

SOA Suite Setup for BPEL Process Flow
Oracle FLEXCUBE Universal Banking
Release 12.1.0.0.0
[October] [2015]

Table of Contents

1. PREFACE	1-1
1.1 BACKGROUND	1-1
1.2 AUDIENCE	1-1
1.3 ORGANIZATION	1-1
1.4 ACRONYMS AND ABBREVIATIONS	1-1
2. REPOSITORY CREATION UTILITY (RCU)	2-1
2.1 INTRODUCTION	2-1
2.2 RUNNING RCU UTILITY	2-1
3. ORACLE WEBLOGIC 11GR1 (10.3.6).....	3-1
3.1 INTRODUCTION	3-1
3.2 DOWNLOAD URL FROM ORACLE	3-1
4. ORACLE SOA SUITE 11GR1(11.1.1.7).....	4-1
4.1 INTRODUCTION	4-1
4.2 DOWNLOAD URL FROM ORACLE	4-1
5. DOMAIN CONFIGURATION WITH ORACLE SOA SUITE	5-1
5.1 INTRODUCTION	5-1
5.2 NEW DOMAIN CONFIGURATION	5-1
6. ORACLE HTTP SERVER INSTALLATION AND CONFIGURATION.....	6-1
6.1 INTRODUCTION	6-1
6.2 INSTALLATION & CONFIGURATION	6-1
7. GENERATING SELF SIGNED CERTIFICATE AND CONFIGURING SSL	7-1
7.1 ORAPKI UTILITY TO CREATE WALLET AND SELF SIGNED CERTIFICATE.....	7-1

1. Preface

1.1 Background

This document provides an overview of configuring SOA suite for Oracle FLEXCUBE Universal Banking BPEL process deployment.

Refer to the Oracle documentation for HA and other configuration patterns.

1.2 Audience

The audience for this document will be the development groups of BPEL process flows FLEXCUBE Universal Banking.

1.3 Organization

This manual is organized as follows:

- The chapter 2 (Repository Creation Utility (RCU)) guides you through the use of repository creation utility
- Subsequent chapters contain implementation specific information

1.4 Acronyms and Abbreviations

Acronym/Abbreviation	Description
BPEL	Business Process Execution Language
HA	High Availability

2. Repository Creation Utility (RCU)

2.1 Introduction

You can use Oracle Repository Creation Utility (RCU) to create schemas that are required for SOA suite installation.

Refer to the Oracle certification matrix for qualified databases.

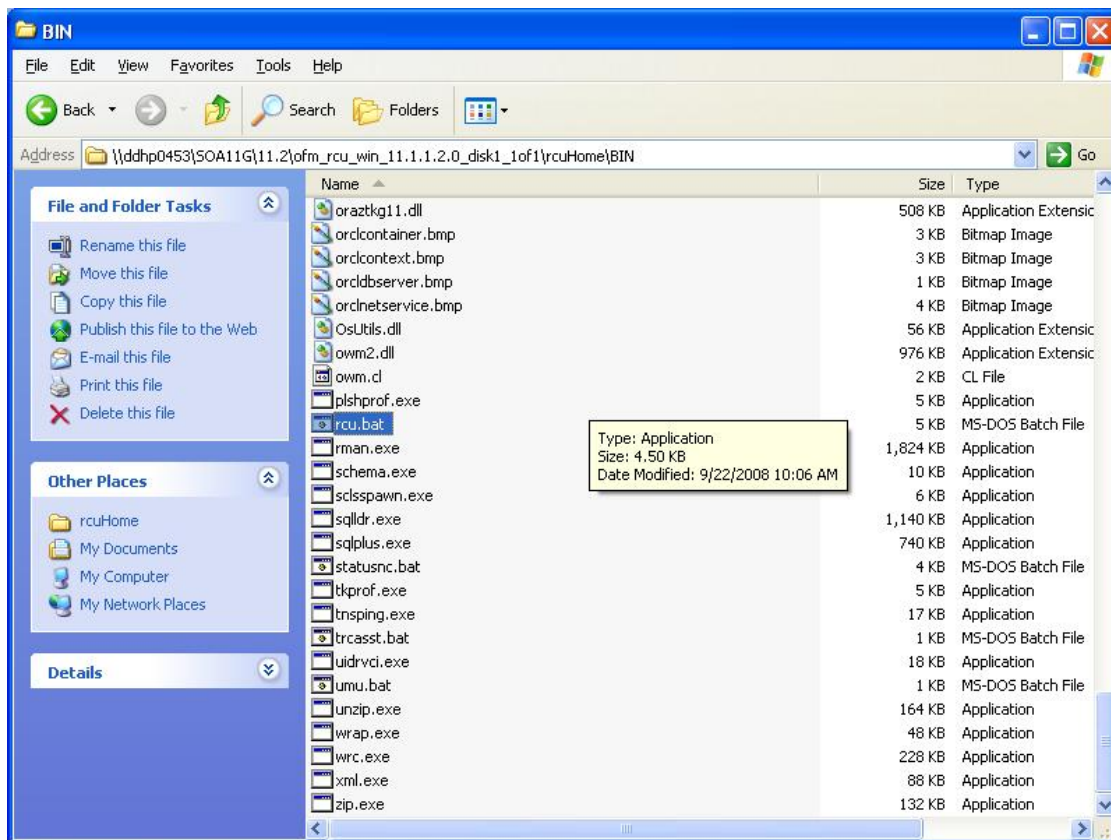

2.2 Running RCU Utility

For running RCU utility, follow the steps given below.

1. Download the RCU utility from the following URL.

http://download.oracle.com/otn/nt/middleware/11g/ofm_rcu_win32_11.1.1.2.1_disk1_1of1.zip

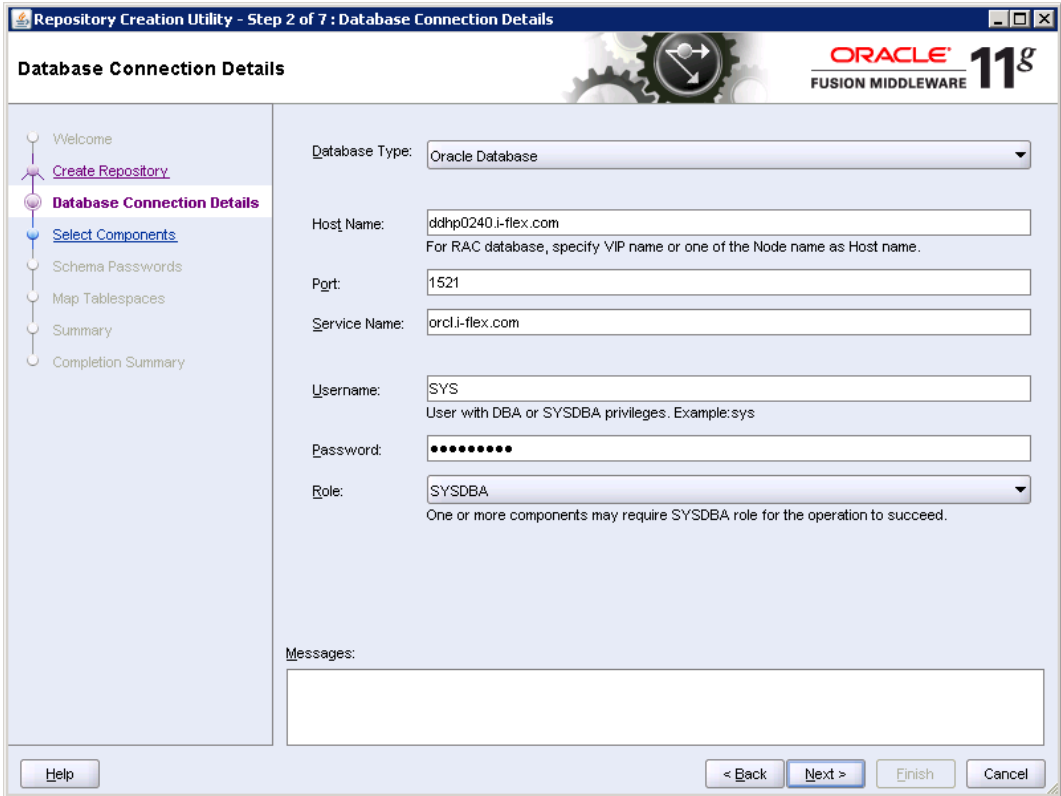

2. Unzip the contents into a folder.

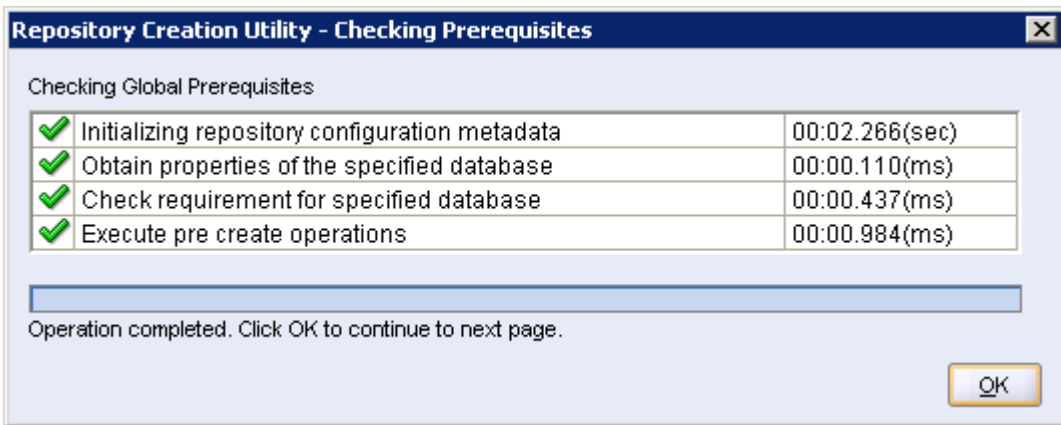

3. Run the *rcu.bat* from the extracted folder.

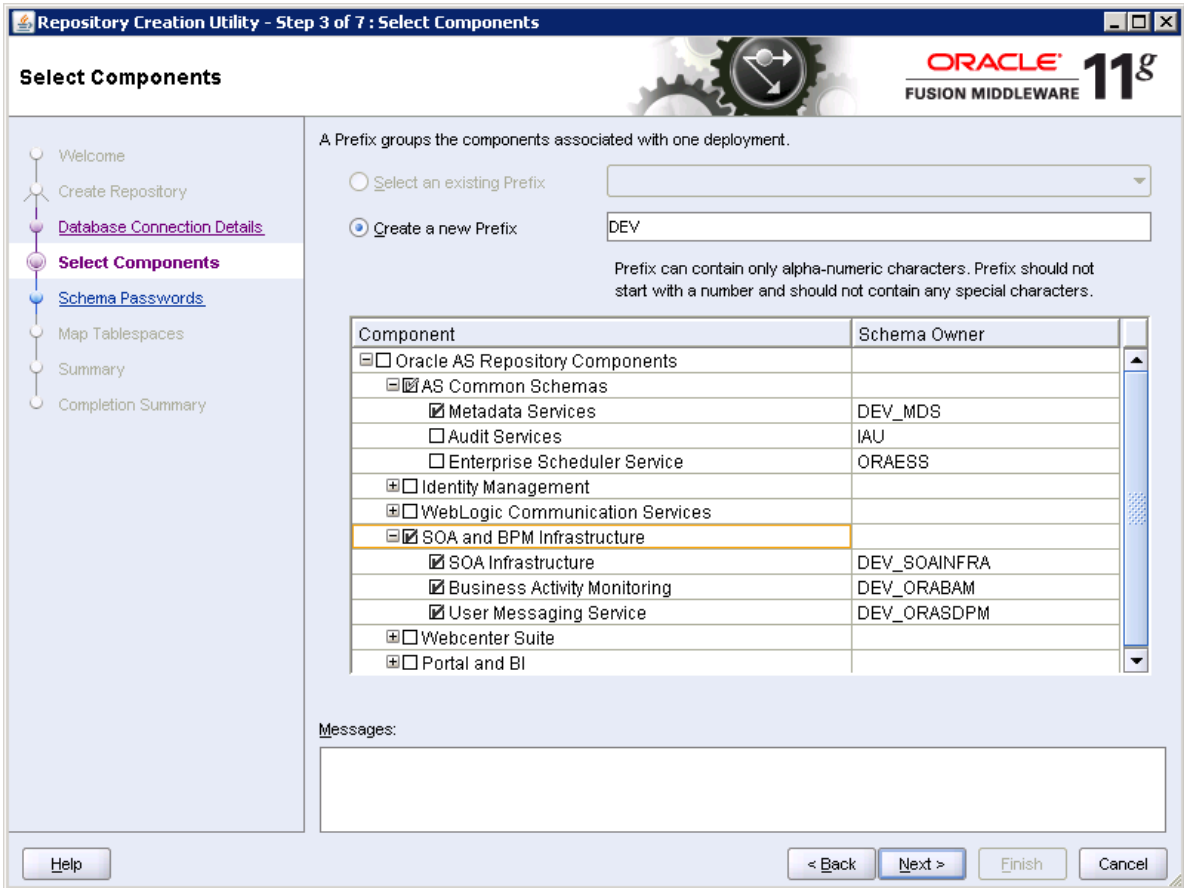

4. Select 'Create Repository' option and click 'Next' button.

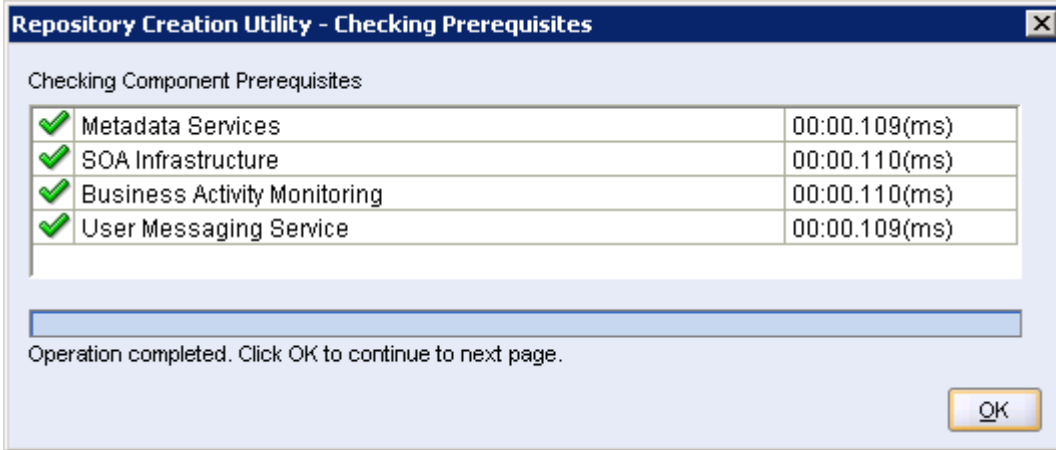

5. Provide oracle database connection properties. SYS credentials are required. Once you have specified the details, click 'Next' button.

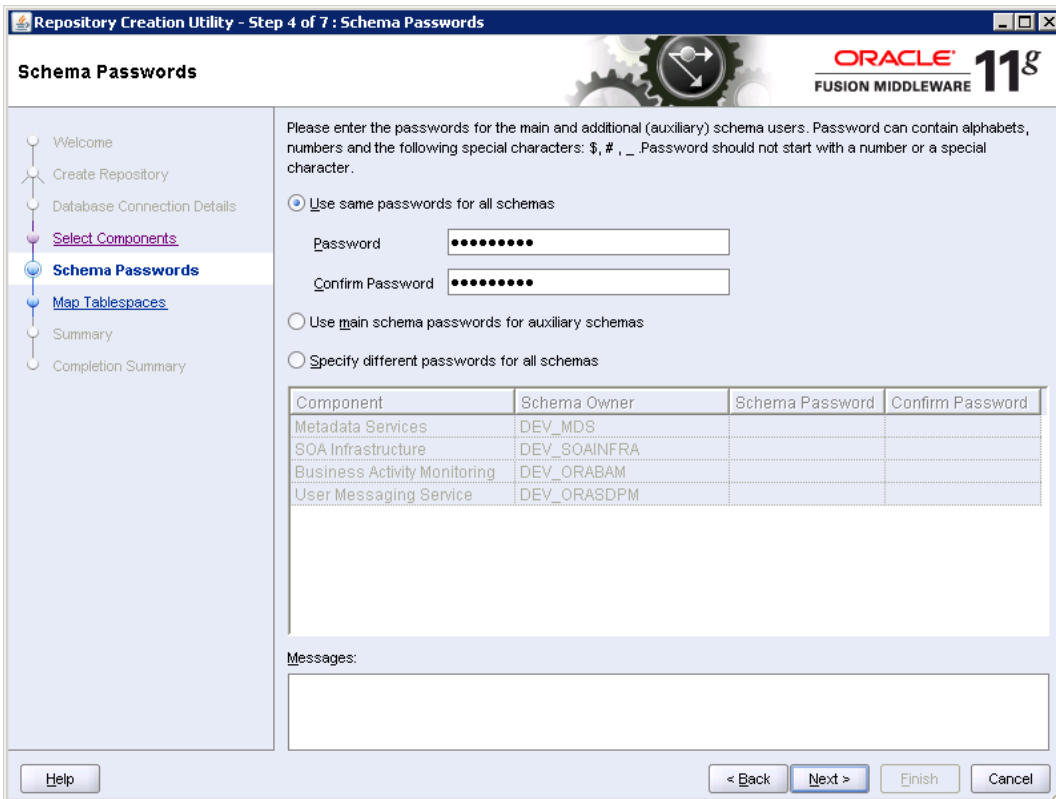

6. Create a new prefix in order to add multiple SOA schemas in the same instance.
7. On selecting SOA & BPM Infrastructure, by default 'AS Common Schemas' and 'Metadata Services' check-boxes are checked. Do not uncheck these options.
8. If you do not wish to use 'Business Activity Monitoring', you may uncheck it.

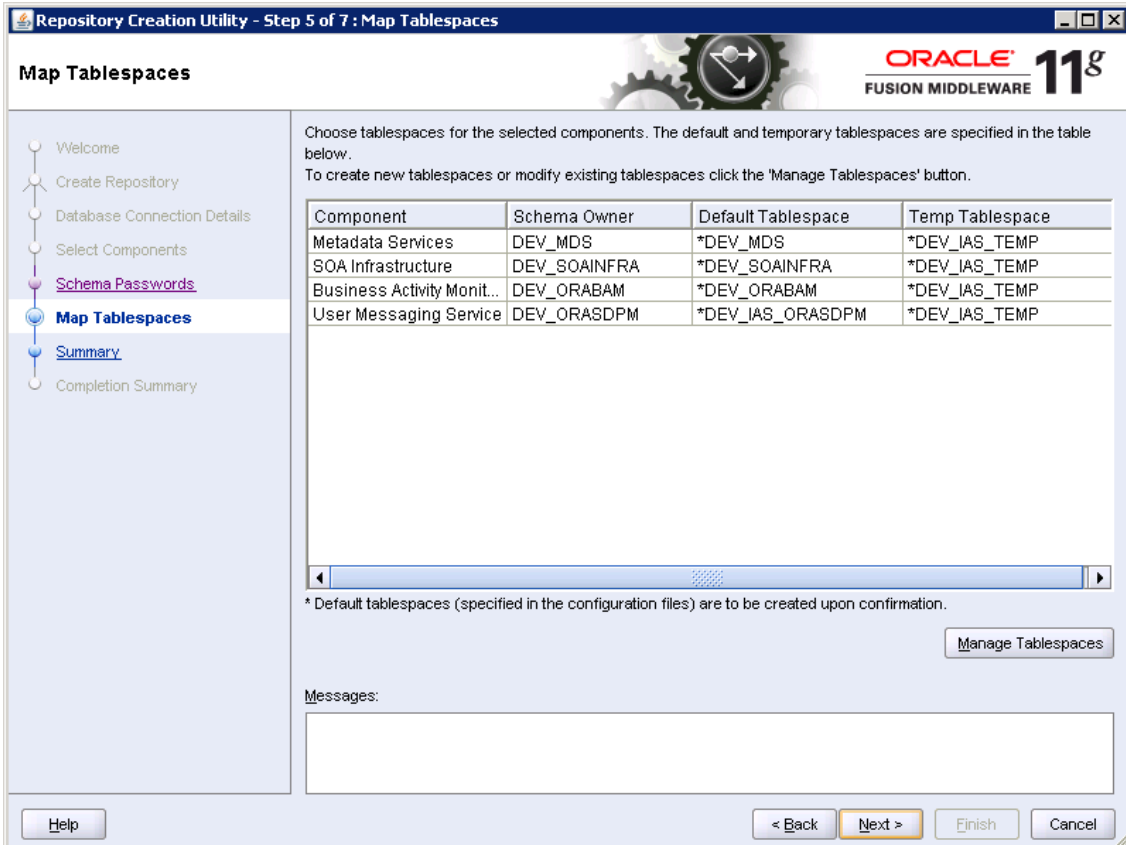

Click 'OK'.

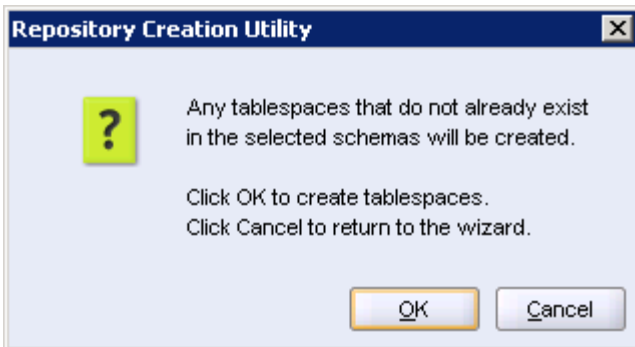

Note: It is important to remember the password or passwords that you enter during the process.

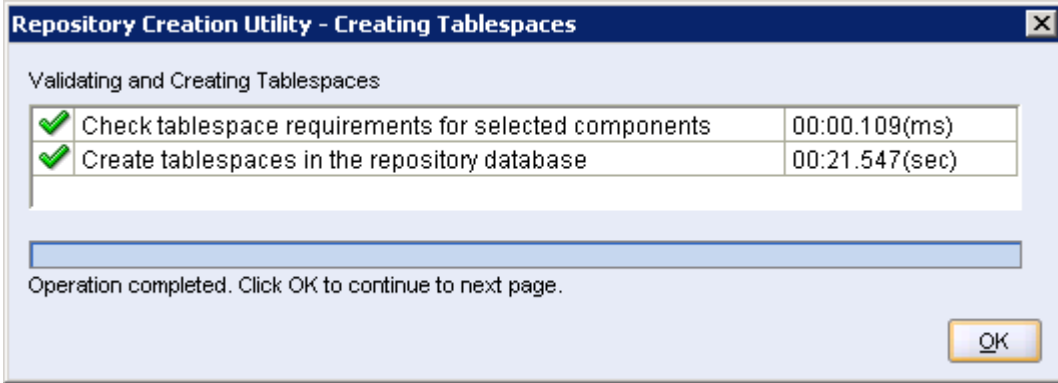

9. Specify the passwords and click 'Next' button.

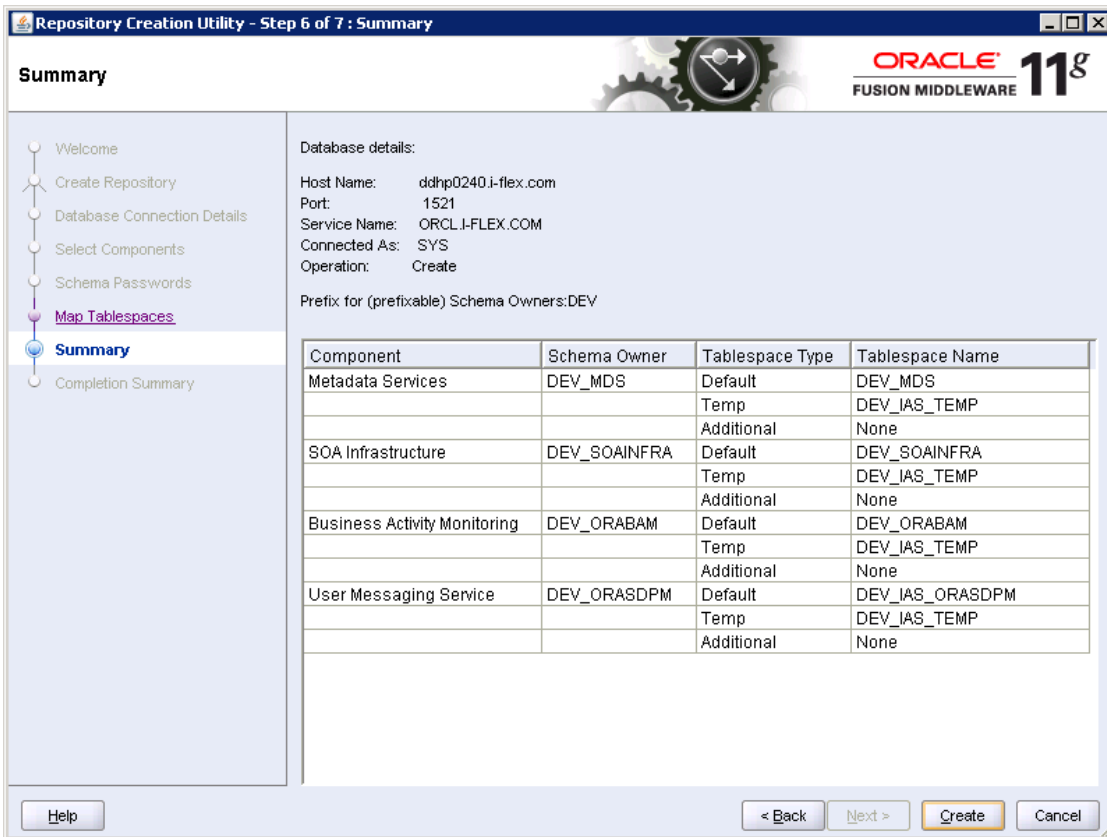

10. Click 'Next'.

11. Click 'OK'.

12. Tablespaces creation.

13. Summary .

14. Completion Summary

3. Oracle Weblogic 11gR1 (10.3.6)

3.1 Introduction

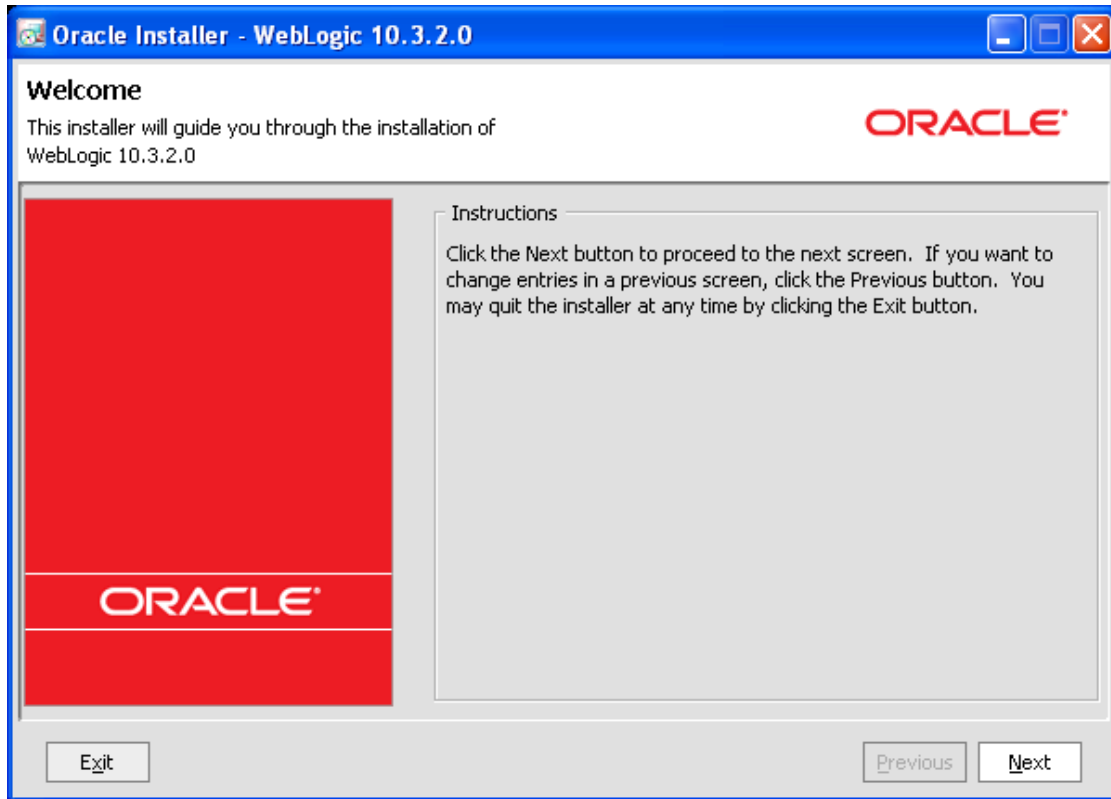

Oracle Weblogic 11gR1 I is the j2ee container for soa suite

The version required is 10.3.6

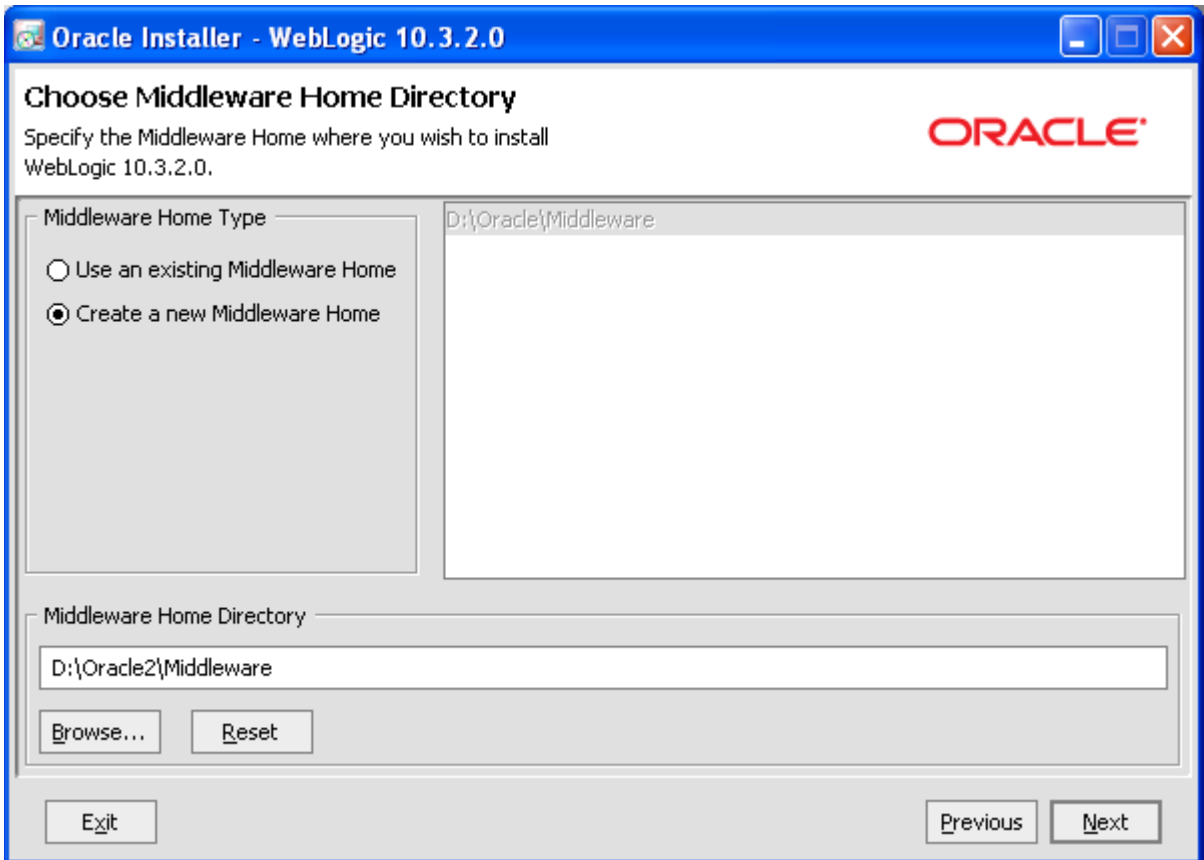

3.2 Download URL from Oracle

1. http://www.oracle.com/technology/software/products/ias/htdocs/wls_main.html
2. Download based on your needs (Windows / Linux / Generic)
3. The installation process might slightly vary depending on the platform OS
4. This step may be skipped if the weblogic installation is available
5. Run the <...wls1032_win32..>.exe

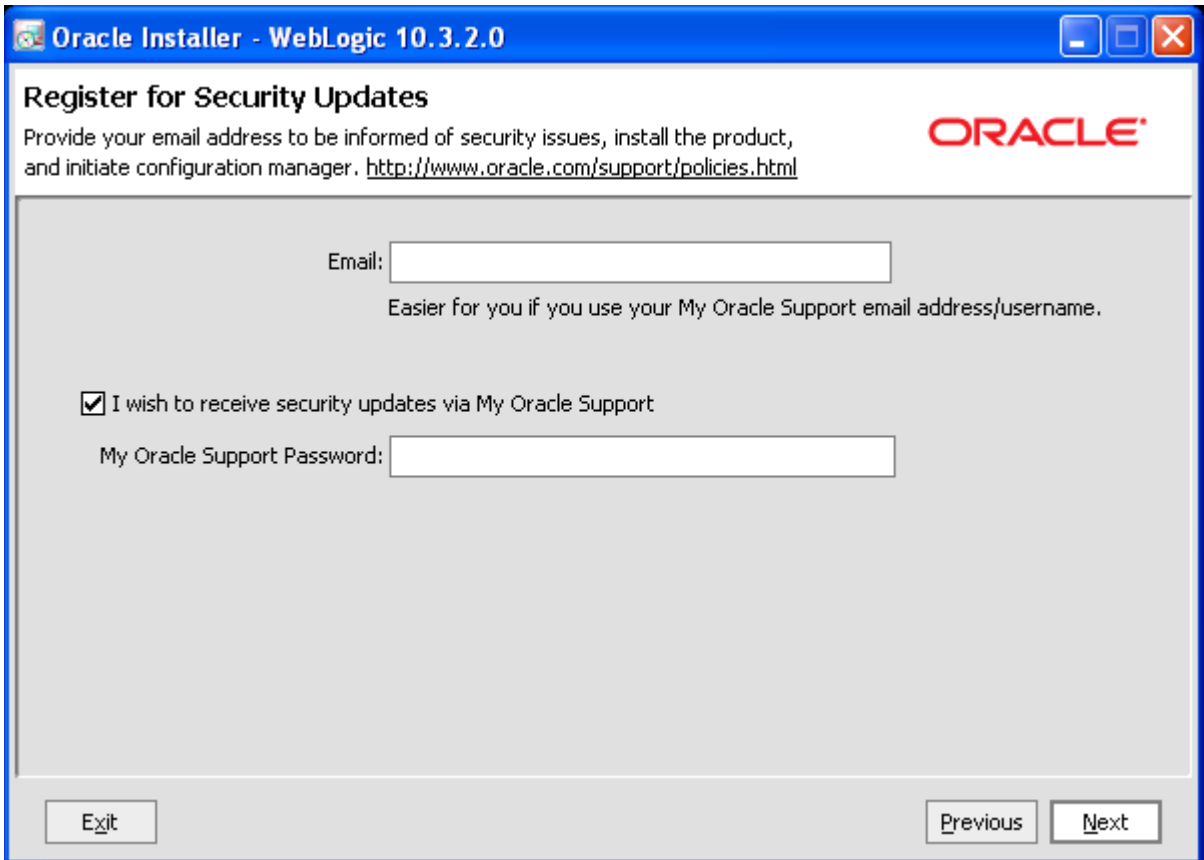

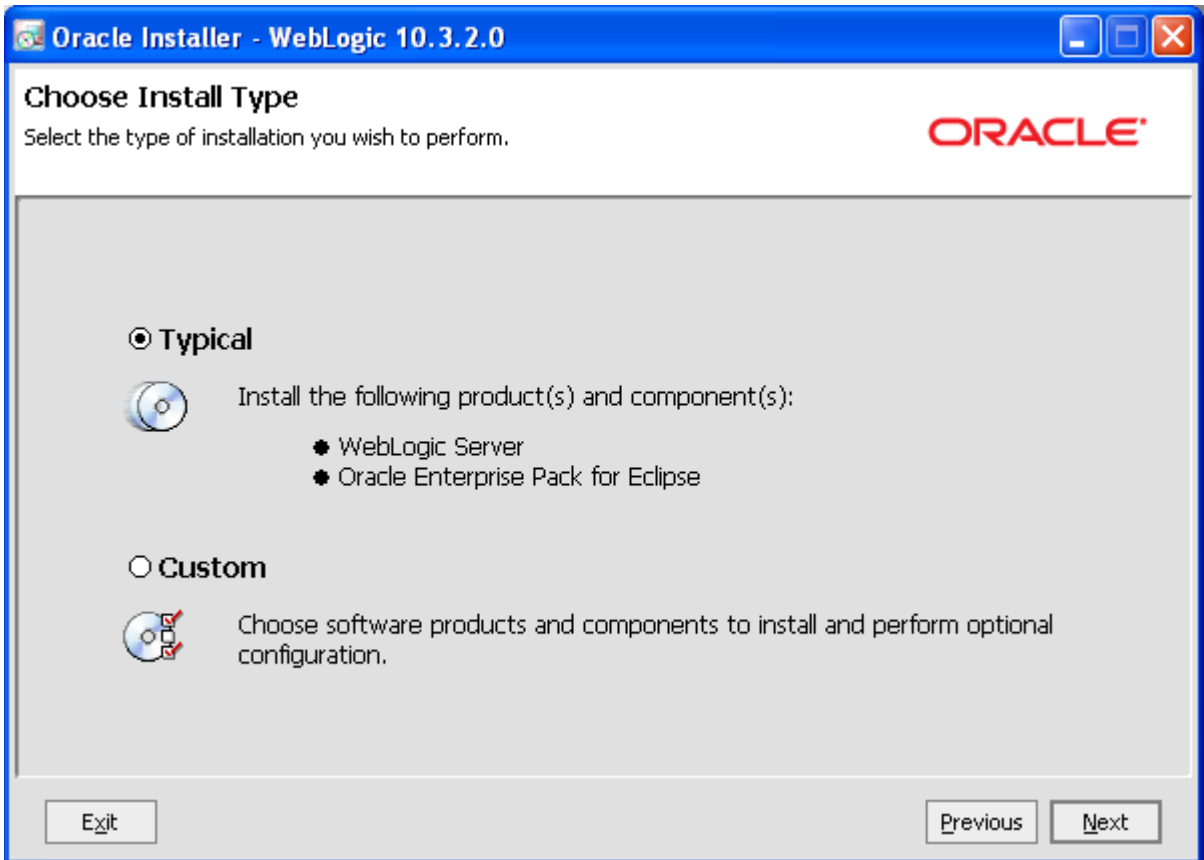

6. Click 'Next'.

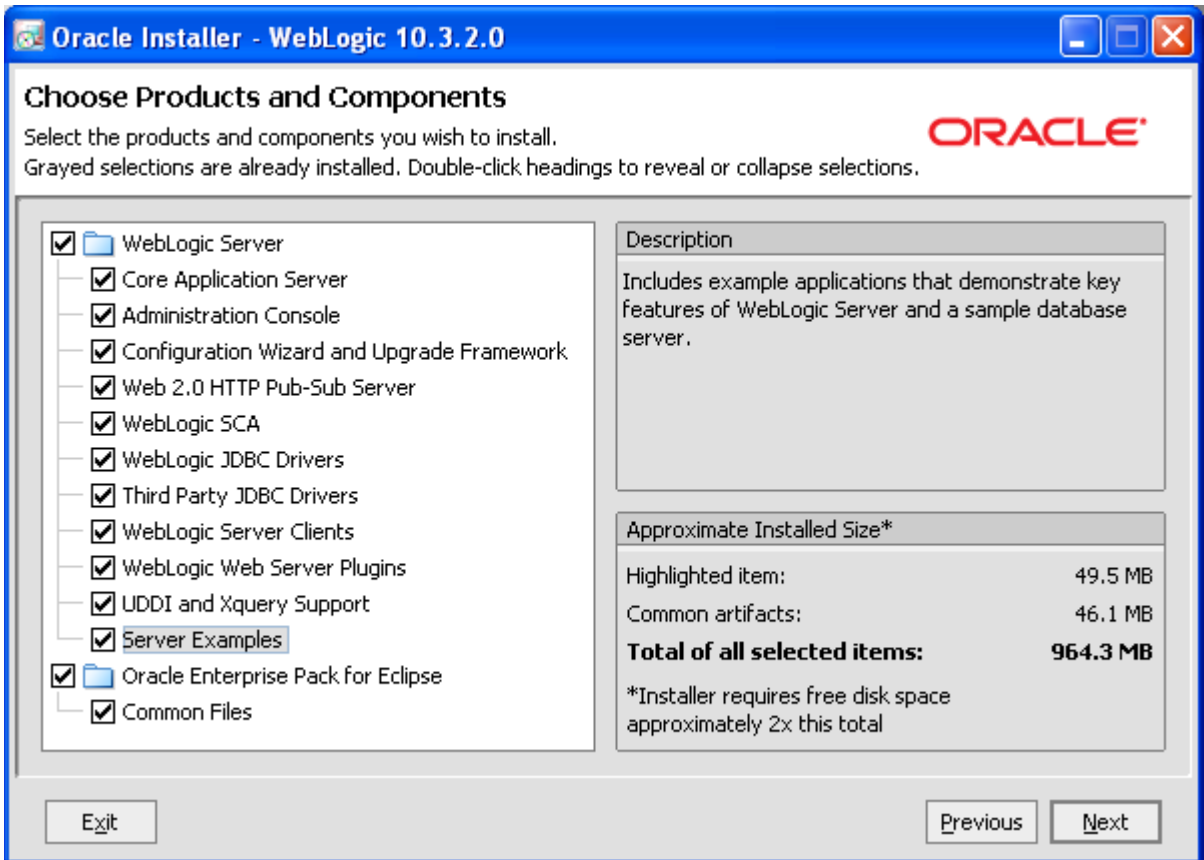

7. Specify the middleware home the same will be used during SOA suite installation.

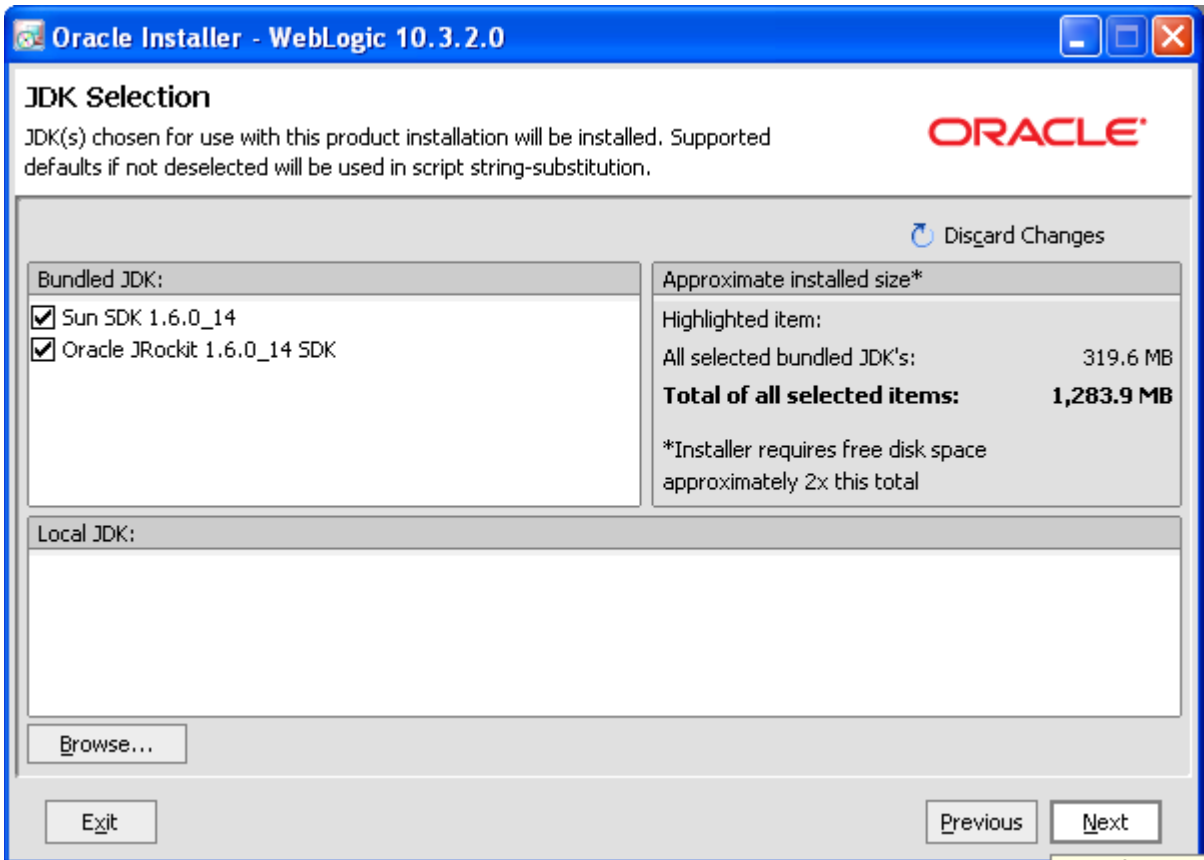

8. Register for security updates if needed

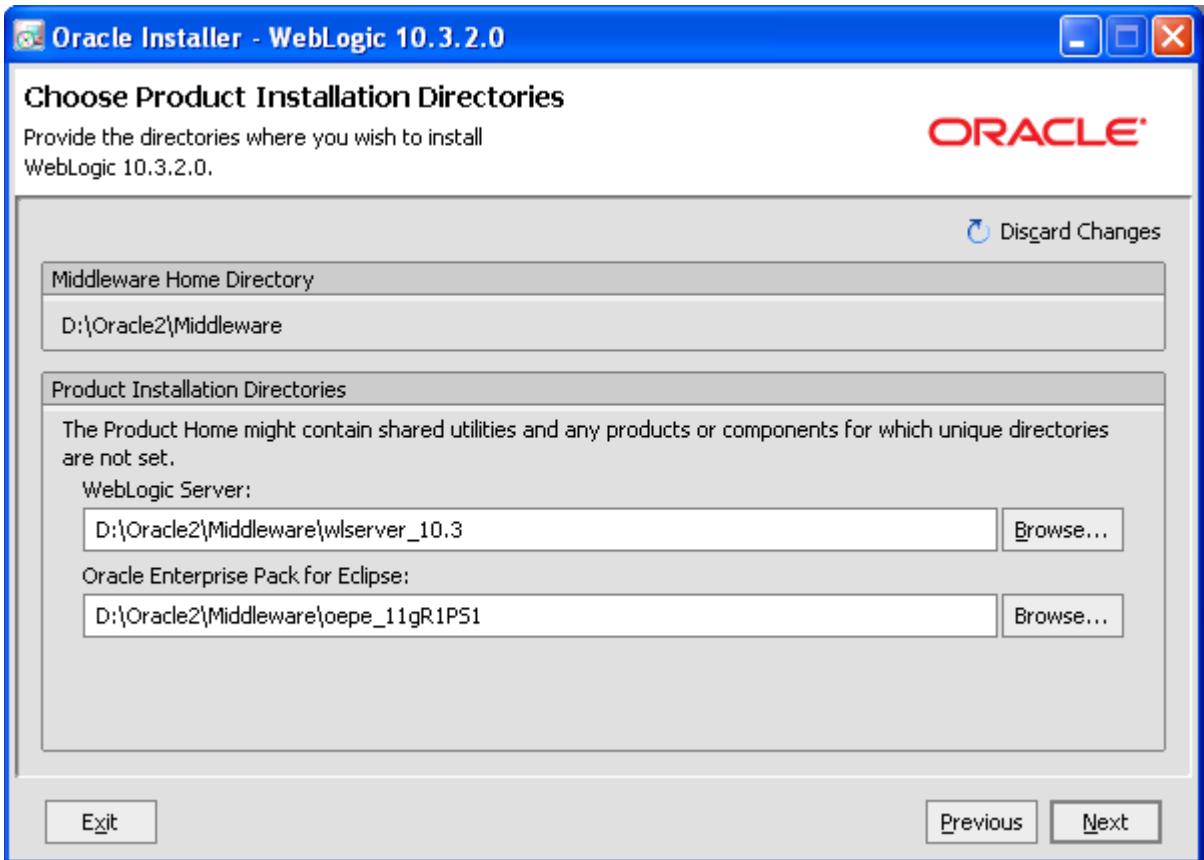

9. Choose typical or custom to customize installation

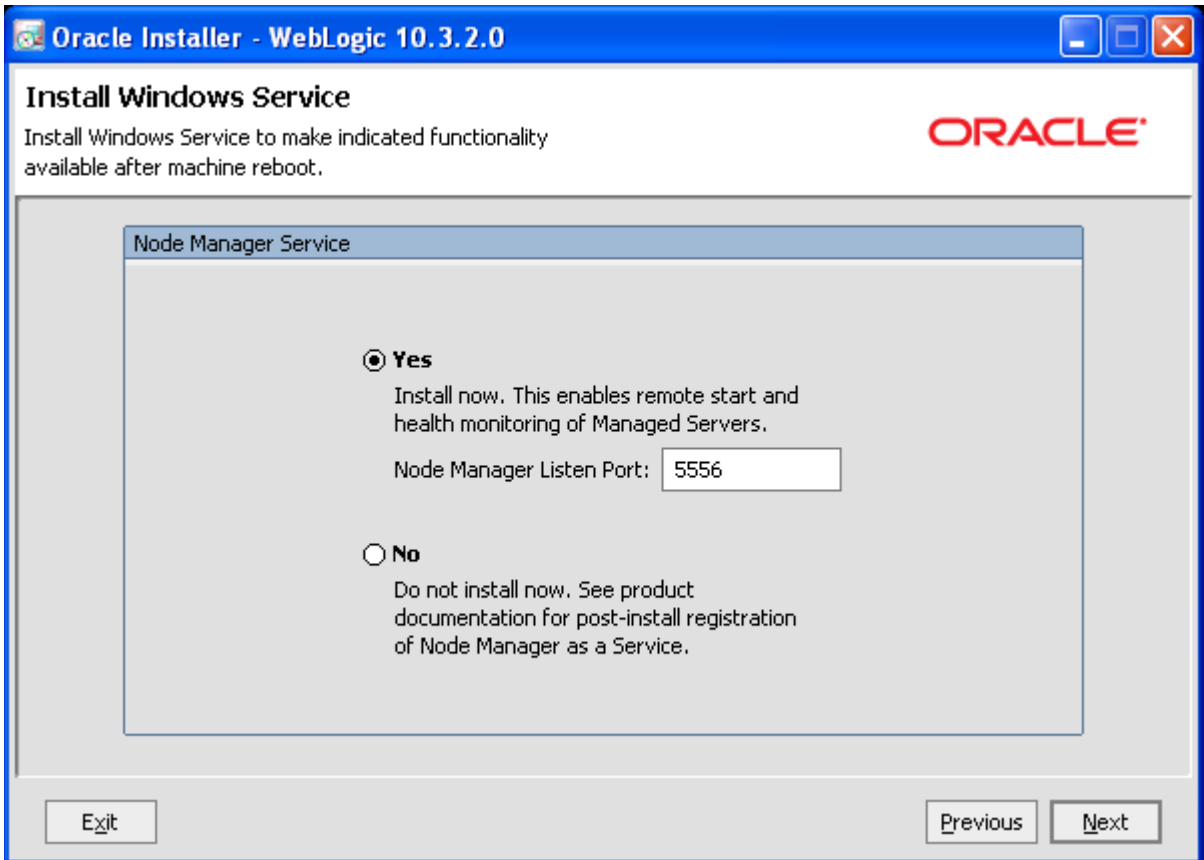

10. If custom , customize installation

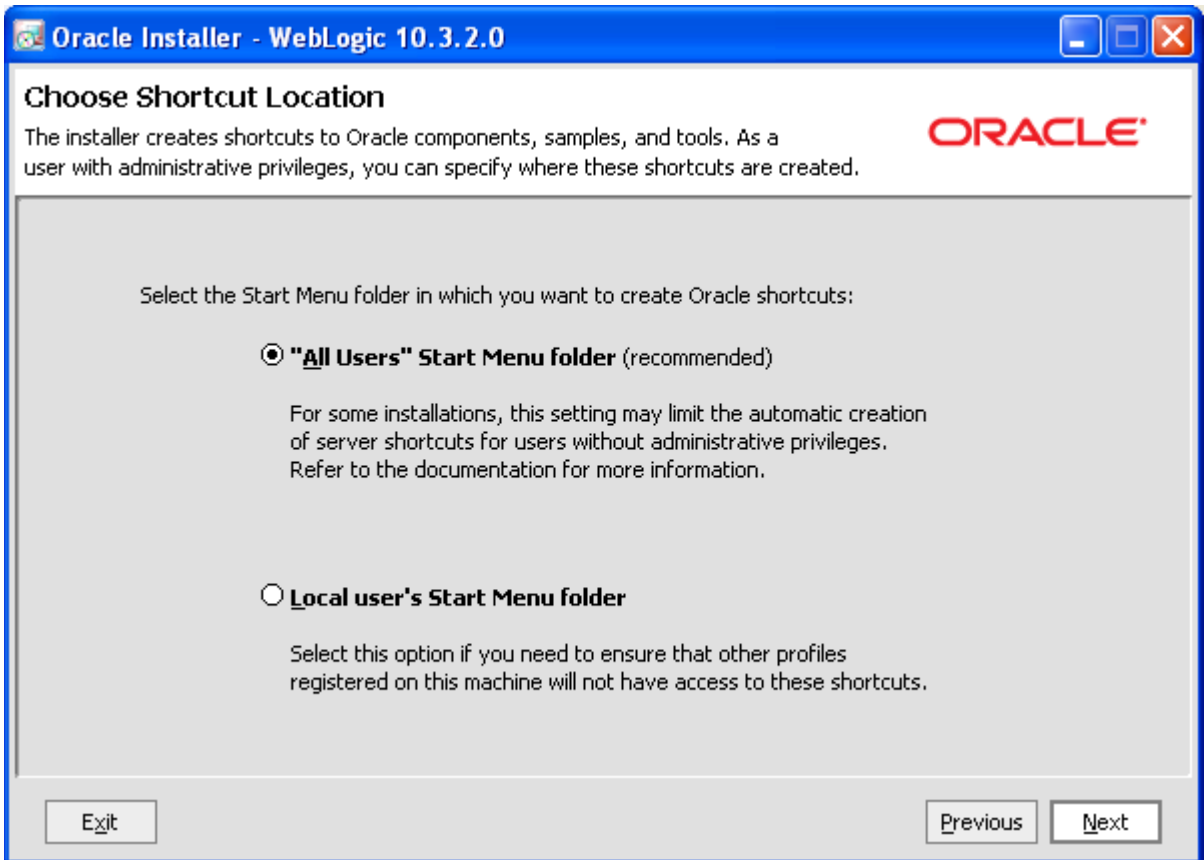

11. Select Bundled JDK that is needed

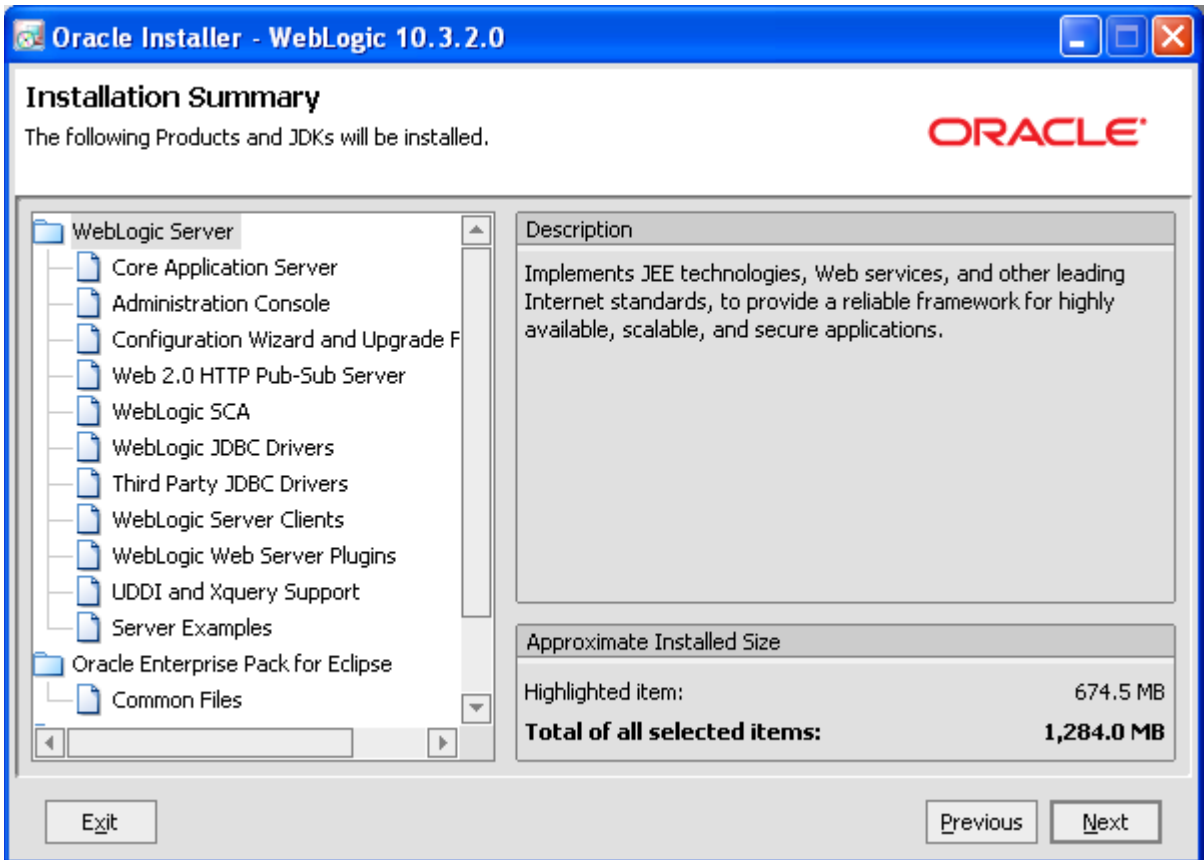

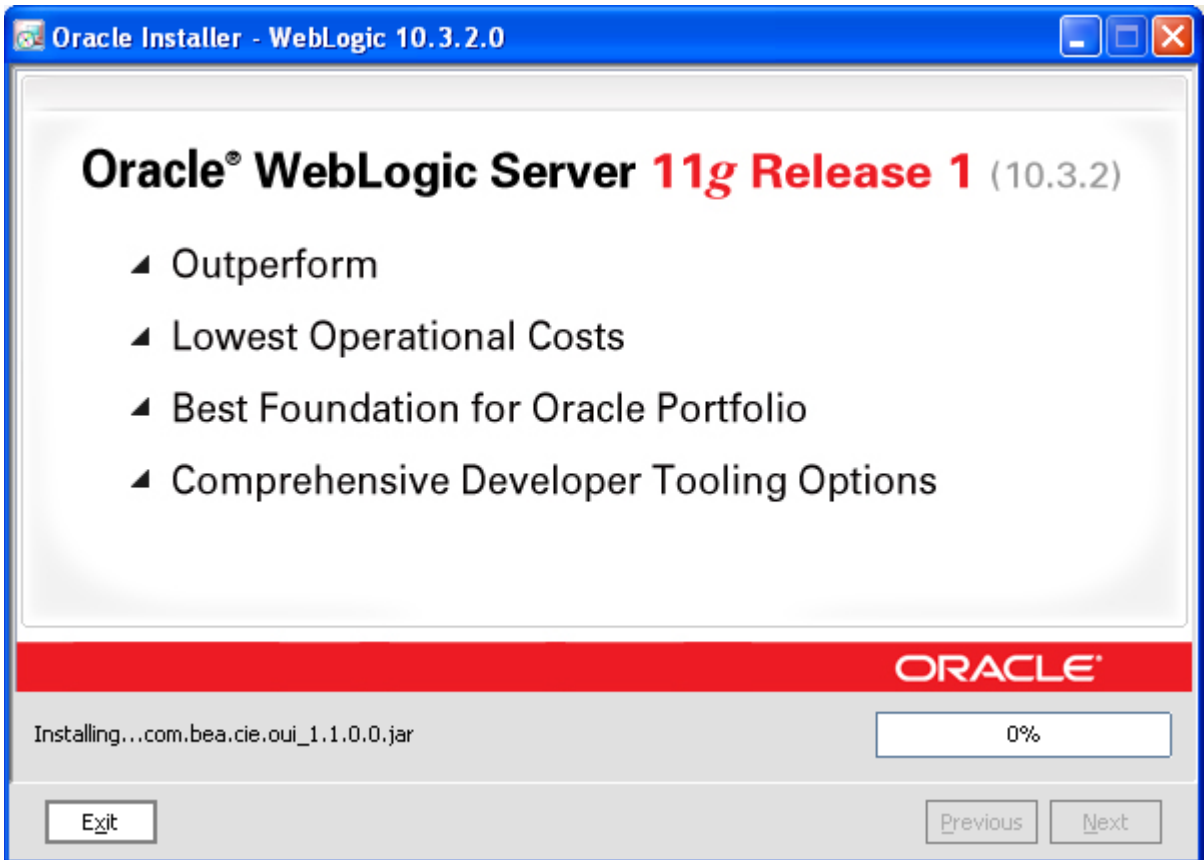

12. Click 'Next'.

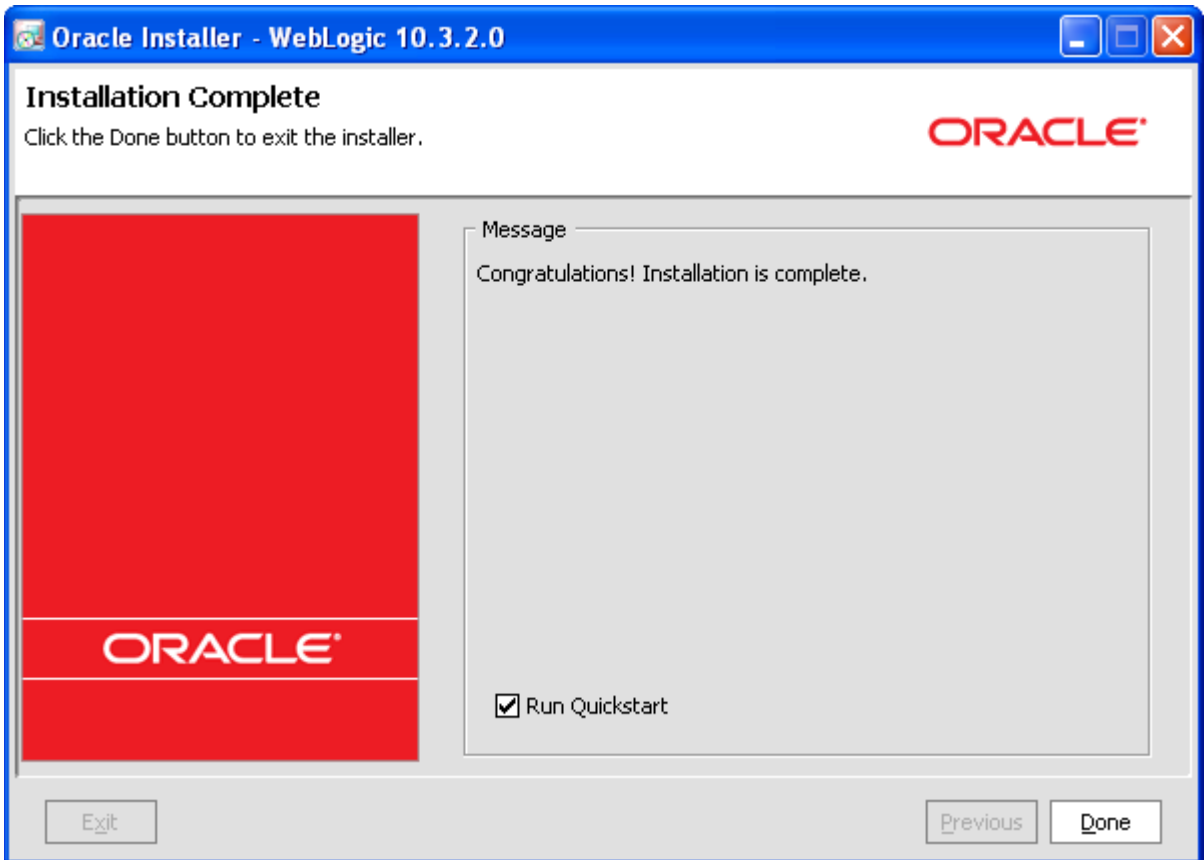

13. Install Node manager if remote start and monitoring is required needed.

4. Oracle SOA Suite 11gR1(11.1.1.7)

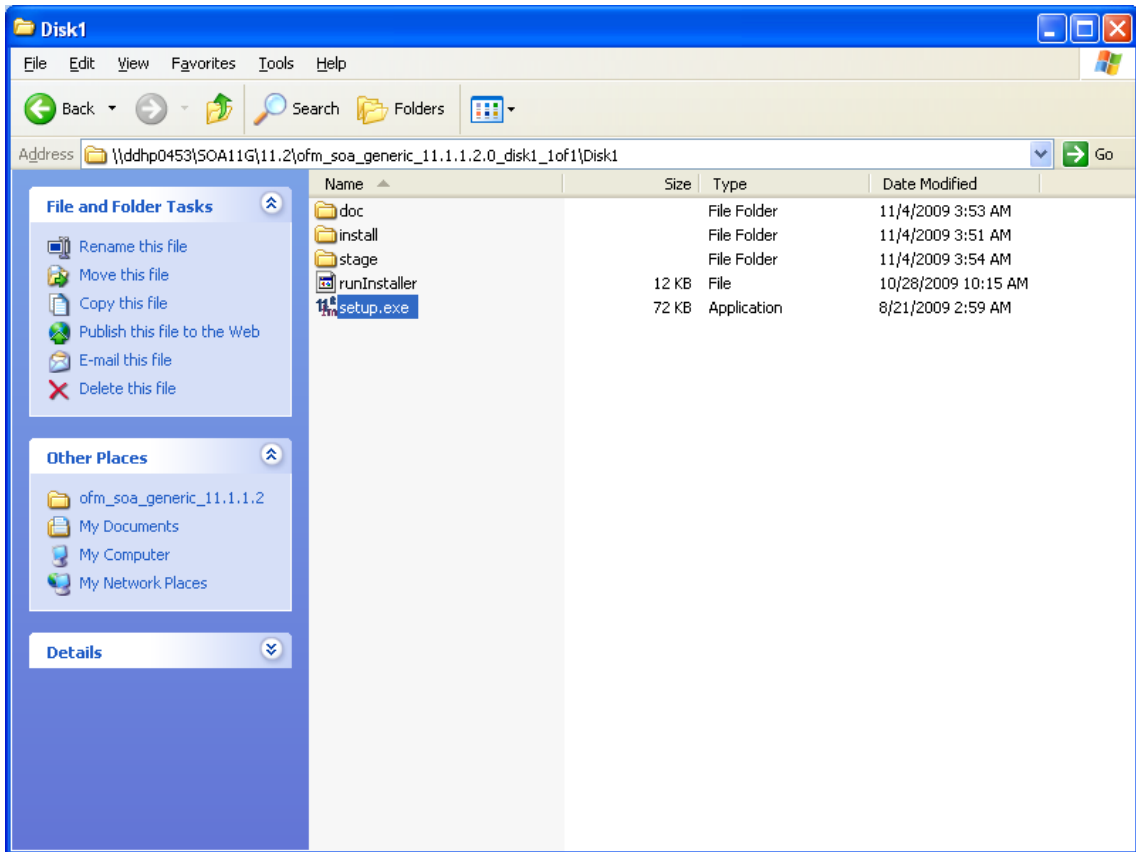

4.1 Introduction

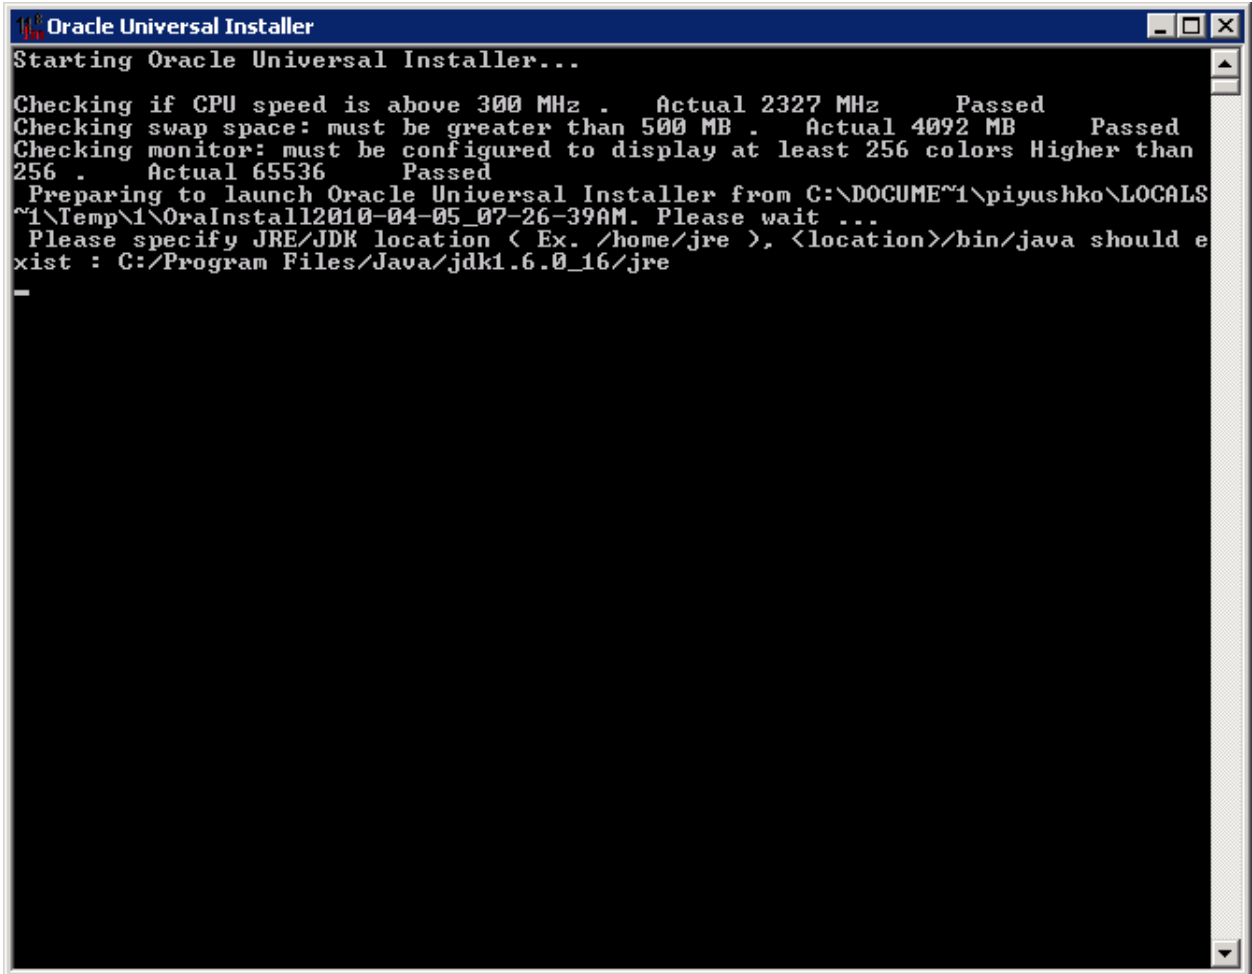

Oracle SOA suite 11gR1 (11.1.1.7) is required for running FCUBS BPEL Process flows

The version required is 11.1.1.7

4.2 Download URL from Oracle

1. http://www.oracle.com/technology/software/products/ias/htdocs/wls_main.html
2. Download based on your needs (Windows / Linux / Generic)
3. The installation process might slightly vary depending on the platform / mode if installation (package / net..)
4. Unzip to a folder and run from Disk1 folder setup.exe

```
Oracle Universal Installer
Starting Oracle Universal Installer...

Checking if CPU speed is above 300 MHz .   Actual 2327 MHz   Passed
Checking swap space: must be greater than 500 MB .   Actual 4092 MB   Passed
Checking monitor: must be configured to display at least 256 colors Higher than
256 .   Actual 65536   Passed
Preparing to launch Oracle Universal Installer from C:\DOCUME~1\piyushko\LOCALS
~1\Temp\1\OraInstall12010-04-05_07-26-39AM. Please wait ...
Please specify JRE/JDK location < Ex. /home/jre >, <location>/bin/java should e
xist : C:/Program Files/Java/jdk1.6.0_16/jre
-
```

5. Specify JRE/JDK location for installation to proceed.

6. Click 'Next'.

Oracle Fusion Middleware 11g SOA Suite Installation - Step 2 of 6

5. Domain Configuration with Oracle SOA suite

5.1 Introduction

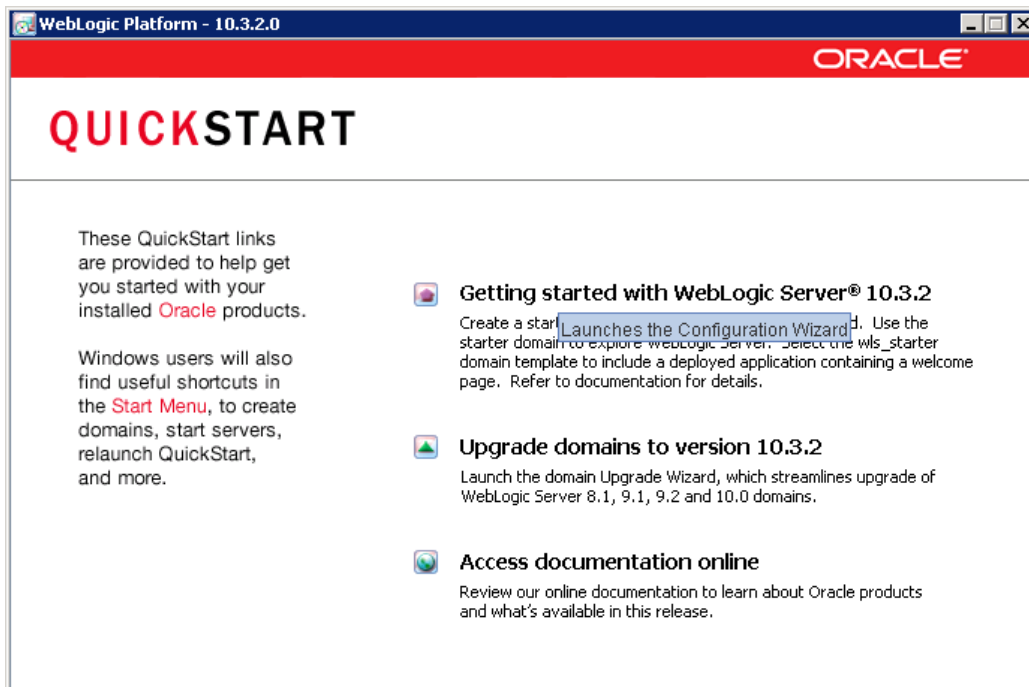

New domain can be configured or an existing domain can be extended with Oracle SOA suite components.

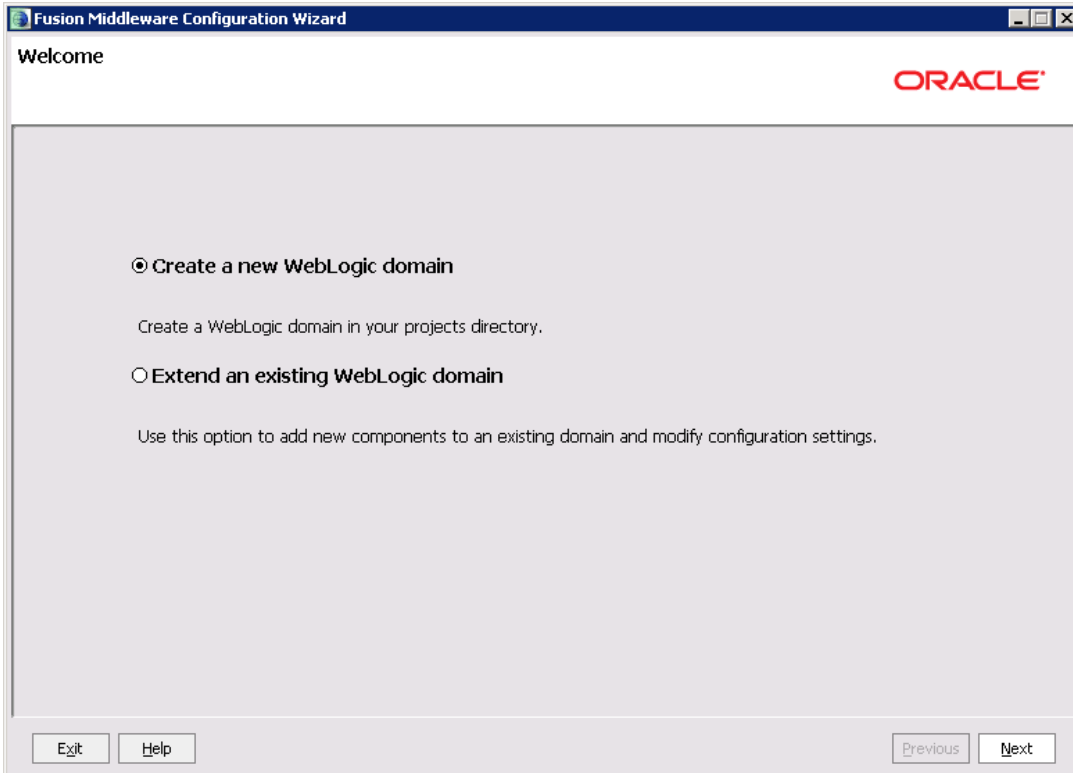

5.2 New Domain Configuration

1. Run Config command

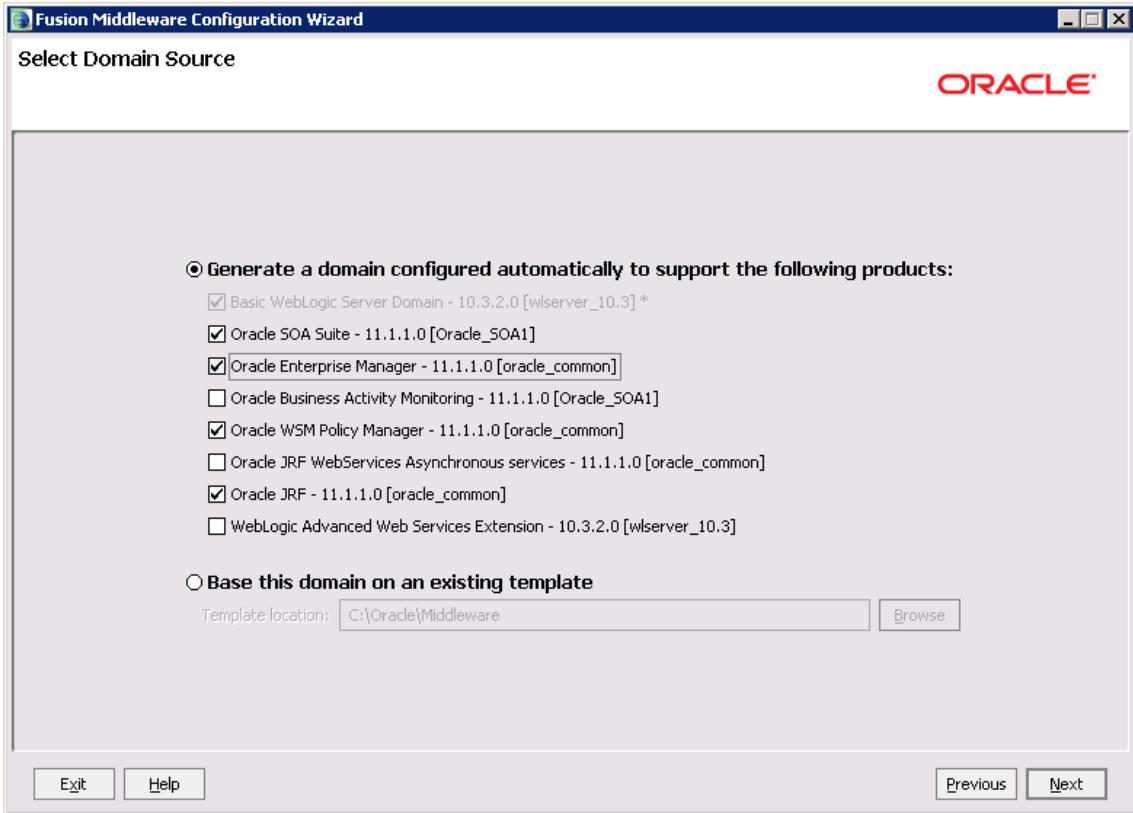

<middleware_home> wlsserver_10.3\common\bin\config or

<middleware_home> \Oracle_SOA1\common\bin\config

2. Create a new domain or extend an existing domain to include soa suite components.

3. On selecting Oracle SOA suite it automatically selects Oracle WSM Policy Manager, Oracle JRF
4. Select Oracle Enterprise Manager for managing / monitoring BPEL processes

Fusion Middleware Configuration Wizard

Specify Domain Name and Location

ORACLE

Enter the name and location for the domain and its applications:

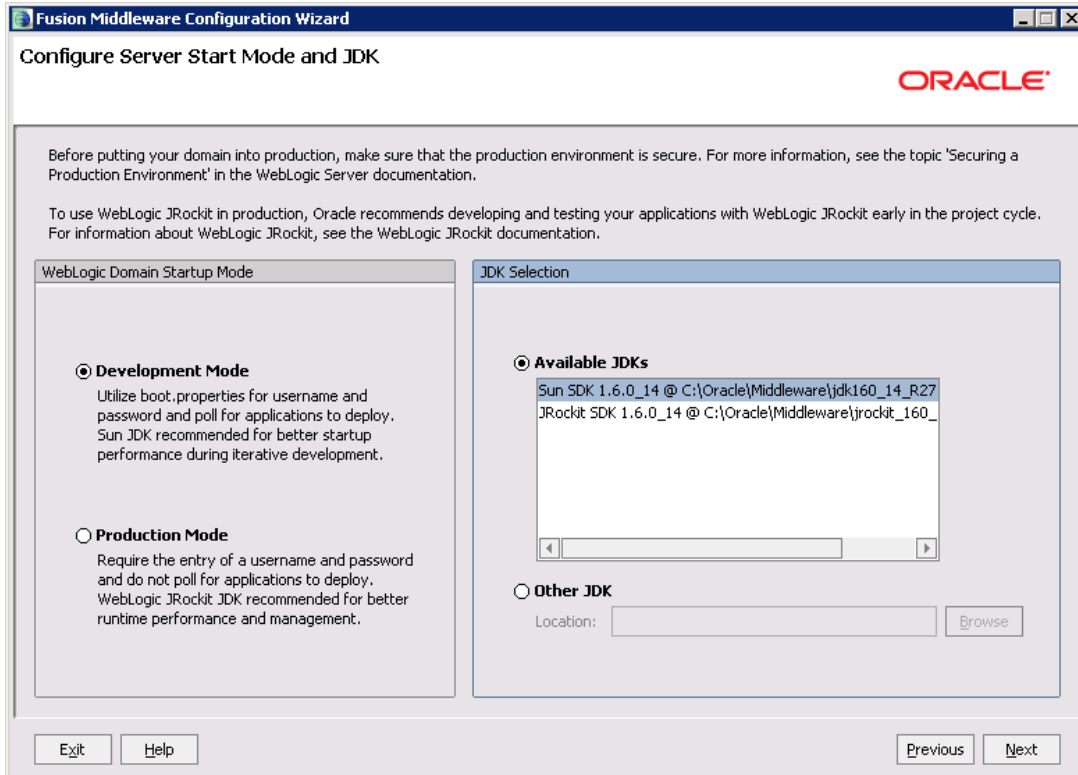

Domain name:

Domain location:

Application location:

The screenshot shows a window titled "Fusion Middleware Configuration Wizard" with the subtitle "Configure Administrator User Name and Password". The Oracle logo is in the top right corner. A "Discard Changes" button is in the top left. The main area contains four input fields: "*User name:" with the value "weblogic", "*User password:" with "*****", "*Confirm user password:" with "*****", and "Description:" with "This user is the default administrator.". At the bottom are "Exit", "Help", "Previous", and "Next" buttons.

5. Configure Administrator user / password.

6. Select jdk depending on the startup mode.

Fusion Middleware Configuration Wizard

Configure JDBC Component Schema

ORACLE

Note: Change only the input fields below that you wish to modify and values will be applied to all selected rows.

Vendor: DBMS/Service:

Driver: Host Name:

Schema Owner: Port:

Schema Password:

Configure selected component schemas as RAC multi data source schemas in the next panel.

	Component Schema	DBMS/Service	Host Name	Port	Schema Owner	Schema Password
<input type="checkbox"/>	SOA Infrastructure	orcl	dbhost.example.com	1521	DEV_SOAINFRA	
<input type="checkbox"/>	User Messaging Service	orcl	dbhost.example.com	1521	DEV_ORASDPM	
<input type="checkbox"/>	OWSM MDS Schema	orcl	dbhost.example.com	1521	DEV_MDS	
<input type="checkbox"/>	SOA MDS Schema	orcl	dbhost.example.com	1521	DEV_MDS	

Exit Help Previous Next

7. Configure schema components.
8. Select all the check boxes.

Fusion Middleware Configuration Wizard

Configure JDBC Component Schema

ORACLE

Note: Change only the input fields below that you wish to modify and values will be applied to all selected rows.

Vendor: Oracle DBMS/Service: orcl
 Driver: *Oracle's Driver (Thin) for Service connections; Versions:9.0.1,9.2.0 Host Name: dbhost.example.com
 Schema Owner: Varies among component schemas Port: 1521
 Schema Password: Enter a value

Configure selected component schemas as RAC multi data source schemas in the next panel.

	Component Schema	DBMS/Service	Host Name	Port	Schema Owner	Schema Password
<input checked="" type="checkbox"/>	SOA Infrastructure	orcl	dbhost.example.com	1521	DEV_SOAINFRA	
<input checked="" type="checkbox"/>	User Messaging Service	orcl	dbhost.example.com	1521	DEV_ORASDPM	
<input checked="" type="checkbox"/>	OWSM MDS Schema	orcl	dbhost.example.com	1521	DEV_MDS	
<input checked="" type="checkbox"/>	SOA MDS Schema	orcl	dbhost.example.com	1521	DEV_MDS	

Exit Help Previous Next

9. Provide the db parameters used during schema creation (RCU Utility)

Fusion Middleware Configuration Wizard

Configure JDBC Component Schema

ORACLE

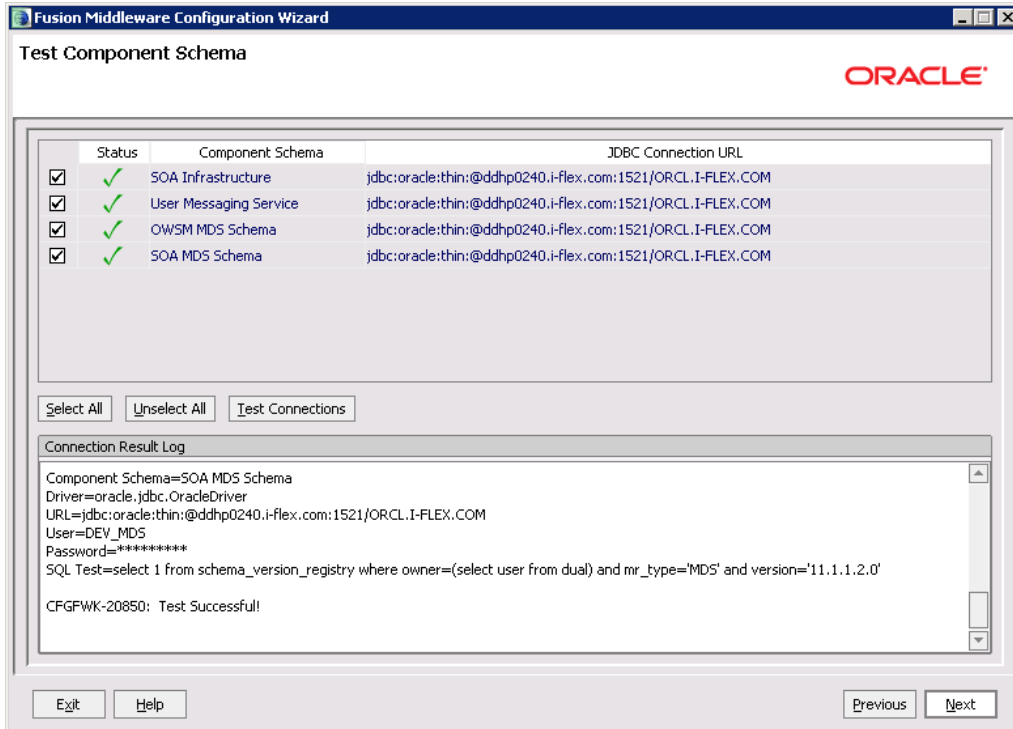

Note: Change only the input fields below that you wish to modify and values will be applied to all selected rows.

Vendor: Oracle DBMS/Service: ORCL.I-FLEX.COM
 Driver: *Oracle's Driver (Thin) for Service connections; Versions:9.0.1,9.2.0 Host Name: ddhp0240.i-flex.com
 Schema Owner: Varies among component schemas Port: 1521
 Schema Password: *****

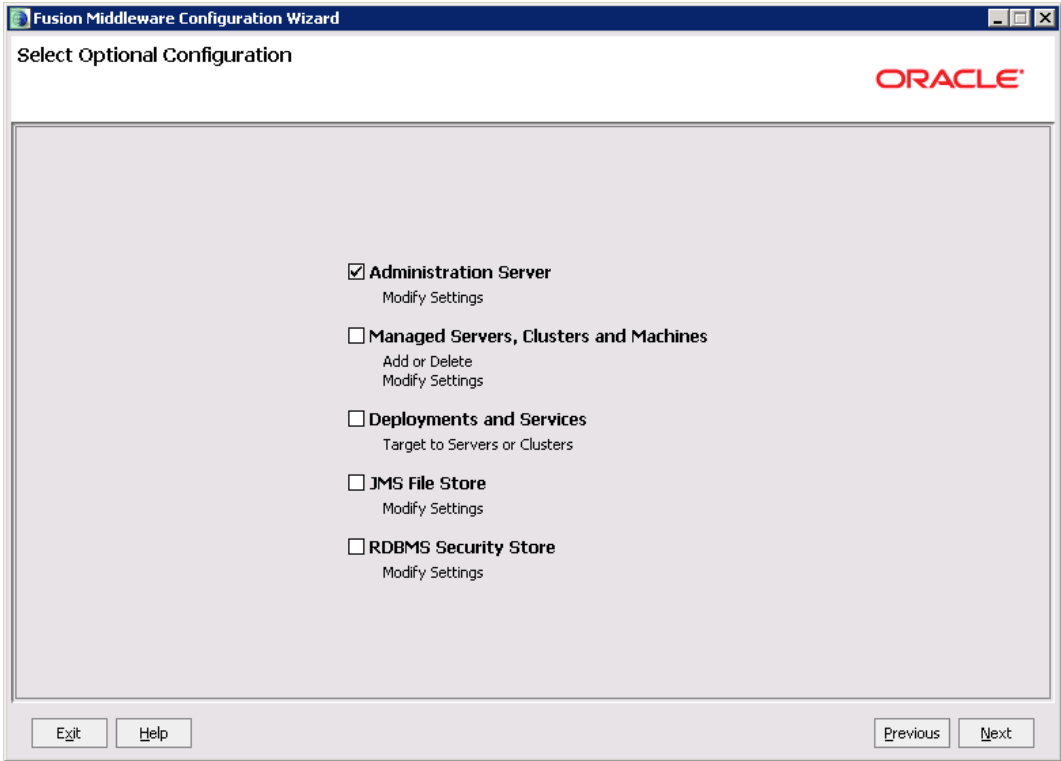

Configure selected component schemas as RAC multi data source schemas in the next panel.

	Component Schema	DBMS/Service	Host Name	Port	Schema Owner	Schema Password
<input checked="" type="checkbox"/>	SOA Infrastructure	ORCL.I-FLEX.COM	ddhp0240.i-flex.com	1521	DEV_SOAINFRA	*****
<input checked="" type="checkbox"/>	User Messaging Service	ORCL.I-FLEX.COM	ddhp0240.i-flex.com	1521	DEV_ORASDPM	*****
<input checked="" type="checkbox"/>	OWSM MDS Schema	ORCL.I-FLEX.COM	ddhp0240.i-flex.com	1521	DEV_MDS	*****
<input checked="" type="checkbox"/>	SOA MDS Schema	ORCL.I-FLEX.COM	ddhp0240.i-flex.com	1521	DEV_MDS	*****

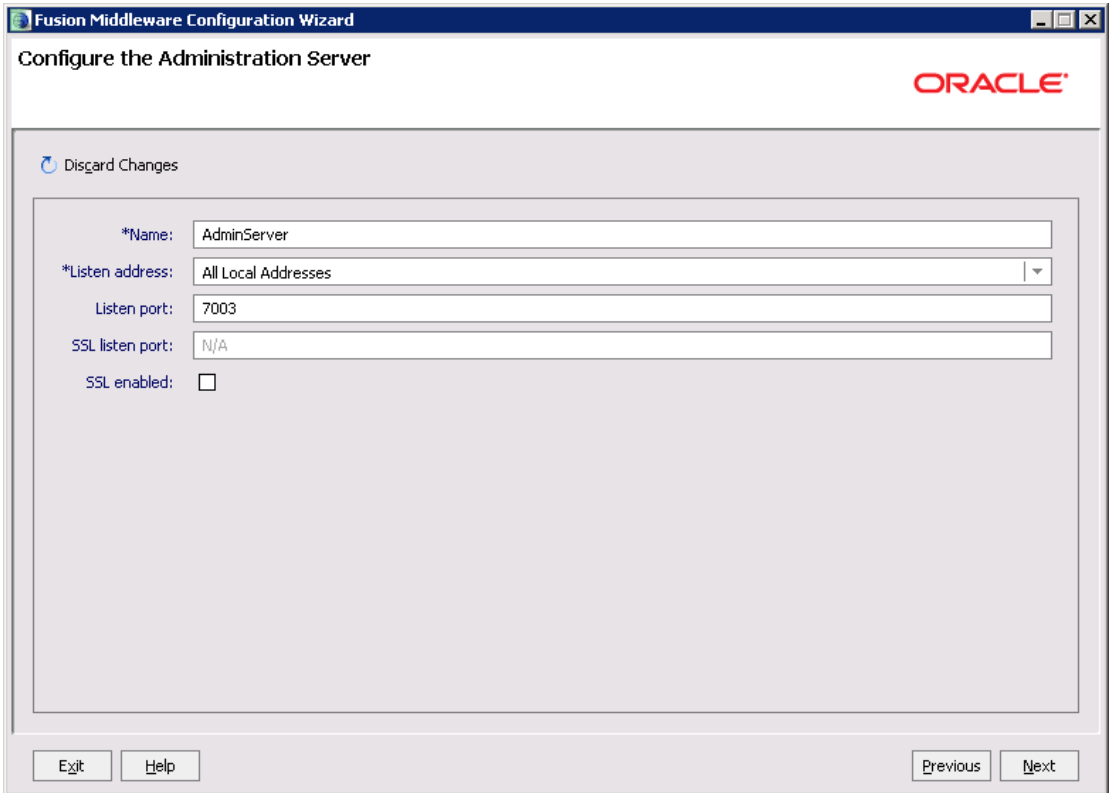

Exit Help Previous Next

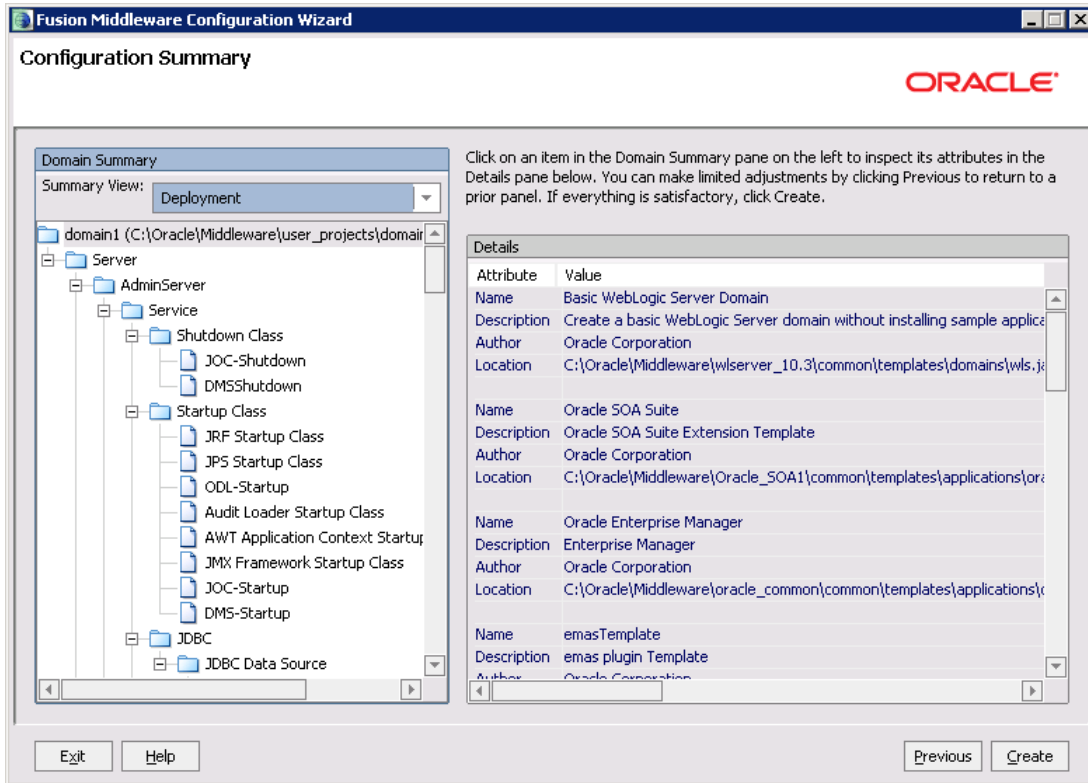

10. Test the database connectivity

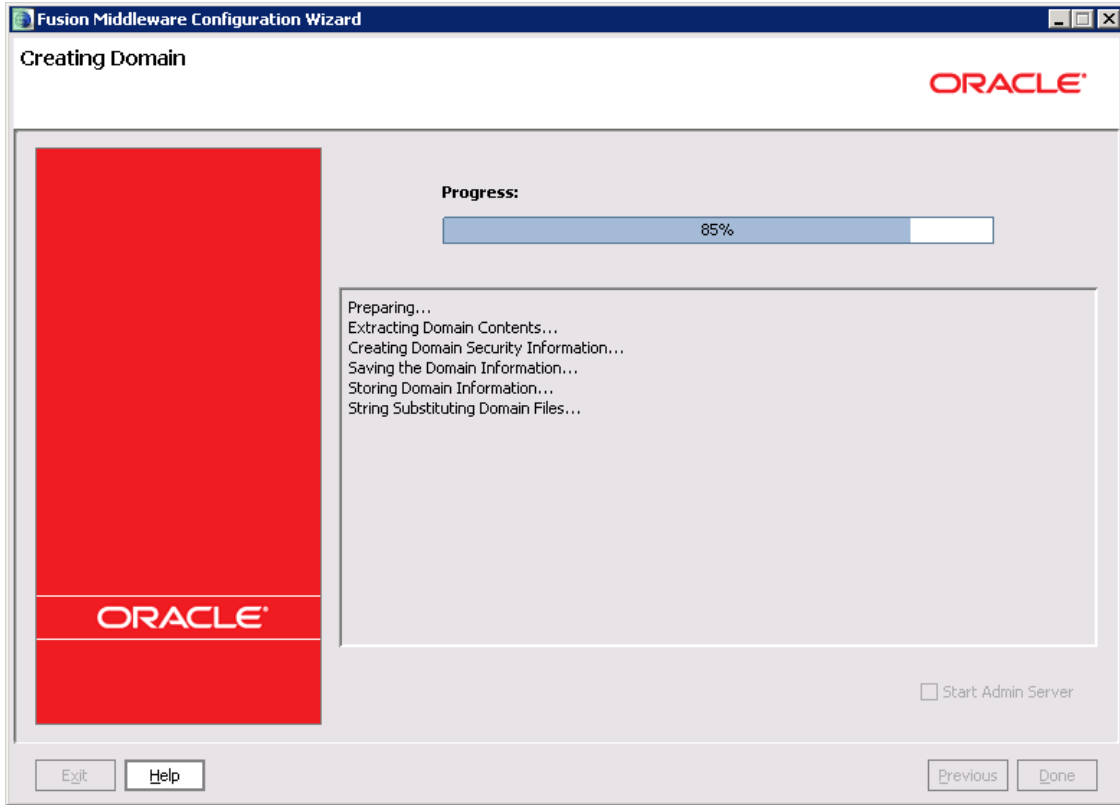

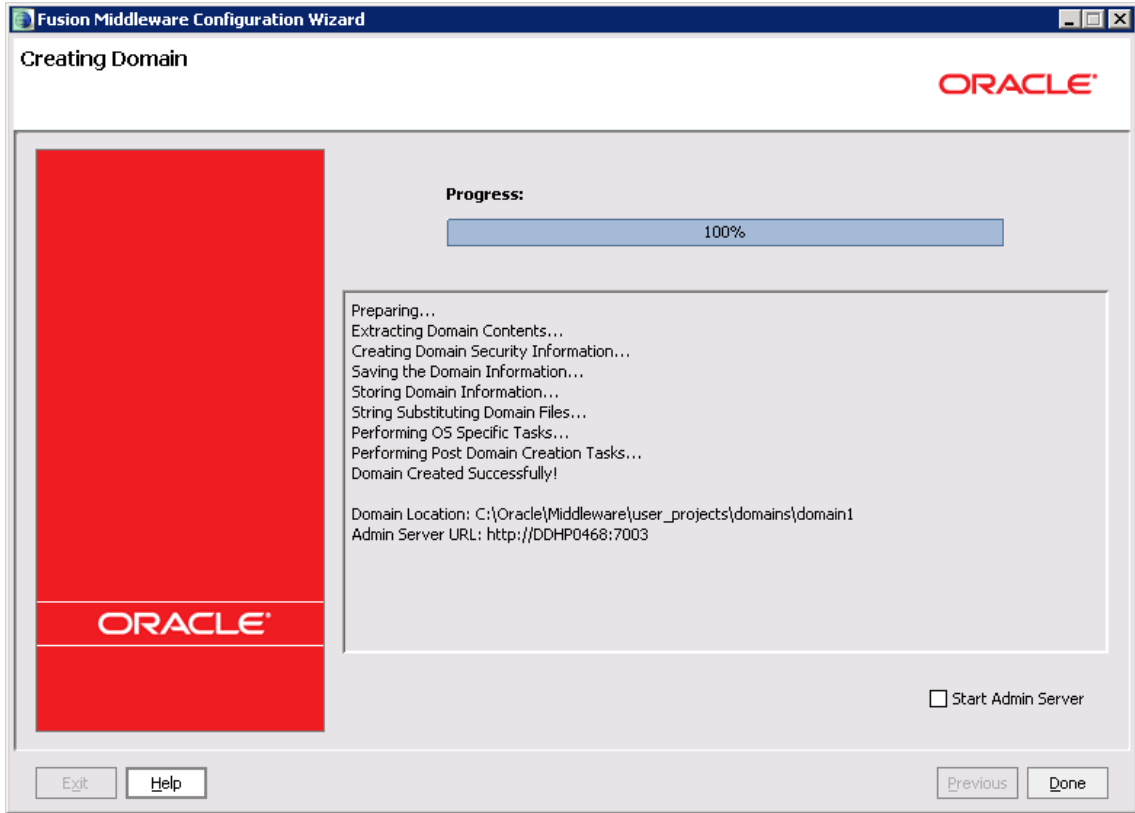

11. Select the Administration Server & Managed Server

12. Configure the Administration Server & Managed Server.

6. Oracle HTTP server Installation and Configuration

6.1 Introduction

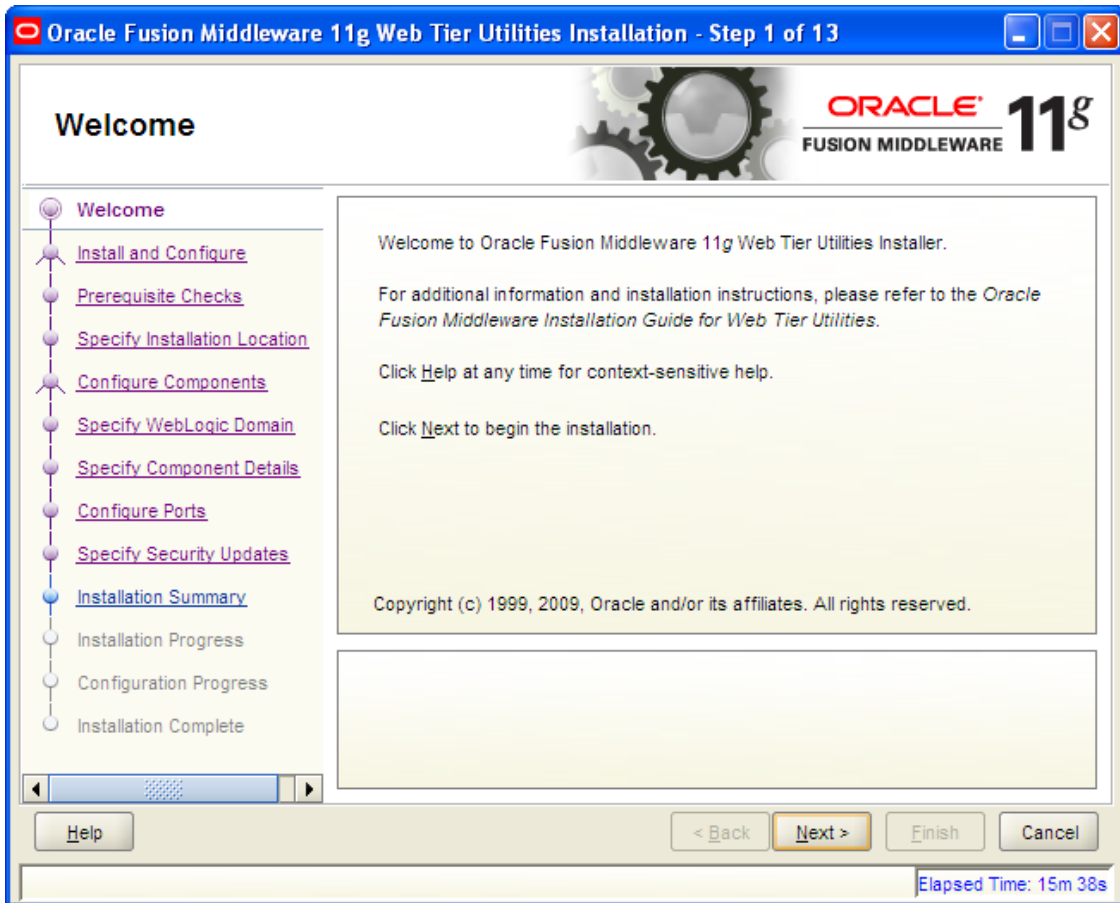

Oracle HTTP server is typically configured in front of weblogic application server , The choice of deployment and SSL terminator will depend on the deployment configuration expected .

Download URL – Please check for appropriate version , The version depicted here is 11.1.1.7

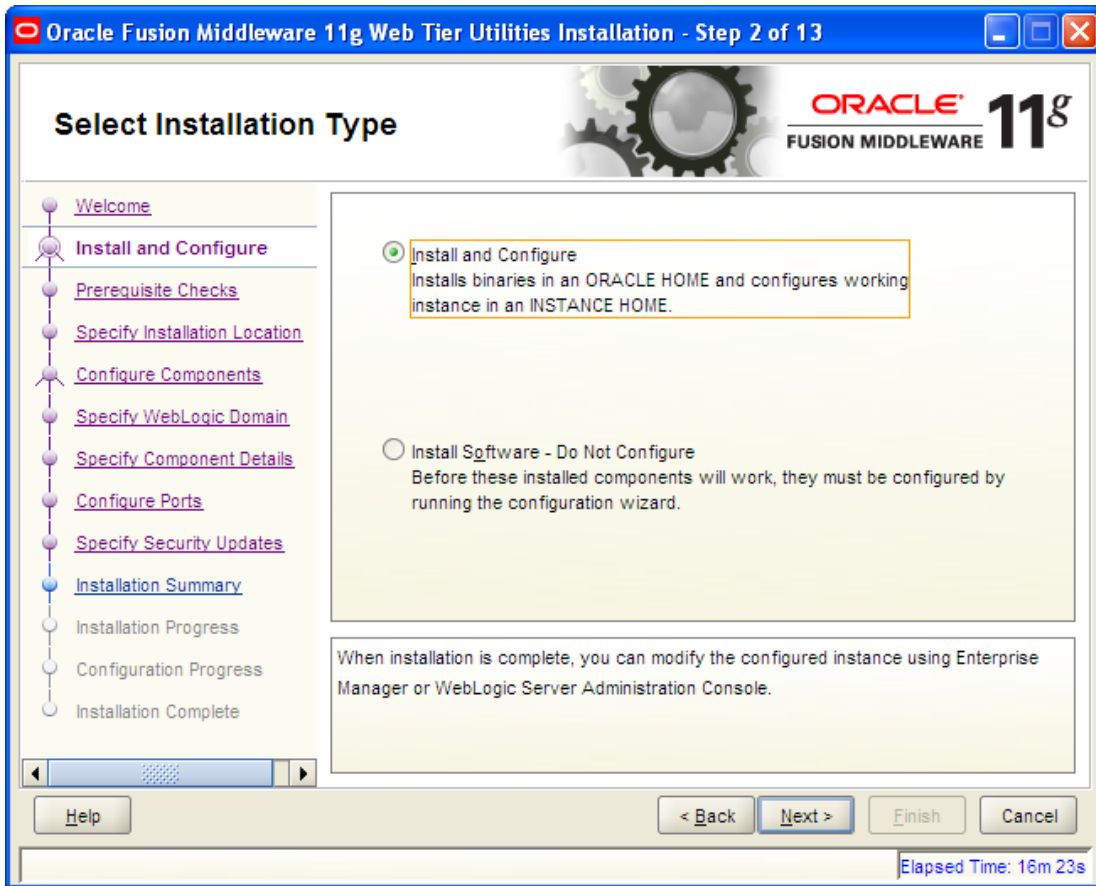

<http://www.oracle.com/technology/software/index.html>

6.2 Installation & Configuration

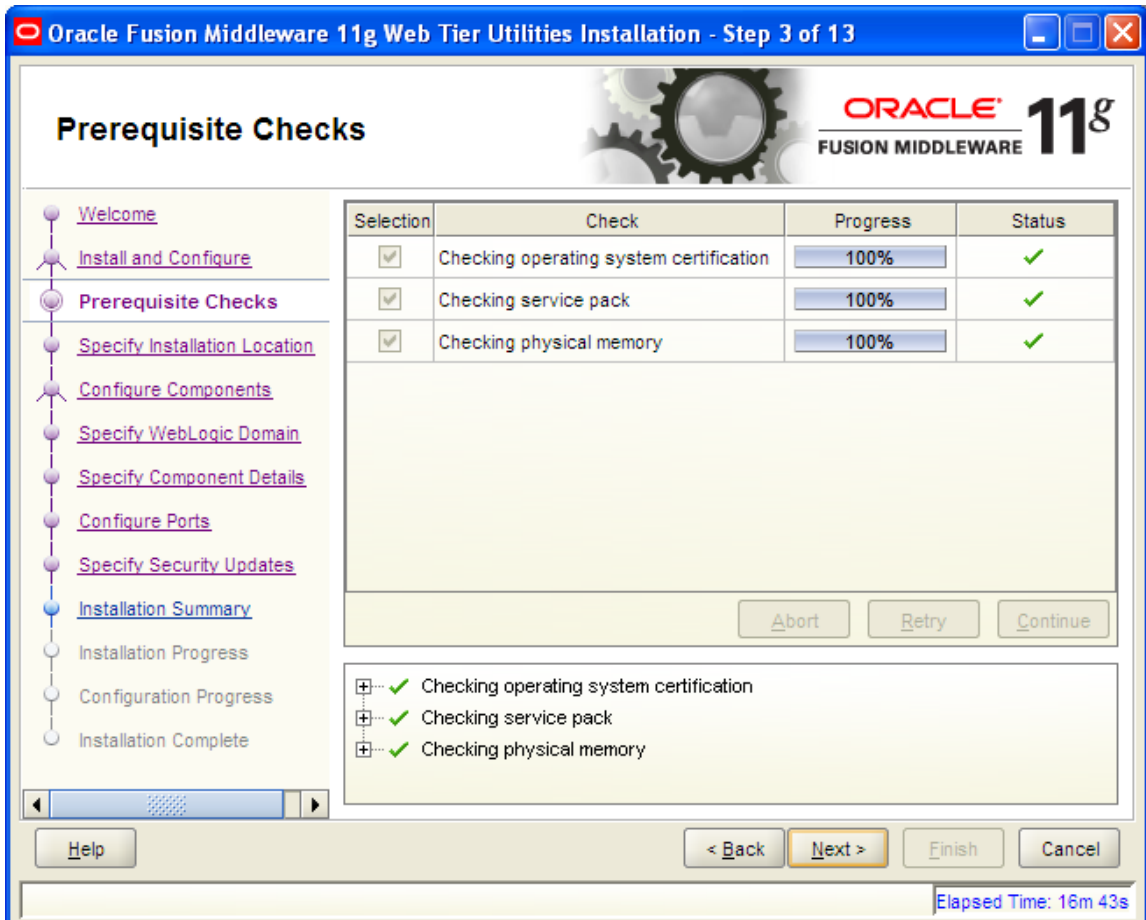

1. Run setup.exe

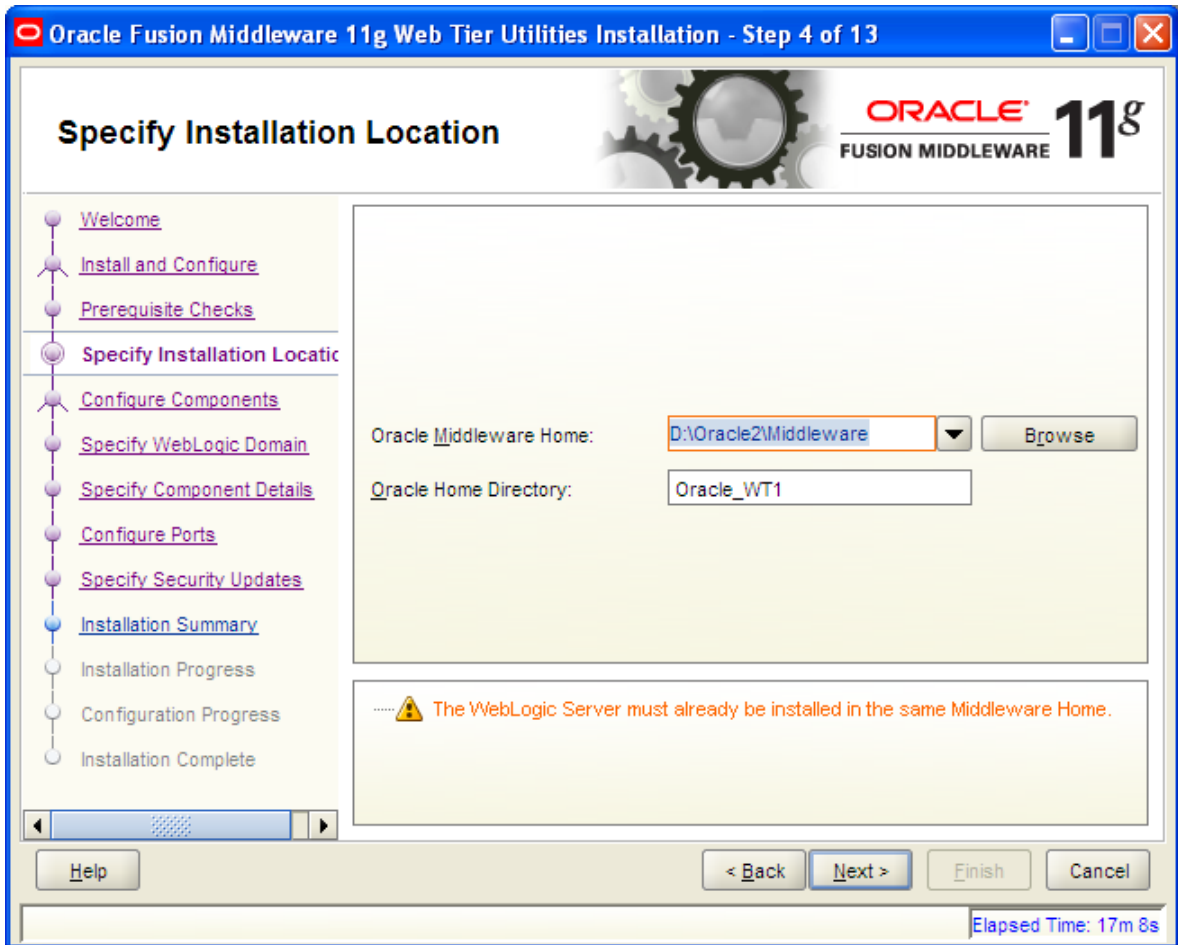

2. Select Install & Configure

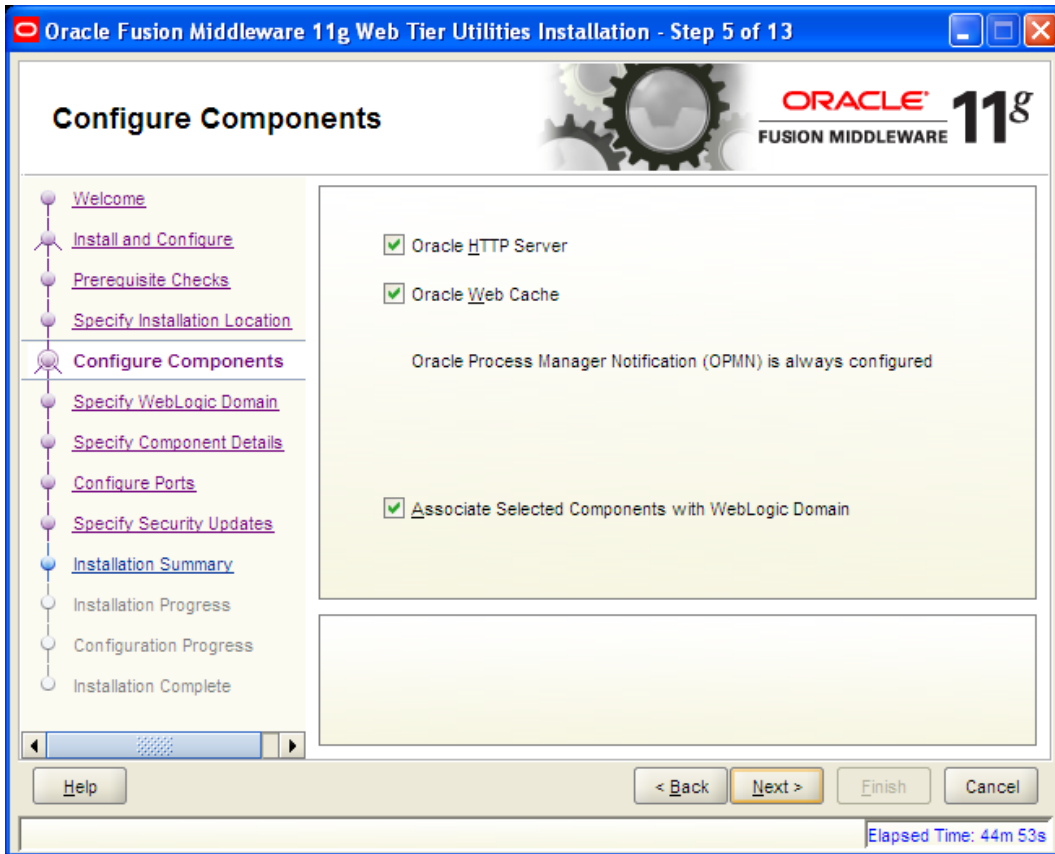

3. Check if prerequisite checks are passed.

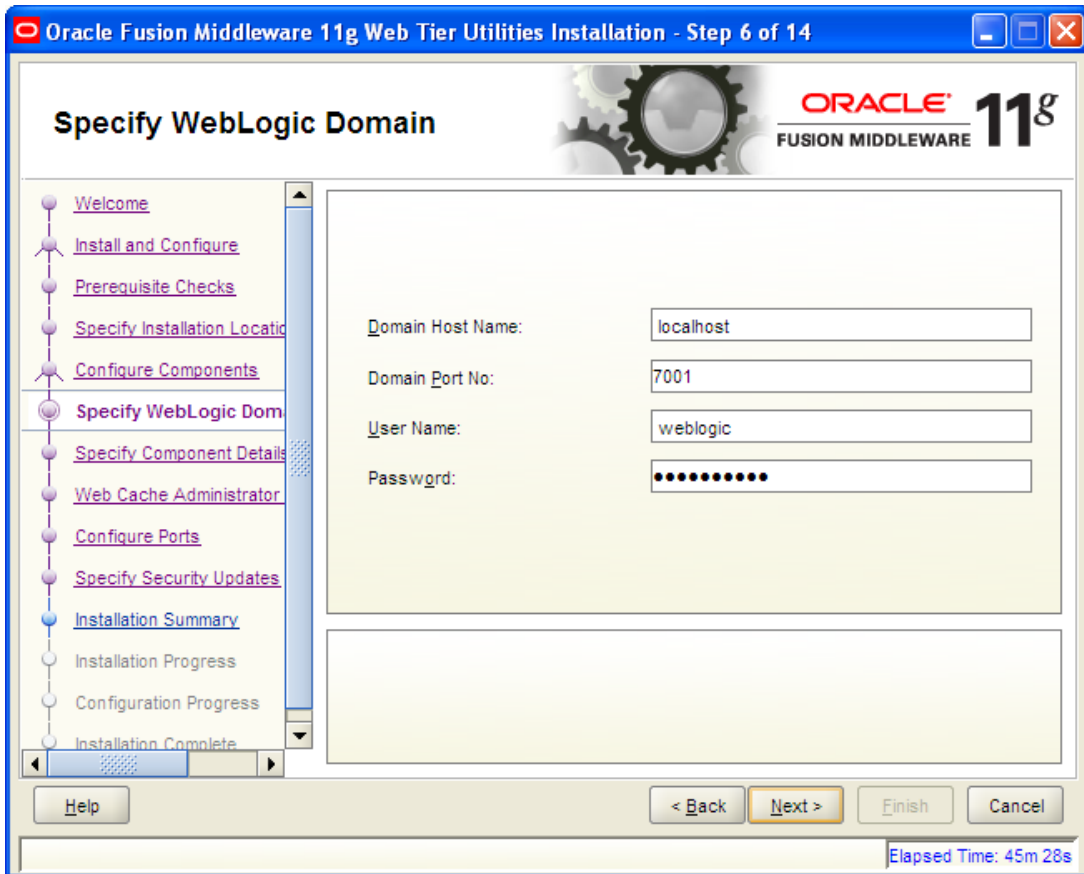

4. Select the middleware home where weblogic server is already installed.

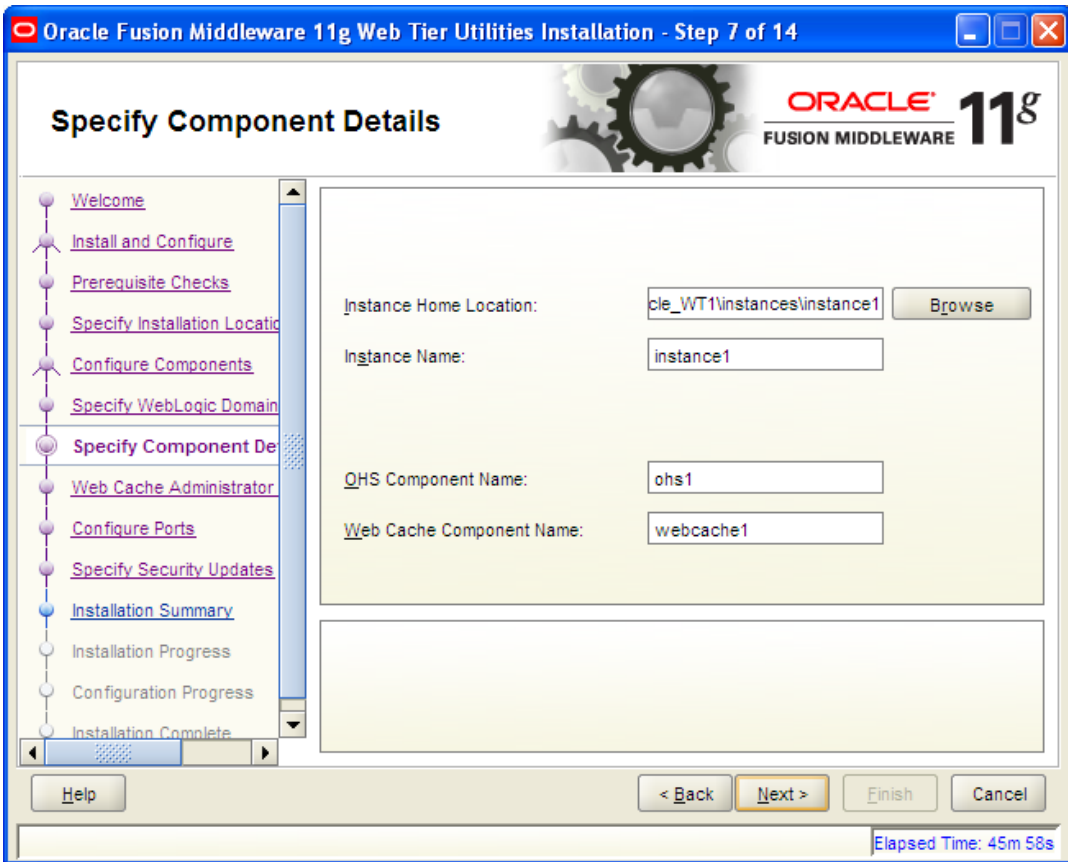

5. Choose components Oracle HTTP Server / Oracle Webcache.

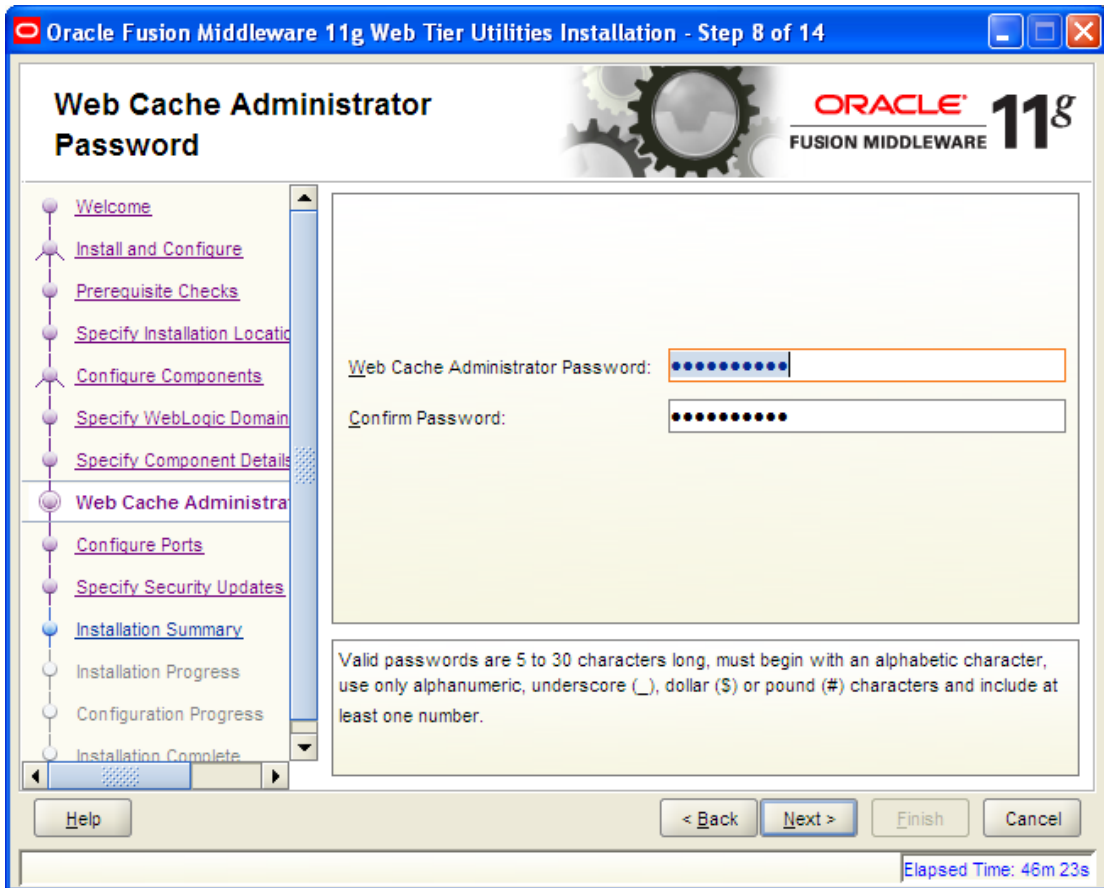

6. Specify weblogic domain details.

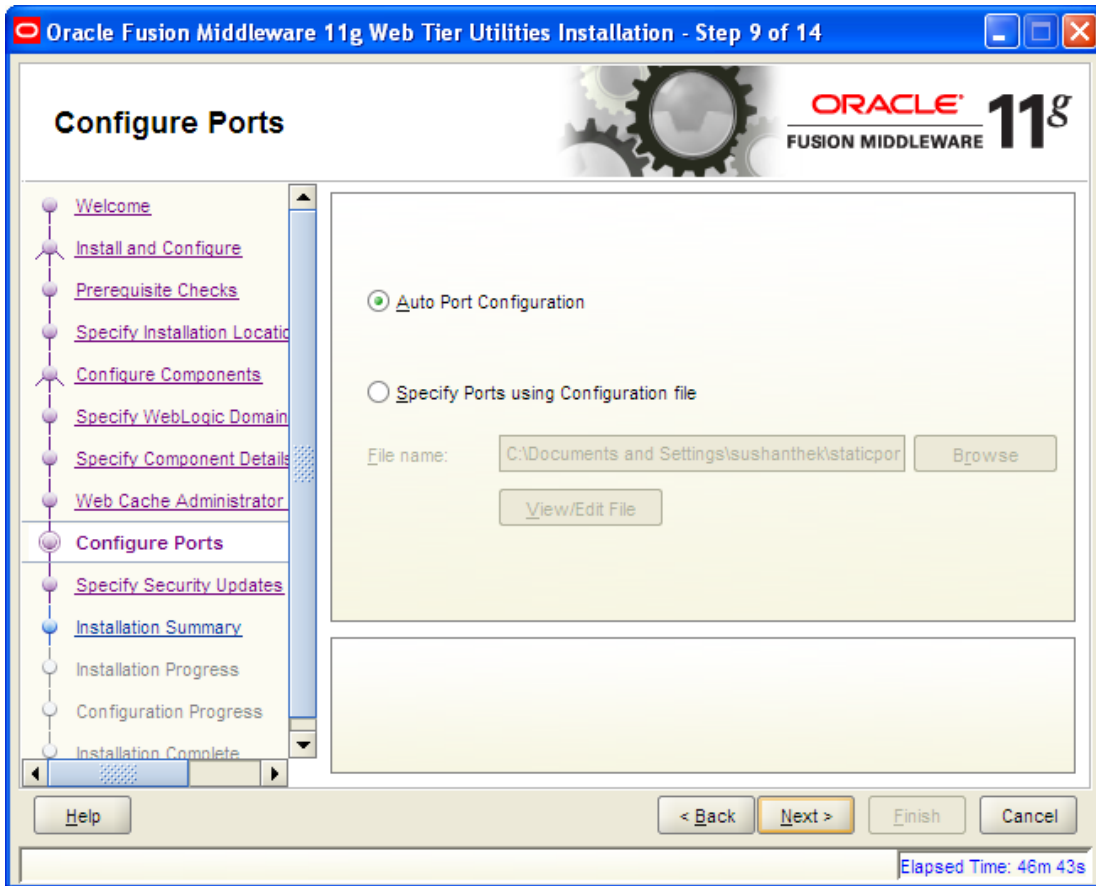

7. Location where components to be installed.

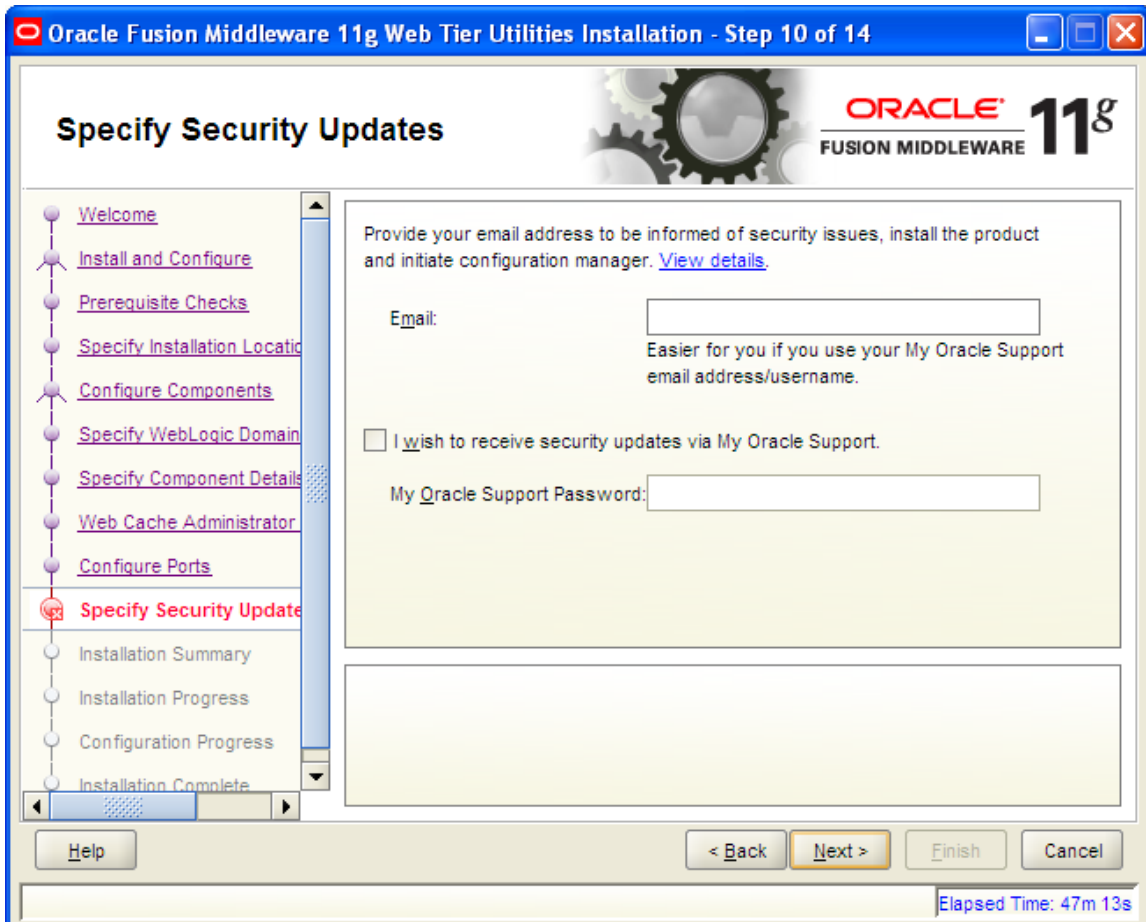

8. Credentials for web cache administrator.

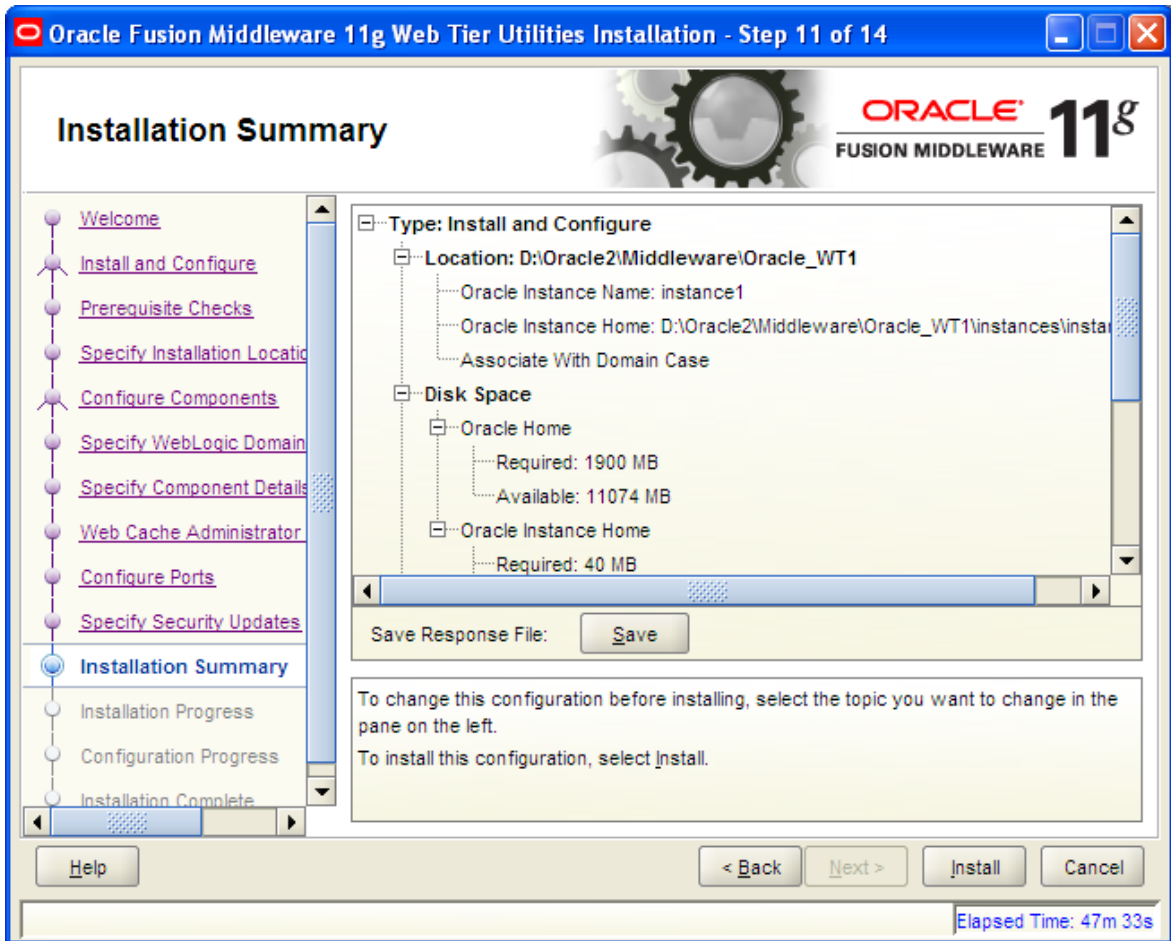

9. Port configuration – Use specify port if custom ports are to be configured for various services.

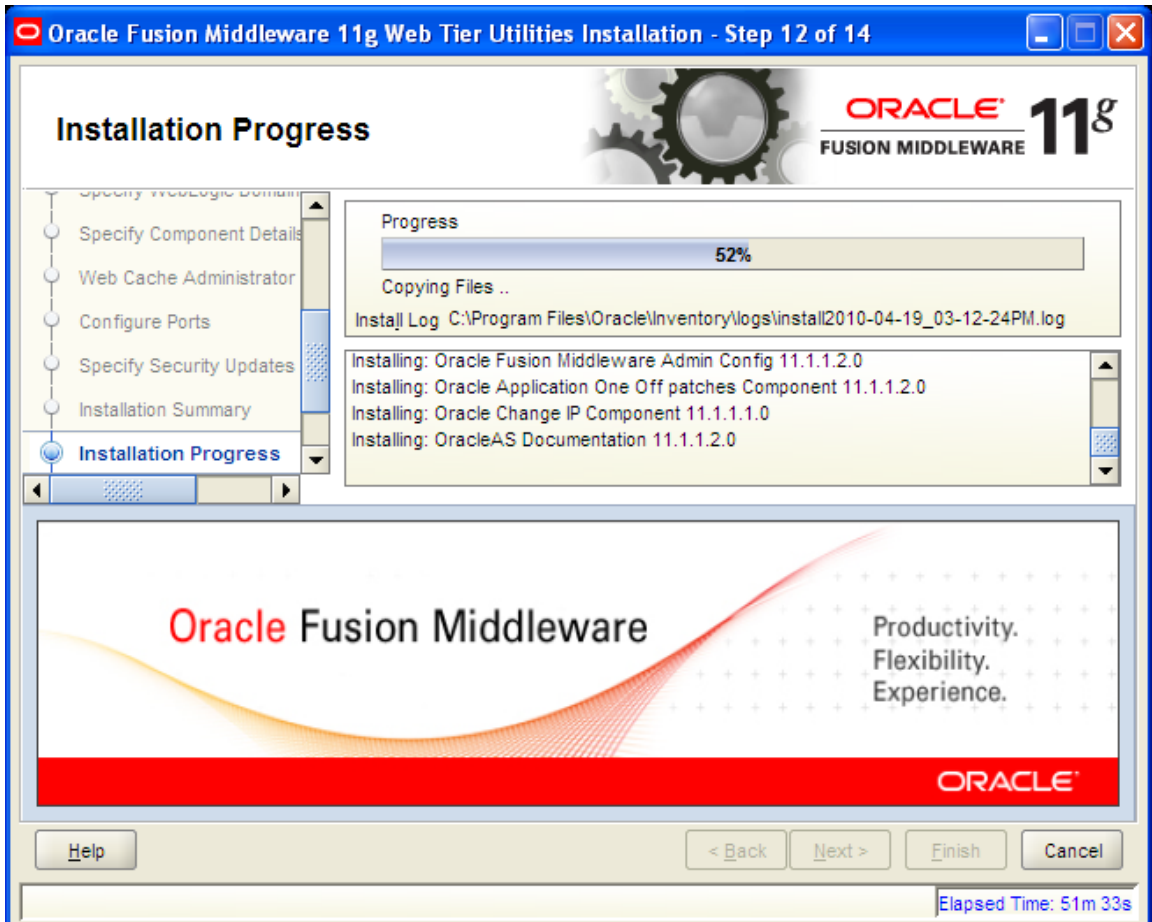

10. If you are an administrator and require security updates from oracle , provide details and subscribe.

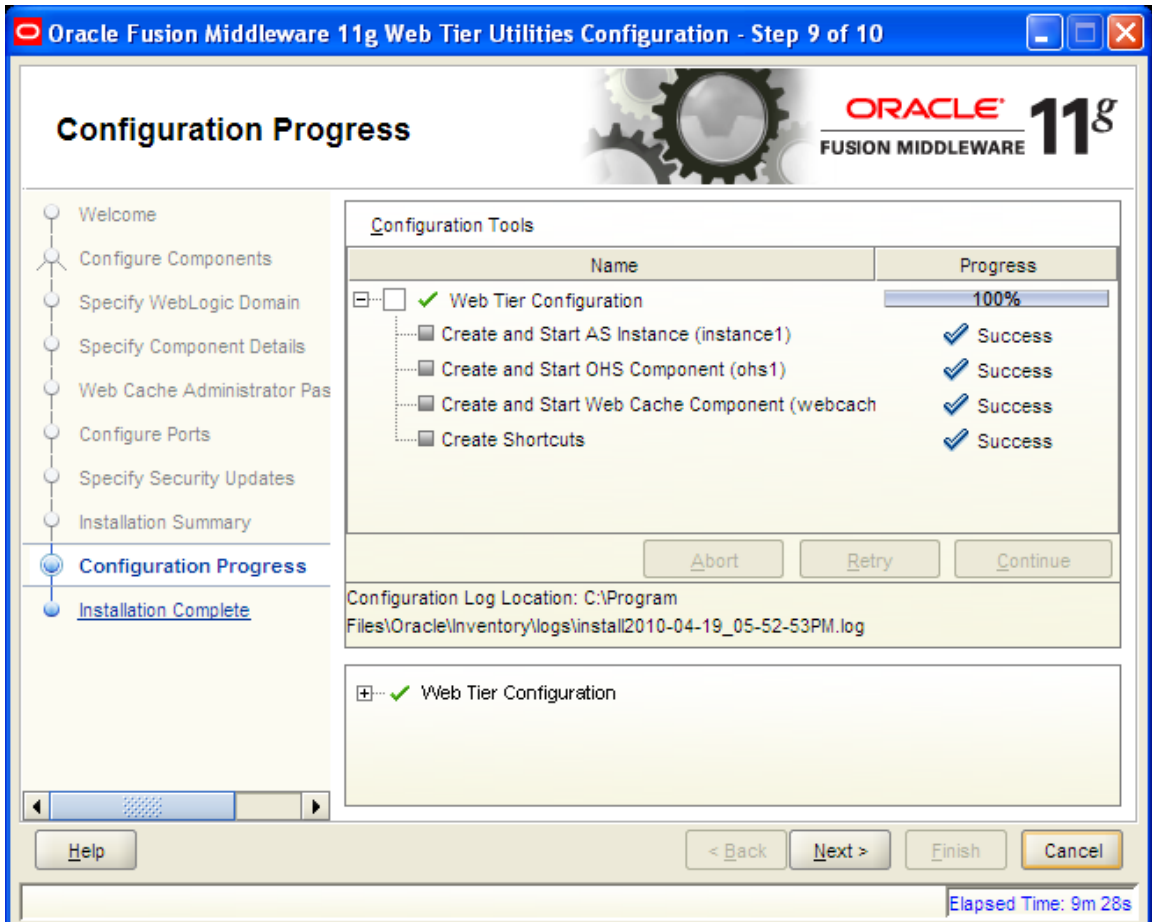

11. Review installation summary.

12. Review installation progress.

13. Review configuration progress.

14. Installation complete.

Oracle Fusion Middleware 11g Web Tier Utilities Configuration - Step 10 of 10

Installation Complete

- Welcome
- Configure Components
- Specify WebLogic Domain
- Specify Component Details
- Web Cache Administrator Pas
- Configure Ports
- Specify Security Updates
- Installation Summary
- Configuration Progress
- Installation Complete**

System Components

- Oracle Process Manager Notification (OPMN)
- Oracle HTTP Server (OHS)
- Oracle Web Cache

Accessible URLs

- Oracle HTTP Server URL : http://CVRZE0013.i-flex.com:7777
- Oracle HTTP Server SSL URL : https://CVRZE0013.i-flex.com:4443
- Oracle Web Cache URL : http://CVRZE0013.i-flex.com:7785
- Oracle Web Cache SSL URL : https://CVRZE0013.i-flex.com:7789
- Oracle Web Cache Administration URL : http://CVRZE0013.i-flex.com:7786
- Oracle Web Cache Statistics URL : http://CVRZE0013.i-flex.com:7787

Save Installation Summary:

Oracle Fusion Middleware 11g Web Tier Utilities configured successfully.

Elapsed Time: 45m 18s

7. Generating Self Signed Certificate and Configuring SSL

Self signed certificates are used for development environment , for production environment certificate from a issuing authorities like (verisign / thwarte..) are to be used.

7.1 Orapki Utility to Create Wallet and Self Signed Certificate

This document gives details of using orapki utility for creating wallet and self signed certificates.

1. Orapki Utility

With

- Oracle Client < bin>
- WLS <<middleware>/oracle_common/bin

2. Wallet creation

```
orapki wallet create -wallet D:\oracle2\Middleware\wallet\ -pwd welcome123 -auto_login
```

3. Generating self signed certificatey

```
orapki wallet add -wallet D:\oracle2\Middleware\wallet\ -dn "CN=cvrze0013.iflex.com,OU=BPD,O=Oracle,L=iflexpark,ST=Karnataka,C=IN" -keysize 1024 -self_signed -validity 365 -pwd welcome123
```

4. Add wallet to ssl.conf

ssl.conf can be located in
<middleware_home>/<ohs_home>/instances/<instance_name>/config/OHS/<ohsname>

E.g

```
<middleware_home>Oracle_WT1/instances/instance1/config/OHS/ohs1/ssl.conf
```

```
# SSL Certificate Revocation List Check
```

```
# Valid values are On and Off
```

```
SSLCRLCheck Off
```

```
#Path to the wallet
```

```
SSLWallet /data1/appsrvrs/wls1032/Oracle/Middleware/wallet
```

```
<FilesMatch "\.(cgi|shtml|phtml|php)$">
```

```
SSLOptions +StdEnvVars
```

</FilesMatch>

5. Mod_wl_ohs.conf modification to forward request to weblogic server

Mod_wl_ohs.conf can be located in
<middleware_home>/<ohs_home>/instances/<instance_name>/config/OHS/<ohsname>

E.g

<middleware_home>Oracle_WT1/instances/instance1/config/OHS/ohs1/mod_wl_ohs.coonf

Sample configuration given below , please modify as per the application context and ports configured.

This is a template to configure mod_weblogic.

```
LoadModule weblogic_module "${ORACLE_HOME}/ohs/modules/mod_wl_ohs.so"
```

```
# This empty block is needed to save mod_wl related configuration from EM to this file when  
changes are made at the Base Virtual Host Level
```

```
<IfModule weblogic_module>
```

```
# WebLogicHost <WEBLOGIC_HOST>
```

```
# WebLogicPort <WEBLOGIC_PORT>
```

```
# Debug ON
```

```
# WLLogFile /tmp/weblogic.log
```

```
# MatchExpression *.jsp
```

```
</IfModule>
```

```
# <Location /weblogic>
```

```
# SetHandler weblogic-handler
```

```
# PathTrim /weblogic
```

```
# ErrorPage http://WEBLOGIC_HOME:WEBLOGIC_PORT/
```

```
# </Location>
```

```
<Location /console>
```

```
SetHandler weblogic-handler
```

```
WebLogicHost localhost
```

```
WeblogicPort 9001
```

```
</Location>

<Location /em>
    SetHandler weblogic-handler
    WebLogicHost localhost
    WeblogicPort 9001
</Location>

<Location /consolehelp>
    SetHandler weblogic-handler
    WebLogicHost localhost
    WeblogicPort 9001
</Location>

<Location /FCJNeoWeb>
    SetHandler weblogic-handler
    WebLogicHost localhost
    WeblogicPort 9003
</Location>

<Location /FCJNeoFgl>
    SetHandler weblogic-handler
    WebLogicHost localhost
    WeblogicPort 9003
</Location>

<Location /ELGatewayClient>
    SetHandler weblogic-handler
    WebLogicHost localhost
    WeblogicPort 9003
</Location>
```
