		24
<i>Expenses</i>		25
<i>This report shows policy related expenses across all line of businesses and underlying products through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.</i>		25
<i>Ratios</i>		26
Performance Overview.....		27
<i>Customer and Policy</i>		27
<i>Income Statement</i>		28
<i>Policy</i>		29
<i>Premium Trends</i>		30
<i>Written Premium vs. Earned Premium Trend</i>		31
<i>Earned Premium Vs. Uncollected Earned Premium</i>		32
<i>Policy Expense Summary Trend</i>		33
<i>New Business Quote Count</i>		34
<i>Fee</i>		35
<i>Tax</i>		36
<i>Policy Expense vs. Claim Expense</i>		37
<i>Claim Payment Vs. Recovery Trends</i>		38
<i>Claim Expense Summary Trend</i>		39
<i>Loss and Expense</i>		40
<i>Claim Recovery</i>		41
<i>Key Performance Ratios</i>		42
<i>Key Performance Indicators for Policy</i>		43
<i>Key Performance Indicators for Claims</i>		44
Line of Business Overview.....		45
<i>Customer Distribution by Policy Status</i>		45
<i>Top Ten Line of Business for In force Premium and Policy Count</i>		46
<i>Bottom Ten Line of Business for In force Premium and Policy Count</i>		47
<i>New Business Policy Distribution</i>		47
<i>Policy Distribution</i>		48
<i>Policy Attrition by Line of Business</i>		49
<i>Quote Declines by Line of Business</i>		50
<i>Top Attrition Reason by Line of Business</i>		51

Preface

Audience

This user guide is intended for the users of Oracle Insurance Performance Insight for General Insurance application.

This guide provides detailed instructions for using Oracle Insurance Performance Insight for General Insurance application.

For more Oracle E-Business Suite product information, see *Related Information Sources*.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit:

- <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit
- <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs>, if you are hearing impaired.

Structure

This user guide has been segregated into the following chapters:

- [Chapter 1 - About Oracle Insurance Performance Insight for General Insurance](#)
- [Chapter 2 - Getting Started](#)
- [Chapter 3 - Overview of Process Flow](#)
- [Chapter 4 - Overview of OIPIGI Reports](#)
- [Chapter 5 - Managing Corporate Performance Dashboard](#)
- [Chapter 6 - Managing Quote Performance Dashboard](#)
- [Chapter 7 - Managing Policy Performance Dashboard](#)
- [Chapter 8 - Managing Claim Performance Dashboard](#)
- [Chapter 9 - Managing Customer Central - Commercial Corporate Dashboard](#)
- [Chapter 10 - Managing Customer Central - Retail Dashboard](#)
- [Appendix A](#)

Related Information Sources

- [Oracle Insurance Performance Insight for General Insurance Read Me](#) - This document describes the latest enhancements, updates, and issues that have been resolved in this version.
- [Oracle Insurance Performance Insight for General Insurance Installation Guide](#) - This manual describes the steps for configuring and installing Oracle Insurance Performance Insight for General Insurance.

Do Not Use Database Tools to Modify Oracle E-Business Suite Data

Oracle **STRONGLY RECOMMENDS** that you never use SQL*Plus, Oracle Data Browser, database triggers, or any other tool to modify Oracle E-Business Suite data unless otherwise instructed. Oracle provides powerful tools you can use to create, store, change, retrieve, and maintain information in an Oracle database. But if you use Oracle tools such as SQL*Plus to modify Oracle E-Business Suite data, you risk destroying the integrity of your data and you lose the ability to audit changes to your data. Because Oracle E-Business Suite tables are interrelated, any change you make using an Oracle E-Business Suite form can update many tables at once. But when you modify Oracle E-Business Suite data using anything other than Oracle E-Business Suite, you may change a row in one table without making corresponding changes in related tables. If your tables get out of synchronization with each other, you risk retrieving erroneous information and you risk unpredictable results throughout Oracle E-Business Suite. When you use Oracle E-Business Suite to modify your data, Oracle E-Business Suite automatically checks that your changes are valid. Oracle E-Business Suite also keeps track of who changes information. If you enter information into database tables using database tools, you may store invalid information. You also lose the ability to track who has changed your information because SQL*Plus and other database tools do not keep a record of changes.

About Oracle Insurance Performance Insight for General Insurance

Overview

Oracle Insurance Performance Insight for General Insurance (OIPIGI) is a comprehensive business intelligence system created exclusively for the General Insurance/Property and Casualty (P&C) insurance industry. OIPIGI provides a complete set of web-based analytical and reporting components that enable users to generate, view, analyze, distribute, electronically store, and retrieve critical reports.

It provides tools for data integration and includes customizable, pre-built dashboards and reports, a reporting data model, and user friendly functional subject areas for ad-hoc reporting.

It enables you to actively plan, manage, and track key areas measuring organizational performance with pre-built reports, dashboards, and underlying data structures.

The OIPIGI solution is built using:

- OFSAA Infrastructure 8.0 for ETL and Data Integration
- OBIEE XXXXXXXX for Dashboard and Reports activities

OIPIGI provides the following capabilities:

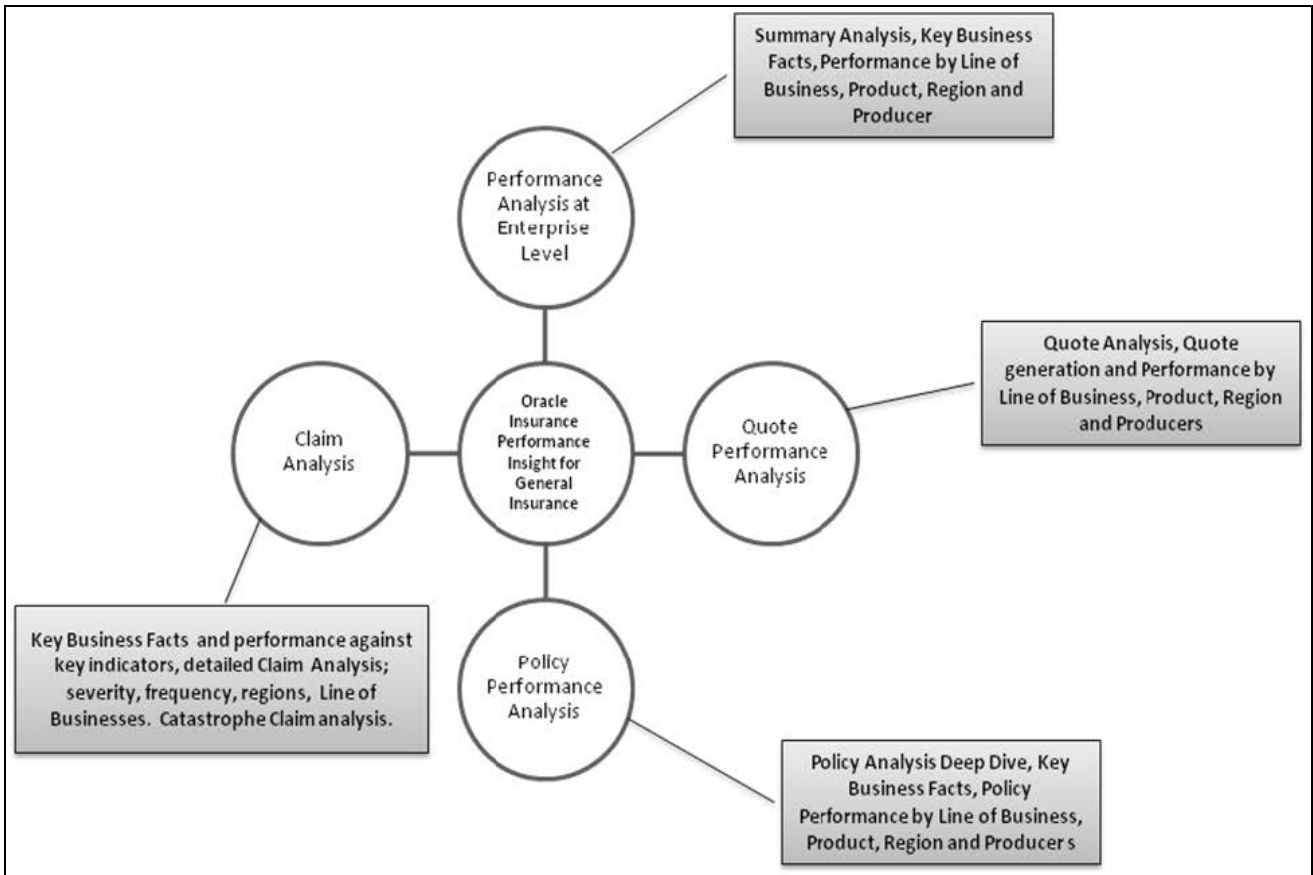

- Consolidates data from multiple, disparate source systems to provide a strategic enterprise-wide view across various business and operational segments.
- Provides an underlying data model constructed specifically for the general insurance industry.
- Delivers information management, reporting, and advanced analytics to end-users through an easy-to-use web application.

OIPIGI utilizes OBIEE technology to present:

- Behavioral and performance trends of its target segments - Line of Businesses, Products, Regions, Intermediaries, Customers, Revenues, Expenses, Claims, and so on.
- Performance tracking using key business performance indicators.
- Performance of the overall business, profitability, intermediaries, and underlying customers.
- Performance of Business against goal/budget and plans.
- Efficiency of the intermediaries and business lines in terms of new business revenue and business retention. Most and least active and revenue generating intermediaries and sales channels.

Workflow

The following workflow depicts the analytical product objectives of OIPIGI 8.0.1:

Users, Roles, and Actions

Following are the users of OIPIGI:

- ExecutiveManager
- BusinessAnalyst
- UnderwritingManager
- ClaimsManager
- FinancialManager
- Underwriters
- UnderwritingSupport
- ProductManager
- ClaimsAdjuster
- FinanceDepartment
- MarketingDepartment
- Producers

The following lists the roles and actions of the users:

- ExecutiveManager - This user performs the roles of management level executives and group heads and have full access to all dashboards and reports. The primary interest is in corporate performance at an enterprise level.
- BusinessAnalyst - This user performs the various roles of senior level executive and managers who would do business analysis and strategy development. The primary interest encompasses all areas.
- UnderwritingManager - Under this role, users heads the underwriting departments and group managers. The primary interest is in the policy performance area.
- ClaimsManager - Under this role, users heads the claims departments and group managers. The primary interest is in the claim performance area, claim performance parameters, expenses, and key ratios.
- FinancialManager - Under this role, users heads the finance and accounts departments, and group managers. The primary interest is in financial performance, key financial performance indicators, key ratios, revenue, expenses, and profitability.
- Underwriters - This user performs the various roles of underwriting managers and underwriters. The primary interest is in policy performance and claim performance, key performance indicators and information.
- UnderwritingSupport - This user performs the various roles of executives and authorized members of underwriting department. The primary interest is in specific policy and claim performances.
- ProductManager - This user performs the roles of executive and authorized members of actuarial, product, and product strategy groups.
- ClaimsAdjuster - This user performs the roles of claim adjusters and authorized members for claim adjustment process. The primary interest is in claim performance.
- FinanceDepartment - This user performs the roles of executive and authorized members of finance and accounts department. The primary interest financial performance, revenue, and expenses.
- MarketingDepartment - This user performs the various roles of executive and authorized members of marketing department. The primary interest key performance parameters and performance results in quotes, policy, claims, regions, line of business, products, producers, and customers.
- Producers - This user performs the various roles of managers and executives of sales departments, agency mangers, authorized producers and company's direct sales employee. Access for producers and direct sales employees are company-specific and restricted to own respective line performance. The primary interest in policy sales, retentions, revenue, expenses, key performance and customers.

Login

You can access OBIEE through the web browser once the software is installed and configured.

To access OBIEE, follow these steps:

1. Enter the following URL into the web browser: `http://<hostname>:<port>/analytics`

Note: In the above URL:

- `<hostname>` is the server name or IP address where you installed OBIEE
 - `<port>` is the port assigned to OBIEE. The default port will be different depending on whether or not you selected a "Simple" or "Enterprise" Install for OBIEE.
2. A login screen similar to the following appear.

The screenshot shows the Oracle Business Intelligence login interface. At the top left, it says "ORACLE Business Intelligence" and at the top right, there is a "Help" link. The main content area is a white box with a "Sign In" heading and the instruction "Enter your user id and password." Below this are two input fields: "User ID" and "Password". A "Sign In" button is positioned below the password field. At the bottom of the white box, there is a checkbox for "Accessibility Mode" and a language selection dropdown menu currently set to "English".

3. Enter your **User ID**.
4. Enter your **Password**.
5. Click **Sign In**. The OBIEE login page opens.

Introduction

OIPIGI data model contains the staging tables from which data is loaded into the dimensions and fact tables. Staging tables include the master staging tables, detail staging tables, staging product processor tables, and so on. The user has to populate data into these staging tables.

Dimension Data Flow

Dimension data in OIPIGI application is loaded from staging master tables using the Slowly Changing Dimensions (SCD) process. Data from source systems can be loaded into staging through flat file or source system interfaces. SCD process tracks the changes in the dimensional attributes and loads data into dimension tables. Examples of dimension tables that follow the SCD process are Product, Customer Type, Customer, and so on.

Some dimensions are static or maintained internally within the application and are not expected as a download from source system. An example of such dimensions is Reporting Line. These dimensions are maintained through the AMHM (Attribute Member Hierarchy Maintenance) component of OFSAAI or through other framework components like DEFI.

Following are the list of Dimensions used in OIPIGI:

Dimension Entity Name	Staging Entity Name(s)	Loading/Maintenance method
Acquisition Channel Dimension	Stage Channel Master	SCD
Attrition Dimension	Stage Attrition Reason Master	SCD
Bands Dimension		AMHM/SCD
Billing Account Dimension	Stage Bill Plan Master	SCD
Business Class Dimension	Stage Business Class Master	SCD
Campaign Dimension	Stage Campaign Master	SCD
Catastrophe Events Dimension	Stage Catastrophe Master	SCD
Claim Dimension	Stage Claim Details	SCD
Country Dimension	Stage Country Master	SCD
Coverage Status Dimension	Stage Coverage Status Master	SCD
Coverage Type Dimension	Stage Coverage Type Master	SCD
Dimension Policy	Stage Property and Casualty Contracts	SCD
Dimension Policy Type	Stage PolicyType Master	SCD
Dimension Reinsurance Risk Type	Stage Reinsurance Risk Type Master	SCD
Dwelling Dimension	Stage Dwelling Master	SCD
Employee Dimension	Stage Employee	SCD
Geography Dimension	Stage Geography Master	SCD
Insurance Coverage Dimension	Stage Insurance Coverage Master	SCD
Line of Business Dimension	Stage Line of Business Master	SCD

Dimension Entity Name	Staging Entity Name(s)	Loading/Maintenance method
Litigation Dimension	Stage Litigation Master	SCD
Loan Product Category Dimension	Stage Product CategoryMaster	SCD
Location Dimension	Stage Location Master	SCD
Organization Structure Dimension	Stage Organization Structure Master	SCD
Party Dimension	Stage Party Master	SCD
Policy Deductible Dimensions	Stage Policy Deductible Master	SCD
Producer Agent Dimension	Stage Producer Agent Master	SCD
Producer Dimension	Stage Producer Master	SCD
Product Dimension	Stage Product Master	SCD
Product Type Dimension	Stage Product Type Master	SCD
Quote Source Dimension	Stage Quote Source	SCD
Quote Source Method Dimension	Stage Quote Source Method	SCD
Quote Submission Method Dimension	Stage Quote Submission Method	SCD
Quotes Declination Type Dimension	Stage Quote Declination Type	SCD
Rate Modifier Dimension	Stage Policy Rate Modifier	SCD
Rate Plan Dimension	Stage Rate Plan Master	SCD
Region Dimension	Stage Region Master	SCD
Report Type Dimension	Stage Report Type	SCD
Risk Item Dimension	Stage Risk Item Master	SCD
Underwriter Dimension	Stage Underwriter Master	SCD
Vendor Dimension	Stage Vendor Master	SCD
Allocation Expense Type Dimension		Seeded
Band Member Attributes		AMHM
Band Dimension Members		AMHM
Hierarchies for Bands		AMHM
Band Dimension Translation		AMHM
Claim Referral Reason Dimension		Seeded
Dimension Claim Status		Seeded
Claim Transaction Type Dimension		Seeded
Currency Dimension		Seeded
Date Dimension		DT
Generally Accepted Accounting Principles Dimension		Seeded
Location Hierarchy		DT
Dimension Policy Status		Seeded
Policy Transaction Type Dimension		Seeded
Quote Status Dimension		Seeded
Quote Type Dimension		Seeded
Recovery Type Dimension		Seeded

Dimension Entity Name	Staging Entity Name(s)	Loading/Maintenance method
Reporting Line Member Attributes		Seeded
Reporting Line Dimension Members		Seeded
Reporting Line Hierarchies		Seeded
Reporting Line MemberTranslation		Seeded
Reporting Line Dimension		DT
Scenario Dimension		Seeded

Some of the stage data can also come from master data management interfaces. In such a case, data from interface is loaded into staging interface tables and SCD is run on the interface tables. Mapping of dimensional attributes to staging can be obtained by querying SYS_STG_JOIN_MASTER and SYS_TBL_MASTER table in the atomic schema.

Key dimensions for reporting

The following key dimensions are required for OIPIGI reporting as these dimensions are being directly consumed by the reports.

- Acquisition Channel Dimension
- Attrition Dimension
- Billing Account Dimension
- Campaign Dimension
- Dimension Policy Type
- Line of Business Dimension
- Loan Product Category Dimension
- Location Dimension
- Organization Structure Dimension
- Producer Agent Dimension
- Producer Dimension
- Product Dimension
- Product Type Dimension
- Quote Source Dimension

Fact Data Flow

Most of the Fact tables are mapped to staging counterparts through Table to Table (T2T) mappings. Data from source systems can be loaded into staging through flat file or source system interfaces. T2T process then loads data to fact tables. Examples include Fact Common Policy Summary, Fact IPA Policy Summary, and so on. Some of the Fact tables are loaded with processed fact information from other fact tables. Examples include Fact Policy Profitability, Fact Aggregate Producer Summary, and so on.

Fact Entity Name	Source	Source Entities	Method of Populating Measures
Fact Aggregate Producer Summary	Fact	Fact Common Policy Summary, Fact IPA Policy Summary, Fact PFT Policy Summary, Fact Insurance Quotes, Fact Insurance Quote Reports, and Fact Claim Details	T2T/DT
Fact Claim Claimant Mapping	Stage		T2T
Fact Claim Details	Stage	Stage Claim Details	T2T
Fact Claim Referral Reason Mapping	Stage	Stage Claim Referral Reason Mapping	T2T
Fact Claim Transaction	Stage	Stage Claim Transactions	T2T
Fact Common Policy Summary	Stage	Stage Property and Casualty Contracts	T2T
Fact Insurance Quotes Report	Stage	Stage Insurance Quote with Reports	T2T
Fact IPA Policy Summary	Stage	Stage Property and Casualty Contracts	T2T

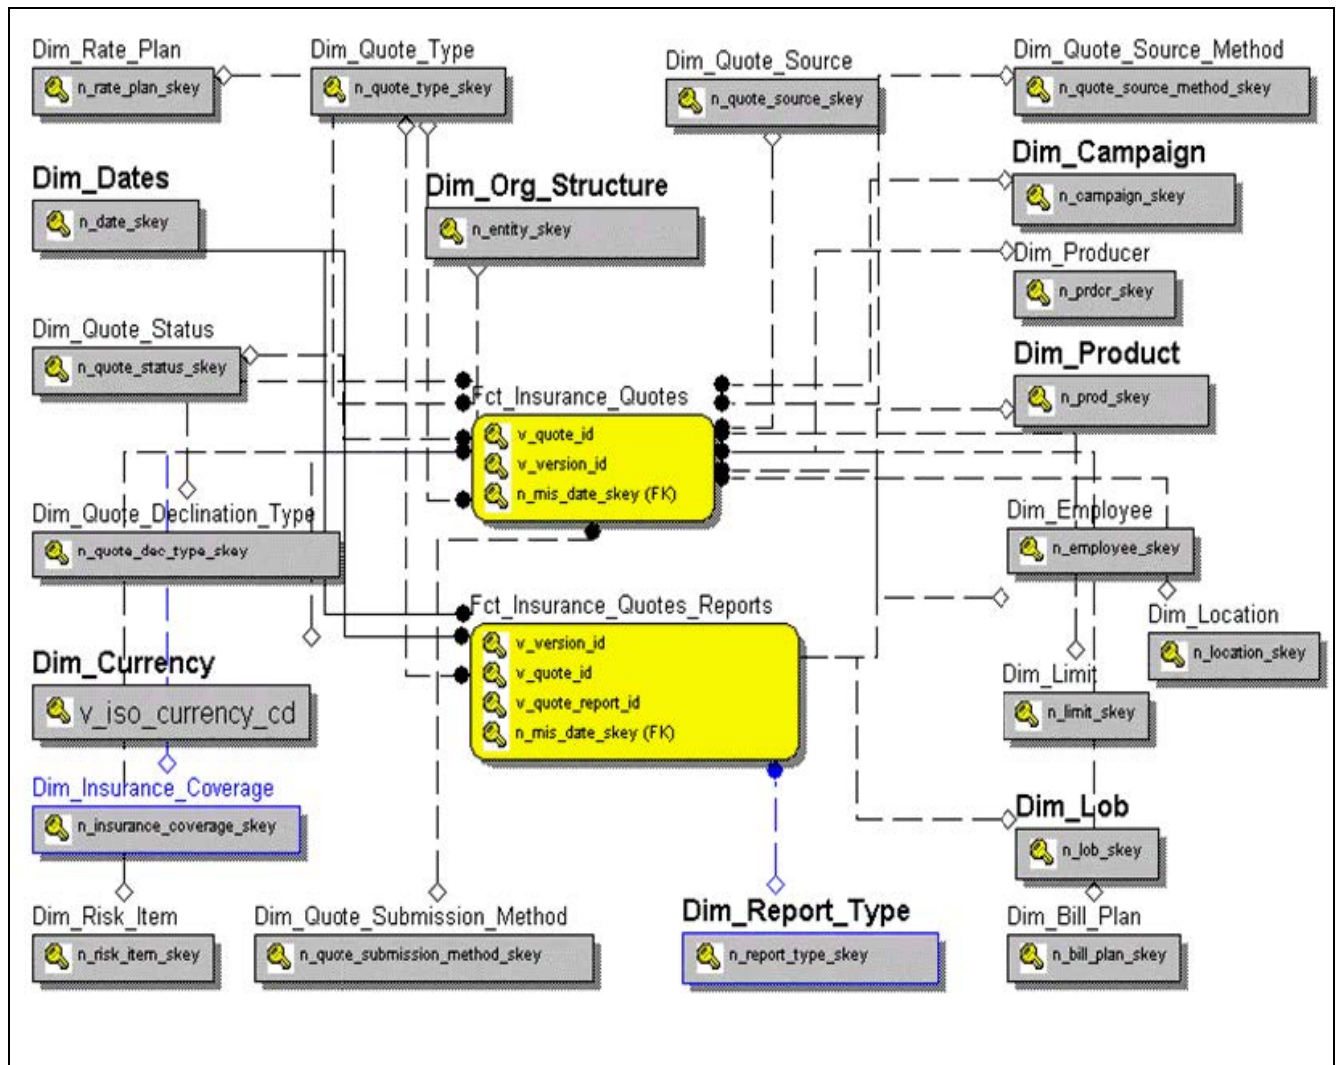

Fact Entity Name	Source	Source Entities	Method of Populating Measures
Fact PFT Policy Summary	Stage	Stage Property and Casualty Contracts	T2T

BI Data Model

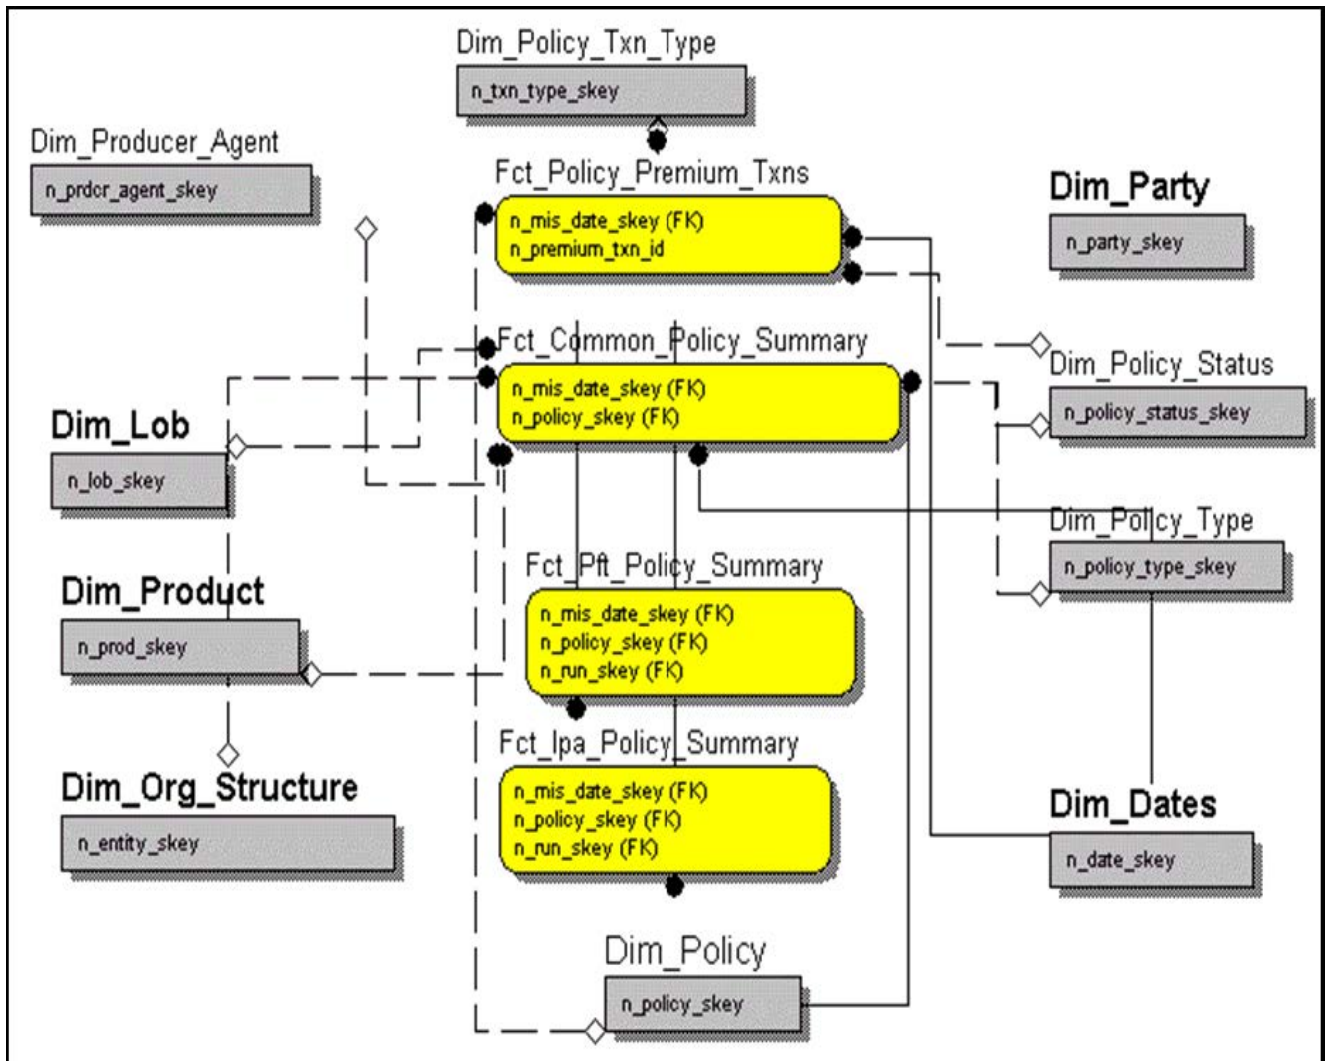

The BI data model is a star schema for the fact tables FCT_INSURANCE_QUOTES, FCT_INSURANCE_QUOTE_REPORTS, FCT_COMMON_POLICY_SUMMARY, FCT_IPA_POLICY_SUMMARY, FCT_PFT_POLICY_SUMMARY, FCT_CLAIM_DETAILS, FCT_CLAIM_TRANSACTIONS, FCT_AGG_PRODUCER_SUMMARY, FCT_PRODUCER_APPOINTMENTS, and so on.

Following are the subject areas in ERwin data model:

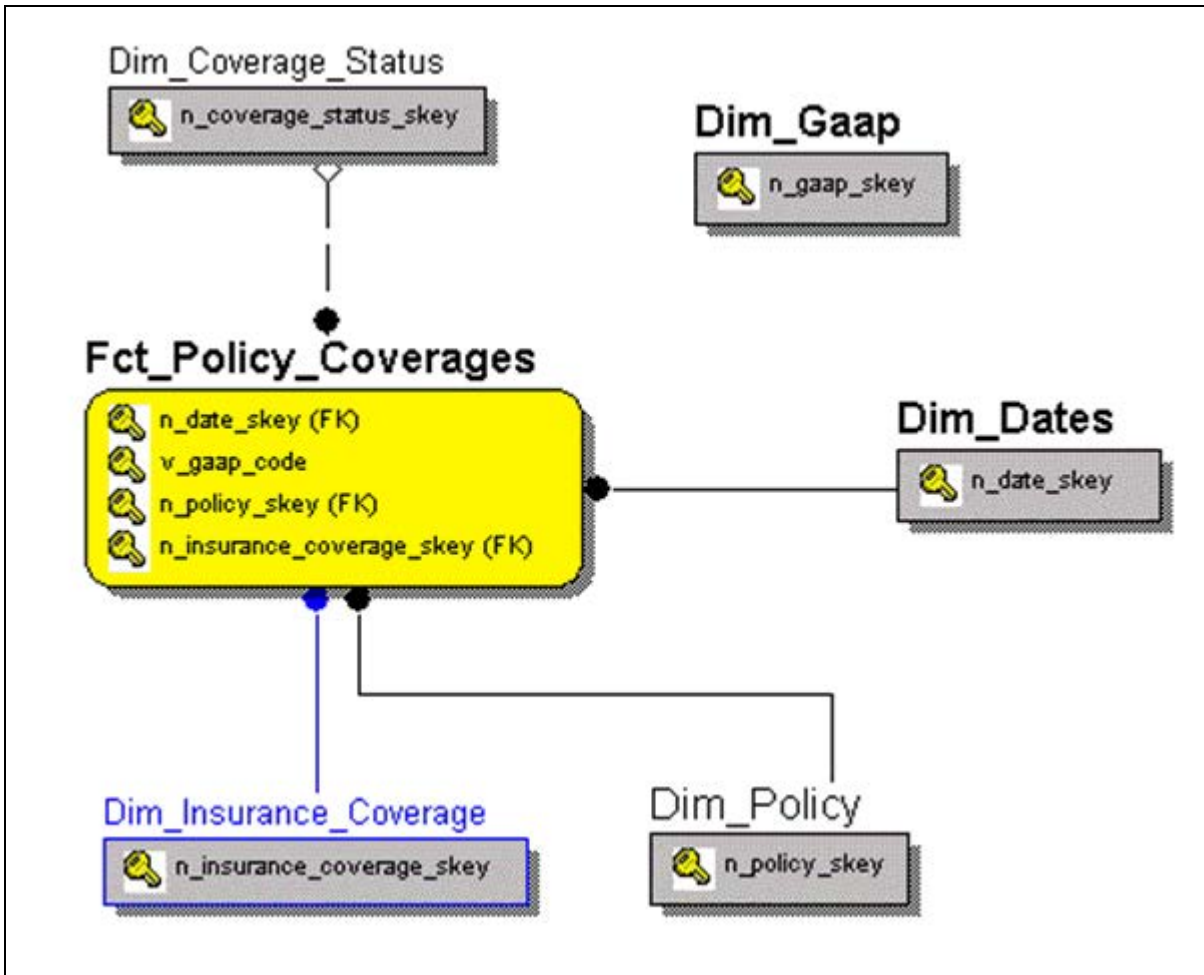

- Insurance Quotes and Reports

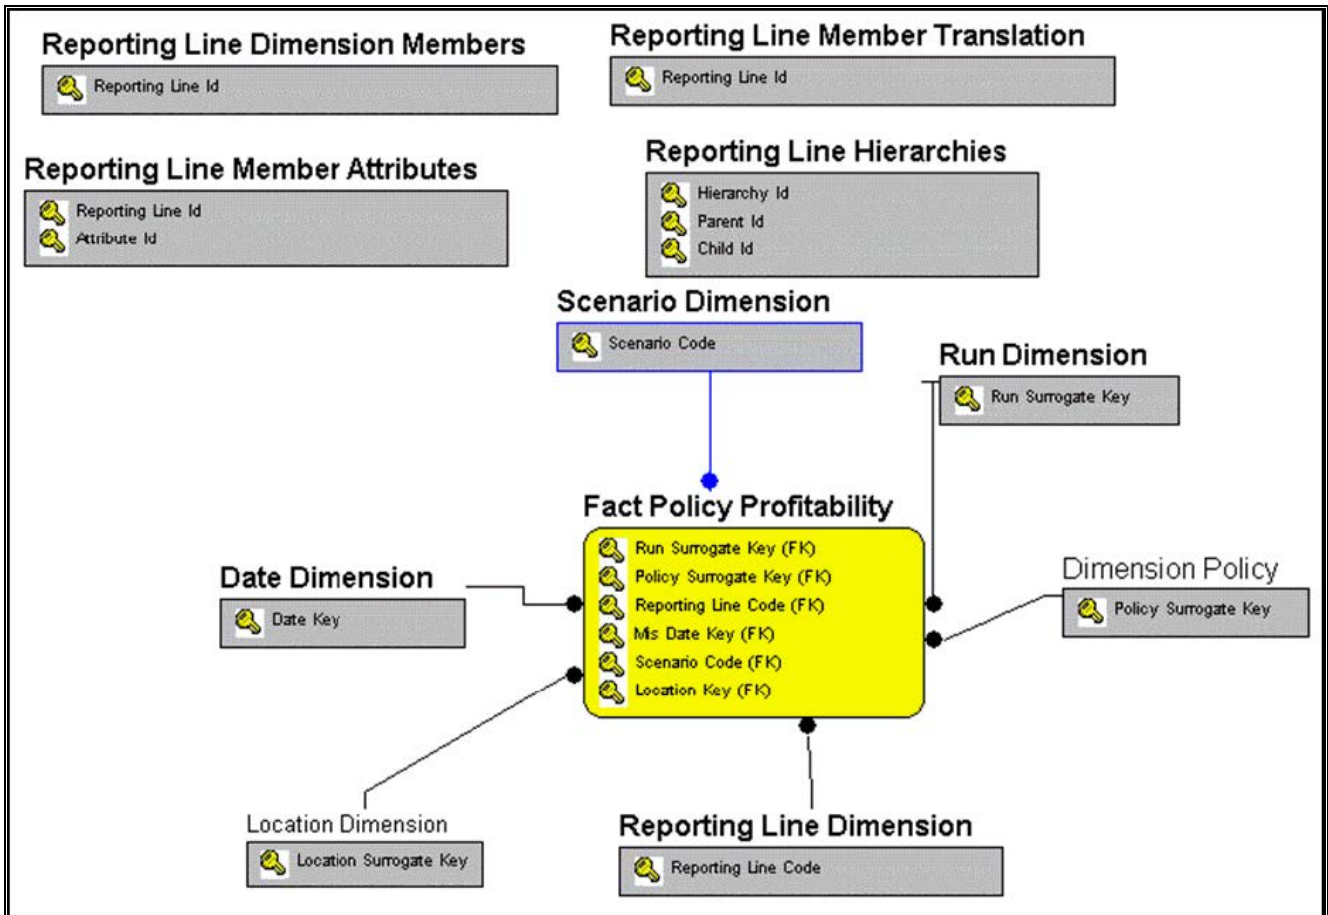

- Policy Summary

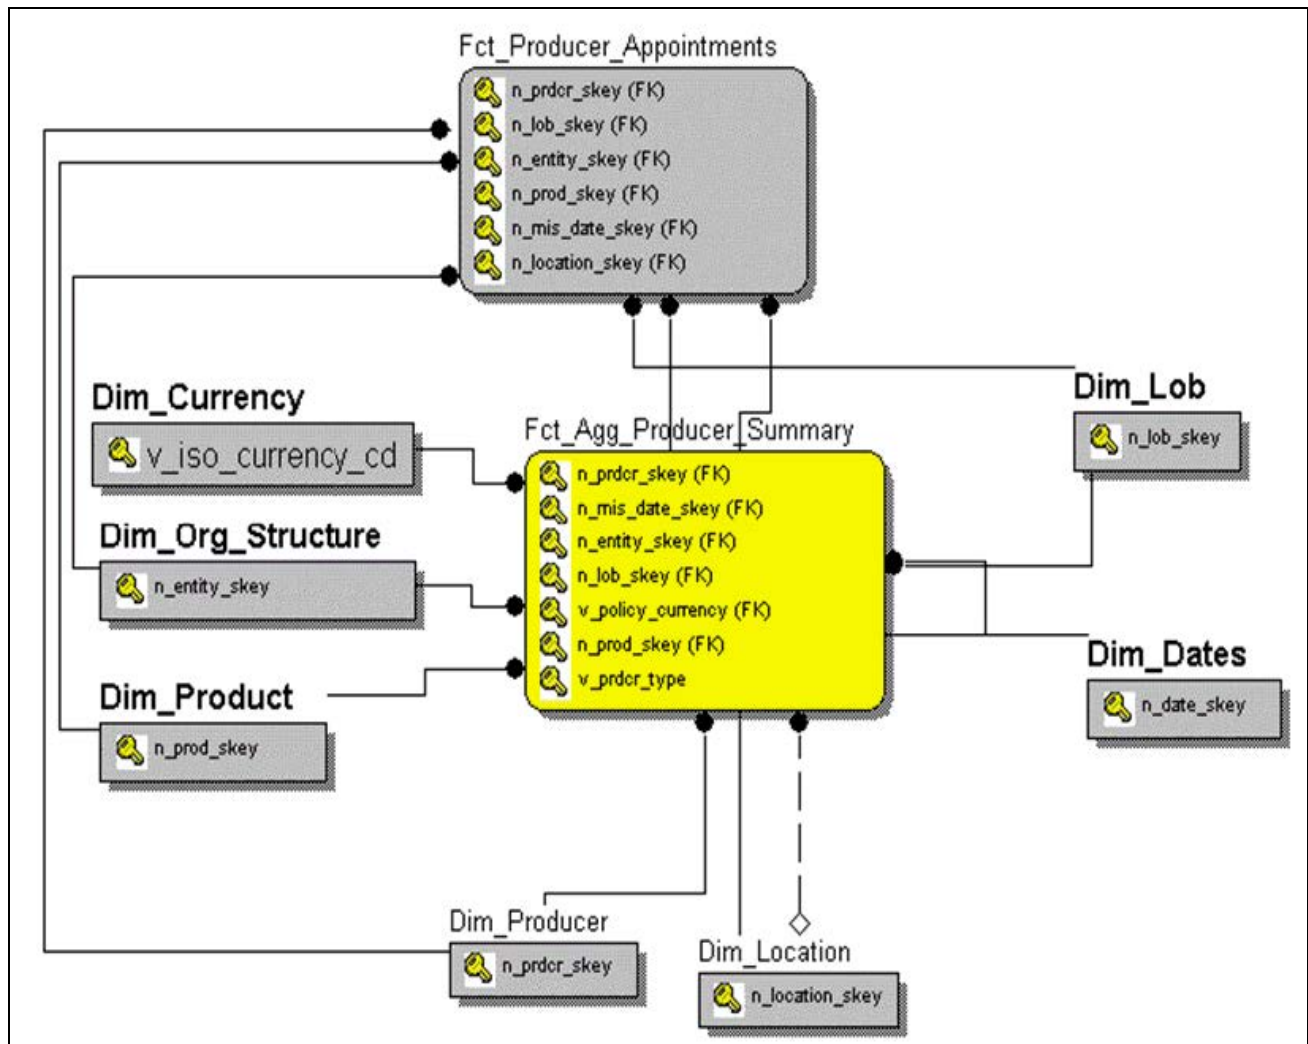

- Policy Coverage's

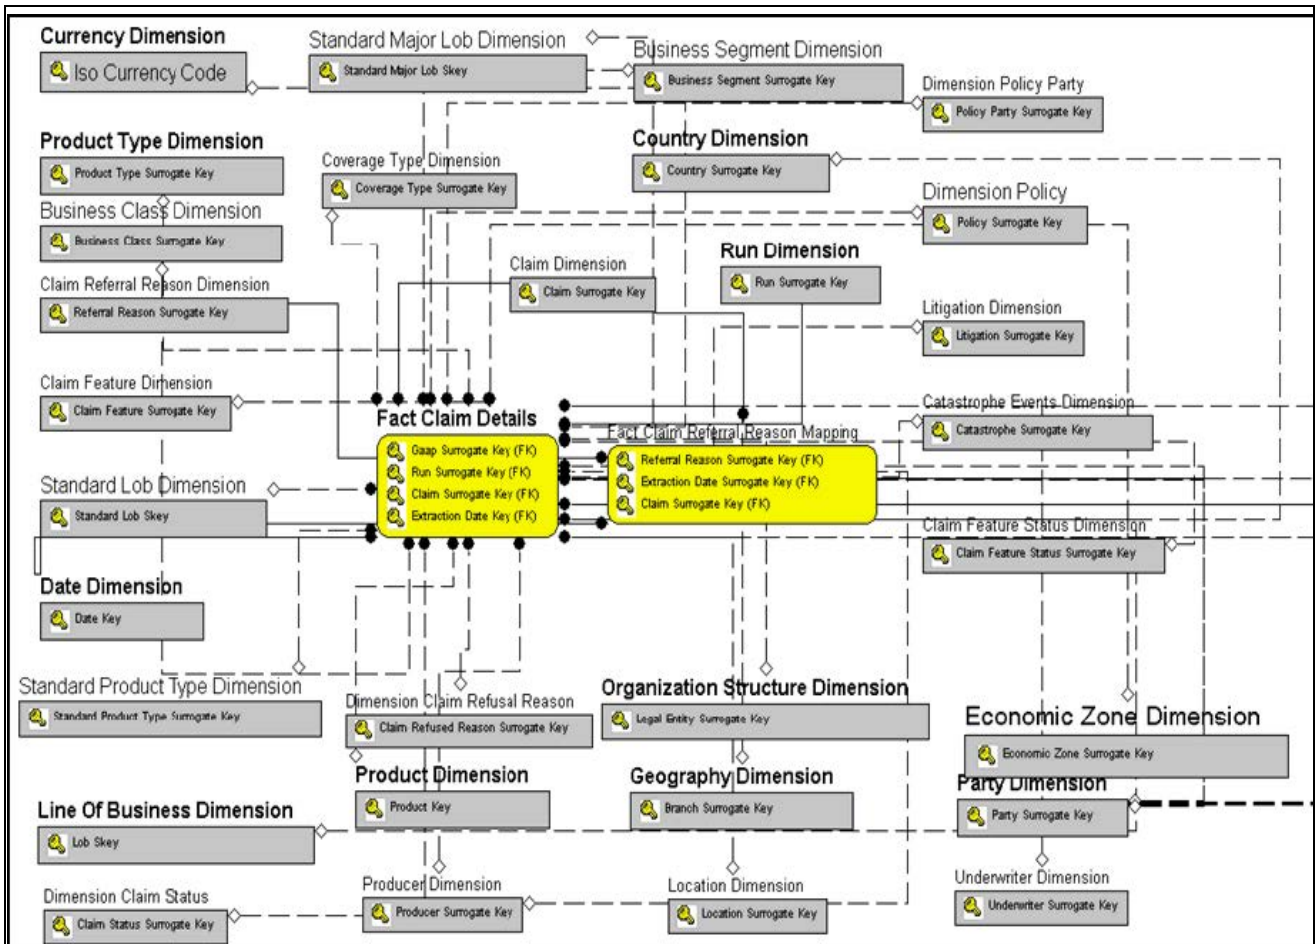

- Policy Profitability

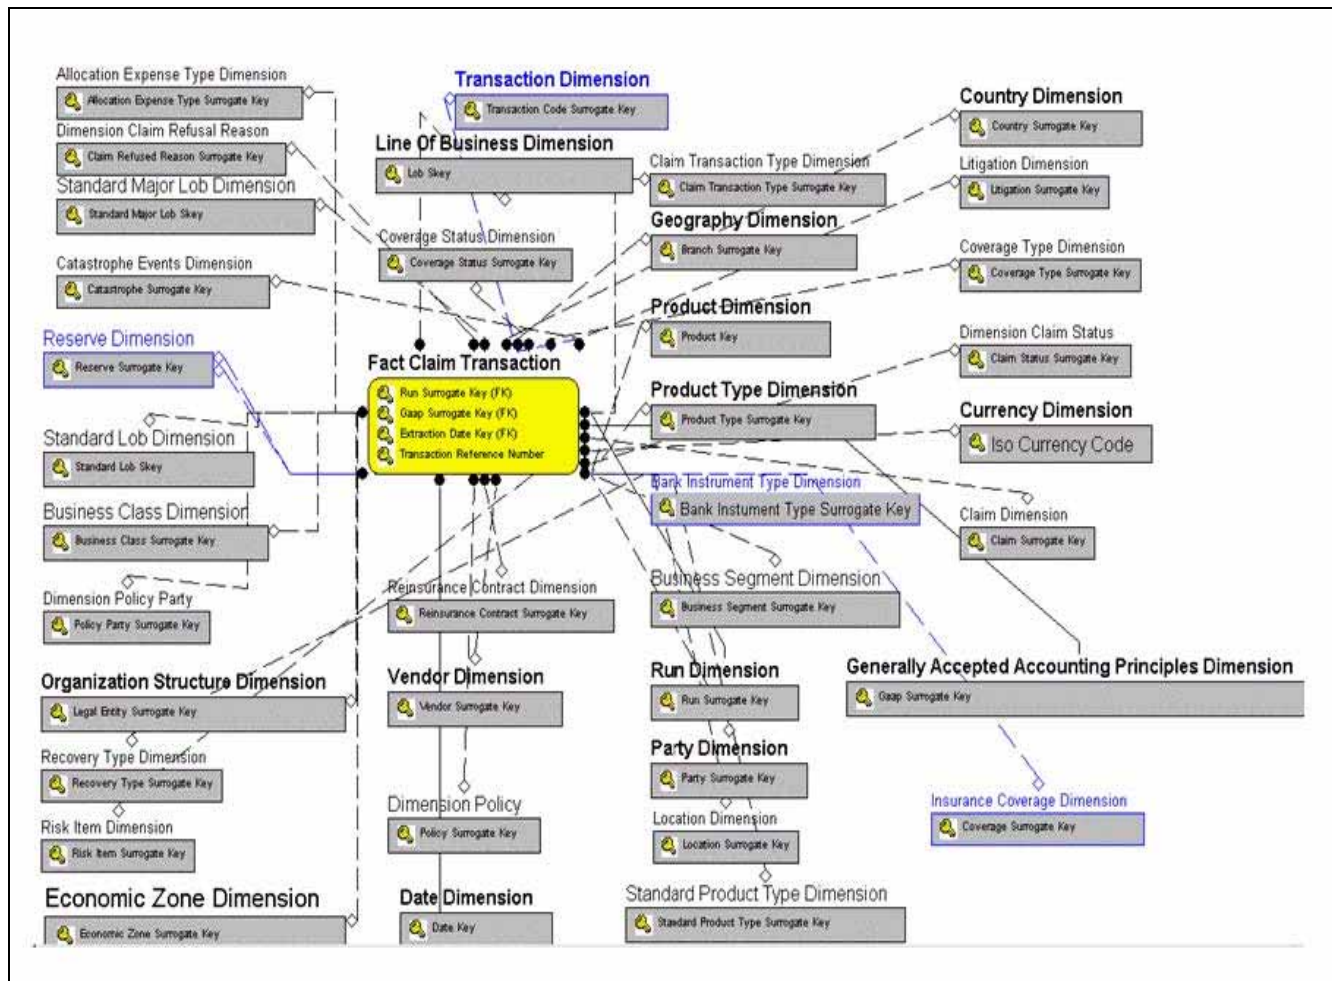

- Aggregated Producer Summary and Producer Appointments

- Claim Details

- Claim Transactions

Introduction

Oracle Performance Insight for General Insurance (OIPIGI) version 8.0 offers dashboards to users that organize different kinds of reports by key domain and subject area.

These reports present:

- Performance analysis of the business at an enterprise level and underlying segments through key performance indicators.
- Performance measures through generated quotes analysis measured through line of businesses, products, regions and producers, and key performance indicators.
- Performance measures through Policy Performance analysis measured through line of businesses, products, regions and producers, and key performance indicators.
- Performance measures through claims analysis measured through line of businesses, products, regions and producers, and key performance indicators.

Note: Time hierarchy prompted reports are all drill enabled on time hierarchy. On first load, the values are visible for a year, and on subsequent drills, we obtain values for quarter and month. These are not drill through reports.

Dashboards

OIPIGI 8.0.1.0.0 has been segregated into six key dashboards and each of these dashboards contains several tabs.

- Corporate Performance
- Quote Performance
- Policy Performance
- Claim Performance
- Customer Central - Commercial Corporate
- Customer Central - Retail

The dashboards are described in detail in the subsequent chapters.

Managing Corporate Performance Dashboard

Overview

This chapter explains the reports available under each tab in the Corporate Performance Dashboard.

Managing reports

The following tabs are present in the Corporate Performance Dashboard:

- [Corporate Performance Summary](#)
- [Performance Overview](#)
- [Line of Business Overview](#)
- [Line of Business Performance](#)
- [Product Overview](#)
- [Product Performance](#)

The following screenshots display the essential nature of the available reports as per each tab:

Corporate Performance Summary

The Corporate Performance Summary tab includes information at the corporate level. The information contained in the reports generated summarizes how the entire organization is performing. The filters for this tab include:

- Time
- Company
- Geography

The various reports available under this tab are discussed in the following sections.

Key Performance Indicators Flash

This report shows snapshots of key performance indicators represented through flash boxes for current period.

Premium

This report shows premium revenue across all line of businesses and underlying products through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

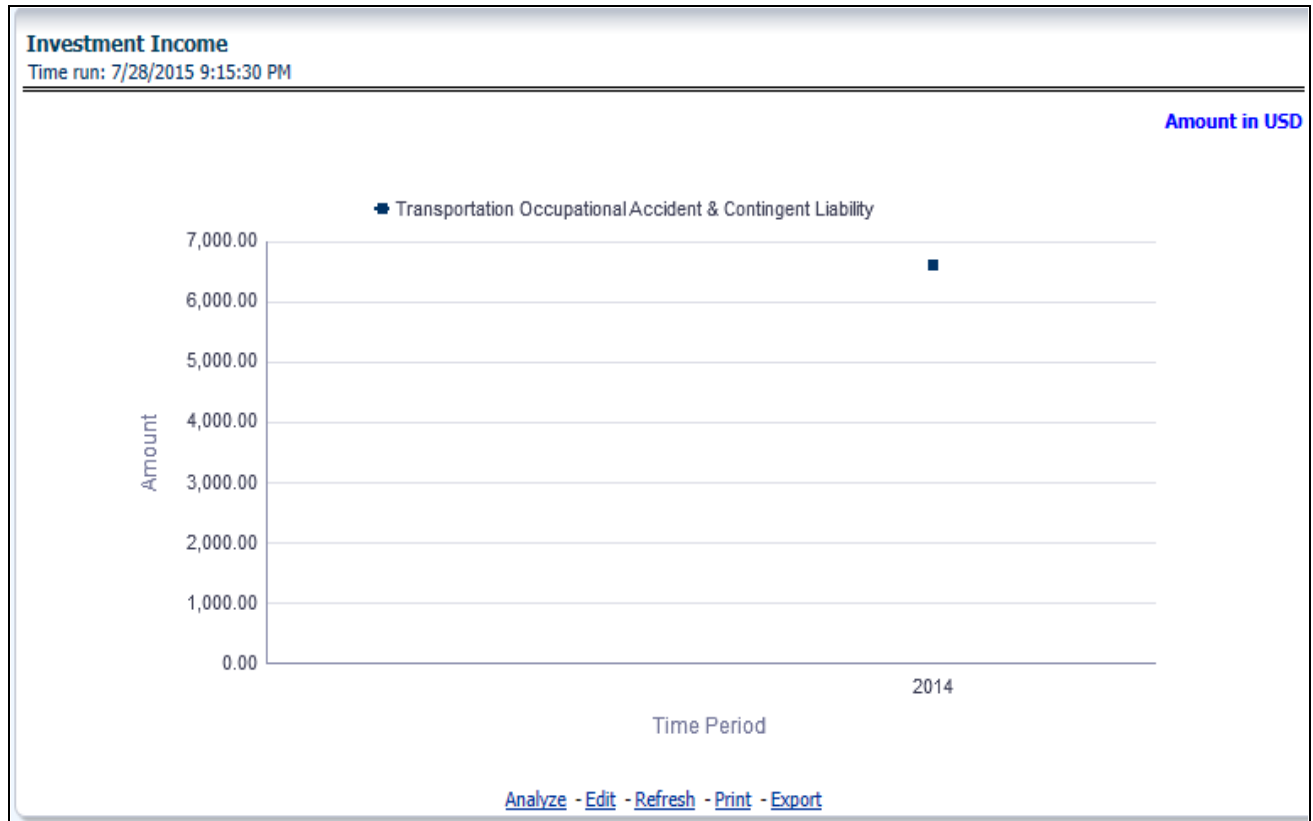

Policy

This report shows policy related expenses across all line of businesses and underlying products through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

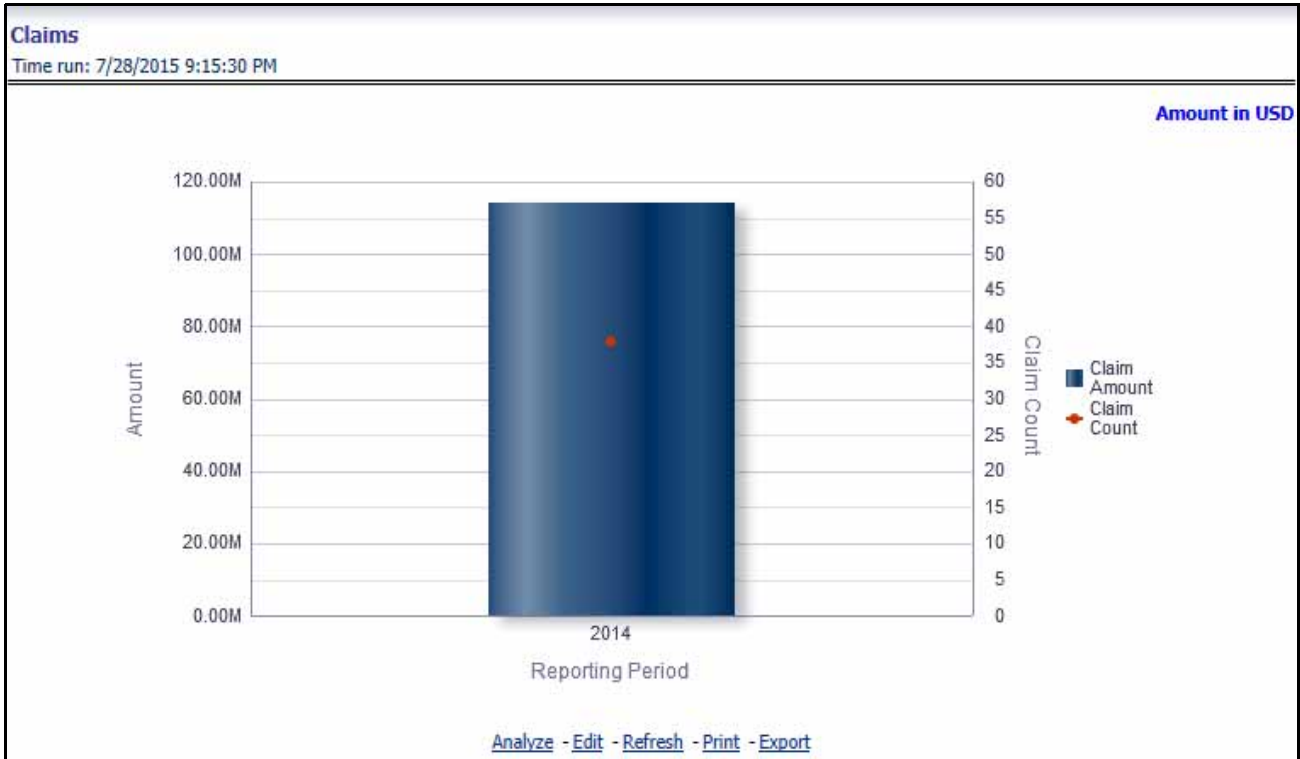

Investment Income

This report shows investment revenue across all line of businesses and underlying products through a time series graph. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Claims

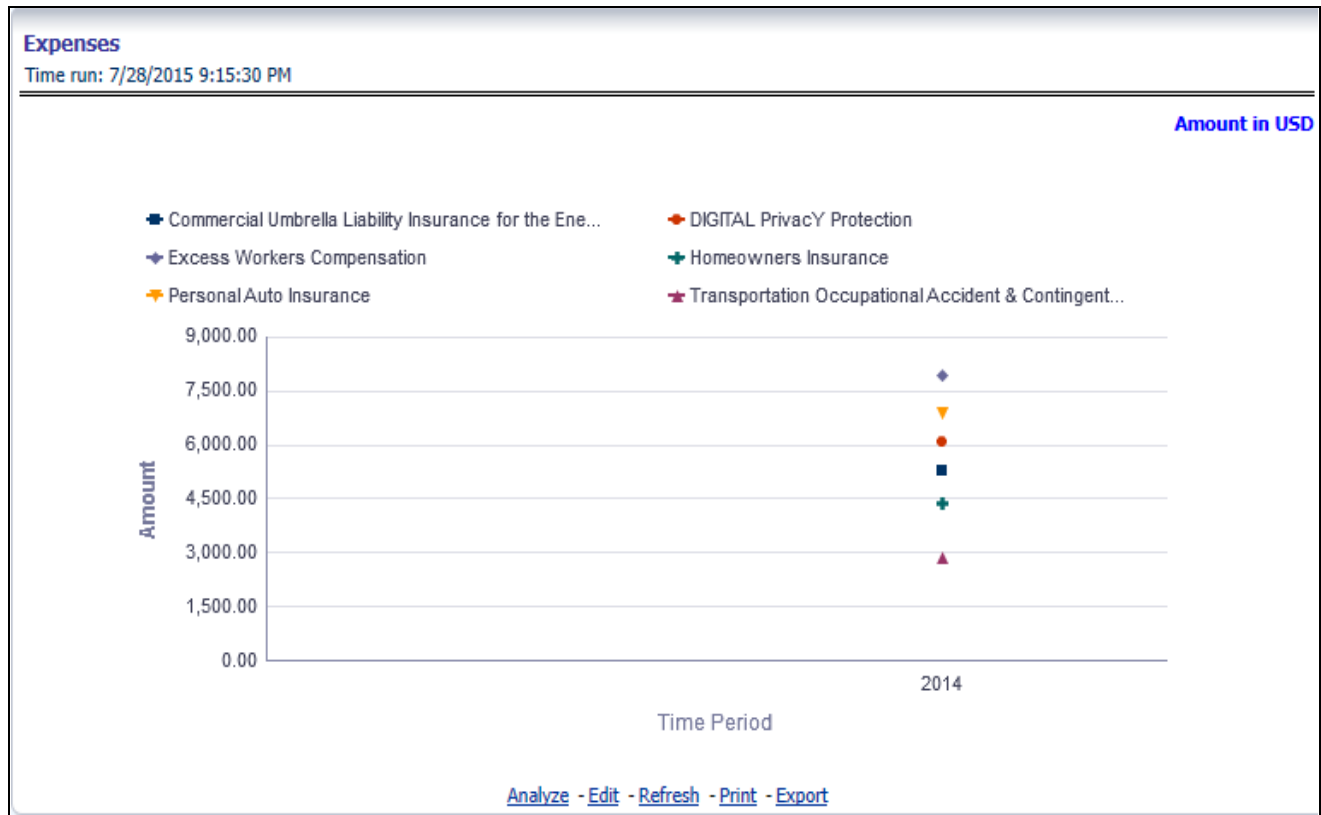

This report shows expense towards claim payments across all line of businesses and underlying products through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Expenses

This report shows policy related expenses across all line of businesses and underlying products through a time series.

This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Ratios

This report shows key business indicator ratios across all line of businesses and underlying products through a time series. The key ratio indicator report contains various report level filters such as Combined Ratio, Loss ratio, Expense Ratio, and Underwriting Balance Ratio, and can be viewed by individual ratio or all ratios together. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Performance Overview

All reports on this tab focus on the policy performance perspective. The reports represent business performance through policy performance perspective. The filters of this tab include:

- Time
- Company
- Geography

The various reports available under this tab are discussed in the following sections.

Customer and Policy

Policy

This report shows counts of policies for all line of businesses and underlying products through a time series. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Premium Trends

This report shows a trend in revenue through different types of premium, for example Written Premium, Earned Premium, and Ceded Premium, at an enterprise level, for all line of businesses and underlying products through a time series. The Premium Trends report contains the following report level filters:

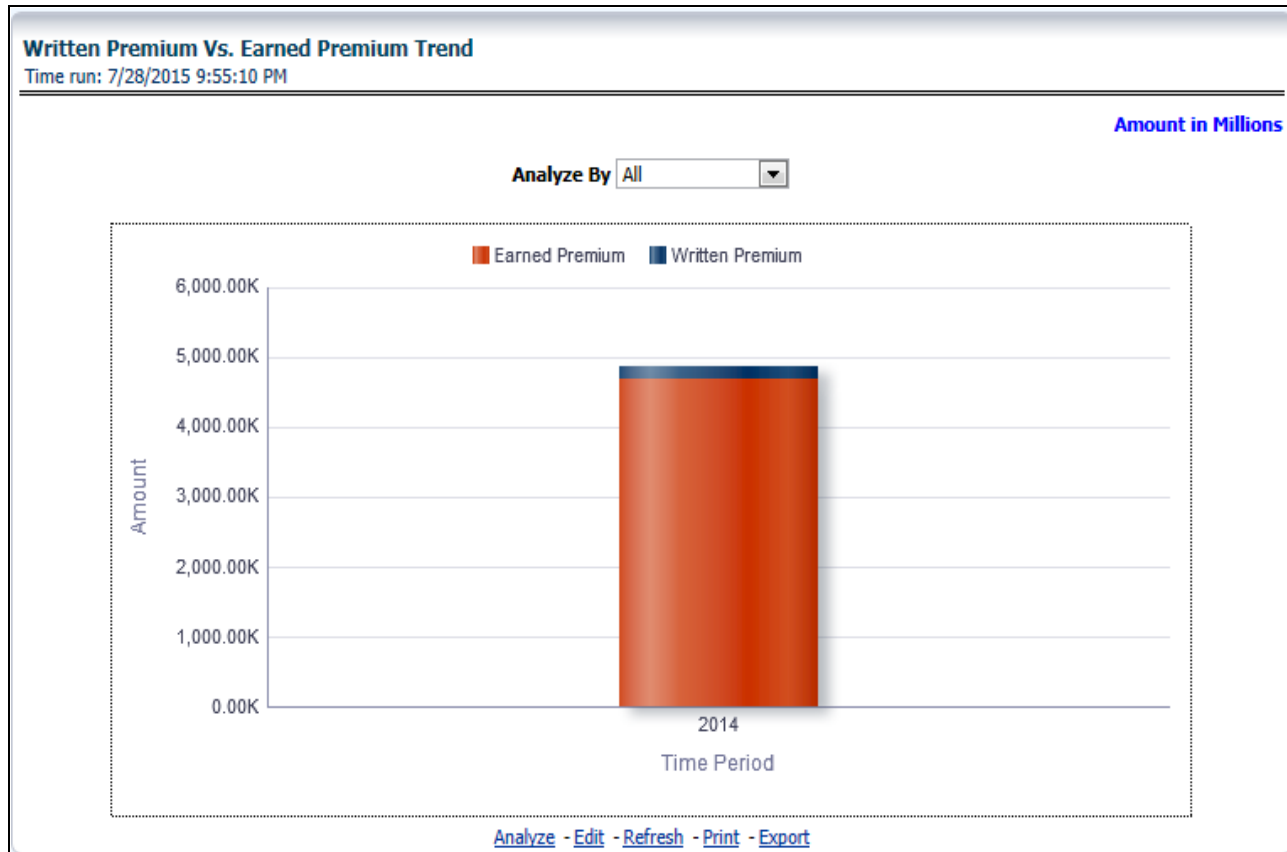

- Written Premium
- Earned Premium
- Collected Premium
- Uncollected Earned Premium
- Retained Premium
- Ceded Premium

This report can be viewed by individual premium type or all types together through a line graph. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Written Premium vs. Earned Premium Trend

This report shows trend in revenue and a comparison between Written Premium and Earned Premium, at an enterprise level, for all line of businesses and underlying products through a time series. This Trend can further be viewed and analyzed through report level filters like Line of Business and Products for more granularities, through a stacked bar graph. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Earned Premium Vs. Uncollected Earned Premium

This report shows a trend in actual collection of earned premium through a comparison between earned premium, collected premium, and uncollected earned premium. This report shows at an enterprise level, for all line of businesses and underlying products through a time series. This Trend can further be viewed and analyzed through report level filters like Line of Business and Products for more granularities. The values are in a stacked bar graph. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Policy Expense Summary Trend

This report shows policy related expenses under different expense heads at an enterprise level, for all line of businesses and underlying products through a time series. This Trend can further be viewed and analyzed through report level filters like Line of Business and Products for more granularities. The values are in a clustered bar graph. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

New Business Quote Count

This report shows number of quotes generated for new business, at an enterprise level, for all line of businesses and underlying products through a time series. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Fee

This report shows fee income generated, earned, collected, and refunded, at an enterprise level, for all line of businesses and underlying products through a time series. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

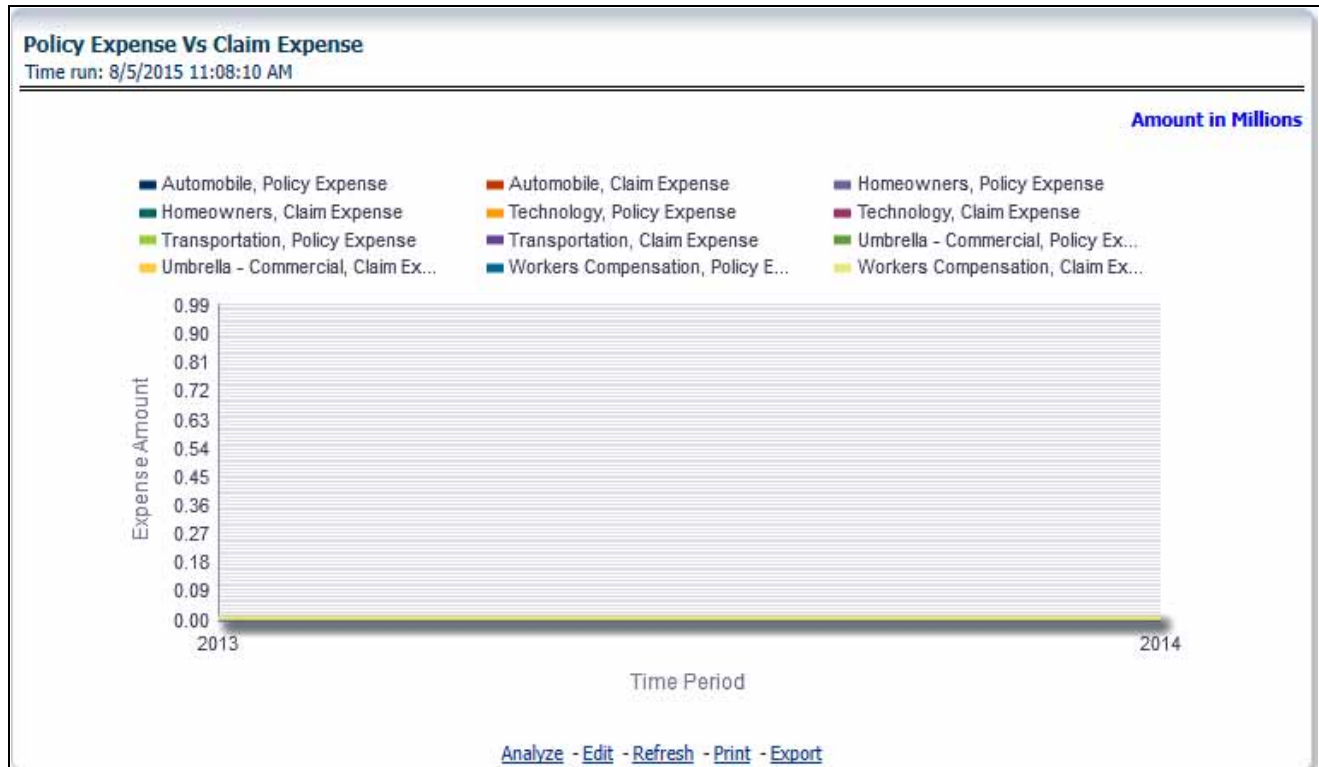

Tax

This report shows premium tax trend for tax generated, earned, and collected, at an enterprise level, for all line of businesses and underlying products through a time series. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

Policy Expense vs. Claim Expense

This trend report shows a comparison between policy expenses and claim expenses, at an enterprise level, for all line of businesses and underlying products through a time series. This report can be analyzed over various time periods, entities, and geographies selected from page level prompts.

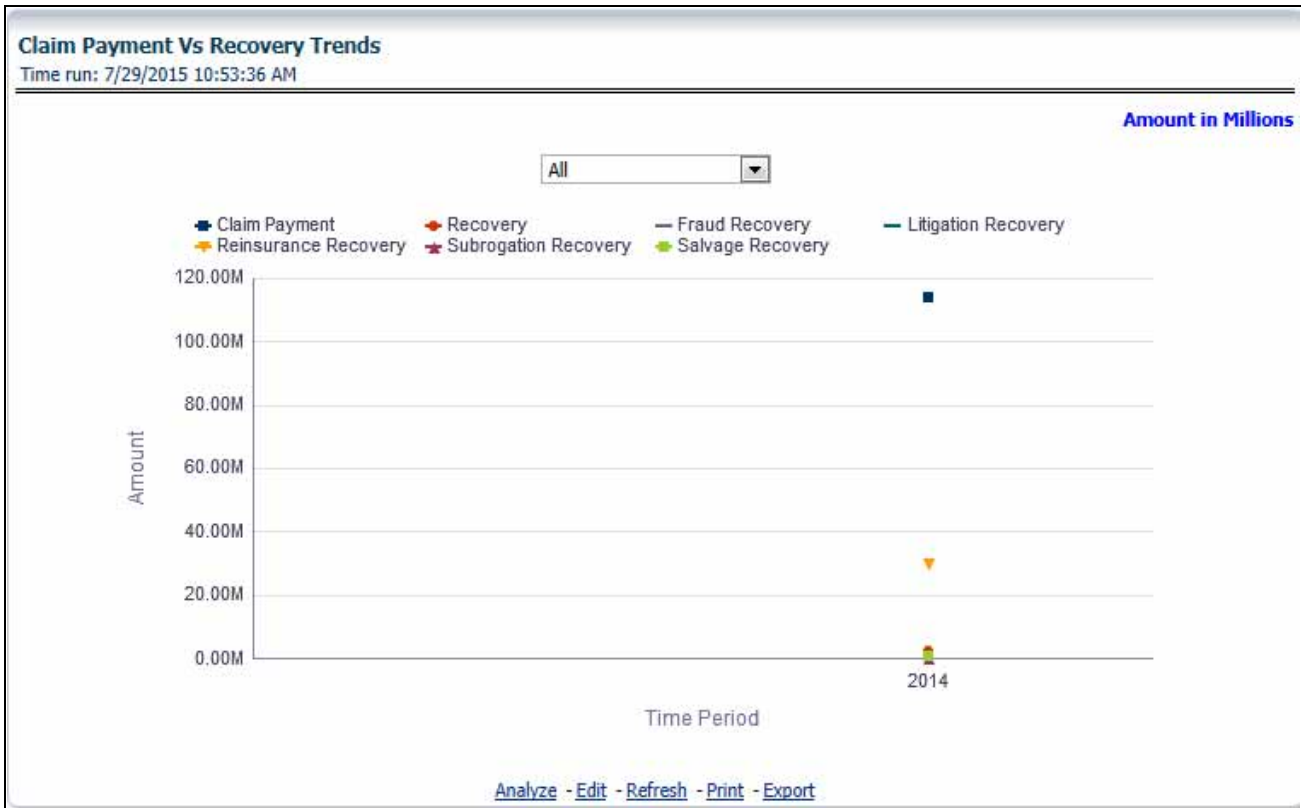

Claim Payment Vs. Recovery Trends

This report shows a comparison between claim payments and recoveries made as well as trend in various types of recoveries at an enterprise level, for all line of businesses and underlying products through a time series. This Trend can further be viewed and analyzed through the following report level filters for more granularities:

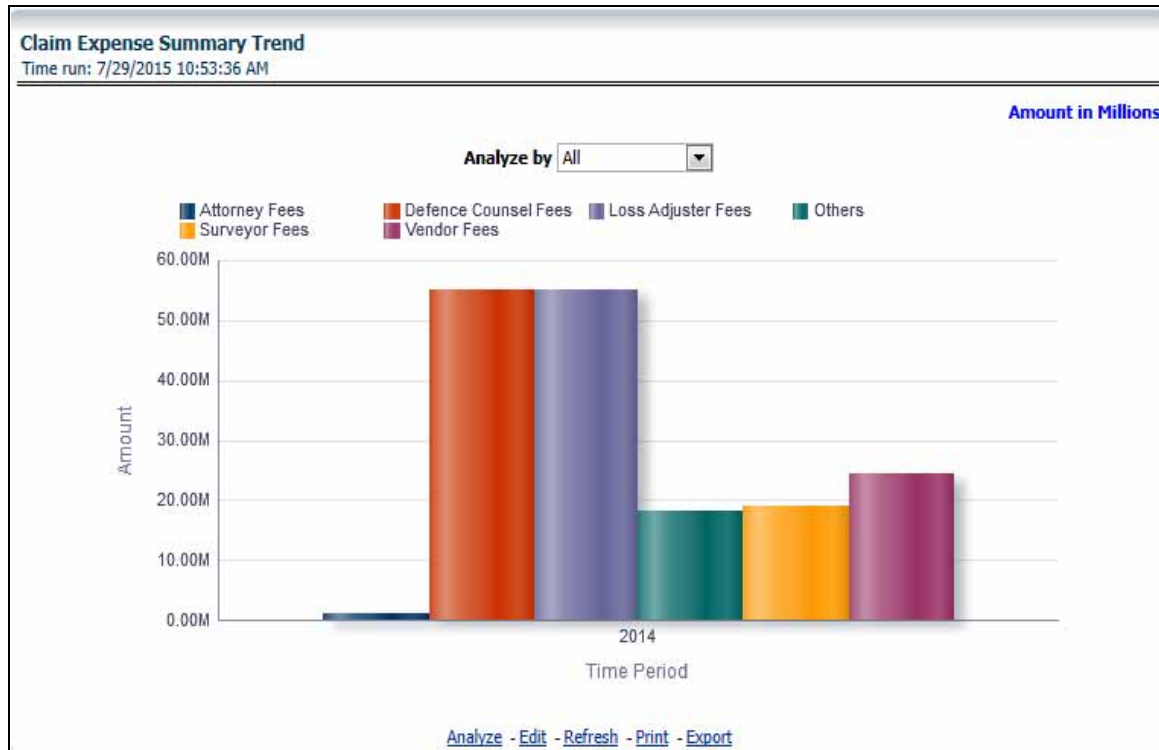

- Claim Payments
- All recovery Payments
- Fraud Recovery
- Litigation Recovery
- Reinsurance Recovery
- Subrogation Recovery
- Salvage Recovery

The values are in a line graph. This report can also be analyzed over various time periods, entities, and geographies selected from page level prompts

Claim Expense Summary Trend

This report shows a trend and comparison between various types of claim expenses at an enterprise level, for all line of businesses and underlying products through a time series. This Trend can further be viewed and analyzed through the report level filters, Line of business and products, for more granularities. The values are in a clustered bar graph. This report can also be analyzed over various time periods, entities, and geographies selected from page level prompts.

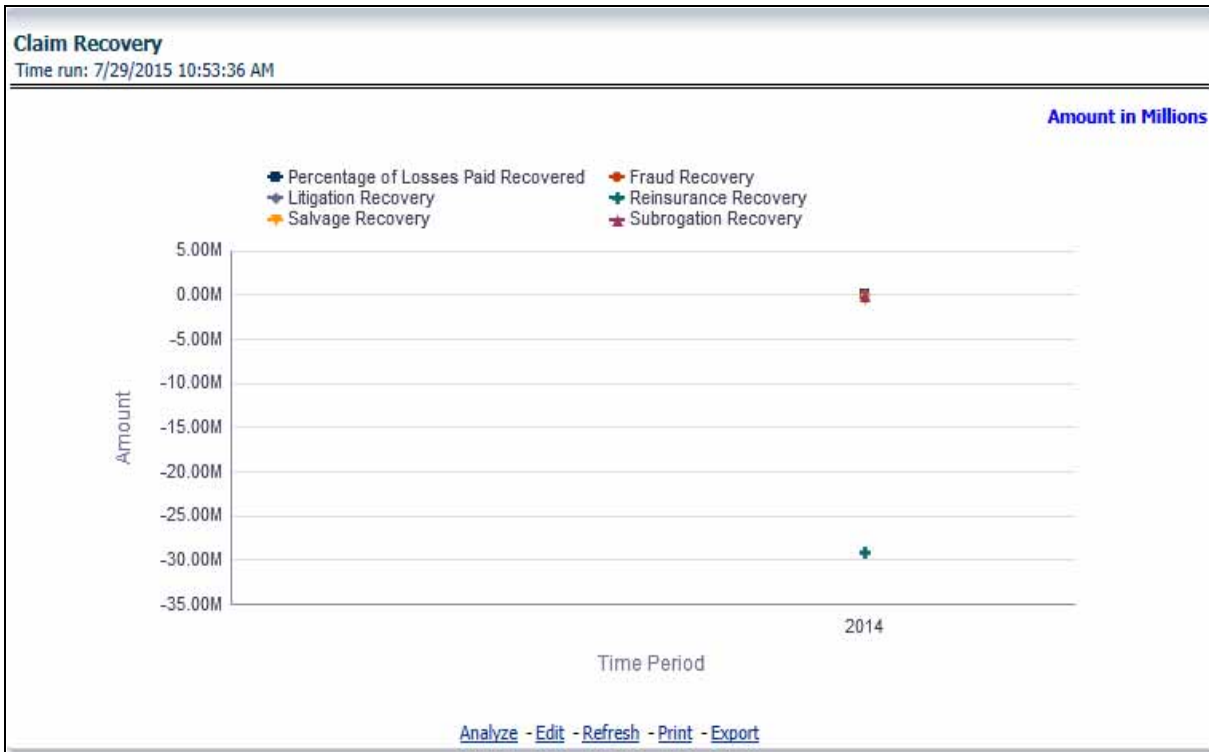

Loss and Expense

This report shows a trend and comparison between underwriting expense and various types of loss adjustment expenses along with actual claim payments and litigation expenses at an enterprise level, for all line of businesses and underlying products through a time series. The values are in a line graph. This report can also be analyzed over various time periods, entities, and geographies selected from page level prompts.

Claim Recovery

This report shows a trend in various types of recoveries as well as the extent of recoveries against paid losses, at an enterprise level, for all line of businesses and underlying products through a time series. The values are in a line graph. This report can also be analyzed over various time periods, entities, and geographies selected from page level prompts.

Key Performance Ratios

This report shows trend in various key performance metrics, that is, combined ratio, operating ratio, commission ratio, loss ratio, and so on for all line of businesses and underlying products over a selected time period. Loss Ratio Trend by Product

This report shows Combined Ratio or Incurred Loss Ratio, as selected from the view option, across products and line of businesses through a time series.

Claim Counts Trend by Product

This reports displays count of claims through a time series for all products and line of businesses selected.

Product Performance

The Product performance tab includes reports that focus on the Performance for each product under each Line of Business. The filters for this tab allow the report results to be focused on selected products for comparison and targeted analysis. The filters include:

- Time
- Company
- Geography
- Line of Business
- Products

The various reports available under this tab are discussed in the following sections.

Product Profit & Loss

This tabular report provides a snapshot of financial profitability by all or a specific product for or a specific line of business selected for the time period. The financial performance window displays net income through premium, expenses through claims and benefits paid with overall profitability. This report also shows the previous period figures along with a variance between the current and the previous period.

Product Profit & Loss
Time run: 7/29/2015 12:43:29 PM

Amount in USD

Particulars	Current Period	Previous Period	Variance
Net Insurance Premium Revenue	8,670,000.00	89,771.00	9557.91%
Net Income	8,891,200.00	2,106,571.00	322.07%
Insurance Benefits	310,229.00	310,229.00	0.00%
Insurance Claims and Loss Adjustment Expenses	3,100.00	1,000.00	210.00%
Net Insurance Benefits and Claims	307,329.00	306,229.00	0.36%

Combined Ratio

This report shows combined ratio for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Operating Ratio

This report shows operating ratio for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Expense Ratio

This report shows expense ratio for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Loss Ratio

This report shows loss ratio for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

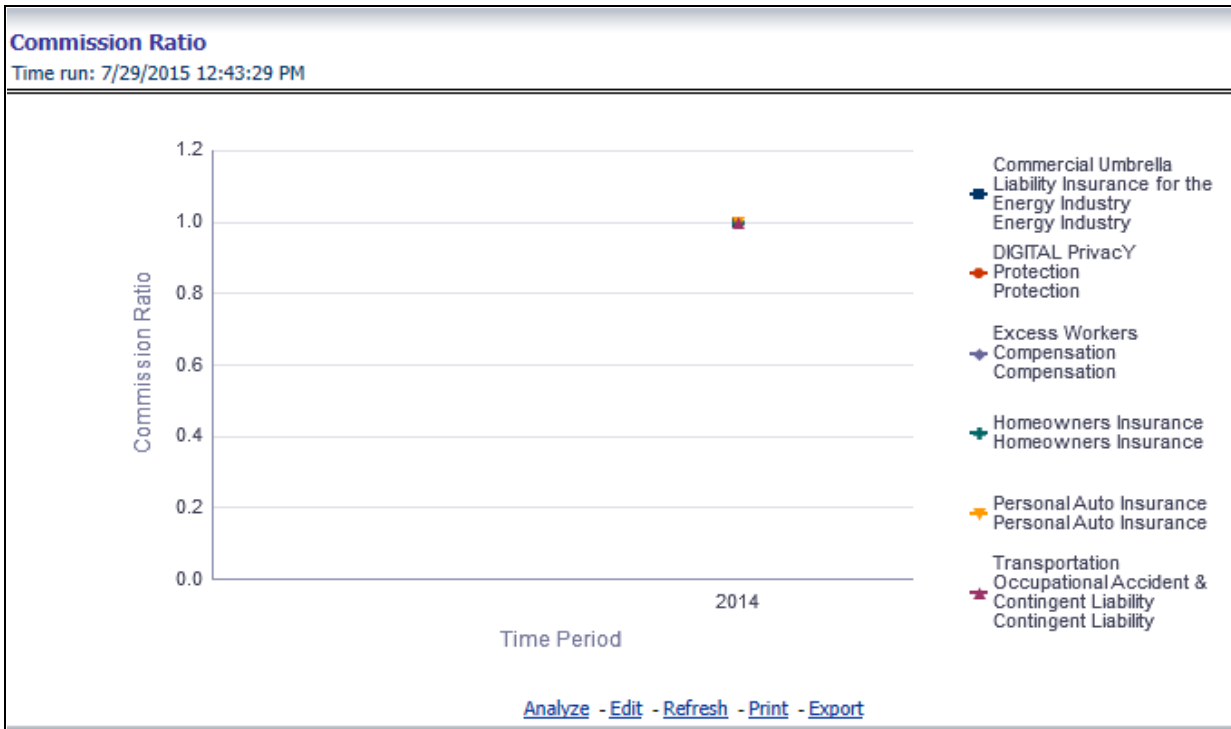

Net Retention Ratio

This report shows net retention ratio for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Commission Ratio

This report shows commission ratio for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities and geographies selected from page level prompts.

Average Earned Premium Growth

This report shows growth in average earned premium for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Average Policy Growth

This report shows growth in policy counts for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Average Claim Frequency

This report shows average number or frequency of reported claims for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Average Claim Severity

This report shows average size or severity of reported claims for all or a specific product for or a specific line of business through a time series. This report can be viewed over various time periods, entities, and geographies selected from page level prompts.

Top 10 Product Attrition

This report ranks top ten products in terms of various key attrition measures like loss policy count, lost written premium, and corresponding attrition ratio.

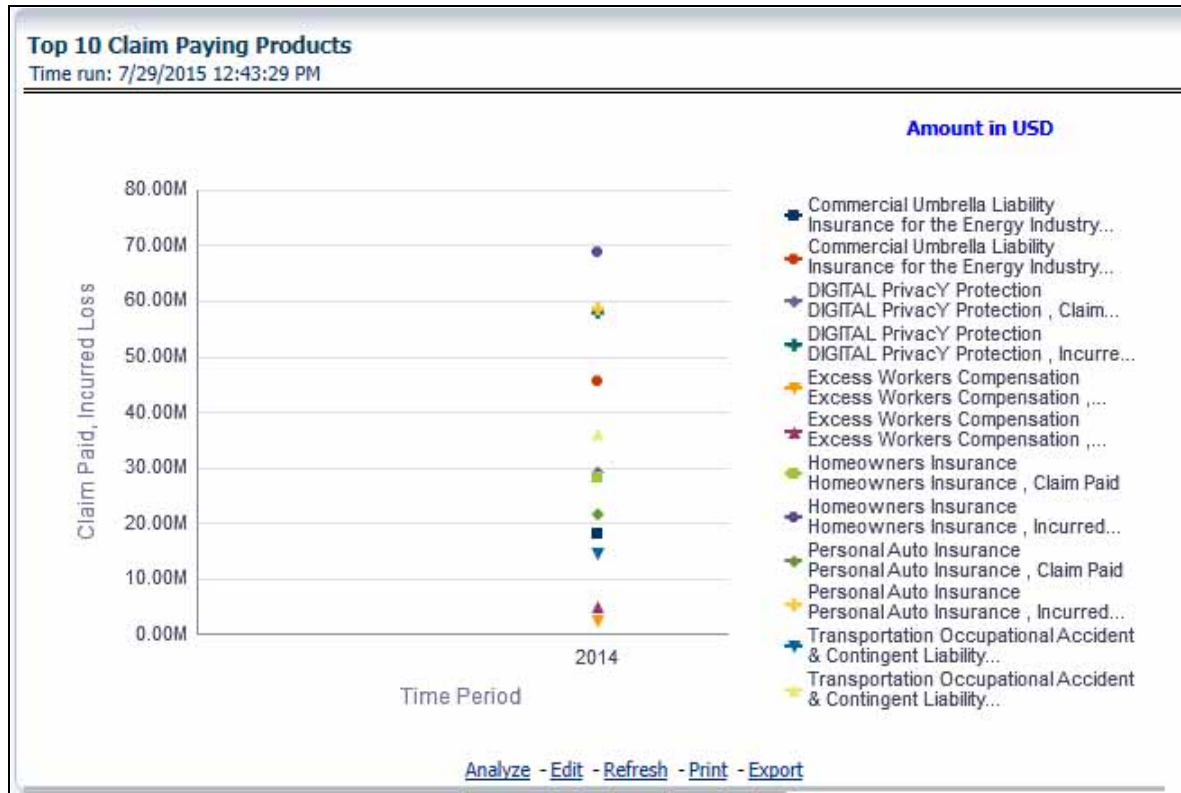

Top 10 Product Attrition
Time run: 7/29/2015 12:43:29 PM

Time Hierarchy	Product	Rank	Lost Written Premium	Lost Policy Count	Attrition Ratio	Previous Rank
2014	Commercial Umbrella Liability Insurance for the Energy Industry	1	13,600.00	4	57.14%	2

Managing Quote Performance Dashboard

Overview

This chapter explains the reports available under each tab in the Quote Performance Dashboard.

Managing Reports

The following tabs are present in the Quote Performance dashboard:

- [Summary](#)
- [Key Facts](#)
- [Line of Business](#)
- [Product](#)
- [Region](#)
- [Producer Performance](#)

The following screenshots display the essential nature of the available reports as per each tab:

Summary

This tab includes information at the corporate level. The information contained in the reports generated summarizes how the entire organization is performing. Following are the filters available for this tab.

- Time
- Company
- Geography

The various reports available under this tab are detailed in the following sections.

Key Quote Performance Indicators Flash

This report shows snap shots of key performance indicators represented through flash boxes for current period.

Each of these Flash boxes is drillable to further corresponding detailed report as follows:

- Flash Box: Quote Count Percentage Change

Quote Count Trends (Drill-down report): This report summarizes the count and distribution of the types of quotes generated during the reported period and compares those amounts to previous reporting period. The comparisons available include a previous period or a previous year(s).

- Flash Box: Quote Expenses Percentage Change

Quote Expenses Summary Trend (Drill-down report): This report summarizes the total amount of expenses by each type of quote for the reporting period and compares those amounts to the previous reporting period. The comparisons available include a previous period or a previous year(s).

- Flash Box: New Business Bind ratio Percentage Change

New Business Quote to Bind Ratio (Drill-down report): This report presents the ratios of Total New Business Quotes that were generated vs. the New Business Quotes that were accepted and generated a new policy. The ratios are presented for the current and previous reporting periods. In addition, it isolates and presents the bind ratio for quotes that had reports received for the current reporting period and previous reporting period.

- Flash Box: Quote to Cancelled Ratio Percentage Change

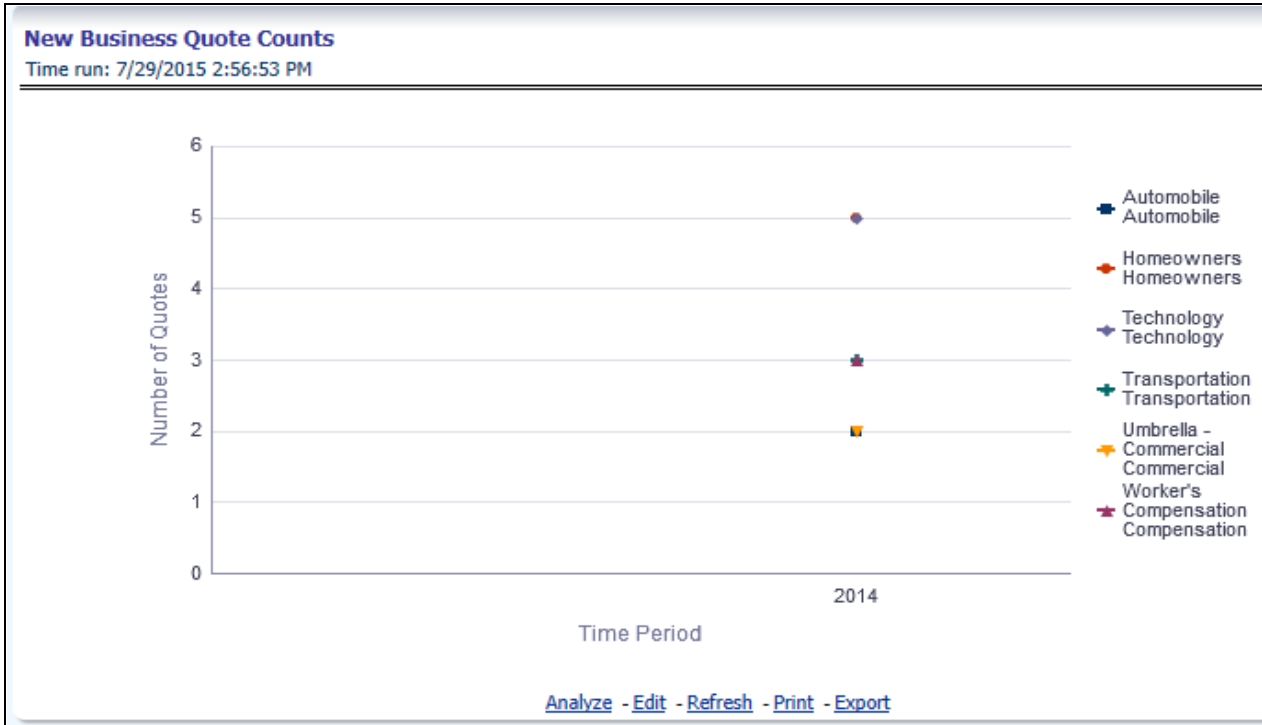

Endorsement Quote to Cancelled Ratio (Drill-down report): This report summarizes the ratio of policies where an endorsement quote was generated and remained in force until policy expiration and the policies where an endorsement quote was generated and the policy was later cancelled. The ratios are presented for current and previous reporting period and are exhibited in both tabular and graphical display.

- Flash Box: Quote to Expired Ratio Percentage Change

Renewal Quote to Expired Ratio (Drill-down report): This report summarizes the ratio of policies where a renewal quote was generated and the policy renewed and the policies where a renewal quote was generated and the policy later expired. The ratios are presented for current and previous reporting period and are exhibited in both tabular and graphical display.

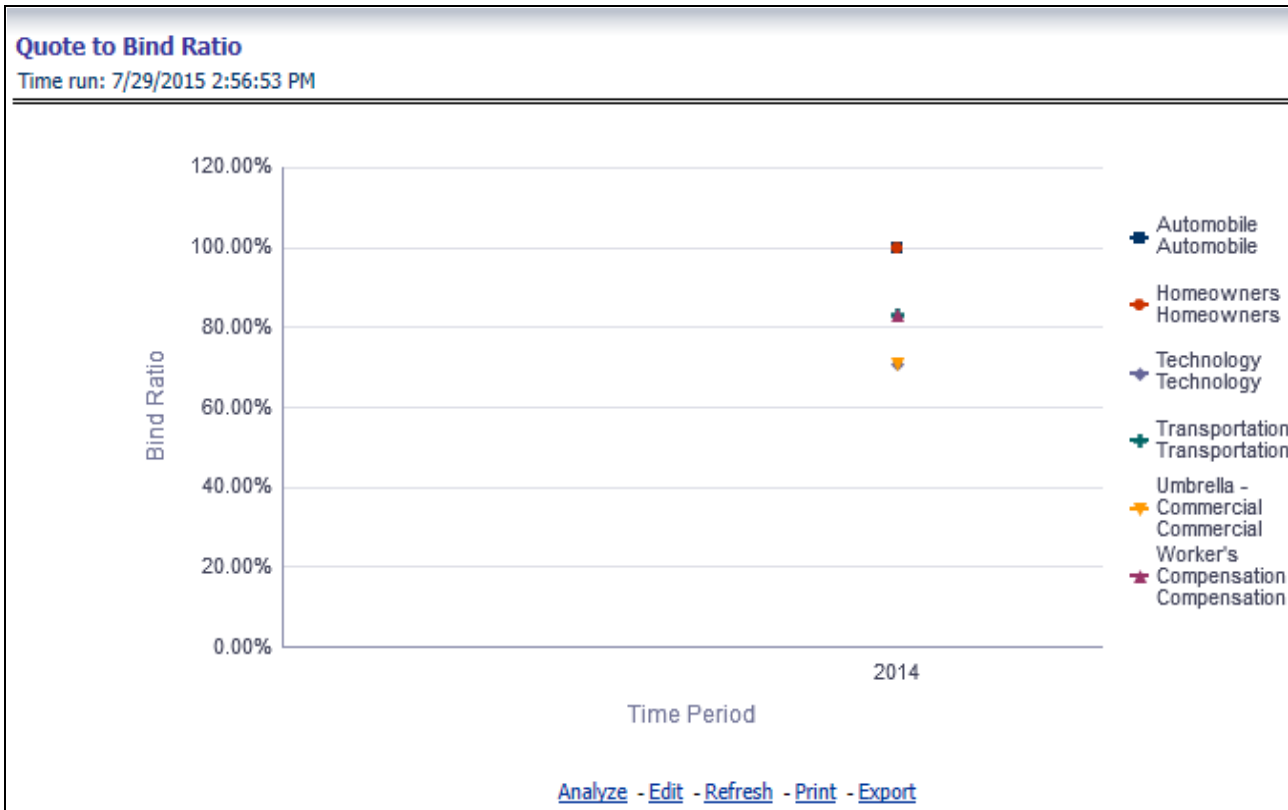

New Business Quote Counts

This line graph illustrates the total number of New Business quotes generated over time. Each Line of Business is represented by a unique line.

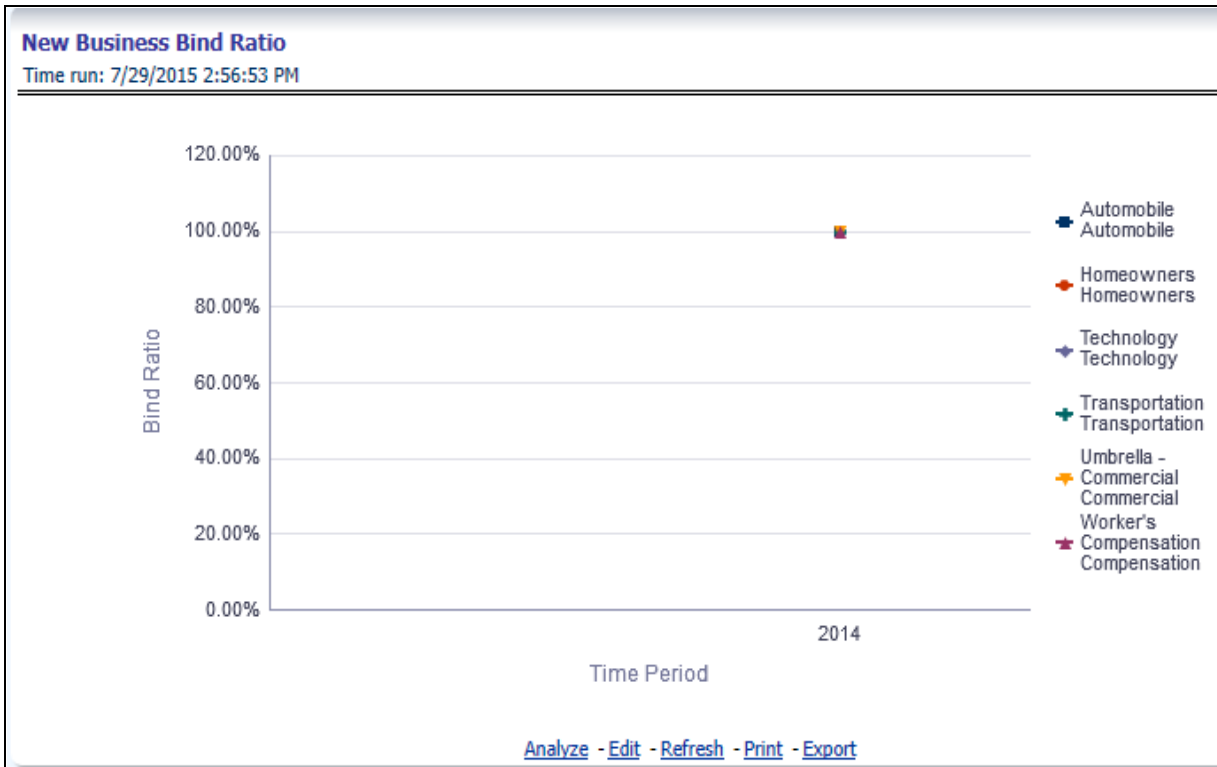

Quote to Bind Ratio

This line graph illustrates the Binding ratio, the ratio of total quotes generated to those quotes that resulted in a policy transaction including but not limited to new business policy or endorsement, over time. Each Line of Business is represented by a unique line.

New Business Bind Ratio

This line graph illustrates the New Business Bind ratio, the ratio of total New Business quotes generated to those quotes that resulted in a new business policy transaction, over time. Each Line of Business is represented by a unique line.

Quote to Cancelled ratio

This line graph illustrates the Quote to Cancelled ratio, the ratio of total policies with endorsements quotes generated to those policies with an endorsement quote that eventually cancelled, over time. Each Line of Business is represented by a unique line.

Quote Counts by Type

This pie graph illustrates the count of quotes by the type of quote. The types of quotes illustrated include the following:

- New Business
- Endorsement
- Cancellation
- Reinstatement
- Renewal

The corresponding stacked bar graph shows the total quotes stacked by the type of quotes over a time series.

Top Ten Producing Agency New Business Quote Count

This chart lists the Producing Agencies with the 10 highest New Business Quote Count for the reporting period. This chart also lists the agencies' prior quote count for reference. The Rank of 1 is for the highest quote count of the top 10, the Rank of 10 is for the lowest quote count for the count of the top 10.

Key Facts

The Key Fact tab includes Key Performance Indicator Reports at the corporate level. The filters for this tab allow the report results to be focused on selected combinations for comparison and targeted analysis. The filters include:

- Time
- Company
- Line of Business
- Product

The various reports available under this tab are detailed in the following sections.

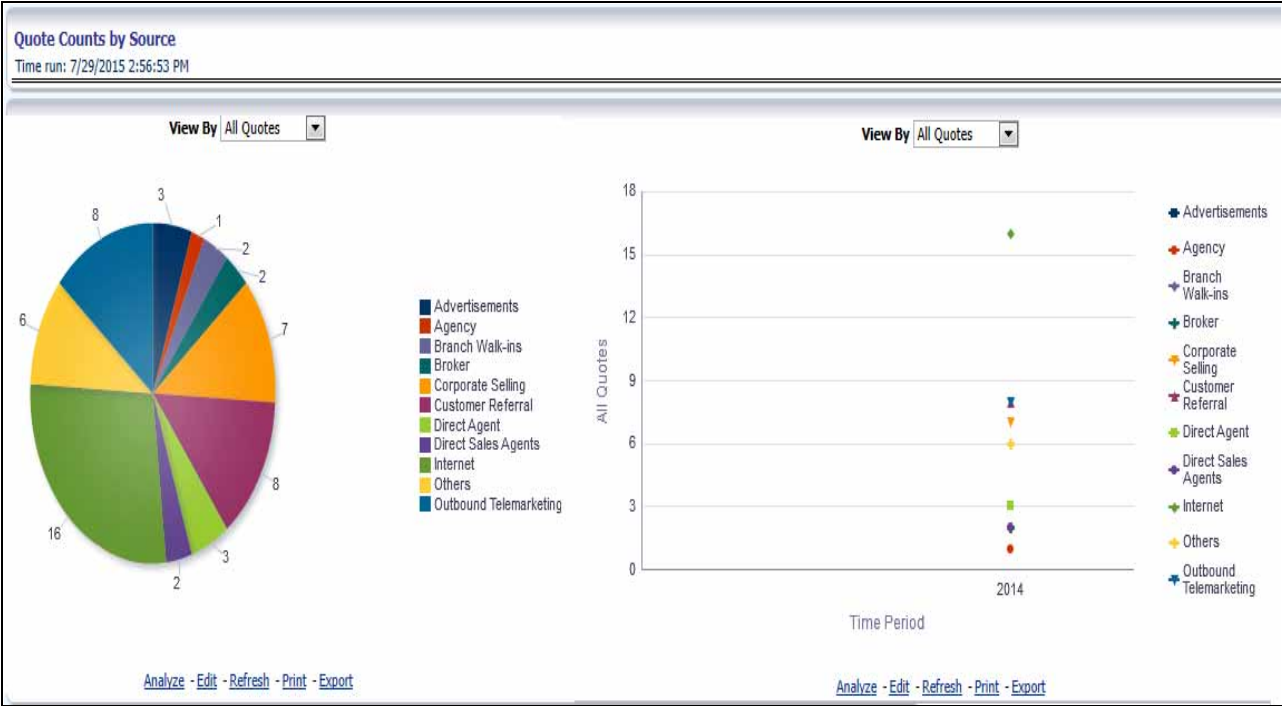

Policy Acquisition by Distribution Channel

This pie chart illustrates the percentage of policy count or written premium attributed based on the distribution channels for the corporation. The corresponding line graph illustrates the similar value, as selected by the filter, over time with a line for External Agents and Agencies and a line for Company Employees.

Quote Counts by Source

This pie chart illustrates the percentages of quotes for each quote source at the reporting period and can be viewed by the Quote Types. The corresponding line graph illustrates the similar value, as selected by the filter, over time with a line for each source.

Quote Counts by Source Method

This pie chart shows the percentage of quotes for each quote source method at the reporting period and can be viewed by the Quote Types. The corresponding line graph illustrates the similar value, as selected by the filter, over time with a line for each source method.

Average Quote Conversion Age

This line graph illustrates the number of days from the initiation of the quote to the binding transaction such as new business policy submission, endorsement transaction, and so on over time.

Line of Business

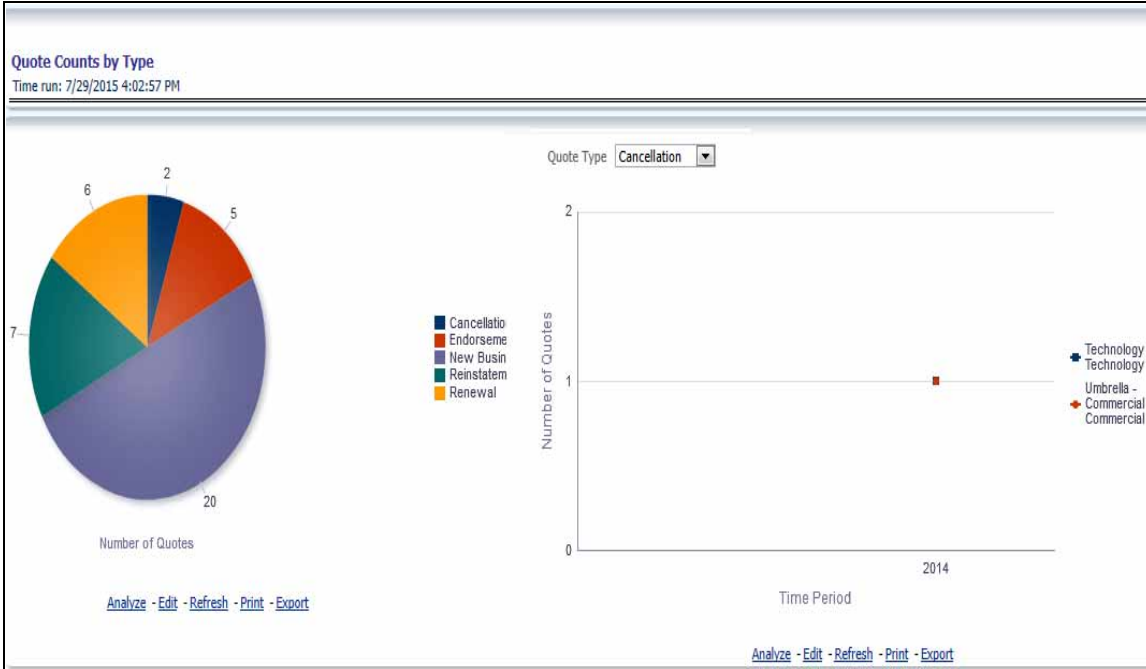

The Line of Business tab includes reports that focus on the Key Performance Indicators for each Line of Business. The filters for this tab allow the report results to be focused on selected lines of business for comparison and targeted analysis. The filters include:

- Time
- Company
- Line of Business

The various reports available under this tab are detailed in the following sections.

Quote Counts by Type

This pie chart illustrates the percentages of quotes for each quote type at the reporting period. The corresponding line graph illustrates the similar value, as selected by the filter, over time with a line for each Line of Business. The filter allows the user to select the quote type.

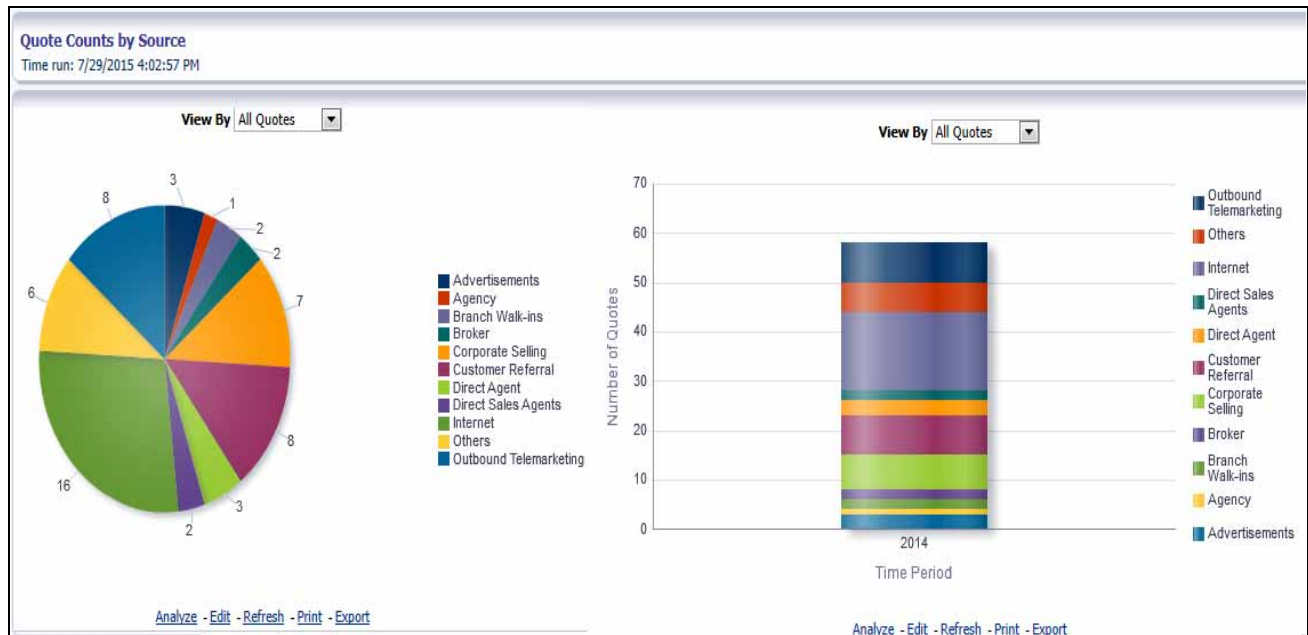

Policy Acquisition by Distribution Channel

This pie chart illustrates the percentage of policy count or written premium attributed based on the distribution channels for the corporation. The corresponding bar graph have a stacked bar for each Line of Business. Each bar is stacked by distribution channel types and is repeated over time.

Quote Counts by Source

This pie chart illustrates the percentages of quotes for each quote source at the reporting period and can be viewed by the Quote Types. The corresponding bar graph have a stacked bar for each Line of Business over time that is stacked with each quote source.

Quote Counts by Source Method

This pie chart shows the percentage of quotes for each quote source method at the reporting period and can be viewed by the Quote Types. The corresponding bar graph have a stacked bar for each Line of Business over time that is stacked with each quote source method.

Average Quote Conversion Days

This is time series graphical trend report where producers' performance is measured by average days required in converting from a quote to a policy. This acts as a performance indicator for producers' efficiency in business conversion.

Drill Down:

The report can be further analyzed by Line of Business or Product wise by clicking **Click for Graphical View** button.

Producer Performance Ranking

This tabular report displays the top 10 and bottom 10 in performance based on the following View By options: .

- Written Premium
- Average Written Premium
- Bind Ratio
- Policy Count
- Quote Count
- Attrition Ratio
- Claim Count
- Loss Ratio Excluding ULAE
- Loss Payments

The table can be populated based on the View options, Producing Agent or Producing Agency. This report shows performance based on the Line of Business focus.

Region

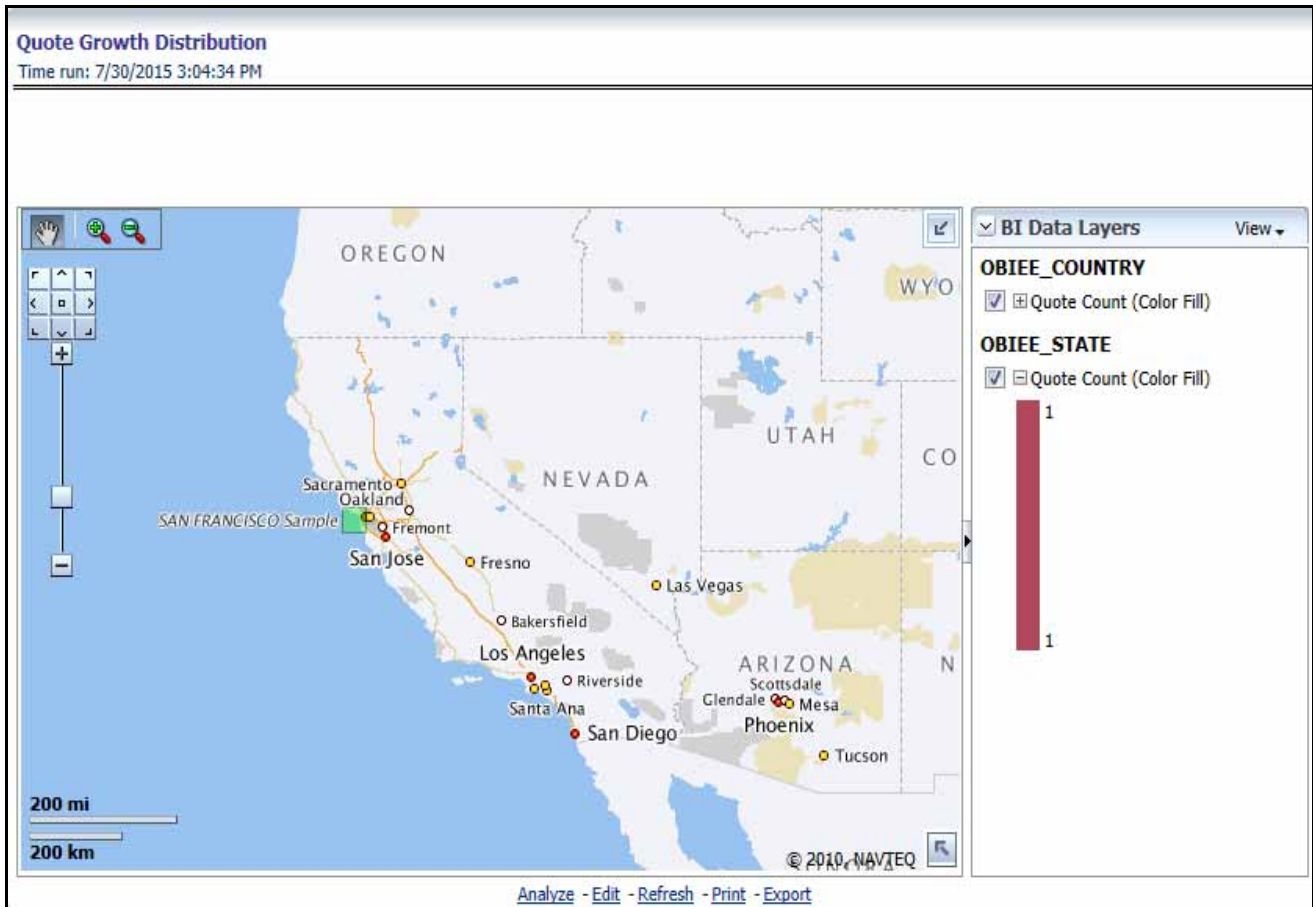

The Region tab includes reports represented in tabular and map format that summarizes results for geographical regions. The filters for this tab allow the report results to be focused on selected combinations for geographical comparison. The filters include:

- Time
- Company
- Line of Business
- Product
- Geography

The various reports available under this tab are detailed in the following sections.

Quote Growth Distribution

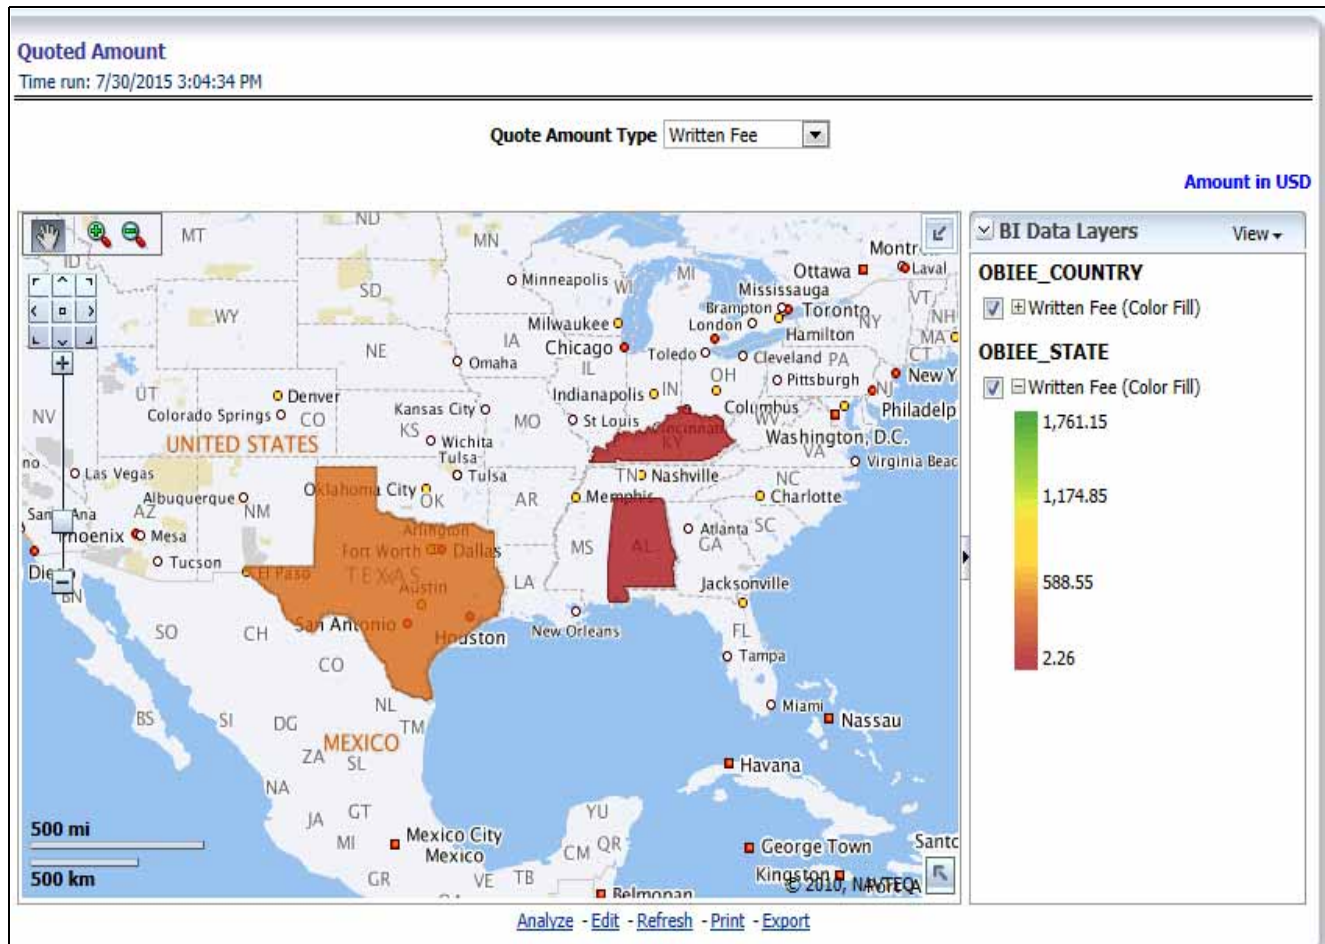

This is a geographic heat map that illustrates the count of quotes over geographic regions with areas of similar amounts colored similarly.

Quoted Amount

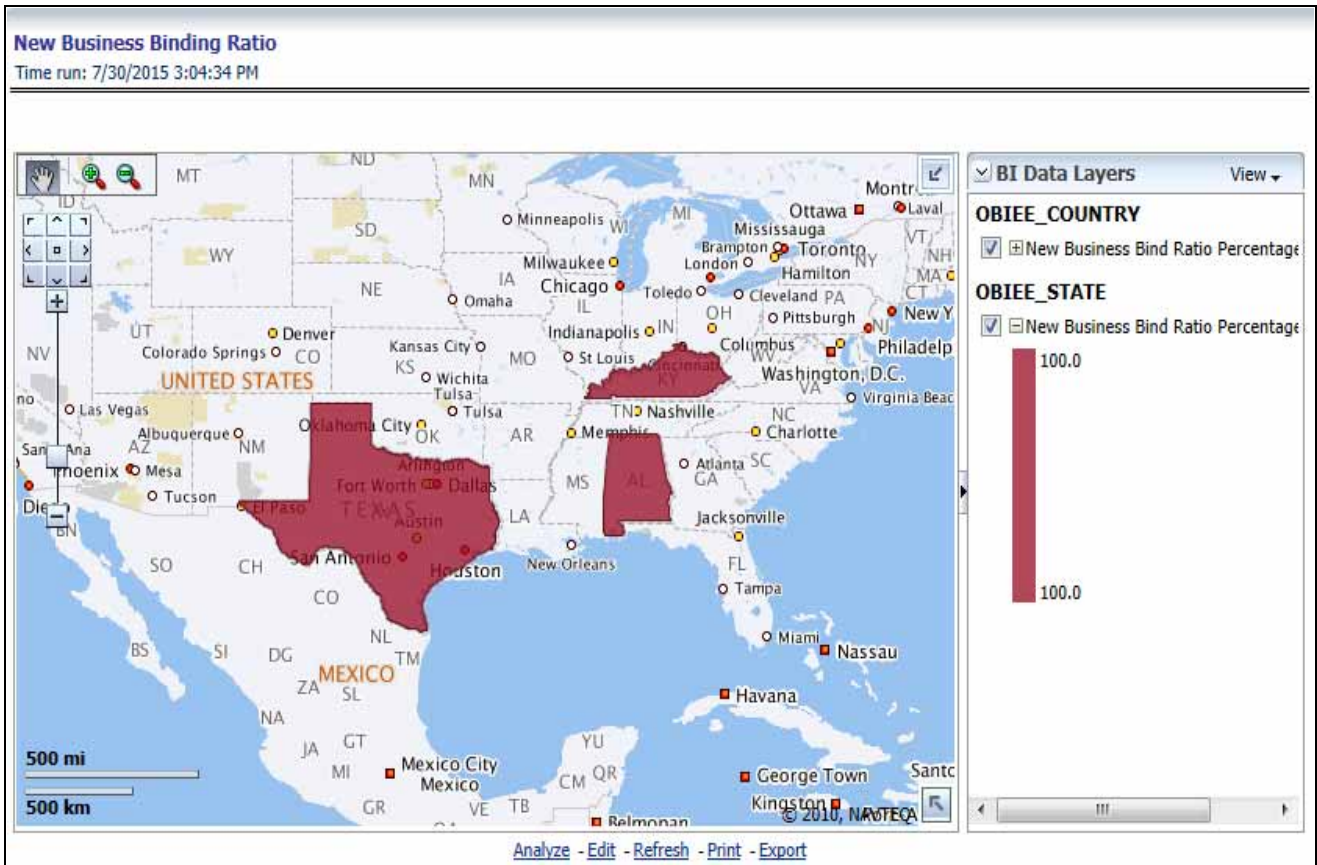

This is a geographic heat map that illustrates the quoted amount over geographic regions with areas of similar amounts colored similarly. The following quoted amount type can be viewed by selecting the specific types from the quoted amount type selection field:

- Policy Total
- Written Fee
- Written Taxes
- Written Premium

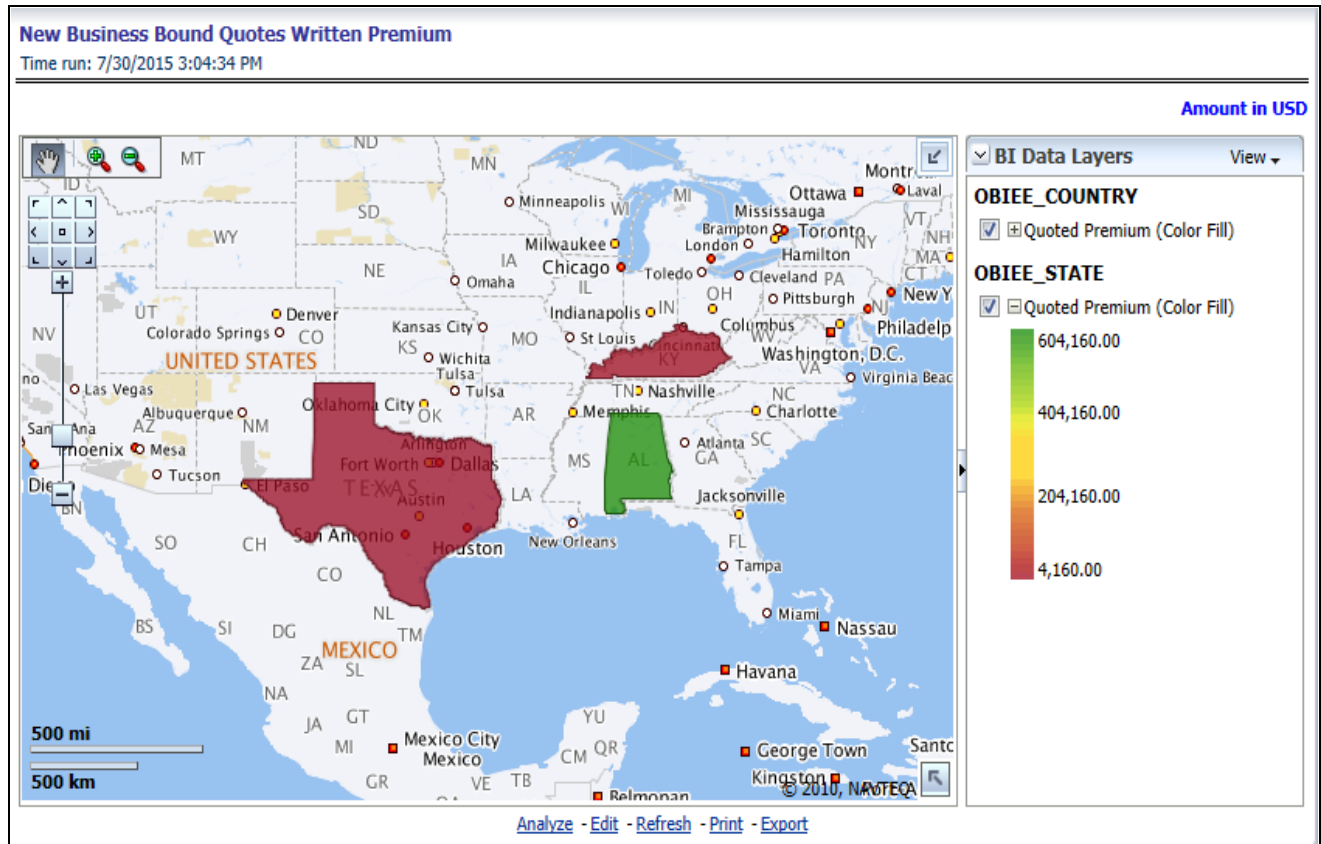

New Business Binding Ratio

This is a geographic heat map that shows the new business quote to bind ratio performance over geographic regions with areas of similar areas colored similarly.

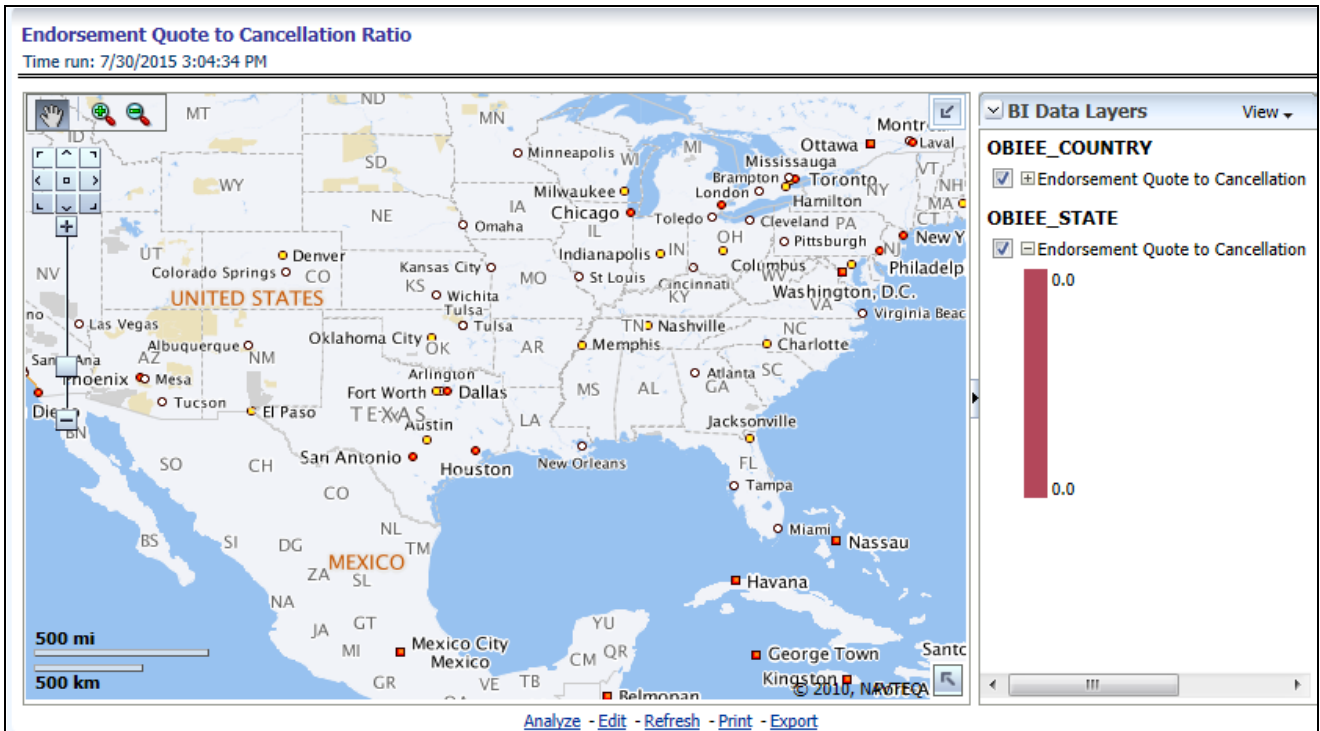

New Business Bound Quotes Written Premium

This is a geographic heat map that illustrates the new business performance in terms of written premium over geographic regions with areas of similar areas colored similarly.

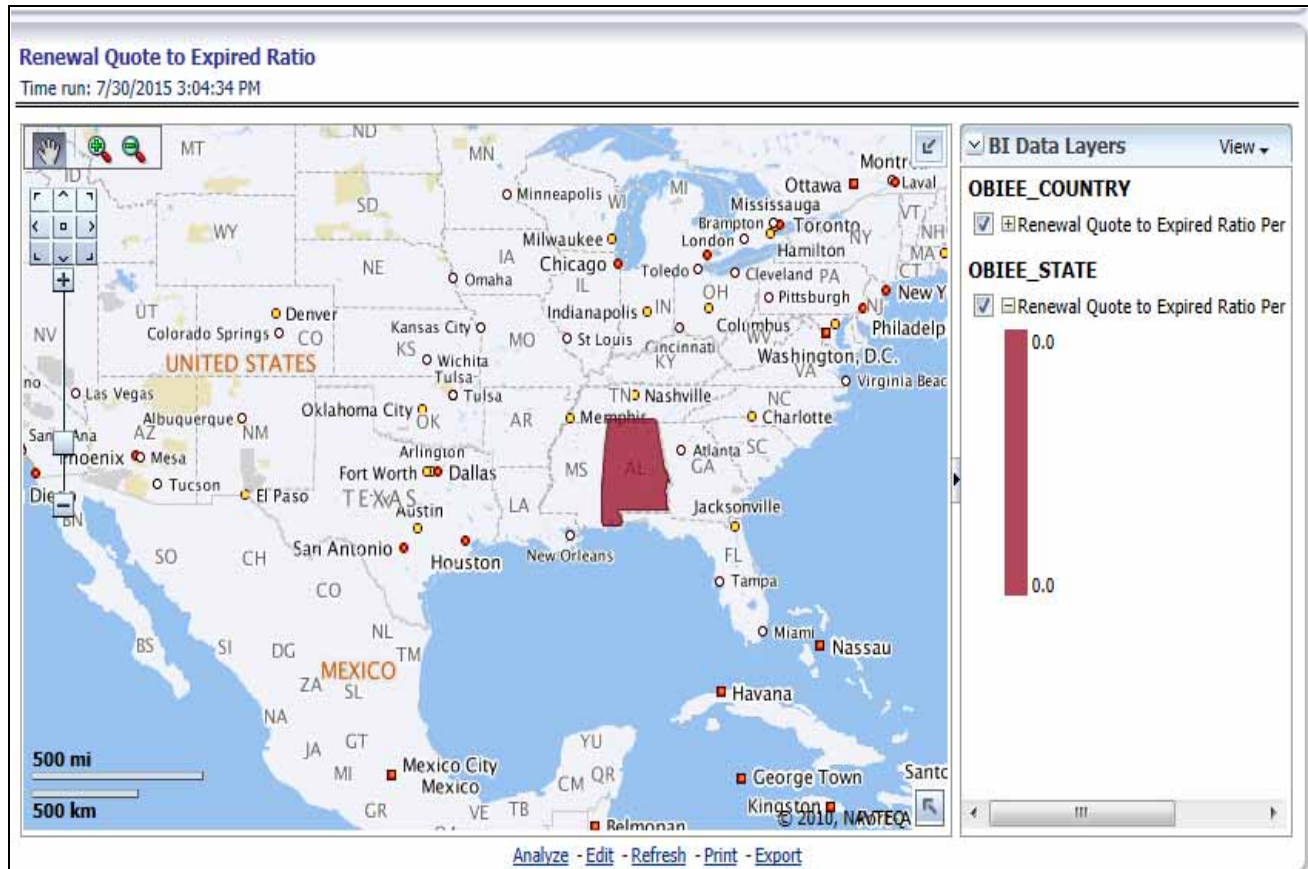

Endorsement Quote to Cancellation Ratio

This is a geographic heat map that summarizes the ratio of policies where an endorsement quote was generated and remained in force until policy expiration and the policies where an endorsement quote was generated and the policy was later cancelled. The ratios are distributed over geographic regions with areas of similar areas colored similarly.

Renewal Quote to Expired Ratio

This is a geographic heat map that summarizes the ratio of policies where a renewal quote was generated and the policy renewed and the policies where a renewal quote was generated and the policy later expired. The ratios are distributed over geographic regions with areas of similar areas colored similarly.

Producer Performance Ranking

This tabular report displays the top 10 and bottom 10 in performance based on the following View By options:

- Written Premium
- Average Written Premium
- Bind Ratio
- Policy Count
- Quote Count
- Attrition Ratio
- Claim Count
- Loss Ratio Excluding ULAE
- Loss Payments

The performance is based by each region producer's performance in the region for the selected view. The table can be populated based on the View options, Producing Agent or Producing Agency.

Average Premium by Line of Business

This report shows policy performance in terms of average premium generated by lines of business through a time series. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts.

Average Premium by Product

This report shows policy performance in terms of average premium generated by products through a time series. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts.

Key Facts

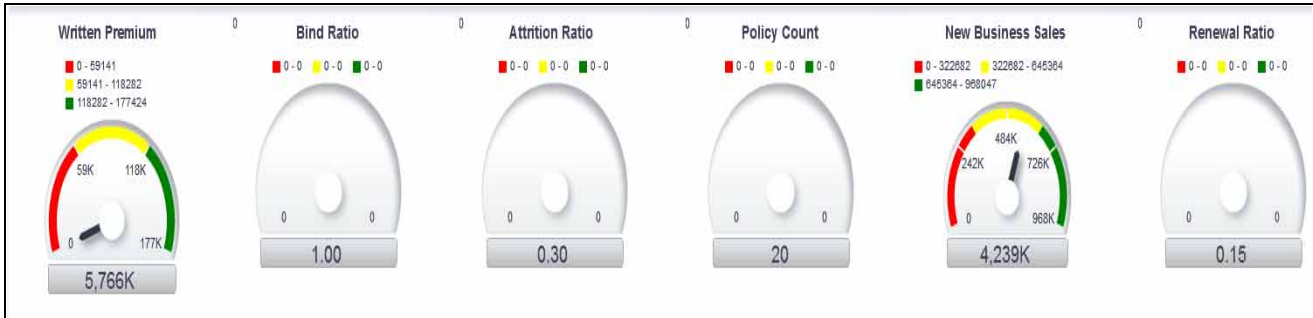

The Key Fact tab includes Key Performance Indicator Reports for line of businesses at the corporate level. The filters for this tab allow the report results to be focused on selected combinations for comparison and targeted analysis. The filters include:

- Time
- Company
- Geography
- Line of Business

The various reports available under this tab are detailed in the following sections.

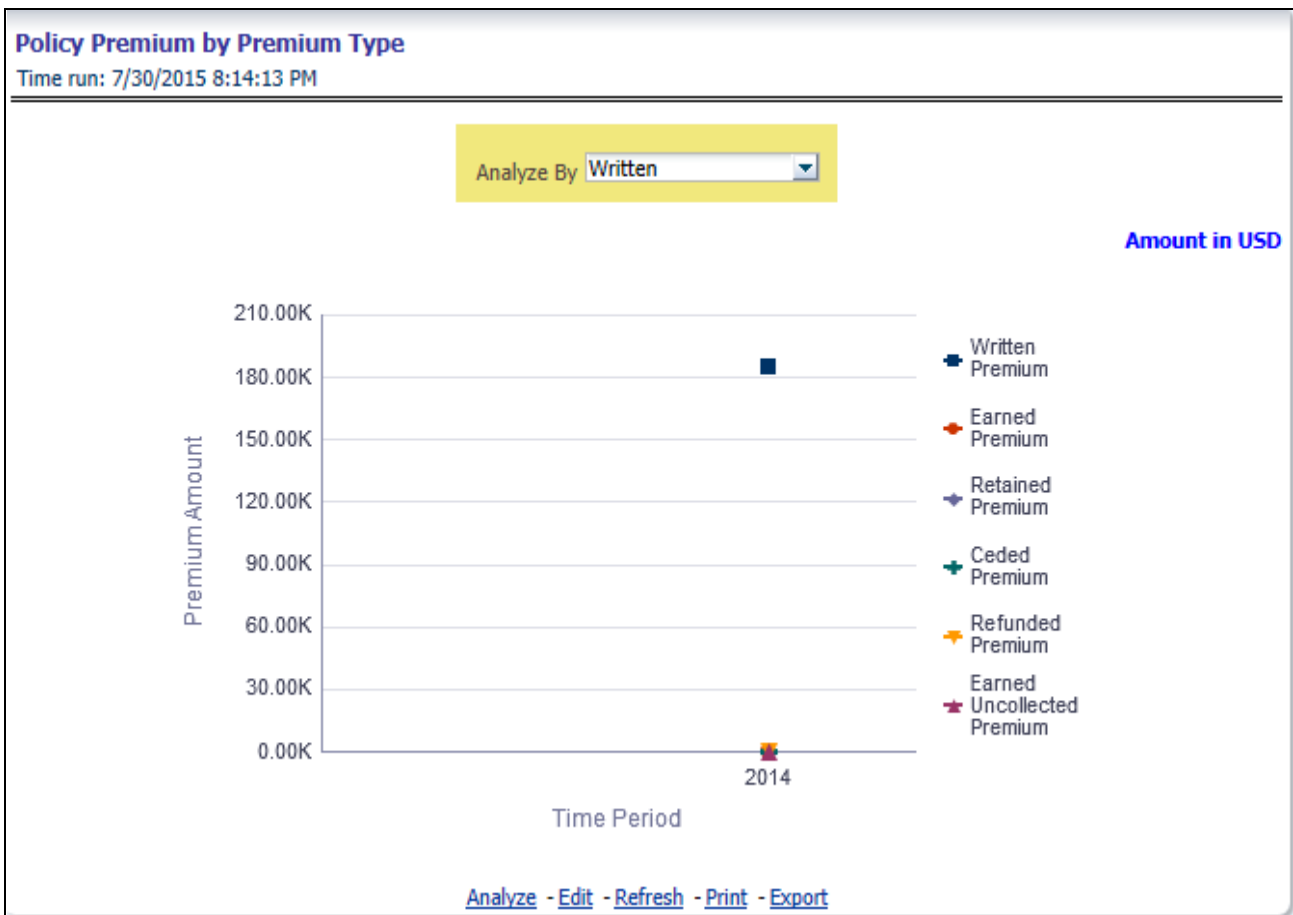

Key Policy Performance Indicators

This report shows snap shots of current key performance areas against target.

Policy Premium by Premium Type

This report shows business revenue in terms of premium generated through different premium types over a time series. Various type of premium options such as written, earned, ceded, retained, earned uncollected, and refunded are available as report level filters. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts.

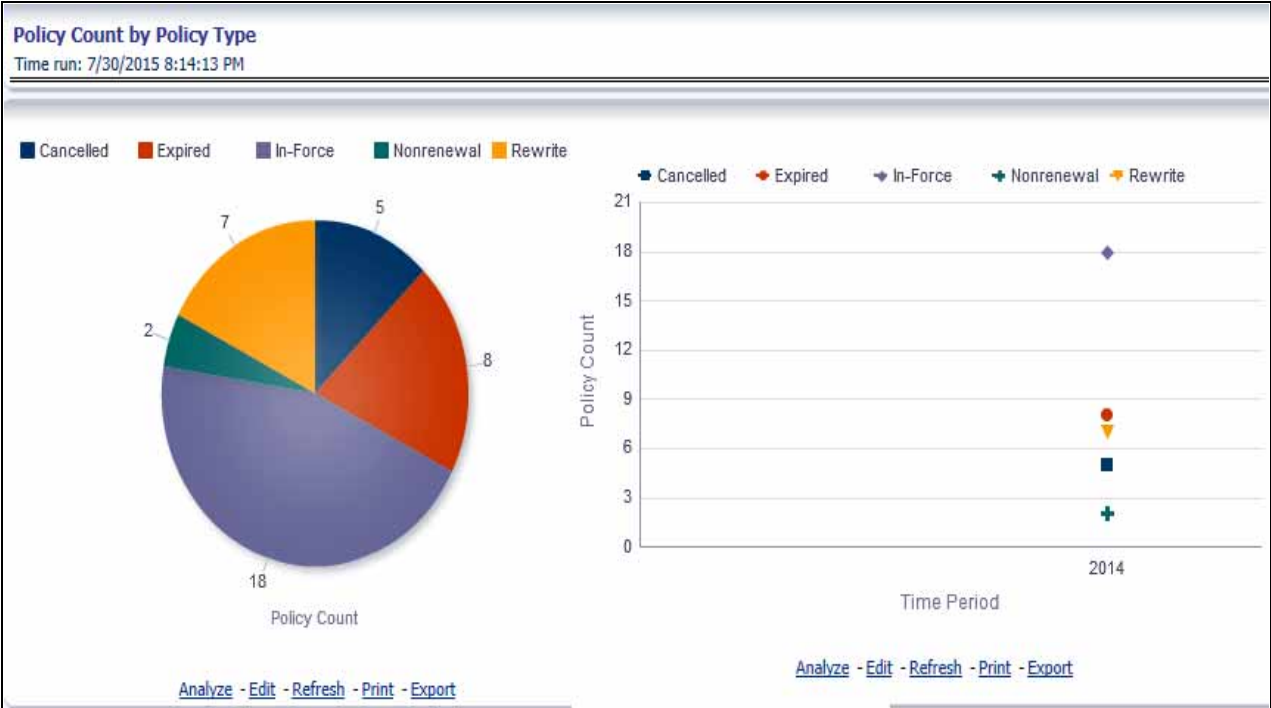

Policy Expense Summary

This report shows different policy related expenses incurred over the time period. The report can be analyzed by report level filters for different expense types. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts.

Policy Count by Policy Type

This report shows count of policies through different policy types, that is, active in-force, reissue, rewritten, cancelled, and non-renewed policies through a time series. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

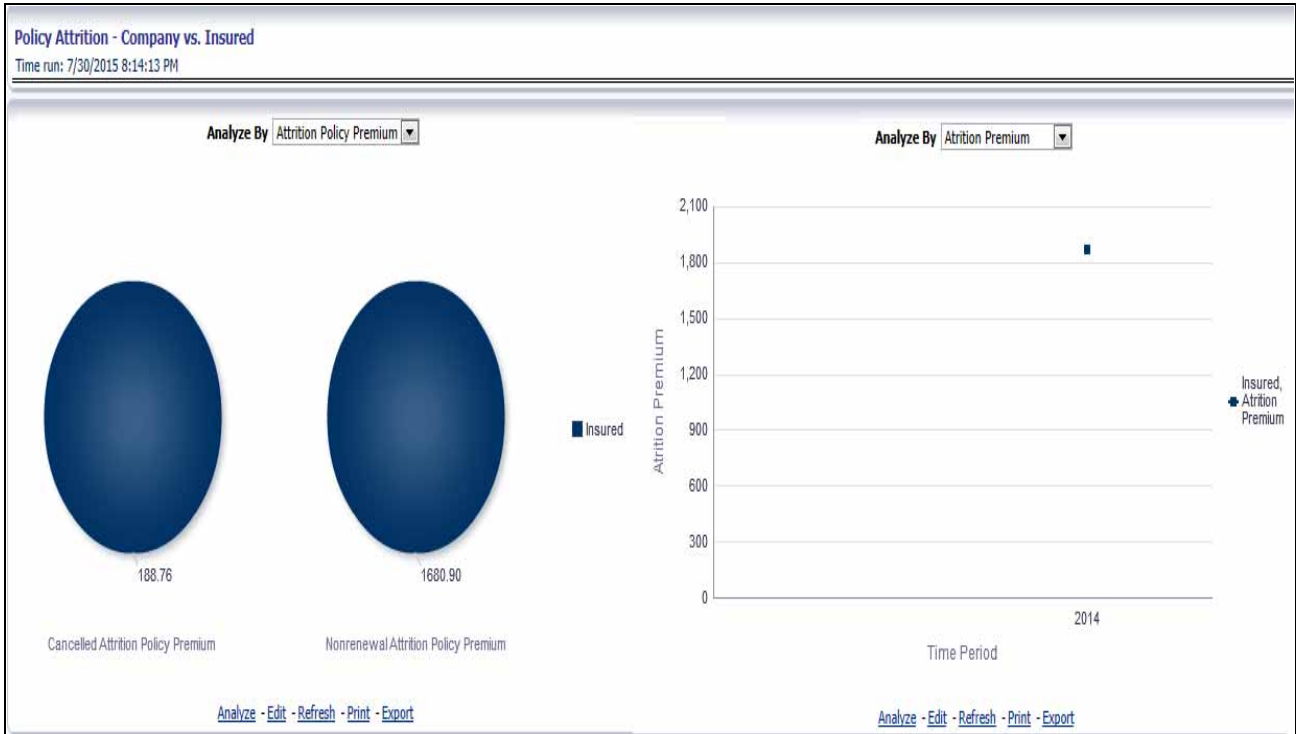

Policy Acquisition by Distribution Channel

This report shows percentage of policies acquired through different sales and distribution channels maintained by the company and can be analyzed by report level filters, policy count, and premium amount. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts.

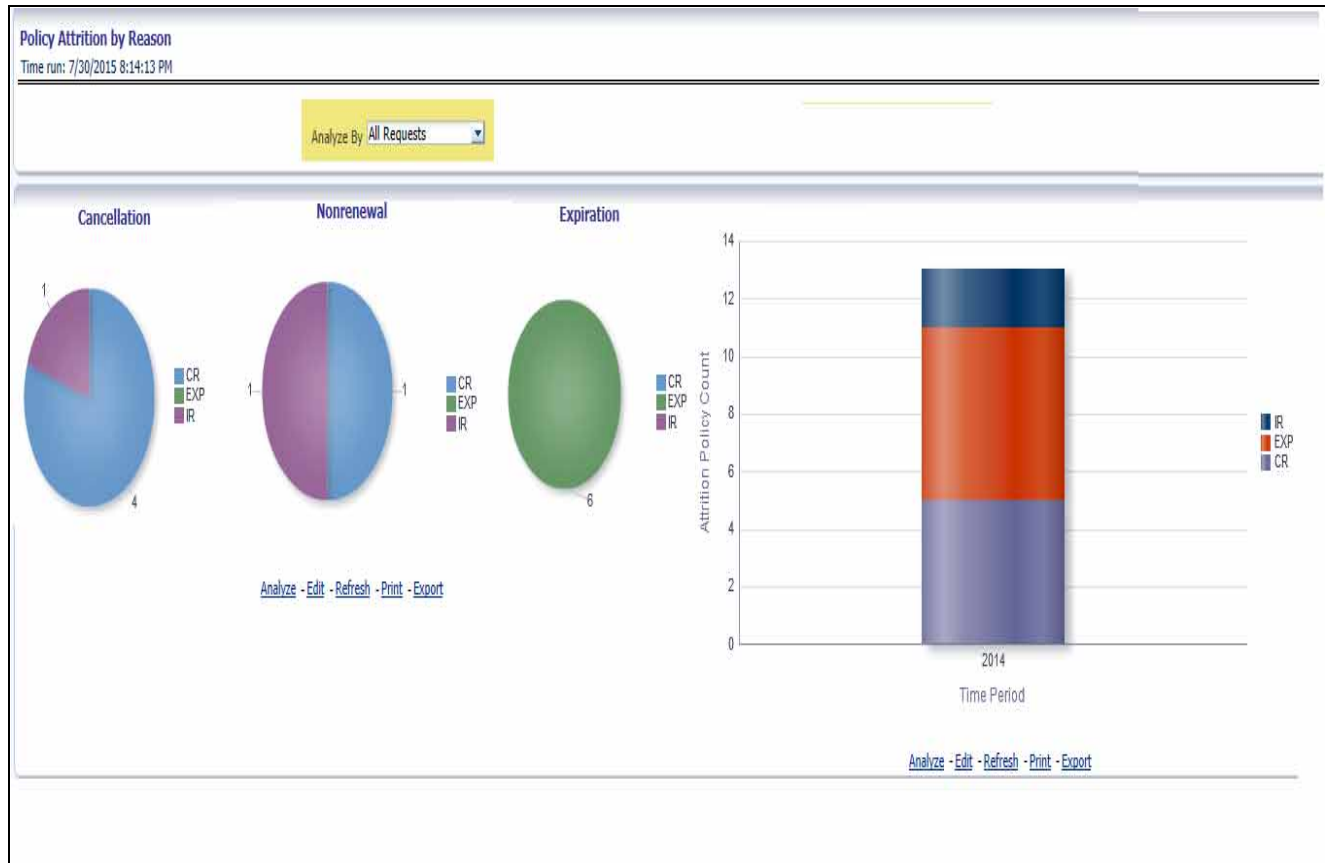

Policy Attrition - Company Vs. Insured

This report shows loss of business through policy attrition through a time series. Attrition analysis can be done by percentage between company initiated and insured initiated attrition through the attrition types such as cancellation, non-renewal, and expiry, as well by attrition policy premium amount and attrition policy count. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

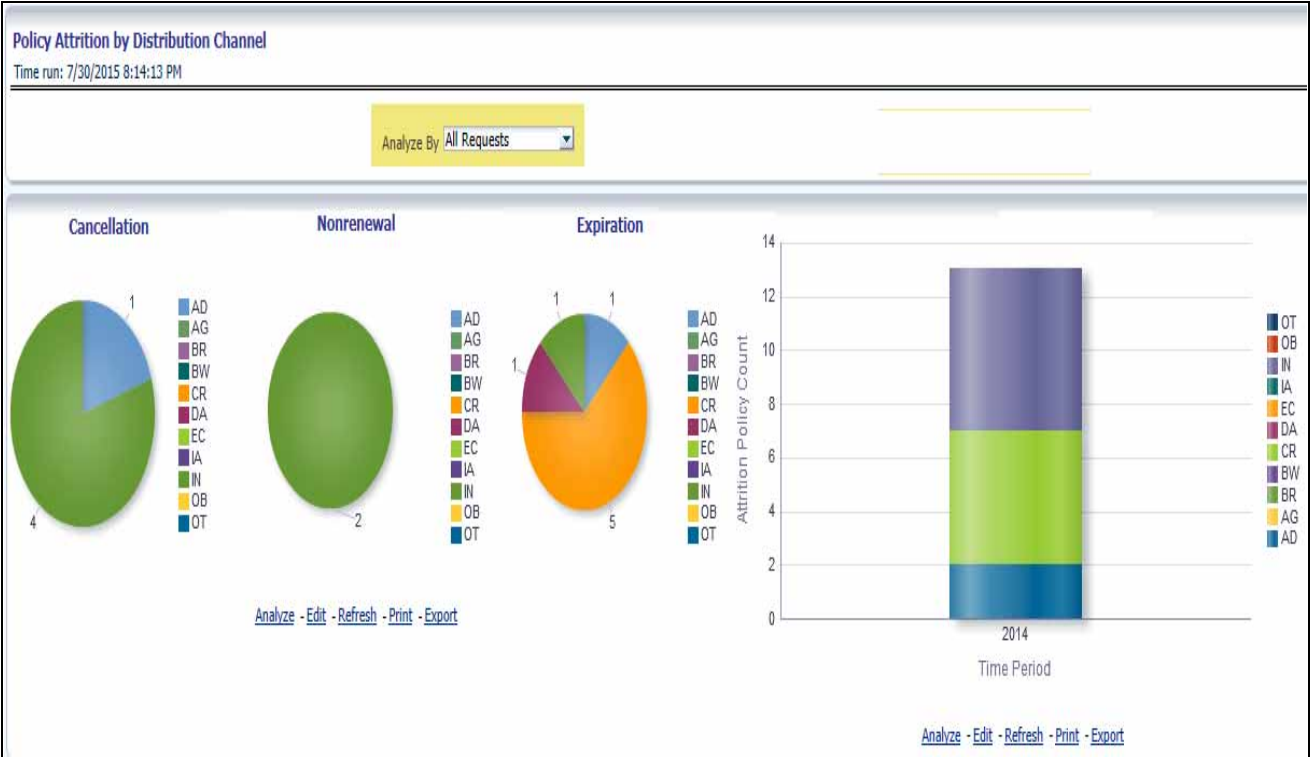

Policy Attrition by Reason

This report shows policy attrition occurred due to various attrition reasons. Attrition reason analysis can be done by percentage between company initiated and insured initiated attrition through the attrition types such as cancellation, non-renewal, and expiry as well by attrition reasons. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

Policy Attrition By Distribution Channel

This report shows policy attrition by various distribution channels. Attrition analysis can be done by percentage between company initiated and insured initiated attrition through the attrition types such as cancellation, non-renewal, and expiry as well by distribution channels. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

Policy Attrition By Billing Plan

This report shows policy attrition by various distribution channels. Attrition analysis can be done by percentage between company initiated and insured initiated attrition through the attrition types such as cancellation, non-renewal, and expiry as well by billing plan type. This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

Cancellation Attrition Timing

This report shows policy attrition by cancellation timings. Attrition analysis can be done by percentage between company initiated and insured initiated attrition through the attrition types such as cancellation, non-renewal, and expiry as well by cancellation attrition time periods, for example, "First 30 days" and "First 45 days". This report can be viewed over various time periods, company, geography, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

Line of Business

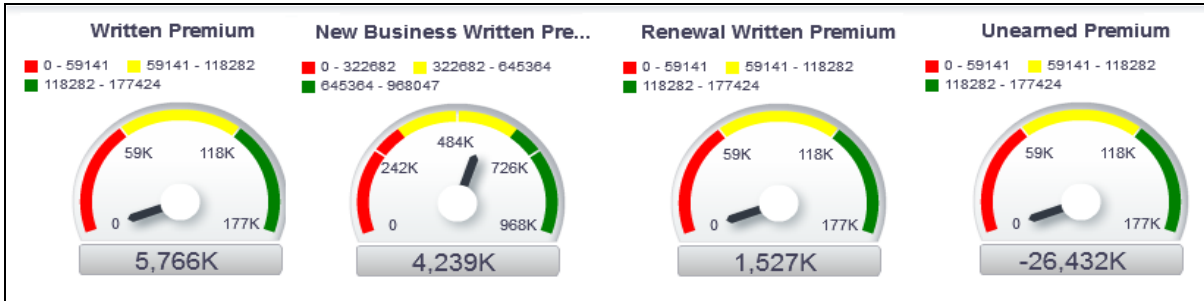

The Line of Business tab includes reports that focus on the Key Performance Indicators for each Line of Business. The filters for this tab allow the report results to be focused on selected lines of business for comparison and targeted analysis. The filters include:

- Time
- Company
- Geography
- Line of Business

The various reports available under this tab are detailed in the following sections.

Claim Payment Analysis by Product

This report shows claim payments by products through a comparison between actual and planned values. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

Loss Expense Analysis by Products

This report shows loss expenses products through a comparison between actual and planned values. This report can be viewed over various time periods, company, geography, products, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

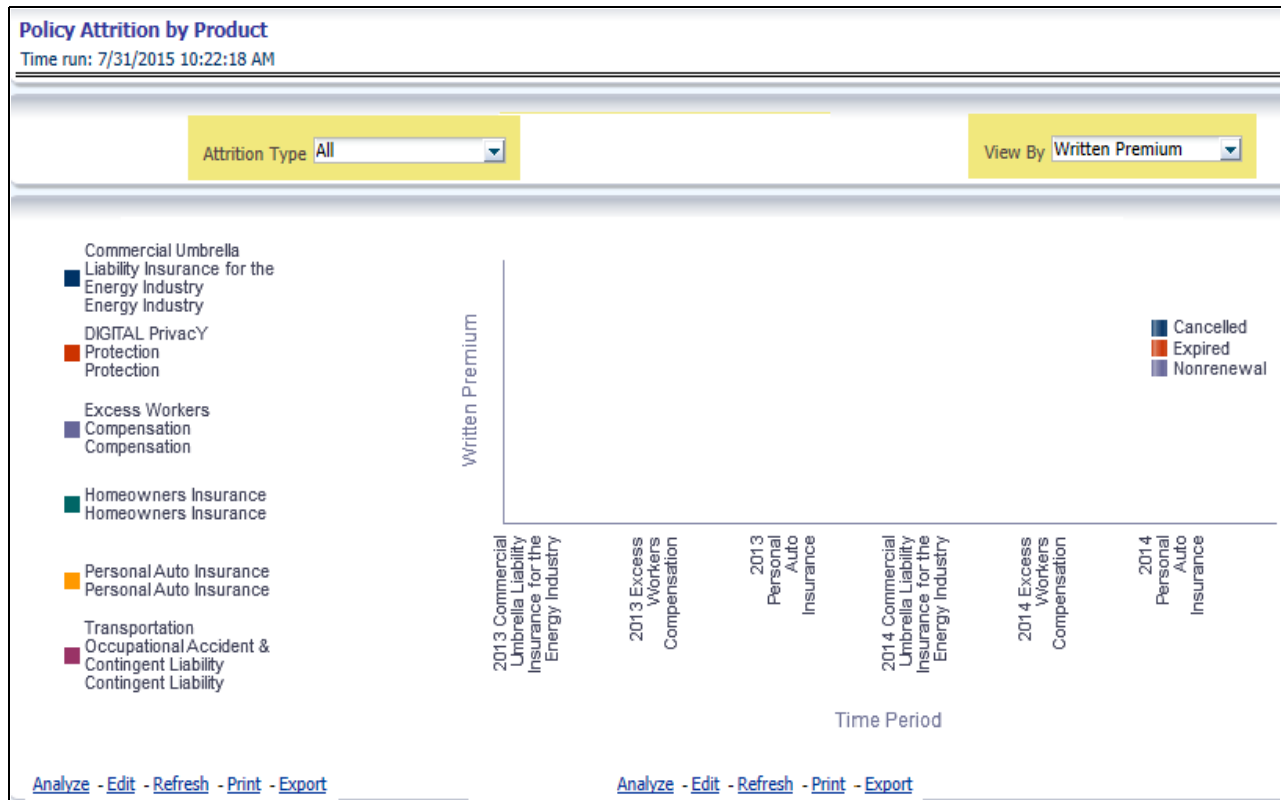

Loss Recovery Analysis by Products

This report shows loss recovery by products though a comparison between actual and planned values. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts. The pie chart shows policy count by current in-time values whereas the line graph represents the values through a time series.

Policy Attrition by Product

This report shows policy attritions by Products. This report can be viewed for current performance by different attrition types like cancellation, expiry, and non-renewals. This report can also be analyzed both in terms of lost policy counts and lost written premium. This report can be viewed over various time periods, company, geography, Product, and line of business selected from page level prompts. The pie chart shows policy counts by current in-time values wherein the line graph represents the values through a time series.

Top Attrition Reasons by product

This report analyses policy attrition reasons and rank them by each attrition reason and by line of business.

Top Attrition Reasons by Product
Time run: 7/31/2015 10:22:18 AM

Type	Rank	Reason	Commercial Umbrella Liability Insurance for the Energy Industry	DIGITAL PrivacY Protection	Excess Workers Compensation	Homeowners Insurance	Personal Auto Insurance	Tra Acc
Top Cancellation Reasons	1	CR	25.00%			50.00%	66.00%	
		1	IR		50.00%			
Top Expiration Reasons	1	EXP	50.00%		100.00%	50.00%	33.00%	
Top Nonrenewal Reasons	1	CR		50.00%				
		1	IR	25.00%

Region

The Region tab includes reports represented in tabular and map format that summarizes results for geographical regions. The filters for this tab allow the report results to be focused on selected combinations for geographical comparison. The filters include:

- Time
- Company
- Geography
- Line of Business
- Product

The various reports available for this tab are discussed in the following sections.

Premium By Region

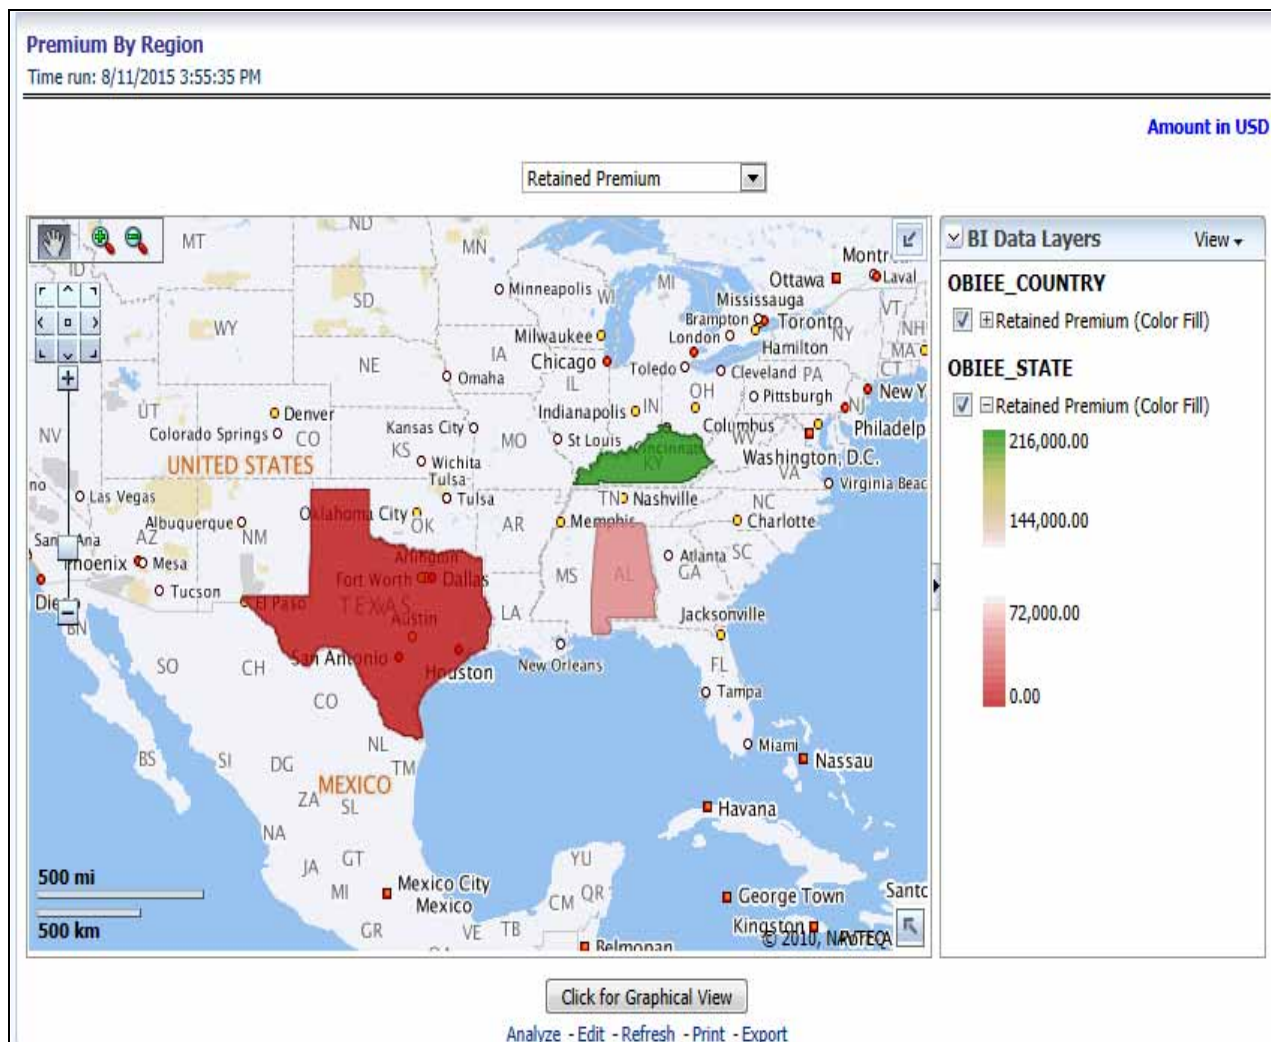

This report shows different types of premium revenue by various geographical regions. This report can be viewed over various time periods, company, geography, product, and line of business selected from the page level prompts. This report shows premium income through the following premiums.

- Written premium

- Earned premium
- Ceded premium
- Retained premium
- Refund premium
- Uncollected earned premiums

Drill Down:

The report Premium By Region can be further analyzed by regions, time period, and premium types, for example, written premium, earned premium, ceded premium, retained premium, refund premium, and uncollected Earned Premium. Click any premium type to view the report in the drill-down mode.

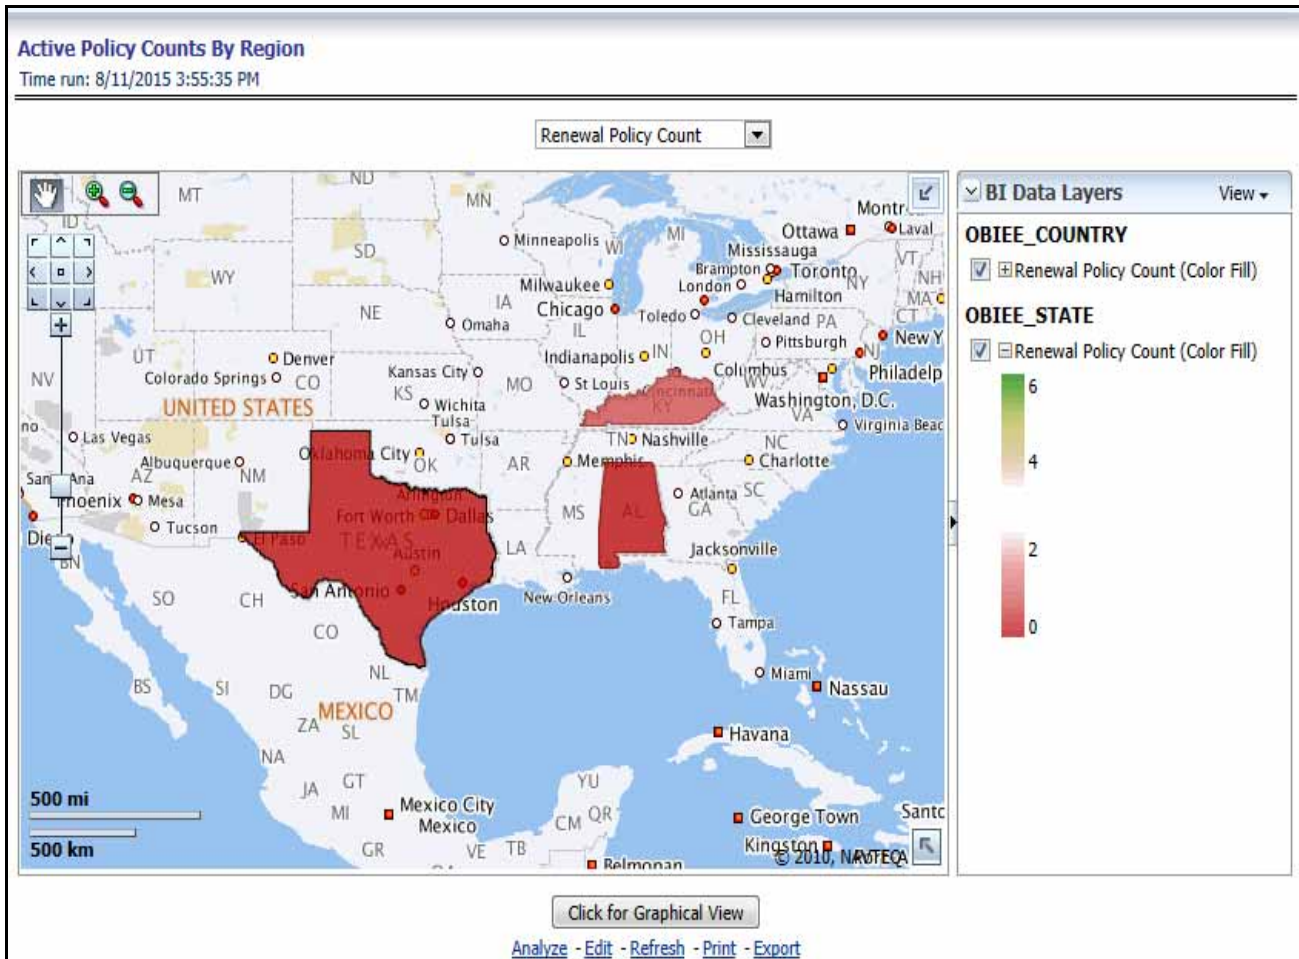

Active Policy Counts By Region

This report shows the count of policies written by different policy types, that is, total policy count, new business policy count, and renewal policy count. This report can be viewed over various time periods, company, geography, product, and line of business selected from the page level prompts.

Drill Down

The report can be further analyzed by regions, time period, and policy counts of different policy status, for example, policy count, new business policy count, and renewal policy count. Click any policy status to view the report in the drill-down mode.

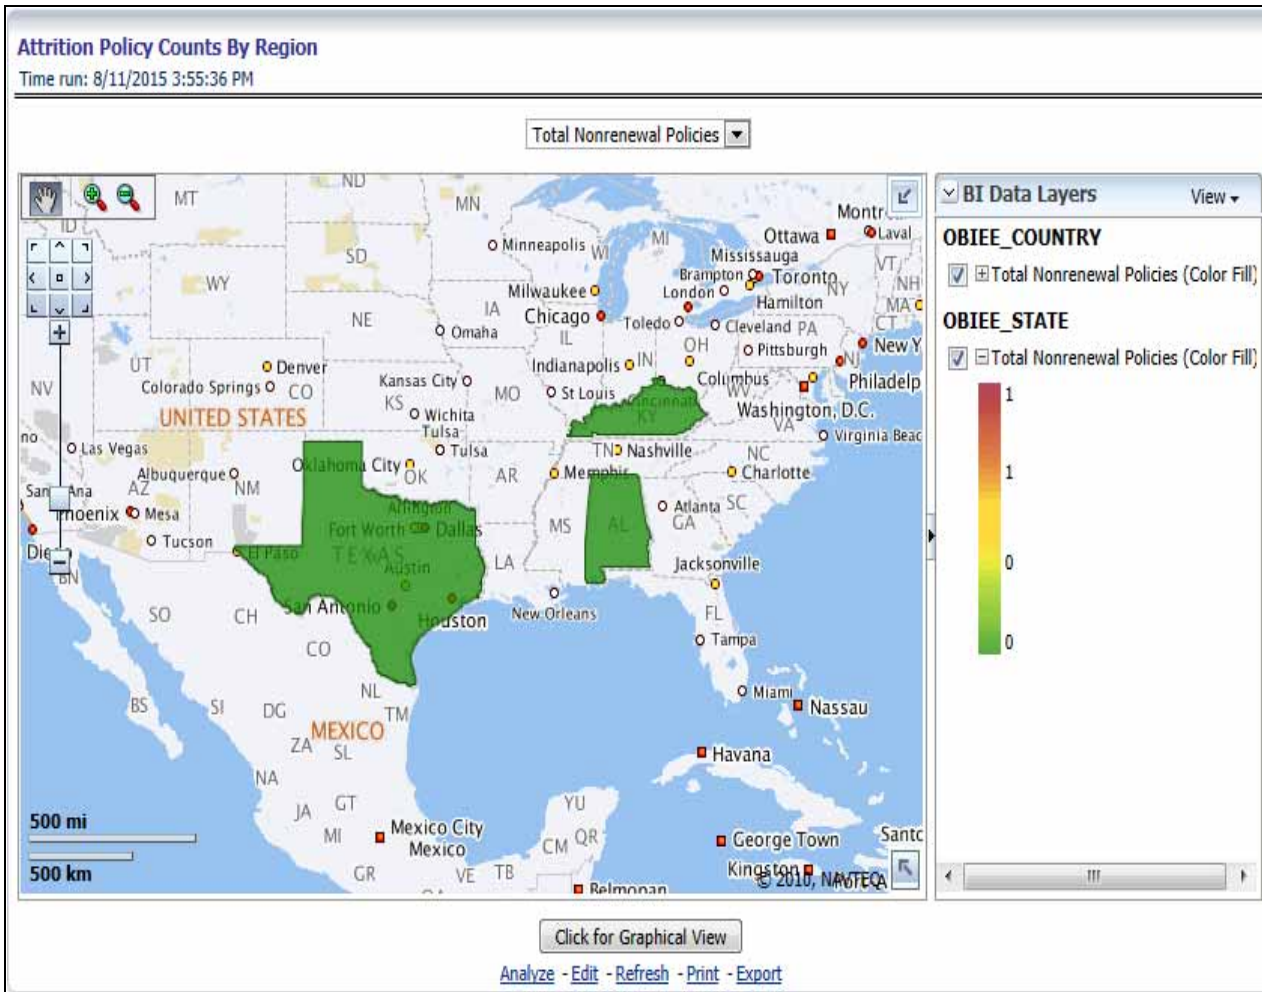

Attrition Policy Counts By Region

This report illustrates the count of attrition policies by different attrition types type, that is, cancelled policy, expired, and non-renewal policies. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by regions, time period, and counts by different attrition policy types, for example, cancelled, non-renewed, and expired policies. Click any attrition policy type to view the report in the drill-down mode.

Attrition Premium By Region

This report shows the loss of revenue because of attrition in new business and renewal business. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by regions, time period, and policy counts of different policy status, for example, policy count, new business policy count, and renewal policy count. Click any policy status to view the report in the drill-down mode.

Attritions Ratios by Region

This report analyzes and records new and renewal business attrition ratios over a time period.

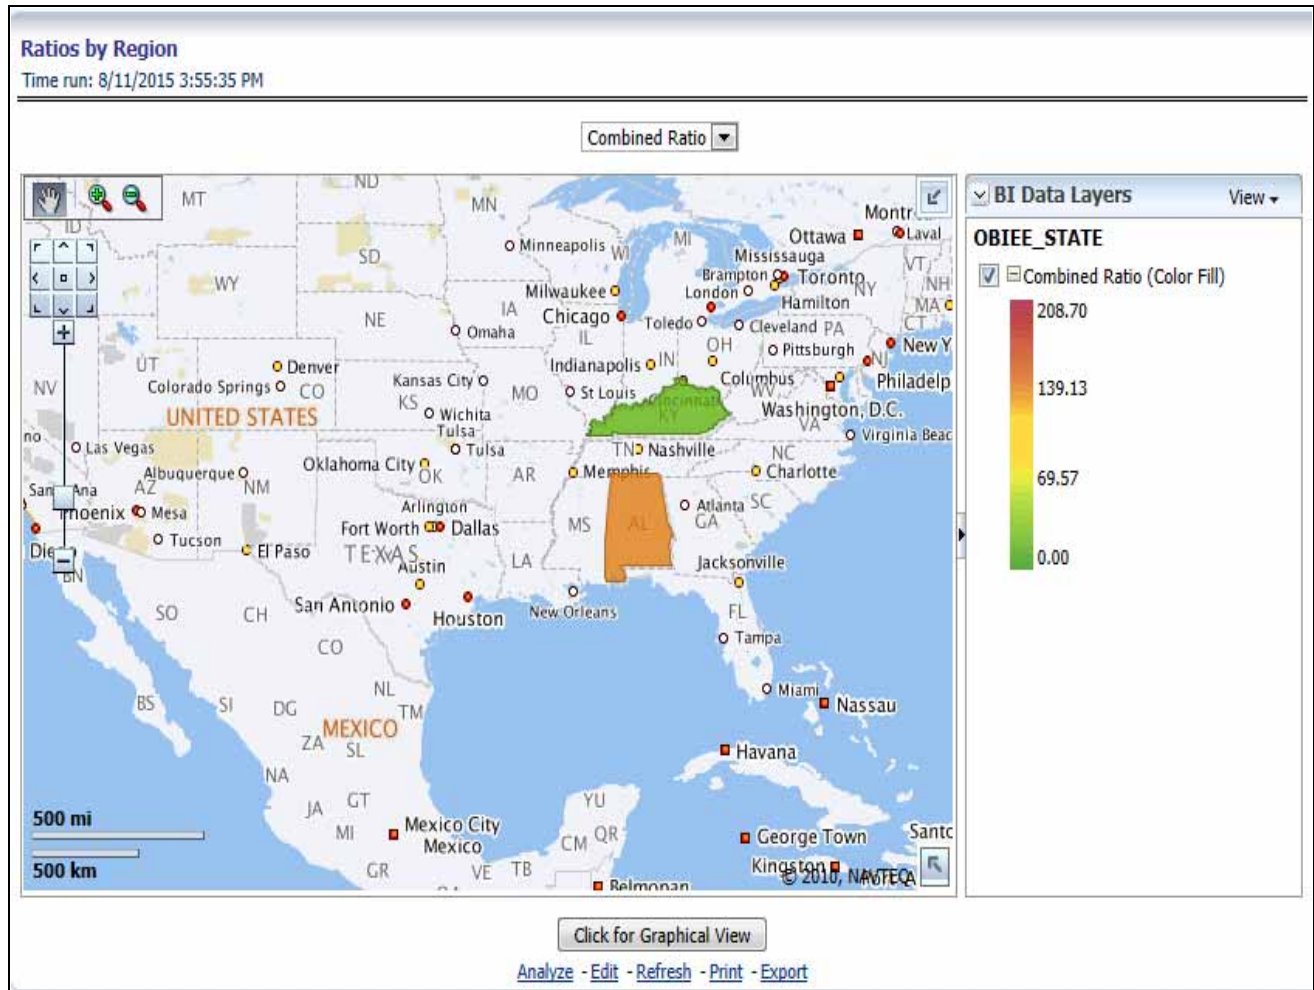

Drill Down:

The report can be further analyzed by regions and time period wise to measure performance through new and renewal business attrition ratios.

Ratios by Region

This report shows key indicator ratios like expense ratio, loss ratio, combined ratio, new business attrition ratio, and renewal attrition ratio by different region. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

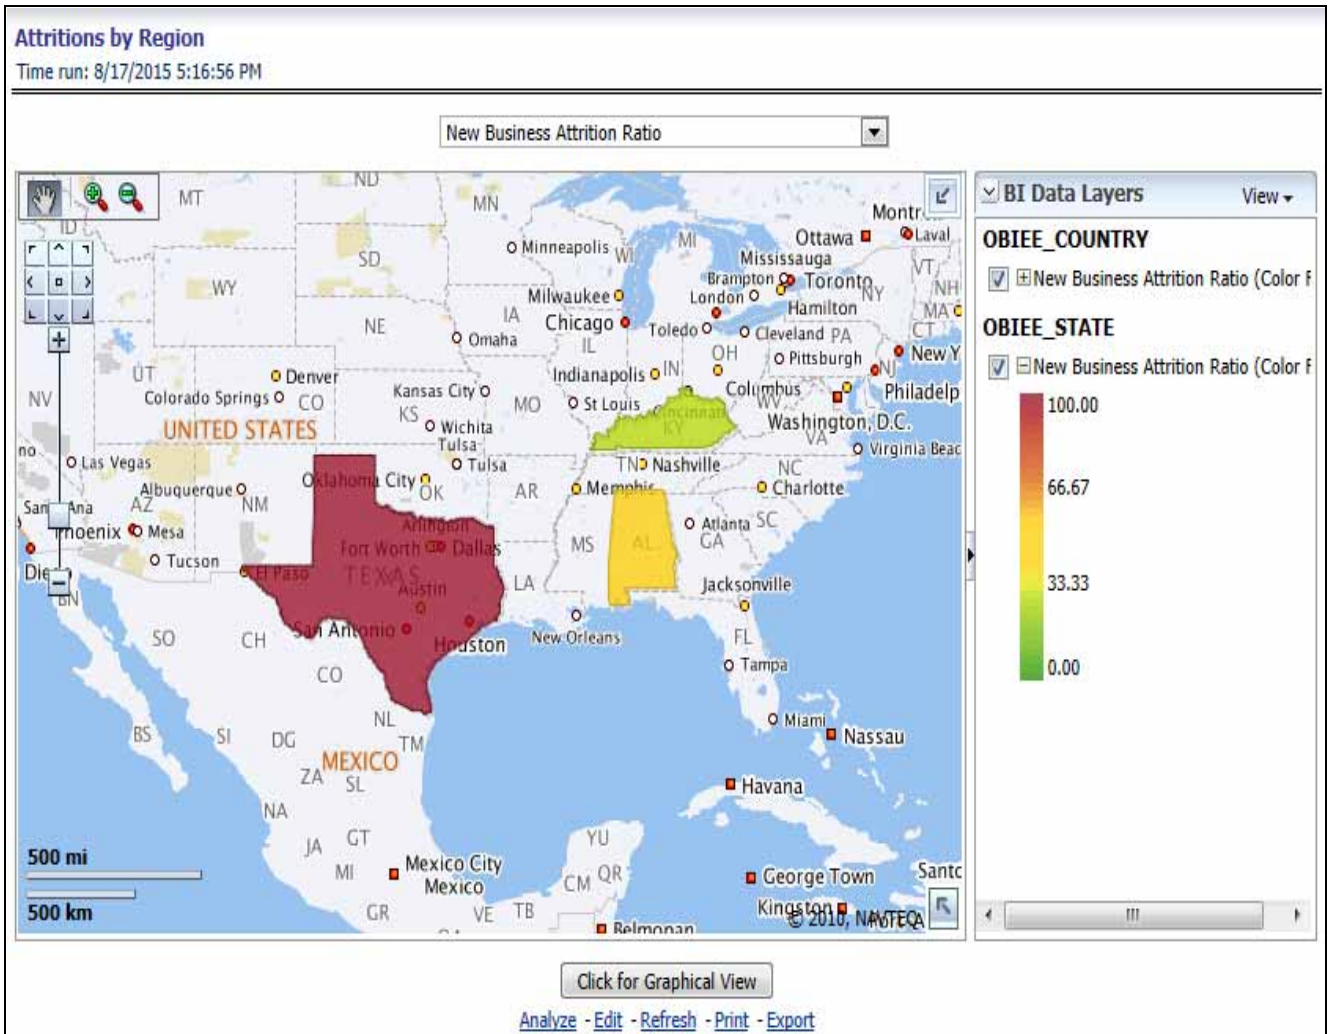

The report can be further analyzed by regions, time period, and ratios like new business attrition ratio, and renewal business attrition ratio. Click any ratio to view the report in the drill-down mode.

Attritions by Region

This is a Map report where the attrition performances through various key attrition parameters like attrition ratio, new business attrition ratio, renewal business attrition ratio, and so on can be measured.

Drill Down:

The report can be further analyzed as a time series trend report by clicking **Graphical View Mode** and also by clicking areas of the map.

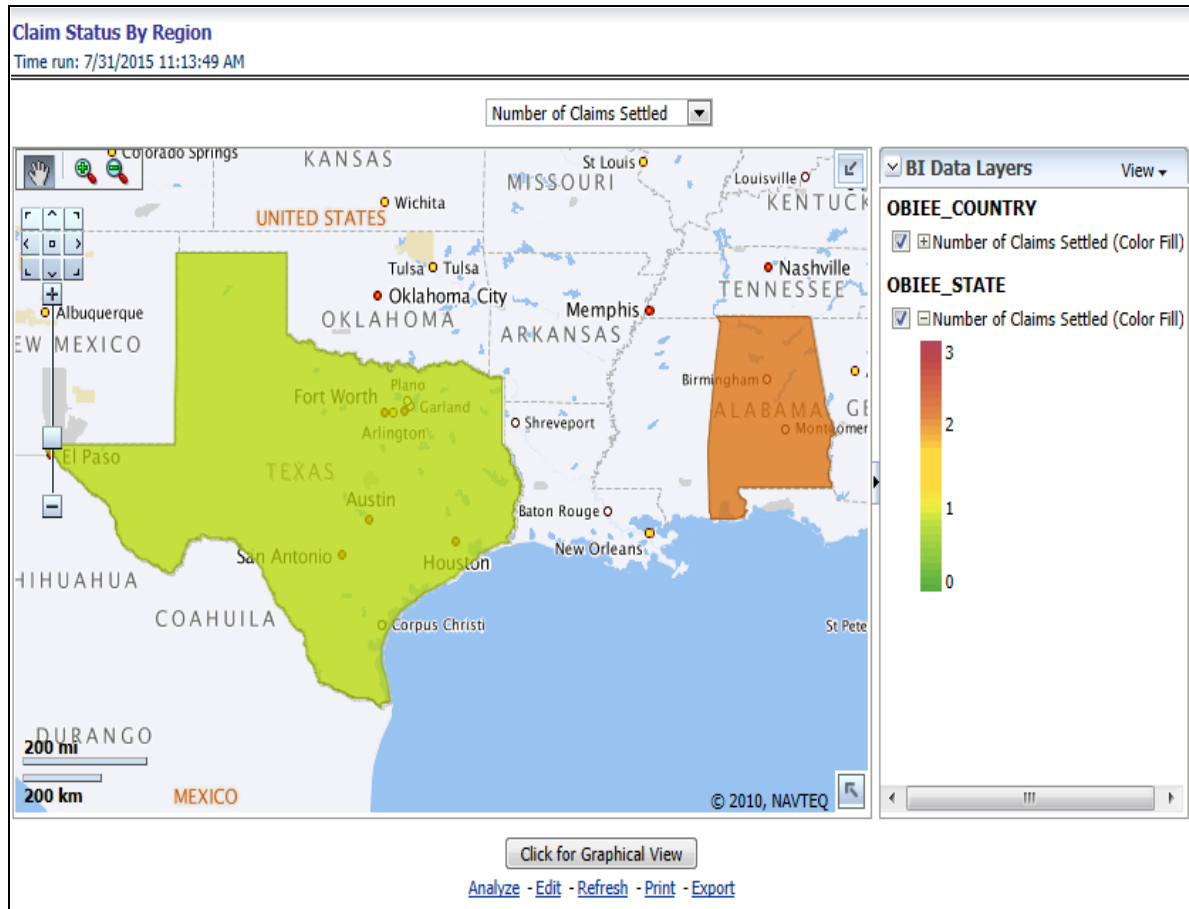

Claim Status By Region

This report illustrates the count of claims by claims in different status, for example, claims reported, claims settled, and claims in litigation. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by regions, time period, claim status, and counts, for example, Number of Claims Reported, Number of Claims Settled, and Litigation Claims. Click any claim status to view the report in the drill-down mode.

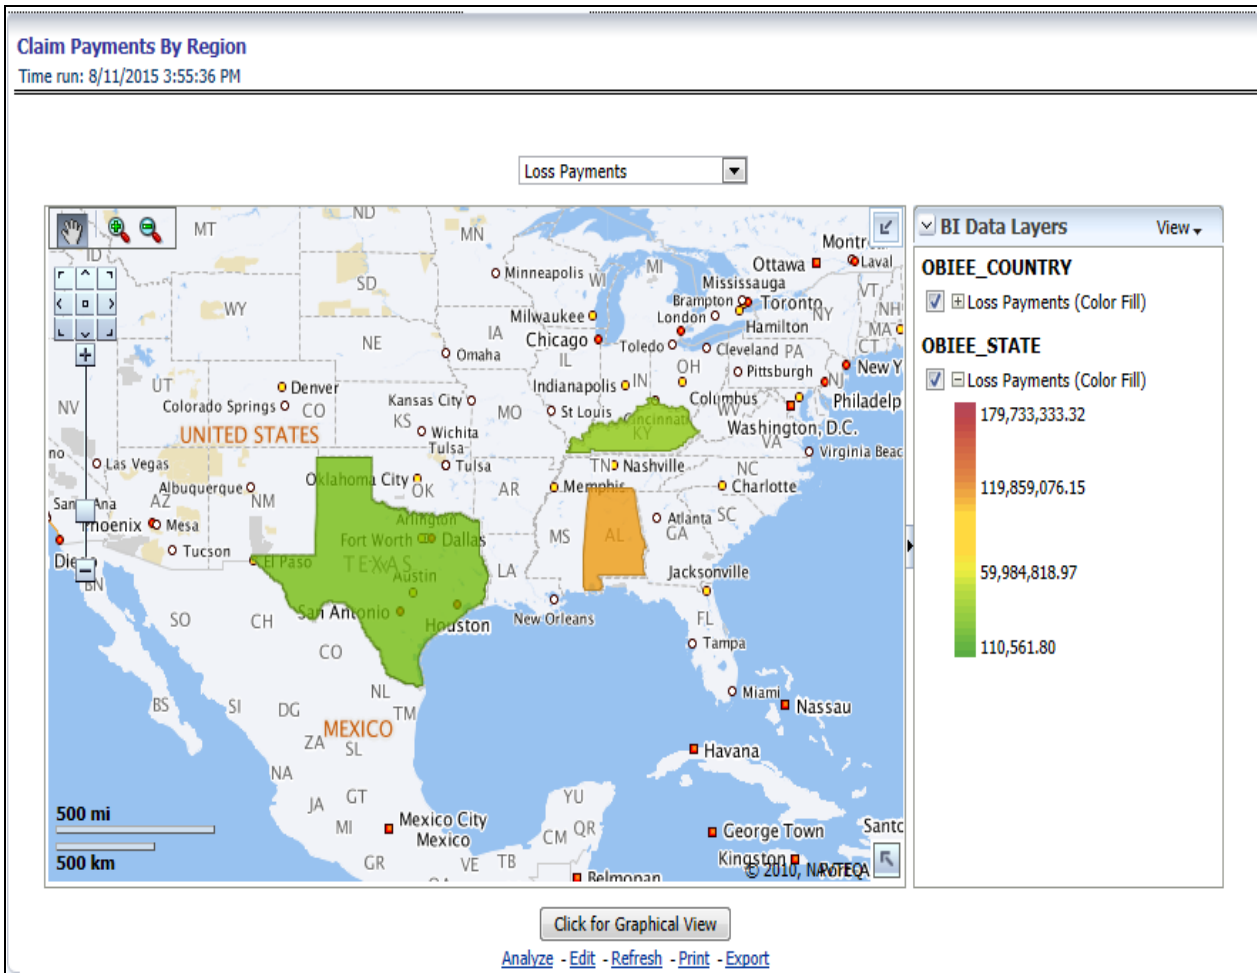

Claim Payments by Region

This report illustrates the claim payment like loss payments, catastrophic claim payments, and litigation claim payments through geographical map and a drill through time series. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by regions, time period, and claims, for example, Number of loss payments, catastrophic claim payments, and litigation claim payments. Click any claim payment to view the report in the drill-down mode.

Producer Ranking By Region

This report shows the ranking for top ten best performing and least performing producers. This also shows the region wise ranking.

Drill Down:

This report can be further analyzed on clicking each region where top or bottom 10 producers are ranked for each region and their performance measurement for each ranked producer through the following performance key indicators:

- Policy Count
- Written Premium
- Bind Ratio
- Conversion Aging
- Claim Count
- Claims Payments
- Loss Ratio

Inactive Producer Summary

This line graph report illustrates the inactivity period in terms of days ranging from 30-90 days for agents and agencies.

Premium and Claim

This report shows the business through premium revenue with regards to claims payments for the business over a time series. This report illustrates and shows periodic analysis for written premium and earned premium revenue with claim payments made for the periods.

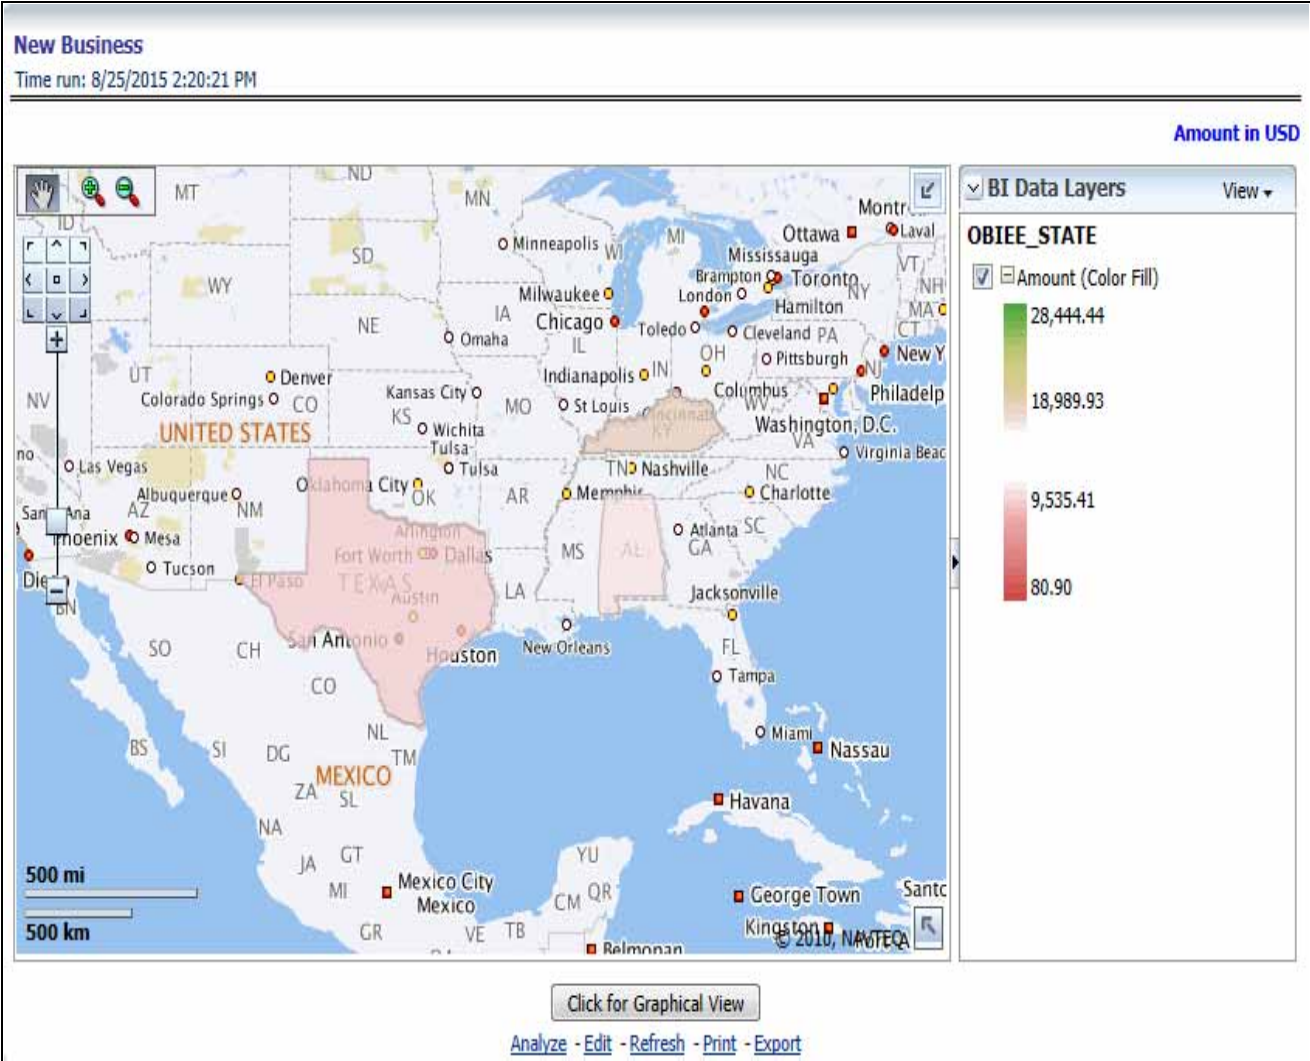

New Business

This is a map report where New Business volume is measured across regions. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by Line of Business or Product wise by clicking **Click for Graphical View** button and **the areas of the map**.

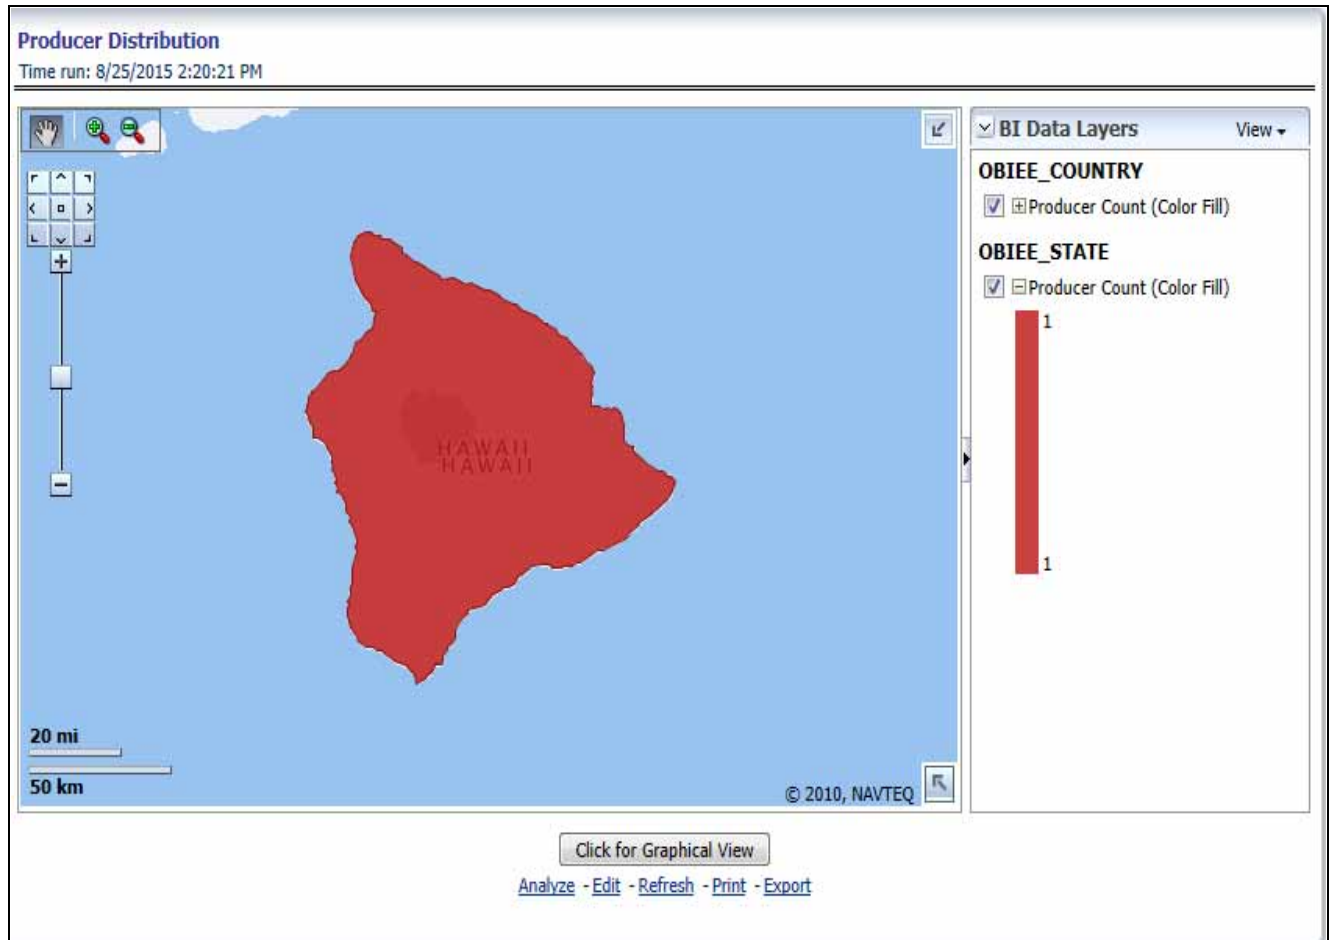

Producer Distribution

This is a map report where Producer Distribution is measured across regions. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by Line of Business or Product wise by clicking **Click for Graphical View Mode** button and **the areas of the map**.

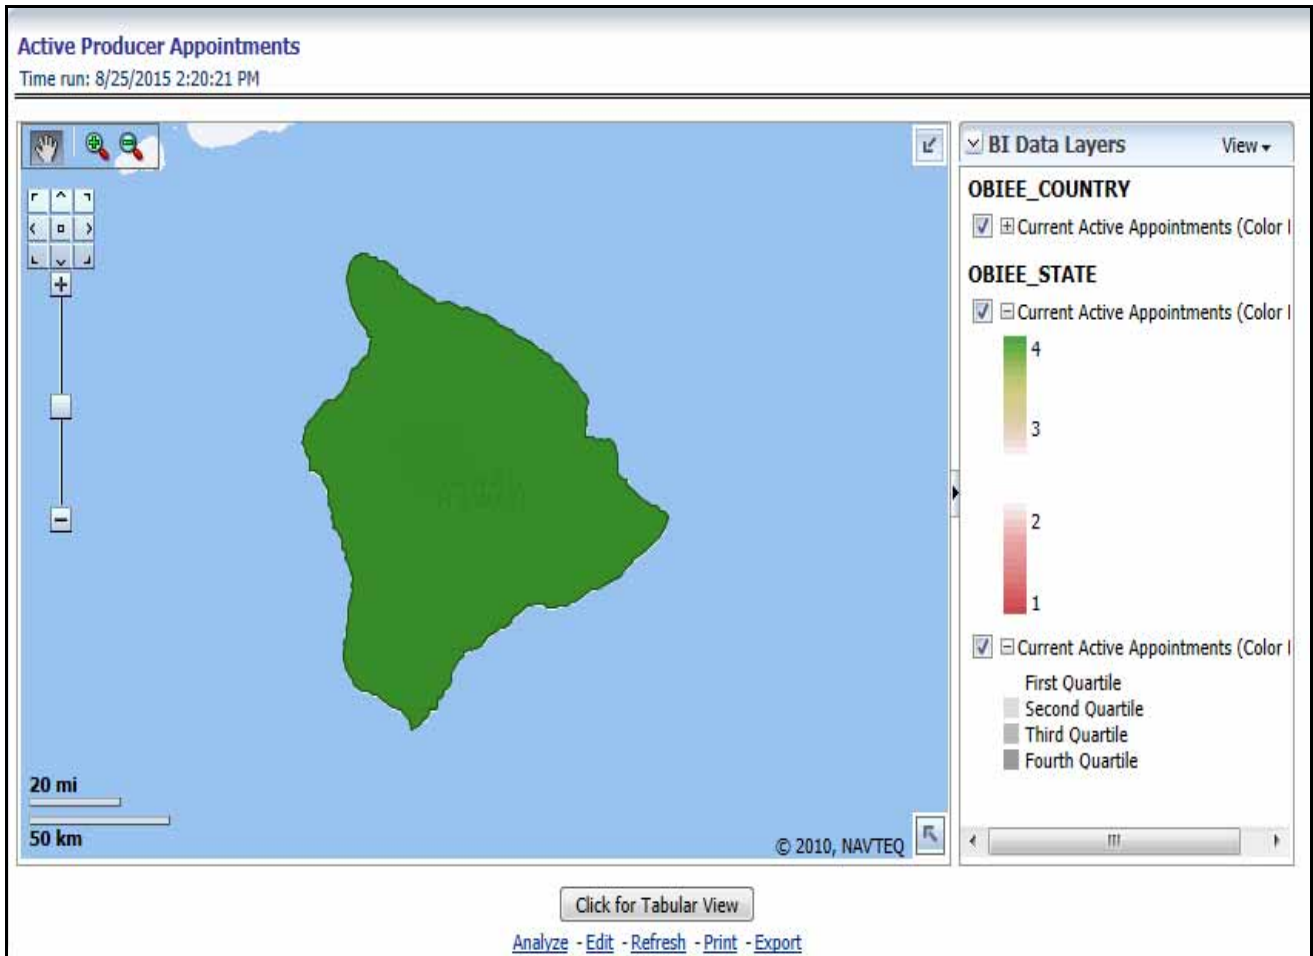

Active Producer Appointments

This is a map report where the active producer availability by appointment status (Active Status) is measured across regions. This report can be viewed over various time periods, company, geography, product, and line of business selected from page level prompts.

Drill Down:

The report can be further analyzed by Line of Business or Product wise by clicking **Click for Tabular View** button and **the areas of the map**.

Managing Claim Performance Dashboard

Overview

This chapter explains the report available under each tab in the Claim Performance Dashboard.

Managing Reports

The following tabs are present in the Claim Performance Dashboard.

- [Summary](#)
- [Claim Handling](#)
- [Line of Business](#)
- [Product](#)
- [Catastrophe](#)

The following screenshots display the essential nature of the available reports as per each tab:

Summary

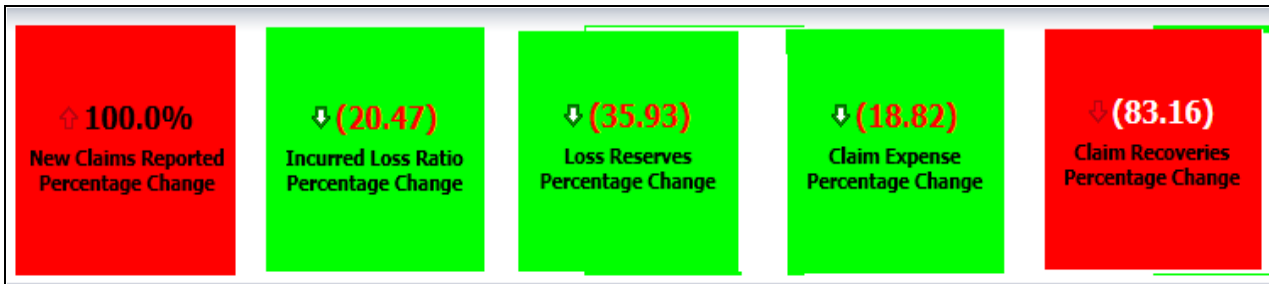

The Summary tab includes information at the corporate level. The information contained in the reports generated summarizes how the entire organization is performing. The filters for this tab include:

- Time
- Company
- Catastrophe
- Geography

The various reports available for this tab are discussed in the following sections.

Key Claim Performance Indicators Flash

This report shows snapshots of key performance indicators represented through flash boxes for current period.

Claim Expenses Ratio

Claim Expense is a line graph that displays the Claim Expense Ratio, the ratio of the amount of expenses to the total amount of the claim paid, at the point in time of the reporting period and over a time series. Each insurance company is represented by its own line.

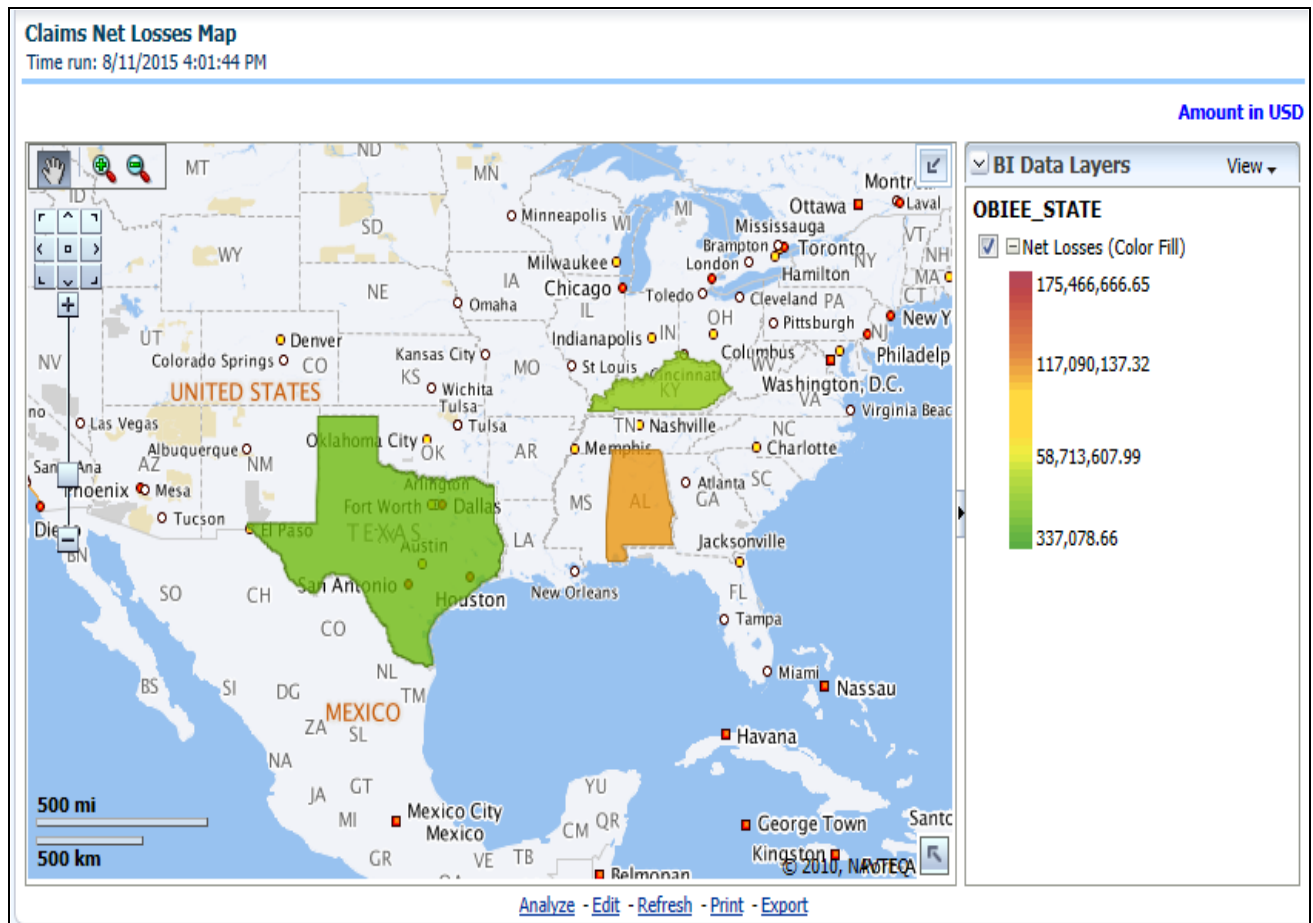

Claim Recoveries

This is a line graph that displays the monetary amount of claim recovery payments received by a company at the point in time of the reporting period and over a time series. Each insurance company is represented by its own line.

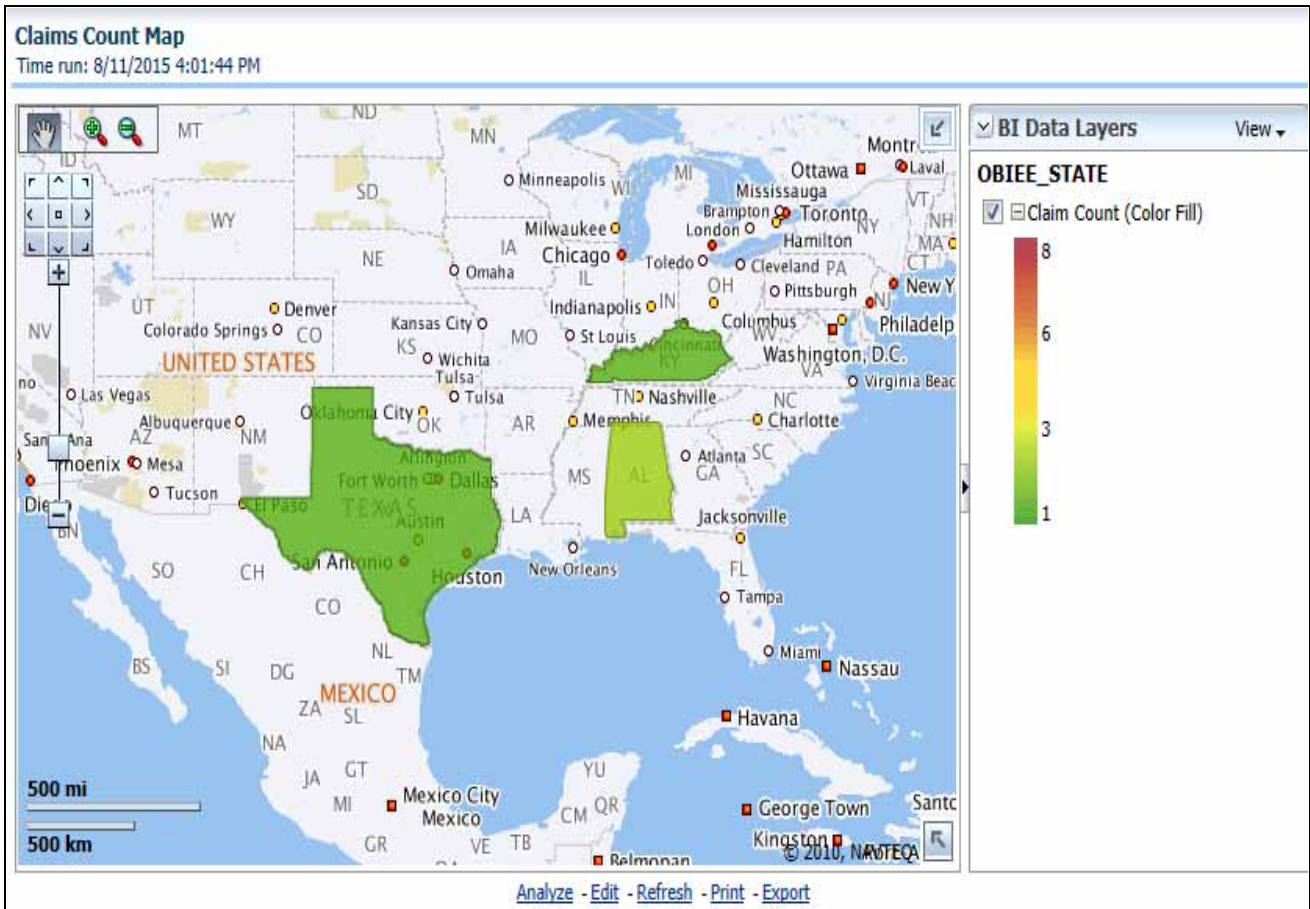

Claim Net Losses Map

Claim Net Losses Map is a geographic heat map that illustrates the monetary amount of Net Losses, that is, paid Losses exclusive of Expenses, over geographic regions with areas of similar amounts colored similarly. The Location of Loss provides the basis for the geographical mapping.

Claim Count Map

This is a geographic heat map that illustrates the count of claim occurrences over geographic regions with areas of similar amounts colored similarly. The Location of Loss provides the basis for the geographical mapping.

Top Ten Geographical Regions for Claim Payments

This is a table that ranks the geographical regions with the highest monetary amount total claim payments for a given reporting period. The percentage of all payments represents the amount of all claim payments generated during the same reporting period in comparison to those only for the given region.

Top Ten Geographical Regions for Claims Payments
 Time run: 7/31/2015 11:54:55 AM

Amount in USD

Geographical Region	Total Claim Payments	Percentage of all Payments
20230	52,676,923.10	7.1%
MIL	52,676,923.10	7.1%
Milan	52,676,923.10	7.1%

Claim Count

This report is a line graph that illustrates the count of claims added to the system over a time series and has a line for each line of business.

Incurred Losses

This represents the incurred losses, total amount of paid claims, and loss reserves associated with a reporting period over a time series. This report is generated for the corporation as a whole and illustrates each line of business with its own line.

Claim Expenses

This report is a line graph that illustrates the monetary amount of claim expenses, payments made for services, and other non-loss related costs, issued over a time series. Each insurance company is represented by its own line.

Loss Reserve on Open Claims

This is a line graph that displays the monetary amount in claim reserves at the point in time of the reporting period and over a time series. Each insurance company is represented by its own line.

Combined Ratio

This report is a line graph that illustrates the Combined Ratio, that is, the sum of two ratios, one calculated by dividing incurred losses plus loss adjustment expense (LAE) by earned premiums, and the other calculated by dividing all other expenses by either earned premiums, over time. Each Insurance Company is represented by its own line.

Loss Ratio

This report is a line graph that illustrates the Loss Ratio, the ratio of incurred losses to earned premiums, over a time series. In this report, each insurance company is represented by its own line.

Claims Closed without Payment

This report is a line graph that illustrates the count of claims that were closed during the reporting period without any loss payments generated for the claim.

Note: Expenses may have been paid for these claims. Each insurance company is represented by its own line.

Referrals for Specialized Claim Handling

This report is a line graph that illustrates the count of claims that were referred for specialized handling during a reporting period and are shown over a time series. Each referral reason is represented by its own line.

Specialized Claim Handling Recoveries

This report is a line graph that illustrates Claim Recovery Payments. Claim Recovery Payments is the monetary amount of payments received to reimburse the insurance company for payments it generated for losses and claims that were handled in a specialized manner. These manners include fraud investigation, litigation, subrogation, and so on. Each specialized claim handling method is represented by its own line and amounts are shown over a time series.

Claim Handling

The Claim Handling tab includes information at the corporate level and focuses on the manner and quality of the by which the handling of a claim is measured. The filters for this tab include:

- Time
- Company
- Geography

The various reports available for this tab are discussed in the following sections.

Average Days until Closed

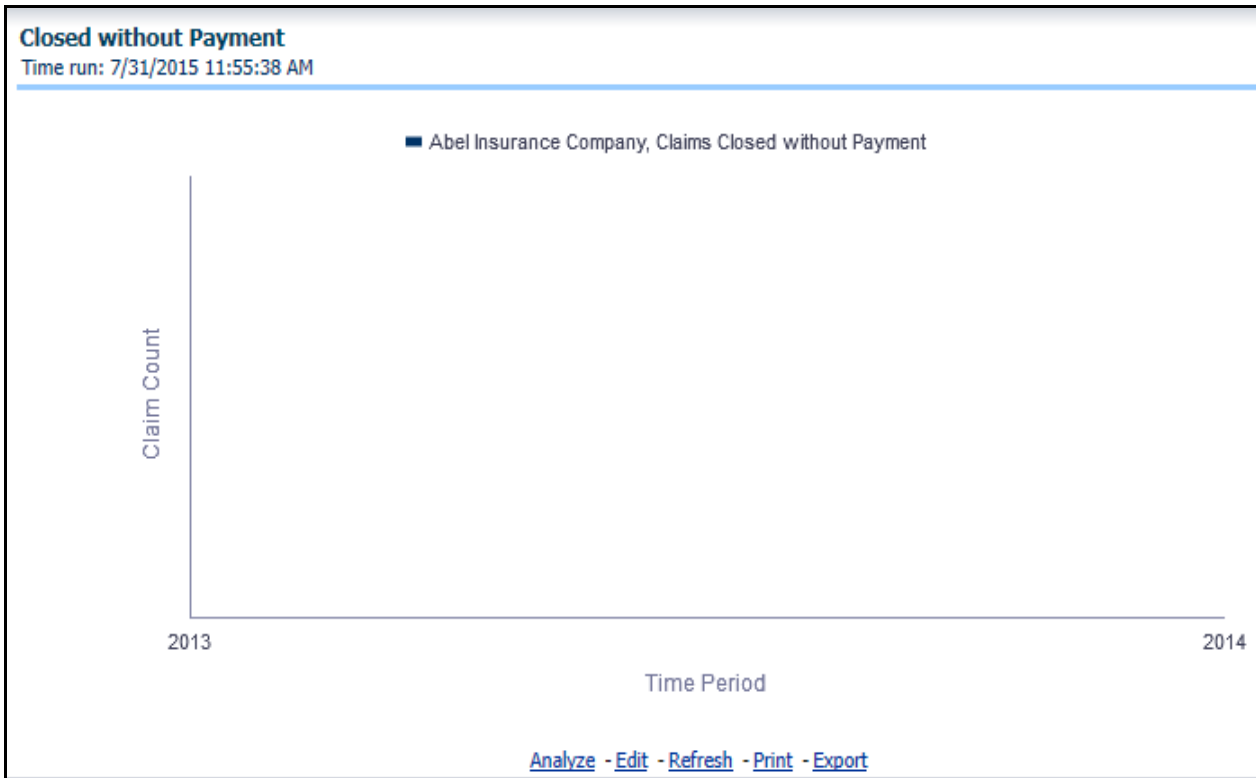

This report is a line graph that illustrates the average number of days between the day a claim is opened in the system and the date that the status of the same claim is changed to "Closed". This average is shown over a time series for each insurance company.

Closed Without Payment

This report is a line graph that illustrates the count of claims that were closed during the reporting period without any loss payments generated for the claim.

Note: Expenses may have been paid for these claims. Each Insurance Company is represented by its own line.

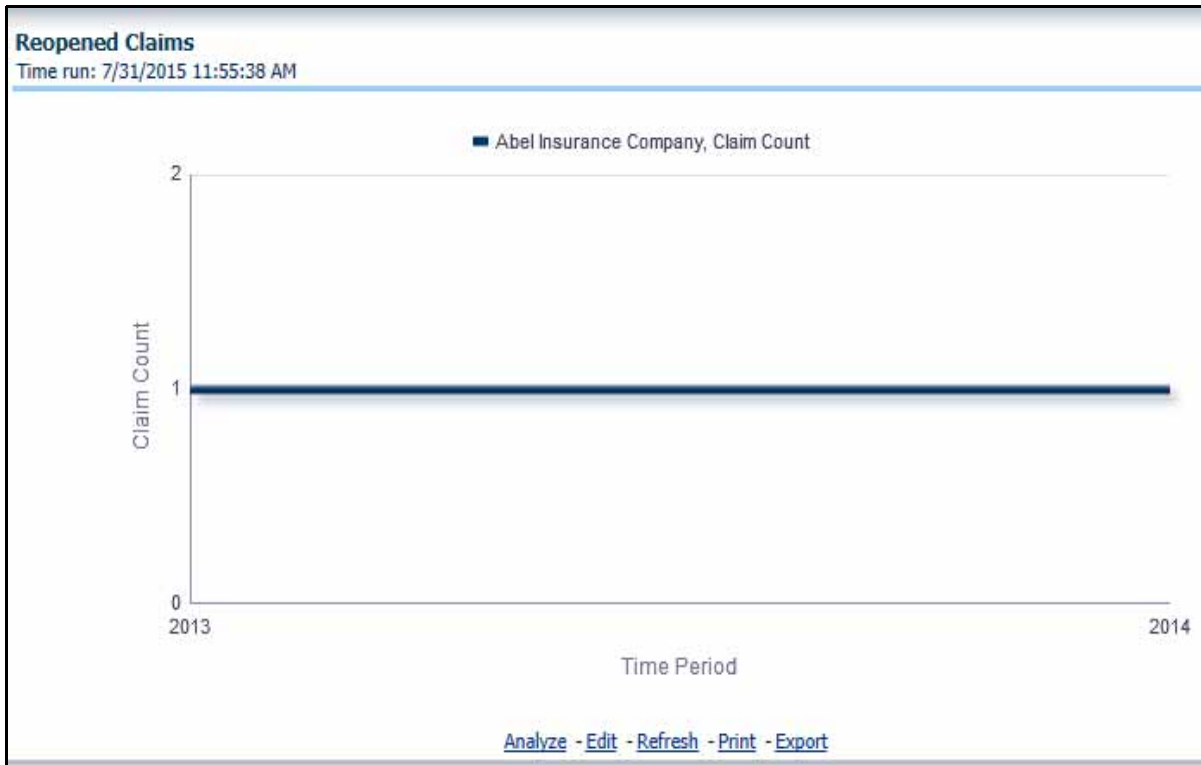

Claims Closed Due to Fraud

This report is a line graph that illustrates the count of claims that, after an investigation, were deemed to be fraudulent. In this report, the count is exhibited over a time series with each insurance company represented by its own line.

Reopened Claims

This report is a line graph that illustrates the count of claims that were changed back to an "Opened" status after it was previously closed. This report shows affected claims during the reporting periods over a time series with each insurance company represented with its own line.

Litigation Claims

This report is a line graph that displays the count of claims that resulted in a judicial litigation case being initiated. This shows the count of claims per Line of Business where this process occurred over time.

Subrogation Claims

This report is a line graph that represents the count of claims where subrogation, a process by which a payment arrangement has been agreed where a non-insured at-fault party agrees to reimburse the insurer for payments it made for damages an insured suffered due to the actions of the at-fault party, was initiated for the claim during the reporting period. This report illustrates the count of the affected claims for over a time series with each insurance company being represented by its own line.

Line of Business

The Line of Business tab includes reports that focus on the Key Performance Indicators for each Line of Business. The filters for this tab allow the report results to be focused on selected combinations for comparison and targeted analysis.

- Time
- Company
- Line of Business
- Geography

The various reports available under this tab are detailed in the following sections.

Claim Ranking by Line of Business

This is a tabular report that lists the Lines of Business in the order of greatest value to least value based on the Grade Basis selected. The information provided includes Key Performance Indicators for Claim Performance.

Claim Ranking by Line of Business
Time run: 7/31/2015 2:04:27 PM

Amount in USD

Ranking Basis

Rank	Line of Business	Net Losses	Claim Payments	Average Loss Amount	Loss Ratio	Expense Ratio	Litigation Count	Claim Count

Line of Business Loss Ratio

This report is a line graph that illustrates the Loss Ratio, the ratio of incurred losses to earned premiums, over a time series. In this report, each Line of Business is represented by its own line.

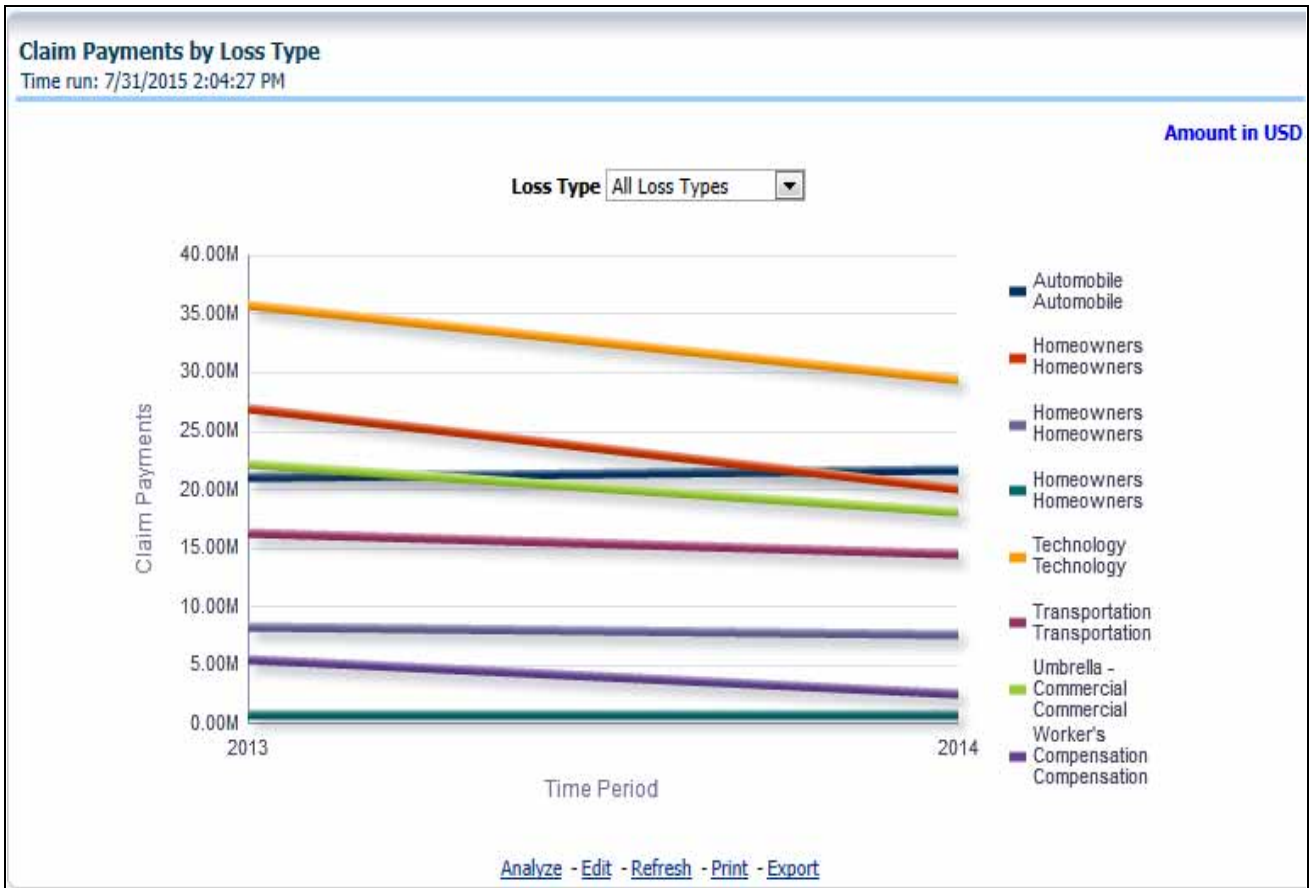

Line of Business Incurred Loss

This report is a line graph that represents the Incurred Losses, total amount of paid claims and loss reserves associated with a reporting period, over a time series. This also illustrates each line of business with its own line.

Claim Payments by Loss Type

This report is a line graph that summarizes the monetary amount of payments that have been made for losses reported for each line of business. The loss types can be further filtered to see the specific loss type details. Each Line of Business is represented by its own line.

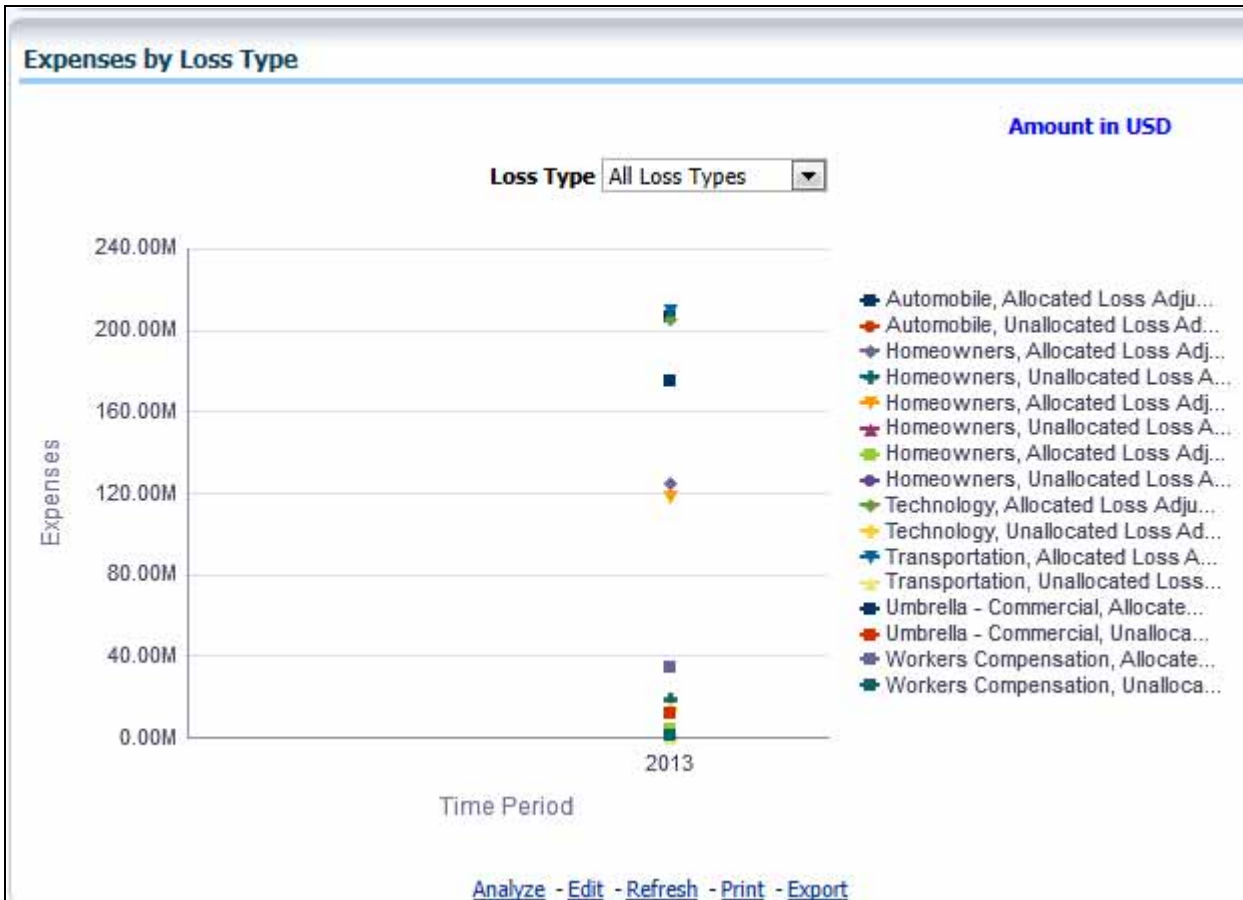

Payments by Reinsurance Company

This report is a Bar/Line graph that illustrates the relationship between the amount of payments made by the insurer and those that were received by the reinsurers.

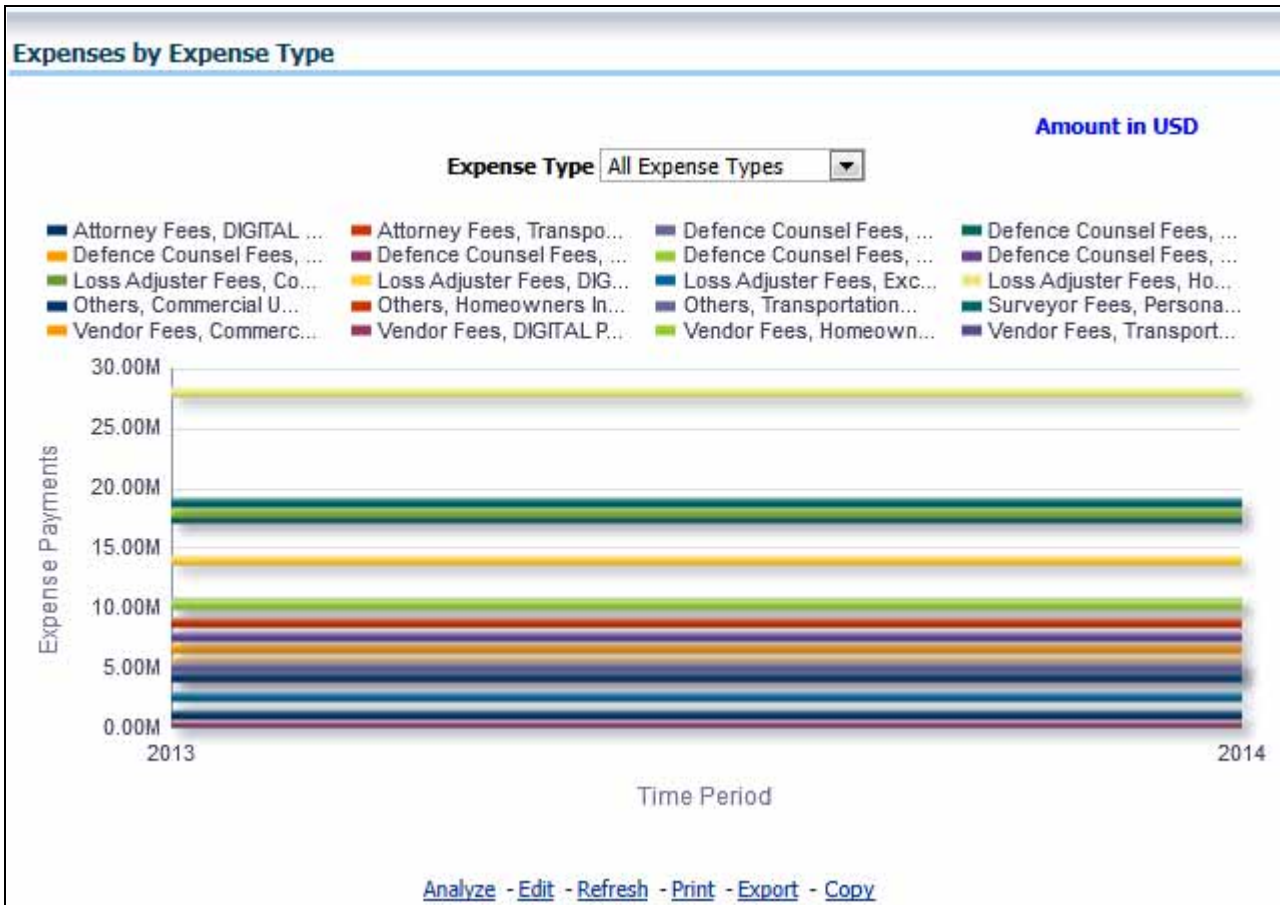

Expenses by Loss Type

This report is a line graph that illustrates the monetary payment totals generated for Expenses on claims based on the cause of the loss. Each Expense amount is categorized by Line of Business and type of Loss. Additional Details can be reviewed by selecting a specific Loss Type from the Loss Type selection field.

Expenses by Expense Type

This report is a line graph that illustrates the monetary payment totals generated for Expenses on claims based on the categorization of the expense. Each expense amount is categorized by the Line of Business and type of Expense. Additional Details can be reviewed by selecting a specific Expense Type from the Expense Type selection field.

Recovery Overview by Line of Business

This report is a tabular representation illustrating the performance of Recovery Referral for each Line of Business and performance of those efforts.

Recovery Overview by Line of Business
 Time run: 7/31/2015 2:04:27 PM

	Line of Business	
Claims Referred for Recovery	Automobile	100.0%
	Homeowners	41.7%
	Technology	62.5%
	Transportation	100.0%
	Umbrella - Commercial	57.1%
	Worker's Compensation	40.0%
Claims Referred for Fraud Investigation	Automobile	57.1%
	Homeowners	8.3%
	Technology	37.5%
	Transportation	50.0%
	Umbrella - Commercial	28.6%
	Worker's Compensation	40.0%
Referred Claim Payment Recovery	Automobile	2.6%
	Homeowners	2.9%
	Technology	3.6%
	Transportation	
	Umbrella - Commercial	2.0%
	Worker's Compensation	3.5%
Fraud Investigation Claims with Fraud Determination	Automobile	100.0%
	Homeowners	100.0%
	Technology	133.3%
	Transportation	133.3%
	Umbrella - Commercial	100.0%

Recovery Payments by Line of Business

This report is a line graph that illustrates the total monetary amount of Recovery Payments, payments received by an insurer that reimburse it for losses it paid, received during a reporting period, and shown over a time period for each Line of Business. Each Line of Business is represented by its own line.

Average Days until Closed

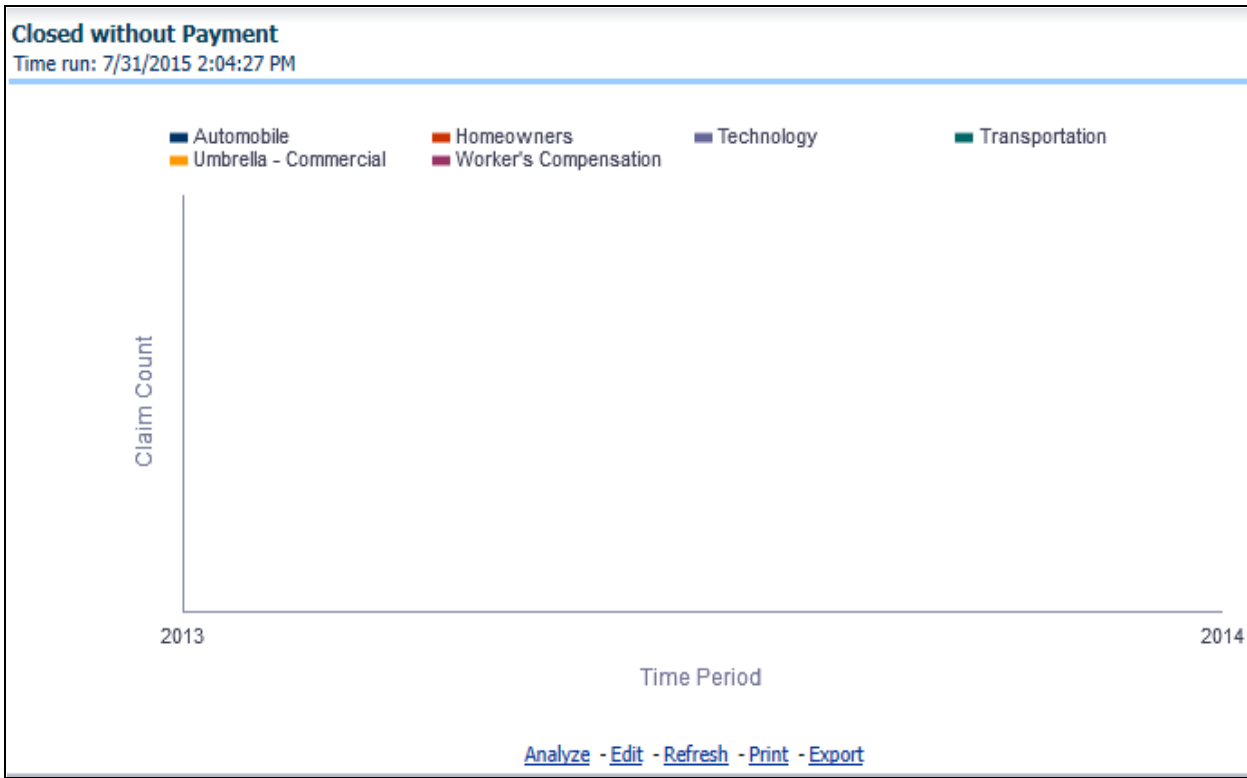

This report is a line graph that illustrates the average number of days between the day a claim is opened in the system and the date that the status of the same claim is changed to "Closed". This average is shown over a time series for each Line of Business.

Claims Closed without Payment

This report is a line graph that illustrates the count of claims that were closed during the reporting period without any loss payments generated for the claim.

Note: Expenses may have been paid for these claims. Each Line of Business is represented by its own line.

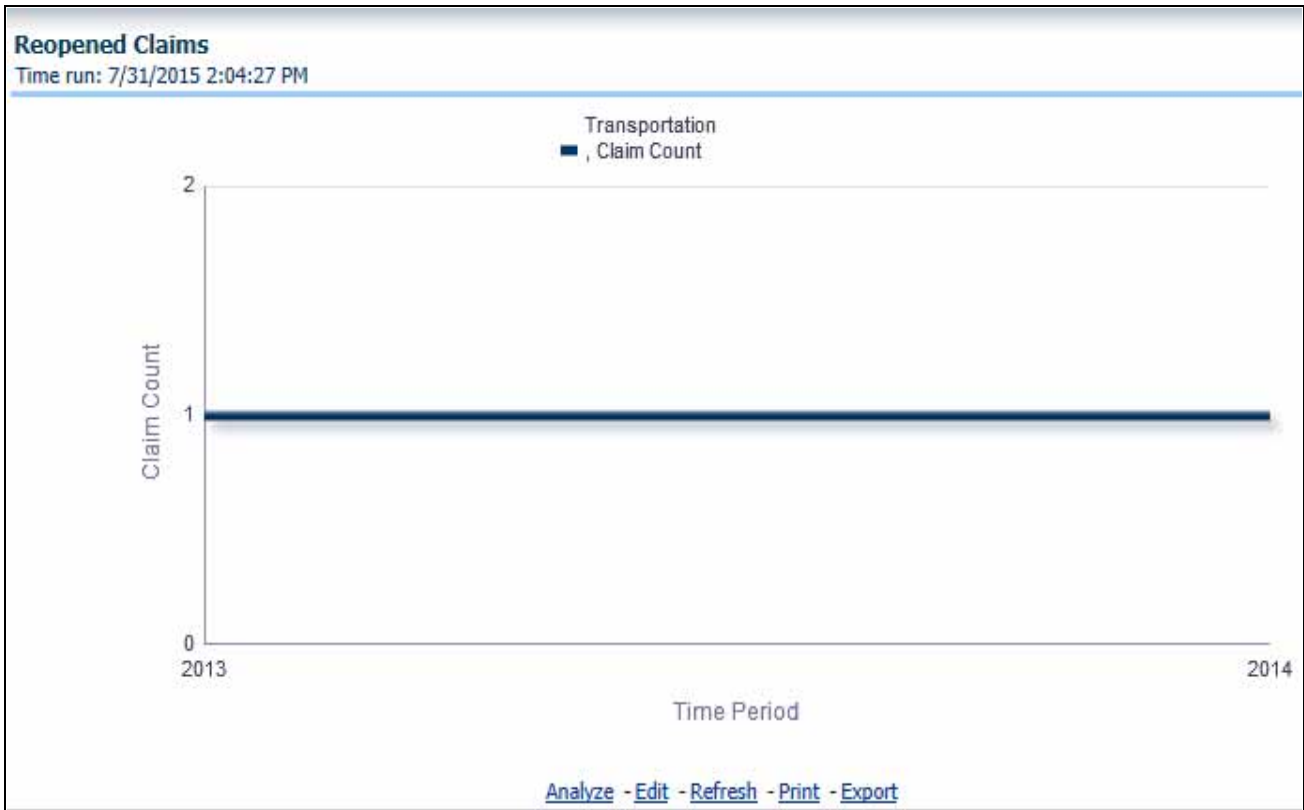

Claims Closed Due to Fraud

This report is a line graph that illustrates the count of claims that, after an investigation, were deemed to be fraudulent. In this report, the count is exhibited over a time series with each Line of Business represented by its own line.

Reopened Claims

This report is a line graph that illustrates the count of claims that were changed back to an "Opened" status after it was previously closed. This report shows affected claims during the reporting periods over a time series with each Line of Business represented with its own line.

Litigation Claims

This report is a line graph that represents the count of claims where a judicial litigation case was initiated for the claim during the reporting period. This report illustrates the count of the affected claims for over a time series with each Line of Business being represented by its own line.

Product

The Product tab includes reports that focus on the Key Performance Indicators for each Product. The filters for this tab allow the report results to be focused on selected combinations for comparison and targeted analysis. The filters include:

- Time
- Company
- Product
- Geography

The various reports available under this tab are detailed in the following sections.

Claim Ranking by Product

This is a tabular report that lists the Product in the order of greatest value to least value based on the Grade Basis selected. The information provided includes Key Performance Indicators for Claim Performance.

Claim Ranking by Product

Product Loss Ratio

This is a line graph that illustrates the Loss Ratio, the ratio of incurred losses to earned premiums, over a time series. In this report, each Product is represented by its own line.

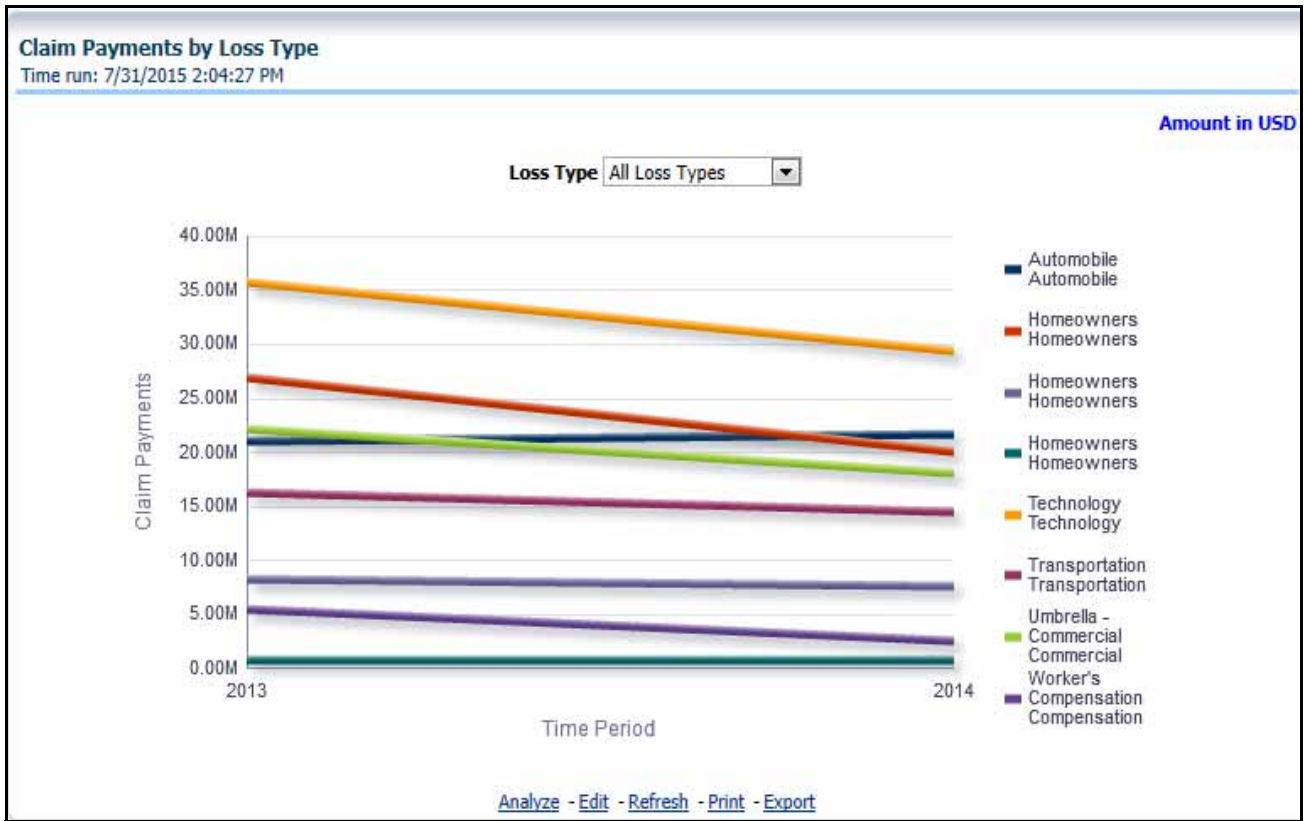

Product Incurred Losses

This report represents the Incurred Losses, total amount of paid claims, and loss reserves associated with a reporting period, over a time series. This report is generated for the corporation as a whole and illustrates each product with its own line.

Claim Payments by Loss Type

This report is a line graph that summarizes the monetary amount of payments that have been made for losses reported for each product. The loss types may be further filtered to see specific loss type detail. Each Product is represented by its own line.

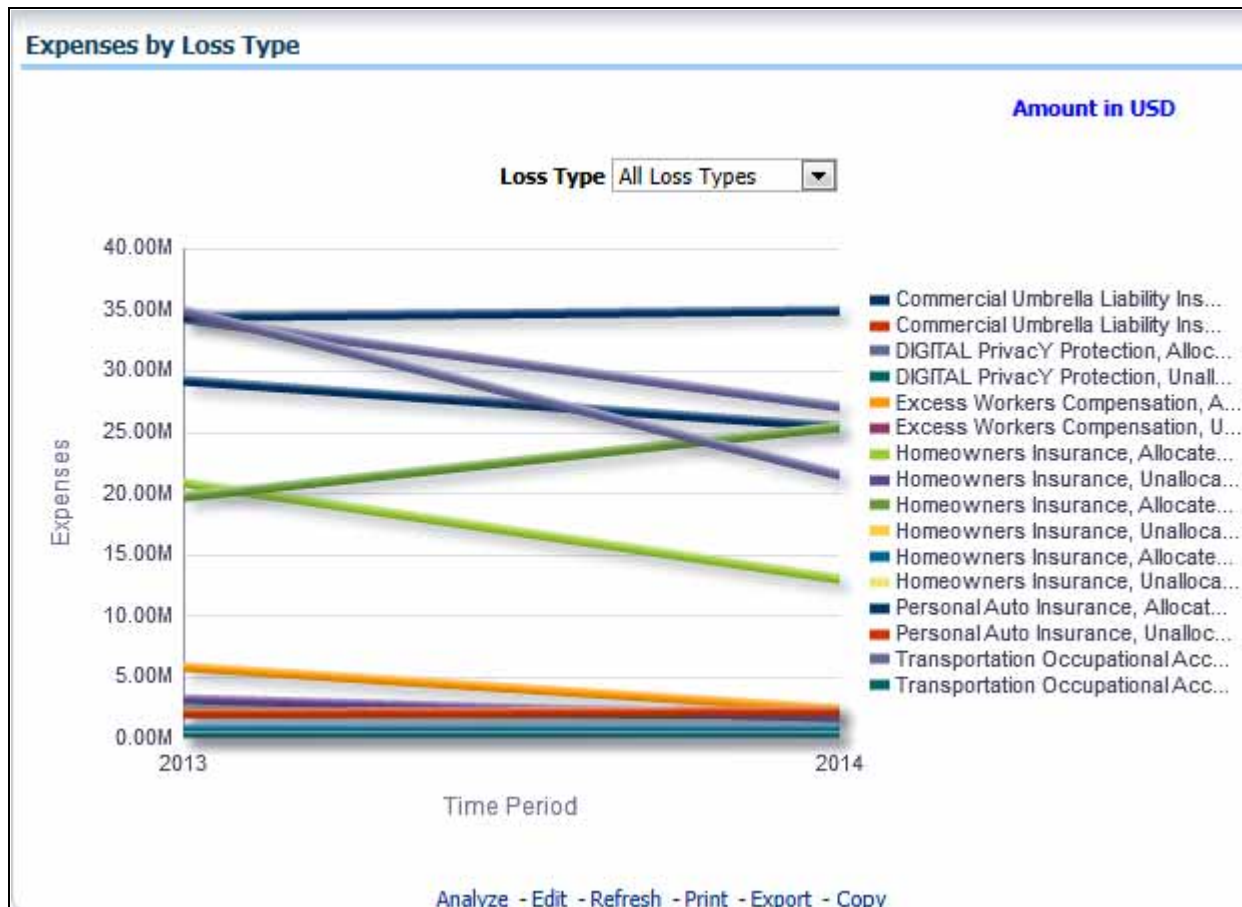

Payments by Reinsurance Company

This report is a bar/line graph that illustrates the relationship between the amount of payments made by the insurer and those that were received by the reinsurers.

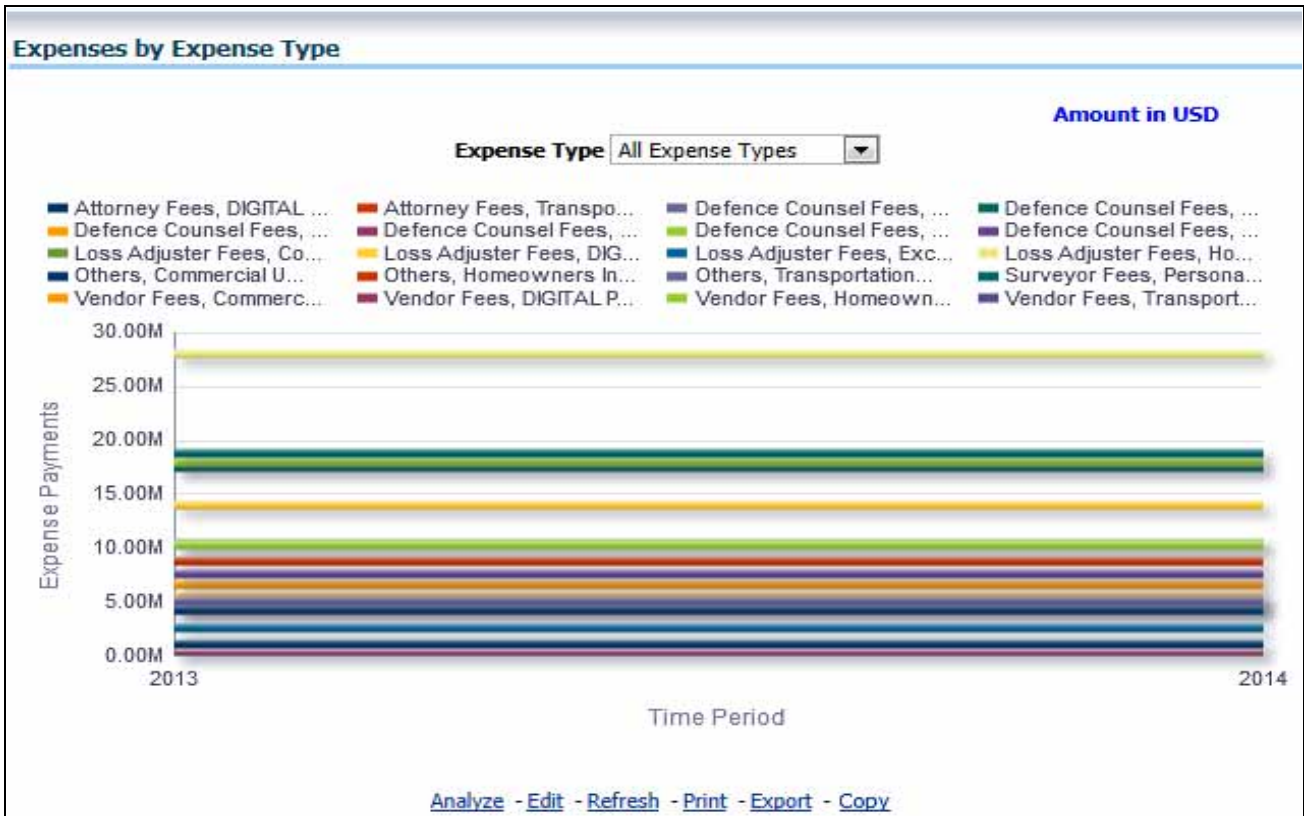

Expenses by Loss Type

This report is a line graph that illustrates the monetary payment totals generated for Expenses on claims based on the cause of the loss. Each Expense amount is categorized by the Product and type of Expense Allocation. Additional Details can be reviewed by selecting a specific Loss Type from the Loss Type selection field.

Expenses by Expense Type

This report is a line graph that illustrates the monetary payment totals generated for Expenses on claims based on the categorization of the expense. Each Expense amount is categorized by the Product and type of Expense. Additional Details can be reviewed by selecting a specific Expense Type from the Expense Type selection field.

Recovery Overview by Product

This report is a tabular representation illustrating the performance of Recovery Referral for each Product and the performance of those efforts.

Recovery Overview by Product
 Time run: 7/31/2015 2:31:01 PM

Recovery Payments by Product

This report is a line graph that illustrates the total monetary amount of Recovery Payments, payments received by an insurer that reimburse it for losses it paid, received during a reporting period, and shown over a time period for each Product. Each Product is represented by its own line.

Average Days until Closed

This report is a line graph that illustrates the average number of days between the day a claim is opened in the system and the date that the status of the same claim is changed to "Closed". This average is shown over a time series for each Product.

Claims Closed Without Payment

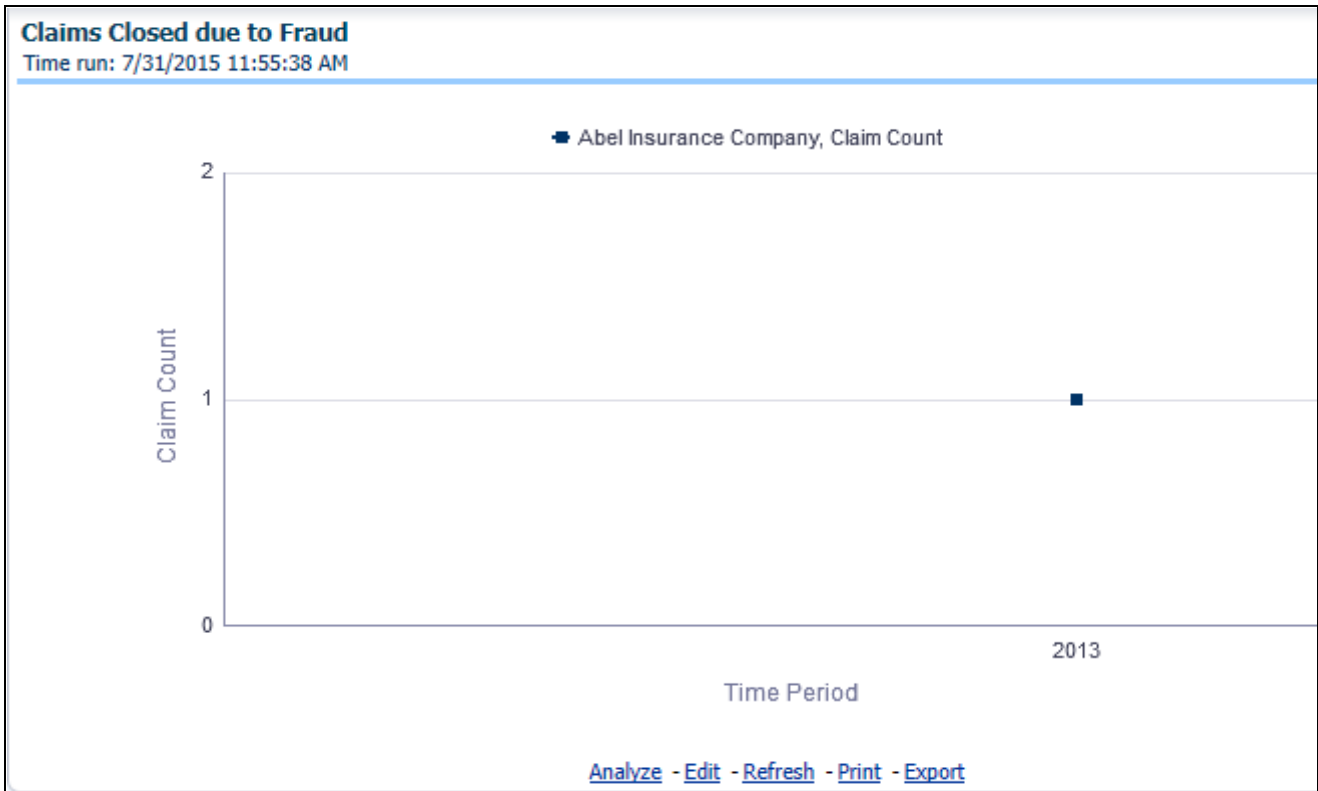

This report is a line graph that illustrates the count of claims that were closed during the reporting period without any loss payments generated for the claim.

Note: Expenses may have been paid for these claims. Each Product is represented by its own line.

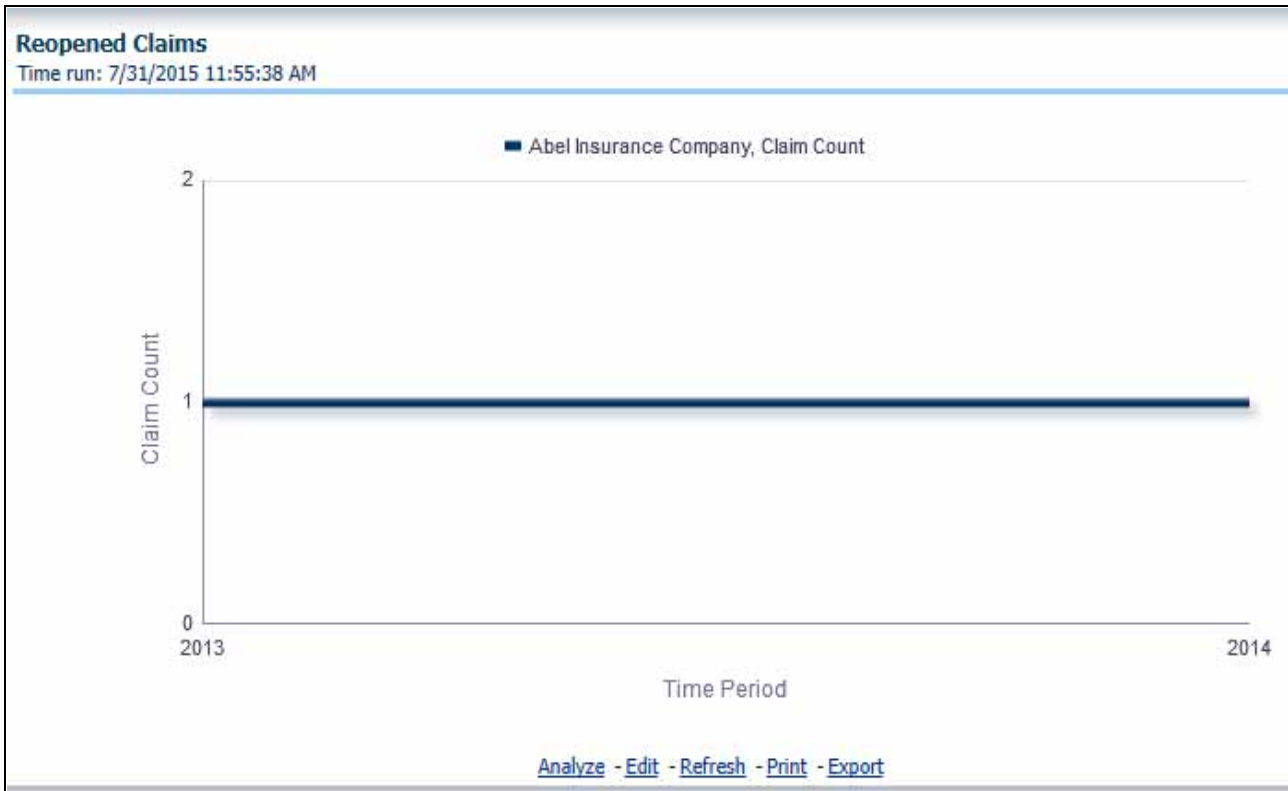

Claims Closed Due to Fraud

This report is a line graph that illustrates the count of claims that, after an investigation, were deemed to be fraudulent. In this report, the count is exhibited over a time series with each Product represented by its own line.

Reopened Claims

This report is a line graph that illustrates the count of claims that were changed back to an "Opened" status after it was previously closed. This report shows affected claims during the reporting periods over a time series with each Product represented with its own line.

Litigation Claims

This report is a line graph that represents the count of claims where a judicial litigation case was initiated for the claim during the reporting period. This report illustrates the count of the affected claims for over a time series with each Product being represented by its own line.

Catastrophe

The Catastrophe tab includes reports that focus on the Key Performance Indicators for declared Catastrophe. The filters for this tab allow the report results to be focused on selected combinations for comparison and targeted analysis. The filters include:

- Time
- Company
- Catastrophe
- Geography

The various reports available under this tab are detailed in the following sections.

Catastrophe Claim Ranking

An assessment and ranking of catastrophe losses can be measured by various performance measures like net losses, claim payments, and through number of claims across regions and catastrophes. This report contains both tabular and geographical map that lists the catastrophe in the order of greatest value to the least value based on the grade basis selected.

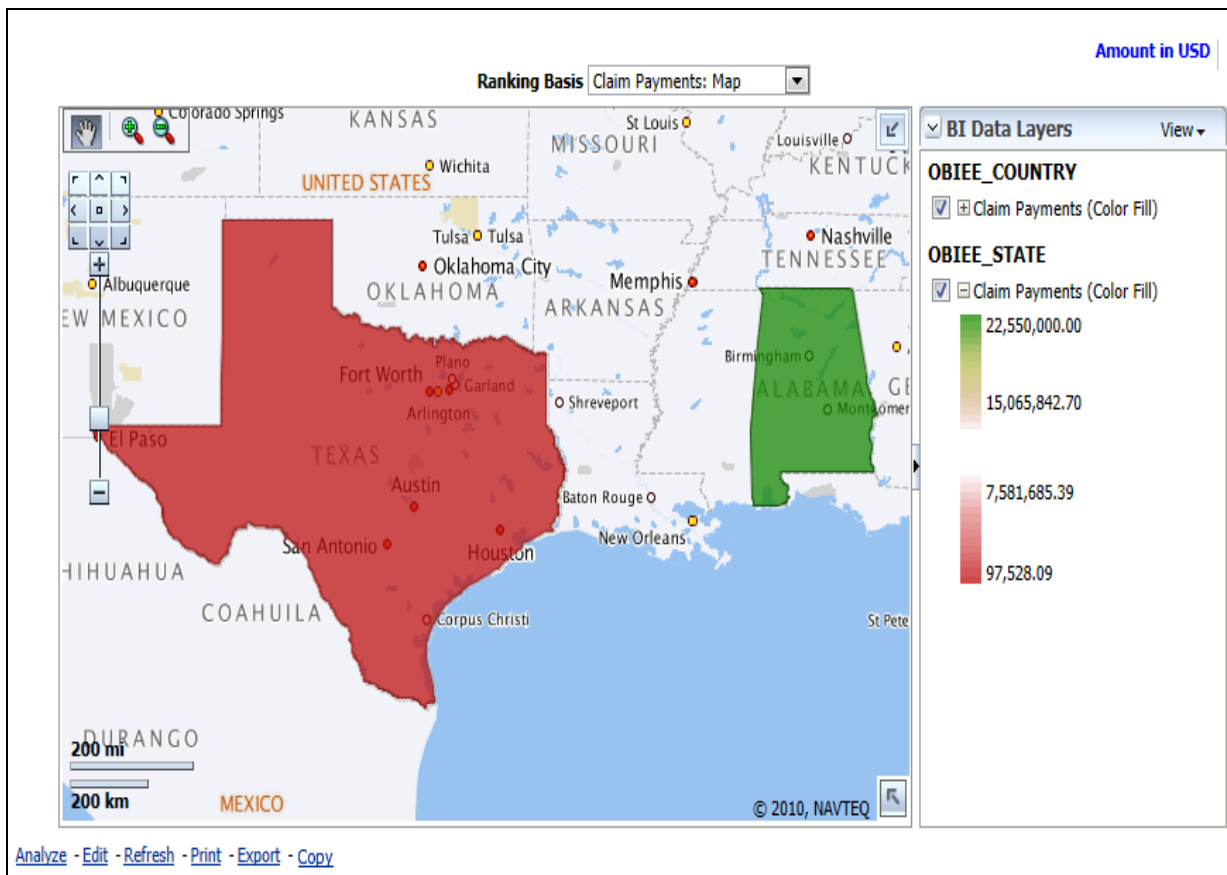

Catastrophe Claim Ranking

Time run: 7/31/2015 10:37:09 PM

Amount in USD

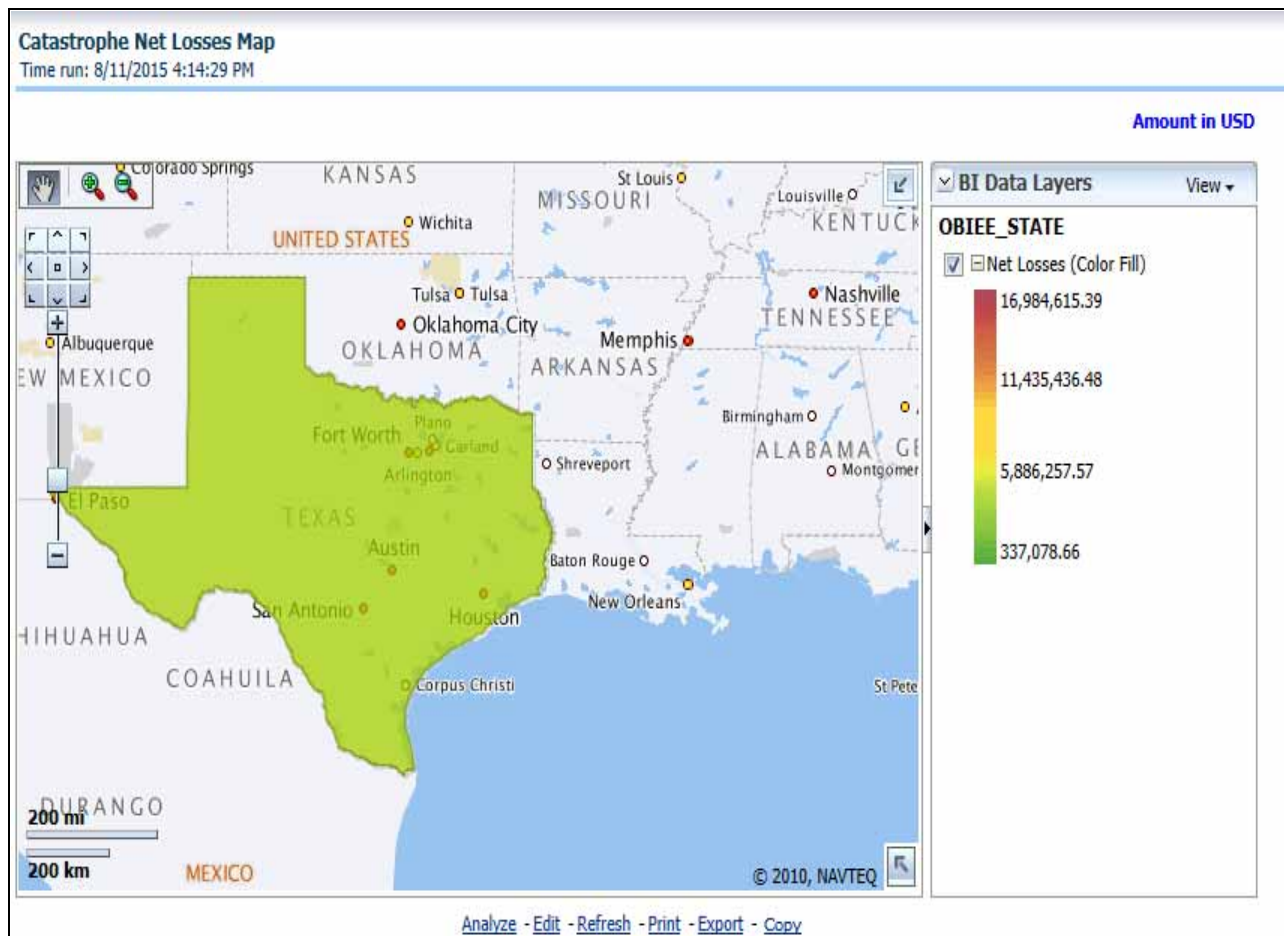

Ranking Basis Claim Payments

Rank	Region Name	Catastrophe Name	Claim Payments	Net Losses	Average Loss Amount	Claim Count
1	▶ United States	HEATWAVE CHARLEY	13,500,000.00	13,200,000.00	1,625,000.00	2
3		HURRICANE SANDY	10,250,000.00		2,050,000.00	1
2	▶ Australia	TORNADO HOPE	12,755,555.55		1,822,222.22	2
7		EQRTQUAKE BORIS	1,511,111.11		1,511,111.11	1
4	▶ Italy	EQRTQUAKE BORIS	3,200,000.00	2,830,769.23	3,200,000.00	1

Catastrophe Recovery Payments

This report is a line graph that illustrates the total monetary amount of Recovery Payments, payments received by an insurer that reimburse it for losses it paid, received for Catastrophe Claims during a reporting period, and shown over a time period for each Catastrophe. Each Catastrophe is represented by its own line.

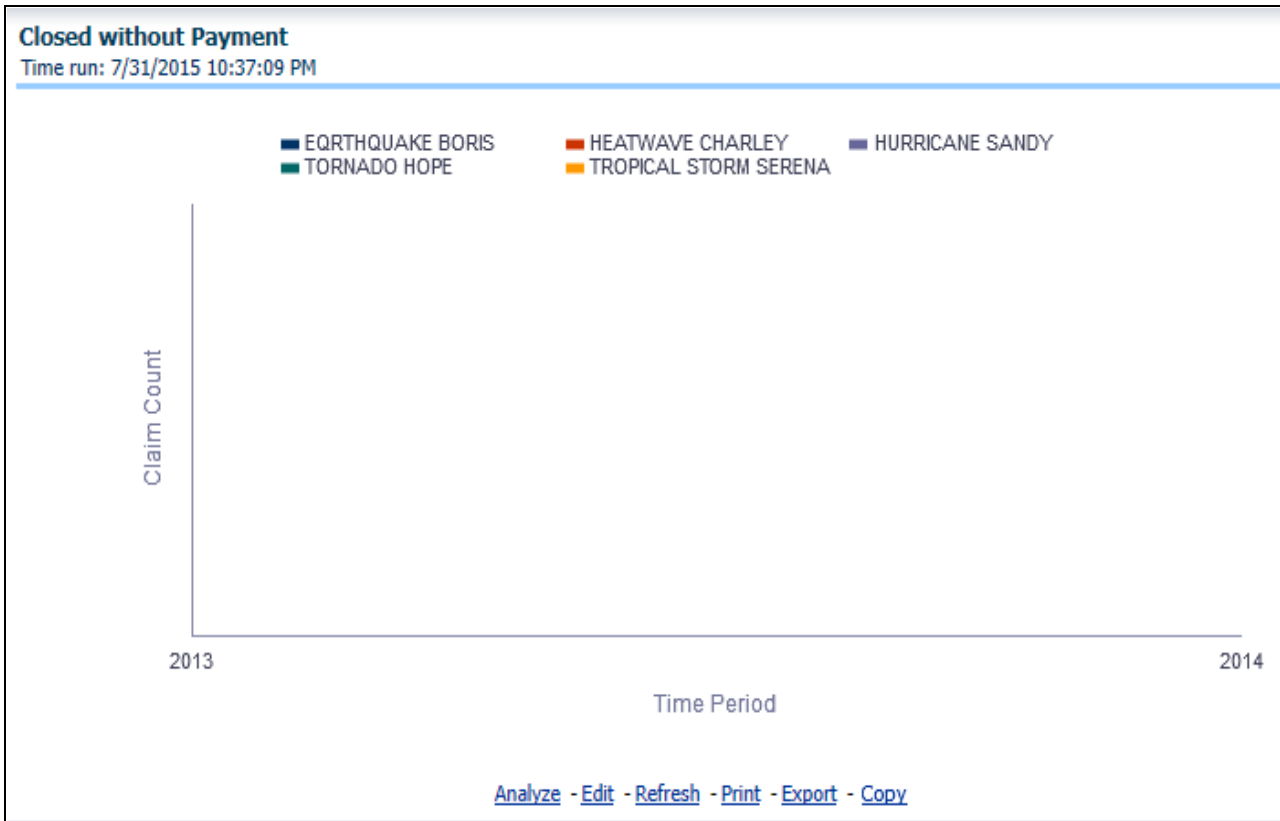

Average Days until Closed

This report is a line graph that illustrates the average number of days between the day a catastrophe claim is opened in the system and the date that the status of the same claim is changed to "Closed". This average is shown over a time series for each catastrophe.

Closed Without Payment

This report displays the count of catastrophe claims that were closed without any payments for losses being issued to claimants. The graph shows the average count of days for these claims per catastrophe over time.

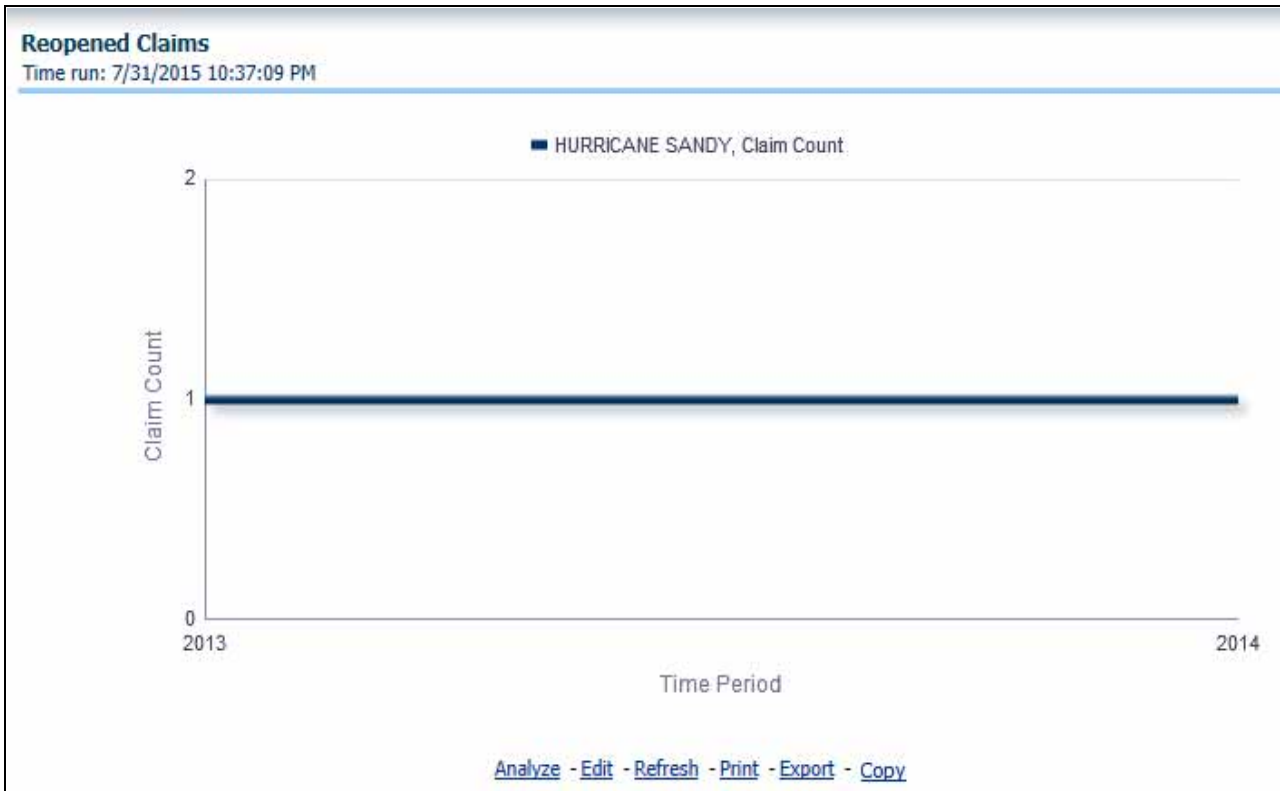

Claims Closed Due to Fraud

This report is a line graph that displays the count of catastrophe claims that were closed after an investigation determined that fraudulent activity occurred and no losses were paid to the claimant due to the fraud activity. The graph shows the count of these claims per catastrophe over time.

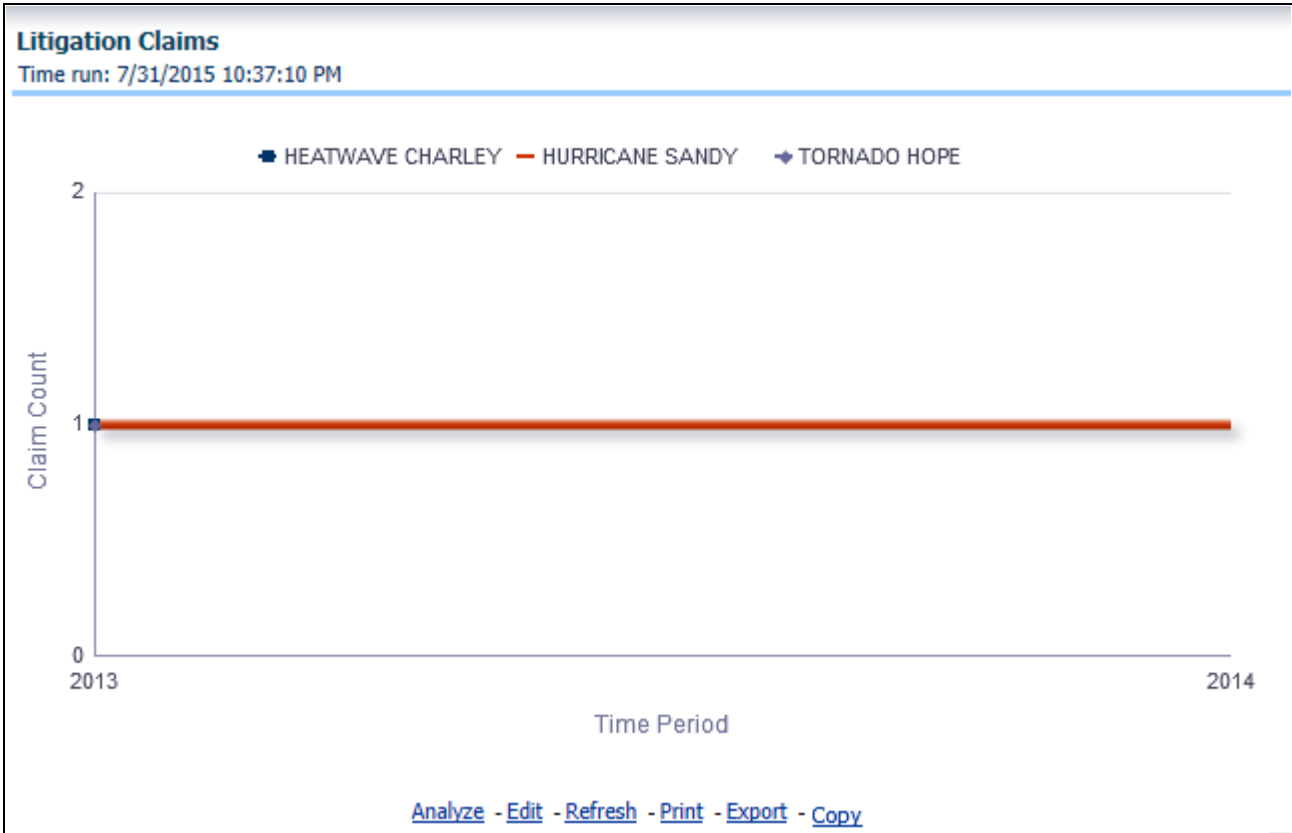

Reopened Claims

This report displays the count of catastrophe claims that were initially closed and then opened again for further processing. This shows the count of claims per catastrophe where this process occurred over time.

Litigation Claims

This report is a line graph that displays the count of catastrophe claims that resulted in a judicial litigation case being initiated. This shows the count of claims per catastrophe where this process occurred over time.

Managing Customer Central - Commercial Corporate Dashboard

Overview

This chapter explains the report available under each tab in the Customer Central - Commercial Corporate Dashboard.

Managing Reports

The following tabs are present in the Customer Central - Commercial Corporate Dashboard.

- [Customer Central](#)
- [Policy Central](#)

The following screenshots display the essential nature of the available reports as per each tab:

A screenshot of the 'Contact Details' report. The report has a red header with 'Contact Details' in white text. Below the header, there are six data fields arranged in two columns. The first column contains 'Registered Office', 'Contact No', and 'Website'. The second column contains 'Preferred Contact', 'E-Mail ID', and 'Customer Since'. Each field has a corresponding input box with text or a value. At the bottom of the report, there are links for 'Analyze - Edit - Refresh - Print - Copy'.

APPENDIX A

Tables and List of values

V_FINANCIAL_PERIOD_INDICATOR column in STG_PARTY_FINANCIALS table is expected to have values Q1/Q2/Q3/Q4

APPENDIX B

Loading Planned Values in Fact and Profitability Tables

Planned value is an estimation of amount or number that the business is expected to accomplish in a defined time period. The planned values are estimated by the business functions and serve as a baseline, against which the performance can be measured with actual value or number achieved by the company.

Planned values are generally taken from customers book. It will be a direct load into the fact table (FCT_POLICY_PROFITABILITY) with V_SCENARIO_CODE as 400.

APPENDIX C

Data population in FSI_LOCATION_MAP_COORD table

Populate FSI_LOCATION_MAP_COORD based on DIM_LOCATION data itself, but description and codes should come from tables OBIEE_COUNTRY, OBIEE_STATE, OBIEE_CITY (from the DB schema configured for Maps, OBIEE_NAVTEQ for instance in this case) respectively for Country, State and City, and n_location_skey should be the corresponding n_location_skey from DIM_LOCATION.

For example, consider the following data from DIM_LOCATION

N_LOCATION_SKEY	1
V_LOCATION_CODE	HAW
V_COUNTRY_CODE	USA
V_COUNTRY_DESC	United States
V_STATE_CODE	USA_HI
V_STATE_DESC	USA_HI
V_CITY_CODE	HAWAII
V_CITY_DESC	Honolulu
V_ZIP_CODE	96813

Now, to populate the following columns in FSI_LOCATION_MAP_COORD:

n_location_skey	1
v_country_code = OBIEE_COUNTRY.ISO_COUNTRY_CODE	USA
v_country_code_map = OBIEE_COUNTRY.ISO_COUNTRY_CODE	USA
v_country_desc = OBIEE_COUNTRY.NAME	United States
v_state_code = OBIEE_STATE.ISO_CTRY_CD_STATE_ABBRV	USA_HI
v_state_code_map = OBIEE_STATE.ISO_CTRY_CD_STATE_ABBRV	USA_HI
v_state_desc = OBIEE_STATE.STATE_NAME	HAWAII
v_city_code = OBIEE_CITY.CTRY_CD3_STATE_ABBRV_CITY	USA_HI_Honolulu
v_city_code_map = OBIEE_CITY.CTRY_CD3_STATE_ABBRV_CITY	USA_HI_Honolulu
v_city_desc = OBIEE_CITY.CITY_NAME	HONOLOLU
v_zip_code	96813

Note: This is a one-time manual activity and the Map tables, columns would change based on the Maps used. The process mentioned here is for NAVTEQ Maps.
