Standalone Scheduler Deployment in Websphere Oracle FLEXCUBE Universal Banking Release 12.1.0.0.0 [October] [2015]

Table of Contents

1.	STANDALONE SCHEDULER FULL DEPLOYMENT	1-1	

1. Standalone Scheduler Full Deployment

- 1. Launch Oracle FLEXCUBE Universal Banking Solution Installer.
- 2. Click on 'Next' to display the screen below .

- 3. Select 'Scheduler'.
- 4. Click 'Next' to display the screen below.

Oracle FLEXCUBE Universal Installer

Welcome To Oracl Choose Oracle FLE	Welcome To Oracle FLEXCUBE Choose Oracle FLEXCUBE Component for installation.						
Build Application Database Deploy Application							
Operating System	Windows 👻						
Application Server	Vebsphere Vessphere Vessphere						
Log		Back	Next Exit				

- 5. Select 'Deploy Application'.
- 6. Specify the following details:

Operating System

Select the server's operating system in which you are installing the FCUBS application. Select the appropriate one from the adjoining drop-down list.

Application Server

Select 'Websphere' from the adjoining drop down list.

Database Server

Select the database server in which you are installing the FCUBS application. Select the appropriate one from the adjoining drop-down list.

SelectSelectWebsphere

7. Click on 'Next' to display the screen below.

	Test Connection					
Type of Deployment	Full Deployment 💌					
Log	Back	Next Exit				

8. Specify the following details:

Admin IP

Not applicable.

Admin Port

Not applicable.

Admin UserName

Specify the appropriate admin username of the websphere application server.

Admin Password

Specify the appropriate admin password of the websphere application server.

Type of Deployment

Select 'Full Deployment'.

9. Click on 'Test Connection' to test the connection with the application server. On successful connection, the following message will be displayed.

	×
nnection successful	
ОК	
	nnection successful

10. Click on 'OK' and click on 'Next' to display the screen below.

Oracle FLEXCUBE Universal Installer

Application deployment Provide the Application Details For the Deployment of EAR								
WAR Path	/Please use the browse button/							
Property File Path								
Application Name								
Application Context								
	Mange Resources							
Log		Back	Next Exit					

11. Specify the following details:

WAR Path

Select the application WAR to be deployed using the browse button.

The Application WAR path cannot be copied and pasted on to the text box, thereby demanding the use of the browse button to the select the WAR.

Property File Path

If the property file is internal to the application EAR, it gets displayed here on selection of EAR path. If the property file is external, specify the location. You can use the directory button to browser and select the directory.

Application Name

Application name gets displayed on selection of EAR path.

Application Context.

Application context gets displayed on selection of EAR path.

Manage Resources

Not Applicable for websphere application server.

12. Click 'Next' to display the screen below.

Soracle FLEXCUBE Universal Installe	r		
Oracle FLEXCUBE Unive	ersal Banking		ORACLE
Application deployment			
Provide the Application Details For the	he Deployment of EAR		
Application Name		Get	Details
Status			
Cell Name			
Node Name			
Target Type	Server	•	
Server Name			
Cluster Name		1	
Log	B	ack	Next Exit

13. Specify the following details:

Application Name

Not applicable for application full deployment.

Status

Not applicable for application full deployment.

Cell Name

Specify the appropriate cell name.

Node Name

Specify the appropriate node name.

Target Type

Select the appropriate target type.

Server Name

Specify the appropriate server name if the selected target type is 'Server'.

Cluster Name

Specify the appropriate cluster name if the selected target type is 'Cluster'.

The values fed in the above screen are not validated at the screen level as a result of a limitation and hence, Specify accurate information.

14. Click 'Next' to display the screen below.

🛃 Oracle FLEXCUBE Universal Installer	- • •

Application Full Deployment Current screen Displays the status of Applications being deployed.	
Start Deployment	
Log	Next Exit

15. Click 'Start Deployment' to begin the process of application deployment.

16. Click 'OK' for the pop up message and following screen is displayed:

🛃 Oracle FLEXCUBE Universal Installer	- • ×
Oracle FLEXCUBE Universal Banking	ORACLE
Application Full Deployment Current screen Displays the status of Applications being deployed.	
Application FCUBSApp123 deployed successfully.	
Start Deployment	
Log	Next Exit

Below additional configuration is required if the Scheduler EAR is deployed on a profile/server different from FCUBS EAR profile/server.

1. Create custom property in both FCUBS and Scheduler application servers.

In the administrative console, click Servers > Server Types > WebSphere application servers > server_name > Java and Process Management > Process definition > Java virtual machine > Custom properties > New.

On the Custom Properties settings page, define the custom property:

For Name, specify com.ibm.websphere.orb.uniqueServerName.

For Value, specify true.

Click OK.

Click Save on the console task bar.

Restart both application servers.

 Generate EJB stub for ELCMEJB.jar and deploy it as shared library in Scheduler application server.

Steps to generate EJB stub.

1. Navigate to bin folder of application server.

Ex: /scratch/was/was855/IBM/WebSphere/AppServer/bin

2. Run createEJBStubs.sh from bin folder.

sh createEJBStubs.sh <Source EAR Path> -newfile <Destination Path>

Ex: sh createEJBStubs.sh /scratch/work_area/DEV/UBSITR2/APPDEBUGS/FCUBSAppITR2.ear -newfile /scratch/work_area/DEV/UBSITR2/APPDEBUGS/FCUBSAppITR2_STUB.ear

Above command generate the EJB stubs in destination path specified.

Extract the ELCMEJB.jar from destination and deploy it as shared library in Scheduler application server.

Steps to create and deploy shared library.

- 1. Click Environment > Shared libraries in the console navigation tree.
- 2. Select a shared library scope.
- 3. Click New.
- 4. Configure the shared library.

 \rightarrow Provide the name and description for shared library.

→ Provide ELCMEJB.jar path in classpth.

Ex: /scratch/work_area/DEV/UBSITR2/ELCMEJB.jar

5. Click on Apply and Save.
