# Micros Supply Chain myCreations

Release Notes

Release 1.9.0.16.1

August 2015

---

> **Note:** The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout the existing documentation set.

This document highlights the major changes and fixes for Release 1.9.0.16.1 of Micros Supply Chain myCreations.

## Overview

Micros Supply Chain myCreations is an integrated suite of applications designed to meet all aspects of sourcing, developing, and protecting retailer brands. The suite provides solutions for product development, compliance, quality, and traceability. It is designed specifically for retail, food service, and manufacturing businesses to develop and protect their brands, manage their suppliers, and ensure full end-to-end product lifecycle management.

The suite is composed of the following applications:

- myLibrary - enables the issue, receipt, and acceptance of policies, guidelines, and key working documents.

- myProduct - supports the development of products and production specifications.

- myProject - supports the development of project briefs, plans, and workflow management.

- mySupplier - enables the identification, selection, and approval of suppliers.

## myProject Functional Enhancement

> **Note:** Where new fields or User Interface (UI) changes are introduced as part of a change, the portal owner may need to set up any new system text and associated translations to support it.
