This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

1 Adapter Usage Details	1

Preface

Oracle Banking Platform Extensibility - Adapter Usage Details guide is an extension of the Oracle Banking Platform Extensibility guide. It contains information about the detailed list of adapters which can be used for extending and customizing the product.

This preface contains these topics:

- [Audience](#)
- [Documentation Accessibility](#)
- [Related Documents](#)
- [Conventions](#)

Audience

This guide is intended for the users of Oracle Banking Platform.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Related Documents

For more information, see the following documentation:

- For information related to customization and extension of Oracle Banking refer the Oracle Banking Extensibility Guide

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for

which you supply particular values.

monospace

Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Adapter Usage Details

This chapter provides information on the list of adapters which can be used for extending and customizing the product.

Table 1–1 Adapter Usage Details

Adapter Name	Adapter Path	Adapter Method	Interface Method Javadoc	Default Implementation
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.app.adapter.impl.jar@/com/ofss/fc/app/adapter/impl/dda/DDLCMAAdapter
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/entity/account/balances/BalanceHistoryItem
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/entity/account/balances/BalanceHistoryItem

Adapter Name	Adapter Path	Adapter Method	Interface Method Javadoc	Default Implementation
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/entity/account/balances/AUFLimit
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/Utils/DemandDepositUtil
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/Utils/DemandDepositUtil
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	getBalancesAvailabilityOfAccount	This @param accountId @param valueDate @return	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/entity/account/balances/OverdraftLimit
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	intimateELCM	Intimate ELCM with the balances. @param messageType	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/service/account/core/DDAELCMHelper
IDDLCMAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/dda/IDDLCMAdapter	intimateELCM	Intimate ELCM with the balances. @param messageType	com.ofss.fc.module.dda.jar@/com/ofss/fc/domain/dda/service/account/core/DDAELCMHelper

Adapter Name	Adapter Path	Adapter Method	Interface Method Javadoc	Default Implementation
IDDLCA dapter	com.ofss.fc.app.adapter.internal .interface.jar@/com/ofss/fc/ap p/adapter/dda/IDDLCA dapter	intimateELCM	Intimate ELCM with the balances. @param messageType	com.ofss.fc.module.dda.jar@/com/of ss/fc/domain/dda/service/account /core/DDAELCMHelper

ILoanInterestAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/loan/ILoanInterestAdapter	inquirePartialPayOff	<p>This method will called by the consumers of the interest module to process the partial pay off request.
 There is an attribute defined at the product level which defines whether the pending interest needs to be charged during Partial Payoff.
 This attribute is termed as applyInterestTillDate. This attribute will decide the whether the pending interest will be charged as a part of Partial Payoff processing or it will be charged in the next charging cycle.
 If the applyInterestTillDate flag is set as false in the input , then pending interest won't be charged hence zero money response would be sent to the caller.
 The below steps are applicable if the applyInterestTillDate flag is set as true
 This method would perform the interest charging as of the partial pay off date provided in the input.
 Here the transaction reference number is taken as input from the loan module, which is generated during the partial pay off.
 The same transaction reference number would be used to raise the interest related accounting entries.
 So when there is reversal for the partial pay off, the same transaction reference number could be used to reverse the interest accounting entries.
 The reversal of the accounting entries would be</p>	com.ofss.fc.app.adapter.impl.jar@/com/ofss/fc/app/adapter/impl/loan/LoanInterestAdapter

IAccountOriginationAdapter	com.ofss.fc.app.adapter.internal.interface.jar@/com/ofss/fc/app/adapter/account/IAccountOriginationAdapter	saveSubmissionAsDraft	<p>This service is used for saving submission details in draft. A user may select to save and exit and return to the submission later. In this case, the details that were entered previously can be retrieved and the user can continue with the flow. Details for this draft can be retrieved using the submission identifier used for saving the details.
 The submission draft can be retrieved in the following ways:
 1. My Tracker - This tracker is used by the applicant to log into the system.
 2. Application Tracker - This tracker is used by the banking associated to log into the system.
 For systems where all applicants applying for the submission are new, at least one primary applicant must be specified for the system. When the submission is saved, the primary applicant is onboarded as a 'Member' in the party system. The process takes care of onboarding process
 The primary applicant can later log into the system and submit the application or the banker can retrieve the submission using this primary applicant and continue with the submission. The inputs submissionInputDTO will be serialized into String and passed to DraftApplicationService for save as draft.
