Version 8.9.2.0

Check list with upgrade steps for **8.9.2.0**:

Make an export of the user V8LIVE.

Make sure, that the database has been either updated as a minimum to version 8.9.0.0 or to the latest officially released version 8.9.0.5.

Run all the update scripts needed for this new version.

Updating from 8.9.0.0:

-> 8_9_0_0_to_8_9_2_0#0.sql

-> 8_9_0_0_to_8_9_2_0#1.sql

-> 8_9_0_0_to_8_9_2_0#2.sql

-> 8_9_0_0_to_8_9_2_0#3.sql

-> 8_9_0_0_to_8_9_2_0#4.sql

Updating from 8.9.0.5:

-> 8_9_0_5_to_8_9_2_0#0.sql

-> 8_9_0_5_to_8_9_2_0#1.sql

-> 8_9_0_5_to_8_9_2_0#2.sql

-> 8_9_0_5_to_8_9_2_0#3.sql

Run the following statement, connected to Oracle as SYSDBA. The variable SCHEMANAME needs to be replaced with the name of the live user (usually V8LIVE) and once more with the name of the training user (usually V8TRAIN):

GRANT execute on dbms_crypto to SCHEMANAME;

After the update, please run the following scripts:

-> 01_allviews.sql

-> 02_allprocs.sql

-> 03_generated.sql

-> 04_autoindexes.sql

-> 05_200index.sql

-> 06_comments.sql

-> 07_afterVersionUpdate.sql

Rebuild all indexes as described in the documentation (see also <ftp.v8.myfidelio.com/Oracle/Publications> connected as user V8).

Run 08_gatherstatisticsforall.sql (see also <ftp.v8.myfidelio.com/Oracle/Publications> connected as user V8).

Use latest register.bat for new installations or minregister.bat for updates, both are provided with the new executables and DLL's.

Update existing VerCtrl.ini with new DLL's, Html's and Help Files or use latest one from FTP.

Run Sequence Fix (Suite 8 -> Setup -> Miscellaneous -> System Maintenance -> Database -> Sequence Fix).

Execute Primary key existence check (Suite 8 -> Setup -> Miscellaneous -> System Maintenance -> Miscellaneous -> System Check -> Database -> Primary key existence) and make sure no primary keys are missing (except for WLNR and WNEB).

Update Mailing (Suite 8 -> Setup -> Miscellaneous -> Updates -> Mailing Update -> import

mailing.sql provided with this release)

Update Mailing (Suite 8 -> Setup -> Miscellaneous -> Updates -> Translation -> Import Translation Manually -> import translation file provided by local office)

Please note that updating an existing Online Interface installation requires to first uninstall and then to reinstall the interface by using the new Online Interface Install Shield shipped with release.

Check the release notes for new features/changes in Suite 8.

Please refer to TT 5 for an overview of all new user rights.

Check which version of Oracle is used at the moment. All Oracle versions prior to 10g Release 2 (10.2.0.5) are not recommended anymore since Version 8.8.0.0 or higher, but still supported by MICROS-Fidelio. Oracle 9i is not supported by ORACLE, because this version is "End-of-Life". Oracle 10g Release 2 (10.2.0.5) for the database installation or Oracle 11g Release 2 (11.2.0.2) for the database installation (32bit or 64bit) **and** client installation (32bit) has to be used. Please note, it is imperatively required to install Oracle with the parameter setting 'compatible=10.2.0.4'. Please refer to the latest available install shield 8.9.0.3.

□ Run the following statements, connected to Oracle as SYSDBA, to ensure these grants have been enabled for standard schemas. The variable SCHEMANAME needs to be replaced with the name of the live user (usually V8LIVE) and once more with the name of the training user (usually V8TRAIN):

```
GRANT connect to SCHEMANAME;
GRANT create table, create type, create procedure, create view, create trigger, create sequence to SCHEMANAME;
GRANT select on v_$session to SCHEMANAME;
GRANT select on v_$database to SCHEMANAME;
GRANT select on dba_indexes to SCHEMANAME;
GRANT select on dba_tables to SCHEMANAME;
GRANT select on dba_users to SCHEMANAME;
GRANT select on dba_tab_columns to SCHEMANAME;
GRANT select on dba_ind_columns to SCHEMANAME;
GRANT select on dba_ind_expressions to SCHEMANAME;
GRANT select on v_$sess_io to SCHEMANAME;
GRANT select on v_$statname to SCHEMANAME;
GRANT select on v_$sql to SCHEMANAME;
GRANT select on v_$sysstat to SCHEMANAME;
GRANT select on v_$parameter to SCHEMANAME;
GRANT select on v_$instance to SCHEMANAME;
GRANT execute on dbms_crypto to SCHEMANAME;
```

□ Run the following statements, connected to Oracle as SYSDBA, to ensure these grants have been enabled for standard archive schema (in case backup functionality is or will be used). The variable SCHEMANAME needs to be replaced with the name of the live user (usually V8LIVE) and the variable ARCHIVESCHEMA with the name of the archive user (usually V8LIVEARC):

```
GRANT connect to ARCHIVESCHEMA;
GRANT unlimited tablespace to ARCHIVESCHEMA;
GRANT delete on ARCHIVESCHEMA.wlog to SCHEMANAME;
GRANT insert on ARCHIVESCHEMA.wlog to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.wlog to SCHEMANAME;
GRANT update on ARCHIVESCHEMA.wlog to SCHEMANAME;
GRANT delete on ARCHIVESCHEMA.wtxt to SCHEMANAME;
GRANT insert on ARCHIVESCHEMA.wtxt to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.wtxt to SCHEMANAME;
GRANT update on ARCHIVESCHEMA.wtxt to SCHEMANAME;
GRANT delete on ARCHIVESCHEMA.zche to SCHEMANAME;
GRANT insert on ARCHIVESCHEMAA.zche to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.zche to SCHEMANAME;
GRANT update on ARCHIVESCHEMAA.zche to SCHEMANAME;
GRANT delete on ARCHIVESCHEMAA.zdat to SCHEMANAME;
GRANT insert on ARCHIVESCHEMA.zdat to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.zdat to SCHEMANAME;
GRANT update on ARCHIVESCHEMA.zdat to SCHEMANAME;
GRANT delete on ARCHIVESCHEMA.zinb to SCHEMANAME;
GRANT insert on ARCHIVESCHEMA.zinb to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.zinb to SCHEMANAME;
GRANT update on ARCHIVESCHEMA.zinb to SCHEMANAME;
GRANT delete on ARCHIVESCHEMA.ztxt to SCHEMANAME;
GRANT insert on ARCHIVESCHEMA.ztxt to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.ztxt to SCHEMANAME;
GRANT update on ARCHIVESCHEMA.ztxt to SCHEMANAME;
GRANT delete on ARCHIVESCHEMA.zlog to SCHEMANAME;
GRANT insert on ARCHIVESCHEMA.zlog to SCHEMANAME;
GRANT select on ARCHIVESCHEMA.zlog to SCHEMANAME;
```

GRANT update on ARCHIVESHEMA.zlog to SCHEMANAME;

In case the upgrade is performed from a version smaller than 8.8.0.0, then a new set of Crystal runtime 12 SP2 needs to be installed on each workstation running Suite 8. An install shield is available on the FTP (ftp.v8.myfidelio.com/CrystalRuntime/12.0/Crystal_12_InstallShield_SP2.zip). For Crystal 12 runtime it is necessary running on one of the following Operating Systems: OS XP, Windows 2003/2008 Server, Vista or Windows 7. Windows 2000 is not supported.

Please note, to verify that Crystal runtime 12 SP2 have been properly installed, the following entry in the directory C:\WINDOWS\assembly (C:\WINNT\assembly in case it's a server) needs to exist: CrystalDecisions.CrystalReports.Engine - Version 12.0.2000.0

Please also note, as a prerequisite .Net Framework 3.5 needs to be installed.

With version 8.8.4.0 a new FidelioCrystalNET.dll has been introduced, which is located in the Fidelio Programs Directory and needs to be registered once. Registration can be either done manually by using the Assembly Registration Tool (run Regasm.exe from Command Prompt as administrator with the following command:

'C:\Windows\Microsoft.NET\Framework\v2.0.50727\regasm C:\fidelio\programs\fideliocrystalnet.dll'. The .NET Framework home directory and Fidelio Programs directory might differ on some workstations or servers. Please note, that for XML-IFC workstations the Regasm.exe needs to be executed with the additional parameter '/codebase') or starting Suite8 once as Administrator (Windows 7: Right-mouse click -> Run as Administrator) on all workstations not used as XML-Interface. The register.bat has been also adapted to include the registration of the new Dll, however it needs to be modified for XML-Interface PCs.

Each workstation using XML communication from Suite 8 needs to have MSXML 4.0 or 6.0 installed. This is not only required for the XML-Interface, but also for Fiscal Printer Interface, Allgaeu Walser Card or Leisure/Bella Vita. The latest Install Shields (8.8.2.0 or higher) are also checking the version of MSXML and will give a warning message in case only elder versions are found.

The file ifcaction.dll (required for ifcbusi.dll) has been changed to ifcaction.tlb, which requires a new version of verctrIV8.exe in order to successfully register this library after having been copied to other workstations. Another executable REGTLIB.exe needs to be in the same directory as the verctrIV8.exe. Both files are available on the FTP.

V8 Accounts Receivable

Accounts Receivable

New Functionality/Feature

14310	TT 14310 Cashiering->Accounts Receivable->Accounts Transactions: The column 'Remarks' has been added to the Accounts Receivable Transactions Grid and when editing an account on the postings dialog box. In this column, the comments of the corresponding posting are displayed.	47669
19796	TT 19796 Accounts Receivables & Configuration->Global Settings->Country Specifics1 tab->Enable ESR Import: The leading zeros and blanks have been removed and a decimal separator has been added to the amount and fee fields in the ESR Import files.	75694
19942	TT 19942 Cashiering->Accounts Receivable & Global Settings->Accounts Receivable: Several issues have been addressed since Suite8 version 8.9.0.4 for Accounts Receivable when paying invoices: If the flag: 'Show Valuta Date for Payment' is activated on the Global Settings->Accounts Receivable tab, the field: 'Valuta Date' on the Accounts Receivable Payment Posting dialog box can be completed with the date the payment was actually received. In previous versions, when applying a credit and selecting the option: 'New payment applied selectively', then changing the date of the payment to a date in the past, the entered date in the field 'Valuta Date' was not saved but the Suite8 date instead. This has been fixed. Additionally the flag: 'Always store payment receipt' has been added to the Global Settings->Accounts Receivable tab. If activated, a copy of the payment receipt is always stored, even if it is not printed.	76166
20079	TT 20079 Cashiering->Accounts Receivable & Configuration->Users->User Definition->Rights: To restrict compression of postings in Accounts Receivable, the rights: 'Compression of Accounts Transaction Postings' and 'Compression of CC Transaction Postings' have been added under Users->User Definition->Rights->Accounts Receivable->Transactions.	74058
20084	TT 20084 Accounts Receivable & Global Settings->Country Specifics2 tab->Egypt Settings: The flag: 'Allow manual exchange rate' has been added to the Global Settings ->Country Specifics 2 tab under Egypt Settings. If activated, it is possible to manually overwrite the exchange rate if a foreign currency exists on the Egyptian Accounts Receivable Invoice.	72671
20717	TT 20717 Cashiering->Accounts Receivable->Payment Receipts & Configuration->Global Settings->Country Specifics2 tab->Portugal Settings->Enable Invoice Signature: If the flag: 'Enable Invoice Signature' is activated, since Suite8 Version 8.8.4.8, the Payment Receipts from Accounts Receivable are no longer included, there is no record created in the table: 'ZINS' for Portuguese Invoice Signatures.	

Issues fixed

20129	TT 20129 Cashiering->Accounts Receivable & Decimal Places: Issues with the display and rounding of decimal places in Accounts Receivable have been addressed. For example transferring of invoices from one account to another one was not possible, if the decimal places on the currency definition were larger than two, the error message: 'The amount you are trying to transfer is greater than the open balance.' was displayed. Some grids in Accounts Receivable used the default of two decimal places for rounding and displaying, even if the number of decimal places was larger on the

Accounts Receivable

Issues fixed

configured base currency. This has been fixed since Suite8 version 8.9.0.4.

77099

V8 Cashiering

Cashiering

New Functionality/Feature

- | | | |
|-------|---|-------|
| 6265 | TT 6265 Cashiering->Billing->Financial Accounts, Reservation Navigator->Financial Accounts->Options & Traces: Functionality has been added allowing entering Traces on financial accounts. On the reservation navigator when selecting Financial Accounts tab and choosing a financial account, the option 'Traces' can be selected. From Cashiering->Billing when generating or editing a financial account, the 'Traces' button can be pressed to open the Traces dialog box. When configuring Activity & Trace Groups under Configuration->CRM, the Activity or Trace Group can be linked to the group: 'Financial Accounts'. | 26481 |
| 13438 | TT 13438 Cashiering->ZPOS: Since Suite8 Version 8.9.0.3, the fields: 'ZPOS_ORIGINATED_YRES' and 'ZPOS_ORIGINATED_ZFAC_ID' are filled with NULL instead of 0 if no 'ID' is linked. This has been changed to enhance the response time when selecting information from the table ZPOS. However, this change was not announced and the view used for the financial accounts History Statistics calculation in: 'SHIS' was not adapted. If the property is already running on Suite8 Version 8.9., it is strongly recommended to run a recalculation on this file. This is done from the Setup drop down menu by selecting Miscellaneous->System Maintenance->Cashiering->Recalculate Month/ Year Values and selecting History 'SHIS' and pressing 'Run' button. In addition, please also check all custom views. | |
| 14064 | TT 14064 User Rights: The two existing user rights Reservation->'Rebate Linking' and Booking Master->'Rebate Linking' have been enhanced. In the past these user rights were not considered when linking or removing a rebate code from the billing screen. This has been fixed since Suite8 version 8.9.0.4. | 70692 |
| 16605 | TT 16605 Cashiering->Billing->Rounding differences & Configuration->Global Settings->Country Specifics2 tab: The flag: 'Correct Payment amounts' has been added. If activated, the fields: 'ZPOS_UNITPRICE' and 'ZPOS_GROSSUNITPRICE' in the table 'ZPOS' are filled with exactly 4 decimals for payment postings. This has been added for avoiding possible rounding differences when using foreign currency, splitting posting using percentage or performing an adjustment. | |
| 16645 | TT 16645 Cashiering->Billing->Guest Name: If a profile has greeting and title entered, this is indicated in the field Guest Name. In previous versions it was only name and first name of the guest. | |
| 16771 | TT 16771 Setup->Miscellaneous->System Maintenance->Cashiering & Credit Card numbers: The menu option: 'Change Credit Card Numbers to Dummy Numbers' has been added to the Cashiering menu under System Maintenance. It should be used in demo or training systems of Suite8, to make sure that all credit card numbers used in the training or demo system are dummy numbers and to avoid fraud. It is also necessary to activate the user log: 'Change Credit Card Numbers to Dummy Numbers' in the training or demo system as well as in the live system to record each time the credit card number conversion is launched and to proof that all PCI, Payment Card Industry Data Security, standards are held. | |
| 17767 | TT 17767 Cashiering->Billing: When using drag & drop functionality on an enhanced deposit posting to move this posting to a checked in reservation or financial account, the credit posting is correctly created on the checked in account. In previous versions, the inverse credit posting was not made. | |

Cashiering

New Functionality/Feature

- 18690 TT 18690 Cashiering->Billing->Open a guest folio->Options->Post Daily Charges: When performing 'Post Daily Charges', the field ' ZPOS_COMMENT' is filled with the related date for future date postings since Suite8 version 8.9.0.5. 65756
- 18737 TT 18737 Cashiering->Billing->Posting & User rights: The option to override a default price when selecting a department code with a default price attached is now driven by the user right: 'Change default Prices' under Configuration->Users->User Definition->Cashiering. 67467
- 19007 TT 19007 Cashiering->Billing->Billing Window & Rebate Functionality: When using Rebate functionality it is now possible linking the rebate code per billing window, by editing the selected window on the guest folio and entering a rebate code. As soon as a rebate code is linked, the message: 'You assigned a Rebate Code to this window. Do you want to apply it to existing postings?' is prompted, selecting 'Yes' applies the rebate to existing postings, selecting 'No' only links the rebate code to the billing window. Hovering with the mouse over to the indicator on top, displays the information about the rebate code: This window has a rebate code attached: 'The description of the linked rebate code'. The user rights: 'Rebate linking' under Reservation and 'Booking Master' have been enhanced to also consider rebate linking to billing window. 69007
- 19525 TT 19525 Cashiering & Global Settings->Interface4 tab->Fiscal Printer Interface. The fiscal printer interface has been enhanced since Suite8 Version 8.9.0.5 for Sweden. Fiscal Printer interface activates, each time an invoice is printed, a communication with the fiscal control unit and the view: 'V8_FISCAL_FOLIO_INFO' collects all required information passed on to the fiscal device.
The flag: 'eTax' has been added on the Global Settings->Interface4 tab under 'Fiscal Printer Interface'. If activated, a 'Timeout' in seconds can be defined and the option: 'Disable fiscal printer for specific department codes' can be activated to disable department codes for the fiscal printer interface. On the department code configuration, the field: 'Disable for Fiscal Printer' is then available to indicate that this department code is not included in the fiscal printing. For example in Sweden the information for City Ledger invoices should not be stored in the eTax control unit and therefore the department code used for City Ledger payment is excluded from fiscal printing. Each eTax control unit needs to be configured and linked in Terminal & Printers. The following flags have been added under Global Settings->Country Specific3 tab->Swedish Settings:
Disable printing from Billing History
Hide Payment button on Billing Screen
Hide Don't Print & Cancel Button on Folio Screen
For more details on fiscal printer, please consult the document: 'Fiscal Printer Interface'
- 20446 TT 20446 Cashiering->Billing->Check Out Options->Don't Close Folio & Configuration->Global Settings->Billing3 tab->Check Out without closing Folio allowed & Early departure: When checking out a room, not expected to leave, using the option 'Don't close folio', the message: 'Guest xxx, not expected to leave today. Do you want to proceed with Check Out?' is prompted. If the user does not have the right for 'Early Check Out' assigned, early check out without closing the folio is not possible. In previous versions, the message was not prompted when using 'Don't close Folio' and the user right for early departure was not considered when using 'Check out without closing the folio'. 75337

Cashiering

New Functionality/Feature

- | | | |
|-------|--|-------|
| 20567 | <p>TT 20567 Cashiering->Accounts Receivable & Back Office Interface & Global Settings->Billing3 tab->Allow Separate Folio Numbers for City Ledger Folios: Functionality has been added for storing the city ledger folio number, if the flag: 'Allow Separate Folio Numbers for City Ledger' is activated, and include this number in the back office export. The separate folio number is stored in the field: 'ZINV_CITYLEDGERNUMBER '.</p> | 79052 |
| 20579 | <p>TT 20579 Cashiering->Billing->Payment & Global Settings->Country Specifics->Enhanced Deposit Handling: The flag: 'Disable Payment Button for Pre-Arrival Guests' has been added since Suite8 Version 8.9.0.5. If activated the 'Payment' button is disabled for Pre-Arrival Guests and it is necessary using the 'Deposit' button for payments for Pre-Arrival Guests.</p> | |
| 20604 | <p>TT 20604 Cashiering & Global Settings->Misc. Interface4 tab->Fiscal Printer Interface: The fiscal printer function is only called if the live user space is empty or if it is activated from: 'V8LIVE' (example of live user space name), if it is a different name, then the fiscal printer function is not activated.</p> | |

Issues fixed

- | | | |
|-------|--|-------|
| 18654 | <p>TT 18654 Cashiering->Billing->Search & Cashiering->Cashier Functions->Currency Exchange: When entering a financial account number and using tab twice, the search dialog box was displayed. This has been fixed, the search criteria entered under Global Settings->Billing tab are now considered and the search dialog box is not displayed when using tab.</p> | 64476 |
| 19373 | <p>TT 19373 Cashiering->Billing->Open a guest folio->Transfer: The transfer dialog box has been enhanced; if the room number is entered and not selected from the billing search dialog box and there is more than one reservation assigned to this target room, for example when transferring a posting from a not checked in reservation to a room which is linked to more than one reservation in the future, then the first found name is filled in the 'Name' field and the field is indicated with a red frame, on the right panel, the message: 'More than 1 possible target room!' is prompted and highlighted red.</p> | |
| 19995 | <p>TT 19995 Cashiering->Billing->Open a guest folio & Billing Instructions: When using 'Transfer' and selecting 'All Dept. Codes' for transferring all department codes to a room with billing instructions for all department codes to window two, the transferred charges were not routed to window two. Only when selecting the department codes on the source room and then using 'Transfer', the charges were routed to window two on the target room. This has been fixed.</p> | |
| 20042 | <p>TT 20042 Cashiering->Billing->Financial Accounts & Configuration->Users->User Log: The user log recording for 'FA Credit Limit Change' has been enhanced, the limit values are also recorded when creating a financial account and changing the credit limit. In previous versions the user log entry was: 'FA Manual Credit Limit changed' in this scenario and is now: 'Credit limit was changed from 0 to 1000' identical to the user log entry for changing the credit limit on a reservation.</p> | 76796 |
| 20160 | <p>TT 20160 Cashiering->Billing->Open a guest folio->Postings: On the manual postings dialog box, the 'Total Postings' field was not updated when performing a posting. This has been fixed since Suite8 Version 8.9.0.5.</p> | 77391 |

Cashiering

Issues fixed

- | | | |
|-------|---|-------|
| 20263 | <p>TT 20263 Reservation & Cashiering->Billing: When editing a reservation, with a customized direct access to billing, the message: 'This invoice is opened on another workstation' was prompted or on the reservation navigator, when opening the tab: 'Departure', choosing a reservation, selecting 'Billing' and when the folio was opened, pressing 'Reservation', then selecting 'Billing' button, the folio dialog box was opened but a record created in the table 'WLCK', the table recording the record locks. These issues have been fixed since Suite8 Version 8.9.0.4.</p> | 78067 |
| 20318 | <p>TT 20318 Cashiering->Billing->Posting: When performing a manual posting, selecting a department code, the description for the department code was updated, but when pressing 'Posting' button and performing the next manual posting, the description of the selected department code was missing. This has been fixed.</p> | 78037 |
| 20660 | <p>TT 20660 Cashiering->Billing->Article Postings & Billing Instructions: Billing Instructions were not applied when using 'Article Posting'. For example on an invoice with billing instructions for all department codes to the second window on the same invoice, the routing was not applied when posting articles. This has been fixed.</p> | 79494 |
| 20686 | <p>TT 20686 Cashiering->Billing->Options->Tax Exemption & Global Settings->Country Specific2 tab->Tax Exemption Handling: When selecting Tax Exemption from the options menu on a folio with no tax exemption code linked, choosing a tax exemption code and pressing 'Apply' button, the tax exemption was not applied, it only worked when using 'Tax Recalc.' button. This has been fixed.</p> | 79773 |
| 20778 | <p>TT 20778 Cashiering->Billing->Folio->Check out->Folio Styles Selection: Using the keystrokes versa mouse has been reinvented on the folio style selection dialog box. In Suite8 Version 8.9.0.0, it was only possible using the mouse on the folio style selection dialog box, this has been changed back to the usual functionality allowing selecting the folio style using the arrows and confirming 'Print' with 'Enter' to avoid using the mouse.</p> | 80306 |
| 20797 | <p>TT 20797 Cashiering->Billing History->Polish Invoice Correction & Configuration->Global Settings->Country Specifics 2 tab->Polish Invoice Correction (Faktura & Nota Korekta): The polish invoice correction did not work properly, if both flags: Polish Invoice Correction and Duplicate Invoice Printing were activated, the number cycle and the folio style created with this number cycle attached, then in Cashiering->Billing History selecting a folio and clicking on 'Faktura Corr.', selecting the financial account number and adding a new posting or removing an existing one and then clicking 'Post' button and 'Close and Save', then the button 'Check Out' was no longer available. This has been fixed.</p> | 80169 |
| 20801 | <p>TT 20801 Configuration->CRM->Membership Types: When configuring the membership type and defining a department code for the revenue to post to, the charge was posted as card fee. This has been fixed, the description of the department code is used instead and the text 'Card Fee' is moved to the comment field of the posting.</p> | 80614 |

Credit Card Interface

Issues fixed

- | | |
|-------|--|
| 20754 | <p>TT 20754 EFT Interface & Credit Card Reader & Cashiering->Billing->Payment: Credit card read did not work when using the card directly on the payment dialog box in Cashiering; the reader was not initialized then. This has been fixed.</p> |
|-------|--|

Credit Card Interface

Issues fixed

80825

Reports

New Functionality/Feature

- 19790 TT 19790 Cashiering->Cashier Functions->Billing History->Email & Configuration->Email Settings: Functionality has been added allowing defining an email body template for sending invoices via email from the billing history. The body default is defined under Configuration->Email Settings. All defined email body defaults with the module type 'Billing' assigned are available from Billing History on the Billing History Tab when pressing '@ Email' button' in the field 'Email Body Template'.

Tour Operator Invoice

New Functionality/Feature

- 18749 TT 18749 Cashiering->Tour Operator Invoice & Global Settings->Billing->Tour Operator Invoice: The dialog box for Tour Operator Invoice has been enhanced, the field: 'Booking Date' has been added to the filter options and to the Tour Operator Grid. 'Booking Date' is the date when the reservation has been entered in Suite8 and internally refers to the field YRES_SALEDATE.

68001

Users

New Functionality/Feature

- 18803 TT 18803 Cashiering->Billing->Transfer & Configuration->Users->User Definition->Rights: The user right 'Move Postings' under Cashiering has been divided into the two options:
 Move Postings To Another Folio
 Move Postings On The Same Folio
 When updating to this version, the changes are applied, please assign the rights after the update.

69200

Voucher Management

New Functionality/Feature

- 18289 TT 18289 Cashiering->Voucher Management & Configuration->Global Settings->Generic3 Tab->Voucher Management: Functionality has been added, allowing generating multiple vouchers, for example if a company orders multiple vouchers for rewarding their employees. To use this, the flag: 'Use Voucher Orders' has been added under Voucher Management to the Generic 3 tab. If activated, the flag: 'Order transfer payment department' becomes available and allows selecting a payment department code for the order transfer. When opening 'Voucher Management', the tab: 'Orders' can be selected for searching or creating multiple vouchers of the same type. Users allowed for creating Order Vouchers need the rights for Order under User Rights Voucher Management. The following rights can be assigned under Voucher Management->Order: View, Edit and Insert. The following changes can be recorded in the user log file: 'New Voucher Order' and 'Update Voucher Order' by activating the corresponding log entry under Configuration->Users->User Log.

77063

- 20322 TT 20322 Voucher Management & Configuration->Voucher Management->Voucher Types: The field: 'Post Voucher Payment Only' on the Voucher Type configuration can not be changed once configured, if a voucher of this type already exists. This has been

Voucher Management

New Functionality/Feature

added since Suite8 Version 8.9.0.5 to avoid open balance accounts.

Issues fixed

- 20549 TT 20549 Cashiering->Voucher Management & Configuration->Cashiering->Financial Account Group->Financial Accounts for Vouchers: When selecting a Financial Account for Vouchers in Billing, the buttons: 'Articles' and 'Rebate' are no longer available.
- 20777 TT 20777 Cashiering->Billing, Voucher Management & Miscellaneous->Reports->Invoice Templates: The view ' V8_ED_FOLIO_MAIN_INFO', used to retrieve Reservation and Financial Account information for invoices, has been enhanced to display the voucher number if the folio is created for a voucher and not the account number of the internal financial account.

V8 CCM

Booking Master

|-------|---|-------|
| 20223 | <p>TT 20223 Configuration->Conference Management->Function Spaces->Function Space Definition: Entering a new function space definition but not selecting a function space type resulted in a continuous loop message and Suite8 had to be restarted. This has been changed, since Suite8 Version 8.9.0.6 the message: 'Please enter a Space Type' is prompted instead.</p> | 78701 |
|-------|---|-------|

Event

New Functionality/Feature

- 9272 TT 9272 Meeting Planner->Conference Booking & Event Management->: Functionality has been added allowing customizing the grid on the Conference Booking dialog box. On the Event Management dialog box, the following fields have been added to the standard grid layout:
 Pkg/Grp, indicating either package or event group
 Pkg Code, indicating the package code
 Grp Code, indicating the event group code
 If Hotel Segmentation is used, the segment is also added to the standard fields. Additionally some cosmetic issues have been addressed when customizing the field: Pkg/Grp on the events details and conference search by using drag & drop.
- 20807 TT 20807 Meeting Planner->Conference Booking: An access violation message was displayed when adding a custom menu item to a menu on the resources dialog box upon entering the department code and pressing 'OK' button. This has been fixed in Suite8 Version 8.9.0.6.

Rebate Handling

New Functionality/Feature

- 20715 TT 20715 Meeting Planner->Booking Master & Configuration->Users->User Definition->Rights->Booking Master->Rebate Linking: The user right for 'Rebate Linking' is also considered when linking a rebate code to a billing window. The Rebate functionality has been enhanced with this option since this version.

Issues fixed

- 20575 TT 20575 Meeting Planner->Conference Booking->Event Details->Resources: When editing a resource and entering 100% rebate on the menu price split, the price field changed to 0.00 and the message: 'Please enter Revenue Split price' was prompted when pressing 'OK' button to save. This has been fixed if a 100% rebate is entered on the menu price split it is correctly calculated and saved.

78858

Resources

Issues fixed

- 20622 TT 20622 Meeting Planner->Conference Booking->Events->Event Details: When searching, the 'AINSI string function' is used, to make sure that German 'Umlaut' and French accented characters such as é, è or ê are taken into consideration and the query returns results. In previous versions this was not considered on the event detail search.

79270

V8 CRM

3rd Party Interface

New Functionality/Feature

- 19965 TT 19965 Setup->Configuration->Global Settings->Profile 3: The flag: 'Enable Serenata Profile Search' has been added, along with three additional settings to configure the 'Serenata URL', 'User' and 'Password'. If this flag is activated, a new button '3rd P. Look.' is available on the profile search navigator, enabling the user to perform a profile lookup at a Serenata central customer database and downloading profiles from this database locally. Please note in order to use this feature a new sublicense '3rd Party Profile Lookup' is required. The feature is restricted and approval is required. More information is available in the document: 'Serenata 3rd party profile lookup'. This is available since Suite8 version 8.9.0.4.
- 20769 TT 20769 Customer Relation->MVZV Profile Lookup & Configuration->Global Settings->Profile3 tab->MVZV Profile Search: If a profile in Suite8 is selected with a person key from MVZV (entry in XCMG) attached, it is no longer possible overriding this with a profile from MVZV with a different person key linked. The message: 'Different profile selected, override not possible' is prompted. In previous versions this was possible, causing an error message: 'single row subquery'.

Activity/Task

Issues fixed

- 20783 TT 20783 Customer Relation->Task & Activities->Automatic Traces & Configuration->Miscellaneous->Automatic Traces->Event Management: Automatic Traces for Event Management were not displayed and when configuring a new trace on the event management tab, it was not shown. This has been fixed.

80090

Calendar

Issues fixed

- 20506 TT 20506 Calendar (F4): The message: 'Variant or safe array index out of bounds' was displayed when selecting a time range in the calendar, the right mouse short cut menu opened, clicking somewhere on the calendar so the right mouse short cut menu closed and then clicking in the previously selected area. This has been solved, also when hovering with the mouse over the blue time line the correct date is displayed and the time information has been added.
- 20614 TT 20614 Calendar (F4) & Maintenance Tasks: When entering a maintenance task with a due date in the future, such as '01.10.12', then pressing 'F4' to open the calendar, black lines were shown until this date. When the maintenance task due date was for the actual date, an empty box was displayed. When moving the cursor over this period an invalid date, such as '30.12.1899-30.12.1899' was indicated and when selecting 'Edit', the message: 'Variant or safe array index out of bounds' was prompted. All issues have been fixed.

Frequent Flyer

New Functionality/Feature

- 20110 TT 20110 Customer Relation->Bonus Point Cards: Functionality has been added for sending Batch Statements from the Bonus Point Card Menu and entering Correspondence Preferences for sending Statements under Bonus Point Cards, or when

Frequent Flyer

New Functionality/Feature

displaying the Guest Card on the profile and pressing: 'Points' button, then selecting 'Correspondence'. On the Correspondence dialog box, the 'Sending Type', such as 'Don't send', 'Letter' or 'E-Mail' can be entered. Depending on the selected 'Sending Type', the email address or address details can be selected. On the Batch Statements dialog box, the statements can be generated for both: 'Generate Letters' or 'Generate E-Mails'.

Issues fixed

- 19885 TT 19885 Customer Relation->Bonus Point Cards: The field for 'Membership Number' (XMNR_VALUE) has been enlarged allowing larger membership numbers.
- 20147 TT 20147 Customer Relation->Bonus Point Cards->Statements->Generate Emails: When generating 'emails', under Bonus Point Statements, randomly bad email bodies were created. This has been fixed.
- 20341 TT 20341 Customer Relation->Bonus Point Cards: The functionality for 'Batch Statements' is not available if the flag: 'Central Bonus Management' under Global Settings->Hotel Connector tab is activated.

Mailing Engine

New Functionality/Feature

- 9878 TT 9878 Miscellaneous->Reports & Customer Relation->Mailing: Functionality has been added allowing using internal editor templates in mailings. The report section has to be created with the section role 'Mailings' and internal editor reports in this section will be available when selecting 'Internal Editor' on the Mailing Dialog box. The fields available on the internal editor template are provided by the view 'V8_MAILING'. The internal editor report is created upon runtime, therefore specific profile parameters, such as 'conf_wlan_id' can not be used and the section 'Languages' has been added with the required parameters to the data source when editing the internal editor template. For example instead of 'conf_wlan_id', the parameter 'languages.wlan_id' can be used. The fields have to be selected on the mailing wizard in order to be populated. On the standard mailing, when selecting records and launching the mailing by pressing 'Execute' button, the selection for 'Word' or 'Internal Editor' template can be made, when choosing 'Internal Editor' the created templates in the report section with the role 'Mailings' are available for selection.

Issues fixed

- 19302 TT 19302 Customer Relation->Mailing->Mail Merge->Word: When exporting mailing data to word, the file 'datasources.html' is created. It is stored on the local drive under c:\temp and used a standard character encoding: 'charset=windows1252'. To make sure that all characters of different countries are returned properly, the export routine has changed to use the character set defined for the operating system of the workstation under 'Regional Settings'. 73769
- 20655 TT 20655 Customer Relation->Mailing: The tabs: 'Standard query' and 'Advance query' were labeled in reversed order. This has been changed, the tabs: 'Standard query' and 'Advanced query' are labeled correctly.

Miscellaneous

New Functionality/Feature

- 17301 TT 17301 HTML Files & Customer Relation->Task & Activities: Functionality has been added allowing opening a task or activity from html files. The relevant html files for task & activities have been changed to support edit. For example on the customer profiles, when opening activities or tasks html from the profile tree, the task or activity can be edited from the html file, by clicking on the arrow.

Profile Management

New Functionality/Feature

- 18560 TT 18560 Customer Relation->Scanning Center, Profiles->Passport Scanner & Global Settings->Profile2 tab->Fujitsu fi-60F Passport Scanner: Functionality has been added allowing scanning multiple passports and link them later to the profiles on the reservations, this has been added for speeding up group and heavy check in processes while using the passport scanner. To activate this, the flag: 'Use Scanning Center Menu' has to be selected under Global Settings->Profile 2 tab. From the Customer Relation Menu, the option 'Scanning Center' is then available, allowing scanning multiple passports and link them from there later to the profile on the reservation. For more details, please consult the document: 'Installation Guide for Passport Scanner fi.pdf' 72216
- 18804 TT 18804 Customer Profiles->More->Personal Documents, Passport Scanner & Configuration->Miscellaneous->Profile2 tab: If the flag: 'Prompt user when missing fields' is activated, a warning message is displayed to the user if one of the following fields is not filled:
 Document Type
 Name in Document
 Number
 Nationality
 Valid From
 Date of Birth
 Since Suite8 Version 8.8.4.4, the field 'Valid Until' is no longer included in the validation. It has been removed from this list, as this field does not exist on Turkish passports. 72217, 75652
- 19021 TT 19021 Customer Relation->Profiles->Preferred: When entering a preferred room or category, the reason dialog box is prompted, allowing entering a reason for the preferred room or category. The reason can be changed by pressing 'Edit Reason' button on the Preferred Rooms/Category dialog box.
- 19022 TT 19022 Customer Relation->Profiles & Configuration->Global Settings->Profile 1 tab: The flag: 'Alternative Letter Greeting' has been added to the Profile 1 tab under Global Settings. If activated, an alternate letter greeting can be added as free formatted text to the customer profile edit or more fields tab on customer profiles when using screen painting and creating a new form under Setup->Form Customization. The field on the component palette is called 'FidProfileEditAltLetterGreeting'. It is automatically added underneath the regular letter greeting when creating a new form. It has also been added to the views:
 'V8_Editor_nam'
 'V8_Mailing_customers'
 and can be used in internal editor letters and Mailings.
 Please note that the Mailing.sql has to be executed while updating to this version.
- 20294 TT 20294 Customer Profiles->Passport Scanner & Global Settings->Profile 2

Profile Management

New Functionality/Feature

tab->Fujitsu fi-60F Passport Scanner: Functionality has been added allowing placing a watermark on the scanned image. To use this, the flag: 'Use watermark on scanned image' has been added to the Global Settings->Profile2 tab, if selected, the watermark image file can be chosen on the next field when pressing '...' button to select the image. The watermark is then printed on the scanned image.

75653

20314 TT 20314 Customer Relation->Profiles->Options->Guest Comments: Functionality has been added allowing selecting Guest Comments display for Profile, Past Reservation, Future Reservation and Booking (if CCM license is activated). When entering a Guest Comment the check boxes are available on the Guest Comments dialog box.

77919

Issues fixed

20295 TT 20295 Customer Relation->Profiles->Passport Scanner & Global Settings->Profile2 tab->Fujitsu fi-60F Passport Scanner: If the flag: 'Question if second document side needs to be scanned' is activated, the message prompt window is displayed in the foreground. In previous versions, this was hidden behind the main program window and therefore not noticed. This has been fixed.

75654

20296 TT 20296 Customer Relation->Profiles->Passport Scanner, Business Card Scanner & Global Settings->Profile2 tab->Fujitsu-fi60F Passport Scanner & Enable Business Card. Some Turkish characters were not recognized when scanning passports or business cards on profiles with the Fujitsu-fi60 Passport Scanner and the Business Card Scanner. This has been fixed.

75655

Users

New Functionality/Feature

18829 TT 18829 Customer Profiles & User Rights: The user rights for Customer Profiles->Profile Details have changed for 'Edit' and 'Insert', the rights can now be distributed by profile type: Company, Travel Agent, Source, Individuals, Meeting Planner and Vendors

68002

V8 General

Configuration

Issues fixed

- 13662 TT 13662 Configuration->Reservation->Room Management->Room Types->Edit->Features: The functionality for adding or removing features to rooms of the same room type has changed. On the room type definition the tab: 'Features' has been added. When entering Features, it is possible pressing 'Add selected features' button to link all selected features to rooms of that room type or selecting features and pressing 'Remove selected features' button to remove the selected features from all rooms of that room type.
- 20158 TT 20158 Setup->Configuration->Users->User Definition: The entries in the fields 'Last Name' and 'First Name' were switched when saving a modified user setting. This has been fixed since Suite8 version 8.9.0.4.

77388

Crystal Reports Engine

Issues fixed

- 19106 TT 19106 Miscellaneous->Reports->Execute->Export->Output: When creating a report, selecting Export tab and choosing 'to Export' for the Output and 'to Application' for the Destination, selecting 'WordForWindows' as File type then pressing 'Execute' button, the application was not opened automatically and the file was only stored. The same happened when printing from Meeting Planner. This has been fixed, export to application of internal editor templates is supported when selecting 'WordForWindows' as file type on the report export dialog box.

72711

FidelioServer / XML Interface

Issues fixed

- 19704 TT 19704 Fidelio Server and Windows 7: When Fidelio Server was running as a Service under Windows 7 or VISTA, the Icon was not displayed on the task bar. This has been fixed by launching a second instance of Fidelio Server as executable file and displaying the icon and forms correctly on VISTA and Windows 7 workstations.

Housekeeping

New Functionality/Feature

- 18726 TT 18726 Rooms Management->Housekeeping->Change Status & Configuration->Users->User Rights: Changing the Status of a room is driven by the user right: 'Housekeeping Status' added under User Rights->Housekeeping since this version. Users assigned to this right can change the status of a room and users not assigned to this right are not allowed changing the status.
- 18998 TT 18998 Rooms Management->Housekeeping->Discrepant Rooms: The tabs: 'Discrepant Persons' and 'Discrepant rooms' have been merged and discrepant rooms and persons are now handled on the same tab called 'Discrepant Rooms'. Grid and search options have been enhanced; it is easier now using the arrows keys from the keyboard instead of hovering with the mouse over the grid. Each time the dialog box is refreshed, for example when changing the room status, the cursor stays on the room where the status was changed.
Functionality has been added allowing entering discrepant persons for a room with the status 'Vacant', the room is then marked as 'sleep', for example when housekeeping

71156

Housekeeping

New Functionality/Feature

- reports the room occupied and Front Office has no person checked into this room. This has been implemented since Suite8 Version 8.9.0.5. 66961
- 19594 TT 19594 Rooms Management->Attendants: If the room attendant plan is saved, the overbooking information was lost. This has been is solved since Suite8 version 8.9.0.5.
- 20274 TT 20274 Rooms Management->Housekeeping: Some queries have been enhanced on the 'HSK_ROOM.HTM' and 'HSK_ROOM.QRY' files, displayed on the left upper window on the housekeeping dialog box. When using the Search Query 'All Rooms', loading of the HTML file is faster.
- 20444 TT 20444 Rooms Management->Housekeeping & Configuration->Users->User Definition->Rights: Under Housekeeping, rights for Room Search Criteria have been added for: View, Edit, Insert and Delete. 73755

Issues fixed

- 14250 TT 14250 Rooms Management->Housekeeping & Reservation->Room Move: If a room move is scheduled but not yet performed, the room status is indicated as 'Moving Out' for the source room and as 'Moving In' on the target room on the Housekeeping dialog box 'Condition' column. 69450
- 19068 TT 19068 Reservation->Room->Housekeeping->Out of Order & Out of Service: If the user right for 'Out of Order' and 'Out of Service' was set to 'Deny' for a user and this user selected a room on the reservation which was set to the status 'Out of Order' or 'Out of Service', the message prompted that the room had the status 'Out of Order' but the user could answer the message with 'YES', select the room and remove the 'Out of Order' status. This has been fixed since Suite8 Version 8.9.0.5. 72389
- 20499 TT 20499 Rooms Management->Housekeeping: The message: '03.01.2012 12:28:04' is not a valid integer value' was prompted when performing 'Search' on 'All Rooms', then pressing 'Quick Action', selecting a room, selecting a status and pressing 'OK' button. This has been fixed.

IFC Functionality

Issues fixed

- 20644 TT 20644 Front Desk->Messages & Interface Functionality->Message Light: The proper signal is sent to the Interface when selecting 'Received' or 'Received All' on the message dialog box. In previous versions an incorrect value was passed to the Interface. This has been fixed since Suite8 Version 8.8.4.8.

Maintenance

New Functionality/Feature

- 19000 TT 19000 Rooms Management->Maintenance & Configuration->Global Settings->Miscellaneous->Search Screens->Custom View in Maintenance screen: Functionality for using custom views on the maintenance grid has been added. To use this, activate the flag: Custom View in Maintenance Grid under Global Settings->Miscellaneous->Search Screens and insert the view 'V8_SYS_CUSTOMMAINTENANCESEARCH', the required field is:

Maintenance

New Functionality/Feature

'CUSTOMMAINTENANCESEARCH_ID'. For example for displaying the time when the task was entered, the following command is used:

create or replace view

V8_SYS_CUSTOMMAINTENANCESEARCH

as

select wact_id CUSTOMMAINTENANCESEARCH_ID, created_time from

V8_REP_MAINTENANCE_INFOS

57236

19502

TT 19502 Configuration->Miscellaneous->Maintenance Origin & Global Settings->Generic3 tab->Hotel Maintenance: Functionality has been added for defining origins for maintenance tasks, such as guest originated maintenance task. Origins for Maintenance Tasks are defined under Configuration->Miscellaneous->Maintenance Origin. A Code, Description, Role, Default and Inactive flag can be set. Currently there are the roles: 'None' and 'Guest Generated' available. The origin of the maintenance task can be assigned when editing or entering a maintenance task from the Rooms Management drop down menu, if the Origin: 'Guest Generated' is selected, the field: 'Guest' becomes available allowing entering a guest name. Possible examples for a 'Guest Generated' maintenance task could be a request to fix a broken TV or to check the Internet connection in the room.

Miscellaneous

New Functionality/Feature

10

TT 10 The following views have been changed:

- V8_REP_QUEST_ANSWERS - corrected link in where clause (previous: WQNL.WQNL_ID = WQUE.WQUE_ID; now: WQNL.WQNL_WQUE_ID = WQUE.WQUE_ID). Added WQNR_ID, WQNR_SHORTDESC, WQNR_LONGDESC, WQUG_ID, WQUG_LONGDESC, WQUE_QUESTIONKIND, 1 COUNTNO

- V8_REP_TRACE_INFOS - traces for financial accounts have been added, see also TT 6265

- V8_REP_BLOCKS - calculation for 1 pax has been changed and calculation for 3 and 4 pax have been added

- V8_REP_CCM_LAST_STATUS_CHANGE2 - ybom records are not shown anymore where the relevant status is not configured

- V8_ED_FOLIO_REV_ORI_ARR_PD - MINUSI has been added for display reasons

- V8_ED_FOLIO_REV_GCHK_G_TAX_DET - DESCRIPT has been removed

- V8_ED_FOLIO_REV_ZDCO_G_TAX_DET - DESCRIPT has been removed

The following views have been created:

- V8_REP_QUEST_SUMMARY

- V8_STAT_SHIS_DAY_XCMA_COMBI

- V8_ED_FOLIO_REV_APD_G_TAX_DESC - to display tax details for postings grouped by arrangement code

- V8_ED_FOL_REV_GCHK_G_TAX_DESC - to display tax details for postings grouped by guest cheque number

- V8_ED_FOL_REV_ZDCO_G_TAX_DESC - to display tax details for all postings grouped by department code

14725

TT 14725 General->Correspondence Printing: Printing functionality in all modules has been revised and merged to one component: 'Fconfirmation', the options displayed on the printing confirmation dialog box are now consistent when pressing 'Print' button in one of the modules in Suite8, such as Meeting Planner, Customer Relation or

Miscellaneous

New Functionality/Feature

Reservation. The following order of the selections is used on this dialog box:

- Preview
- Print
- Edit
- Email
- Fax
- SMS
- Export
- Profile Search
- Edit History
- E-mail History
- Easy Letter
- Edit Profile

Please note: With this merge some parameter changes applied and have to be taken into consideration for reviewing reports created with Internal Editor and Crystal:

The handling of the parameter 'CONF_XCMS_ID' passing the profile id of the linked company profile is now as follows:

'CONF_XCMS_ID' is filled with the selected company on the printing dialog box. For example when linking company 'A' and contact 'X' to the booking master, but contact 'X' is linked to a different company 'B', then the Company 'B' can be selected when choosing this contact on the printing dialog box; then this 'ID' is passed to the parameter 'CONF_XCMS_ID'. If the company is deselected on the printing dialog box, the value passed to this parameter is '0'.

The parameter 'CONF_XCOM_ID' passing the id for the communication method does no longer support multiple values, because internal editor does not handle this, multiple values were only used with Crystal reports, please consult the standard Function sheet template for reference.

- 19231 TT 19231 General->Printing->Outlook E-Mail: When using drag & drop to move an outlook mail to history, it was not possible to delete this attachment again. This is possible since this version; deleting Outlook emails is now driven by the user right 'Delete Outlook EMail' under Configuration->Users->User Definition->Rights->Common Functions.
- 19858 TT 19858 Availability->Trend & Global Settings->Reservation 3 tab->Use Trend chart on Availability: The selected settings on the trend chart are saved per user when pressing 'Save Selection' button.
- 20728 TT 20728 Confirmation Letter, Correspondence, Email attachments, Reports & Export File name: The file name for email attachments, such as a 'PDF' attachment and Reports which are exported has changed to the following format:
Confirmation_Fax_Company_(ED)_630E7379.pdf
In previous versions, the exported files were stored as follows:
For Versions smaller than 8.8.4.8, it is:
Confirmation_Fax_Company_(ED)_23022012_1258.pdf
-> Report name + date and time
Since Suite8 version 8.9.0 it was changed to:
Confirmation_Fax_Company_(ED){8A0DB06A-7635-44FB-9C30-77D2B872DAC1}.pdf
to ensure required unique file names, but with this change some problems with different Anti Virus Programs occurred, therefore the name for Email attachments and exported reports needed to be changed again to:
'Confirmation_Fax_Company_(ED)_630E7379.pdf'. This change was merged down until Suite8 Version 8.8.4.8.

Miscellaneous

New Functionality/Feature

Issues fixed

- | | | |
|-------|---|-------|
| 19092 | <p>TT 19092 General->x64 Machines: Several issues have been fixed when working on x64bit machines and minimizing Suite8, for example the index on the Reservation Navigator on the tabs: Arrival, In House and Departure was lost when minimizing Suite8 and opening it again or in Cashiering when resizing the dialog box, then closing the billing screen, opening the billing dialog box again and selecting to maximize the billing dialog box, then it was not possible to maximize the billing dialog box unless when using the button 'Refresh Billing Window'. On the configuration of Terminal & Printers, Suite8 hung when minimizing the dialog box and had to be restarted.</p> | 78943 |
| 19166 | <p>TT 19166 Setup->Miscellaneous->System Maintenance->Database->Custom SQL Statements: Functionality has been added allowing assigning a Row Limit to Custom SQL Statements where the role 'Custom SQL Grid' is assigned. When reaching the limit a message is prompted to continue loading. When running the Custom SQL Statement and the message prompts, the memory consumed by Suite8 is displayed. This has been added for avoiding running out of memory when running Custom SQL statements.</p> | 77410 |
| 19769 | <p>TT 19769 Configuration->Global Settings->Generic2 tab->Internal Communication & WICL (Internal Communication Log table: To speed up internal communication, the field: 'WICL_MSG' has been changed to varchar2 (2000) and the log table is cleared during night audit.</p> | |
| 20209 | <p>TT 20209 General->Favourites button & Miscellaneous->User Settings->Appearance->Favourites Button on Top: When opening Suite8 with the User Setting: 'Favourite Buttons on Top', the tab: 'Favourites' was displayed on the top, but the tab: 'Reservation' was opened instead, selecting 'Favourites' did not show the icons. This has been fixed to open the Tab: 'Favourites' when starting Suite8 when the user setting is activated and displaying the icons.</p> | |
| 20665 | <p>TT 20665 Front Desk->Messages: When creating a new message for a reservation, then editing the message, the Guest Name field was empty. This has been fixed.</p> | |

Night Audit

New Functionality/Feature

- | | | |
|-------|---|--|
| 19090 | <p>TT 19090 Miscellaneous->Night Audit: A new expiration check has been added to the night audit routine. The following items are checked for their end date:</p> <ul style="list-style-type: none"> Rooms VAT codes Link from VAT code to department code Users <p>To use this, the user running night audit has to have the right: 'Extend expired Item during Night Audit' assigned.</p> <p>When starting Night Audit the above listed items will be checked for their end date and compared to the field: 'Days before expiry' configured under Global Settings->Generic3 tab. The number of days defined here will be the starting date before the defined end date of each item to be displayed on the list. The user running night audit can then decide if the expiration date should be extended or if the item is obsolete and can be ignored the next time the list is prompted.</p> | |
|-------|---|--|

Oracle / Database

New Functionality/Feature

- 19752 TT 19752 Oracle Table Statistics & Night Audit: Functionality has been added allowing storing statistical information about the growth on tables in the Oracle database. To use this, the following statement has to be added to the night audit custom SQL queries, the results are stored in a new table STAB:
- ```

DECLARE
 CURSOR table_cursor IS SELECT table_name FROM user_tables;

 table1 table_cursor%ROWTYPE;
 sql_text VARCHAR2(1000);
 cnt number(30);
 isLastDate number(1);

BEGIN
 --dbms_output.enable(10000000);

 select decode (last_day((select * from fideliodate)), (select * from fideliodate), 1, 0)
into isLastDate from dual;
 if isLastDate = 1 then
 select nvl(max(STAB_batch_number), 0) + 1 into cnt from STAB;

 FOR table1 IN table_cursor
 LOOP
 sql_text :=
 'INSERT INTO STAB (STAB_SNAPSHOTTIME, STAB_TABLE_NAME,
STAB_ROW_NUMBER, STAB_MAX_ID, STAB_batch_number) VALUES (sysdate, ''' ||
table1.table_name || ''' , (select count(1) from ''' || table1.table_name ||') '''
 ', (select max('' || table1.table_name ||'_ID) from ''' || table1.table_name ||'), '''
to_char(cnt) ||')';
 --dbms_output.put_line(sql_text);
 BEGIN
 EXECUTE IMMEDIATE sql_text;
 EXCEPTION WHEN OTHERS THEN NULL;
 END;
 END LOOP;
 end if;
EXCEPTION
 WHEN NO_DATA_FOUND THEN RAISE;
 WHEN OTHERS THEN RAISE;
END;
```
- 20241 TT 20241 General->Oracle Database: The runtime parameter 'MaxPrefetchRows' has been added allowing 'Prefetching' used on the Oracle database for Performance Tuning. Prefetch 'fetches' data in a package and the number of rows can be defined using the parameter: 'MaxPrefetchRows'. For future versions it is planned to use this parameter on the Suite8 Oracle database by default, to speed up queries on the Oracle database, currently it can be used as command line parameter, for example: 'MaxPrefetchRows=100 -> meaning 100 Rows Prefetch'  
If the parameter is 0 -> the Prefetch is disabled.  
Running without the parameter in this version and smaller versions of Suite8, uses a default value of '0'.  
However, when retrieving data from another Oracle instance, such as the leisure module 'Bella Vita', this parameter can not be used.

## Questionnaire

### New Functionality/Feature

- 20591 TT 20591 Miscellaneous->Reports & Questionnaire: The report: 'FCR\_CRM\_2453\_QUEST\_SUMMARY.rpt' has been added to the 'newreports.zip' released with this version. It represents a graphical analysis of the questionnaire surveys. With the functionality to import reports, it can be added to the Questionnaire report section by pressing 'Import' button and selecting the 'FCR\_CRM\_2453\_QUEST\_SUMMARY.S8R'.

## Reports

### New Functionality/Feature

- 9 TT 9 The following reports have been added:  
 - FCR\_CRM\_2453\_QUEST\_SUMMARY.rpt  
 - FCR\_CRM\_7550\_CALENDAR\_EVENT\_CONFIRMATION - template for calendar event participant confirmation
- The following HTML files have changed:  
 - Activity & Traces htm & qry files: Editing of an activity or task direktly from the html file has been added  
 - Trace.htm & qry files - Traces for financial accounts have been added, see also TT 6265  
 - RoomrackFA.htm/qry - Traces for financial accounts have been added, see also TT 6265
- 14637 TT 14637 Miscellaneous->Reports: Export and Import functionality has been added allowing selecting a report and pressing 'Export' button to export the report in a selected directory, the report is saved with the extension 'S8R'. When importing a report, the corresponding report section has to be selected and 'Import' button pressed. It is also possible exporting the whole Tree and Importing a Tree, when positioning the cursor on top and pressing 'Export' or 'Import' button.

### Issues fixed

- 15928 TT 15928 Miscellaneous->Report Procedures->Company Statistic: The 'Average Room Rate' was not correct in case the report procedure was executed for master company profiles and the selected date range was for more than one month. This has been fixed since Suite8 version 8.8.4.8. 57644
- 19312 TT 19312 Cashiering->Check Out->Print Invoice & Configuration->Global Settings->Report1 tab->Use Automatic PDF Export for Invoices: If the flag: 'Use Automatic PDF Export for Invoices' is activated and the defined export directory does no longer exist, the message: 'PDF Export failed, please check Global Setting' is prompted. In previous versions, an access violation message was displayed upon check out when printing the invoice.
- 20185 TT 20185 Miscellaneous->Reports->Export: When selecting a report and pressing 'Export' button, it was not possible selecting a directory. This has been fixed. 77511

## Statistics

### Issues fixed

- 20775 TT 20775 Miscellaneous->Reports->Statistics->Manager Report: The columns 'SMAD\_D\_TOTALNETREV\_D' and 'SMAD\_V\_TOTALNETREV\_D' from the table 'SMAD',

## Statistics

### Issues fixed

---

the Statistic Manager Report per Room Type, including Financial Accounts were incorrect if the next hotel had no revenue for that day. This has been fixed.

## Users

### New Functionality/Feature

---

- 5 TT 5 The following user rights have changed:
- Cashiering->Early Check-Out: considers also the flag: 'Checkout without closing folio allowed'.
  - Customer Profiles->Profile Details: 'Edit' and 'Insert' can now be distributed by profile type: Company, Travel Agent, Source, Individuals, Meeting Planner and Vendors
  - Cashiering->Move Postings: has been divided into the two options:
    - Move Postings To Another Folio
    - Move Postings On The Same Folio
  - Booking Master
  - Rebate Linking
  - also considers linking rebates linked on the billing window, introduced with this version
  - Reservation
  - Rebate Linking
  - also considers linking rebates linked on the billing window, introduced with this version

The following user rights have been added:

- Cashiering:
  - Change default Prices
- Common Functions:
  - Delete Outlook Email
- Housekeeping:
  - Housekeeping Status
  - Room Search->View, Edit, Insert, Delete
- Accounts Receivable->Transactions:
  - Compression of Accounts Transaction Postings
  - Compression of CC Transaction Postings
- Reservation:
  - Check in to dirty room
- Table Reservations:
  - Change table on fixed reservation
- Night Audit:
  - Extend Expired Item during Night Audit
- Selling Limit
- View
- Edit

- 20321 TT 20321 Configuration->Users->User Log: The user log has been enhanced and the following changes can be recorded in the user log file by activating the corresponding entry:
- Under Reservation:
    - Reservation Amenity Link
    - Reservation Amenity UnLink
    - Reservation Message New
    - Reservation Message Edit
    - Reservation Message Received
    - Reservation Message Print

## Yield (internal)

### New Functionality/Feature

---

15252 TT 15252 Miscellaneous->Calendar Events->Recurring Events & Configuration->CRM->Recurring Calendar Events: Functionality has been added allowing defining recurring events. Under Configuration->CRM->Recurring Events, recurring events, such as a fair or event or holiday periods, such as Easter or Thanksgiving which is taking place each year can be defined. The configuration includes an availability influence level which can be defined from 0 for no influence, up to 9 for high influence. The level of influence will be used in future versions, it allows then comparing forecast figures with last year figures and analyzing the exact availability influence for this event. From the miscellaneous drop down menu, when creating a new or editing an event, the field: 'Recurring Events' is available and allows selecting from the list of defined recurring events. On the Calendar Events Search criteria 'Recurring Events' can be selected allowing searching for all events linked to the selected 'Recurring Events'. The field: 'AVL\_INFLUENCE' is automatically added to the Calendar Events Grid.

## V8 Hotel Connector

### Hotel Connector

#### New Functionality/Feature

---

- 20267 TT 20267 Hotel Connector & Training Version: Functionality has been added to only use the live user space defined under Global Settings->Generic3 tab in the live database for connection to the master property. If it is not the live user requesting the connection a message is prompted, that connection to the master property only works with a live database user space. This has been added for avoiding connection from a training database to the live master property.

### License Check

#### Issues fixed

---

- 20422 TT 20422 Hotel Connector->License Check: The Lookup and Synchronization functionality was only working with the license: 'Third Party Hotel Connector interface' enabled. This has been fixed.

### Miscellaneous

#### Issues fixed

---

- 19656 TT 19656 Hotel Connector->Profile Synchronization & Configuraiton->Global Settings->Hotel Connector tab:  
 A new field has been added to the table 'XCMS': 'XCMS\_SYNCFAILCOUNT', it is increased after every error, the field is cleared after successful profile synchronization. A new global setting has been added on the hotel connector tab: 'Maximum number of profile sync retry after error' , if the value in the field 'XCMS\_SYNCFAILCOUNT' is higher or equal to the value defined on the global setting, the profile is not synchronized by Hotel Connector Profile Synchronization. It is also recorded in the synchronization log. The field can be added via customizing the grid to the customer profile navigator. Also a new advanced query filter for 'central match point' is available on the profile search: 'Permanently failed to sync', indicating profiles that exceeded the configured retry limit. By clicking on the red rectangle, the profiles that failed are listed. The filter is one below that filter and displays only permanently failing profiles. The field can be cleared on the profile search screen by clicking the options 'Clear sync error flag' or by requesting synchronization (multiple profiles can be selected in one go)  
 On the profile synchronization dialog box, a new check box filtering 'failed items' has been added. If this is not selected failed items are not displayed.

## V8 Leisure

### Leisure

#### New Functionality/Feature

---

- |       |                                                                                                                                                                                                                                                                                  |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 20452 | TT 20452 Leisure Module->Leisure Booking List: Functionality has been added allowing searching a profile and opening 'Profile Search' from the Leisure Booking List. Profile Search offers all profile options, such as creating a new profile or selecting an existing profile. |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## V8 Online Interface

### Configuration

#### New Functionality/Feature

- 20230 TT 20230 Suite8 Online Interface->Rate Code Trigger: The trigger: 'Rate detail' has been added since Suite8 Version 8.9.0.6. It can be activated for uploading only rate detail changes. In previous versions, if a rate detail changed, the full rate code was uploaded to the central reservation system, causing unnecessary traffic. Please note: Rate detail is not supported by Myfidelio.

### Rate Management

#### New Functionality/Feature

- 19950 TT 19950 Suite8 Online Interface & Trigger handling: The trigger handling for rate codes has changed since Suite8 version 8.9.0.4. In previous versions, when a rate code was edited but nothing was changed, a trigger was created and the full rate code including all details was sent to the CRS system when pressing 'OK' button. This has changed to only create a trigger if something was changed on the rate code setup. When changing a specific rate detail, then only this detail change is sent and not all details as it was in done in previous versions.

## V8 Online Interface

#### New Functionality/Feature

- 18316 TT 18316 Suite8 Online Interface for Channel Manager: Suite8 Online Interface is now available for using Suite8 Channel Manager. Suite8 Channel Manager offers a suite of revenue management tools. It is based on the Smart Hotel Software which is a fully integrated software package designed to manage hospitality properties. Smart Hotel Software combines best of breed functionality with seamless, all-in-one integration. It is possible managing online distribution of inventories by connecting the properties to distribution channels, such as Expedia or Booking.com. The quality of data received from Smart Hotel depends on the used channel. Suite8 Channel Manager is a complete Two Way Interface. For detailed information, please consult the document: 'Configuring Suite8 Online Interface for Suite8 Channel Manager'.
- 19489 TT 19489 Suite8 Online Interface & Configuration->Global Settings->Reservation->Calculate Day Type Rates: Since this version, Suite8 Online Interface supports Day Type Rate functionality. If rate codes in Suite8 are linked to a day type schema and the rate amount changes, due to the day type calendar, the proper rate value is uploaded to the central reservation system. Please make sure that the central reservation system also supports this functionality, for example the MyFidelio reservation system does not support day type rate functionality.
- 20091 TT 20091 Suite8 Online Interface: Since this version, Suite8 Online interface is supporting FTPS, also known as FTP secure or FTP-SSL. It is an extension to the commonly used File Transfer Protocol (FTP) that adds support for the Transport Layer Security (TLS) and the Secure Sockets Layer (SSL) cryptographic protocols. For mappers using FTP, the FTP secure communication can be used since this version; it has been added to fulfill PCI compliance, the payment card industry data security standards. On the 'Communication' tab when editing the mapper, the required method and encryption can be selected. Please note: When using the TUI Mapper, the communication method 'FTPS' is mandatory, it is not possible selecting 'FTP', only 'FTPS' is available there, please

## V8 Online Interface

### New Functionality/Feature

consult the document 'Configuring Suite8 Online Interface for TUI' for more details.

- 20509 TT 20509 Suite8 Online Interface: Since this version it is possible connecting Suite8 Online Interface to different Suite8 schemas in different databases. The connection is controlled via the TNSNames connections for the Oracle Databases. Please follow the next steps when updating Suite8 Online Interface:
1. Make sure that the Suite8 database has been updated already to 8.9.2.x so that all new fields are available.
  2. The Suite8 program directory, usually: 'c:\fidelio\programs' has to be updated with the 8.9.2.x files.
  3. Run the Suite8 Online Interface 8.9.2.x.exe to launch the installation shield.
  4. Choose 'Only the interface'
  5. Enter the required Number of Hotels, in this example there are two properties
  6. Enter the TNS Name, such as 'V8' and the database connection details for the first hotel in the first database
  7. Activate the checkbox for Master Hotel
  8. Load the mapper from the database
  9. Switch to Hotel number two
  10. Enter the TNS Name for the second property, such as X64 and the database connection details for the second hotel in the second database
  11. Load the mapper from the property
  12. Start and finish the installation
- When performing a new installation, the same procedure as mentioned above applies, only the field 'Add new mapper' has to be selected when starting the interface installation.
- On the Interface Monitor, the Log files and messages are stored per property. For each schema in each database, separate folders are created.
- 20679 TT 20679 Suite8 Online Interface for Channel Manager: For Channel Manager Interface and other mappers using OTA message formats, the message format for uploading availability has been optimized. If the availability figures for a room type do not change over a period of time, one record with a date range during which the availability does not change is uploaded. In previous versions, when uploading availability, one record per day was uploaded, generating unnecessary traffic and load on the central system.
- 20680 TT 20680 Suite8 Online Interface for Channel Manager: For Channel Manager Interface and other mappers using OTA message formats, the message format for uploading rate codes has been optimized. If the rate amounts for a rate detail do not change over a period of time, one record with a date range during which the rate amount does not change is uploaded. In previous versions, when uploading rate codes, one record per day per rate detail was uploaded, generating unnecessary traffic and load on the central system.
- 20827 TT 20827 Suite8 Online Interface Install Shield: When updating to Suite8 Version 8.9.2.x Online Interface, existing installations of Suite8 Online Interface have to be uninstalled under Control Panel->Add Remove Programs. This applies to any Suite8 Version Online Interface smaller than 8.9.2x. Please consider the following steps:
1. Make sure that the Suite8 database has been updated already to 8.9.2.x so that all new fields are available.
  2. The Suite8 program directory, usually: 'c:\fidelio\programs' has to be updated with the 8.9.2.x files.
  3. Run the Suite8 Online Interface 8.9.2.x.exe to launch the installation shield.

## V8 Online Interface

### New Functionality/Feature

4. Choose the option 'Only the interface', enter the connection details to the database, select the check box 'Master Hotel' if it is not already selected, load the existing mapper and start the installation.

The following changes have been made for Suite8 Version 8.9.2.x Online Interface:

1. The log files on the Interface Monitor have been divided into two separate tabs:
  - The tab: 'Service Logs' used for log entries of the interface services
  - The tab: 'Interface Log' for log entries of the installed mapper.
2. The log file paths under 'Global Settings', 'Communication' and 'Mapper' tab have changed. They are indicating the log file name only and no longer the whole path: 'c:\fidelio\programs'
3. The check box 'Use these settings for all interfaces' has to be selected. Usually this is automatically done by the installation shield.

### Issues fixed

- |       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |       |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 20049 | <p>TT 20049 Suite8 Online Interface for Reonline: When synchronizing availability from Suite8 to Reonline and during the synchronization process one day in the date range was found with a house limit, the availability in the XML file was overwritten with '= 0' instead of the correct availability. This has been fixed since Suite8 version 8.8.4.8.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                      | 76771 |
| 20050 | <p>TT 20050 Suite8 Online Interface &amp; Windows 7 or Windows 2003/2008 Server: When installing Suite8 Online Interface under Windows 7 or Windows 2003/2008 Server and the server uses a 'proxy server' for connecting to the internet, it could happen that Suite8 Online Interface could not connect to the internet. This was related to the default account for services which is the 'LocalSystem' account. Under Windows7 or Windows 2003/2008 Server, this account does not have permission to read the registry settings under: 'HKEY_CURRENT_USER', this key contains the proxy settings of the machine. Therefore the functionality has changed as follows:<br/>Proxy settings are now stored in the file 'V8OnlineIFCHotels.xml' and the services read the settings from this file.</p> |       |
| 20654 | <p>TT 20654 Suite8 Online Interface: The rate code details for future dates were uploaded with a wrong start date for the rate code detail. This has been fixed since Suite8 Version 8.8.4.8.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |       |
| 20731 | <p>TT 20731 Suite8 Online Interface for myfidelio: Myfidelio requires a full upload of the rate code and details, even if only a rate detail was changed. The trigger changes for 'Rate details' resulted in not uploading the rates properly to MyFidelio. This is fixed since Suite8 Version 8.9.0.6.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 79945 |

## V8 Property Interfaces (IFC8.Exe)

### Table Reservation System TMS (3700)

#### New Functionality/Feature

---

- 19911 TT 19911 Interfaces, Micros 3700 & Voucher Management: Voucher functionality has been enhanced and payments with vouchers can be performed via Interface, since Interface8 Version: 8.7.4.0 and Suite8 Version: 8.9.0.5, the payment is then linked to the voucher number in Suite8.
- The following configuration is required:
- A specific payment method is configured on the Micros POS for voucher redemption. This payment method must be defined as 'Cash & Credit Card' method with a linked pay master in Suite8. Auto balancing must be disabled for this payment method. When redeeming a voucher, the Suite8 routines automatically post the voucher credit to the target account so that the balance is reduced. In Suite8 under Configuration->Voucher Management->Voucher Types, the configured voucher type must be 'Value' and the field: 'Partial Redemption Allowed' has to be selected. Voucher numbers are case sensitive and therefore it is strongly recommended to define a number template on the voucher configuration.

#### Issues fixed

---

- 19421 TT 19421 Table Reservations & Global Settings->Interface4 tab->3700 Interface: The option: 'Use TMS Interface' under Global Settings->Interface4 tab was displayed even if the Table Reservation System of Suite8 was used. This has been fixed.

## V8 Reservation

### Configuration

#### Issues fixed

- 14484 TT 14484 Configuration->Reservation->Rate Management->Rates: Search Options have been enhanced on the rate code configuration: When entering a rate code in the 'Search Options' and pressing 'Search' button, the first found rate code is highlighted, pressing 'Search' button again jumps to the next rate code found and if the end of the list is reached, the first selected record is selected. On the selected rate code the 'Edit' button under 'Rates' can be pressed to edit the rate code. In previous versions when queering the rate code and pressing 'Search' button, the search was performed on the rate category. Additional Filter Options are available on the Rate Configuration, such as Show Inactive Rates, Rate Availability Level and show Web Rates.

53961

### IFC Functionality

#### New Functionality/Feature

- 19852 TT 19852 Reservation->Options->Room Key & Room Key Interface: If a room key interface is used, it is possible selecting 'Room Key' from the Options menu on the reservation navigator and when editing a reservation, allowing to 'Make New Key', 'Make Duplicate Key', 'Delete Key' or to 'Make Keys prior to Check In'.

### Mealplan

#### New Functionality/Feature

- 9138 TT 9138 Meal Plan & Configuration->Reservation->Rate Management->Packages: Functionality has been added since Suite8 Version 8.9.0.5 allowing defining on the package configuration the board type. On the package configuration when editing the package and selecting 'More' Tab, the following board types can be linked to the package:  
 No board  
 Breakfast  
 Half Dinner  
 Half Lunch  
 Full Board  
 All inclusive  
 Only Lunch  
 Only Dinner  
 Packages linked to a board type, will automatically update in the corresponding meal plan on the meal plan tab when linked to a reservation. Please note, for package board types the same Meal Plan defaults apply as defined for rate codes in Global Settings.

78113

#### Issues fixed

- 20265 TT 20265 Global Settings->Reservation->Reservation 4->Hotel Segmentation & CTRL + D Availability: The error message: 'ORA -00918: column ambiguously defined' was displayed when opening Availability (CTRL + D) entering a Hotel segment filter and selecting the 'Meal plan' tab. This has been fixed since Suite8 version 8.9.0.4.

77973

### Promotions

#### New Functionality/Feature

- 20116 TT 20116 Reservation->Promotions & Configuration->Reservation->Rate Management->Promotions: Functionality has been added allowing definition of

## Promotions

### New Functionality/Feature

promotion details calculated based on the stay date and not the arrival date. To use this, on the promotion definition when editing the promotion details, the field 'Stay Date Range' can be selected. This flag can be selected per detail, so it is possible using different based calculations per detail. If the field 'Stay Date Range' is checked, the date caption changes to 'Stay from' and 'Stay to' and the promotion is calculated for all days of the reservation that are matching with the date range defined on the promotion detail configuration. For example, if the stay date range is defined on the promotion from May 1st to May 30th and the guest arrives on April 29th and stays until May 3rd, then the promotion is applied from May 1st until May 3rd, 2 nights. If the 'Stay Date Range' is not selected and the promotion is based on the arrival date, the promotion would not apply at all as the arrival date would not match the defined arrival dates from May 1st to May 30th in the example above.

76630

## Rate Management

### New Functionality/Feature

19254 TT 19254 Rate Query (Ctrl. +R): On the General Information of the Rate Query the columns: 'Gross average amount per night' and 'Net average amount per night' have been added, indicating the average amount per night and the net average amount per night of the selected rate considering the selections made on the reservation filters, such as 'Price with Package'.

### Issues fixed

20720 TT 20720 Reservation->Rate Selection & Rate Management->Rate Promotions: An access violation message was prompted when running a query with children on a rate code with a promotion linked and no default rate code definition under Global Settings->Reservation1 tab, for example:  
A reservation for three nights for 1 adult and a selected rate code with a promotion linked. When editing this reservation, changing the number of children from 0 to 1 and clicking on the rate code selection buttons, the message: 'Error in price calculation. Access violation at address ... in module 'FidelioRates.dll' was prompted. This has been fixed.

79611

## Reservation Block

### New Functionality/Feature

16628 TT 16628 Block Reservations->Edit Block->Grid->Beds: The number of persons occupying the rooms can be entered on the block grid by selecting 'Beds' Radio button and entering the number of beds used for the entered room types in the 'Beds' field.

19480 TT 19480 Reservation->Block Reservations: Functionality has been added to not allow block header or grid modifications on two workstations at the same time.

### Issues fixed

16460 TT 16460 Reservation->Block Reservation->Picked Up: When linking a group to a reservation linked to a block, the changes did not get applied to other reservations of the block. For example when entering a group reservation and split the reservations, then creating a block for the same date range and pick up all rooms using 'Rooming List', then selecting block reservation, editing the first reservation and selecting the group previously created, the message: 'Apply changes to other reservations in the

## Reservation Block

### Issues fixed

- 
- block' was prompted, but when choosing 'All guests in the block', only the selected reservation was changed. This has been fixed.

46834
  
  - 19742 TT 19742 Block Reservation & Group Reservation: The block availability was wrong when linking a block reservation to a group reservation and applying the changes to all other members of the group. This has been fixed.

## Reservation Groups

### New Functionality/Feature

- 
- 10901 TT 10901 Group Reservation & Configuration->Global Settings->Miscellaneous->Search Screens->Custom view in Res. Navigator: If the flag: 'Custom view in Res. Navigator is activated, custom fields can also be used on the group reservation when editing the group. Fields from the custom view in Reservation Navigator (V8\_SYS\_CUSTOMRESSEARCH) are not added by default to the group reservation grid, but can be added using 'Customize' from the right mouse short cut menu when editing the group reservation.

36016
  
  - 12194 TT 12194 Reservation->Group Reservation->Financial Account: If a profile is linked to a group reservation, such as a company profile, this profile is suggested when linking a new financial account to the group or block reservation and clicking on 'Profiles' button, the message: 'Do you want to take over linked profiles from the Group' is prompted, selecting 'YES' links the profile from the group also to the financial account.

40562

### Issues fixed

- 
- 19208 TT 19208 Group Reservations->Rooming List: The message: 'There is no more Double Room available in the block on 'the date'. Operation has been aborted' was displayed when entering a block with 5 rooms, linking a group to the block and picking up 5 rooms, then on group reservations selecting 'Rooming List' and 'Save'. The message was not displayed when using 'Split'. This has been fixed since Suite8 version 8.8.4.4 however another issue with Share reservations was found and has been fixed with Suite8 version 8.9.0.4.

73613
  
  - 20219 TT 20219 Group Reservations: In case a split group reservation was modified and the change was intended to be applied to other selected reservations, it could occur that the reservations shown in the list of available group reservations were displayed more than once. This has been fixed since Suite8 version 8.9.0.4.

77675
  
  - 20254 TT 20254 Group Reservation: When editing one of the reservations of an already split group, then changing the departure date and applying the change to all members in the group, the reservation edit dialog of the already edited reservation was displayed and when selecting 'OK', the message: 'Reservation could not be saved. No changes to the database were made. Internal error: database transaction is already started Group apply changes' was displayed. This has been fixed.

## Reservation ind.

### New Functionality/Feature

- 
- 18531 TT 18531 Reservation->Room Move->Reasons & Global

## Reservation ind.

### New Functionality/Feature

Settings->Reservation->Reservation3 tab: Functionality has been added for demanding entering a reason for the room move. If the flag: 'Mandatory room move reason for checked in guests' under Global Settings->Reservation3 tab is activated and a room move scheduled, but no reason entered, the message: 'There are missing room move reasons. Do you want to go back and enter the reasons?' is prompted, selecting 'Yes' positions the cursor on the row where the room move reason is missing and allows entering the reason for the room move. Selecting 'No' closes the reservation dialog box, but prompts the room move reason dialog again when performing the room move and the move is only successful when entering a reason.

70767

20029 TT 20029 Front Desk->Traces: The room number field can be added to the Traces Grid by using 'Customize' from the right mouse short cut menu.

75720

### Issues fixed

18237 TT 18237 Setup->Configuration->Global Settings->Reservation->Reservation 3->Use multi res edit & Reservation Edit Screen->Inventory: The availability on the inventory tab of the reservation edit screen was not refreshed in case an inventory item was linked to the reservation and the multi reservation edit screen was used. The availability would be refreshed when closing the reservation, pressing F10 and opening the reservation again. This has been fixed since Suite8 version 8.9.0.4.

68936

19957 TT 19957 Reservation->Virtual Suites & Global Settings->Reservation4 tab->Virtual suite handling: When entering a new reservation using a virtual suite room type which has more than one virtual suite configured, the following validation error message: 'Validation error: 2984 reservation validation failure: Reservation failed validation. Target profile is empty. Errors were raised while creating billing instructions for slave reservation.' was prompted upon saving the reservation. This has been fixed.

79905

20012 TT 20012 Reservations->Cancel Reservation & Global Settings->Billing->Enhanced pre-arrival posting handling: When cancelling a reservation, the cancellation dialog box defaults to the first defined cancellation reason according to the defined display order under Configuration->Reservations->Cancellation & Reinstatement Reasons. If a posting is not movable, it is checked directly when pressing 'Cancel Res' button, in previous versions, this check was only performed when the cancellation dialog box was filled. These issues have been fixed since Suite8 Version 8.9.0.4. Since this version, the messages when cancelling such a reservation have changed as well from: 'Do you want to move postings to a Financial Account and continue cancel operation?' to 'Do you want to move postings to a Financial Account and continue and cancel the reservation?' And from: 'There are postings for the guest. Do you want to continue cancel operation?' to 'There are postings for the guest. Do you want to continue and cancel the reservation?'.

20034 TT 20034 Reservation->Discount Percentage: The field 'Discount Percentage' when editing a reservation has been changed to allow two decimal digits.

76718

20071 TT 20071 Reservation->Correspondence Control & Global Settings->Reservation2 tab->Correspondence Control: On the Correspondence Control dialog box, all confirmation letters which were already sent were displayed with the status 'Waiting'. This has been fixed.

## Reservation ind.

### Issues fixed

- 20253      TT 20253 Setup->Configuration->Global Settings->Reservation->Reservation 3->Use multi res edit & Setup->Configuration->Reservations->Notes Categories: If a reservation linked to a profile with a note linked to a note category defined as 'Pop up in Reservation' was opened and Suite8 was configured for not using 'multi reservation edit', when closing the pop up note some of the pick boxes on the reservation edit dialog, such as 'Market Code' and 'Source Code', were not visible anymore. This has been fixed since Suite8 version 8.9.0.4.
- 20702      TT 20702 Reservation->Options->Split & Notes: When creating a reservation with two rooms and adding reservation notes marked as 'Not Guest viewable' by not selecting 'Guest Viewable', then splitting the reservation and opening the 'Notes' on the second reservation, the notes were flagged as 'Guest Viewable'. This has been fixed.

79713

## Users

### New Functionality/Feature

- 18550      TT 18550 Configuration->Users->User Log: A new user log has been implemented to track the linking and removing of profiles to/from a reservation. In order to store these information, the new setting Configuration->Users->User Log->Reservation->'Reservation linked profile' has to be activated. This has been added since Suite8 version 8.9.0.4.
- 18571      TT 18571 Configuration->Users->User Log: The information shown in the user log when moving a reservation to a 'Q Room' or from a 'Q Room' has been enhanced since Suite8 version 8.9.0.4 by adding the room number and the housekeeping status of the room.
- 19379      TT 19379 Reservation->Notes & Configuration->Users->User Log: Changing, adding or deleting reservation notes it can be recorded in the user log file by activating the entries: 'Reservation Notes Add', Reservation Notes Edit, Reservation Notes Delete.

70544

70043

69231

### Issues fixed

- 20169      TT 20169 Configuration->Users->User Definition->Rights & Reservation: The user right: 'Check in to dirty room' has been added to the reservation restrictions, users assigned to this right are allowed to perform check in, even though the room is indicated as 'Dirty'.
- 20207      TT 20207 User Rights->Cashiering->Reinstate/Undo Checkout: Users having the user right 'Reinstate/Undo Checkout' set to 'deny' were still able to reinstate a reservation or financial account. This has been fixed since Suite8 version 8.9.0.4.

77592

## V8 Small Business Edition

### Configuration

#### New Functionality/Feature

---

- 20026 TT 20026 Small Business Edition & Selling Limit: The feature 'Selling Limit' has been added to the small business edition. If activated, Selling Limit can be entered on the Rate Query by pressing 'Selling Limit' button. Selling Limit is subject to the user rights: Selling Limit->View and Edit under Configuration->Users->User Definition->Rights.

### License Check

#### New Functionality/Feature

---

- 20353 TT 20353 Small Business Edition->Bonus Point Cards: The Suite8 loyalty module allows configuring and maintaining bonus point or frequent flyer loyalty programs according to the needs of each property. Rewarding Points can be collected by guests and bookers. The loyalty module is accessible from the Customer Relations drop down menu by selecting Bonus Point Cards. Since this version, it is also available in the Small Business Edition, by ordering the license for Bonus Points.

### Reservation ind.

#### Issues fixed

---

- 20301 TT 20301 Small Business Edition->Reservation Edit Screen & Professional Edition->Miscellaneous->User Settings->Reservation->Use alternative reservation edit: The error 'Internal error: com object interface pointer is null in heavyweight res wrapper' occurred when pressing the 'Billing' button in the reservation edit screen. This has been fixed since Suite8 version 8.8.4.8.

- |       |                                                                                                                                                                                                                                                                                      |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 15386 | <p>TT 15386 Suite8 home page-&gt;Corporate Login &amp; Suite8-&gt;Configuration-&gt;Global Settings-&gt;Reservation3 tab-&gt;Use Block Pickup Agents: If the flag: 'Use Block Pickup Agents' is activated under Global Settings-&gt;Reservation 3 tab, an additional tab 'Pickup</p> |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Suite 8 Homepage

### New Functionality/Feature

Agents' is available when editing a block. On this page, the company profile with the corporate id can be linked, when the user who is linked to the company profile attached to the block as 'Pickup Agent', logs in to Suite8 home page and opens the 'My Account' page, a new tab 'Allotments' is available, allowing picking up reservations from the block.

- 19404 TT 19404 Suite8 home page->Prices: Functionality has been added allowing grouping room types on the 'BriefPrices' page and using different expand levels. To use this, the following line has to be activated in the file: 'Global.asax':  
`hotel.nodeExpandLevel = NodeExpandLevel.neRoomTypes;`  
 The following values can be used:  
 neNone - no auto expand  
 neRoomTypes - The name of the room types are displayed, when pressing '+', the details of the corresponding room type are shown.  
 neRoomTypeDetails - The name and description of the room types are displayed, when pressing '+', the details of the corresponding room type are shown.
- 19636 TT 19636 Suite8 home page & Credit Cards: If the variable: 'hotel.ValidateCreditCardOnReservation', is activated in the file 'global.asax', set to 'true', a reservation can not be created on Suite8 home page if no valid credit card is attached to the profile. The booker is prompted upon login to Suite8 home page to either choose from one of the existing valid credit cards linked to the profile or to enter a new credit card. The selected credit card or the newly entered credit card is then linked to the reservation made via Suite8 home page. This has been added since Suite8 Version 8.9.0.5. 76719
- 19795 TT 19795 Suite8 home page & Social Networks & Configuration->Suite8 home page->Set up: Functionality has been added allowing adding Social Network share buttons to the inquiry page of Suite8 home page. To use this, activate the buttons: Show Facebook Button, Show Twitter Button and Show GooglePlus Button under Configuration->Suite8 Homepage->Set up. If activated, the corresponding buttons are displayed on the Inquiry page of Suite8 home page, when pressing one of the buttons the corresponding page, either: Twitter, Facebook or GooglePlus is opened.
- 19912 TT 19912 Suite8 home page->Packages & Configuration->Suite8 home page->Package/ Rate Linkage: The option Package/ Rate Linkage has been added to the configuration in Suite8 under Suite8 home page. Selecting Package/Rate Linkage, allows linking packages marked as 'Open for web booking' on the package configuration, to rates codes marked as 'Open for web booking' on the rate code set up and defining if a package is available for selling on Suite8 home page or not. The rate code can be selected on top and the packages are displayed on the grid. When selecting a package on the grid and pressing the button: 'Include', indicates that this package is displayed on Suite8 home page for the chosen rate code. When selecting a package on the grid and pressing the button: 'Exclude', does not display this package on Suite8 home page for the chosen rate code. To clear an indicator, select the package and press 'Clear' button. If the packages on the list do not show an indicator for the selected rate code, all packages are displayed on Suite8 home page. If some packages are set to 'Include' and some to 'Exclude', but there are also packages which are not marked for one rate code, only the packages marked as 'Include' are displayed on Suite8 home page.
- 20592 TT 20592 Suite8 home page->Quick Booking Widget: Functionality has been added, allowing opening a quick booking dialog box on Suite8 home page. The widget for

## Suite 8 Homepage

### New Functionality/Feature

Quick Booking has been added and can be called on Suite8 home page as follows:  
<http://localhost/V8Client/widgets/QuickBooking.aspx?bc=EBE6D2&cl=58442D&culture=EN-EN>

The following parameters are available parameters:

'bc' for background color followed by the color hex code

'cl' for font color followed by the color hex code

and 'culture' for the language culture

On the above mentioned example the background color is grey, the font color is brown and the language is 'English'.

The quick booking page is opened, allowing queering the dates, nights, entering the number of adults and rooms, child age categories and pressing 'Search' button to start the inquiry and open the proposed Prices page: 'ShowBriefPrices'.

- 20646 TT 20646 Suite8 home page & Availability Calendar: Functionality has been added, allowing opening the Availability Calendar directly on Suite8 home page, selecting dates on the calendar, entering the number of adults and pressing 'Search' button to start the inquiry and open the proposed Prices page: 'ShowBriefPrices'. The following parameters can be used:  
 'bc' for background color followed by the color hex code  
 'cl' for font color followed by the color hex code  
 and 'culture' for the language culture  
 For example when opening the Availability Calendar element on a localhost connection with grey background color and brown font color and selecting the language culture 'English', it would look as follows:  
<localhost/v8client/Widgets/AvailCalendar.aspx?bc=EBE6D2&cl=58442D&culture=En-GB>

### Issues fixed

- 20758 TT 20758 Suite8 home page->Review & Packages: When selecting a package with a picture, the picture of the package was not displayed on the 'Review Booking' dialog. This has been fixed.

## Suite 8 MyStay

### New Functionality/Feature

- 18424 TT 18424 Suite8 home page->MyStay: New look and feel has been added for the MyStay pages, it suites now also for iPad.
- 18601 TT 18601 Suite8 home page->My Stay: Suite8 My Stay has been enhanced using java script to conform to the style and display in Suite8 home page when queering for rates on the 'Showbriefprices' page, with expanding elements instead of pop up.

## V8 Table Reservation

### Table Reservation System

#### New Functionality/Feature

- 18757      TT 18757 Table Reservation: When entering or editing a table reservation it is possible indicating that a specific table is locked as it is a special requested table by the guest. This is indicated by selecting the field: 'Fixed' next to the tables. Only authorized users can block a table for a guest, while unauthorized users will not be able to change that table. The user right 'Change table on fixed reservation' under Configuration->Users->User Definition->Rights->Table reservations can be activated to authorize users for assigning tables as 'fixed' table reservation.
  
- 18813      TT 18813 Table Reservation->Restaurants Availability->Table Reservation Availability: It is now possible printing the diary on the table reservation availability dialog box by pressing 'Print Plan' button.
  
- 19706      TT 19706 Table Reservation/ Resource Management: With the functionality to reverse axes on the availability screen on Table Reservations or Resource Management by activating the flag 'Reverse Axes on the Availability Screen' under Global Settings->Generic4 tab. Two issues have been fixed:
  1. When selecting '8 Minutes' in the field 'View by' and pressing 'Print' button to print the Plan, the error: 'List index out of bounds (0)' was prompted. When selecting a larger amount of minutes, such as '15' minutes, no error was prompted.
  2. The plan is now printed according to the way the axes are shown. Previously it was always printing as usual with the axes not reversed.
  
- 19761      TT 19761 Table Reservation Management/ Resource Reservation & Configuration->Table Reservation/ Resource Reservation->Table/ Resource: Tables/Resources can be set to 'Inactive' if there is no future reservation on this table or resource.

75604

#### Issues fixed

- 20165      TT 20165 Table Reservation: An issue was fixed in Suite8 version 8.8.4.8 where a restaurant could not be closed on certain days, even though no reservations existed for that day. This happened in an Oracle environment where the NLS\_TERRITORY settings were configured with a value other than 'AMERICA'.
  
- 20455      TT 20455 Table Reservation->New->Edit Table Reservation->Print: When creating a new table reservation and pressing 'Print' button, the message: 'Reservation will be saved, do you want to continue?' is prompted when pressing 'Yes', the Template Selection dialog box is prompted but when selecting the template and 'Preview' the letter, it was empty. This has been fixed since Suite8 Version 8.9.0.5.

76629

78650

## V8 Translation Studio

### Translation Studio

#### Issues fixed

---

- 20417 TT 20417 Customer Relation->Task & Activities: The confirm message prompt: 'Are you sure?', when deleting a task or activity is displayed in the correct language. In previous versions it was prompted in English even if the language selection of the user was different.

## V8 XML Interface

### 3rd Party Interface

#### New Functionality/Feature

- 19504 TT 19504 XML Export for Fairmas & Configuration->Miscellaneous->Scheduled Tasks: Functionality has been added allowing XML Export for Fairmas from Suite8 based on an XML Report using Scheduled Task. Fairmas offers planning & controlling software for the hospitality industry for market share analysis and benchmarking. To use this, the xml export has to be added to the scheduled tasks.

### Hotel Connector

#### Issues fixed

- 19894 TT 19894 XML Interface, MPY Interface & Hotel Connector->Third party profile search: Duplicate records were found in the Suite8 database when using 3rd party profile search with Hotel Connector. This has been fixed. The merge process is as follows: When merging profile 'A' to 'B' and 'B' does not have a third party ID for this CRSTYPE, it will be merged to a new profile (this is necessary for the third party system to find a match). If there is a third party ID for this CRSTYPE, it is not merged.

### Table Reservation System

#### New Functionality/Feature

- 20426 TT 20426 XML Interface & Table Reservations: Table reservations have been added to the XML Interface Requests. For more details please consult the XML Interface documentation.

### Voucher Management

#### New Functionality/Feature

- 19451 TT 19451 XML Interface & Voucher Management: Functionality has been added for requesting Voucher Redemption. The Request requires at least one of the following licenses:  
XML Interface Standard Edition  
XML Interface Enhanced Edition  
as well as the license for Voucher Management.  
For further details, please consult the 'XML Interface documentation'.

74130

### XML Interface

#### New Functionality/Feature

- 19871 TT 19871 XML Interface & Packages: For selecting package elements, specifications and an example have been added to the 'XML Interface.pdf' file.
- 20643 TT 20643 Customer Relation->Profiles->More Fields->No Mailing & No E-Mailing & XML Interface: If the flag for receiving no mailings or E-mailings is activated on a customer profile, it is taken into consideration by the XML Interface request and response file, the field names are 'NoMailing' and 'NoEMailing'.

76088

#### Issues fixed

- 17367 TT 17367 XML Interface & Global Settings->Reservation3 tab->Manual Packages->Frequency link for manual packages on package grid: If the flag: 'Frequency

## XML Interface

### Issues fixed

---

link for manual packages on package grid' was not activated, all packages with no record in the table 'YPRL', the package link table to reservations and frequencies were not returned in the response message. They were only returned in the response message if the flag was activated and a link record existed in the table 'YPRL'. This has been fixed.

64772

20450 TT 20450 XML Interface & Membership numbers: When sending an update request with update membership message, such as specifying the card ID, it was possible to update the membership number with a number belonging to a different profile. This has been fixed.

## V8 XML Interface for Registration Systems

### XML Interface

#### New Functionality/Feature

---

18160 TT 18160 Software Interfaces->JetWeb: The button 'No group Jet Web Processing, is made unavailable immediately after the Registration card print. In previous versions it was only unavailable after closing the group dialog box and opening it again.
