

# Micros Supply Chain myCreations

Release Notes

Release 1.9.0.9

March 2015

---

---

---

**Note:** The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout the existing documentation set.

---

---

This document highlights the major changes and fixes for Release 1.9.0.9 of Micros Supply Chain myCreations.

## Overview

Micros Supply Chain myCreations is an integrated suite of applications designed to meet all aspects of sourcing, developing, and protecting retailer brands. The suite provides solutions for product development, compliance, quality, and traceability. It is designed specifically for retail, food service, and manufacturing businesses to develop and protect their brands, manage their suppliers, and ensure full end-to-end product lifecycle management.

The suite is composed of the following applications:

- myLibrary - enables the issue, receipt, and acceptance of policies, guidelines, and key working documents.
- myProduct - supports the development of products and production specifications.
- myProject - supports the development of project briefs, plans, and workflow management.
- mySupplier - enables the identification, selection, and approval of suppliers.

# myProduct Functional Enhancements

---

---

**Note:** Where new fields or User Interface (UI) changes are introduced as part of a change, the portal owner may need to set up any new system text and associated translations to support it.

---

---

The following functional enhancements for myProduct are included in this release:

## Pack Copy Preview

Ref NA

The option to preview a product specification's pack copy/copy brief at any stage of the specification's lifecycle is added. The Preview Pack Copy or Preview Copy Brief option now appears at each status where the specification is in edit mode and an OLC section is present.

## Impacts on Existing Installation

None expected

## ANZ Legislation

Ref S-167

Support is added for the legislation of Australia and New Zealand, specifically the calculation and validation of nutrition within product specifications.

---

---

**Note:** This does not include the front of pack nutrition signposting as defined in the Australian health star rating system.

---

---

## Impact on Existing Installation

A new legislation option appears for Australia and New Zealand in the lists of supported legislations. Default nutrition panels appear for Australia and New Zealand legislation in the Nutrition Panels in the Nutrition Spec Glossaries section of the Admin area, however, this will no longer happen automatically in releases from 1.8.20.12 onwards.

This functional enhancement has the following impact:

- Configuration changes

## US Nutrition Update

Ref S-236

Nutrition labelling specific to pet foods and alternative dual panel layout are made for the United States (US) only.

## Impacts on Existing Installation

None expected

## Consolidation of Glossary Launchers

Ref NA

A change is made to the code release process to consolidate the launchers that are used to populate glossaries as part of a new portal installation or an upgrade.

New installations now only have certain key glossaries, such as Ingredients, pre-populated with default contents. The others are configured by the portal owner and subsequently reloaded by the release launchers. When an upgrade release takes place, the launchers therefore always use a set of glossaries that are specific to the portal.

### Impacts on Existing Installation

In some cases where core sample glossaries had previously been excluded from the launcher because the glossary was not used, for example Micro Classifications, the new process populated the empty glossary with the core sample entries.

This is fixed so that core glossaries are not included in the launcher for an upgrade release.

## Fixed Issues

The following tables list issues fixed in this release:

**Table 1** General Fixed Issues

Defect Number	Description
TRUNKONEEIGHT-176	Demo systems are changed to use Oracle Logos. The demo system login screen now shows Oracle logos. Impact on existing installation: None expected
TRUNKONEEIGHT-194	User roles are no longer data generated during a release. The system no longer regenerates user roles when a release is being implemented. This means that any changes made to user roles since the last release remain unaffected. Impact on existing installation: If there are any new user roles, these will appear within the Roles & Permissions Admin option.
TRUNKONEEIGHT-254	Additional system text is added for the following: <ul style="list-style-type: none"><li>■ The title of the dialog controlling the acceptance of a Produce Specification.</li><li>■ The Product Record and Specification list views when adding these fields as columns: Business Categories Business Category Spec. Template Type Specification Type</li></ul>

**Table 1 (Cont.) General Fixed Issues**

Defect Number	Description
<p>TRUNKONEEIGHT-254 (continued)</p>	<ul style="list-style-type: none"> <li>■ The following within the Admin/Products Area: <ul style="list-style-type: none"> <li>The bookmark for Spec Glossaries/CNF/OLC/Warning.</li> <li>The bookmark for Spec Glossaries/Food/OLC/Printed Units.</li> <li>The bookmark for Spec Glossaries/Produce/OLC/Printed Units.</li> <li>The bookmark for Spec Glossaries/Produce/OLC/Safety or Warning Phrase.</li> <li>The bookmark for Spec Glossaries/Food/OLC/Safety or Warning Phrase.</li> <li>The bookmark for Spec Glossaries/Produce/Main Details/Product Groups.</li> </ul> </li> <li>■ The parameter text used in the Admin/System Control/System Parameters/Products Tab for Enable Recipe and Formulation Import/Export.</li> <li>■ The heading and error text used in the dialog for a Food or FNF specification when exporting a recipe or formulation when there is too much data.</li> <li>■ The initial dialog title when importing a recipe or formulation.</li> <li>■ The dialog title and text in the final confirmation dialog when importing a recipe or formulation.</li> <li>■ The initial import message when importing a recipe or formulation.</li> <li>■ The validation error text when importing a comment row within a recipe that has values in any of the numerical fields.</li> <li>■ The validation error text when importing a recipe or formulation where a component is specified.</li> <li>■ The validation error text when importing a recipe or formulation where a sub-compound is specified along with a Batch Quantity.</li> <li>■ The validation error text when importing a recipe or formulation where a sub-compound is specified along with an Ingredient Quantity.</li> <li>■ The validation error text when importing a recipe or formulation where the file contains the wrong number of columns.</li> <li>■ The text used on the buttons to allow the user to import or export a recipe or formulation.</li> <li>■ The validation error text displayed when importing a recipe or formulation where the file is not a Microsoft Excel spreadsheet.</li> <li>■ The text added to the Q, U, and V columns within the export spreadsheet, used to notify the user/viewer of the spreadsheet that multiple values can be used in these columns by using a tilde symbol.</li> </ul> <p>Impact on existing installation: Portal owners operating in more than one language may want consider adding translations for these.</p>

**Table 2 Administration Fixed Issue**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-193	Validation messages were not being searched in the Web Service Log list view. The system now searches the Validation Messages column when using the Quick Search facility in the Web Service Log list view. Impact on existing installation: None expected

**Table 3 Alerts Fixed Issue**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-168 Tesseract Ref 92501	Alerts were being sent to a deleted site. The system no longer sends an alert to a site that has been deleted. Those that have already been sent remain. Impact on existing installation: None expected

**Table 4 mySupplier Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-164 Tesseract Ref 92371	An error occurred when adding a role to the Sites list view. An error no longer occurs when adding a role to the Sites by Supplier list view. Impact on existing installation: None expected
TRUNKONEEIGHT-171 Tesseract Ref 92683	Validation errors occurred when confirming supplier or site details in read mode. Errors no longer occur as the dialog has been changed to not list specific errors. Users now have to open the record in edit mode and select the Validate action to see specific errors. Impact on existing installation: None expected
TRUNKONEEIGHT-192 Tesseract Ref 92328	Sites that were without a Supplier could not be set to DELISTED. In the cases where a site has no supplier record, the system now allows users with the correct permissions to set the site to DELISTED. Impact on existing installation: None expected

**Table 5 myProduct Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-44 Tesseract Ref 83943	<p>Ingredients were not being calculated and the ingredients list was not being generated.</p> <p>The system now correctly deals with ingredients with a value of zero that are three levels down.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-46 Tesseract Ref 86961	<p>The Total Percentages shown were incorrect.</p> <p>The system now correctly calculates the Total Percentages, even when dealing with small quantity ingredients, and number of decimal places used.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-160 Tesseract 86733	<p>The system crashed when changing an allergen question to Present in Product in the D&amp;A section.</p> <p>The system no longer crashes when a user changes an allergen question from Not Present in Product to Present in Product.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-170	<p>Nutrition increment rules from 1.4 were lost as part of the 1.8 upgrade.</p> <p>The system now deals with the increment rules from the source system.</p> <p>Impact on existing installation: Clients upgrading from 1.4 to 1.8 should not experience the problem.</p>
TRUNKONEEIGHT-174	<p>Allergens were not appearing in the correct order.</p> <p>The system now sequences allergens correctly using the On Pack Sequence.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-178 Tesseract Ref 93022	<p>An error occurred when saving the CNF Components section of a specification.</p> <p>An error no longer occurs when saving the CNF Components section.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-181 Tesseract Ref 93222	<p>A new allergen question was not appearing in the specifications.</p> <p>The system now adds new allergen questions when either making a new version of a specification or creating a new specification.</p> <p>Impact on existing installation: None expected</p>

**Table 5 (Cont.) myProduct Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-182	<p>Formatting was not correctly applied to Allergen statements in the Pack Copy file.</p> <p>The system now displays Contains Declarations in bold and with upper case text.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-183	<p>A user was not able to see Specification Template Types in list views.</p> <p>The system now allows a user to add the following columns to the Product Record and Specification list views and use in an Advanced Search:</p> <ul style="list-style-type: none"> <li>▪ Specification Type</li> <li>▪ Specification Template Type</li> </ul> <p>Impact on existing installation: New columns are seen in both the Product Record and Specification list views.</p>
TRUNKONEEIGHT-184	<p>Invalid Business Categories were shown when changing the spec type within a Product record.</p> <p>The Business Categories are now consistent with the Spec Type chosen.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-185	<p>Wine energy values were not being calculated correctly.</p> <p>The Per Serving for kcal and kj are now being calculated based on the Per 100 Value multiplied by (the Per Serving value divided by 100).</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-186	<p>The Recipe &amp; Formulation import was not importing some data.</p> <p>The system now imports compounds and comments when importing data into the Recipe and Formulation section of a specification.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-187	<p>The Recipe &amp; Formulation import was importing deactivated glossary items.</p> <p>The system now correctly deals with glossary items that are found to be inactive during the import of a recipe or formulation.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-188	<p>Function data was not being imported when importing data into the Recipe &amp; Formulation section.</p> <p>The system now imports function data when importing data.</p> <p>Impact on existing installation: None expected</p>

**Table 5 (Cont.) myProduct Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-189	<p>The Calculate &amp; Create Ingredient List button was not turning red after importing data into a Recipe &amp; Formulation section.</p> <p>The system now correctly turns the button red and applies the correct validation when a recipe has been imported.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-190	<p>The Import button was visible when a Specification was at PACK COPY SENT.</p> <p>Specifications no longer show the Import button in the Recipe section when the status is at PACK COPY SENT.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-191	<p>Warning errors were not shown when importing data into the Recipe &amp; Formulation section.</p> <p>The system now correctly deals with the handling of warnings and errors.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-198 Tesseract Ref 91019 and 93721	<p>An error occurred when opening the Recipe and Raw Materials section of a specification.</p> <p>An error no longer occurs when opening the Recipe and Raw Materials section of a specification.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-199 Tesseract Ref 93719	<p>Custom Field data was missing when copying a specification.</p> <p>The system now includes custom field data when copying a specification.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-200	<p>A performance issue was caused by the Product Specs Awaiting Review Task App item.</p> <p>This Task App item has been disabled until a suitable solution is found.</p> <p>Impact on existing installation: The following Task App item no longer appears: You have x Product Specifications requiring review</p>
TRUNKONEEIGHT-224	<p>Pack Copy generation needs to include a storage section.</p> <p>For those that require this, a storage section is now included in the Pack Copy whenever a Pack Copy is generated.</p> <p>Impact on existing installation: None expected for those clients that do not show the storage section within their Pack Copy.</p>

**Table 5 (Cont.) myProduct Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-225	<p>No storage field data was appearing in the Pack Copy.</p> <p>The missing storage data now appears within the Pack Copy when generated.</p> <p>Impact on existing installation: None expected for those clients that do not show the storage section within their Pack Copy.</p>
TRUNKONENINE-26	<p>The Acceptable Quality Limits field within the CNF Process Controls section was showing eight decimal places when the final value was zero.</p> <p>The system no longer displays a resulting value of zero with eight decimals places.</p> <p>Impact on existing installation: None expected</p>
TRUNKONENINE-27	<p>Users were able to add or remove rows from the OLC Non Copy Printers table.</p> <p>The system no longer allows rows to be added or removed when it is deemed to be locked for edit.</p> <p>Impact on existing installation: None expected</p>

**Table 6 myProject Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-161 Tesseract Ref 91923	<p>Inactive project templates were visible when creating a new project.</p> <p>The system no longer displays inactive project templates when creating a new project.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-162 Tesseract Ref 92404	<p>Overdue email was being sent for completed activities.</p> <p>The system no longer sends an overdue email for activities that have been completed.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-163 Tesseract Ref91924	<p>The system crashed when viewing Projects in the Hierarchy view.</p> <p>The system no longer crashes when a project has been deleted by another user during the time the current user is viewing projects in the Hierarchy view.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-165	<p>The Activity Sub-Status column needed to be added to all Activities list views.</p> <p>The system now shows the Activity Sub Status column in the Responsible (Default), Owner, and Associated list views.</p> <p>Impact on existing installation: None expected</p>

**Table 6 (Cont.) myProject Fixed Issues**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-166 Tesseract Ref 91575	<p>The Available to Suppliers flag was visible on the Attachments Manager.</p> <p>The Attachment Manager no longer displays the Available to Suppliers field to suppliers. Supplier users are also not able to see attachments that have been set to not be visible to suppliers.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-167	<p>Project briefs were not being printed.</p> <p>The system now prints all briefs on a project when selecting to print a project.</p> <p>Impact on existing installation: None expected</p>
TRUNKONEEIGHT-223	<p>An error occurred when changing Status in a Project.</p> <p>The system no longer produces an error when a user selects the Change Status and Exit action.</p> <p>Impact on existing installation: None expected</p>

**Table 7 myArtwork Fixed Issue**

<b>Defect Number</b>	<b>Description</b>
TRUNKONEEIGHT-197	<p>The sharing of User Data with myArtwork needed to be changed.</p> <p>This change switches on a facility to pass User Data from myCreations to myArtwork for users that have been assigned the myArtwork Authority Profile.</p> <p>Impact on existing installation: Some configuration must be done if myArtwork is to be switched on.</p>

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

**U.S. GOVERNMENT END USERS:** Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

#### **Value-Added Reseller (VAR) Language**

##### **Oracle Retail VAR Applications**

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
