# 1. Preface

## 1.1 Introduction

This manual is intended as a guide to help you define User Defined events in FLEXCUBE. Besides this User Manual, you can find answers to specific features and procedures in the Online Help, which can be invoked, by choosing 'Help Contents' from the *Help* Menu of the software. You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

## 1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## 1.3 Organization

This manual is organized as follows:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Building User Defined Events</i> explains how to define events in Oracle FLEXCUBE either for your own convenience or to suit the requirements of your bank.

## 1.4 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

## 1.5 Related Documents

For further information on procedures discussed in the manual, refer to the Oracle FLEXCUBE manuals on:

- Core Services
- Common Procedures

---

## 2. User Defined Events

### 2.1 Introduction

A contract that you process in Oracle FLEXCUBE goes through different stages during its life cycle. These stages are defined as Events. Every new module that you maintain has to be associated with a set of events, which will be triggered at appropriate stages during the lifecycle of the contract.

Apart from the factory shipped events, you can create your own events as per the requirements of the bank.

This chapter contains the following sections:

- [Section 2.2, "Event Details"](#)
- [Section 2.3, "Accounting Roles and Heads"](#)
- [Section 2.4, "User Defined Events"](#)

### 2.2 Event Details

This section contains the following topics:

- [Section 2.2.1, "Invoking User Defined Events Screen"](#)
- [Section 2.2.2, "Default Button"](#)
- [Section 2.2.3, "Value Date Derivation Button"](#)
- [Section 2.2.4, "Event Processing Button"](#)
- [Section 2.2.5, "Calculating the Commission on the Highest Outstanding Balance"](#)
- [Section 2.2.6, "Viewing Event Details"](#)

#### 2.2.1 Invoking User Defined Events Screen

You can define the events through the 'User defined Events' screen. You can invoke this screen by typing 'UDDEVMNT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can define events for a new module and also for existing modules in this screen.

**Main Screen**

New Enter Query

Report Module \*  
Event Code \*  
Event Description

Accounting Entries Definition No  
Advice Definition No  
UDE Advices Definition No

**Association**  
Allow Charge No  
Allow Transaction Tax No

**Liquidation**  
Allow Charge No  
Allow Transaction Tax No

Fields | Default

Input By Date Time Authorized By Date Time Modification Number  
Authorized Open

User defined events will be linked to a product and is triggered in the life cycle of a contract, which is processed under that product.

### Report Module

Specify the module for which you want to set up a user-defined event. The adjoining option list contains all the module codes available in the system. Select the appropriate one.

### Event Code

Specify the event code that you want to set up for the module.

### Event Description

Give a brief description of the event that you are defining. The description that you enter is for information purposes.

### Accounting Entries Definition

Specify the accounting entries definition. You have the following options:

- Yes
- No

### Advice Definition

Specify the advice entries definition. You have the following options:

- Yes
- No

### UDE Advices Definition

Specify the UDE advice definition. You have the following options:

- Yes
- No

## **Association**

Indicate your preferences.

### **Allow Charge**

Specify the association allow charge. You have the following options:

- Yes
- No

### **Allow Transaction Tax**

Specify the association allow transaction tax. You have the following options:

- Yes
- No

## **Application**

Indicate your preferences. These fields will not be applicable if you have specified any one of the following in the 'Report Module' field:

- CL
- CI
- LE
- MO

### **Allow Charge**

Specify the application allow charge. You have the following options:

- Yes
- No

### **Allow Transaction Tax**

Specify the application allow transaction tax. You have the following options:

- Yes
- No

## **Liquidation**

Indicate your preferences. These fields will not be applicable if you have specified any one of the following in the 'Report Module' field:

- CL
- CI
- LE
- MO

### **Allow Charge**

Specify the liquidation allow charge. You have the following options:

- Yes
- No

### **Allow Transaction Tax**

Specify the liquidation allow transaction tax. You have the following options:

- Yes

- No

### 2.2.2 Default Button

Click 'Default' button in the 'User Defined Events' screen to define the triggering parameters for the configured event.

In this screen you can enter the following details below:

#### **Module Code**

The system displays the module code here.

#### **Event Code**

The system displays the event code here.

#### **Event Trigger**

The event, which you are defining, can be triggered in either of the following ways:

- Automatic – This means that the event should be triggered automatically during EOD.
- Manual - This means that the event should be triggered manually from the 'User Defined Event' triggering screen.

#### **Value Date Derivation**

Check this box to indicate that the value date derivation is defined for a particular event.

#### **Event Processing**

Check this box to indicate the event processing is defined for a particular event.

#### **Execution Query**

Enter the query condition to select the list of accounts for the execution of the event during EOD. Input to this field will be mandatory if you choose 'Automatic' triggering of the event.

### 2.2.3 Value Date Derivation Button

Click 'Value Date Derivation' button on the 'Event Trigger' screen and invoke the 'Derivation Rule' screen to specify the value date derivation logic.

The screenshot shows a software window titled "Derivation Rule". It contains a section for defining a "Value Date Derivation Rule". This section includes input fields for "Module Code" and "Event Code", both marked as required with red asterisks. A "Default" button is located between these fields. Below them is a larger text area for the derivation rule itself, accompanied by a help icon. At the bottom of the window, there is an "Error" section with a minus sign, and two buttons labeled "X" and "E". A large empty box is also present at the bottom.

In this screen you can enter the following details:

#### Module Code

The system displays module code here.

#### Event Code

The system displays event code here.

#### Value Date Derivation Rule

Enter description about the value date derivation rule. You need to assign a value to 'L\_VAL\_DT'. For instance, 'L\_VAL\_DT:=global.application\_date'.

#### Error

Click 'X' button to execute the code. The derivation code will be validated by the system. If any checks fail, you must alter the statement so that the validation can be made successfully. Click 'E' button to view the errors.

## 2.2.4 Event Processing Button

Click 'Event Processing' button on the 'Event Trigger' screen and invoke the 'Derivation Rule' screen to assign values for processing of the event.

In this screen you can enter the following details:

### **Module Code**

The system displays module code here.

### **Event Code**

The system displays event code here.

### **Errors**

Click 'X' button to execute the code. The derivation code will be validated by the system. If any checks fail, you must alter the statement so that the validation can be made successfully. Click 'E' button to view the errors.

## 2.2.5 Calculating the Commission on the Highest Outstanding Balance

System uses UDE to calculate the commission on the highest outstanding balance of the loan and the mortgage Accounts.

You can define a UDE Highest Debit Balance Commission Event (HDBC) for computation of commission with following parameters:

- Event Trigger can be either Auto or Manual
- Apply Charge should be Yes
- Execution Query should be all accounts which satisfy the following criteria:
  - Account Status is Active
  - Outstanding Principal is greater than 0.00
- Value Date derivation rule to return the date as month-end
- This event is available at Loan and Mortgage product level.

## 2.2.6 Viewing Event Details

You can view the event details maintained in the 'User Defined Events' screen under 'Events' screen of a contract screen. You can invoke the 'Events' screen by typing 'CSDEVENT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

### Reference Number

Specify the reference number.

The system displays the following details:

- Event Number
- Event code
- Description
- Event Date
- Authorization Status
- Maker Id
- Checker Id

### 2.2.6.1 Viewing Accounting Entries

You can view the accounting entries maintained for an event in the 'Accounting Entries' screen by selecting an event and clicking on 'Accounting Entries' button in the 'Events' screen.

screen. To invoke the screen type 'CSDACENT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Accounting Entries

New Enter Query

Reference Number \* Event Number \*  
See Position Entries Event \*

Accounting Entries Overrides

Accounting Entries

1 Of 1 Go

Event	Branch	Account	Account Description	Dr/Cr	Amount Tag	Account Ccy	Foreign Currency Amount	F

Exit

### Reference Number

Specify the transaction reference number

### See Position Entries

Check this box to view currency position of the entries.

### Event

Specify the event.

### Event Number

The system displays the event number.

The following details are displayed in the Accounting Entries:

- Event
- Branch
- Account
- Account Description
- Dr/Cr
- Amount Tag
- Account Ccy
- Foreign Currency Amount
- Rate
- Local Currency Amount
- Date
- Value Date
- Txn Code

## Override Details

Click on 'Overrides' button to view the override details of the accounting entries.

The screenshot shows the 'Accounting Entries' window with the 'Overrides' tab selected. At the top, there are input fields for 'Reference Number \*', 'Event Number \*', and 'Event \*'. A checkbox labeled 'See Position Entries' is checked. Below the tabs, the 'Overrides' section contains a table with the following columns: 'Overrides', 'Override Status', 'Authorized By', and 'Auth Date Stamp'. The table currently displays one row with empty fields. Navigation controls at the top of the table show '1 Of 1' records. An 'Exit' button is located at the bottom right of the window.

### 2.2.6.2 Viewing Messages

You can view the messages by selecting an event and clicking on 'Messages' button in the 'Events' screen. To invoke the screen type 'CSDMSGVW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows the 'Message' window. At the top, there are input fields for 'Contract Reference \*', 'ESN \*', and 'Event'. Below these, the 'Messages' section contains a table with the following columns: 'Message Type', 'SWIFT Message Type', 'Medium', 'Message Status', 'Authorization Status', 'Receiver', and 'Receiver Name'. The table displays one row with empty fields. Navigation controls at the top of the table show '1 Of 1' records. A 'Print' button is located below the table. At the bottom of the window, there is a 'Message Details' section and an 'Exit' button.

The system displays the following details:

- Contract Reference
- ESN
- Event
- Message Type
- SWIFT Message Type
- Medium
- Message Status
- Authorization Status

- Receiver
- Receiver Name
- DCN

## **Message Details**

You can view the details of a message by selecting a message from the 'Message' screen and clicking on 'Message Details' button.

## **2.3 Accounting Roles and Heads**

This section contains the following topics:

- [Section 2.3.1, "Invoking Accounting Roles and Heads Screen"](#)
- [Section 2.3.2, "Amount Tag Tab"](#)
- [Section 2.3.3, "Accounting Roles Tab"](#)

### 2.3.1 Invoking Accounting Roles and Heads Screen

You can define the amount tags for accounting roles through the 'Accounting Role and Head Maintenance' screen. You can invoke this screen by typing 'UDDRLTAG' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Amount Tag	Description	Charge	Accounting	Transaction Tax	Local Currency	Local Currency Equivalence
<input type="checkbox"/>		Yes	Yes	Yes	Average	

You can specify the following parameters for the module:

- Amount Tag
- Accounting Roles

### 2.3.2 Amount Tag Tab

This tab is displayed by default when you invoke the screen.

#### Amount Tag

Specify the amount tag.

#### Description

Enter the brief description for amount tag.

#### Charge

Indicate whether the amount tag pertains to a charge or not by choosing one of the following options:

- Yes
- No

#### Accounting

Indicate whether accounting entries are required or not by choosing one of the following options:

- Yes
- No

## Transaction Tax

Indicate whether transaction tax is applicable or not by choosing one of the following options:

- Yes
- No

## Local Currency

Indicate the local currency preference by choosing one of the following options:

- Average
- Equivalent

## Local Currency Eq. Tag

Specify the amount tag for the local currency equivalent amount.

Click 'Derivation' button and invoke the 'Derivation Rule Details' screen to derive the amount and currency for the amount tag.

Here you can specify derivation logic for the following:

- Amount Rule
- Currency Rule

## Module Code

The system displays module code here.

## Amount Tag

The system displays the amount tag here.

## **Amount Rule Derivation**

You can specify the following details.

### **Amount Rule Type**

Check this box if the amount has to be derived based on a specified condition. The amount for a particular tag can be derived based on a condition.

### **Derivation Amount Rule**

If you have checked against the option 'Amount Rule Type', the system will derive the amount for the amount tag that is being defined. You can use the following as variables while creating the derivation rule:

- Account Level UDF
- SDE

You can use any of the following SDEs:

- CUSTOMER\_CATEGORY - Category of the customer of the loan
- CUSTOMER\_ID - Customer ID
- LOAN\_STATUS - Status
- ACCOUNT\_CCY - Loan account's currency
- TODAY - Today
- NEXT\_WORKDAY - Date of next workday
- PAYMENT\_VALUE\_DATE - Payment value date
- LAST\_PAYMENT\_DATE - Last payment date for the customer
- DAYS\_FOR\_NEXT\_PMNT - Days for next payment
- AMOUNT\_DISBURSED - Current disbursement amount
- COMMITMENT\_UTILIZED - Utilized part of commitment
- EMI\_AMOUNT - EMI AMOUNT
- NET\_PRINCIPAL - Non-funded amount for which the loan is applied
- TOTAL\_DUE\_AMOUNT - Sum of all the Outstanding Balances for the Customer
- LAST\_PAYMENT\_AMOUNT - Last Payment Amount for the Customer
- CURRENT\_PAYMENT\_AMOUNT - Current Amount which is Due
- PAID\_INTEREST\_AMOUNT - Total Interest Amount Paid
- INTEREST\_ACCRUED\_AMOUNT - Sum of all the Accrued Amounts for Interest
- AMOUNT\_NOT\_DISBURSED - Amount Not Disbursed
- COMMITMENT\_UNUTILIZED - Unutilized part of commitment
- TOTAL\_PRINCIPAL - Amount for which the loan is applied
- TENOR - Duration for which the loan is applied
- LOAN\_PRINCIPAL - Principal
- PRINCIPAL - Amount disbursed
- PRINCIPAL\_OUTSTAND - Principal amount outstanding
- OVERDUE\_MONTHS - OverDue Months
- TOTAL\_OVERDUE\_AMOUNT - Total Overdue amount for all components
- INS\_TENOR - INSTALLMENT TENOR
- NO\_OF\_RPMNT\_SCHS - Number of Non-Moratorium repayment schedules
- MORA\_OUTSTANDING - Moratorium Outstanding Amount
- COMPOUND\_VALUE - Amount Compounded

- TOTAL\_MORA\_AMOUNT - Total Moratorium Amount
- \_OVR\_DAYS - <Component> overdue days
- \_EXPECTED - <Component> expected amount
- \_OUTSTAND - <Component> outstanding amount
- \_CCY - <Component> currency
- \_OVERDUE - <Component> overdue amount
- \_FN\_NO\_REPAY\_SCH - <Component> number of schedules for a component if periodic
- \_NET\_PRINCIPAL - <Component> amount financed
- PROJECTED\_AMOUNT - Projected Amount
- UIDB\_DIFFERENTIAL - UIDB Differential
- BALLOON\_AMOUNT - Balloon Amount
- RESIDUAL\_AMOUNT - Residual Amount
- CAPITAL\_AMOUNT - Capital Amount
- CLOSURE\_AMOUNT - Closure Amount
- NET\_MORTGAGE - Net Mortgage Amount

Assume that you have an account-level UDF called 'OSCHGRATE'.

The derivation rule using the SDEs and UDF may be given as under.

DECLARE

L\_osprin\_amt number;

rate number;

BEGIN

L\_osprin\_amt:=(@SDE\_VAL#PRINCIPAL\_OUTSTAND);

rate:=(@UDF\_UD#OSCHGRATE);

L\_amount:=rate \* L\_osprin\_amt;

END

### **Amount Rule Error Description**

Enter a brief description about amount rule error that should be displayed in case the derivation fails.

### **Currency Rule Derivation**

The currency can either be derived from the existing account currency or can be maintained as a UDF field in the account or it can be hard-coded in the 'Currency Rule Definition' screen.

### **Currency Rule Type**

Check this box if the currency for a particular amount tag has to be derived based on the derivation rule.

### Derivation Currency Rule

Specify the rule based on which the system should derive the currency for the amount tag. You need to assign a value to 'L\_CCY'. For instance, the rule may be given as under.

```
BEGIN

SELECT currency

INTO    l_ccy

FROM    cltb_account_master

WHERE   account_number = p_acc_no

AND     branch_code=p_branch;

END;
```

### Currency Rule Error Description

Enter a brief description about currency rule error that should be displayed in case the derivation fails.

## 2.3.3 Accounting Roles Tab

Click 'Accounting Roles' tab in the 'Accounting Role and Head Maintenance' screen.

Role Code	Description	Role Type
		Asset

In this screen you can enter the following details:

#### Role Code

Specify the role code.

#### Description

Enter a brief description about role code.

#### Role Type

Select the role type from the adjoining drop-down list. The following values are available:

- Asset
- Liability
- Income
- Expense
- C Asset
- C Liability
- Customer

## 2.4 User Defined Events

This section contains the following topics:

- [Section 2.4.1, "Triggering User Defined Events Automatically"](#)

### 2.4.1 Triggering User Defined Events Automatically

You can add the user defined event batch to the mandatory programs to be run for the module, using the 'Mandatory Batch Program Maintenance' screen. You can invoke this screen by typing 'EIDMANPR' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

**Mandatory Batch Program Maintenance**

New Enter Query

Branch \* Function Identification \* Sequence Number Description

Module \*

End Of Cycle Group:
 

- ☐ Transaction Input
- ☐ End of Transaction Input

Number Of Days: Run Date: Job Code: Description:

**Predecessors**

Predecessors *

**Fields**

Input By Date Time	Authorized By Date Time	Modification Number	Authorized / Open
			<input type="checkbox"/> Authorized <input type="checkbox"/> Open

#### Module

Choose the module code from the adjoining option list.

### Function Identification

Specify 'UDBATEVT' as the batch that needs to be run. You can also select this value from the adjoining option list.

### End Of Cycle Group

Select the option 'End Of Transaction Input'.

### Predecessors

You need to add the following batches as predecessors to the 'UDBATEVT' batch:

- CL batch (CLBATCH)
- Islamic CL batch (CIDBATCH)
- Leasing batch (LEDBATCH)
- Mortgage batch (MODBATCH)

*For further details about this screen, refer the chapter 'Setting- up Mandatory Programs for EOD' in the AEOD User Manual.*

This batch fetches the list of user defined events of the following modules for which the event triggering is set as 'Automatic':

- CL
- Islamic Financing
- Mortgages
- Leasing

It fetches valid accounts associated with the event by the executing the query defined for the event in the 'Event Trigger' screen. The settlement account and branch are defaulted from the settlement details maintained for the account. If these details are not maintained, they will be defaulted from the settlement details maintained for the 'Principal' component.

The system triggers the derivation rule maintained for the event to arrive at the value date of the event. The system then posts accounting entries to the respective GLs using the value date derived. The system also derives the amount and currency for each amount tag of the accounting entries defined for the event. The system allows you to link only payment advice 'CR\_ADV, DR\_ADV' to the user defined event. So if linked to an account, this advice will be generated.

---
