**License Restrictions**

**Warranty/Consequential Damages Disclaimer**

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

**Warranty Disclaimer**

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

**Restricted Rights Notice**

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

**Hazardous Applications Notice**

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

**Third Party Content, Products, and Services Disclaimer**

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

<b>MANUAL CONFIGURATION UPDATES.....</b>	<b>5</b>

## INTRODUCTION

Backward compatibility issues can occur when features or configuration in a previous release are not supported in a compatible way in the new release. Every consideration is given during OIPA development to preserve compatibility between releases; however, in some cases, a required feature cannot be implemented without introducing configuration that has no counterpart in previous releases, or deprecating elements in the previous configuration that are incompatible with new features. Upgrading OIPA versions can present two types of backward compatibility issues:

- Changes to the database that have been automated with scripts provided by Oracle.

In some cases, the correspondence between the old and new configuration elements allows an automated transform to convert old configuration elements to the new ones. Automated scripts can perform generic updates for configuration elements that meet the conditions described in the release notes for each script.

- Changes to the database that you must manually configure.

Some elements of a configuration do not yield to a one-to-one conversion from old to new configuration. Changes of this nature require case-by-case analysis of the impact and necessary corrective actions for specific OIPA configurations.

## Customer Support

If you have any questions about the installation or use of our products, please visit the My Oracle Support website: <https://support.oracle.com>, or call (800) 223-1711.

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## **MANUAL CONFIGURATION UPDATES**

There are no new features in OIPA Version 10.2.0.0 that require manual configuration updates.
