# Preface

### Audience

The installation guide for the Suite8 Install Shield is intended for system administrators and support familiar with Suite8.

## **Customer Support**

To contact Oracle Customer Support, access My Oracle Support at the following URL:

http://www.micros.com/Support

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

### Documentation

Oracle Hospitality product documentation is available on the Oracle Help Center at http://docs.oracle.com

Date	Description of Change
March, 2010	• 8.8.2.0 - New
December, 2010	• 8.8.4.1 - Added Oracle 11gR2
September, 2011	• 8.9.0.3 - Updated for new install shield and added training version short cut start parameter
October, 2012	• 8.9.2.3 - Updated for 8.9.2.3
February, 2013	• 8.9.3.0 - Updated for 8.9.3.0
	Suite8 Client Setup updated
	Oracle DB Setup updated
July, 2013	• 8.9.4.0 - Updated for 8.9.4.0
	Suite8 Version Control added
July, 2013	• 8.9.4.0 - Update to Suite8 homepage system requirements
January, 2014	• 8.9.4.3 - Updated for 8.9.4.3
	• Windows 8 Support added
	Oracle DB Setup updated
March, 2014	• 8.9.5.0 - Updated for 8.9.5.0
	Oracle DB Setup updated
	<ul> <li>Suite8 Version Control updated</li> </ul>

## **Revision History**

July, 2014	• 8.9.5.1 - Update for 8.9.5.1
	Added Oracle 12cR1
	Added Windows Server 2012
November, 2014	• 8.9.5.3 - Update for 8.9.5.3
	Added Oracle Policies
January, 2015	• 8.9.6.0 - Update for 8.9.6.0
	Added UNICODE Support

# Suite8 Install Shield

### Introduction

The Suite8 installation shield offers a complete installation of Oracle Schema with Oracle11gR2/Oracle12cR1 Database, MICROS-Fidelio Suite8 with Oracle 11gR2/Oracle 12cR1 Client (32-bit) as well as Translation Studio, Suite8 Homepage, XML Interface, Oracle SQL Developer, Crystal Reports 12 Runtime and Oracle Database Maintenance. When choosing Oracle Server, Instance and Schema installation, the install shield takes care of all Oracle settings for the Server and prepares the installation of the correct version 8, please make sure to have the Oracle DVD ready or download the Oracle Installation DVD's from the Micros Fidelio FTP Server. The Install Shield supports different RAM Sizes. It reads real memory size, therefore no additional questions about memory are being asked with the install shield for version 8.9.5.3.

1

# Microsoft Windows7

Oracle Database releases '9iR2 (9.2.0.x), 10gR1 (10.1.0.x), and 11gR1 (11.1.0.x)' are not certified or supported to install or run on Microsoft Windows 7.

Microsoft Windows 7 certification starts with 'Oracle Database 11gR2 (11.2.0.1)'. That means that the Oracle Database 11gR2 is the first Oracle Database product certified and supported to install and run on Microsoft Windows 7.

Recently, Oracle 10.2.0.5 has also been certified to run on Windows 7, but is End-of-Life (July 2013).

## Microsoft Windows 8/8.1

Oracle Database releases '9iR2 (9.2.0.x), 10gR1 (10.1.0.x), 11gR1 (11.1.0.x) and 11gR2 (<=11.2.0.3)' are not certified or supported to install or run on Microsoft Windows 8/8.1. Oracle Database release 10gR2 is End-of-Life (July 2013).

Microsoft Windows 8/8.1 certification starts with Oracle Database 11gR2 (11.2.0.4) and Oracle Database 12cR1 (12.1.0.1/12.1.0.2).

We recommend using Oracle Database Version 11gR2 (11.2.0.4) for Microsoft Windows 8/8.1.

# Microsoft Windows Server 2012 R1/R2

Oracle Database releases '9iR2 (9.2.0.x), 10gR1 (10.1.0.x), 10gR2 (10.2.0.x), 11gR1 (11.1.0.x) and 11gR2 (<=11.2.0.3)' are not certified or supported to install or run on Microsoft Windows Server 2012 R1/R2.

Microsoft Windows Server 2012 R1/R2 certification starts with 'Oracle Database 11gR2 (11.2.0.4) and Oracle Database 12cR1 (12.1.0.1).

We recommend using Oracle Database Version 12cR1 (12.1.0.2) for Microsoft Windows Server 2012 R1/R2.

# **Oracle Client Version**

The Oracle Client versions 11gR2 (11.2.0.4, 32-bit) and 12cR1 (12.1.0.1/12.1.0.2, 32-bit) are compatible with Windows 7, Windows 8/8.1/8.1, Windows Server 2008 R2 and Windows Server 2012 R1/R2.

Note: Oracle Client Version 12cR1 (12.1.0.1/12.1.0.2) is not yet certificated for MFPOS8 and IFC8 installations. Please use the Oracle Client Version 11gR2 (11.2.0.4).

# 2 Suite8 Setup

### Prerequisites

Please refer to the **Suite8 Software Description** and **Suite8 System Requirements** available on the Suite8 SharePoint or FTP Server.

### Preparing the Installation

The following steps are required for the Oracle Client/Database installation:

## **Verify Event Logs**

- 1. Verify that there are no errors in the event log file. The Oracle installation should not be started if there are system errors listed in the event log which could stop Oracle running.
- 2. Open a command prompt, use the option **Run as administrator** and type **eventvwr.msc** to launch the Event Viewer utility.

## **Configure Regional settings**

The Windows regional settings should be configured using English (United States).

- 1. Open a command prompt, using the option **Run as administrator** and type **intl.cpl** to launch the Region utility.
- 2. Select the **Formats** tab. In the **Format** option select **English (United States)**. Click **OK** to save changes.

**Note:** The language must be set to English (United States) for the Oracle Client installation. When the installation has been completed this should be changed back to the local language.

### Enable the .NET Framework 3.5 (2.0) feature (Windows 7)

You can enable the .NET Framework 2.0/3.0/3.5 through the Control Panel.

- 1. Open a command prompt, using the option **Run as administrator** and type **appwiz.cpl** to launch the Programs and Features utility.
- 2. In the **Programs and Features** panel, select the option **Turn Windows features on or off** (upper left hand corner of the window).

3. Select the feature **.NET Framework 3.5 (includes .NET 2.0 and 3.0)** in the **Windows Features** window and click **OK** to save the changes.

### Enable the .NET Framework 4.x, 3.5 (2.0) feature (Windows 8/8.1)

You can enable the .NET Framework 2.0/3.0/3.5/4.0/4.5 through the Start screen.

- 1. Open the Start screen and search for **Programs and Features**. Launch the Programs and Features utility.
- 2. In the **Programs and Features** panel, select the option **Turn Windows features on or off** (upper left hand corner of the window).

3. Select the feature **.NET Framework 3.5 (includes .NET 2.0 and 3.0)** and **.NET Framework 4.5** in the **Windows Features** window and click **OK** to save the changes.

### **Disable the Firewall**

During the installation, it is necessary to disable the Windows Firewall and UAC (User Account Control). After the installation they need to be activated again.

- 1. Open a command prompt (with the option **Run as administrator**) and type **firewall.cpl** to launch the Firewall Configuration utility.
- 2. In the Firewall Control Panel, click **Turn Windows Firewall on or off** (upper left hand corner of the window).

3. Restart the computer to Turn off the **User Account Control**.

### **Getting Started**

- 1. Copy the Install shield files to a temporay directory, such as C:\INSTALL
- 2. To start the Suite8 installation, select the **setup.exe** from the Suite8 install directory. From the drop-down menu, select **Run as Administrator...**

3. Click **Next** to continue.

- 4. Select the type of installation:
  - Client/Workstation Installation
  - Suite8 Leisure Installation
  - Oracle Server, Oracle Instance and Version Control Installation
  - Translation Studio
  - Suite8 Homepage
  - XML Interface
  - Oracle SQL Developer
  - Crystal Reports 12 Runtime
  - Oracle Server Maintenance Jobs Installation

### **Client/Workstation Installation**

The client/workstation installation installs and registers all of the Suite8 required components such as Crystal 12 depending on the selection. It also detects if Oracle is installed or not.

# Suite8 Leisure

Selecting Suite8 Leisure installs all the required components required to use the program module within the Suite8 application.

## **Oracle Server, Oracle Instance and Version Control Installation**

If the option: '**Oracle Server, Oracle database and Version Control Installation** is selected, a search for an existing Oracle Installation is performed. If none is found then the install shield guides the Oracle Server Installation and creates an Oracle instance/database as well as Suite8 Schemas. All required files for Suite8 Version Control are also installed on the server.

Version Control is a tool to speed up the upgrade process. Once Version Control is active, the Suite8 program files can be placed in one location on the server and each time a user logs in, a check is performed ensuring that the correct version of the program files is located on the local drive of the machine. If the correct version is not located then it is copied over from the server.

## **Translation Studio**

Selecting Translation Studio installs all required components for using Translation Studio. Translation Studio is a tool for translating program messages and database contents.

### Suite8 Homepage

Section of the	
()	
(11)	
N/r	

Selecting Suite8 Homepage installs Suite8 Homepage, the web booking engine. For system requirements and setup information, please read the documentation for Suite8 Homepage.

## **XML** Interface

Selecting **XML Interface** installs Suite8 XML Interface. This interface is required for example for Suite8 Homepage, Hotel Connector and various Interfaces such as VariBon and Hurdle XML Interface.

## Install Oracle SQL Developer

Selecting Oracle SQL Developer installs all components for SQL Developer.

## **Crystal Reports 12 Runtime**

Selecting this option installs Crystal 12 runtime files.

### **Oracle Server Maintenance Jobs Installation**

Selecting this option installs Oracle Backup and Maintenance Jobs and required files.

# 3 Installation of Suite8 Client

1. Copy the \CD2 directory from the Oracle 12cR1 or 11gR2 DVD to a temporay directory, such as C:\INSTALL

**Note:** Oracle Client Version 12cR1 (12.1.0.1/12.1.0.2) is not yet certificated for MFPOS8 and IFC8 installations. Please use the Oracle Client Version 11gR2 (11.2.0.4).

2. Select Client/Workstation Installation and click Next to continue.

14. The following step requires the user and complex password to be entered to logon to the Suite8 live database and create the command line parameters. Click **Next** to continue.

**Note**: The **complex password** depends on the used V8LIVE user account password from the Oracle Database setup process.

Complexity requirements are:

- Not to contain the user's account name or parts of the user's full name that exceed two consecutive characters
- Minimum password length of 8 characters
- First character of password MUST be a character
- Password must contain at least 1 Lowercase character (a through z)
- Password must contain at least 1 Uppercase character (A through Z)
- Password must contain at least 1 digit (0 through 9)
- Password can contain special character: !\*()\_-+{[]]@~#.,

2. Turn on the notification by changing the UAC to Default. Click OK to save the changes.

## Change the User Access Rights for the Oracle Client/Suite8 Client files

1. Open a command prompt (with the option **Run as administrator**).

Type the following commands for Oracle 12cR1 client: cd /D c:\ icacls c:\oracle\12.1.0\client\network\admin\\* /grant Users:F /T /C icacls c:\fidelio\\* /grant Users:F /T /C

Type the following commands for Oracle 12cR1 client:

cd /D c:\

icacls c:\oracle\11.2.0\client\network\admin\\* /grant Users:F /T
/C

```
Image: A state of the state
```

icacls c:\fidelio\\* /grant Users:F /T /C

Note: For German installations, the following commands are used:

icacls c:\oracle\1x.x.0\client\network\admin\\* /grant Benutzer:F
/T /C

icacls c:\fidelio\\* /grant Benutzer:F /T /C

## 4 Installation of the Suite8 Database

1. Copy the \CD1, \CD4 and CPU directory from the Oracle 12cR1 or 11gR2 DVD to a temporay directory, such as C:\INSTALL.

3. The Oracle Instance/Schema Setup Wizard will be started. Click Next to continue.

4. The next screen displays a read me text file detailing the installation process. Read this information carefully and make sure that all required transactions have been completed. Click **Next** to continue.

5. Select either the Oracle Database/Fidelio Suite8 Version Control or the Fidelio Suite8 Version Control option. The first option will install the Fidelio Suite8 Version Control, the Oracle database and the Night Auditor Reports Share. The second option will only install the Fidelio Suite8 Version Control and the Night Auditor Reports Share. Select the first option and click **Next** to continue.

6. If the Oracle Database software is not installed the following message is displayed. Click **Yes** to continue.

Salay Type Salay Salay Salay Salay Salay	Romo Sumta Cracke Instance/Version Control Selve	-	
<b>I</b>	Power web's and your O chain freeman Pohlo Ltd Hill Version Tranket Operation Pohlo Versit Concert free Souch installation Pohlo Versit Concert free Souch installation and The Souch Pohlo Versite Versi		
(MATCH)	clast (300)	tere 1	

7. The next step prompts with the path for the Fidelio Version Control Base directory, the default is: **D:\FIDELIO**. Select **Browse** to change the default path. The install shield performs the following tasks:

Creates the following sub directories on the Version Control Base directory (for example: **D:\FIDELIO**):

\PROGRAMS \HTML \VERSIONCTRL

Copies all the Fidelio Suite8 files to the directories: .\**PROGRAMS, .\HTML** and .\**VERSIONCTRL** and creates a Windows Share: VersionCtrl\$ for the Version Control Base directory.

Click Next to continue.

8. The following step requires the complex password to be entered for the Windows User account (Suite8.VerCtrl) for the Fidelio Version Control Share/Fidelio Night Auditor Report Share. Click **Next** to continue.

- Not to contain the user's account name or parts of the user's full name that exceed two consecutive characters
- Minimum password length of 12 characters
- First character of password MUST be a character
- Password must contain at least 1 Lowercase character (a through z)
- Password must contain at least 1 Uppercase character (A through Z)
- Password must contain at least 1 digit (0 through 9)
- Password can contain special character: !\*()\_-+{[}]@~#.,

- 14. If the selected Oracle Database DVD directory is 12c, the Database Type has to be selected. The following setup types are available:
- Oracle 12c Database (Preferred)
- Oracle 12c Multitenant Database

Note: The selection of the option: Oracle 12c Multitenant Database requires "Experience" with Oracle 12c Multitenent Databases.

Architecture Overview

A new option for Oracle Database 12c, Oracle Multitenant delivers a new architecture that allows a multitenant container database to hold many pluggable databases. An existing database can simply be adopted with no application changes required. Oracle Multitenant fully complements other options, including Oracle Real Application Clusters and Oracle Active Data Guard.

High Consolidation Density

The many pluggable databases in a single multitenant container database share its memory and background processes. This enables consolidation of many more pluggable databases compared to the old architecture, offering similar benefits to schema-based consolidation but with none of the major application changes required by that approach.

Rapid Provisioning and Cloning Using SQL

Creating pluggable databases, moving pluggable databases between containers, and cloning pluggable databases are done with new SQL commands and take just seconds. When the underlying file system supports thin provisioning many terabytes can be cloned almost instantaneously simply by using the keywords "snapshot copy" in the SQL command.

New Paradigms for Rapid Patching and Upgrades

The investment of time and effort to patch one multitenant container database results in patching all of its many pluggable databases. To patch a single pluggable database, you simply unplug/plug to a multitenant container database at a different Oracle Database software version.

- Manage Many Databases as One By consolidating existing databases as pluggable databases, administrators can manage many databases as one. For example, tasks such as backup and disaster recovery are performed at the multitenant container database level.
- Pluggable Database Resource Management

By consolidating existing databases as pluggable databases, administrators can manage many databases as one. For example, tasks such as backup and disaster recovery are performed at the multitenant container database level.

23. If you have **selected** the **Oracle 12c Multitenant Database** option, the following step requires the complex password to be entered for the Oracle SYS, SYSTEM and PDBSYS account. Click **Next** to continue.

Complexity requirements are:

- Not to contain the user's account name or parts of the user's full name that exceed two consecutive characters
- Minimum password length of 8 characters
- First character of password MUST be a character
- Password must contain at least 1 Lowercase character (a through z)
- Password must contain at least 1 Uppercase character (A through Z)
- Password must contain at least 1 digit (0 through 9)
- Password can contain special character: !\*()\_-+{[]]@~#.,

3. Select **Turn on Windows Firewall** in the **Windows Firewall Settings** window and click **OK** to save the changes.

- 4. Close the Firewall Configuration utility.
- 5. Enter the following commands to add the Oracle 11gR2 Executable and Oracle Listener IP Port to the Firewall:

**Note:** The program path depends on the directory for the Oracle Home during the Installation (for example: C:\ORACLE\11.2.0\DATABASE).

cd /D c:\windows\system32

netsh advfirewall firewall add rule name="Oracle TNSLSNR Port" dir=in action=allow protocol=TCP localport=1521

netsh advfirewall firewall add rule name="Oracle TNSLSNR Executable" dir=in program="c:\oracle\11.2.0\database\bin\tnslsnr.exe" action=allow profile=any

netsh advfirewall firewall add rule name="Oracle RDBMS Kernel Executable" dir=in program="c:\oracle\11.2.0\database\bin\oracle.exe" action=allow profile=any

6. Enter the following commands to add the Oracle 12cR1 Executable and Oracle Listener IP Port to the Firewall:

**Note:** The program path depends on the directory for the Oracle Home during the Installation (for example: C:\ORACLE\12.1.0\DATABASE).

#### cd /D c:\windows\system32

netsh advfirewall firewall add rule name="Oracle TNSLSNR Port" dir=in action=allow protocol=TCP localport=1521

netsh advfirewall firewall add rule name="Oracle TNSLSNR Executable" dir=in program="c:\oracle\12.1.0\database\bin\tnslsnr.exe" action=allow profile=any

netsh advfirewall firewall add rule name="Oracle RDBMS Kernel Executable" dir=in program="c:\oracle\12.1.0\database\bin\oracle.exe" action=allow profile=any

### **Enable User Access Control**

1. Start the User Access Control Configuration Assistant by typing the following command:

cd /D c:\windows\system32 useraccountcontrolsettings.exe

 Published System 32 Assessment	controlantCing:.aan		
		Hise Account Control Sartings

	-	D Ant successful dat.	
	the stands		
	tank they		
		-%/OK	Cateau

2. Turn on the notification by changing the UAC to **Default**. Click **OK** to save the changes.

## Change the User Access Rights for the Oracle Database files

1. Open a command prompt (with the option Run as administrator).

Type the following commands **for Oracle 12cR1 Database**:

cd /D c:\

```
icacls c:\oracle\12.1.0\database\network\admin\* /grant Users:F /T /C
```

Type the following commands for Oracle 11gR2 Database:

```
cd /D c:\
icacls c:\oracle\11.2.0\database\netwo
```

Note: For German installations, the following commands are used:

icacls c:\oracle\1x.x.0\database\network\admin\\* /grant Benutzer:F /T/C

## How to import SUITE8 Data export into Oracle Database with Multilingual Support (UNICODE)

- Downlaod the following files from the SUITE8 FTP Server (directory: \Install\_Shields\8\_9\_6\_0\UNICODE) to a temporay directory, such as C:\INSTALL UNICODEmviews.sql UNICODEpost\_sql UNICODEpost\_imp.sql UNICODEpost\_sys.sql UNICODEpre.sql UNICODEsequenceFIX.sql UNICODEuser.sql UNICODEuserarc.sql UNICODE\_change\_columns.sql
- 2. Copy the SUITE8 Data Export file to the temporay directory, such as C:\INSTALL
- 3. Open a command prompt (with the option **Run as administrator**) and type the following commands to start the Oracle Import:

**Note:** The values for **<sys password>**, **<system password>** depends on the Oracle Database setup. For this example we are using the following SUITE8 User accounts: V8LIVE (password: live), V8LIVEARC (password: livearc). The SUITE8 accounts depends on the SUITE8 installation.

cd /D C:\install

SET ORACLE\_HOME=C:\ORACLE\11.2.0\DATABASE

PATH=%ORACLE\_HOME%\bin;%SystemRoot%\system32;%System Root%;%SystemRoot%\System32\Wbem

- 5. Click OK to save the changes. Close the System Properties utility.
- 6. Check the functionality by typing the following commands:

cd /D C:\ORACLE\1x.x.0\CLIENT\BIN tnsping V8

As a result, the Oracle Client should use the **Net8** files from the Oracle Database. (Used parameter files: C:\ORACLE\1x.x.0\DATABASE\network\admin\sqlnet.ora)

## **Using Suite8 Database Server Shares**

**Note**: If the Suite8 Environment is **NOT** using a Domain Controller, you can proceed with the following steps for Suite8 Version Control and Shared Suite8 Night Auditor Reports.

- 1. During the Suite8 Database Installation the Install shield has create two Windows Shares (VersionCtrl\$ and 1MFHOTEL\$) and one Windows user account (Suite8.VerCtrl) for using with Suite8 Version Control and Night Auditor Reports Share.
- 2. To use the Suite8 Version control, please create a script: V8VERSIONCTRL.CMD and place the script on the Public Desktop. The script should have the following content:

**Note**: The Parameter **<SUITE8\_DB\_SERVER>** depends on used Oracle Server Name for the Suite8 Database Server. The parameter **<complex password>** depends on the used user account password.

3. Run the script for testing. If the system is asking for Login credentials, please enter as Login name: Suite8.VerCtrl and the secure password. Mark the option: **Remember my credentials**.
|                                | Windows Security ×  |
|--------------------------------|---|
| Enter netwo<br>Enter your cred | ork credentials<br>entials to connect to: DE-B-AC-WIN8        |
| P                              | Suite8.VerCtrl  Omain: DE-B-NB12-009  Remember my credentials |
| 🔞 The i                        | user name or password is incorrect.                           |
|                                | OK Cancel   |

4. If the Suite8 Version detects missing Suite8 program files, the files will be copied to the local folder.

micros FIDELIO	
Copy from \\DE-B-AC-WIN8\VersionCtrl\$\PROGRAMS\FidelioCalendar.dll	
To C:\FIDELIO\PROGRAMS\FidelioCalendar.dll	

5. For using the Night Auditor Reports Share for the Suite8, open a command prompt and type the following command.

cd /D c:\ net use J: Error! Hyperlink reference not valid.<SUITE8\_DB\_SERVER>\1MFHOTEL\$

## /User: <ORACLE\_DB\_SERVER>\Suite8.VerCtrl /persistent:yes

**Note**: The Parameter **<SUITE8\_DB\_SERVER>** depends on used Oracle Server Name for the Suite8 Database Server.

6. After the command completed successfully, check the created drive mapping. Type the following command:

## net use

		Command Prom	pt – 🗆	×

**Note:** We are creating the Oracle user account: V8LIVE with the complex password. In addition we also creating a Oracle user account: V8LIVE**ARC** with the complex password. This user account is required for the SUITE8 Archive functionality.

11. The next step is similar to the previous step, but requires the username and complex passwords to run maintenance tasks logged on as Suite8 training/SUITE8 Archive training user. Click **Next** to continue.

Complexity requirements are:

- Not to contain the user's account name or parts of the user's full name that exceed two consecutive characters
- Minimum password length of 8 characters
- First character of password MUST be a character
- Password must contain at least 1 Lowercase character (a through z)
- Password must contain at least 1 Uppercase character (A through Z)
- Password must contain at least 1 digit (0 through 9)
- Password can contain special character: !\*()\_-+{[]]@~#.,

14. The install shield performs the following tasks:

Creates the following directories on the MAINTENANCE drive (for example: D:\): \BACKUP \BACKUP.RMAN\SCRIPTS \BACKUP.RMAN\LOG \EXP\DAILY

Copies the maintenance scripts to the directory: \BACKUP.RMAN\SCRIPTS

Creates the Windows user account: Suite8.Scheduler and adds the Windows user: Suite8.Scheduler to the local group: **ADMINISTRATORS**.

Modifying the environment parameters for the Oracle Recovery Manager (RMAN)

Oracle RMAN Backup files are located in the directory: **\BACKUP** Maintenance scripts are located in the directory: **\BACKUP.RMAN\SCRIPTS** Maintenance log files are located in the directory: **\BACKUP.RMAN\LOG** 

Creating 5 scheduled jobs:

- SUITE8 db schema analyze
- Every day at 2:15 am the scheduled task is running the DBMS\_STATS package to analyze all tables and indexes of the V8LIVE user.
- SUITE8 db clean log files
- Every day at 0:05 am the scheduled task is cleaning the Oracle Dump folders, creating a copy of the Database Alert file and creating a copy of the LISTENER Log file.
- RMAN backup database
- Every day at 11:00 pm the scheduled task is creating a complete backup of the Oracle Database via Oracle Recovery Manager (RMAN). After this the scheduled task is deleting all Oracle Database Backups – older than the latest successfully Oracle Database Backup.
- RMAN backup archive
- Every 3 hours the scheduled task is creating a backup of all Oracle Database Archives via Oracle Recovery Manager (RMAN) - which are not backed up for 2 times. After this the scheduled task is deleting all Oracle Archive Backups – older than the latest successfully Oracle Database Backup.
- RMAN maintenance
- Every day at 09:15 pm the scheduled task is checking the Oracle Database/Archive Backups via Oracle Recovery Manager (RMAN). The Task is looking for obsolete and not existing Backups and deleting not required Oracle Archives
