Resourc	e Adapter Deployment Steps3
1.1	Prerequisite
1.2	Resource Adapter Deployment

Resource Adapter Deployment Steps

1.1 Prerequisite

Ensure that the modification has been done in Resource Adapter (used to connect to IBM WebSphere MQ) related files located at

<KERNEL_INSTALL_DIR>\SSIAD_MDB\config\OC4J

- ✓ oc4j-connectors.xml
- ✓ oc4j-ra.xml
- ✓ orion-application.xml
- ✓ orion-ejb-jar.xml
- ✓ ra.xml
- \checkmark

[Please refer OC4J SSIAD MDB Installation.doc.]

1.2 Resource Adapter Deployment

1. Navigate to the **"Application screen"** as shown below.

4J: hom	e

Deployment Tasks		
The table below provides a set of enabled.	common deploy	ment tasks you might want to perform for this application. Only those tasks that apply to the current application are
Task Name	Go To Task	Description
Map Environment References	Ø	Map any environment references in your application (for example, data sources) to physical entities currently present on the operational environment.
Select Security Provider		A security provider acts as the source for available users and groups when mapping security roles.
Map Security Roles	Ø	Map any security roles exposed by your application to existing users and groups. The list of users and groups is obtained from the security provider you selected for this application.
Configure EJBs	ß	Configure the Enterprise JavaBeans in your application.
Configure Clustering	Ø	Configure clustering of your application.
Configure Class Loading	Ø	Manipulate the classpath of your application.
Advanced Deployment Plar	n Editing	
Click Edit Deployment Plan to se	et more advanced	deployment options. Edit Deployment Plan
Save Deployment Plan		
After you make changes, you car can then use the saved deployme	n save the deploy ent plan to redepl	ment plan to your local disk. You Save Deployment Plan
		Cancel) Back Step 3 of 3 Deploy
