# 1.0 INTRODUCTION

## 1.1 Purpose and Scope

This document describes the application-related installation procedures for an HP C-class Diameter Signaling Router 7.2 system.

This document assumes that platform-related configuration has already been done. Before executing this document, please ensure that all procedures from [7] have already been performed successfully.

The audience for this document includes Oracle customers as well as these groups: Software System, Product Verification, Documentation, and Customer Service including Software Operations and First Office Application.

In scenarios where the DSR installation has already been executed, and system growth, de-growth is necessary; refer to **Appendix N: Growth/De-Growth**.

## 1.3 Acronyms

An alphabetized list of acronyms used in the document

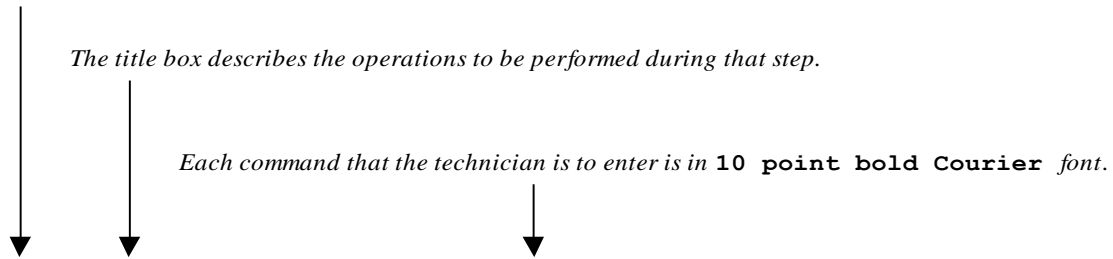

Table 1 Acronyms

Acronym	Definition
<b>BIOS</b>	Basic Input Output System
<b>CD</b>	Compact Disk
<b>DVD</b>	Digital Versatile Disc
<b>EBIPA</b>	Enclosure Bay IP Addressing
<b>FRU</b>	Field Replaceable Unit
<b>HP c-Class</b>	HP blade server offering
<b>iLO</b>	Integrated Lights Out manager
<b>IPM</b>	Initial Product Manufacture – the process of installing TPD on a hardware platform
<b>MSA</b>	Modular Smart Array
<b>NB</b>	NetBackup
<b>OA</b>	HP Onboard Administrator
<b>OS</b>	Operating System (e.g. TPD)
<b>RMS</b>	Rack Mounted Server
<b>PMAC</b>	Platform Management & Configuration
<b>SAN</b>	Storage Area Network
<b>SFTP</b>	Secure File Transfer Protocol
<b>SNMP</b>	Simple Network Management Protocol
<b>TPD</b>	Tekelec Platform Distribution
<b>TVOE</b>	Tekelec Virtual Operating Environment
<b>VM</b>	Virtual Machine
<b>VSP</b>	Virtual Serial Port
<b>IPFE</b>	IP Front End
<b>PCA</b>	Policy and Charging Application
<b>IDIH</b>	Integrated Diameter Intelligence Hub

## 1.4 Terminology

Multiple server types may be involved with the procedures in this manual. Therefore, most steps in the written procedures begin with the name or type of server to which the step applies. For example:

*Each step has a checkbox for every command within the step that the technician should check to keep track of the progress of the procedure.*

5	<b>ServerX:</b> Connect to the console of the server	Establish a connection to the server using cu on the terminal server/console.
<input type="checkbox"/>		<code>\$ cu -l /dev/ttyS7</code>

Figure 1 Example of an instruction that indicates the server to which it applies

**Table 2 Terminology**

<p><b>Management Server</b></p>	<p>HP ProLiant DL360/ DL380 deployed to run TVOE and host a virtualized PMAC application. Can also host a virtualized NOAM or IDIH. It is also used to configure the Aggregation switches (via the PM&amp;C) and to serve other configuration purposes.</p>
<p><b>PMAC Application</b></p>	<p>PMAC is an application that provides platform-level management functionality for HP G6/G8/G9 system, such as the capability to manage and provision platform components of the system so it can host applications.</p>
<p><b>Site</b></p>	<p>Applicable for various applications, a Site is type of "Place". A Place is configured object that allows servers to be associated with a physical location.</p> <p>A Site place allows servers to be associated with a physical site. For example, Sites may be configured for Atlanta, Charlotte, and Chicago. Every server is associated with exactly one Site when the server is configured.</p> <p>For the Policy &amp; Charging DRA application, when configuring a Site only put DA-MPs and SBR MP servers in the site. Do not add NOAM, SOAM or IPFE MPs to a Site</p>
<p><b>Place Association</b></p>	<p>Applicable for various applications, a "Place Association" is a configured object that allows Places to be grouped together. A Place can be a member of more than one Place Association.</p> <p>The Policy &amp; Charging DRA application defines two Place Association Types: Policy Binding Region and Policy &amp; Charging Mated Sites.</p>
<p><b>Two Site Redundancy</b></p>	<p>Two Site Redundancy is a data durability configuration in which Policy and Charging data is unaffected by the loss of one site in a Policy &amp; Charging Mated Sites Place Association containing two sites.</p> <p>Two Site Redundancy is a feature provided by Server Group configuration. This feature provides geographic redundancy. Some Server Groups can be configured with servers located in two geographically separate Sites(locations). This feature will ensure that there is always a functioning Active server in a Server Group even if all the servers in a single site fail.</p>

<p style="text-align: center;"><b>Three Site Redundancy</b></p>	<p>Three Site Redundancy is a data durability configuration in which Policy and Charging data is unaffected by the loss of two sites in a Policy &amp; Charging Mated Sites Place Association containing three sites.</p> <p>Three Site Redundancy is a feature provided by Server Groups configuration. This feature provides geographic redundancy. Some Server Groups can be configured with servers located in three geographically separate Sites(locations). This feature will ensure that there is always a functioning Active server in a Server Group even if all the servers in two sites fail.</p>
<p style="text-align: center;"><b>Policy &amp; Charging SBR Server Group Redundancy</b></p>	<p>The Policy and Charging application will use SBR Server Groups to store the application data. The SBR Server Groups will support both Two and Three Site Redundancy. The Server Group Function name is "Policy &amp; Charging SBR".</p>
<p style="text-align: center;"><b>Server Group Primary Site</b></p>	<p>A Server Group Primary Site is a term used to represent the principle location within a SOAM or SBR Server Group. SOAM and SBR Server groups are intended to span several Sites(Places). For the Policy &amp; Charging DRA application, these Sites(Places) are all configured within a single "Policy and Charging Mated Sites" Place Association.</p> <p>The Primary Site may be in a different Site(Place) for each configured SOAM or SBR Server Group .</p> <p>A Primary Site is described as the location in which the Active and Standby servers to reside, however there cannot be any Preferred Spare servers within this location. All SOAM and SBR Server Groups will have a Primary Site.</p>
<p style="text-align: center;"><b>Server Group Secondary Site</b></p>	<p>A Server Group Secondary Site is a term used to represent location in addition to the Primary Site within a SOAM or SBR Server Group. SOAM and SBR Server groups are intended to span several Sites(Places). For the Policy &amp; Charging DRA application, these Sites(Places) are all configured within a single "Policy and Charging Mated Sites" Place Association.</p> <p>The Secondary Site may be in a different Site(Place) for each configured SOAM or SBR Server Group .</p> <p>A Secondary Site is described as the location in which only Preferred Spare servers reside. The Active and Standby servers cannot reside within this location. If Two or Three Site Redundancy is wanted, a Secondary Site is required for all SOAM and SBR Server Groups.</p>

<p style="text-align: center;"><b>Server Group Tertiary Site</b></p>	<p>A Server Group Tertiary Site is a term used to represent location in addition to the Primary &amp; Secondary Sites within a SOAM or SBR Server Group. SOAM and SBR Server groups are intended to span several Sites(Places). For the Policy &amp; Charging DRA application, these Sites(Places) are all configured within a single "Policy and Charging Mated Sites" Place Association.</p> <p>The Tertiary Site may be in a different Site(Place) for each configured SOAM or SBR Server Group .</p> <p>A Tertiary Site is described as the location in which only Preferred Spare servers reside. The Active and Standby servers cannot reside within this location. A Tertiary Site only applies if Three Site Redundancy is wanted for SOAM and SBR Server Groups.</p>
<p style="text-align: center;"><b>Software Centric</b></p>	<p>The business practice of delivering an Oracle software product, while relying upon the customer to procure the requisite hardware components. Oracle provides the hardware specifications, but does not provide the hardware, and is not responsible for hardware installation, configuration, or maintenance.</p>
<p style="text-align: center;"><b>Enablement</b></p>	<p>The business practice of providing support services (hardware, software, documentation, etc) that enable a 3rd party entity to install, configuration, and maintain Oracle products for Oracle customers.</p>

## 2.0 GENERAL DESCRIPTION

This document defines the steps to execute the initial installation of the Diameter Signaling Router (DSR) 7.2 application on new HP C-Class Hardware.

DSR 7.2 installation paths are shown in the figures below. The general timeline for all processes to perform a software installation/configuration and upgrade is also included below.

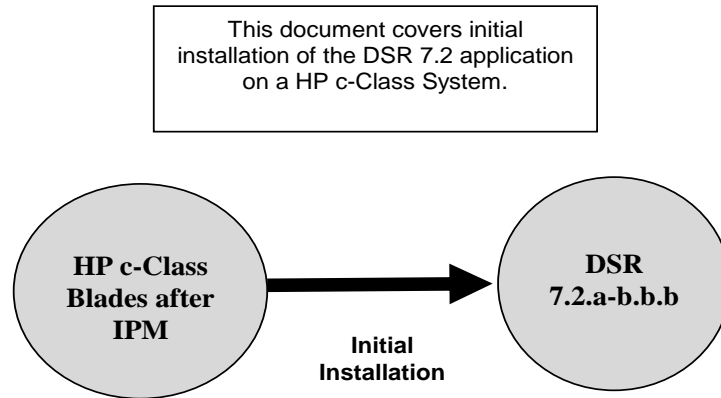

Figure 2 Example of Initial Application Installation Path

## 3.0 INSTALL OVERVIEW

This section provides a brief overview of the recommended method for installing DSR software that is on an HP c-Class system. The basic install process and approximate time required is outlined in **Figure 4**.

### 3.1 Required Materials

1. One (1) target release Application Media, or a target-release ISO
2. One (1) ISO of TPD release, or later shipping baseline as per Oracle ECO

### 3.2 Installation Overview

This section describes the overall strategy to be employed for a single or multi-site DSR 7.2 installation. It also lists the procedures required for installation with estimated times. **Section 3.2.1 Installation Strategy** discusses the overall install strategy and includes an installation flow chart that can be used to determine exactly which procedures should be run for an installation. **3.2.3 Installation Procedures** lists the steps required to install a DSR 7.2 system. These latter sections expand on the information from the matrix and provide a general timeline for the installation.

### 3.2.1 Installation Strategy

A successful installation of DSR requires careful planning and assessment of all configuration materials and installation variables. Once a site survey has been conducted with the customer, the installer should use this section to map out the exact procedure list that will be executed at each site.

**Figure 3** illustrates the overall process that each DSR installation will involve. In summary:

- 1) An overall installation requirement is decided upon. Among the data that should be collected:
  - The total number of sites
  - The number of servers at each site and their role(s)
  - Does DSR's networking interface terminate on a Layer 2 or Layer 3 boundary?
  - Number of enclosures at each site -- if any at all.
  - Will NOAMs use rack-mount servers or server blades?
  - (Per Site) Will MP's be in N+ 0 configurations or in active/standby?
  - What time zone should be used across the entire collection of DSR sites?
  - Will SNMP traps be viewed at the NOAM, or will an external NMS be used? (Or both?)
- 2) A site survey (NAPD) is conducted with the customer to determine exact networking and site details. **Note:** XMI and IMI addresses are difficult to change once configured. It is very important that these addresses are well planned and not expected to change after a site is installed.
- 3) For each SOAM /MP/DR-NOAM only site (i.e. sites NOT containing the main NOAM server), the installer will execute the procedures in document [7] to set up the PMAC, HP enclosures, and switches. Then, using the procedures in this document, all servers will be IPM-ed with the proper TPD and DSR application ISO image. **Figure 4** details the exact procedures that are to be executed for the 2nd part of this install. When this is complete, all non-NOAM sites will be reachable through the network and ready for further installation when the primary NOAM site is brought up.
- 4) The installer will then move to the "main" site that will contain the primary NOAM. Again, [7] will be executed for this site. Then, moving on to the procedures in this document, **Figure 4** is consulted to determine the procedure list. During this install, the user will "bring up" the other sub-sites (if they exist) that were configured in step 3. For single sites where the NOAM/SOAM/MPs are all located together, then step 3 is skipped and the entire install is covered by this step.
- 5) Once the primary NOAM site has been installed according to [7] and this document, then full DSR installation is complete.

**Note:** An alternative install strategy will swap steps 3 & 4. The main NOAM site is installed first, and then the sub-sites (DR-NOAM, SOAM/MP only) are installed and brought up on the NOAM as they are configured. This approach is perfectly valid, but is not reflected in the flow-charts/diagrams shown here.

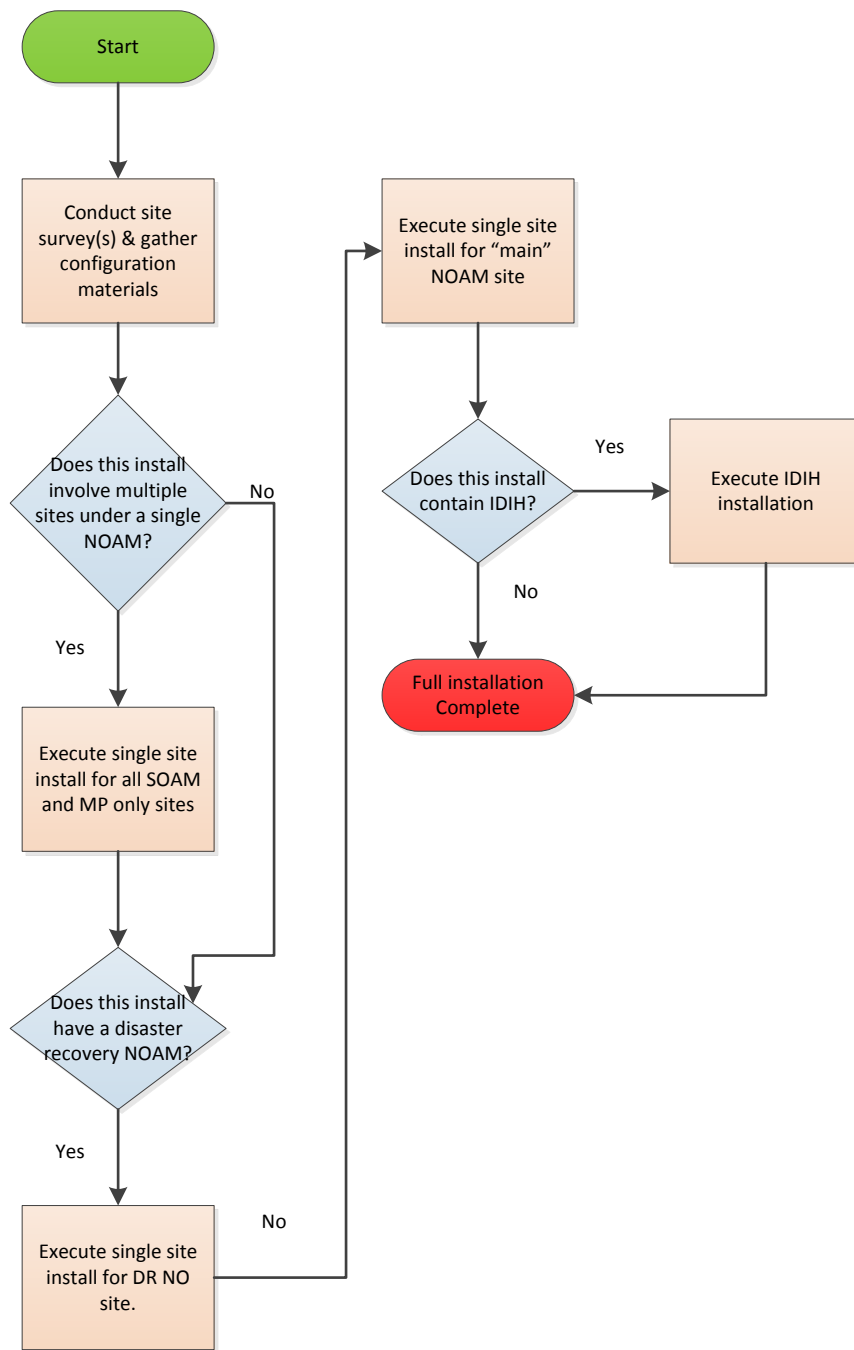

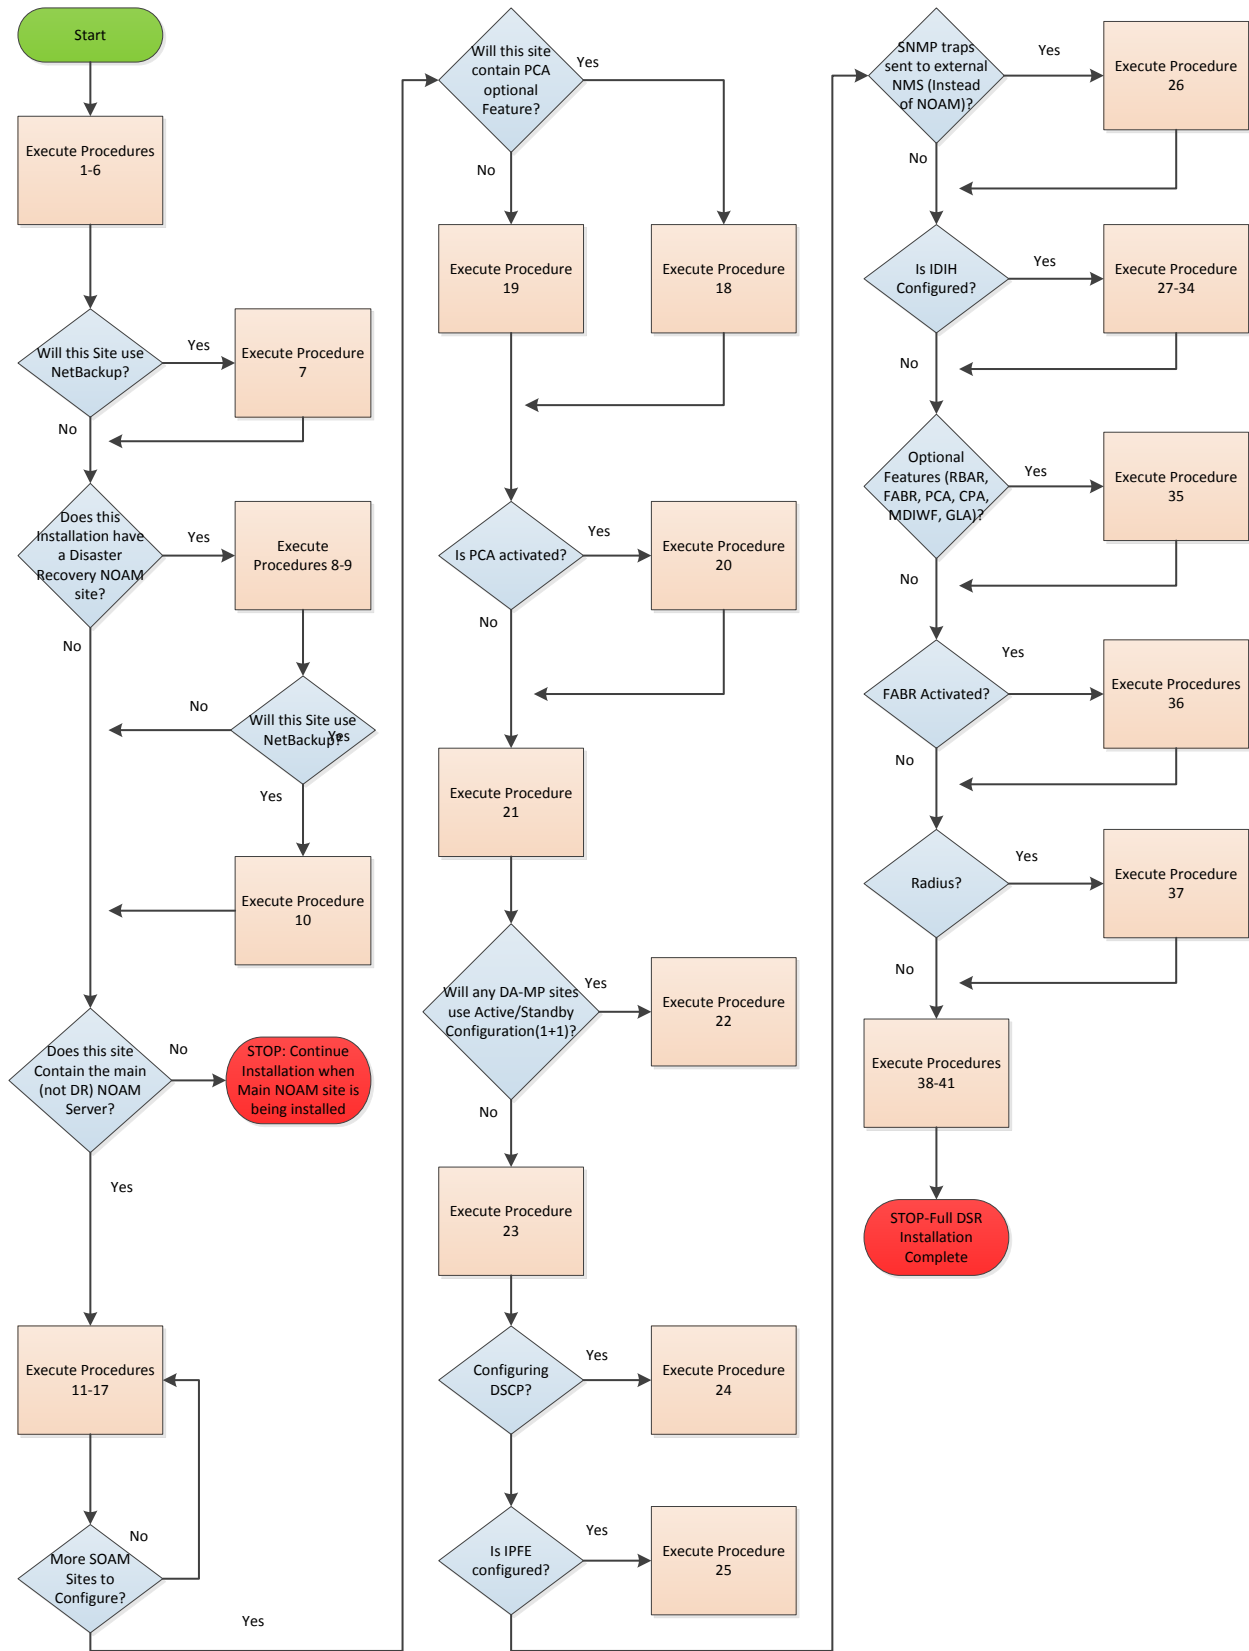

Figure 3 DSR Installation: High Level Sequence

**Figure 4 DSR Single Site Installation Procedure Map**

### 3.2.2 SNMP Configuration

The network-wide plan for SNMP configuration should be decided upon before DSR installation proceeds. This section provides some recommendations for these decisions.

SNMP traps can originate from the following entities in a DSR installation:

- DSR Application Servers (NOAM, SOAM, MPs of all types)
- DSR Auxiliary Components (OA, Switches, TVOE hosts, PMAC)

DSR application servers can be configured to:

1. Send all their SNMP traps to the NOAM via merging from their local SOAM. All traps will terminate at the NOAM and be viewable from the NOAM GUI (entire network) and the SOAM GUI (site specific). Traps are displayed on the GUI both as alarms and logged in trap history. This is the default configuration option and no changes are required for this to take effect.
2. Send all their SNMP traps to an external Network Management Station (NMS). The traps will be seen at the SOAM AND/OR NOAM as alarms AND they will be viewable at the configured NMS(s) as traps.

Application server SNMP configuration is done from the NOAM GUI, near the end of DSR installation. See the procedure list for details.

DSR auxiliary components must have their SNMP trap destinations set explicitly. Trap destinations can be the NOAM VIP, the SOAMP VIP, or an external (customer) NMS. The recommended configuration is as follows:

The following components:

- PMAC (TVOE)
- PMAC (App)
- OAs
- All Switch types (4948, 3020, 6120.6125G)
- TVOE for DSR Servers

Should have their SNMP trap destinations set to:

1. The local SOAM VIP
2. The customer NMS, if available

### 3.2.3 Installation Procedures

The following table illustrates the progression of the installation process by procedure with estimated times. The estimated times and the phases that must be completed may vary due to differences in typing ability and system configuration. The phases outlined in are to be executed in the order they are listed.

**TABLE 2 INSTALLATION OVERVIEW**

Procedure	Phase	Elapsed Time (Minutes)	
		This Step	Cum.
<b>Procedure 1</b>	Load Application and TPD ISO onto PMAC Server	15	15
<b>Procedure 2</b>	Configure NOAM Servers	25	40
<b>Procedure 3</b>	Configure the First NOAM NE and Server	10	50
<b>Procedure 4</b>	Configure the NOAM Server Group	5	55
<b>Procedure 5</b>	Configure the Second NOAM Server	10	65
<b>Procedure 6</b>	Complete NOAM Server Group Configuration	5	70
<b>Procedure 7</b>	Install NetBackup Client*	15	85
<b>Procedure 8</b>	NOAM Configuration for DR Site*	25	110
<b>Procedure 9</b>	Pairing for DR-NOAM site*	15	125
<b>Procedure 10</b>	Install NetBackup Client*	15	140
<b>Procedure 11</b>	Configure SOAM TVOE Server Blades	15	165
<b>Procedure 12</b>	Create SOAM Guest VMs	5	170
<b>Procedure 13</b>	IPM Blades and VMs	20	190
<b>Procedure 14</b>	Install the Application Software	15	215
<b>Procedure 15</b>	Configure SOAM NE	5	220
<b>Procedure 16</b>	Configure the SOAM Servers	20	240
<b>Procedure 17</b>	Configure the SOAM Server Group	10	250
<b>Procedure 18</b>	Configure MP Blade Servers	25	275
<b>Procedure 19</b>	Activate PCA (PCA Only)*	10	285
<b>Procedure 20</b>	Configure Places and Assign MP Servers to Places (PCA ONLY)*	10	295
<b>Procedure 21</b>	Configure the MP Server Group(s) and Profile(s)	10	305
<b>Procedure 22</b>	Add VIP for Signaling networks (Active/Standby Configurations Only)*	5	310
<b>Procedure 23</b>	Configure the Signaling Network Routes	10	320
<b>Procedure 24</b>	Configure DSCP Values for Outgoing Traffic*	10	330
<b>Procedure 25</b>	IP Front End (IPFE) Configuration*	15	345
<b>Procedure 26</b>	Configure SNMP Trap Receiver(s)*	10	355
<b>Procedure 27</b>	IDIH Configuration*	90	445
<b>Procedure 28</b>	Configure DSR Reference Data Synchronization for IDIH*	15	460
<b>Procedure 29</b>	IDIH Configuration: Configuring the SSO Domain*	30	490
<b>Procedure 30</b>	IDIH Configuration: Configure IDIH in the DSR*	20	510
<b>Procedure 31</b>	IDIH Configuration: Configure Mail Server*	20	530
<b>Procedure 32</b>	IDIH Configuration: Configure SNMP Management Server*	20	550
<b>Procedure 33</b>	IDIH Configuration: Change Network Interface*	20	570

<b>Procedure 34</b>	IDIH Configuration: Backup the upgrade and Disaster Recovery FDC File*	10	580
<b>Procedure 35</b>	Activate Optional Features*	30	610
<b>Procedure 36</b>	Configure ComAgent Connections (DSR + SDS)	20	630
<b>Procedure 37</b>	Shared secret encryption key revocation (Radius Only)*	20	650
<b>Procedure 38</b>	Backup TVOE Configuration	10	660
<b>Procedure 39</b>	Backup PMAC Application	10	670
<b>Procedure 40</b>	NOAM Database Backup	10	680
<b>Procedure 41</b>	SOAM Database Backup	10	690

\* denotes Optional Steps

### 3.2 Optional Features

When DSR installation is complete, further configuration and/or installation steps will need to be taken for optional features that may be present in this deployment. Please refer to these documents for the post-DSR install configuration steps needed for their components.

**TABLE 3 OPTIONAL FEATURES**

<b>Feature</b>	<b>Document</b>
Diameter Mediation	DSR Meta Administration Feature Activation Procedure, E58661
Charging Proxy Application (CPA)	DSR CPA Feature Activation Procedure, E58663
Full Address Based Resolution (FABR)	DSR FABR Feature Activation Procedure, E58664
Range Based Address Resolution (RBAR)	DSR RBAR Feature Activation Procedure, E58665
Map-Diameter Interworking (MAP-IWF)	DSR MAP-Diameter IWF Feature Activation Procedure, E58666
Policy and Charging Application (PCA)	DSR 7.0 PCA Activation and Configuration Procedure, E58667  DSR 7.1 PCA Activation and Configuration Procedure, E63560
Gateway Location Application (GLA)	DSR GLA Feature Activation Procedure, E58659

## 4.0 SOFTWARE INSTALLATION PROCEDURE

As mentioned earlier, the hardware installation and network cabling should be done before executing the procedures in this document. It is assumed that at this point, the user has access to:

- ILO consoles of all server blades at all sites
- ssh access to the PMAC servers at all sites
- GUI access to PMAC servers at all sites
- A configuration station with a web browser, ssh client, and scp client.

### SUDO

As a non-root user (*admusr*), many commands (*when run as admusr*) now require the use of '*sudo*'.

### IPv6

Standard IPv6 formats for IPv6 and prefix can be used in all IP configuration screens which enable the DSR to be run in an IPv6 only environment. When using IPv6 for XMI and management, you must place the IPv6 address in brackets (highlighted in red below), example as followed:

```
https:// [<IPv6 address>]
```

If a dual-stack (IPv4 & IPv6) network is required, it is recommended that you first configure the topology, and then "Migrate" to IPv6. Reference [6] for instructions on how to accomplish this IPv6 migration.

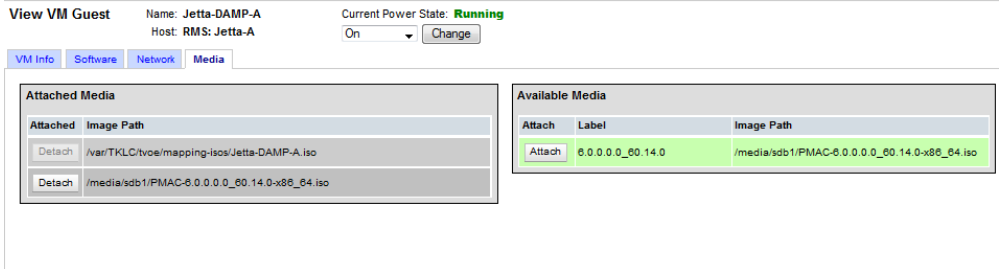

## 4.1 Install and Configure NOAM Servers

### 4.1.1 Load Application and TPD ISO onto the PMAC Server

#### Procedure 1: Load Application and TPD ISO onto PMAC Server

<b>S T E P #</b>	This procedure will load the DSR Application and TPD ISO into the PMAC Server  <b>Needed material:</b> - Application Media  Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.  If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b> , and ask for assistance.
1 <input type="checkbox"/>	<b>TVOE Host:</b> Load Application ISO  Add the Application ISO image to the PM&C, this can be done in one of three ways: <ol style="list-style-type: none"><li>1. Insert the Application CD required by the application into the removable media drive.</li><li>2. Attach the USB device containing the ISO image to a USB port.</li><li>3. Copy the Application iso file to the PM&amp;C server into the “<b>/var/TKLC/smac/image/isoimages/home/smacftpusr/</b>” directory as pmacftpusr user:  cd into the directory where your ISO image is located on the <b>TVOE Host</b> (<i>not on the PM&amp;C server</i>)  Using sftp, connect to the PM&amp;C server <pre>\$ sftp pmacftpusr@&lt;pmac_management_network_ip&gt; \$ put &lt;image&gt;.iso</pre> After the image transfer is 100% complete, close the connection: <pre>\$ quit</pre></li></ol>

**Procedure 1: Load Application and TPD ISO onto PMAC Server**

<p>2</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI: Login</b></p>	<p>Open web browser and enter:</p> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>http://&lt;PMAC Mgmt Network IP&gt;</b></p> </div> <p>Login as <i>pmacadmin</i> user:</p> 
<p>3</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b></p> <p>Attach the software Image to the PMAC Guest</p>	<p>If in Step 1 the ISO image was transferred directly to the PM&amp;C guest via sftp, skip the rest of this step and continue with step 4. If the image is on a CD or USB device, continue with this step.</p> <p>In the PM&amp;C GUI, navigate to <b>Main Menu -&gt; VM Management</b>. Select the PMAC guest. On the resulting <b>"View VM Guest"</b> page, select the <b>Media</b> tab.</p> <p>Under the <b>Media</b> tab, find the ISO image in the <b>"Available Media"</b> list, and click its <b>Attach</b> button. After a pause, the image will appear in the <b>"Attached Media"</b> list.</p> 

## Procedure 1: Load Application and TPD ISO onto PMAC Server

4 <input type="checkbox"/>	<b>PMAC GUI:</b> Add Application Image	<p>Navigate to <b>Main Menu -&gt; Software -&gt; Manage Software Images</b></p> <p>Press <b>Add Image</b> button. Use the drop down to select the image.</p> <div data-bbox="462 373 950 415"></div> <p>If the image was supplied on a CD or a USB drive, it will appear as a virtual device ("<b>device://...</b>"). These devices are assigned in numerical order as CD and USB images become available on the Management Server. The first virtual device is reserved for internal use by TVOE and PMAC; therefore, the iso image of interest is normally present on the second device, "<b>device://dev/sr1</b>". If one or more CD or USB-based images were already present on the Management Server before you started this procedure, choose a correspondingly higher device number.</p> <p>If in Step 1 the image was transferred to PMAC via sftp it will appear in the list as a local file "<b>/var/TKLC/...</b>".</p> <h3>Add Software Image</h3> <hr/> <div data-bbox="451 821 1390 873"></div> <p>Images may be added from any of these sources:</p> <ul style="list-style-type: none"><li>• Oracle-provided media in the PM&amp;C host's CD/DVD drive (Refer to Note)</li><li>• USB media attached to the PM&amp;C's host (Refer to Note)</li><li>• External mounts. Prefix the directory with "extfile://".</li><li>• These local search paths:<ul style="list-style-type: none"><li>◦ /var/TKLC/upgrade/*.iso</li><li>◦ /var/TKLC/smac/image/isoimages/home/smacftpusr/*.iso</li></ul></li></ul> <p>Note: CD and USB images mounted on PM&amp;C's VM host must first be made accessible to the PM</p> <div data-bbox="521 1220 1317 1367"><p>Path: <input type="text" value="/var/TKLC/upgrade/DSR-7.2.0.0.0_72.9.0-x86_64.iso"/></p><p>Description: <input type="text"/></p></div> <hr/> <div data-bbox="456 1434 643 1472"></div> <p>Select the appropriate path and Press <b>Add New Image</b> button.</p> <p>You may check the progress using the <b>Task Monitoring</b> link. Observe the green bar indicating success.</p> <p>Once the green bar is displayed, remove the DSR application Media from the optical drive of the management server.</p>
-------------------------------	---	---

**Procedure 1: Load Application and TPD ISO onto PMAC Server**

5 <input type="checkbox"/>	<b>PMAC GUI:</b> Load TPD ISO	If the TPD ISO hasn't been loaded onto the PMAC already, repeat <b>steps 1 through 4</b> to load it using the TPD media or ISO.
-------------------------------	---	---

## 4.1.2 Execute DSR Fast Deployment for NOAMs

### Procedure 2: Configure NOAM Servers

<b>S T E P #</b>	<p>This procedure will extend the TVOE networking configuration on the First RMS server (if necessary), configure the networking on additional rack mount servers, create the NOAM VMs, and deploy the DSR and TPD images.</p> <p><b>Prerequisite:</b> TVOE and PMAC (virtualized) have been installed on the First RMS Server as described in [7]</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>PMAC Server:</b> Login	Establish an SSH session to the PMAC server, login as <b>admusr</b> .

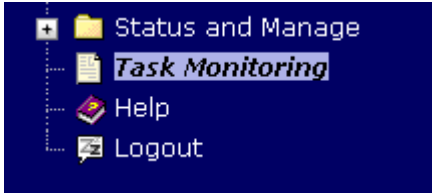

## Procedure 2: Configure NOAM Servers

2 <input type="checkbox"/>	<b>PMAC Server:</b> Update the DSR Fast Deployment template	<p>Perform the following command to navigate to the directory containing the DSR fast deployment template:</p> <pre>\$ cd /usr/TKLC/smac/etc</pre> <p><b>Note:</b> If the fast deployment template is not present, then please re-execute section 4.2.2, Step #13 [7]</p> <p>Update the following items within the Fast deployment script:</p> <p><b>TPD and DSR ISO:</b></p> <pre>&lt;software&gt;   &lt;!--Target TPD release Image here --&gt;   &lt;image id="tpd"&gt;     &lt;name&gt;TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64&lt;/name&gt;   &lt;/image&gt;   &lt;!--Target DSR release Image here --&gt;   &lt;image id="dsr"&gt;     &lt;name&gt;DSR-7.2.0.0.0_72.8.0-x86_64&lt;/name&gt;   &lt;/image&gt; &lt;/software&gt;</pre> <p><b>Note:</b> These are the images uploaded from <b>Section 4.1.1</b> Load Application and TPD ISO onto the PMAC Server. Do <b>NOT</b> append '.iso' to the image name. To copy and paste the image name from the command line, issue the following command:</p> <pre>\$ ls /var/TKLC/smac/image/repository</pre> <p><b>Bond 1 Creation:</b></p> <p style="text-align: center;"><b>Skip this step if Bond1 will not be created</b></p> <p>Uncomment the following items from <b>BOTH</b> tvc host id="NOAM1" and tvc host id="NOAM2" by removing the encapsulated '&lt;!--' '--&gt;' brackets as highlighted below:</p> <p>Update the Ethernet interfaces that are to be enslaved by bond1.</p> <pre>&lt;!-- &lt;tpdinterface id="bond1"&gt; &lt;device&gt;bond1&lt;/device&gt; &lt;type&gt;Bonding&lt;/type&gt; &lt;bonddata&gt; &lt;bondinterfaces&gt;eth03,eth04&lt;/bondinterfaces&gt; &lt;bondopts&gt;mode=active-backup,miimon=100&lt;/bondopts&gt; &lt;/bonddata&gt; &lt;onboot&gt;yes&lt;/onboot&gt; &lt;bootproto&gt;none&lt;/bootproto&gt; &lt;/tpdinterface&gt; --&gt;</pre>
-------------------------------	--	---

## Procedure 2: Configure NOAM Servers

3 <input type="checkbox"/>	<b>PMAC Server:</b> Validate and Run the Fast Deployment File	<p>Validate/Create the fast deployment file by executing the following command:</p> <p>For NOAMs deployed on rack mount servers:</p> <pre>\$ sudo fdconfig validate --file=DSR_NOAM_FD_RMS.xml</pre> <p>For NOAMs deployed on blade servers:</p> <pre>\$ sudo fdconfig validate --file=DSR_NOAM_FD_Blade.xml</pre> <p><b>Note:</b> Refer to <b>Appendix M: DSR Fast Deployment Configuration</b> for information of the variables that must be input during execution of the fast deployment script.</p> <p>If there were errors during validation, correct the errors within the xml file and re-run the validation.</p> <p>After successful validation, a new Fast deployment xml file is created:</p> <pre>--- NOTICE --- Config Data saved as a new file: "./DSR_NOAM_FD_Blade_20151217T102402.xml" --- NOTICE ---  Configuration file validation successful. Validation complete [admusr@GuestPMACeco upgrade]\$ █</pre> <p>Execute the following commands to run the fast deployment file:</p> <pre>\$ screen  \$ sudo fdconfig config --file=&lt;Created_FD_File&gt;.xml</pre> <p><b>Note:</b> This is a long duration command. If the screen command was run prior to executing the fdconfig, perform a "screen -dr" to resume the screen session in the event of a terminal timeout etc.</p>
-------------------------------	--	---

**Procedure 2: Configure NOAM Servers**

<p>4</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Monitor the Configuration</p>	<p>If not already done so, establish a GUI session on the PMAC server.</p> <p>Navigate to <b>Main Menu -&gt; Task Monitoring</b></p>  <p>Monitor the DSR NOAM TVOE configuration to completion:</p> <table border="1" data-bbox="441 598 1393 982"> <thead> <tr> <th>ID</th> <th>Action</th> <th>RMS</th> <th>Guest</th> <th>Status</th> <th>Message</th> <th>Completion</th> <th>Time</th> <th>Date</th> <th>Progress</th> </tr> </thead> <tbody> <tr> <td>110</td> <td>Tpd ServerAction: File Transfer</td> <td>Oahu-TVOE-2</td> <td></td> <td>COMPLETE</td> <td>File transfer success</td> <td>0:00:14</td> <td></td> <td>2015-11-24 07:42:35</td> <td>100%</td> </tr> <tr> <td>109</td> <td>Tpd ServerAction: File Transfer</td> <td>Oahu-TVOE-1</td> <td></td> <td>COMPLETE</td> <td>File transfer success</td> <td>0:00:03</td> <td></td> <td>2015-11-24 07:42:35</td> <td>100%</td> </tr> <tr> <td>108</td> <td>Accept Upgrade</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>COMPLETE</td> <td>Success</td> <td>0:01:02</td> <td></td> <td>2015-11-24 07:41:08</td> <td>100%</td> </tr> <tr> <td>107</td> <td>Accept Upgrade</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>COMPLETE</td> <td>Success</td> <td>0:01:03</td> <td></td> <td>2015-11-24 07:34:30</td> <td>100%</td> </tr> <tr> <td>106</td> <td>Upgrade</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>COMPLETE</td> <td>Success</td> <td>0:12:57</td> <td></td> <td>2015-11-24 07:26:05</td> <td>100%</td> </tr> <tr> <td>105</td> <td>Upgrade</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>COMPLETE</td> <td>Success</td> <td>0:07:17</td> <td></td> <td>2015-11-24 07:26:00</td> <td>100%</td> </tr> <tr> <td>104</td> <td>Install OS</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>COMPLETE</td> <td>Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64</td> <td>0:11:21</td> <td></td> <td>2015-11-24 07:11:07</td> <td>100%</td> </tr> <tr> <td>103</td> <td>Install OS</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>COMPLETE</td> <td>Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64</td> <td>0:11:26</td> <td></td> <td>2015-11-24 07:11:02</td> <td>100%</td> </tr> <tr> <td>102</td> <td>VirtAction: Create</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>COMPLETE</td> <td>Guest creation completed (Oahu-DSR-NOAM-2)</td> <td>0:00:10</td> <td></td> <td>2015-11-24 07:10:52</td> <td>100%</td> </tr> <tr> <td>101</td> <td>VirtAction: Create</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>COMPLETE</td> <td>Guest creation completed (Oahu-DSR-NOAM-1)</td> <td>0:00:05</td> <td></td> <td>2015-11-24 07:10:52</td> <td>100%</td> </tr> </tbody> </table>	ID	Action	RMS	Guest	Status	Message	Completion	Time	Date	Progress	110	Tpd ServerAction: File Transfer	Oahu-TVOE-2		COMPLETE	File transfer success	0:00:14		2015-11-24 07:42:35	100%	109	Tpd ServerAction: File Transfer	Oahu-TVOE-1		COMPLETE	File transfer success	0:00:03		2015-11-24 07:42:35	100%	108	Accept Upgrade	Oahu-TVOE-1	Oahu-DSR-NOAM-1	COMPLETE	Success	0:01:02		2015-11-24 07:41:08	100%	107	Accept Upgrade	Oahu-TVOE-2	Oahu-DSR-NOAM-2	COMPLETE	Success	0:01:03		2015-11-24 07:34:30	100%	106	Upgrade	Oahu-TVOE-1	Oahu-DSR-NOAM-1	COMPLETE	Success	0:12:57		2015-11-24 07:26:05	100%	105	Upgrade	Oahu-TVOE-2	Oahu-DSR-NOAM-2	COMPLETE	Success	0:07:17		2015-11-24 07:26:00	100%	104	Install OS	Oahu-TVOE-2	Oahu-DSR-NOAM-2	COMPLETE	Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64	0:11:21		2015-11-24 07:11:07	100%	103	Install OS	Oahu-TVOE-1	Oahu-DSR-NOAM-1	COMPLETE	Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64	0:11:26		2015-11-24 07:11:02	100%	102	VirtAction: Create	Oahu-TVOE-2	Oahu-DSR-NOAM-2	COMPLETE	Guest creation completed (Oahu-DSR-NOAM-2)	0:00:10		2015-11-24 07:10:52	100%	101	VirtAction: Create	Oahu-TVOE-1	Oahu-DSR-NOAM-1	COMPLETE	Guest creation completed (Oahu-DSR-NOAM-1)	0:00:05		2015-11-24 07:10:52	100%

### 4.1.3 Configure NOAMs

#### Procedure 3: Configure the First NOAM NE and Server

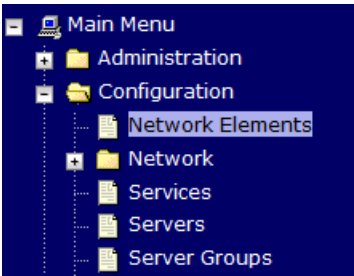

<b>S T E P #</b>	<p>This procedure will provide the steps to configure the First NOAM server.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<p><b>Save the NOAM Network Data to an XML file</b></p>	<p>Using a text editor, create a NOAM Network Element file that describes the networking of the target install environment of your first NOAM server.</p> <p>Select an appropriate file name and save the file to a known location on your computer.</p> <p>A suggested filename format is “<b><i>Appname_NName_NetworkElement.XML</i></b>”, so for example a DSR2 NOAM network element XML file would have a filename “<b><i>DSR2_NOAM_NetworkElement.xml</i></b>”.</p> <p>Alternatively, you can update the sample DSR 7.2 Network Element file. It can be found on the management server at:</p> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><code>/usr/TKLC/smac/etc/SAMPLE-NetworkElement.xml</code></p> </div> <p>A sample XML file can also be found in <b>Appendix A: Sample Network Element and Hardware Profiles</b>.</p> <p><b>Note:</b> The following limitations apply when specifying a Network Element name: A 1-32-character string. Valid characters are alphanumeric and underscore. Must contain at least one alpha and must not start with a digit.</p>

### Procedure 3: Configure the First NOAM NE and Server

2 <input type="checkbox"/>	<b>NOAM GUI:</b> Login	<p>Using the xmi IP address configured in <b>procedure 2</b> (\$NOAM1_xmi_IP_address ) Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div data-bbox="753 348 1101 401"></div> <p><b>Oracle System Login</b> <span style="float: right;">Fri Mar 20 12:29:52 2015 EDT</span></p> <div data-bbox="677 522 1170 779" style="border: 1px solid gray; padding: 10px; width: fit-content; margin: 20px auto;"><p style="text-align: center;"><b>Log In</b> Enter your username and password to log in</p><p>Username: <input type="text" value="guiadmin"/></p><p>Password: <input type="password" value="••••••"/></p><p><input type="checkbox"/> Change password</p><p style="text-align: center;"><input type="button" value="Log In"/></p></div> <p style="text-align: center;">Welcome to the Oracle System Login.</p> <p style="text-align: center;">Unauthorized access is prohibited. This Oracle system requires the use of Microsoft Internet Explorer 8.0, 9.0, or 10.0 with support for JavaScript and cookies.</p> <hr/> <p style="text-align: center;"><small>Oracle and Java are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.</small></p>
-------------------------------	---------------------------	---

### Procedure 3: Configure the First NOAM NE and Server

<p>3</p> <p>□</p> <p><b>Create the NOAM Network Element using the XML File</b></p>	<p>Navigate to <b>Main Menu-&gt;Configuration-&gt;Network Elements</b></p>  <p>Select the <b>Browse/ChooseFile</b> button, and enter the pathname of the NOAM network XML file.</p> <p>Select the <b>Upload File</b> button to upload the XML file and configure the NOAM Network Element.</p> <p>To create a new Network Element, upload a valid configuration file:</p> <p><input type="button" value="Browse..."/> No file selected. <input type="button" value="Upload File"/></p> <p><input type="button" value="Insert"/> <input type="button" value="Delete"/> <input type="button" value="Export"/> <input type="button" value="Report"/></p> <p>Once the data has been uploaded, you should see a folder appear with the name of your network element. Click on this folder and you will get a drop-down which describes the individual networks that are now configured:</p> <table border="1" data-bbox="461 1079 1052 1249"> <thead> <tr> <th colspan="5">Network Element</th> </tr> <tr> <td colspan="5">NO_9006005</td> </tr> <tr> <th>Network Name</th> <th>Network Address</th> <th>Netmask</th> <th>VLAN ID</th> <th>Gateway IP Address</th> </tr> </thead> <tbody> <tr> <td>INTERNALXMI</td> <td>10.240.10.32</td> <td>255.255.255.224</td> <td>3</td> <td>10.240.10.35</td> </tr> <tr> <td>INTERNALIMI</td> <td>10.240.10.0</td> <td>255.255.255.224</td> <td>4</td> <td>10.240.10.3</td> </tr> </tbody> </table>	Network Element					NO_9006005					Network Name	Network Address	Netmask	VLAN ID	Gateway IP Address	INTERNALXMI	10.240.10.32	255.255.255.224	3	10.240.10.35	INTERNALIMI	10.240.10.0	255.255.255.224	4	10.240.10.3

### Procedure 3: Configure the First NOAM NE and Server

<p>6</p> <input type="checkbox"/>	<p><b>Export the Initial Configuration</b></p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Servers</b>.</p> <p>From the GUI screen, select the NOAM server and then select <b>Export</b> to generate the initial configuration data for that server.</p> <div style="border: 1px solid gray; padding: 5px; width: fit-content; margin: 10px auto;"> <span>Insert</span> <span>Edit</span> <span>Delete</span> <span>Export</span> <span>Report</span> </div>
<p>7</p> <input type="checkbox"/>	<p><b>NOAM: Copy Configuration File to 1<sup>st</sup> NOAM Server</b></p>	<p>Establish an SSH session to the 1<sup>st</sup> NOAM server, logging in as the <b>admusr</b> user.</p> <p>Copy the configuration file created in the previous step from the <code>/var/TKLC/db/filemgmt</code> directory on the 1<sup>st</sup> NOAM to the <code>/var/tmp</code> directory.</p> <p>The configuration file will have a filename like <code>TKLCConfigData.&lt;hostname&gt;.sh</code>. The following is an example:</p> <div style="border: 1px solid gray; padding: 5px; margin: 10px auto;"> <pre>\$ sudo cp /var/TKLC/db/filemgmt/TKLCConfigData.blade01.sh /var/tmp/TKLCConfigData.sh</pre> </div>
<p>8</p> <input type="checkbox"/>	<p><b>NOAM: Wait for Configuration to Complete</b></p>	<p>The automatic configuration daemon will look for the file named <b><i>TKLCConfigData.sh</i></b> in the <code>/var/tmp</code> directory, implement the configuration in the file, and then prompt the user to reboot the server.</p> <p>Wait to be prompted to reboot the server, but <b>DO NOT</b> reboot the server, it will be rebooted later on in this procedure.</p> <p><b>Note:</b> Ignore the warning about removing the USB key, since no USB key is present. .</p>
<p>9</p> <input type="checkbox"/>	<p><b>NOAM: Set the Time zone and Reboot the Server</b></p>	<p>From the command line prompt, execute <b><i>set_ini_tz.pl</i></b>. This will set the system time zone. The following command example uses the America/New_York time zone.</p> <p>Replace as appropriate with the time zone you have selected for this installation. For a full list of valid time zones, see <b>Appendix I: List of Frequently used Time Zones</b>.</p> <div style="border: 1px solid gray; padding: 5px; margin: 10px auto;"> <pre>\$ sudo /usr/TKLC/appworks/bin/set_ini_tz.pl "America/New_York" &gt;/dev/null 2&gt;&amp;1</pre> </div> <div style="border: 1px solid gray; padding: 5px; margin: 10px auto;"> <pre>\$ sudo init 6</pre> </div>

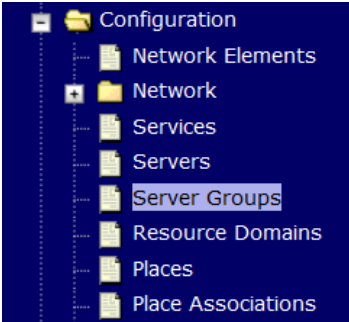

### Procedure 3: Configure the First NOAM NE and Server

10 <input type="checkbox"/>	<b>1<sup>st</sup> NOAM:</b> Configure Networking for Dedicated NetBackup Interface (Optional)	<p><b>Note:</b> You will only execute this step if your NOAM is using a dedicated Ethernet interface for NetBackup.</p> <p>Obtain a terminal window to the 1<sup>st</sup> NOAM server, logging in as the <i>admusr</i> user.</p> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm set --device=NetBackup --type=Ethernet --onboot=yes --address=&lt;NO1_NetBackup_IP_Address&gt; --netmask=&lt;NO1_NetBackup_NetMask&gt;</pre> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm add --route=net --device=netbackup --address=&lt;NO1_NetBackup_Network_ID&gt; --netmask=&lt;NO1_NetBackup_NetMask&gt; --gateway=&lt;NO1_NetBackup_Gateway_IP_Address&gt;</pre>
11 <input type="checkbox"/>	<b>1<sup>st</sup> NOAM Server:</b> Verify Server Health	<p>Execute the following command on the 1<sup>st</sup> NOAM server and make sure that no errors are returned:</p> <pre>\$ sudo syscheck Running modules in class hardware...OK Running modules in class disk...OK Running modules in class net...OK Running modules in class system...OK Running modules in class proc...OK LOG LOCATION: /var/TKLC/log/syscheck/fail_log</pre>

## Procedure 4: Configure the NOAM Server Group

<b>S T E P #</b>	<p>This procedure will provide the steps to configure the NOAM server group.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>NOAM GUI:</b> Login	<p>Establish a GUI session on the first NOAM server by using the XMI IP address of the first NOAM server. Open the web browser and enter a URL of:</p> <div data-bbox="456 598 1312 640" style="border: 1px solid black; padding: 2px;"><code>http://&lt;NO1_XMI_IP_Address&gt;</code></div> <p>Login as the <i>guiadmin</i> user:</p> <div data-bbox="456 730 1312 1333" style="text-align: center;"></div>

**Procedure 4: Configure the NOAM Server Group**

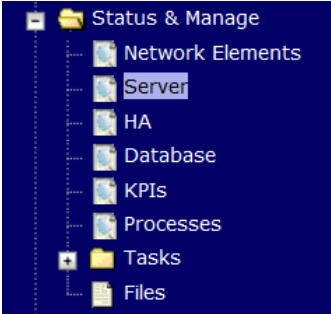

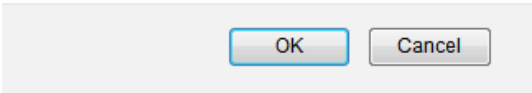

<p>2</p> <p><input type="checkbox"/></p>	<p><b>NOAM GUI:</b> Enter NOAM Server Group Data</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Server Groups</b></p>  <p>Select <b>Insert</b> and fill the following fields:</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <ul style="list-style-type: none"> <li>• <b>Server Group Name:</b> &lt;Enter Server Group Name&gt;</li> <li>• <b>Level:</b> <b>A</b></li> <li>• <b>Parent :</b> <b>None</b></li> <li>• <b>Function:</b> <b>DSR (Active/Standby Pair)</b></li> <li>• <b>WAN Replication Connection Count:</b> <b>Use Default Value</b></li> </ul> <p>Select <b>OK</b> when all fields are filled in.</p>									
<p>3</p> <p><input type="checkbox"/></p>	<p><b>NOAM GUI:</b> Edit the NOAM Server Group</p>	<p>From the GUI <b>Main Menu -&gt; Configuration -&gt; Server Groups.</b></p> <p>Select the new server group, and then select <b>Edit</b></p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>Select the Network Element that represents the NOAM.</p> <table border="1" data-bbox="456 1428 1154 1545"> <thead> <tr> <th colspan="3">NO_900060103</th> </tr> <tr> <th>Server</th> <th>SG Inclusion</th> <th>Preferred HA Role</th> </tr> </thead> <tbody> <tr> <td>HPC6NO</td> <td><input checked="" type="checkbox"/> Include in SG</td> <td><input type="checkbox"/> Preferred Spare</td> </tr> </tbody> </table> <p>In the portion of the screen that lists the servers for the server group, find the NOAM server being configured.</p> <p>Click the <b>Include in SG</b> checkbox.</p> <p>Leave other boxes blank.</p> <p>Press <b>OK</b></p>	NO_900060103			Server	SG Inclusion	Preferred HA Role	HPC6NO	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare
NO_900060103											
Server	SG Inclusion	Preferred HA Role

## Procedure 6: Complete NOAM Server Group Configuration

5 <input type="checkbox"/>	<b>NOAM GUI:</b> Restart 1 <sup>st</sup> NOAM Server	<p>From the NOAM GUI, select the <b>Main menu -&gt; Status &amp; Manage -&gt; Server</b> menu.</p>  <p>Select the 2<sup>nd</sup> NOAM server. Select the <b>Restart</b> button.</p>  <p>Answer <b>OK</b> to the confirmation popup.</p>  <p>Wait for restart to complete. Wait approximately 3-5 minutes before proceeding.</p>
-------------------------------	--	---

#### 4.1.4 Install NetBackup Client (Optional)

##### Procedure 7: Install NetBackup Client

<b>S T E P #</b>	<p>This procedure will download and install NetBackup Client software on the server.</p> <p>Location of the bpstart_notify and bpend_notify scripts is required for the execution of this procedure. For Appworks based applications the scripts are located as follows:</p> <ul style="list-style-type: none"> <li>- /usr/TKLC/appworks/sbin/bpstart_notify</li> <li>- /usr/TKLC/appworks/sbin/bpend_notify</li> </ul> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Install NetBackup Client Software</b>	<p>If a customer has a way of transferring and installing the net Backup client without the aid of TPD tools (push configuration) then use <b>Appendix J 2:</b></p> <p>Note: This is not common. If the answer to the previous question is not known then use <b>Appendix J</b></p>
2 <input type="checkbox"/>	<b>Install NetBackup Client Software</b>	<p>Choose the same method used in step 1 to install NetBackup on the 2<sup>nd</sup> NOAM.</p>

## 4.2 Install and Configure DR-NOAM Servers (Optional)

### 4.2.1 Execute DSR Fast Deployment for DR-NOAMs

#### Procedure 8: NOAM Configuration for DR Site

<b>S T E P #</b>	This procedure will extend the TVOE networking configuration on the First DR-NOAM RMS server (if necessary), configure the networking on additional rack mount servers, create the DR-NOAM VMs, and deploy the DSR and TPD images.	
	<b>Prerequisite:</b> TVOE and PMAC (virtualized) have been installed on the First DR-NOAM RMS Server as described in [7]	
	Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.	
	If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b> , and ask for assistance.	
1 <input type="checkbox"/>	<b>PMAC Server:</b> Login	Establish an SSH session to the PMAC server, login as <i>admusr</i> .

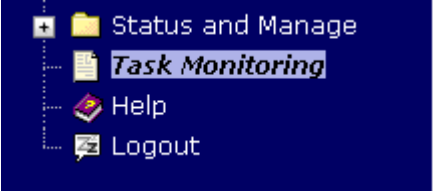

## Procedure 8: NOAM Configuration for DR Site

2 <input type="checkbox"/>	<b>PMAC Server:</b> Update the DSR Fast Deployment template	<p>Perform the following command to navigate to the directory containing the DSR fast deployment template:</p> <pre>\$ cd /usr/TKLC/smac/etc</pre> <p><b>Note:</b> If the fast deployment template is not present, then please re-execute section 4.2.2, Step #13 [7]</p> <p>Update the following items within the Fast deployment script:</p> <p><b>TPD and DSR ISO:</b></p> <pre>&lt;software&gt;   &lt;!--Target TPD release Image here --&gt;   &lt;image id="tpd"&gt;     &lt;name&gt;TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64&lt;/name&gt;   &lt;/image&gt;   &lt;!--Target DSR release Image here --&gt;   &lt;image id="dsr"&gt;     &lt;name&gt;DSR-7.2.0.0.0_72.8.0-x86_64&lt;/name&gt;   &lt;/image&gt; &lt;/software&gt;</pre> <p><b>Note:</b> These are the images uploaded from Section <b>Section 4.1.1</b> Load Application and TPD ISO onto the PMAC Server. Do <b>NOT</b> append '.iso' to the image name. To copy and paste the image name from the command line, issue the following command:</p> <pre>\$ ls /var/TKLC/smac/image/repository</pre> <p><b>Bond 1 Creation:</b></p> <p style="text-align: center;"><b>Skip this step if Bond1 will not be created</b></p> <p>Uncomment the following items from <b>BOTH</b> tvc host id="NOAM1" and tvc host id="NOAM2" by removing the encapsulated '&lt;!--' '--&gt;' brackets as highlighted below:</p> <p>Update the Ethernet interfaces that are to be enslaved by bond1.</p> <pre>&lt;!-- &lt;tpdinterface id="bond1"&gt; &lt;device&gt;bond1&lt;/device&gt; &lt;type&gt;Bonding&lt;/type&gt; &lt;bonddata&gt; &lt;bondinterfaces&gt;eth03,eth04&lt;/bondinterfaces&gt; &lt;bondopts&gt;mode=active-backup,miimon=100&lt;/bondopts&gt; &lt;/bonddata&gt; &lt;onboot&gt;yes&lt;/onboot&gt; &lt;bootproto&gt;none&lt;/bootproto&gt; &lt;/tpdinterface&gt; --&gt;</pre>
-------------------------------	--	---

## Procedure 8: NOAM Configuration for DR Site

3 <input type="checkbox"/>	<b>PMAC Server:</b> Validate and Run the Fast Deployment File	<p>Validate/Create the fast deployment file by executing the following command:</p> <p>For NOAMs deployed on rack mount servers:</p> <pre>\$ sudo fdconfig validate --file=DSR_NOAM_FD_RMS.xml</pre> <p>For NOAMs deployed on blade servers:</p> <pre>\$ sudo fdconfig validate --file=DSR_NOAM_FD_Blade.xml</pre> <p><b>Note:</b> Refer to <b>Appendix M: DSR Fast Deployment Configuration</b> for information of the variables that must be input during execution of the fast deployment script.</p> <p>If there were errors during validation, correct the errors within the xml file and re-run the validation.</p> <p>After successful validation, a new Fast deployment xml file is created:</p> <pre>--- NOTICE --- Config Data saved as a new file: "./DSR_NOAM_FD_Blade_20151217T102402.xml" --- NOTICE ---  Configuration file validation successful. Validation complete [admusr@GuestPMACeco upgrade]\$ █</pre> <p>Execute the following commands to run the fast deployment file:</p> <pre>\$ screen  \$ sudo fdconfig config --file=&lt;Created_FD_File&gt;.xml</pre> <p><b>Note:</b> This is a long duration command. If the screen command was run prior to executing the fdconfig, perform a "screen -dr" to resume the screen session in the event of a terminal timeout etc.</p>
-------------------------------	--	---

**Procedure 8: NOAM Configuration for DR Site**

<p>4 <input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Monitor the Configuration</p>	<p>If not already done so, establish a GUI session on the PMAC server.</p> <p>Navigate to <b>Main Menu -&gt; Task Monitoring</b></p>  <p>Monitor the DSR NOAM TVOE configuration to completion:</p> <table border="1" data-bbox="443 600 1393 982"> <thead> <tr> <th>ID</th> <th>Action</th> <th>RMS</th> <th>Guest</th> <th>Status</th> <th>Completion</th> <th>Start Time</th> <th>End Time</th> <th>Progress</th> </tr> </thead> <tbody> <tr> <td>110</td> <td>Tpd ServerAction: File Transfer</td> <td>Oahu-TVOE-2</td> <td></td> <td>File transfer success</td> <td>COMPLETE</td> <td>2015-11-24 07:42:35</td> <td>2015-11-24 07:42:35</td> <td>100%</td> </tr> <tr> <td>109</td> <td>Tpd ServerAction: File Transfer</td> <td>Oahu-TVOE-1</td> <td></td> <td>File transfer success</td> <td>COMPLETE</td> <td>2015-11-24 07:42:35</td> <td>2015-11-24 07:42:35</td> <td>100%</td> </tr> <tr> <td>108</td> <td>Accept Upgrade</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>Success</td> <td>COMPLETE</td> <td>2015-11-24 07:41:08</td> <td>2015-11-24 07:41:08</td> <td>100%</td> </tr> <tr> <td>107</td> <td>Accept Upgrade</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>Success</td> <td>COMPLETE</td> <td>2015-11-24 07:34:30</td> <td>2015-11-24 07:34:30</td> <td>100%</td> </tr> <tr> <td>106</td> <td>Upgrade</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>Success</td> <td>COMPLETE</td> <td>2015-11-24 07:26:05</td> <td>2015-11-24 07:26:05</td> <td>100%</td> </tr> <tr> <td>105</td> <td>Upgrade</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>Success</td> <td>COMPLETE</td> <td>2015-11-24 07:26:00</td> <td>2015-11-24 07:26:00</td> <td>100%</td> </tr> <tr> <td>104</td> <td>Install OS</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64</td> <td>COMPLETE</td> <td>2015-11-24 07:11:07</td> <td>2015-11-24 07:11:07</td> <td>100%</td> </tr> <tr> <td>103</td> <td>Install OS</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64</td> <td>COMPLETE</td> <td>2015-11-24 07:11:02</td> <td>2015-11-24 07:11:02</td> <td>100%</td> </tr> <tr> <td>102</td> <td>VirtAction: Create</td> <td>Oahu-TVOE-2</td> <td>Oahu-DSR-NOAM-2</td> <td>Guest creation completed (Oahu-DSR-NOAM-2)</td> <td>COMPLETE</td> <td>2015-11-24 07:10:52</td> <td>2015-11-24 07:10:52</td> <td>100%</td> </tr> <tr> <td>101</td> <td>VirtAction: Create</td> <td>Oahu-TVOE-1</td> <td>Oahu-DSR-NOAM-1</td> <td>Guest creation completed (Oahu-DSR-NOAM-1)</td> <td>COMPLETE</td> <td>2015-11-24 07:10:52</td> <td>2015-11-24 07:10:52</td> <td>100%</td> </tr> </tbody> </table>	ID	Action	RMS	Guest	Status	Completion	Start Time	End Time	Progress	110	Tpd ServerAction: File Transfer	Oahu-TVOE-2		File transfer success	COMPLETE	2015-11-24 07:42:35	2015-11-24 07:42:35	100%	109	Tpd ServerAction: File Transfer	Oahu-TVOE-1		File transfer success	COMPLETE	2015-11-24 07:42:35	2015-11-24 07:42:35	100%	108	Accept Upgrade	Oahu-TVOE-1	Oahu-DSR-NOAM-1	Success	COMPLETE	2015-11-24 07:41:08	2015-11-24 07:41:08	100%	107	Accept Upgrade	Oahu-TVOE-2	Oahu-DSR-NOAM-2	Success	COMPLETE	2015-11-24 07:34:30	2015-11-24 07:34:30	100%	106	Upgrade	Oahu-TVOE-1	Oahu-DSR-NOAM-1	Success	COMPLETE	2015-11-24 07:26:05	2015-11-24 07:26:05	100%	105	Upgrade	Oahu-TVOE-2	Oahu-DSR-NOAM-2	Success	COMPLETE	2015-11-24 07:26:00	2015-11-24 07:26:00	100%	104	Install OS	Oahu-TVOE-2	Oahu-DSR-NOAM-2	Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64	COMPLETE	2015-11-24 07:11:07	2015-11-24 07:11:07	100%	103	Install OS	Oahu-TVOE-1	Oahu-DSR-NOAM-1	Done: TPD.install-7.0.2.0.0_86.34.0-OracleLinux6.6-x86_64	COMPLETE	2015-11-24 07:11:02	2015-11-24 07:11:02	100%	102	VirtAction: Create	Oahu-TVOE-2	Oahu-DSR-NOAM-2	Guest creation completed (Oahu-DSR-NOAM-2)	COMPLETE	2015-11-24 07:10:52	2015-11-24 07:10:52	100%	101	VirtAction: Create	Oahu-TVOE-1	Oahu-DSR-NOAM-1	Guest creation completed (Oahu-DSR-NOAM-1)	COMPLETE	2015-11-24 07:10:52	2015-11-24 07:10:52	100%

## Procedure 8: NOAM Configuration for DR Site

5 <input type="checkbox"/>	<b>PRIMARY NOAM VIP GUI: Login</b>	<p>Establish a GUI session on the NOAM server by using the XMI VIP IP address. Open the web browser and enter a URL of:</p> <div data-bbox="444 373 1300 415" style="border: 1px solid black; padding: 2px;"><code>http://&lt;NOAM_XMI_VIP_IP_Address&gt;</code></div> <p>Login as the <i>guiadmin</i> user:</p> <div data-bbox="444 499 1300 1094"></div>
-------------------------------	--	---

**Procedure 8: NOAM Configuration for DR Site**

6  
 **PRIMARY NOAM VIP GUI:** Insert the DR NOAM Network Element

Navigate to **Main Menu->Configuration->Network Elements**

The **Network Elements** screen will display select the **Browse** (scroll to bottom left corner of screen).

A dialogue will pop up, browse to the location of the DSR DR NOAM Site Element XML File and click the **Open** button.

Then click **Upload File** as shown below

Once the data has been uploaded, you should see a folder appear with the name of your network element. Click on this folder and you will get a drop-down which describes the individual networks that are now configured:

Network Element				
NO_9006005				
Network Name	Network Address	Netmask	VLAN ID	Gateway IP Address
INTERNALXMI	10.240.10.32	255.255.255.224	3	10.240.10.35
INTERNALIMI	10.240.10.0	255.255.255.224	4	10.240.10.3

**Procedure 8: NOAM Configuration for DR Site**

7

**PRIMARY NOAM VIP GUI:** Insert the 1st DR-NOAM server

Navigate to **Main Menu -> Configuration -> Servers.**

Select the **Insert** button to insert the new DR-NOAM server into servers table.

Adding a new server

Attribute	Value
Hostname	DR-NOAM-A
Role	NETWORK OAM&P
System ID	DR-NOAM-A
Hardware Profile	DSR TVOE Guest
Network Element Name	- Unassigned -
Location	

Fill in the fields as follows:

**Hostname:** <Hostname>

**Role:** NETWORK OAM&P

**System ID:** <Site System ID>

**Hardware Profile:** DSR TVOE Guest

**Network Element Name:** [Choose NE from Drop Down Box]

The network interface fields will now become available with selection choices based on the chosen hardware profile and network element

Network	IP Address	Interface
INTERNALXMI (10.240.84.128/25)	10.240.84.155	xmi <input type="checkbox"/> VLAN (3)
INTERNALIMI (10.240.85.0/26)	10.240.85.10	imi <input type="checkbox"/> VLAN (4)

Ok Apply Cancel

Fill in the server IP addresses for the XMI network. Select **xmi** for the interface. **Leave the "VLAN" checkbox unchecked.**

**Note:** The xmi server IP must match '\$DR-NOAM\_xmi\_IP\_address' configured in step 2

Fill in the server IP addresses for the IMI network. Select **imi** for the interface. **Leave the "VLAN" checkbox unchecked.**

**Note:** The imi server IP must match '\$DR-NOAM\_xmi\_IP\_address' configured in Step 2

Next, add the following NTP servers:

NTP Server	Preferred?
<TVOE_XMI_IP_Address(DR-NO1)/TVOE_Mgmt_IP_Address(DR-NO1)>	Yes

Select the **Ok** button when you have completed entering all the server data.

**Procedure 8: NOAM Configuration for DR Site**

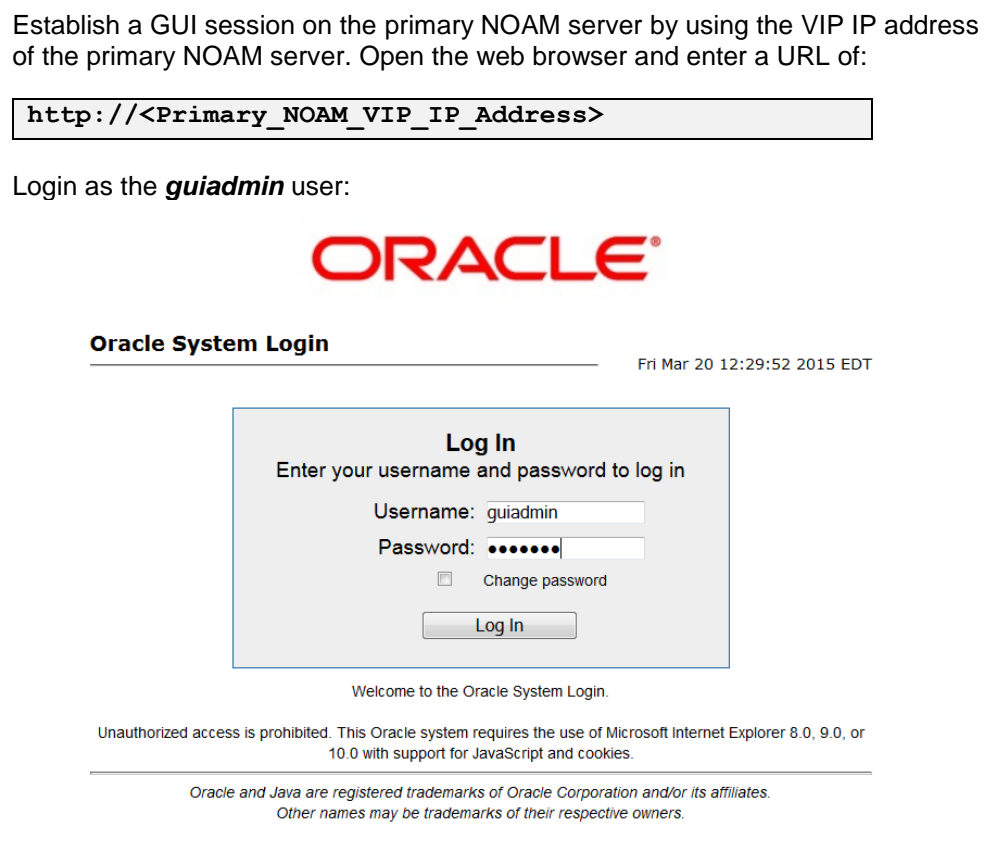

<p>8</p> <p><input type="checkbox"/></p>	<p><b>PRIMARY NOAM VIP</b>  <b>GUI:</b> Export the Initial Configuration</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Servers.</b></p> <p>From the GUI screen, select the DR-NOAM server and then select <b>Export</b> to generate the initial configuration data for that server.</p> <div style="border: 1px solid gray; padding: 5px; width: fit-content; margin: 10px auto;"> <span style="border: 1px solid gray; padding: 2px 10px;">Insert</span> <span style="border: 1px solid gray; padding: 2px 10px;">Edit</span> <span style="border: 1px solid gray; padding: 2px 10px;">Delete</span> <span style="border: 1px solid gray; padding: 2px 10px;">Export</span> <span style="border: 1px solid gray; padding: 2px 10px;">Report</span> </div>
<p>9</p> <p><input type="checkbox"/></p>	<p><b>1<sup>st</sup> NOAM Server:</b> Copy Configuration File to DR-NOAM NOAM Server</p>	<p>Obtain a terminal session to the primary NOAM as the <b>admusr</b> user.</p> <p>Execute the following command to configure the DR-NOAM server:</p> <div style="border: 1px solid gray; padding: 10px; margin: 10px auto; width: 80%;"> <pre>\$ sudo scp -r /var/TKLC/db/filemgmt/TKLCConfigData.&lt;DR-NOAM_Hostname&gt;.sh admusr@&lt;DR-NOAM_xmi_IP_address&gt;:/var/tmp/TKLCConfigData.sh</pre> </div>
<p>10</p> <p><input type="checkbox"/></p>	<p><b>1<sup>st</sup> DR-NOAM Server:</b> Verify configuration was called and Reboot the Server</p>	<p>Establish an SSH session to the DR-NOAM server (DR-NOAM_xmi_IP_address)</p> <p>Login as the <b>admusr</b> user.</p> <p>The automatic configuration daemon will look for the file named <b>"TKLCConfigData.sh"</b> in the /var/tmp directory, implement the configuration in the file, and then prompt the user to reboot the server.</p> <p>Verify awpushcfg was called by checking the following file</p> <div style="border: 1px solid gray; padding: 10px; margin: 10px auto; width: 80%;"> <pre>\$ sudo cat /var/TKLC/appw/logs/Process/install.log</pre> <p>Verify the following message is displayed:</p> <pre>[SUCCESS] script completed successfully!</pre> </div> <p>Now Reboot the Server:</p> <div style="border: 1px solid gray; padding: 10px; margin: 10px auto; width: 80%;"> <pre>\$ sudo init 6</pre> </div> <p>Wait for the server to reboot</p>

**Procedure 8: NOAM Configuration for DR Site**

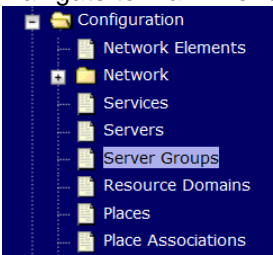

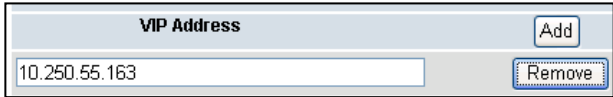

<p>11</p> <p><input type="checkbox"/></p>	<p><b>1<sup>st</sup> DR-NOAM:</b> Configure Networking for Dedicated NetBackup Interface (Optional)</p>	<p><b>Note:</b> You will only execute this step if your DR-NOAM is using a dedicated Ethernet interface for NetBackup.</p> <p>Obtain a terminal window to the 1<sup>st</sup> DR-NOAM server, logging in as the <i>admusr</i> user.</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm set --device=netbackup --type=Ethernet --onboot=yes --address=&lt;NO1_NetBackup_IP_Address&gt; --netmask=&lt;NO1_NetBackup_NetMask&gt;</pre> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm add --route=net --device=netbackup --address=&lt;NO1_NetBackup_Network_ID&gt; --netmask=&lt;NO1_NetBackup_NetMask&gt; --gateway=&lt;NO1_NetBackup_Gateway_IP_Address&gt;</pre>				
<p>12</p> <p><input type="checkbox"/></p>	<p><b>1<sup>st</sup> DR-NOAM Server:</b> Verify Server Health</p>	<p>Execute the following command on the 1<sup>st</sup> DR-NOAM server and make sure that no errors are returned:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo syscheck Running modules in class hardware...OK Running modules in class disk...OK Running modules in class net...OK Running modules in class system...OK Running modules in class proc...OK LOG LOCATION: /var/TKLC/log/syscheck/fail_log</pre>				
<p>13</p> <p><input type="checkbox"/></p>	<p><b>Repeat for 2<sup>nd</sup> DR NOAM Server</b></p>	<p>Repeat <b>Steps 7 through 12</b> to configure 2<sup>nd</sup> DR-NOAM Server. When inserting the 2<sup>nd</sup> DR-NOAM server, change the NTP server address to the following:</p> <table border="1" data-bbox="464 1350 1338 1451"> <thead> <tr> <th data-bbox="464 1350 891 1388">NTP Server</th> <th data-bbox="891 1350 1338 1388">Preferred?</th> </tr> </thead> <tbody> <tr> <td data-bbox="464 1388 891 1451">&lt;TVOE_XMI_IP_Address(DR-NO2)/ TVOE_Mgmt_IP_Address(DR-NO2)&gt;</td> <td data-bbox="891 1388 1338 1451">Yes</td> </tr> </tbody> </table>	NTP Server	Preferred?	<TVOE_XMI_IP_Address(DR-NO2)/ TVOE_Mgmt_IP_Address(DR-NO2)>	Yes
NTP Server	Preferred?					
<TVOE_XMI_IP_Address(DR-NO2)/ TVOE_Mgmt_IP_Address(DR-NO2)>	Yes					

## 4.2.2 Configure DR-NOAMs

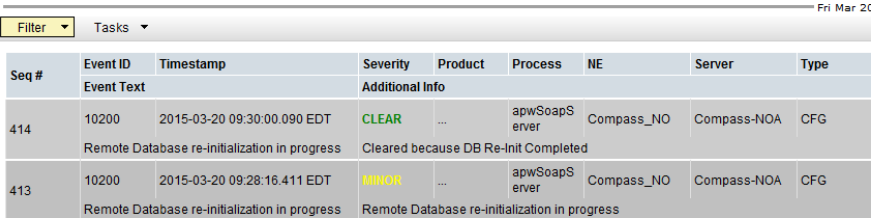

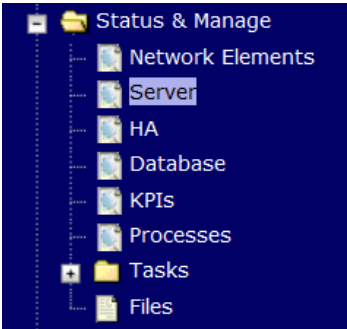

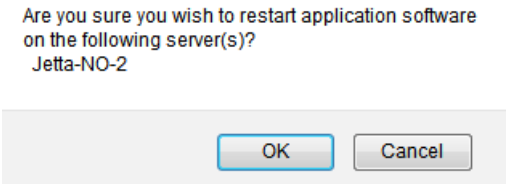

### Procedure 9: Pairing for DR-NOAM site (Optional)

<b>S T E P #</b>	<p>This procedure will provide the steps to pair the DR-NOAM site.</p> <p><b>Prerequisite:</b> Installation for DR-NOAM Site complete</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Primary NOAM VIP GUI: Login</b>	<p>Establish a GUI session on the primary NOAM server by using the VIP IP address of the primary NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</p> </div> <p>Login as the <i>guiadmin</i> user:</p> <div style="text-align: center;">  <p>The screenshot shows the Oracle System Login interface. At the top is the Oracle logo in red. Below it is the text 'Oracle System Login' followed by a horizontal line and the date 'Fri Mar 20 12:29:52 2015 EDT'. In the center is a 'Log In' box with the heading 'Log In' and the instruction 'Enter your username and password to log in'. Inside this box are two input fields: 'Username: guiadmin' and 'Password: ●●●●●●'. Below the password field is a checkbox labeled 'Change password' and a 'Log In' button. Below the login box is the text 'Welcome to the Oracle System Login.' At the bottom, there is a disclaimer: 'Unauthorized access is prohibited. This Oracle system requires the use of Microsoft Internet Explorer 8.0, 9.0, or 10.0 with support for JavaScript and cookies.' and a footer: 'Oracle and Java are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.'</p> </div>

**Procedure 9: Pairing for DR-NOAM site (Optional)**

<p>2</p> <p><input type="checkbox"/></p>	<p><b>Primary NOAM VIP</b>  <b>GUI:</b> Enter DR-NOAM Server Group Data</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Server Groups</b></p>  <p>Select <b>Insert</b> and fill the following fields:</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <ul style="list-style-type: none"> <li>• <b>Server Group Name:</b> &lt;Enter Server Group Name&gt;</li> <li>• <b>Level:</b> <b>A</b></li> <li>• <b>Parent :</b> <b>None</b></li> <li>• <b>Function:</b> <b>DSR (Active/Standby Pair)</b></li> <li>• <b>WAN Replication Connection Count:</b> <b>Use Default Value</b></li> </ul> <p>Select <b>OK</b> when all fields are filled in.</p>												
<p>3</p> <p><input type="checkbox"/></p>	<p><b>Primary NOAM VIP</b>  <b>GUI:</b> Update Server Group</p>	<p>Select the <b>Server Group</b> that was created in the previous step, and click on <b>Edit</b>.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>The user will be presented with the <b>Server Groups [Edit]</b> screen</p> <p>Check the checkbox labeled <b>Include in SG</b> for <b>both</b> DR-NOAM Servers as shown below and click on <b>Apply</b></p> <table border="1" data-bbox="456 1266 1078 1430"> <thead> <tr> <th colspan="3">deaDR_CSLAB_ATT</th> </tr> <tr> <th>Server</th> <th>SG Inclusion</th> <th>Preferred HA Role</th> </tr> </thead> <tbody> <tr> <td>deaNO-ChaNC-A</td> <td><input checked="" type="checkbox"/> Include in SG</td> <td><input type="checkbox"/> Preferred Spare</td> </tr> <tr> <td>deaNO-ChaNC-B</td> <td><input checked="" type="checkbox"/> Include in SG</td> <td><input type="checkbox"/> Preferred Spare</td> </tr> </tbody> </table>	deaDR_CSLAB_ATT			Server	SG Inclusion	Preferred HA Role	deaNO-ChaNC-A	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare	deaNO-ChaNC-B	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare
deaDR_CSLAB_ATT														
Server	SG Inclusion	Preferred HA Role												
deaNO-ChaNC-A	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare												
deaNO-ChaNC-B	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare												
<p>4</p> <p><input type="checkbox"/></p>	<p><b>Primary NOAM VIP</b>  <b>GUI:</b> Add DR-NOAM VIP</p>	<p>Click the <b>Add</b> dialogue button for the VIP Address and enter an IP Address for the VIP as shown below</p>  <p>Then click the <b>Apply</b> dialogue button. Verify that the banner information message states <b>Data committed</b>.</p> <p><input type="button" value="Ok"/> <input type="button" value="Apply"/> <input type="button" value="Cancel"/></p>												

**Procedure 9: Pairing for DR-NOAM site (Optional)**

<p>5</p> <p><input type="checkbox"/></p>	<p><b>Primary NOAM VIP</b>  <b>GUI:</b> Wait for Remote Database Alarm to Clear</p>	<p>Wait for the alarm <b>Remote Database re-initialization in progress</b> to be cleared before proceeding.</p> <p>Navigate to <b>Main menu-&gt;Alarms &amp; Events-&gt;View Active</b></p> <p><b>Main Menu: Alarms &amp; Events -&gt; View History (Filtered)</b></p> 
<p>6</p> <p><input type="checkbox"/></p>	<p><b>Primary NOAM VIP</b>  <b>GUI:</b> Restart 1<sup>st</sup> DR-NOAM Server</p>	<p>From the NOAM GUI, select the <b>Main menu -&gt; Status &amp; Manage -&gt; Server</b> menu.</p>  <p>Select the 1<sup>st</sup> DR-NOAM server. Select the <b>Restart</b> button.</p>  <p>Answer <b>OK</b> to the confirmation popup.</p>  <p>Wait for restart to complete. Wait approximately 3-5 minutes before proceeding.</p>
<p>7</p> <p><input type="checkbox"/></p>	<p><b>Primary NOAM VIP</b>  <b>GUI :</b>Restart the application on the 2<sup>nd</sup> DR-NOAM Server</p>	<p>Repeat Step 6, but this time selecting 2<sup>nd</sup> DR-NOAM Server.</p>

### Procedure 9: Pairing for DR-NOAM site (Optional)

8 <input type="checkbox"/>	<b>Primary NOAM:</b> Modify DSR OAM process	<p>Establish an SSH session to the primary NOAM, login as <i>admusr</i>.</p> <p>Execute the following commands:</p> <div data-bbox="456 348 1385 684" style="border: 1px solid black; padding: 5px;"><p>Retrieve the cluster ID of the DR-NOAM:</p><pre>\$ sudo iqt -fClusterID TopologyMapping where "NodeID='&lt;DR_NOAM_Host_Name&gt;' "</pre><table border="1"><thead><tr><th>Server_ID</th><th>NodeID</th><th>ClusterID</th></tr></thead><tbody><tr><td>1</td><td>Oahu-DSR-DR-NOAM-2</td><td>A1055</td></tr></tbody></table><p>Execute the following command to start the DSR OAM process on the DR-NOAM:</p><pre>\$ echo "&lt;clusterID&gt; DSROAM_Proc Yes"   iload -ha -xun -fcluster -fresource -foptional HaClusterResourceCfg</pre></div>	Server_ID	NodeID	ClusterID	1	Oahu-DSR-DR-NOAM-2	A1055
Server_ID	NodeID	ClusterID

### 4.2.3 Install NetBackup Client (Optional)

#### Procedure 10: Install NetBackup Client

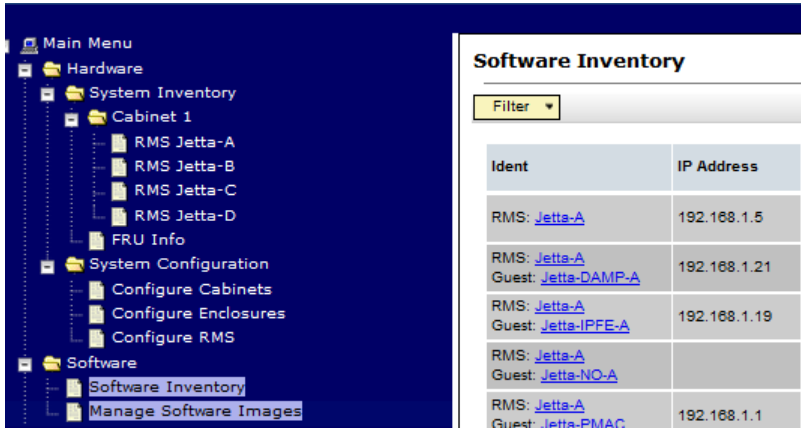

<b>S T E P #</b>	<p>This procedure will download and install NetBackup Client software on the server.</p> <p>Location of the bpstart_notify and bpend_notify scripts is required for the execution of this procedure. For Appworks based applications the scripts are located as follows:</p> <ul style="list-style-type: none"> <li>- /usr/TKLC/appworks/sbin/bpstart_notify</li> <li>- /usr/TKLC/appworks/sbin/bpend_notify</li> </ul> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Install NetBackup Client Software</b>	<p>If a customer has a way of transferring and installing the net Backup client without the aid of TPD tools (push configuration) then use <b>Appendix J 2:</b></p> <p>Note: This is not common. If the answer to the previous question is not known then use <b>Appendix J</b></p>
2 <input type="checkbox"/>	<b>Install NetBackup Client Software</b>	<p>Choose the same method used in step 1 to install NetBackup on the 2<sup>nd</sup> NOAM.</p>

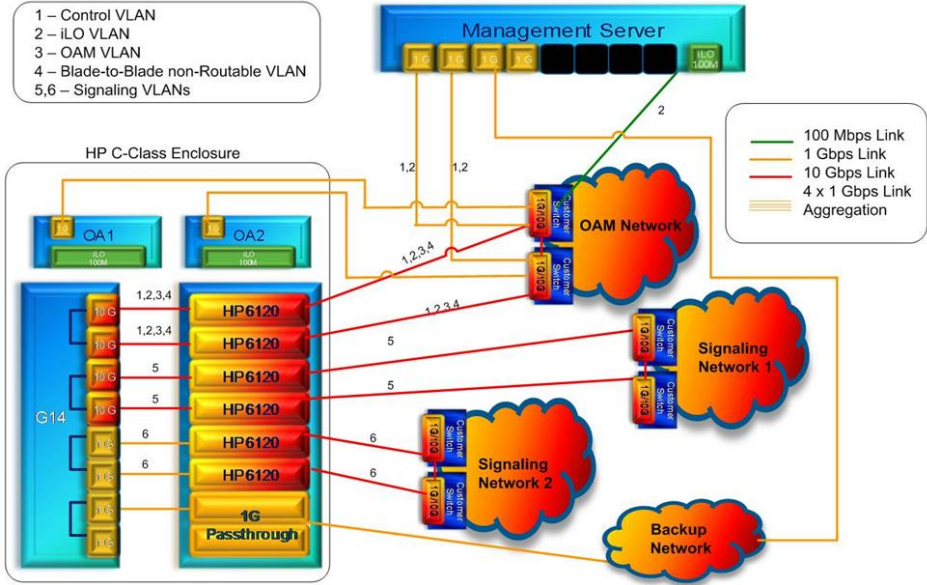

## 4.3 Install and Configure SOAM Servers

### 4.3.1 Configure SOAM TVOE Server Blades

#### Procedure 11: Configure SOAM TVOE Server Blades

<p><b>S</b> <b>T</b> <b>E</b> <b>P</b> <b>#</b></p>	<p>This procedure will configure TVOE on the server blades that will host DSR SOAM VMs. It details the configuration for a single server blade and should be repeated for every TVOE blade that was IPM-ed for this install.</p> <p><b>NOTE:</b> TVOE should only be installed on Blade servers that will run as DSR SOAMs. They should NOT be installed on Blade servers intended to run as DSR MPs.</p> <p><b>Prerequisite:</b> TVOE OS has been installed on the target server blades as per instructions in [7]</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>												
<p>1</p> <p><input type="checkbox"/></p> <p><b>PMAC Server:</b> Exchange SSH keys between PMAC and TVOE server</p>	<p>Use the PMAC GUI to determine the Control Network IP address of TVOE server. From the PMAC GUI, navigate to <b>Main Menu -&gt; Software -&gt; Software Inventory</b>.</p>  <table border="1" data-bbox="922 1081 1247 1367"> <thead> <tr> <th>Ident</th> <th>IP Address</th> </tr> </thead> <tbody> <tr> <td>RMS: <a href="#">Jetta-A</a></td> <td>192.168.1.5</td> </tr> <tr> <td>RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-DAMP-A</a></td> <td>192.168.1.21</td> </tr> <tr> <td>RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-IPFE-A</a></td> <td>192.168.1.19</td> </tr> <tr> <td>RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-NO-A</a></td> <td></td> </tr> <tr> <td>RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-PMAC</a></td> <td>192.168.1.1</td> </tr> </tbody> </table> <p>Note the IP address TVOE server.</p> <p>From a terminal window connection on the PMAC, login as the <b>admusr</b> user.</p> <p>Exchange SSH keys between the PMAC and the TVOE server using the keyexchange utility, using the Control network IP address for the TVOE blade server. When prompted for the password, enter the password for the TVOE server.</p> <pre>\$ keyexchange admusr@&lt;TVOE_Control_Blade_IP_address&gt;</pre>	Ident	IP Address	RMS: <a href="#">Jetta-A</a>	192.168.1.5	RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-DAMP-A</a>	192.168.1.21	RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-IPFE-A</a>	192.168.1.19	RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-NO-A</a>		RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-PMAC</a>	192.168.1.1
Ident	IP Address												
RMS: <a href="#">Jetta-A</a>	192.168.1.5												
RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-DAMP-A</a>	192.168.1.21												
RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-IPFE-A</a>	192.168.1.19												
RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-NO-A</a>													
RMS: <a href="#">Jetta-A</a> Guest: <a href="#">Jetta-PMAC</a>	192.168.1.1												

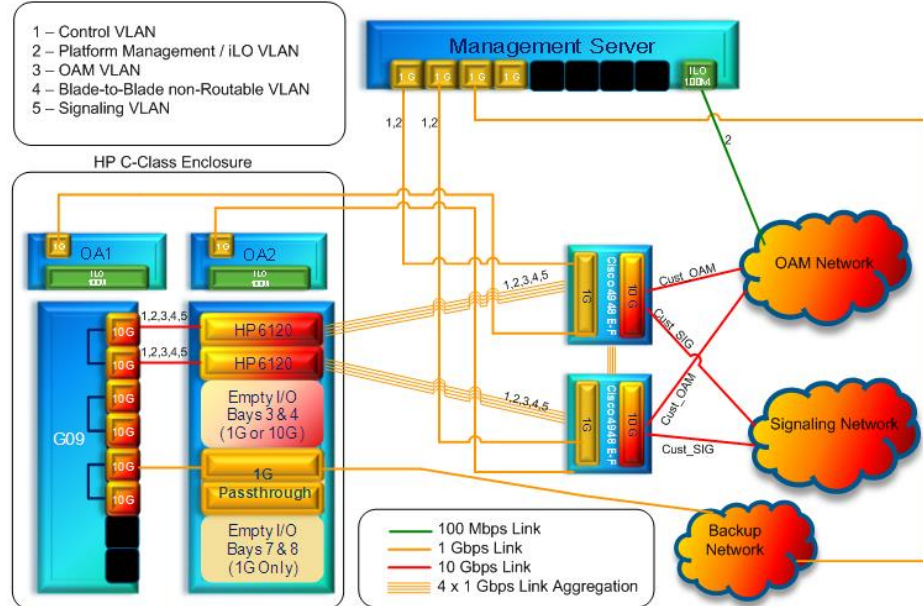

**Procedure 11: Configure SOAM TVOE Server Blades**

<p>2 □</p>	<p><b>TVOE Server:</b> Login and Copy Configuration Scripts from PMAC</p>	<p>Login as <b>admusr</b> on the TVOE server using the ILO facility.</p> <p>Execute the following commands:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo scp admusr@&lt;Mgmt_Server_Control_IP_address&gt;:/usr/TKLC/smac/etc/TVOE* /usr/TKLC/</pre> <pre style="border: 1px solid black; padding: 5px;">\$ sudo chmod 777 /usr/TKLC/TVOE*</pre> <p><b>Note:</b> If no TVOE configuration scripts are found here, then please re-execute section 4.2.2, Step #13 of [7]</p>
<p>3 □</p>	<p><b>TVOE Server:</b> Mezzanine card/ segregated OAM/XMI network configuration</p>	<p>If your TVOE server blade <b>DOES</b> have mezzanine cards <b>AND</b> you will be running OAM/XMI traffic on a separate physical network (<i>example below</i>). If you do not have mezzanine cards, <b>skip this step</b>.</p>  <p>Execute the following command:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/TVOEcfg.sh --xmivlan=&lt;XMI_VLAN_ID&gt; --imivlan=&lt;IMI_VLAN_ID&gt; mezz</pre>

## Procedure 11: Configure SOAM TVOE Server Blades

4 **TVOE Server:** No Mezzanine card/ No segregated OAM/XMI network configuration

If your TVOE server blade **DOES NOT** have mezzanine cards AND/OR you will NOT be running OAM/XMI traffic over a separate physical network (example below).

Execute the following command:

```
$ sudo /usr/TKLC/TVOEcfg.sh --xmivlan=<XMI_VLAN_ID>
--imivlan=<IMI_VLAN_ID>
```

## Procedure 11: Configure SOAM TVOE Server Blades

5 <input type="checkbox"/>	<b>TVOE Server:</b> Verify TVOE configuration	<p>XMI_VLAN_ID is the VLAN ID for the XMI network in this installation, and IMI_VLAN_ID is the VLAN ID for the IMI network in this installation. For deployments with aggregation switches, the IMI and XMI VLAN IDs will be the values of the “INTERNAL-IMI” and “INTERNAL-XMI” VLAN ids, respectively. For layer-2 only deployments, the IMI and XMI VLAN ids will be obtained from the customer.</p> <p>Upon executing the proper version of the TVOEcfg.sh script, you should see an output similar to the following (example shows output without the “mezz” parameter):</p> <pre>Using onboard NICs ... Interface bond0.3 added Interface bond0.4 added Setting up the bridge and unsetting network info Interface bond0.3 was updated. Bridge xmi added! Setting up the bridge and unsetting network info Interface bond0.4 was updated. Bridge imi added!</pre> <p>The prompt will return.</p> <p><b>Note:</b> If for any reason, you ran the wrong version of the TVOEcfg.sh command, you can execute the following command to reset the networking configuration so you can repeat either steps 3 or 4:</p> <pre>/usr/TKLC/TVOEclean.sh</pre>
-------------------------------	--	---

## Procedure 11: Configure SOAM TVOE Server Blades

<p>6</p> <p><input type="checkbox"/></p>	<p><b>TVOE Server:</b> Configure XMI IP and Default Route</p>	<p>Configure IP address on the XMI network:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm set --type=Bridge --name=xmi --address=&lt;TVOE_XMI_IP_ADDRESS&gt; --netmask=&lt;TVOE_XMI_Netmask/Prefix&gt;  /sys/class/net/bond1/bonding/primary has 0 lines, nothing to do.  Interface xmi was updated.</pre> <p>Restart network services:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo service network restart [wait for the prompt to return]</pre> <p>Set the default route:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm add --route=default --device=xmi --gateway=&lt;TVOE_XMI_Gateway_IP_Address&gt; Route to xmi added.</pre>
<p>7</p> <p><input type="checkbox"/></p>	<p><b>TVOE Server:</b> Configure NetBackup Dedicated Interface and Bridge (Optional)</p>	<p>In these examples, &lt;interface&gt; should be replaced with the actual Ethernet interface that will be used as the dedicated NetBackup port. For instance, “<i>eth01</i>” or “<i>eth22</i>”.</p> <p>Un-bonded Ethernet Interface:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm set --device=&lt;Ethernet interface&gt; --slave=no --onboot=yes</pre> <p><b>[OPTIONAL]</b> If this installation is using jumbo frames, set the Ethernet interface MTU to the desired jumbo frame size:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm set --device=&lt;Ethernet interface&gt; --MTU=&lt;NetBackup_MTU_size&gt;</pre> <p>Create NetBackup VM Bridge Interface:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/netAdm add --type=Bridge --name=netbackup --bridgeInterfaces=&lt;Ethernet interface&gt; --onboot=yes</pre>

## Procedure 11: Configure SOAM TVOE Server Blades

8 **TVOE**  
□ **Server: Set**  
**Hostname**

Navigate to **Sever Configuration->Hostname-> Edit** and enter a new hostname for your server:

Press **OK** and select and continue to press Exit until you are at the placfg main menu again.

**Note:** Although the new hostname has been properly configured and committed at this point, it will not appear on your command prompt unless you log out and log back in again.

## Procedure 11: Configure SOAM TVOE Server Blades

9

**TVOE Server:**  
Configure SNMP

From the platcfg main menu, navigate to **Network Configuration -> SNMP Configuration -> NMS Configuration**

Press **Edit**.  
Choose **Add a New NMS Server**

Enter the following NMS servers, pressing **OK** after each one and then selecting the **Add NMS** option again:

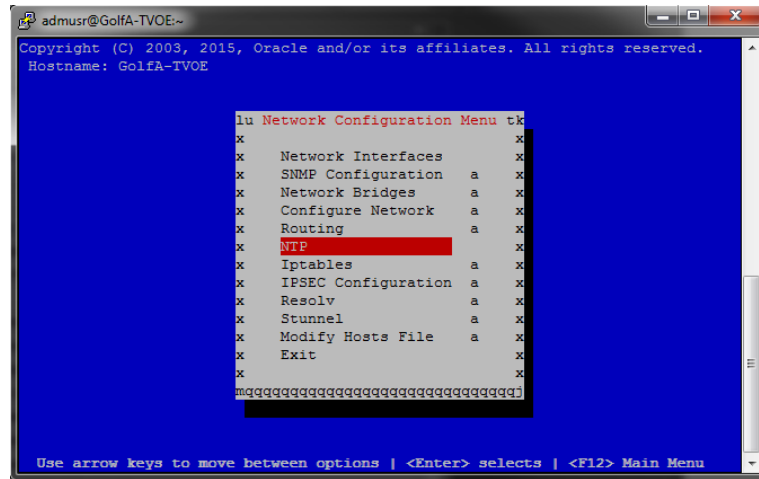

1. Enter the Hostname/IP of the Customer NMS Server, for port, enter 162, and for Community String enter the community string provided in the customer NAPD Document.
2. Enter the IP of the SOAM VIP, for port enter 162, and for Community String enter the community string provided in the customer NAPD Document

Press **Exit**.  
Select **Yes** when prompted to restart the Alarm Routing Service.  
Once Done, press **Exit** to quit to the platcfg main menu.

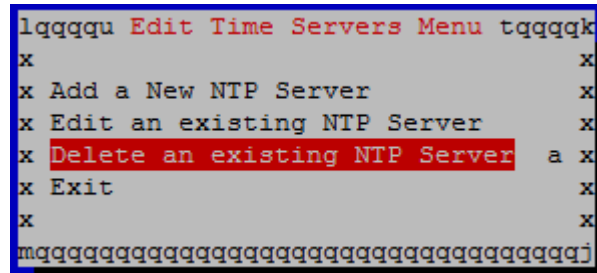

**Procedure 11: Configure SOAM TVOE Server Blades**

10  **RMS iLO/iLOM:**  
Delete PMAC VM as NTP Source on RMS

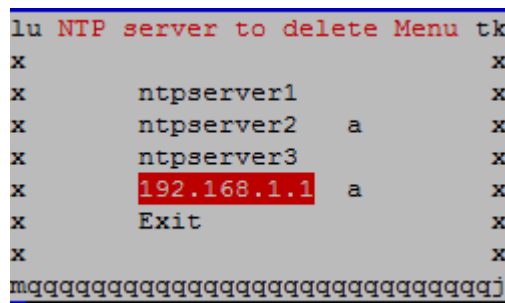

Navigate to **Network Configuration ->NTP.**

Select **Delete an existing NTP Server**

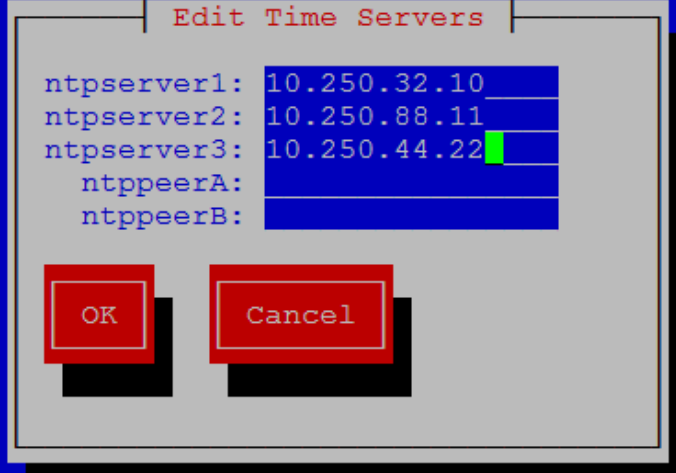

Select the PMAC VM Control IP, Click **[Enter]**

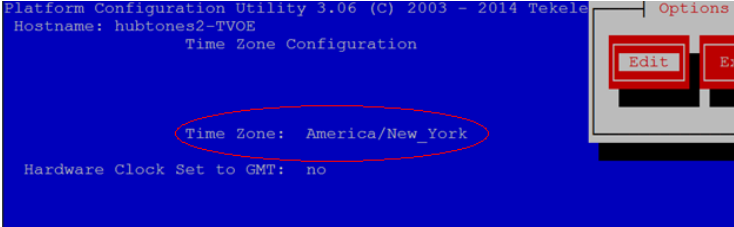

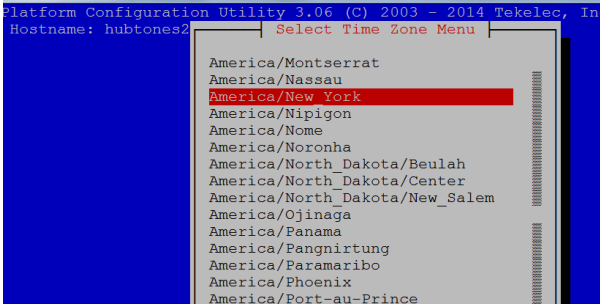

You will be returned to the **NTP Menu**

## Procedure 11: Configure SOAM TVOE Server Blades

11	<b>TVOE Server:</b> Configure NTP	Click <b>Edit</b>
		
		<ul style="list-style-type: none"><li>• ntpserver1: Enter customer provided NTP server #1 IP address.</li><li>• ntpserver2: Enter customer provided NTP server #2 IP address.</li><li>• ntpserver3: Enter customer provided NTP server #3 IP address.</li></ul>
		Press <b>OK</b> Press <b>Exit</b> to return to the platcfg menu.

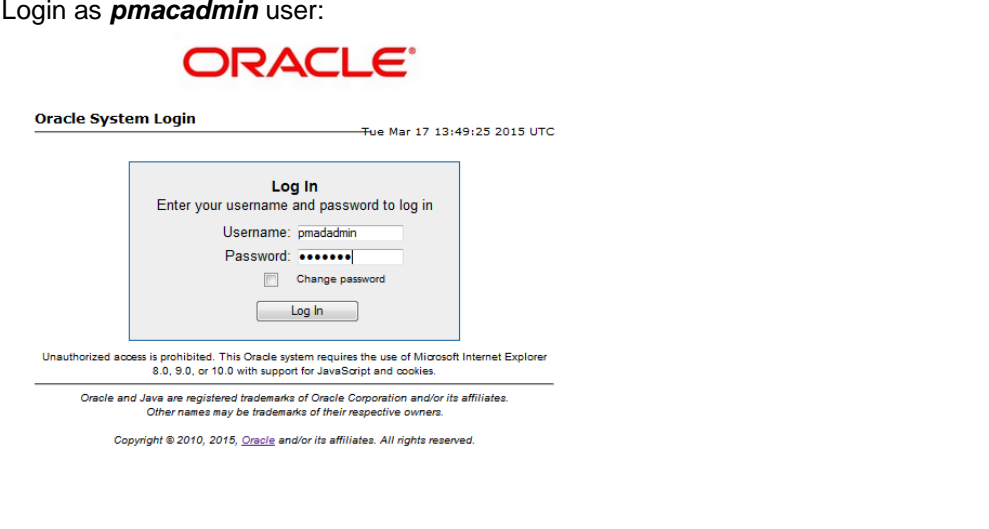

**Procedure 11: Configure SOAM TVOE Server Blades**

<p>12</p> <p>□</p>	<p><b>TVOE Server:</b> Configure Time Zone</p>	<pre>\$ sudo su - platcfg</pre> <p>Navigate to <b>Server Configuration-&gt;Time Zone</b></p>   <p>If the time zone displayed matches the time zone you desire, then you can continue to hit <b>Exit</b> until you are out of the platcfg program. If you want a different time zone, then proceed with this instruction.</p> <p>Click <b>Edit</b></p>  <p>Select the desired time zone from the list and press <b>Enter</b> Continue pressing <b>Exit</b> until you are out of the platcfg program.</p>
<p>13</p> <p>□</p>	<p><b>TVOE Server:</b> Reboot</p>	<p>Reboot the server by executing the following command:</p> <pre>\$ sudo init 6</pre>

### Procedure 11: Configure SOAM TVOE Server Blades

14 <input type="checkbox"/>	<b>TVOE server:</b> Repeat Procedure for other TVOE blades.	Configuration of this TVOE server blade is complete. Repeat this procedure from the beginning for other TVOE hosts that need to be configured.
15 <input type="checkbox"/>	<b>Install SDS (Optional)</b>	If this deployment contains SDS, SDS can now be installed. Refer to document referenced in [4].

**Procedure 12: Create SOAM Guest VMs**

<p><b>S T E P #</b></p>	<p>This procedure will provide the steps needed to create a DSR SOAM virtual machine (referred to as a “guest”) on a TVOE server blade. It must be repeated for every SOAM server you wish to install.</p> <p><b>Prerequisite:</b> TVOE has been installed and configured on the target blade server.</p> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
<p>1</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Login</p> <p>Open web browser and enter:</p> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>http://&lt;PMAC Mgmt Network IP&gt;</b></p> </div> <p>Login as <i>pmacadmin</i> user:</p> 

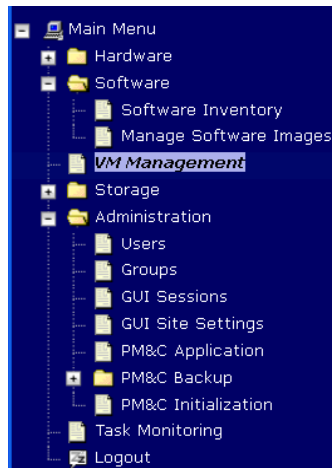

## Procedure 12: Create SOAM Guest VMs

2

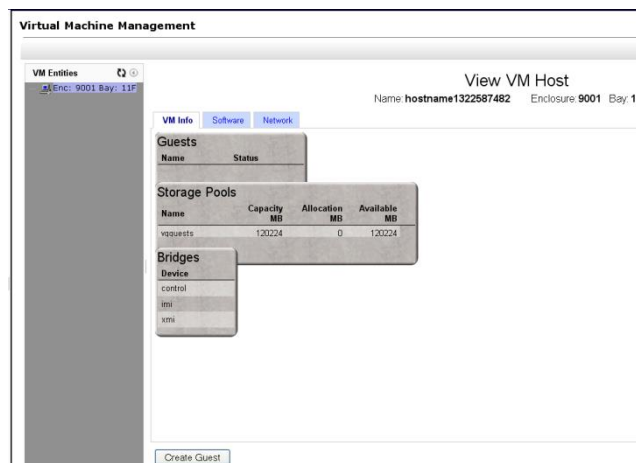

**PMAC GUI:**  
Navigate to  
VM  
Management  
of the Target  
Server Blade

Navigate to **Main Menu -> VM Management**

Select the TVOE server blade or rack mounted server from the **VM Entities** listing on the left side of the screen. The selected server's guest machine configuration will then be displayed in the remaining area of the window.

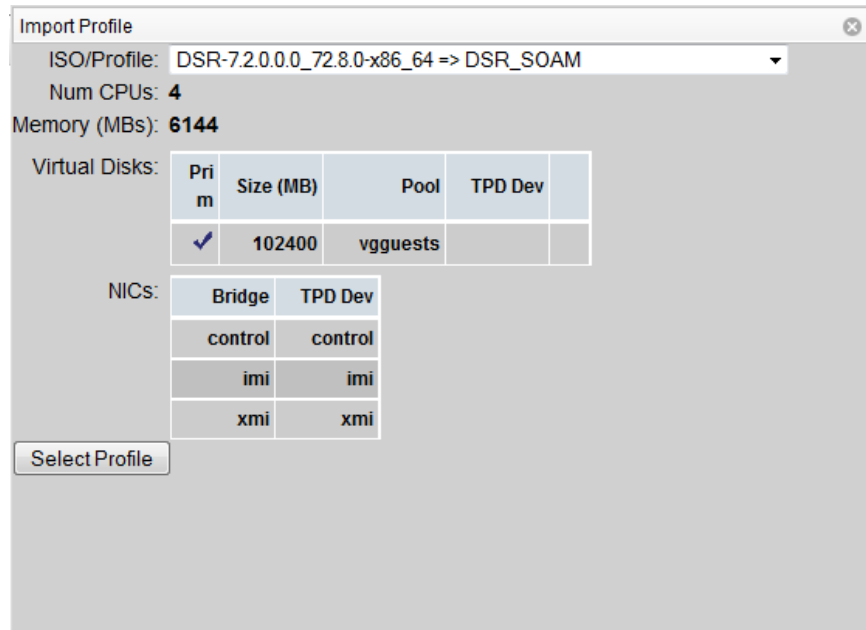

Click **Create Guest**

Create Guest

**Procedure 12: Create SOAM Guest VMs**

3 **PMAC GUI:**  
 Configure VM Guest Parameters

Select **Import Profile**

From the **“ISO/Profile”** drop-down box, select the entry that matches depending on the hardware that your SOAM VM TVOE server is running on and your preference for NetBackup interfaces:

<b>SOAM VM TVOE Hardware Type(s)</b>	<b>Dedicated Netbackup Interface?</b>	<b>Choose Profile (&lt;Application ISO NAME&gt;)</b> ➔
HP BL460 Gen 8 Blade, HP BL460 Gen 9 Blade	No	<b>DSR_SOAM</b>
HP BL460 Gen 8 Blade, HP BL460 Gen 9 Blade	Yes	<b>DSR_SOAM_NBD</b>

Note: Application\_ISO\_NAME is the name of the DSR Application ISO to be installed on this SOAM

Press **Select Profile**.

You can edit the name, if you wish. For instance: **“DSR\_SOAM\_A,”** or **DSR\_SOAM\_B”**. (This will not become the ultimate hostname. It is just an internal tag for the VM host manager.)

Press **Create**

**Procedure 12: Create SOAM Guest VMs**

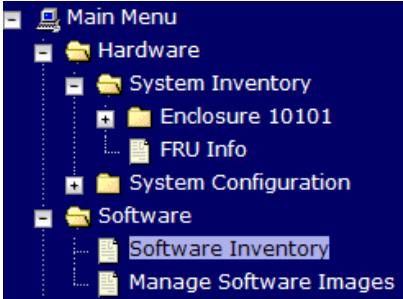

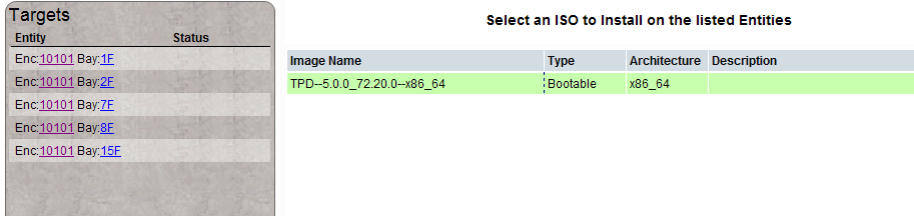

<p>4 <input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Wait for Guest Creation to Complete</p>	<p>Navigate to <b>Main Menu -&gt; Task Monitoring</b> to monitor the progress of the guest creation task. A separate task will appear for each guest creation that you have launched.</p> <p>Wait or refresh the screen until you see that the guest creation task has completed successfully.</p> <table border="1" data-bbox="451 451 1339 535"> <thead> <tr> <th>ID</th> <th>Task</th> <th>Target</th> <th>Status</th> <th>Running Time</th> <th>Start Time</th> <th>Progress</th> </tr> </thead> <tbody> <tr> <td>1739</td> <td>VirAction: Create</td> <td>Enc:9001 Bay:11F Guest: DSR_NOAMP</td> <td>Guest creation completed (DSR_NOAMP)</td> <td>0:00:04</td> <td>2011-11-29 20:36:11</td> <td>100%</td> </tr> </tbody> </table>	ID	Task	Target	Status	Running Time	Start Time	Progress	1739	VirAction: Create	Enc:9001 Bay:11F Guest: DSR_NOAMP	Guest creation completed (DSR_NOAMP)	0:00:04	2011-11-29 20:36:11	100%

## Procedure 15: Configure SOAM NE

2 <input type="checkbox"/>	<b>NOAM VIP GUI:</b> Create the SOAM Network Element using an XML File	<p>Make sure to have an SOAM Network Element XML file available on the PC that is running the web browser. The SOAM Network Element XML file is similar to what was created and used in <b>Procedure 3</b>, but defines the SOAM “Network Element”.</p> <p>Refer to <b>Appendix A:</b> Sample Network Element and Hardware Profiles for a sample Network Element xml file</p> <p>Navigate to <b>Main Menu-&gt;Configuration-&gt;Network Elements</b></p>  <p>Select the <b>Browse</b> button, and enter the path and name of the SOAM network XML file.</p> <p>Select the <b>Upload File</b> button to upload the XML file and configure the SOAM Network Element.</p> <p>To create a new Network Element, upload a valid configuration file:</p> <p><input type="button" value="Browse..."/> No file selected. <input type="button" value="Upload File"/></p> <p><input type="button" value="Insert"/> <input type="button" value="Delete"/> <input type="button" value="Export"/> <input type="button" value="Report"/></p>
-------------------------------	--	--

## Procedure 16: Configure the SOAM Servers

<b>S T E P #</b>	<p>This procedure will provide the steps to configure the SOAM servers.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Exchange SSH keys between SOAM site's local PMAC and the SOAM Server</b>	<p>Use the PMAC GUI to determine the Control Network IP address of the server that is to be the SOAM server. From the PMAC GUI, navigate to <b>Main Menu -&gt; Software -&gt; Software Inventory</b>.</p>  <p>Note the IP address for the SOAM server.</p> <p>Login to the PMAC terminal as the <b>admusr</b>.</p> <p>From a terminal window connection on the PMAC as the <b>admusr</b> user, exchange SSH keys for <b>admusr</b> between the PMAC and the SOAM server using the keyexchange utility, using the Control network IP address for the SOAM server. When prompted for the password, enter the password for the <b>admusr</b> user of the NOAM server.</p> <pre>\$ keyexchange admusr@&lt;SO1_Control_IP Address&gt;</pre>
2 <input type="checkbox"/>	<b>Exchange SSH keys between NOAM and PMAC at the SOAM site (if necessary)</b>	<p><b>Note:</b> If this SOAM shares the same PMAC as the NOAM, then you can skip this step.</p> <p>From a terminal window connection on the NOAM VIP, as the <b>admusr</b>, exchange SSH keys for admusr between the NOAM and the PMAC for this SOAM site using the keyexchange utility.</p> <p>When prompted for the password, enter the admusr password for the PMAC server.</p> <pre>\$ keyexchange admusr@&lt;SO1_Site_PMAC_Mgmt_IP_Address&gt;</pre>

## Procedure 16: Configure the SOAM Servers

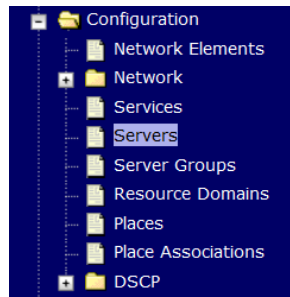

3 <input type="checkbox"/>	<b>NOAM VIP GUI: Login</b>	<p>If not already done, establish a GUI session on the NOAM server by using the XMI IP address of the first NOAM server. Open the web browser and enter a URL of:</p> <div data-bbox="456 346 1218 386" style="border: 1px solid black; padding: 2px;"><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></div> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div data-bbox="526 506 1252 1052" style="text-align: center;"></div>
-------------------------------	----------------------------	---

**Procedure 16: Configure the SOAM Servers**

4  
 **NOAM VIP GUI:** Insert the 1<sup>st</sup> SOAM server

Navigate to **Main Menu -> Configuration -> Servers.**

Select the **Insert** button to insert the 1<sup>st</sup> SOAM server into servers table (the first or server).

Attribute	Value	Description
Hostname	SOAM-A *	Unique name for 20-character string minus sign. Must be alphanumeric.
Role	SYSTEM OAM *	Select the function.
Hardware Profile	DSR TVOE Guest	Hardware profile.
Network Element Name	HPC6_90006 *	Select the network element.
Location		Location description string. Valid value.

Fill in the fields as follows:

**Hostname:** <Hostname>

**Role:** **SYSTEM OAM**

**System ID:** <Site System ID>

**Hardware Profile:** **DSR TVOE Guest**

**Network Element Name:** [Choose NE from Drop Down Box]

The network interface fields will now become available with selection choices based on the chosen hardware profile and network element

Interfaces:		
Network	IP Address	Interface
INTERNALXMI (10.240.84.128/25)	10.240.84.155	xmi <input type="checkbox"/> VLAN (3)
INTERNALIMI (10.240.85.0/26)	10.240.85.10	imi <input type="checkbox"/> VLAN (4)

Fill in the server IP addresses for the XMI network. Select **xmi** for the interface. **Leave the "VLAN" checkbox unchecked.**

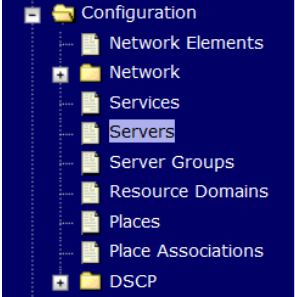

Fill in the server IP addresses for the IMI network. Select **imi** for the interface. **Leave the "VLAN" checkbox unchecked.**

Next, add the following NTP servers:

NTP Server	Preferred?
<TVOE_XMI_IP_Address(SO1)>	Yes

Select the **Ok** button when you have completed entering all the server data.

**Procedure 16: Configure the SOAM Servers**

<p>5</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI: Export</b>  the Initial  Configuration</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Servers</b>.</p>  <p>From the GUI screen, select the NOAM server and then select <b>Export</b> to generate the initial configuration data for that server.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Export"/> <input type="button" value="Report"/></p>
<p>6</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP:</b>  Copy  Configuration  File to 1<sup>st</sup>  SOAM Server</p>	<p>Obtain a terminal session to the NOAM VIP as the <b>admusr</b> user.</p> <p>Use the <b>awpushcfg</b> utility to copy the configuration file created in the previous step from the <code>/var/TKLC/db/filemgmt</code> directory on the NOAM to the 1<sup>st</sup> SOAM server, using the Control network IP address for the 1<sup>st</sup> SOAM server.</p> <p>The configuration file will have a filename like <code>TKLCConfigData.&lt;hostname&gt;.sh</code>.</p> <pre>\$ sudo awpushcfg</pre> <p>The awpushcfg utility is interactive, so the user will be prompted for the following:</p> <ul style="list-style-type: none"> <li>• IP address of the local PMAC server: Use the management network address from the PMAC.</li> <li>• Username: Use <b>admusr</b></li> <li>• Control network IP address for the target server: In this case, enter the control IP for the 1<sup>st</sup> SOAM server).</li> <li>• Hostname of the target server: Enter the server name configured in <b>step 3</b></li> </ul>

**Procedure 16: Configure the SOAM Servers**

<p>7</p> <p><input type="checkbox"/></p>	<p><b>1<sup>st</sup> SOAM Server:</b> Verify awpushcfg was called and Reboot the Server</p>	<p>Obtain a terminal window connection on the 1<sup>st</sup> SOAM server console by establishing an ssh session from the NOAM VIP terminal console.</p> <pre style="border: 1px solid black; padding: 5px;">\$ ssh admusr@&lt;SO1_Control_IP&gt;</pre> <p>Login as the <i>admusr</i> user.</p> <p>The automatic configuration daemon will look for the file named “<i>TKLCConfigData.sh</i>” in the /var/tmp directory, implement the configuration in the file, and then prompt the user to reboot the server.</p> <p>Verify awpushcfg was called by checking the following file</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo cat /var/TKLC/appw/logs/Process/install.log</pre> <p>Verify the following message is displayed:</p> <pre style="border: 1px solid black; padding: 5px;">[SUCCESS] script completed successfully!</pre> <p>Now Reboot the Server:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo init 6</pre> <p>Wait for the server to reboot</p>				
<p>8</p> <p><input type="checkbox"/></p>	<p><b>1<sup>st</sup> SOAM Server:</b> Verify Server Health</p>	<p>Execute the following command on the 1<sup>st</sup> SOAM server and make sure that no errors are returned:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo syscheck Running modules in class hardware...OK Running modules in class disk...OK Running modules in class net...OK Running modules in class system...OK Running modules in class proc...OK LOG LOCATION: /var/TKLC/log/syscheck/fail_log</pre>				
<p>9</p> <p><input type="checkbox"/></p>	<p><b>Insert and Configure the 2<sup>nd</sup> SOAM server</b></p>	<p>Repeat this procedure to insert and configure the 2<sup>nd</sup> SOAM server, with the exception of the NTP server, which should be configured as so:</p> <table border="1" data-bbox="479 1577 1352 1677"> <thead> <tr> <th data-bbox="479 1577 906 1612">NTP Server</th> <th data-bbox="906 1577 1352 1612">Preferred?</th> </tr> </thead> <tbody> <tr> <td data-bbox="479 1612 906 1677">&lt;TVOE_XMI_IP_Address(SO2)&gt;</td> <td data-bbox="906 1612 1352 1677">Yes</td> </tr> </tbody> </table> <p>Instead of data for the 1<sup>st</sup> SOAM Server, insert the network data for the 2<sup>nd</sup> SOAM server, transfer the <i>TKLCConfigData</i> file to the 2<sup>nd</sup> SOAM server, and reboot the 2<sup>nd</sup> SOAM server when prompted at a terminal window.</p>	NTP Server	Preferred?	<TVOE_XMI_IP_Address(SO2)>	Yes
NTP Server	Preferred?					
<TVOE_XMI_IP_Address(SO2)>	Yes					

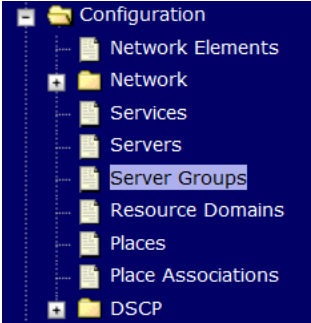

## Procedure 16: Configure the SOAM Servers

10 <input type="checkbox"/>	<b>Install Netbackup Client Software on SOAMs (Optional)</b>	If you are using NetBackup at this site, then execute <b>Procedure 13</b> again to install the NetBackup Client on all SOAM servers.
--------------------------------	--	--

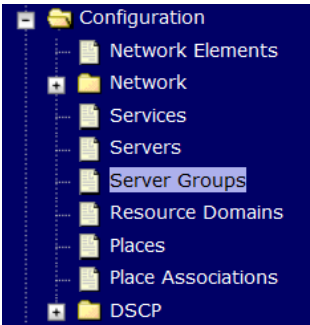

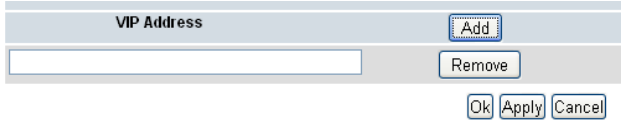

## Procedure 17: Configure the SOAM Server Group

<b>S T E P #</b>	<p>This procedure will provide the steps to configure the SOAM Server Group</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
1 <input type="checkbox"/>	<p><b>NOAM VIP GUI: Login</b></p> <p>If not already done, establish a GUI session on the NOAM server by using the XMI IP address of the first NOAM server. Open the web browser and enter a URL of:</p> <div data-bbox="456 569 1216 606" style="border: 1px solid black; padding: 2px;"><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></div> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div data-bbox="456 730 1252 1276" style="text-align: center;"></div>

## Procedure 17: Configure the SOAM Server Group

2 <input type="checkbox"/>	<b>NOAM VIP</b> <b>GUI:</b> Enter SOAM Server Group Data	<p>After approximately <b>5 minutes</b> for the 2<sup>nd</sup> SOAM server to reboot,</p> <p>Navigate to the GUI <b>Main Menu-&gt;Configuration-&gt;Server Groups</b></p>  <p>Select <b>Insert</b></p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>Add the SOAM Server Group name along with the values for the following fields:</p> <ul style="list-style-type: none"><li>• <b>Name:</b> &lt;Hostname&gt;</li><li>• <b>Level:</b> B</li><li>• <b>Parent</b> [Select the NOAM Server Group]</li><li>• <b>Function:</b> DSR (Active/Standby Pair)</li><li>• <b>WAN Replication Connection Count:</b> Use Default Value</li></ul> <p>Select <b>OK</b> when all fields are filled.</p> <p><b>Note:</b> For DSR mated sites, repeat this step for additional SOAM server groups where the preferred SOAM spares may be entered prior to the active/Standby SOAMs.</p>
-------------------------------	---	---

**Procedure 17: Configure the SOAM Server Group**

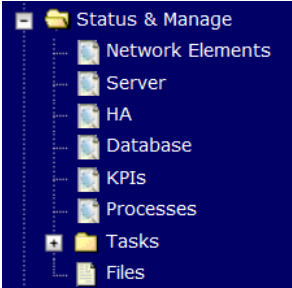

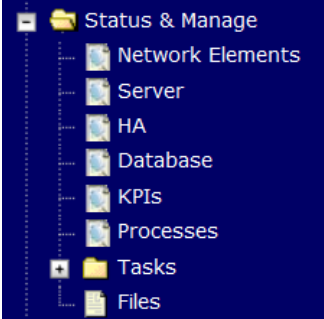

<p>3</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Edit the SOAM Server Group and add VIP</p>	<p>From the GUI <b>Main Menu-&gt;Configuration-&gt;Server Groups</b></p>  <p>Select the new SOAM server group, and then select <b>Edit</b>.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>Add both SOAM servers to the Server Group Primary Site by clicking the <b>Include in SG</b> checkbox.</p> <p>Do not check any of the <b>Preferred Spare</b> checkboxes.</p> <table border="1" data-bbox="456 980 1089 1125"> <thead> <tr> <th colspan="3">SO_900060102</th> </tr> <tr> <th>Server</th> <th>SG Inclusion</th> <th>Preferred HA Role</th> </tr> </thead> <tbody> <tr> <td>RMSSOA</td> <td><input checked="" type="checkbox"/> Include in SG</td> <td><input type="checkbox"/> Preferred Spare</td> </tr> <tr> <td>RMSSOB</td> <td><input checked="" type="checkbox"/> Include in SG</td> <td><input type="checkbox"/> Preferred Spare</td> </tr> </tbody> </table> <p>Click <b>Apply</b>.</p> <p>Add a SOAM VIP by click on <b>Add</b>. Fill in the <b>VIP Address</b> and press <b>Ok</b> as shown below:</p> 	SO_900060102			Server	SG Inclusion	Preferred HA Role	RMSSOA	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare	RMSSOB	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare

[Defau IPv6) or dotted decimal (IPv4) format.]	Router IP	10.71.88.3	The IP address of a router on this network. If this is a def route on servers with interfaces on this network. If custom monitored.	Default Network	<input type="radio"/> Yes <input checked="" type="radio"/> No	A selection indicating whether this is the network with a c	Routable	<input checked="" type="radio"/> Yes <input type="radio"/> No	Whether or not this network is routable outside its netwo be possibly present in all network elements.
Field	Value	Description																											
Network Name	XSI1 *	The name of this network. [Default = N/A. Range = Alpha																											
Network Element	- Unassigned - *	The network element this network is a part of. If not spec																											
VLAN ID	5 *	The VLAN ID to use for this network. [Default = N/A. Rang																											
Network Address	10.71.88.0 *	The network address of this network. [Default = N/A. Ran colon hex (IPv6) format.]																											
Netmask	255.255.255.0 *	Subnetting to apply to servers within this network. [Defau IPv6) or dotted decimal (IPv4) format.]																											
Router IP	10.71.88.3	The IP address of a router on this network. If this is a def route on servers with interfaces on this network. If custom monitored.																											
Default Network	<input type="radio"/> Yes <input checked="" type="radio"/> No	A selection indicating whether this is the network with a c																											
Routable	<input checked="" type="radio"/> Yes <input type="radio"/> No	Whether or not this network is routable outside its netwo be possibly present in all network elements.																											

### Procedure 19: Configure MP Blade Servers

4 <input type="checkbox"/>	<b>NOAM VIP</b> <b>GUI:</b> [PCA Only]:Navigate to Signaling Network Configuration Screen	<p><b>Note:</b> Execute this step only if you are defining a separate, dedicated network for SBR Replication.</p> <p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Network</b></p>  <p>Click on <b>Insert</b> in the lower left corner.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Lock/Unlock"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p>
-------------------------------	--	---

**Procedure 19: Configure MP Blade Servers**

5  **NOAM VIP GUI:** [PCA Only]: Define SBR DB Replication Network

**Note:** Execute this step only if you are defining a separate, dedicated network for SBR Replication.

**Main Menu: Configuration -> Network [Insert]**

Info ▾

**Insert Network**

Field	Value	Description
Network Name	Replicaiton *	The name of this network. [Default = N/A. Range = Alphanumer
Network Element	- Unassigned - ▾	The network element this network is a part of. If not specified, t
VLAN ID	8 *	The VLAN ID to use for this network. [Default = N/A. Range = 1-
Network Address	10.71.88.0 *	The network address of this network. [Default = N/A. Range = v format.]
Netmask	255.255.255.0 *	Subnetting to apply to servers within this network. [Default = N/ decimal (IPv4) format.]
Router IP	10.71.88.3	The IP address of a router on this network. If this is a default n with interfaces on this network. If customer router monitoring is
Default Network	<input type="radio"/> Yes <input checked="" type="radio"/> No	A selection indicating whether this is the network with a default
Routable	<input checked="" type="radio"/> Yes <input type="radio"/> No	Whether or not this network is routable outside its network eleer present in all network elements.

Ok Apply Cancel

Enter the **Network Name**, **VLAN ID**, **Network Address**, **Netmask**, and **Router IP** that matches the SBR DB Replication network

**Note:** Even if the network does not use VLAN Tagging, you should enter the correct VLAN ID here as indicated by the NAPD

- **IMPORTANT:** Leave the Network Element field as **Unassigned**.
- Select **No** for Default Network
- Select **Yes** for Routable.

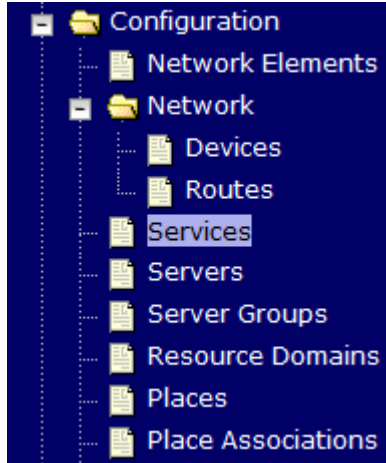

Press **Ok** if you are finished adding signaling networks **-OR-** Press **Apply** to save this signaling network and repeat this step to enter additional signaling networks.

**Procedure 19: Configure MP Blade Servers**

6 **NOAM VIP**  
 **GUI:** [PCA Only]: Perform Additional Service to Networks Mapping

**Note:** Execute this step only if you are defining a separate, dedicated network for SBR Replication.

Navigate to **Main Menu -> Configuration -> Services**

Select the **Edit** button

Set the Services as shown in the table below:

Name	Intra-NE Network	Inter-NE Network
Replication_MP	<IMI Network>	<SBR DB Replication Network>*
ComAgent	<IMI Network>	<SBR DB Replication Network>*

**Note:** It is recommended that dual-path HA heartbeats be enabled in support of geo-diverse SBRs. This requires participating servers to be attached to at least two routable networks.

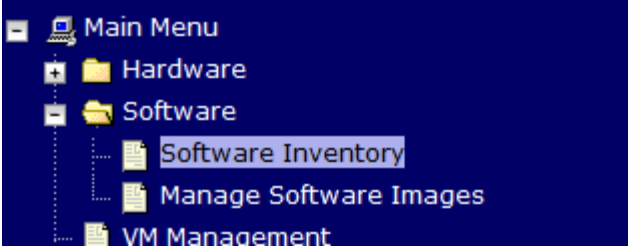

**Note:** For **HA\_MP\_Secondary** it is recommended the **Inter-NE Network** be set as the PCA replication network-Optional (configured in **Step 5**) or the XMI network and **Intra-NE Network** be set as the IMI network.

Select the **Ok** button to apply the Service-to-Network selections.

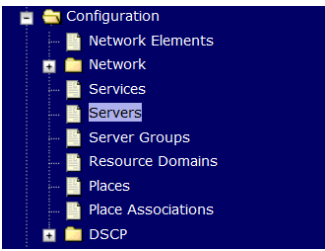

## Procedure 19: Configure MP Blade Servers

7 □	<b>PMAC:</b> Exchange SSH keys between MP site's local PMAC and the MP server	<p>Use the MP site's PMAC GUI to determine the Control Network IP address of the blade server that is to be an MP server. From the MP site's PMAC GUI, navigate to <b>Main Menu -&gt; Software -&gt; Software Inventory</b>.</p>  <p>Enc:9102 Bay:3E      192.168.1.239      Compass-DAMP-03</p> <p>Note the IP address for an MP server.</p> <p>Login to the MP site's PMAC terminal as the <b>admusr</b>.</p> <p>From a terminal window connection on the MP site's PMAC as the <b>admusr</b>.</p> <p>Exchange SSH keys for <b>admusr</b> between the PMAC and the MP blade server using the keyexchange utility, using the Control network IP address for the MP blade server.</p> <pre>\$ keyexchange admusr@&lt;MP_Control_Blade_IP Address&gt;</pre> <p>When prompted for the password, enter the password for the <b>admusr</b> user of the MP server.</p>
--------	--	---

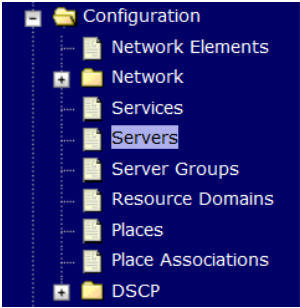

## Procedure 19: Configure MP Blade Servers

8 <input type="checkbox"/>	<p><b>NOAM VIP GUI:</b> Insert the MP server (Part 1)</p>	<p>Before creating the MP blade server, first identify the hardware profile</p> <p><b>Hardware Profile:</b> In the following step, you will select the profile that matches your MP physical hardware and enclosure networking environment.</p> <p><b>Note:</b> You must go through the process of identifying the enclosure switches, mezzanine cards and Ethernet interfaces of the network prior and blade(s) used before selecting the profile.</p> <table border="1"> <thead> <tr> <th><i>Profile Name</i></th> <th><i>Number of Enclosure Switches (Pairs)?</i></th> <th><i>Bonded Signaling Interfaces?</i></th> </tr> </thead> <tbody> <tr> <td>1-Pair</td> <td>1</td> <td>Yes</td> </tr> <tr> <td>2-Pair</td> <td>2</td> <td>Yes</td> </tr> <tr> <td>3-Pair-bonded</td> <td>3</td> <td>Yes</td> </tr> <tr> <td>3-Pair-un-bonded</td> <td>3</td> <td>No</td> </tr> </tbody> </table> <p><b>Note:</b> If none of the above profiles properly describe your MP server blade, then you will have to create your own in a text editor (<b>See Figure 7 of Appendix A: Sample Network Element and Hardware Profiles</b>) and copy it into the <b>/var/TKLC/appworks/profiles/</b> directory of the active NOAM server, the standby NOAM server, and both the DR NOAM servers (<i>if applicable</i>).</p> <p><b>Note:</b> After transferring the above file, set the proper file permission by executing the following command:</p> <pre style="border: 1px solid black; padding: 2px;">\$ sudo chmod 777 /var/TKLC/appworks/profiles/&lt;profile name&gt;</pre> <p>Make note of the profile used here, as it will be used in server creation in the following step.</p>	<i>Profile Name</i>	<i>Number of Enclosure Switches (Pairs)?</i>	<i>Bonded Signaling Interfaces?</i>	1-Pair	1	Yes	2-Pair	2	Yes	3-Pair-bonded	3	Yes	3-Pair-un-bonded	3	No
<i>Profile Name</i>	<i>Number of Enclosure Switches (Pairs)?</i>	<i>Bonded Signaling Interfaces?</i>															
1-Pair	1	Yes															
2-Pair	2	Yes															
3-Pair-bonded	3	Yes															
3-Pair-un-bonded	3	No															

## Procedure 19: Configure MP Blade Servers

<p>9</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI: Insert the MP server (Part 2)</b></p>	<p>Navigate to <b>Main Menu-&gt;Configuration-&gt;Servers</b></p>  <p>Select the <b>Insert</b> button to insert the new MP server into servers table.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Export"/> <input type="button" value="Report"/></p> <p>Fill out the following values:</p> <p><b>Hostname:</b> &lt;Hostname&gt;  <b>Role:</b> MP  <b>Network Element:</b> [Choose Network Element]</p> <p><b>Hardware Profile:</b> Select the profile that matches your MP physical hardware and enclosure networking environment from <b>step 3</b>.</p> <p><b>Location:</b> &lt;enter an optional location description&gt;</p> <p>The interface configuration form will now appear.</p>  <p>Enter the IP addresses for all networks. Select the correct bond or interface. Ensure the correct bond and VLAN tagging (if required) is selected.</p> <p>For the IMI network, enter the MP's IMI IP address. Select the proper bond or interface, and <b>select the VLAN checkbox</b>.</p> <p><b>Optional:</b> If dedicated network for SBR replication has been defined, enter the SBR replication IP address. Select the proper bond or interface, and <b>select the VLAN checkbox</b>.</p>
--	---	---

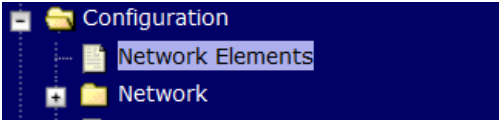

**Procedure 19: Configure MP Blade Servers**

<p>10</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Insert the MP server (Part 3)</p>	<p>Next, add the following NTP servers:</p> <table border="1" data-bbox="472 300 1346 525"> <thead> <tr> <th>NTP Server</th> <th>Preferred?</th> </tr> </thead> <tbody> <tr> <td>&lt;TVOE_XML_IP_Address(SO1)&gt;</td> <td>Yes</td> </tr> <tr> <td>&lt;TVOE_XML_IP_Address(SO2)&gt;</td> <td>No</td> </tr> <tr> <td>&lt;MP_Site_PMAC_TVOE_IP_Address&gt;</td> <td>No</td> </tr> </tbody> </table> <p><b>Note:</b> For multiple enclosure deployments, prefer the SOAM TVOE Host that is located in the same enclosure as the MP Server.</p> <p>Select <b>OK</b> when all fields are filled in to finish MP server insertion.</p>	NTP Server	Preferred?	<TVOE_XML_IP_Address(SO1)>	Yes	<TVOE_XML_IP_Address(SO2)>	No	<MP_Site_PMAC_TVOE_IP_Address>	No
NTP Server	Preferred?									
<TVOE_XML_IP_Address(SO1)>	Yes									
<TVOE_XML_IP_Address(SO2)>	No									
<MP_Site_PMAC_TVOE_IP_Address>	No									
<p>11</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Export the Configuration</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Servers.</b></p>  <p>From the GUI screen, select the MP server and then select <b>Export</b> to generate the initial configuration data for that server.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Export"/> <input type="button" value="Report"/></p>								
<p>12</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP:</b>  Copy Configuration File to MP Server</p>	<p>Obtain a terminal session to the NOAM VIP as the <b>admusr</b> user.</p> <p>Use the <b>awpushcfg</b> utility to copy the configuration file created in the previous step from the <code>/var/TKLC/db/filemgmt</code> directory on the NOAM to the MP server, using the Control network IP address for the MP server.</p> <p>The configuration file will have a filename like <code>"TKLCConfigData.&lt;hostname&gt;.sh"</code>.</p> <pre data-bbox="451 1440 1354 1480">\$ sudo awpushcfg</pre> <p>The awpushcfg utility is interactive, so the user will be prompted for the following:</p> <ul style="list-style-type: none"> <li>• IP address of the local PMAC server: Use the management network address from the PMAC.</li> <li>• Username: Use <b>admusr</b></li> <li>• Control network IP address for the target server: In this case, enter the control IP for the MP server).</li> <li>• Hostname of the target server: Enter the server name configured in <b>step 1</b></li> </ul>								

## Procedure 19: Configure MP Blade Servers

13 <input type="checkbox"/>	<b>MP Server:</b> Verify awpushcfg was called and Reboot the Configured Server	<p>Obtain a terminal window connection on the MP server console by establishing an ssh session from the NOAM VIP terminal console.</p> <pre>\$ ssh admusr@&lt;MP_Control_IP&gt;</pre> <p>Login as the <b>admusr</b> user.</p> <p>Verify awpushcfg was called by checking the following file:</p> <pre>\$ sudo cat /var/TKLC/appw/logs/Process/install.log</pre> <p>Verify the following message is displayed:</p> <pre>[SUCCESS] script completed successfully!</pre> <p>Reboot the sever:</p> <pre>\$ sudo init 6</pre> <p>Proceed to the next step once the Server finished rebooting, The server is done rebooting once the login prompt is displayed.</p>
14 <input type="checkbox"/>	<b>MP Server:</b> Verify Server Health	<p>After the reboot, login as <b>admusr</b>.</p> <p>Execute the following command as super-user on the server and make sure that no errors are returned:</p> <pre>\$ sudo syscheck</pre> <pre>Running modules in class hardware...OK Running modules in class disk...OK Running modules in class net...OK Running modules in class system...OK Running modules in class proc...OK LOG LOCATION: /var/TKLC/log/syscheck/fail_log</pre>

## Procedure 19: Configure MP Blade Servers

15 <input type="checkbox"/>	<b>MP Server:</b> Delete Auto-Configured Default Route on MP and Replace it with a Network Route via the XMI Network-Part1 (Optional)	<p><b>Note:</b> THIS STEP IS <b>OPTIONAL</b> AND SHOULD ONLY BE EXECUTED IF YOU PLAN TO CONFIGURE A <b>DEFAULT ROUTE</b> ON YOUR MP THAT USES A SIGNALING (XSI) NETWORK INSTEAD OF THE XMI NETWORK.</p> <p>(Not executing this step will mean that a default route will not be configurable on this MP and you will have to create separate network routes for each signaling network destination.)</p> <p>Using the iLO facility, log into the MP as the <i>admusr</i> user. (<i>Alternatively, you can log into the site's PMAC then SSH to the MP's control address.</i>)</p> <p>Determine &lt;XMI_Gateway_IP&gt; from your SO site network element info.</p> <p>Gather the following items:</p> <ul style="list-style-type: none"><li>• &lt;NO_XMI_Network_Address&gt;</li><li>• &lt;NO_XMI_Network_Netmask&gt;</li><li>• &lt;DR_NO_XMI_Network_Addres&gt;</li><li>• &lt;DR_NO_XMI_Network_Netmask&gt;</li><li>• &lt;TVOE_Mgmt_XMI_Network_Address&gt;</li><li>• &lt;TVOE_Mgmt_XMI_Network_Netmask&gt;</li></ul> <p><b>Note:</b> You can either consult the XML files you imported earlier, or go to the NO GUI and view these values from the <b>Main Menu -&gt; Configuration -&gt; Network Elements</b> screen.</p>  <p>Proceed to the next step to modify the default routes on the MP servers.</p>
--------------------------------	--	---

## Procedure 19: Configure MP Blade Servers

16 □	<b>MP Server:</b> Delete Auto-Configured Default Route on MP and Replace it with a Network Route via the XMI Network-Part2 (Optional)	<p>After gathering the network information from step 15, proceed with modifying the default routes on the MP server.</p> <p>Establish a connection to the MP server, login as <b>admusr</b>.</p> <p>Create network routes to the NO's XMI(OAM) network:</p> <p><b>Note:</b> If your NOAM XMI network is exactly the same as your MP XMI network, then you should skip this command and only configure the DR NO route.</p> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm add -route=net --address=&lt;NO_Site_Network_ID&gt; --netmask=&lt;NO_Site_Network_Netmask&gt; --gateway=&lt;MP_XMI_Gateway_IP_Address&gt; --device=&lt;MP_XMI_Interface&gt; Route to &lt;MP_XMI_Interface&gt; added.</pre> <p>Create network routes to the DR NO's XMI(OAM) network:</p> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm add -route=net --address=&lt;DR-NO_Site_Network_ID&gt; --netmask=&lt;&lt;DR-NO_Site_Network_Netmask&gt; --gateway=&lt;MP_XMI_Gateway_IP_Address&gt; --device=&lt;MP_XMI_Interface&gt; Route to &lt;MP_XMI_Interface&gt; added.</pre> <p>Create network routes to the Management Server TVOE XMI(OAM) network for NTP:</p> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm add -route=net --address=&lt;TVOE_Mgmt_XMI_Network_Address&gt; --netmask=&lt;TVOE_Mgmt_XMI_Network_Netmask&gt; --gateway=&lt;MP_XMI_Gateway_IP_Address&gt; --device=&lt;MP_XMI_Interface&gt; Route to &lt;MP_XMI_Interface&gt; added.</pre> <p><b>(Optional)</b> If Sending SNMP traps from individual servers, create host routes to customer SNMP trap destinations on the XMI network:</p> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm add -route=host --address=&lt;Customer_NMS_IP&gt; --gateway=&lt;MP_XMI_Gateway_IP_Address&gt; --device=&lt;MP_XMI_Interface&gt; Route to &lt;MP_XMI_Interface&gt; added.</pre> <p>(Repeat for any existing customer NMS stations)</p> <p>Delete the existing default route:</p> <pre>\$ sudo /usr/TKLC/plat/bin/netAdm delete -route=default --gateway=&lt;MP_XMI_Gateway_IP&gt; --device=&lt;MP_XMI_Interface&gt; Route to &lt;MP_XMI_Interface&gt; removed.</pre>
---------	--	---

**Procedure 19: Configure MP Blade Servers**

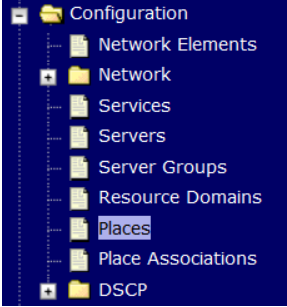

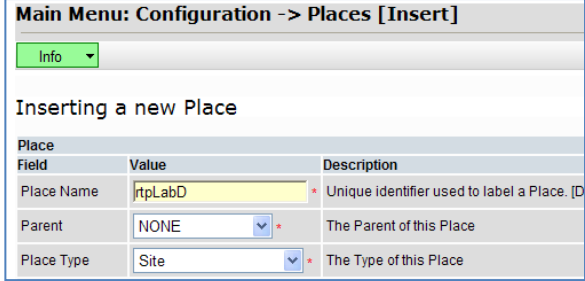

<p>17</p> <p><input type="checkbox"/></p>	<p><b>MP Server:</b> Verify connectivity</p>	<p>After steps 16 and 17 have been executed, verify network connectivity.</p> <p>Establish a connection to the MP server, login as <b>admusr</b>.</p> <p>Ping active NO XMI IP address to verify connectivity:</p> <pre style="border: 1px solid black; padding: 5px;">\$ ping &lt;ACTIVE_NO_XMI_IP_Address&gt; PING 10.240.108.6 (10.240.108.6) 56(84) bytes of data. 64 bytes from 10.240.108.6: icmp_seq=1 ttl=64 time=0.342 ms 64 bytes from 10.240.108.6: icmp_seq=2 ttl=64 time=0.247 ms</pre> <p><b>(Optional) Ping Customer NMS Station(s):</b></p> <pre style="border: 1px solid black; padding: 5px;">\$ ping &lt;Customer_NMS_IP&gt; PING 172.4.116.8 (172.4.116.8) 56(84) bytes of data. 64 bytes from 172.4.116.8: icmp_seq=1 ttl=64 time=0.342 ms 64 bytes from 172.4.116.8: icmp_seq=2 ttl=64 time=0.247 ms</pre> <p>If you do not get a response, then verify your network configuration. If you continue to get failures then halt the installation and contact Oracle customer support.</p>
<p>18</p> <p><input type="checkbox"/></p>	<p><b>Repeat for remaining MP at all sites</b></p>	<p><b>Repeat</b> this entire procedure for all remaining MP blades.</p>

**Procedure 20: Configure Places and Assign MP Servers to Places (PCA ONLY)**

<p><b>S T E P #</b></p>	<p>This procedure will provide the steps/reference to add “Places” in the POLICY AND CHARGING DRA Network.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1 <input type="checkbox"/></p>	<p><b>NOAM VIP GUI: Login</b></p>	<p>If not already done, establish a GUI session on the NOAM server by using the XML IP address of the first NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 5px 0;"> <p><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></p> </div> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div style="text-align: center; margin: 20px 0;">  </div>

## Procedure 20: Configure Places and Assign MP Servers to Places (PCA ONLY)

2 □	<b>NOAM VIP GUI:</b> Configure Places	<p>Establish a GUI session on the NOAMP by using the XMI VIP address. Login as user <b>guiadmin</b>.</p> <p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Places</b></p>  <p>Select the <b>Insert</b> button</p>   <p><b>Place Name:</b> &lt;Site Name&gt; <b>Parent:</b> NONE <b>Place Type:</b> Site</p> <p>Repeat this step for each of the <i>PCA Places (Sites)</i> in the network.</p> <p>See the 1.4 Terminology section for more information on Sites &amp; Places.</p>
--------	--	---

## Procedure 20: Configure Places and Assign MP Servers to Places (PCA ONLY)

3 <input type="checkbox"/>	<b>NOAM VIP</b> <b>GUI:</b> Assign MP Servers To Places	<p>Select the place configured in step 2, press the edit button.</p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>For each place you have defined, choose the set of MP servers that will be assigned to those places.</p> <table border="1"><thead><tr><th colspan="2">Place</th></tr><tr><th>Field</th><th>Value</th></tr></thead><tbody><tr><td>Place Name</td><td><input type="text" value="rtpLabC"/> *</td></tr><tr><td>Parent</td><td><input type="text" value="NONE"/> ▾ *</td></tr><tr><td>Place Type</td><td><input type="text" value="Site"/> ▾ *</td></tr></tbody></table> <p><b>Servers</b></p> <p>LABCSONE <input type="checkbox"/> labCe1b04pdra1</p> <p>Check all the check boxes for <b>PCA DA-MP</b> and <b>SBR</b> servers that will be assigned to this place.</p> <p>Repeat this step for all other DA-MP or SBR servers you wish to assign to places.</p> <p><b>Note:</b> All <b>PCA DA-MPs</b>, <b>SS7MPs</b> and <b>SBR MPs</b> must be added to the <i>Site Place</i> that corresponds to the physical location of the server.</p> <p>See the <b>1.4 Terminology</b> section for more information on <i>Sites</i>.</p>	Place		Field	Value	Place Name	<input type="text" value="rtpLabC"/> *	Parent	<input type="text" value="NONE"/> ▾ *	Place Type	<input type="text" value="Site"/> ▾ *
Place												
Field	Value											
Place Name	<input type="text" value="rtpLabC"/> *

## Procedure 21: Configure the MP Server Group(s) and Profile(s)

9 <input type="checkbox"/>	<b>SOAM VIP GUI: Login</b>	<p>If not already done, establish a GUI session on the SOAM server by using the VIP IP address of the SOAM server.</p> <p>Open the web browser and enter a URL of: <code>http://&lt;Primary_SOAM_VIP_IP_Address&gt;</code></p> <p>Login to the SOAM GUI as the <i>guiadmin</i> user:</p> 
-------------------------------	----------------------------	--

**Procedure 21: Configure the MP Server Group(s) and Profile(s)**

10 **SOAM VIP**  
 **GUI:** Assign Profiles to DA-MPs from SOAM GUI.

Navigate to **Main Menu -> Diameter Common ->MPs -> Profile Assignments**

Refer to the **DA-MP** section. (If the site has both DSR and MAP-IWF server groups, you will see both a DA-MP section and an SS7-MP section)

**Main Menu: Diameter Common -> MPs -> Profile Assignments**

DA-MP	MP Profile	current value
Oahu-DSR-DAMP-1	G8/G9:Database	The current MP Profile for Oahu Virtualized DA-MP on DL380 7

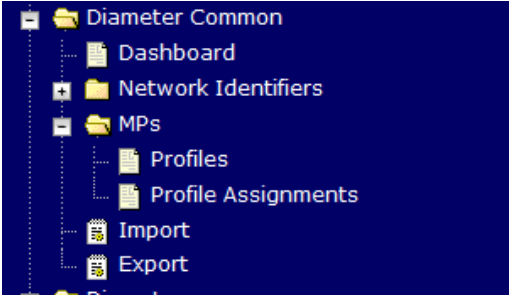

For each MP, select the proper profile assignment based on the MP's hardware type and the function it will serve:

Profile Name	Description
<b>G8/G9:Relay</b>	G8/G9 DA-MP half height blade running the relay application
<b>G8/G9:Database</b>	G8/G9 DA-MP half height blade running a database application (e.g. FABR, RBAR)
<b>G8/G9:Session</b>	G8/G9 DA-MP half height blade running a session application (e.g. CPA, PCA)

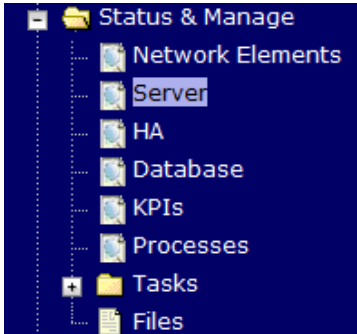

**Note:** If the DA-MPs at this site are configured for *Active/Standby* then there will be a single selection box visible that assigns profiles for all MPs.

When finished, press the **Assign** button

**Procedure 21: Configure the MP Server Group(s) and Profile(s)**

11	<p><b>SOAM VIP</b>  <b>GUI:</b> Assign Profiles to SS7-MPs.</p>	<p>Navigate to <b>Main Menu-&gt;Diameter-&gt;Configuration-&gt;MPs-&gt;Profiles Assignments</b></p>  <p>Refer to the <b>SS7-MP</b> section. (If the site has both DSR and MAP-IWF server groups, you will see both a DA-MP section and an SS7-MP section)</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 20%;">SS7-MP</th> <th style="width: 40%;">MP Profile</th> <th style="width: 40%;">current value</th> </tr> </thead> <tbody> <tr> <td>SS7MP</td> <td>G8:MD-IWF ▾</td> <td>This MP has not been assigned an MP Profile.</td> </tr> </tbody> </table> <p style="text-align: right;"> <input type="button" value="Assign"/> <input type="button" value="Cancel"/> </p> <p>For each SS7 MP, select the proper profile assignment based on the SS7 MP's hardware type and the function it will serve:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 30%;">Profile Name</th> <th style="width: 70%;">Description</th> </tr> </thead> <tbody> <tr> <td><b>G8:MD-IWF</b></td> <td>HP BL460 Gen8/9 Running MAP-IWF functions</td> </tr> </tbody> </table> <p>When finished, press the <b>Assign</b> button</p>	SS7-MP	MP Profile	current value	SS7MP	G8:MD-IWF ▾	This MP has not been assigned an MP Profile.	Profile Name	Description	<b>G8:MD-IWF</b>	HP BL460 Gen8/9 Running MAP-IWF functions
SS7-MP	MP Profile	current value										
SS7MP	G8:MD-IWF ▾	This MP has not been assigned an MP Profile.										
Profile Name	Description											
<b>G8:MD-IWF</b>	HP BL460 Gen8/9 Running MAP-IWF functions											

**Procedure 21: Configure the MP Server Group(s) and Profile(s)**

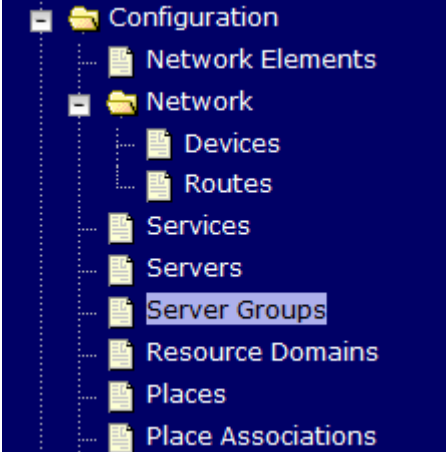

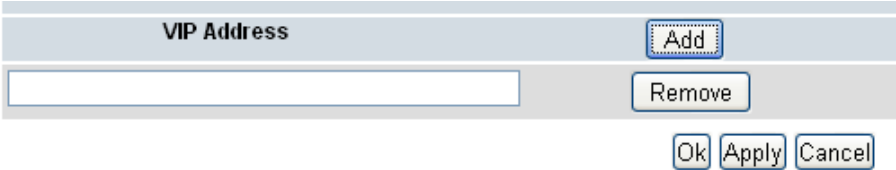

<p>12</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP GUI: Login</b></p>	<p>If not already done, establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server.</p> <p>Open the web browser and enter a URL of:  <div style="border: 1px solid black; padding: 2px; width: fit-content;"> <a href="http://&lt;Primary_NOAM_VIP_IP_Address&gt;">http://&lt;Primary_NOAM_VIP_IP_Address&gt;</a> </div> </p> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div style="text-align: center;">  </div>
<p>13</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP GUI: Restart MP blade servers</b></p>	<p>Navigate to <b>Main menu-&gt;Status &amp; Manage-&gt;Server</b></p> <div style="text-align: center;">  </div> <p>For each MP server:</p> <ul style="list-style-type: none"> <li>• Select the MP server.</li> <li>• Select the <b>Restart</b> button.</li> <li>• Answer <b>OK</b> to the confirmation popup. Wait for the message which tells you that the restart was successful.</li> </ul> <div style="text-align: center;">  </div> <p><b>Note:</b> POLICY AND CHARGING DRA INSTALLATIONS: You may continue to see alarms related to ComAgent until you complete PCA installatio</p>

**Procedure 22: Add VIP for Signaling networks (Active/Standby Configurations Only)**

<p><b>S T E P #</b></p>	<p>This procedure will provide the steps to configure the VIPs for the signaling networks on the MPs.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
<p>1 <input type="checkbox"/></p>	<p><b>NOAM VIP GUI: Login</b></p> <p>If not already done, establish a GUI session on the NOAM server the VIP IP address of the NOAM server.</p> <p>Open the web browser and enter a URL of:  <div style="border: 1px solid black; padding: 2px; width: fit-content;">             http://&lt;Primary_NOAM_VIP_IP_Address&gt;         </div></p> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div style="text-align: center;">  </div>

**Procedure 22: Add VIP for Signaling networks (Active/Standby Configurations Only)**

<p>2</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Edit the MP Server Group and add VIPs          (ONLY FOR 1+1)</p>	<p><b>IF YOUR MPs ARE IN A DSR MULTI-ACTIVE CLUSTER SERVER GROUP CONFIGURATION (N+0), THEN SKIP THIS STEP</b></p> <p>From <b>Main Menu-&gt;Configuration-&gt;Server Groups</b></p>  <p>Select the MP server group, and then select <b>Edit</b></p> <p><input type="button" value="Insert"/> <input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Report"/></p> <p>Click on <b>Add</b> to add the VIP for XSI1          Enter the VIP of int-XSI-1 and click on <b>Apply</b></p> <p>Click on <b>Add</b> again to add the VIP for XSI2          Enter the VIP of int-XSI-2 and click on <b>Apply</b></p> <p>If more Signaling networks exist, add their corresponding VIP addresses.</p> <p>Finally Click on <b>OK</b>.</p> 
--	---	--

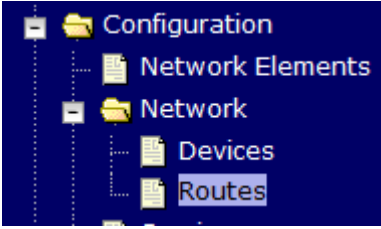

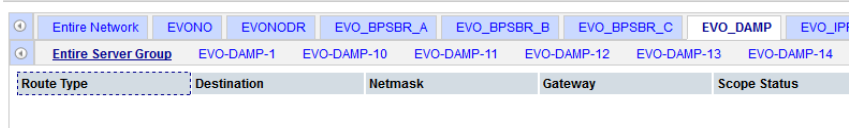

## 4.4.2 Configure Signaling Network Routes

### Procedure 23: Configure the Signaling Network Routes

<b>S T E P #</b>	<p>This procedure will provide the steps to configure Signaling Network Routes on MP-type servers (DA-MP, IPFE,SS7-MP, etc.)</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
1 <input type="checkbox"/>	<p><b>NOAM VIP GUI: Login</b></p> <p>If not already done, establish a GUI session on the NOAM server the VIP IP address of the NOAM server.</p> <p>Open the web browser and enter a URL of: <input type="text" value="http://&lt;Primary_NOAM_VIP_IP_Address&gt;"/></p> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div data-bbox="451 835 1252 1402" style="text-align: center;"></div>

**Procedure 23: Configure the Signaling Network Routes**

<p>2</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Navigate to Routes Configuration Screen</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Network -&gt; Routes</b></p>  <p>Select the MP Server group tab on the top row, then verify the <b>Entire Server Group</b> link is selected, if not, select the link.</p> 																		
<p>3</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Add Route</p>	<p>Click on <b>Insert</b> at the bottom of the screen to add additional routes.</p> 																		
<p>4</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Add Default Route for MPs Going Through Signaling Network Gateway (Optional)</p>	<p><b>OPTIONAL</b> - Only execute this step if you performed <b>Procedure 19: Step 10:</b> which removed the XML gateway default route on MPs</p> <p>If your MP servers no longer have a default route, then you can now insert a default route here which uses one of the signaling network gateways.</p> <table border="1" data-bbox="456 1119 1354 1356"> <thead> <tr> <th>Field</th> <th>Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Route Type</td> <td><input checked="" type="radio"/> Net <input type="radio"/> Default <input type="radio"/> Host</td> <td>Select a route type.</td> </tr> <tr> <td>Device</td> <td>bond0.5</td> <td>* Enter the network device name through which traffic is being routed. This must be an existing device on the server.</td> </tr> <tr> <td>Destination</td> <td>10.250.52.0</td> <td>A valid netmask for the destination network or host. Field	Value	Description																		
Route Type	<input checked="" type="radio"/> Net <input type="radio"/> Default <input type="radio"/> Host	Select a route type.																		
Device	bond0.5	* Enter the network device name through which traffic is being routed. This must be an existing device on the server.																		
Destination	10.250.52.0	A valid netmask for the destination network or host. Must be in dotted quad format																		
Netmask	255.255.255.0	A valid netmask for the destination network or host. Must be in dotted quad format																		
Gateway IP	10.240.70.99	* A valid IP address of the gateway. Must be in dotted quad format																		

## Procedure 23: Configure the Signaling Network Routes

<p>5</p> <p>□</p> <p><b>NOAM VIP GUI: Add Network Routes for Diameter Peers</b></p>	<p>Use this step to add IP and/or IPv6 routes to <i>diameter</i> peer destination networks. The goal here is to ensure that diameter traffic uses the gateway(s) on the signaling networks.</p> <table border="1"> <thead> <tr> <th>Field</th> <th>Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Route Type</td> <td> <input checked="" type="radio"/> Net  <input type="radio"/> Default  <input type="radio"/> Host                 </td> <td>Select a route type.</td> </tr> <tr> <td>Device</td> <td>bond0.5</td> <td>Enter the network device name through which traffic is being routed. This must be an existing device on the server.</td> </tr> <tr> <td>Destination</td> <td>10.250.46.0</td> <td>A valid netmask for the destination network or host. Must be in dotted quad format</td> </tr> <tr> <td>Netmask</td> <td>255.255.255.0</td> <td>A valid netmask for the destination network or host. Must be in dotted quad format</td> </tr> <tr> <td>Gateway IP</td> <td>10.240.70.99</td> <td>A valid IP address of the gateway. Must be in dotted quad format</td> </tr> </tbody> </table> <p style="text-align: right;"> <input type="button" value="OK"/> <input type="button" value="Apply"/> <input type="button" value="Cancel"/> </p> <p><b>Route Type: Net, Default, Host</b></p> <p><b>Device:</b> Select the appropriate signaling interface that will be used to connect to that network</p> <p><b>Destination:</b> Enter the Network ID of Network to which the peer node is connected to.</p> <p><b>Netmask:</b> Enter the corresponding Netmask (if configuring Net or Default routes)</p> <p><b>Gateway IP:</b> Enter the Int-XSI switch VIP of the chosen Network for L3 deployments (either of int-XSI-1 or of int-XSI2). Or the IP of the customer gateway for L2 deployments.</p> <p>If you have more routes to enter, Press <b>Apply</b> to save the current route entry and repeat this step to enter more routes</p> <p>If you are finished entering routes, Press <b>OK</b> to save the latest route and leave this screen.</p> <p><b>Layer 3 Configurations Aggregation Switch Configurations Only:</b> Routes should be configured on the aggregation switches so that the destination networks configured in this step are reachable. This can be done by running the following <b>netconfig</b> commands from the site's local PMAC (examples shown -- actual values will vary) :</p> <p>Add routes (IPv4 &amp; IPv6):</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo netConfig -device=switch1A addRoute network=10.10.10.0 mask=25.255.255.0 nexthop=10.50.76.81 \$ sudo netConfig -device=switch1A addRoute network6=2001::/64 nexthop=fd0f::1</pre> <p>Delete routes (IPv4 &amp; IPv6):</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo netConfig -device=switch1A deleteRoute network=10.10.10.0 mask=25.255.255.0 nexthop=10.50.76.81 \$ sudo netConfig -device=switch1A deleteRoute network6=2001::/64 nexthop=fd0f::1</pre>	Field	Value	Description	Route Type	<input checked="" type="radio"/> Net <input type="radio"/> Default <input type="radio"/> Host	Select a route type.	Device	bond0.5	Enter the network device name through which traffic is being routed. This must be an existing device on the server.	Destination	10.250.46.0	A valid netmask for the destination network or host. Must be in dotted quad format	Netmask	255.255.255.0	A valid netmask for the destination network or host. Must be in dotted quad format	Gateway IP	10.240.70.99	A valid IP address of the gateway. Must be in dotted quad format
Field	Value	Description																	
Route Type	<input checked="" type="radio"/> Net <input type="radio"/> Default <input type="radio"/> Host	Select a route type.																	
Device	bond0.5	Enter the network device name through which traffic is being routed. This must be an existing device on the server.																	
Destination	10.250.46.0	A valid netmask for the destination network or host. Must be in dotted quad format																	
Netmask	255.255.255.0	A valid netmask for the destination network or host. Must be in dotted quad format																	
Gateway IP	10.240.70.99	A valid IP address of the gateway. Must be in dotted quad format																	

### Procedure 23: Configure the Signaling Network Routes

6 <input type="checkbox"/>	<b>Local PMAC:</b> Perform a netConfig Backup	After the routes are added to the aggregation switches via netconfig, a <b>netconfig backup</b> should be taken so that the new routes are retained in the backup.  Execute the following command:  <pre>\$ netConfig backupConfiguration --device=&lt;Switch Hostname service=&lt;ssh_Service&gt; filename=&lt;Backup Filename&gt;</pre>
7 <input type="checkbox"/>	<b>NOAM VIP GUI:</b> Repeat for all other MP server groups.	The routes entered in this procedure should now be configured on all MPs in the server group for the first MP you selected.  If you have additional MP server groups, repeat from <b>step 2</b> , but this time, select an MP from the next MP server group.  Continue until you have covered all MP server groups. This includes DAMP, IPFE, and SS7MP servers.  <b>Note:</b> IPFE and DAMP servers must have the same routes configured.

### 4.4.3 Configure DSCP (Optional)

#### Procedure 24: Configure DSCP Values for Outgoing Traffic

<b>S T E P #</b>	<p>This procedure will provide the steps to configure the DSCP values for outgoing packets on servers. DSCP values can be applied to an outbound interface as a whole, or to all outbound traffic using a specific TCP or SCTP source port. This step is optional and should only be executed if has been decided that your network will utilize packet DSCP markings for Quality-of-Service purposes.</p> <p><b>Note:</b> If your enclosure switches already have DSCP configuration for the signaling VLANs, then the switch configuration will override the settings in this procedure. It is strongly recommended, however, that you configure DSCP here at the application level where you have the most knowledge about outgoing traffic patterns and qualities.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
1 <input type="checkbox"/>	<p><b>NOAM VIP GUI: Login</b></p> <p>If not already done, establish a GUI session on the NOAM server the VIP IP address of the NOAM server.</p> <p>Open the web browser and enter a URL of:</p> <div data-bbox="456 898 1218 936" style="border: 1px solid black; padding: 2px;"><p><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></p></div> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div data-bbox="495 1050 1258 1606" style="text-align: center;"></div>

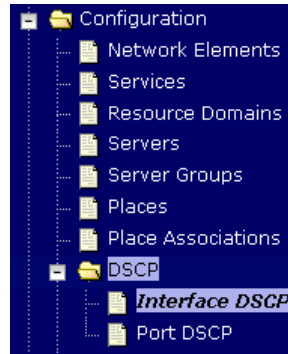

## Procedure 24: Configure DSCP Values for Outgoing Traffic

2

**NOAM VIP**  
**GUI:** Option 1:  
Configure  
Interface  
DSCP

**Note:** The values displayed in the screenshots are for demonstration purposes only. The exact DSCP values for your site will vary.

Navigate to **Main Menu -> Configuration -> DSCP -> Interface DSCP**

Select the server you wish to configure from the list of servers on the 2<sup>nd</sup> line. (You can view all servers with **Entire Network** selected; or limit yourself to a particular server group by clicking on that server group name's tab).

Click **Insert**

Main Menu: Configuration -> DSCP -> Interface DSCP

Select the network interface from the drop down box, then enter the *DSCP value* you wish to have applied to packets leaving this interface.

Main Menu: [Insertdscpbyintf]

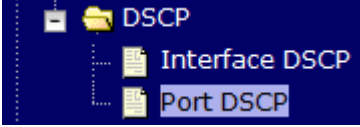

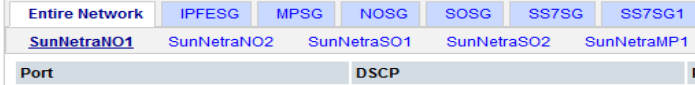

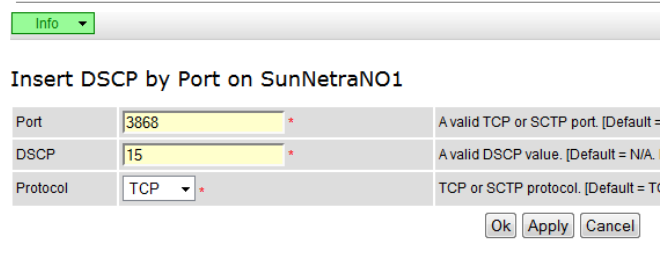

Insert DSCP by Interface on FZTEST-MP1

Click **OK** if there are no more interfaces on this server to configure, or **Apply** to finish this interface and continue on with more interfaces by selecting them from the drop down and entering their *DSCP values*.

**Procedure 24: Configure DSCP Values for Outgoing Traffic**

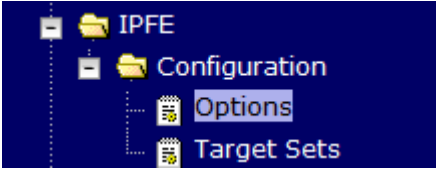

<p>3</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Option 2:          Configure Port          DSCP</p>	<p><b>Note:</b> The values displayed in the screenshots are for demonstration purposes only. The exact DSCP values for your site will vary.</p> <p>Navigate to <b>Main Menu -&gt; Configuration -&gt; DSCP -&gt; Port DSCP</b></p>  <p>Select the server you wish to configure from the list of servers on the 2<sup>nd</sup> line. (You can view all servers with <b>Entire Network</b> selected; or limit yourself to a particular server group by clicking on that server group name's tab).</p> <p>Click <b>Insert</b></p>  <p><b>Main Menu: Configuration -&gt; DSCP -&gt; Port DSCP</b></p>  <p>Enter the source port, DSCP value, and select the transport protocol.</p> <p><b>Main Menu: Configuration -&gt; DSCP -&gt; Port DSCP [Insert]</b></p>  <p>Click <b>OK</b> if there are no more port DSCPs on this server to configure, or <b>Apply</b> to finish this port entry and continue entering more port <i>DSCP mappings</i>.</p>
<p>4</p> <p><input type="checkbox"/></p>	<p><b>NOAM VIP</b>  <b>GUI:</b> Repeat          for additional          servers.</p>	<p>Repeat <b>Steps 2-3</b> for all remaining servers.</p>

## 4.4.4 Configure IP Front End Servers (Optional)

### Procedure 25: IP Front End (IPFE) Configuration

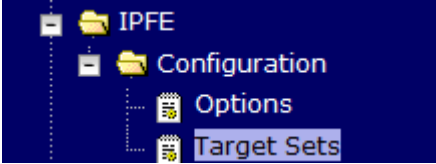

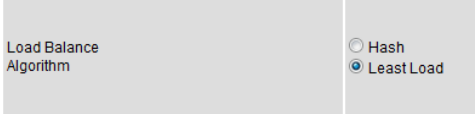

<b>S T E P #</b>	<p>This procedure will provide the steps to configure IP Front End (IPFE), and optimize performance.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1  <input type="checkbox"/>	<b>SOAM VIP GUI: Login</b>	<p>Establish a GUI session on the SOAM server the VIP IP address of the SOAM server.</p> <p>Open the web browser and enter a URL of:  <input style="border: 1px solid black; padding: 2px;" type="text" value="http://&lt;Primary_SOAM_VIP_IP_Address&gt;"/></p> <p>Login to the SOAM GUI as the <i>guiadmin</i> user:</p> <div style="text-align: center;">  </div>

## Procedure 25: IP Front End (IPFE) Configuration

<p>2</p> <p>□</p> <p><b>SOAM VIP GUI:</b> Configuration of replication IPFE association data.</p>	<p>Select <b>Main Menu -&gt; IPFE -&gt; Configuration -&gt; Options</b></p>  <p>Enter the IP address of the 1<sup>st</sup> IPFE in the IPFE-A1 IP Address field and the IP address of the 2<sup>nd</sup> IPFE in the IPFE-A2 IP Address field</p> <p>If applicable, enter the address of the 3<sup>rd</sup> and 4<sup>th</sup> IPFE servers in IPFE-B1 IP Address and IPFE-B2 IP Address fields.</p> <table border="1"> <thead> <tr> <th>Variable</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td colspan="2"><b>Inter-IPFE Synchronization</b></td> </tr> <tr> <td>IPFE-A1 IP Address</td> <td>10.240.79.103 - Viper-IPFE1</td> </tr> <tr> <td>IPFE-A2 IP Address</td> <td>10.240.79.104 - Viper-IPFE2</td> </tr> <tr> <td>IPFE-B1 IP Address</td> <td>&lt;unset&gt;</td> </tr> <tr> <td>IPFE-B2 IP Address</td> <td>&lt;unset&gt;</td> </tr> </tbody> </table> <p><b>Note:</b> It is recommended that the address reside on the IMI (Internal Management Interface) network.</p> <p><b>Note:</b> IPFE-A1 and IPFE-A2 must have connectivity between each other via these addresses. The same applies with IPFE-B1 and IPFE-B2.</p> <p><b>Note:</b> In order for the IPFE to provide Least Load distribution, Monitoring Protocol must be set to <b>Heartbeat</b> so that the application servers can provide the load information the IPFE uses to select the <b>least-loaded</b> server for connections.</p> <table border="1"> <tr> <td>Monitoring Protocol</td> <td>Heartbeat</td> </tr> </table> <p><b>Note:</b> The Least Load option is the default setting, and is the recommended option with exception of unique backward compatibility scenarios.</p> <p>If Hash load balance algorithm is desired, select None for Monitoring Protocol:</p> <table border="1"> <tr> <td>Monitoring Protocol</td> <td>None</td> </tr> </table> <p>Click <b>Ok</b></p>	Variable	Value	<b>Inter-IPFE Synchronization</b>		IPFE-A1 IP Address	10.240.79.103 - Viper-IPFE1	IPFE-A2 IP Address	10.240.79.104 - Viper-IPFE2	IPFE-B1 IP Address	<unset>	IPFE-B2 IP Address	<unset>	Monitoring Protocol	Heartbeat	Monitoring Protocol	None
Variable	Value																
<b>Inter-IPFE Synchronization</b>																	
IPFE-A1 IP Address	10.240.79.103 - Viper-IPFE1																
IPFE-A2 IP Address	10.240.79.104 - Viper-IPFE2																
IPFE-B1 IP Address	<unset>																
IPFE-B2 IP Address	<unset>																
Monitoring Protocol	Heartbeat																
Monitoring Protocol	None																

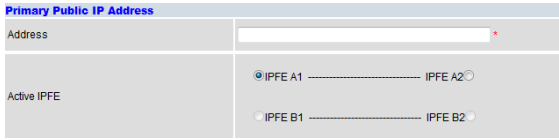

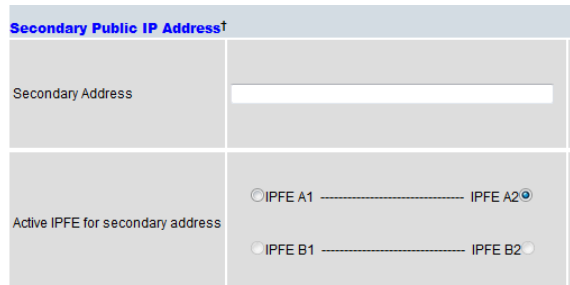

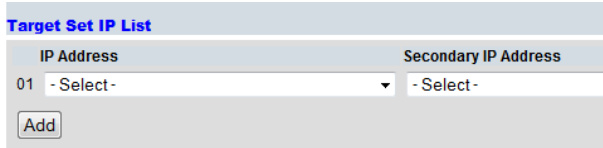

**Procedure 25: IP Front End (IPFE) Configuration**

<p>3</p> <p><input type="checkbox"/></p>	<p><b>SOAM VIP GUI:</b> Configuration of IPFE Target sets-Part 1 (Insert Target Set)</p>	<p>Select <b>Main Menu -&gt; IPFE -&gt; Configuration -&gt; Target Sets</b></p>  <p>Select either <b>Insert IPv4</b> or <b>Insert IPv6</b> button, depending on the IP version of the target set you plan to use.</p> 
<p>4</p> <p><input type="checkbox"/></p>	<p><b>SOAM VIP GUI:</b> Configuration of IPFE Target sets-Part 2 (Target Set Configuration)</p>	<p>Continued from the previous step, the following are configurable:</p> <p><b>Protocols:</b> protocols the target set will support.</p>  <p><b>Delete Age:</b> Specifies when the IPFE should remove its association data for a connection. Any packets presenting a source IP address/port combination that had been previously stored as association state but have been idle longer than the <b>Delete Age</b> configuration will be treated as a new connection and will not automatically go to the same application server.</p>  <p><b>Load Balance Algorithm:</b> <i>Hash</i> or <i>Least Load</i> options</p>  <p>Establish an SSH session to the SOAM VIP, login as <b>admusr</b>.</p> <p>Execute the following command (advise cut and paste to prevent errors):</p> <pre>\$ sudo iset -fvalue="50" DpiOption where "name='MpEngIngressMpsPercentile'" === changed 1 records ===</pre>

**Procedure 25: IP Front End (IPFE) Configuration**

<p>5</p> <p><input type="checkbox"/></p>	<p><b>SOAM VIP GUI:</b> Configuration of IPFE Target sets-Part 3 (Target Set Configuration)</p>	<p><b>(Optional):</b> If you have selected the <b>Least Load algorithm</b>, you may configure the following fields to adjust the algorithm's behavior:</p> <p><b>MPS Factor</b> – Messages per Second (MPS) is one component of the least load algorithm. This field allows you to set it from 0 (not used in load calculations) to 100 (the only component used for load calculations). It is recommended that IPFE connections have Reserved Ingress MPS set to something other than the default, which is 0.</p> <table border="1" data-bbox="456 499 889 625"> <tr> <td>MPS Factor</td> <td>50 *</td> </tr> <tr> <td>Connection Count Factor</td> <td>50 *</td> </tr> </table> <p>To configure <b>Reserved Ingress MPS</b>, go to <b>Main Menu -&gt; Diameter -&gt; Configuration -&gt; Configuration Sets -&gt; Capacity Configuration Sets</b>. If you choose not to use <b>Reserved Ingress MPS</b>, set <b>MPS Factor</b> to 0 and <b>Connection Count Factor</b>, described below, to 100.</p> <p><b>Connection Count Factor</b> – This is the other component of the <b>least load</b> algorithm. This field allows you to set it from 0 (not used in load calculations) to 100 (the only component used for load calculations). Increase this setting if connection storms (the arrival of many connections at a very rapid rate) are a concern.</p> <p><b>Allowed Deviation</b> - Percentage within which two application server's load calculation results are considered to be equal. If very short, intense connection bursts are expected to occur, increase the value to smooth out the distribution.</p> <table border="1" data-bbox="456 1056 889 1150"> <tr> <td>Allowed Deviation</td> <td>5 *</td> </tr> </table>	MPS Factor	50 *	Connection Count Factor	50 *	Allowed Deviation	5 *
MPS Factor	50 *							
Connection Count Factor	50 *							
Allowed Deviation	5 *							

## Procedure 25: IP Front End (IPFE) Configuration

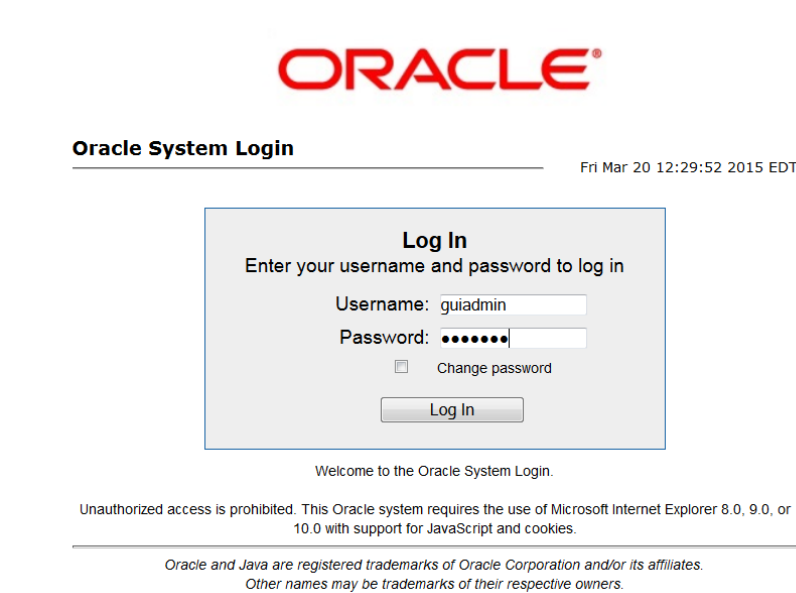

<p>6</p> <p><input type="checkbox"/></p> <p><b>SOAM VIP GUI:</b> Configuration of IPFE Target sets-Part 4 (Target Set Configuration)</p>	<p><b>Primary Public IP Address:</b> IP address for the target set</p>  <p><b>Note:</b> This address must reside on the XSI (External Signaling Interface) network because it will be used by the application clients to reach the application servers. This address <b>MUST NOT</b> be a real interface address (that is, must not be associated with a network interface card).</p> <p>Active IPFE: IPFE to handle the traffic for the target set address.</p> <p><b>Secondary Public IP Address:</b> If this target set supports either multi-homed SCTP or Both TCP and SCTP, provide a Secondary IP Address.</p>  <p><b>Note:</b> A secondary address is required to support SCTP multi-homing. A secondary address can support TCP, but the TCP connections will not be multi-homed.</p> <p><b>Note:</b> If SCTP multi-homing is to be supported, select the mate IPFE of the Active IPFE for the Active IPFE for secondary address to ensure that SCTP failover functions as designed.</p> <p><b>Target Set IP List:</b> Select an IP address, a secondary IP address if supporting SCTP multi-homing, a description, and a weight for the application server.</p>  <p><b>Note:</b> The IP address must be on the XSI network since they must be on the same network as the target set address. This address must also match the IP version of the target set address (IPv4 or IPv6). If the Secondary Public IP Address is configured, it must reside on the same application server as the first IP address.</p> <p><b>Note:</b> If all application servers have an equal weight (e.g., 100, which is the default), they have an equal chance of being selected. Application servers with larger weights have a greater chance of being selected.</p> <p>Click the <b>Add</b> button to add more application servers (Up to 16)</p> <p>Click the <b>Apply</b> button.</p> <p><input type="button" value="Ok"/> <input type="button" value="Apply"/> <input type="button" value="Cancel"/></p>
--	--

### Procedure 25: IP Front End (IPFE) Configuration

7 <input type="checkbox"/>	<b>SOAM VIP</b> <b>GUI:</b> Repeat for additional Configuration of IPFE Target sets.	Repeat for <b>steps 3-6</b> for each target set (Up to 16). At least one target set must be configured.
-------------------------------	---	--

## 4.5 SNMP Configuration (Optional)

### Procedure 26: Configure SNMP Trap Receiver(s)

<b>S T E P #</b>	<p>This procedure will provide the steps to configure forwarding of SNMP Traps from each individual server.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
1 <input type="checkbox"/>	<p><b>NOAM VIP GUI: Login</b></p> <p>If not already done, establish a GUI session on the NOAM server the VIP IP address of the NOAM server.</p> <p>Open the web browser and enter a URL of:</p> <div data-bbox="418 688 1177 730" style="border: 1px solid black; padding: 2px;"><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></div> <p>Login to the NOAM GUI as the <i>guiadmin</i> user:</p> <div data-bbox="418 808 1209 1396" style="text-align: center;"></div>

**Procedure 26: Configure SNMP Trap Receiver(s)**

2 **NOAM VIP**  
 **GUI:**  
 Configure System-Wide SNMP Trap Receiver(s)

Navigate to **Main Menu -> Administration -> Remote Servers -> SNMP Trapping**

Verify that **Traps Enabled** is checked:

Traps Enabled	<input checked="" type="checkbox"/> Manager 1
	<input checked="" type="checkbox"/> Manager 2
	<input checked="" type="checkbox"/> Manager 3
	<input checked="" type="checkbox"/> Manager 4
	<input checked="" type="checkbox"/> Manager 5

Fill in the IP address or hostname of the Network Management Station (NMS) you wish to forward traps to. This IP should be reachable from the NOAMP's "XMI" network.

Continue to fill in additional secondary, tertiary, etc. Manager IPs in the corresponding slots if desired.

Variable	Value
Manager 1	<input type="text" value="10.10.55.88"/>

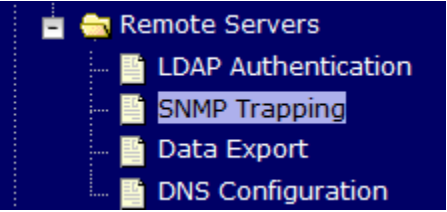

Enter the **SNMP Community Name**:

SNMPv2c Read-Only Community Name	<input type="text" value="snmppublic"/>
SNMPv2c Read-Write Community Name	<input type="text" value="snmppublic"/>

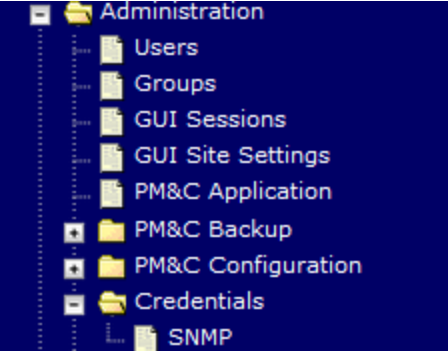

Leave all other fields at their default values.

Press **OK**

**Procedure 26: Configure SNMP Trap Receiver(s)**

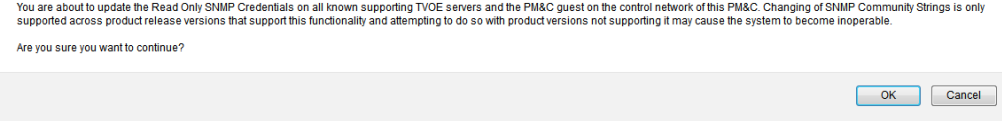

<p>3</p> <p><input type="checkbox"/></p>	<p><b>NOAMP VIP:</b> Enable Traps from Individual Servers (Optional)</p>	<p><b>Note:</b> By default SNMP traps from MPs are aggregated and then displayed at the active NOAMP. If instead, you wish for every server to send its own traps directly to the NMS, then execute this procedure.</p> <p>This procedure requires that all servers, including MPs, have an XML interface on which the customer SNMP Target server (NMS) is reachable.</p> <p>Navigate to <b>Main Menu -&gt; Administration -&gt; Remote Servers -&gt; SNMP Trapping</b></p>  <p>Make sure the checkbox next to <b>Enabled</b> is checked, if not, check it as shown below</p> <table border="1" data-bbox="418 890 1386 1045"> <tr> <td></td> <td></td> <td>[Default: enabled.]</td> </tr> <tr> <td>Traps from Individual Servers</td> <td><input checked="" type="checkbox"/> Enabled</td> <td>Enable or disable SNMP traps from in sent from individual servers, otherwis OAM&amp;P server. ## Procedure 26: Configure SNMP Trap Receiver(s)

5 <input type="checkbox"/>	<b>PMAC GUI:</b> Update the TVOE Host SNMP Community String	<p>Navigate to <b>Main Menu -&gt; Administration -&gt; Credentials -&gt; SNMP</b></p>  <p>Select the <b>Read Only</b> or <b>ReadWrite</b> button depending on which SNMP community string is to be updated.</p> <div data-bbox="418 821 1214 1325"><p><b>SNMP Community String Update</b></p><hr/><p>Tasks ▾</p><p>Select <b>Read Only</b> or <b>Read/Write</b> Community String: <input checked="" type="radio"/> Read Only <input type="radio"/> Read/Write</p><p>Check this box if updating servers using the <b>Site Specific</b> SNMP Community String: <input type="checkbox"/> Use Site Specific <b>Read Only</b> Community String: <i>TPDverejny</i></p><p>Community String: <input type="text"/></p><p>Note: The Community String value can be 1 to 31 uppercase, lowercase, or numeric characters.</p><hr/><p><input type="button" value="Update Servers"/></p></div> <p><b>Note:</b> If this the first time the SNMP Community Strings has been updated for this PMAC, perform the following:</p> <ol style="list-style-type: none"><li>1. Leave the Use Site Specific checkbox (<i>TPDverejny</i>) unchecked.</li><li>2. Enter the community string configured in step 2 of this procedure.</li></ol>
-------------------------------	--	--

## Procedure 26: Configure SNMP Trap Receiver(s)

6 <input type="checkbox"/>	<b>PMAC GUI:</b> Update the TVOE Host SNMP Community String	<p>Continued from the previous step, enter the new Community String into the Community string textbox.</p> <p>Click the <b>Update Servers</b> button</p>  <p>The following warning will be displayed:</p>  <p>Select <b>OK</b></p> <p><b>Note:</b> When this operation is initiated, all supporting TVOE hosting servers and the PMAC guest on the PMAC control network will be updated. All those servers that match the existing Site Specific Community String will not be updated again until the string name is changed.</p>
-------------------------------	--	--

## 4.6 IDIH Installation and Configuration (Optional)

The following procedures outline the steps needed to install and configure IDIH.

**Note:** If there already exists an IDIH, and this is an IDIH re-installation; execute **Appendix L: IDIH External Drive Removal** before proceeding.

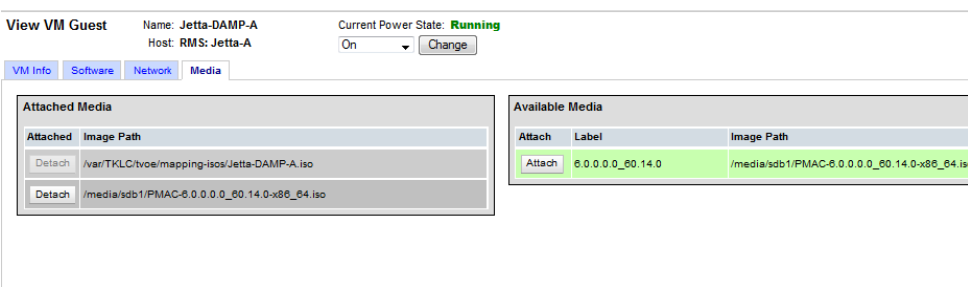

### 4.6.1 IDIH Installation

The installation procedure uses the “fast deployment” utility (fdconfig) bundled with the PMAC server to install and configure IDIH.

#### Procedure 27: IDIH Configuration

<b>S T E P #</b>	<p>This procedure will provide the steps to install and configure IDIH.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<p><b>TVOE Host:</b> Load Application ISO</p>	<p>Add the Application ISO images (<b>Mediation, application, and Oracle</b>) to the PM&amp;C, this can be done in one of three ways:</p> <ol style="list-style-type: none"> <li>1. Insert the Application CD required by the application into the removable media drive.</li> <li>2. Attach the USB device containing the ISO image to a USB port.</li> <li>3. Copy the Application iso file to the PM&amp;C server into the <b>/var/TKLC/smac/image/isoimages/home/smacftpusr/</b> directory as pmacftpusr user:</li> </ol> <p>cd into the directory where your ISO image is located on the <b>TVOE Host</b> (<i>not on the PM&amp;C server</i>)</p> <p>Using sftp, connect to the PM&amp;C server</p> <pre>\$ sftp pmacftpusr@&lt;pmac_management_network_ip&gt; \$ put &lt;image&gt;.iso</pre> <p>After the image transfer is 100% complete, close the connection:</p> <pre>\$ quit</pre> <p><b>Note:</b> If there is insufficient disk space with the PMAC repository as pmacftpuser, please follow section “Configure PM&amp;C Application Guest isoimages Virtual Disk” of [12] to increase it.</p>

## Procedure 27: IDIH Configuration

<p>2</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Login</p>	<p>Open web browser and enter:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>http://&lt;PMAC Mgmt Network IP&gt;</b></p> </div> <p>Login as <i>pmacadmin</i> user:</p>  <p>The screenshot shows the Oracle System Login interface. At the top, it says "ORACLE" in red. Below that, "Oracle System Login" and the date "Tue Mar 17 13:49:25 2015 UTC". A central box titled "Log In" contains the text "Enter your username and password to log in". There are input fields for "Username: pmadmin" and "Password: ●●●●●●". A checkbox for "Change password" and a "Log In" button are also present. At the bottom, there is a warning: "Unauthorized access is prohibited. This Oracle system requires the use of Microsoft Internet Explorer 8.0, 9.0, or 10.0 with support for JavaScript and cookies." and copyright information.</p>												
<p>3</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Attach the software Image to the PMAC Guest</p>	<p>If in Step 1 the ISO image was transferred directly to the PM&amp;C guest via sftp, skip the rest of this step and continue with step 4. If the image is on a CD or USB device, continue with this step.</p> <p>In the PM&amp;C GUI, navigate to <b>Main Menu -&gt; VM Management</b>. In the "<b>VM Entities</b>" list, select the PM&amp;C guest. On the resulting "<b>View VM Guest</b>" page, select the <b>Media</b> tab.</p> <p>Under the <b>Media</b> tab, find the ISO image in the "<b>Available Media</b>" list, and click its <b>Attach</b> button. After a pause, the image will appear in the "<b>Attached Media</b>" list.</p>  <p>The screenshot shows the "View VM Guest" interface for a VM named "Jetta-DAMP-A" with host "RMS: Jetta-A" and power state "Running". The "Media" tab is selected. It displays two tables: "Attached Media" and "Available Media".</p> <table border="1" data-bbox="479 1333 958 1459"> <thead> <tr> <th>Attached</th> <th>Image Path</th> </tr> </thead> <tbody> <tr> <td>Detach</td> <td>/var/TKLC/tvoe/mapping-isos/Jetta-DAMP-A.iso</td> </tr> <tr> <td>Detach</td> <td>/media/sdb1/PMAC-6.0.0.0_60.14.0-x86_64.iso</td> </tr> </tbody> </table> <table border="1" data-bbox="966 1333 1445 1459"> <thead> <tr> <th>Attach</th> <th>Label</th> <th>Image Path</th> </tr> </thead> <tbody> <tr> <td>Attach</td> <td>6.0.0.0_60.14.0</td> <td>/media/sdb1/PMAC-6.0.0.0_60.14.0-x86_64.iso</td> </tr> </tbody> </table>	Attached	Image Path	Detach	/var/TKLC/tvoe/mapping-isos/Jetta-DAMP-A.iso	Detach	/media/sdb1/PMAC-6.0.0.0_60.14.0-x86_64.iso	Attach	Label	Image Path	Attach	6.0.0.0_60.14.0	/media/sdb1/PMAC-6.0.0.0_60.14.0-x86_64.iso

Attach	6.0.0.0_60.14.0	/media/sdb1/PMAC-6.0.0.0_60.14.0-x86_64.iso												

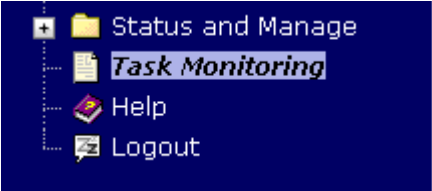

**Procedure 27: IDIH Configuration**

<p>4</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Add Application Image</p>	<p>Navigate to <b>Main Menu -&gt; Software -&gt; Manage Software Images</b></p> <p>Press <b>Add Image</b> button. Use the drop down to select the image.</p> <div data-bbox="500 373 987 415" style="border: 1px solid #ccc; padding: 5px; display: flex; justify-content: space-around;"> <span>Add Image</span> <span>Edit Image</span> <span>Delete Selected</span> </div> <p>If the image was supplied on a CD or a USB drive, it will appear as a virtual device ("<b>device://...</b>"). These devices are assigned in numerical order as CD and USB images become available on the Management Server. The first virtual device is reserved for internal use by TVOE and PMAC; therefore, the iso image of interest is normally present on the second device, "<b>device://dev/sr1</b>". If one or more CD or USB-based images were already present on the Management Server before you started this procedure, choose a correspondingly higher device number.</p> <p>If in Step 1 the image was transferred to PMAC via sftp it will appear in the list as a local file "<b>/var/TKLC/...</b>".</p> <hr/> <p>Images may be added from any of these sources:</p> <ul style="list-style-type: none"> <li>• Oracle-provided media in the PM&amp;C host's CD/DVD drive (Refer to Note)</li> <li>• USB media attached to the PM&amp;C's host (Refer to Note)</li> <li>• External mounts. Prefix the directory with "extfile://".</li> <li>• These local search paths:             <ul style="list-style-type: none"> <li>• /var/TKLC/upgrade/*.iso</li> <li>• /var/TKLC/smac/image/isoimages/home/smacftpusr/*.iso</li> </ul> </li> </ul> <p>Note: CD and USB images mounted on PM&amp;C's VM host must first be made accessible to the PM&amp;C</p> <p>Path: <input type="text" value="/var/TKLC/smac/image/isoimages/home/smacftpusr/mediation-7.2.0.0.0"/></p> <p>Description: <input type="text"/></p> <hr/> <div data-bbox="477 1297 623 1327" style="border: 1px solid #ccc; padding: 2px; display: inline-block;">Add New Image</div> <p>Select the appropriate path and Press <b>Add New Image</b> button.</p> <p>You may check the progress using the <b>Task Monitoring</b> link. Observe the green bar indicating success.</p> <p>Once the green bar is displayed, remove the DSR application Media from the optical drive of the management server.</p>
<p>5</p> <p><input type="checkbox"/></p>	<p><b>PMAC:</b> Establish Terminal Session</p>	<p>Establish an SSH session to the PMAC. Login as <b>admusr</b>.</p>

## Procedure 27: IDIH Configuration

<p>6</p> <p><input type="checkbox"/></p>	<p><b>PMAC:</b> Copy the <code>fdc.cfg</code> file to the <code>guest-dropin</code> Directory</p>	<p>Copy the <code>fdc.cfg</code> file to the <code>pmac guest-dropin</code> directory.</p> <p>Execute the following command:</p> <pre style="background-color: #f0f0f0; padding: 5px;">\$ sudo cp /usr/TKLC/smac/html/TPD/mediation-*/fdc.cfg /var/TKLC/smac/guest-dropin</pre>
<p>7</p> <p><input type="checkbox"/></p>	<p><b>PMAC:</b> Configure the <code>fdc.cfg</code> file</p>	<p>Configure the <code>fdc.cfg</code> file. See <b>Appendix K: IDIH Fast Deployment Configuration</b> for a breakdown of the parameters.</p> <p>Update the software versions, hostnames, bond interfaces, network addresses, and network VLAN information for the TVOE host and IDIH guests that you are installing.</p>
<p>8</p> <p><input type="checkbox"/></p>	<p><b>PMAC:</b> Run the FDC creation script <code>idihFdc.sh</code></p>	<p>Rename the <code>fdc.cfg</code> file to your preference; also note that two files are generated by the <code>fdc</code> shell script. One is for the Installation procedure and the other file is used for the upgrade procedure. The upgrade FDC is named <code>upgrade</code>.</p> <p>Example: <code>hostname.cfg</code></p> <p>Note: The following hostname for guests has been reserved for internal use. Please try to avoid them:</p> <ul style="list-style-type: none"> <li>• oracle</li> <li>• mediation</li> <li>• appserver</li> </ul> <p>Here are the suggested hostname for guests:</p> <ul style="list-style-type: none"> <li>• <code>&lt;server hostname&gt;-ora</code> example, <code>thunderbolt-ora</code></li> <li>• <code>&lt;server hostname&gt;-med</code> example, <code>thunderbolt-med</code></li> <li>• <code>&lt;server hostname&gt;-app</code> example, <code>thunderbolt-app</code></li> </ul> <p>Run the FDC creation script <b><code>fdc.sh</code></b>.</p> <p>Execute the following commands:</p> <pre style="background-color: #f0f0f0; padding: 5px;">\$cd /var/TKLC/smac/guest-dropin/  \$sudo /usr/TKLC/smac/html/TPD/mediation-7.1.0.0.0_71.x.x-x86_64/fdc.sh fdc.cfg</pre> <p><b>Note:</b> Verify the values in the <code>xml</code> generated from the <code>fdc.sh</code> script match those of the values entered in <code>fdc.cfg</code>.</p>

**Procedure 27: IDIH Configuration**

<p>9 <input type="checkbox"/></p>	<p><b>TVOE Host:</b> Verify/Remove External Devices</p>	<p>Establish an SSH session to the TVOE Host which will host the IDIH, login as <b>admusr</b>.</p> <p>On the TVOE host which will host the IDIH, before IDIH has ever been installed, or, after the external disk removal procedure has been successfully completed:</p> <p>Execute the following command:</p> <pre style="border: 1px solid black; padding: 5px;">\$ ls /dev/sd*</pre> <p>Verify you only have sda* devices (e.g. sda1, sda2, etc...) Expected output:</p> <pre style="border: 1px solid black; padding: 5px;">\$ ls /dev/sd* /dev/sda /dev/sda1 /dev/sda2 /dev/sda3</pre> <p><b>Note:</b> If any other devices are listed (e.g. sdb*, sdc*, sdd*, etc...) Stop. You must first remove the extra device(s) in your system (e.g. sdb*, sdc*, sdd*, etc...). Reboot the tvoe and verify the extra device(s) are still removed (&gt; ls /dev/sd*)</p>
<p>1 0 <input type="checkbox"/></p>	<p><b>PMAC:</b> Run the fdconfig.</p>	<p>Run the fdconfig configuration.</p> <p>Execute the following commands:</p> <pre style="border: 1px solid black; padding: 5px;">\$ screen  \$sudo fdconfig config -file=hostname_xx-xx-xx.xml</pre> <p>Example: \$sudo fdconfig config --file=tvoe-ferbrms4_01-22-15.xml</p> <p><b>Note:</b> This is a long duration command. If the screen command was run prior to executing the fdconfig, perform a “screen -dr” to resume the screen session in the event of a terminal timeout etc.</p>
<p>1 1 <input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Monitor the Configuration</p>	<p>If not already done so, establish a GUI session on the PMAC server.</p> <p>Navigate to <b>Main Menu -&gt; Task Monitoring</b></p>  <p>Monitor the IDIH configuration to completion.</p>

## 4.6.2 Post IDIH Installation Configuration

The following sections should be executed after IDIH installation is complete.

After an IDIH fresh installation, reference data synchronization is initially disabled. Reference data synchronization requires some initial configuration before it is enabled.

The Trace Ref Data Adapter application must retrieve data from web services hosted by the DSR SOAM web server, and this requires the DSR SOAM virtual IP address (VIP) to be configured.

The DSR SOAM VIP will be unique at each customer site because it is defined based on the customer's network configuration. Therefore, there is no standard default value for the DSR SOAM VIP.

### Procedure 28: Configure DSR Reference Data Synchronization for IDIH

<b>S T E P #</b>	This procedure will provide the steps to configure DSR reference data syncornization for IDIH  Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.  If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b> , and ask for assistance.	
1 <input type="checkbox"/>	<b>IDIH Application Server: Login</b>	Establish an SSH session to the IDIH Application Server. Login as user <b>admusr</b> .  Issue the following commands to login as <b>tekelec</b> user.  <pre>\$ sudo su - tekelec</pre>

## Procedure 28: Configure DSR Reference Data Synchronization for IDIH

2  
□ IDIH  
Application  
Server:  
Execute  
Configuration  
Script.

Execute the following script:

```
$ apps/trda-config.sh
```

Example output:

```
corsair-app:/usr/TKLC/xIH apps/trda-config.sh
dos2unix: converting file /usr/TKLC/xIH/bea/user_projects/domains/tekelec/nsp/trace-refdata-ad
Please enter DSR oam server IP address: 10.240.39.175

**Procedure 29: IDIH Configuration: Configuring the SSO Domain**

<p>4</p> <p><input type="checkbox"/></p>	<p><b>IDIH Application Server GUI:</b> Login</p>	<p>Establish a GUI session on the IDIH app server:</p> <p>Login as the <i>idihadmin</i> user:</p> 
<p>5</p> <p><input type="checkbox"/></p>	<p><b>IDIH Application Server GUI:</b> Launch the OAM portal</p>	<p>Navigate to the OAM portal Icon to Launch the OAM web application:</p> 

## Procedure 29: IDIH Configuration: Configuring the SSO Domain

6 □	<b>IDIH Application Server GUI:</b> Configure the SSO Domain	<p>Navigate to <b>System -&gt; Single Sign on</b></p>  <p>Select the <b>SSO Parameters</b> Tab</p>  <p>Select the <b>Edit Value</b> Icon Button</p>  <p>Enter a value for the Domain Name.</p> <p><b>Note:</b> This should be the same domain name assigned in the DSR NOAM DNS Configuration (<b>Step 2</b>)</p> <p>Select the <b>Save</b> icon button.</p>  <p>Select the <b>Refresh</b> icon button to display data saved for the Remote Zone.</p> 
--------	---	---

**Procedure 29: IDIH Configuration: Configuring the SSO Domain**

7

**DIH Application Server GUI:**  
Configure the SSO Remote Zone

Navigate to **System -> Single Sign on**

Select the **SSO Zones** Tab

Select the **Add** icon button

Enter a value for field **Remote Name**

For field **X.509 Certificate**, paste the encoded certificate text from the clipboard that was previously copied from the DSR NOAM.

```
X.509 Certificate
-----BEGIN CERTIFICATE-----

If an IP address is used in place of a FQDN then IDIH SSO function [Default=n/a].
Field	Value	Description												
Max bandwidth	25 *	Maximum amount of bandwidth specified in Mbps that is used for s maximum, Node will discard TTRs so that the bandwidth required t the configured maximum. [Default = 25Mbps (26214400 bps); Range = 0-25]												
IDIH Host Name	- Select -	The Host Name of the peer IDIH server used for sending the mess: [Default = n/a].												
IDIH Visualization address	100.65.135.179	The IP address or FQDN of the remote IDIH server that visualizes th "Maintenance" screen). If an IP address is used in place of a FQDN then IDIH SSO function [Default=n/a].												

**Procedure 31: IDIH Configuration: Configure Mail Server (Optional)**

<b>S T E P #</b>	<p>This procedure will provide the steps to configure the SMTP mail server.</p> <p><b>Note:</b> This procedure is optional; however, this option is required for Security (password initialization set to AUTOMATIC) and Forwarding (forwarding by mail filter defined) and is available only on the Application server.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>IDIH Application Server: Login</b>	Establish an SSH session to the IDIH Application Server, login as <b>admusr</b> .

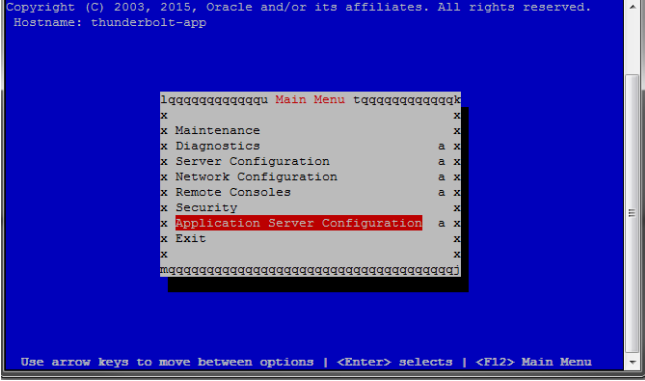

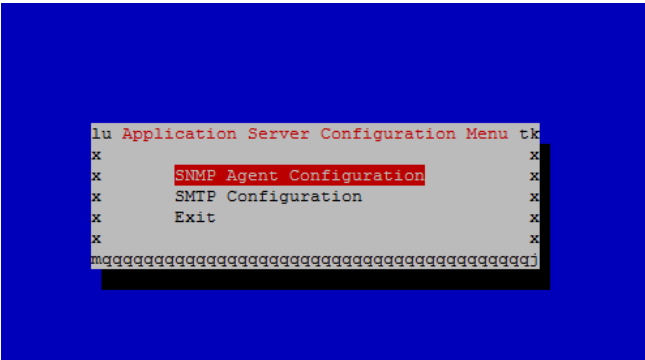

## Procedure 31: IDIH Configuration: Configure Mail Server (Optional)

<p>2</p> <p><input type="checkbox"/></p>	<p><b>IDIH Application Server:</b> Configure the Authenticated Mail Server</p>	<p>Enter the platcfg menu, execute the following command:</p> <pre>\$ sudo su - platcfg</pre> <p>Select <b>Application Server Configuration</b></p>  <p>Select <b>SMTP Configuration</b></p>  <p>Select <b>Edit</b></p> <p>Enter the following parameters:</p> <ol style="list-style-type: none"><li>1. Mail Server IP Address</li><li>2. User</li><li>3. Password</li><li>4. Email Address (From)</li><li>5. Mail smtp timeout</li><li>6. Mail smtp connectiontimeout</li><li>7. SNMP over SSL used?</li></ol> <p>Select <b>OK</b></p> <p>Select <b>Exit</b> to exit the platcfg menu</p>
--	--	---

**Procedure 32: IDIH Configuration: Configure SNMP Management Server (Optional)**

<b>S T E P #</b>	This procedure will provide the steps to configure the SNMP management server.	
	<b>Note:</b> This procedure is optional; however, this option is required for Forwarding (forwarding by SNMP filter defined) and is available only on the application server.	
	Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.	
	If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b> , and ask for assistance.	
1 <input type="checkbox"/>	<b>IDIH Application Server: Login</b>	Establish an SSH session to the IDIH Application Server, login as <b>admusr</b> .

## Procedure 32: IDIH Configuration: Configure SNMP Management Server (Optional)

2 <input type="checkbox"/>	<b>IDIH Application Server:</b> Configure SNMP Management Server	<p>Enter the platcfg menu, execute the following command:</p> <pre>\$ sudo su - platcfg</pre> <p>Select <b>Application Server Configuration</b></p>  <p>Select <b>SNMP Agent Configuration</b></p>  <p>Select <b>Edit</b></p> <p>Enter the IP address of the SNMP Management Server</p> <p><b>Note:</b> The SNMP agent configuration is updated and the SNMP Management server is automatically restarted.</p> <p>Select <b>OK</b></p> <p>Select <b>Exit</b> to exit the platcfg menu.</p>
-------------------------------	---	---

### Procedure 33: IDIH Configuration: Change Network Interface (Optional)

<b>S T E P #</b>	<p>This procedure will provide the steps to change the default network interface</p> <p><b>Note:</b> Initially the default network interface used to transport TTRs from DSR to DIH uses the internal imi network; however, this can be changed if required. It should be noted that changing this interface could degrade performance of TTR transmission.</p> <p><b>Note:</b> A script is provided to manage the settings so that the operator doesn't need to know the details required to apply the settings. There are two settings 'interface.name' and 'interface.enabled'.</p> <p>When interface.enabled=True then communications over the 'interface.name =value', where value is the name of the network interface as defined on the platform, is the only specified interface that is used for communications.</p> <p>When 'interface.enabled=False' then communications over the named interface is not enforced, that is, all interfaces configured on the platform are allowed to be used for communications.</p> <p>For example, if it is required to use the xmi interface for communication instead of the default internal imi interface, then the operator would supply 'xmi' when prompted for the interface name and 'True' when prompted if interface filtering should be applied.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
<p>1</p> <input type="checkbox"/>	<p><b>IDIH Mediation Server: Login</b></p> <p>Establish an SSH session to the IDIH Mediation Server. Login as user <b>admusr</b>.</p> <p>Issue the following commands to login as <b>tekelec</b> user.</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo su - tekelec</pre>
<p>2</p> <input type="checkbox"/>	<p><b>IDIH Mediation Server: Execute the Change Interface Script</b></p> <p>Execute the change interface script with the following command:</p> <pre style="border: 1px solid black; padding: 5px;">\$ chgIntf.sh</pre> <p>Answer the following questions during execution of the script:</p> <p>This script is used to change the interface name (default = imi) used for mediation communications and whether to enable network interface filtering or not. Please answer the following questions or enter CTRL-C to exit out of the script.</p> <p>Current setting are: interface.name=imi interface.enabled=True</p> <p>Enter new network interface name, return to keep current [imi]: <b>xmi</b></p> <p>Do you want to enable network interface filtering [True False], return to keep current [True]:</p> <p>Updating configuration properties file with 'interface.name=xmi' and 'interface.enable=True', and restarting mediation configuration bundle...</p>

**Procedure 34: IDIH Configuration: Backup the upgrade and Disaster Recovery FDC File (Optional)**

<b>S T E P #</b>	<p>This procedure will provide the steps to generate a disaster recovery fdc file.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Identify Backup Server</b>	<p>Identify an external server to be used as a backup server for the following steps. The server should not be co-located with any of the following items:</p> <ul style="list-style-type: none"> <li>• TVOE</li> <li>• PMAC</li> <li>• DSR NOAM</li> <li>• DSR SOAM</li> </ul>
2 <input type="checkbox"/>	<b>PMAC: Establish Terminal Session</b>	<p>Establish an SSH session to the PMAC. Login as <i>admusr</i>.</p>
3 <input type="checkbox"/>	<b>PMAC: Verify Upgrade fdc file exists</b>	<p>Execute the following commands to verify the upgrade FDC file for IDIH exists:</p> <pre style="border: 1px solid black; padding: 5px;">\$ cd /var/TKLC/smac/guest-dropin \$ ls -l *.xml</pre> <p>The following output is expected:</p> <pre style="border: 1px solid black; padding: 5px;">-rw-r----- 1 root smac 9542 May 11 09:43 &lt;idih_install&gt;.xml -rw-r----- 1 root smac 5107 May 11 09:43 &lt;idih_upgrade&gt;.xml</pre> <p><b>Note:</b> The &lt;idih_upgrade&gt;.xml file is the same file used for upgrade and disaster recovery procedures.</p>
4 <input type="checkbox"/>	<b>PMAC: Transfer the FDC file to a remote server.</b>	<p>Login to the backup server identified in <b>step 1</b> and copy backup image to the customer server where it can be safely stored. If the customer system is a Linux system, please execute the following command to copy the backup image to the customer system.</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo scp admusr@&lt;PMAC_IP_Address&gt;:/var/TKLC/smac/guest-dropin/&lt;idih_upgrade.xml&gt; /path/to/destination/</pre> <p>When prompted, enter the admusr user password and press <b>Enter</b>.</p> <p>If the Customer System is a Windows system please refer to reference [7] Using WinSCP to copy the backup image to the customer system.</p>

**Procedure 35: IDIH Configuration: Change Alarm Ignore List (Optional)**

<p><b>S</b> <b>T</b> <b>E</b> <b>P</b> <b>#</b></p>	<p>This procedure will provide the steps to change the alarm severity and/or identifiers to ignore on the mediation server.</p> <p><b>Note:</b> Initially the default is to ignore alarms with severity 4 (informational)</p> <p><b>Note:</b> A script is provided to manage the settings so that the operator does not need to know the details required to apply the settings. There are two settings 'ignore.event' and 'ignore.severity'</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1</p> <p><input type="checkbox"/></p>	<p><b>IDIH Mediation Server: Login</b></p>	<p>Establish an SSH session to the IDIH Mediation Server. Login as user <b>admusr</b>.</p> <p>Issue the following commands to login as tekelec user.</p> <pre style="border: 1px solid black; padding: 2px;">\$ sudo su - tekelec</pre>

### Procedure 35: IDIH Configuration: Change Alarm Ignore List (Optional)

2 <input type="checkbox"/>	<b>IDIH Mediation Server:</b> Execute the Change Interface Script	<p>Execute the change alarms script with the following command:</p> <pre>\$ chgAlms.sh</pre> <p>Answer the following questions during execution of the script:</p> <p>This script is used to change ignore list for mediation alarms. There are two lists, one for Severity where the list contains the severity values (no spaces, comma separated). Severity default list = '4' Possible severity values are:</p> <ol style="list-style-type: none"><li>1 Critical error</li><li>2 Major error</li><li>3 Minor error</li><li>4 Information only; no error</li><li>5 Cleared</li></ol> <p>The other is the event list which contains the (comcol) event numbers (no spaces, comma separated). Please answer the following questions or enter CTRL-C to exit out of the script.</p> <p>Current setting are: ignore.event= ignore.severity=4</p> <p>Enter new ignore list for alarm severity (comma separated list) or '0' to keep current [4]: 0</p> <p>Enter new ignore list for alarm events (comma separated list) or '0' to keep current []: 0</p> <p>Updating configuration properties file with 'ignore.severity=4' and 'ignore.event='</p> <p>Backing-up configuration properties with 'ignore.severity=4' and 'ignore.event='</p> <p>Restarting ImpAlarms process ...</p> <p>Done!</p>
-------------------------------	---	--

## 4.7 Post-Install Activities

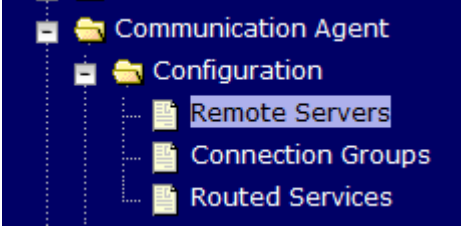

### Procedure 36: Activate Optional Features

<b>S T E P #</b>	<p>This procedure will provide instruction on how to install DSR optional components once regular installation is complete.</p> <p><b>Prerequisite:</b> All previous DSR installation steps have been completed.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Refer to Activation Guides for Optional Features</b>	Refer to 3.2 Optional Features for a list of feature activation documents whose procedures are to be executed at this moment.

**Procedure 37: Configure ComAgent Connections (DSR + SDS)**

<p><b>S T E P #</b></p>	<p>This procedure will provide instruction on how to configure ComAgent connections on DSR/SDS for use in the FABR application.</p> <p><b>Prerequisite:</b> FABR application is activated.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>
<p>1 <input type="checkbox"/></p>	<p><b>SDS NOAM VIP GUI: Login</b></p> <p>Establish a GUI session on the SDS NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:</p> <div data-bbox="412 726 1268 772" style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><code>https://&lt;Primary_SDS_NOAM_VIP_IP_Address&gt;</code></p> </div> <p>Login as the <i>guiadmin</i> user:</p> <div data-bbox="412 856 1268 1365" style="text-align: center;">  </div>

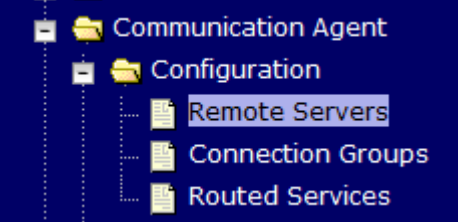

**Procedure 37: Configure ComAgent Connections (DSR + SDS)**

11	<input type="checkbox"/> <p><b>DSR NOAM VIP GUI:</b> Verify correct number of servers in group</p>	<p>Verify Correct number of servers are in the connection group.</p> 
----	--	---

**Procedure 38: Shared secret encryption key revocation (RADIUS Only)**

<b>S T E P #</b>	<p>This procedure will provide instruction on how to change shared secret encryption key on DSR 7.2 radius setup.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1	<input type="checkbox"/> <p><b>Revoke RADIUS shared secret encryption key</b></p>	<p>Refer to RADIUS Shared Secret Key revocation MOP to change the encryption key on the DSR installed setup. Refer [11]</p> <p><b>Note:</b> This is highly recommended to change the key after installation due to security reasons.</p>

**Procedure 39: Backup TVOE Configuration**

<b>S T E P #</b>	<p>This procedure will provide instruction on how to back up each TVOE rack mount server or Blade server after a successful installation.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1	<input type="checkbox"/> <p><b>Identify Backup Server</b></p>	<p>Identify an external server to be used as a backup server for the following steps. The server should not be co-located with any of the following items:</p> <ul style="list-style-type: none"> <li>• TVOE</li> <li>• PMAC</li> <li>• DSR NOAM</li> <li>• DSR SOAM</li> </ul>
2	<input type="checkbox"/> <p><b>TVOE Server: Login</b></p>	<p>Establish an SSH session to the TVOE host server, login as <b>admusr</b>.</p>

### Procedure 39: Backup TVOE Configuration

3 **TVOE Server:**  
Build ISO  
backup file

Execute the following command from the TVOE server:

```
$ sudo su - platcfg  
  
lqqqqqqqu Main Menu tqqqqqqqqk  
x                                     x  
x Maintenance                         x  
x Diagnostics                         x  
x Server Configuration                a x  
x Security                            a x  
x Network Configuration                a x  
x Exit                                 x  
x                                     x  
mqqqqqqqqqqqqqqqqqqqqqqqqqqqqqqj
```

Select the following menu options sequentially:  
**Maintenance -> Backup and Restore ->Backup Platform (CD/DVD).**  
The **“Backup TekServer Menu”** page will now be shown.

Build the backup ISO image by selecting:  
Build ISO file only

```
lqqqqqu Backup TekServer Menu tqqqqqk  
x                                     x  
x Select Backup Type (plat-app)       x  
x View Index Table of Contents        a x  
x Select Backup Device ()              a x  
x Select Backup Media (CD-R)          a x  
x Build ISO file only                  x  
x Test Backup                          a x  
x Backup                               a x  
x Exit                                 x  
x                                     x  
mqqqqqqqqqqqqqqqqqqqqqqqqqqqqqqj
```

**Note:** Creating the ISO image may happen so quickly that this screen may only appear for an instant.

After the ISO is created, platcfg will return to the Backup TekServer Menu. The ISO has now been created and is located in the /var/TKLC/bkp/ directory. An example filename of a backup file that was created is: "hostname1307466752-plat-app-201104171705.iso"

Exit out of platcfg by selecting **Exit**.

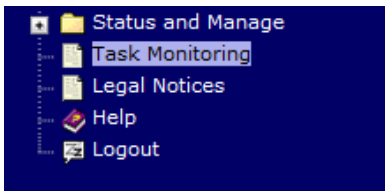

### Procedure 39: Backup TVOE Configuration

4 <input type="checkbox"/>	<b>Backup Server:</b> Transfer TVOE Files to Backup Server	<p>Login to the backup server identified in <b>step 1</b> and copy backup image to the customer server where it can be safely stored. If the customer system is a Linux system, please execute the following command to copy the backup image to the customer system.</p> <pre>\$ sudo scp tvoexfer@&lt;TVOE IP Address&gt;:backup/* /path/to/destination/</pre> <p>When prompted, enter the tvoexfer user password and press <b>Enter</b>.</p> <p>If the Customer System is a Windows system please refer to reference [7] Using WinSCP to copy the backup image to the customer system.</p> <p>The TVOE backup file has now been successfully placed on the backup server.</p>
5 <input type="checkbox"/>	<b>Repeat for Additional TVOE Servers</b>	Repeat steps <b>3-4</b> for additional TVOE servers

## Procedure 40: Backup PMAC Application

<b>S T E P #</b>	<p>This procedure will provide instruction on how to back up each PMAC application installed in this procedure.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Identify Backup Server</b>	<p>Identify an external server to be used as a backup server for the following steps. The server should not be co-located with any of the following items:</p> <ul style="list-style-type: none"> <li>• TVOE</li> <li>• PMAC</li> <li>• DSR NOAM</li> <li>• DSR SOAM</li> </ul>
2 <input type="checkbox"/>	<b>PMAC Server: Login</b>	<p>Establish an SSH session to the PMAC server, login as <b>admusr</b>.</p>
3 <input type="checkbox"/>	<b>PMAC Server: Build backup File</b>	<p>Execute the following command from the PMAC server:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/smac/bin/pmacadm backup</pre> <pre style="border: 1px solid black; padding: 5px;">PM&amp;C backup been successfully initiated as task ID 7</pre> <p><b>Note:</b> The backup runs as a background task. To check the status of the background task use the PMAC GUI Task Monitor page:</p> <p>or issue the command "<b>pmaccli getBgTasks</b>". The result should eventually be "PMAC Backup successful" and the background task should indicate "COMPLETE".</p>

## Procedure 40: Backup PMAC Application

<p>4</p> <p><input type="checkbox"/></p>	<p><b>PMAC GUI:</b> Login</p>	<p>Open web browser and enter:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><code>http://&lt;PMAC Mgmt Network IP&gt;</code></p> </div> <p>Login as <b><i>pmacadmin</i></b> user:</p> 												
<p>5</p> <p><input type="checkbox"/></p>	<p><b>PMAC Server GUI:</b> Monitor/Verify Backup Task Completion</p>	<p>Navigate to <b>Main Menu -&gt; Task Monitoring</b></p>  <p>Monitor the Backup PM&amp;C Task:</p> <p><b>Background Task Monitoring</b></p> <div style="border: 1px solid gray; padding: 5px; margin: 10px 0;"> <p>Filter ▾</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 5%;"></th> <th style="width: 5%;">ID</th> <th style="width: 25%;">Task</th> <th style="width: 25%;">Target</th> <th style="width: 20%;">Status</th> <th style="width: 20%;">State</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;"></td> <td style="text-align: center;">181</td> <td>Backup PM&amp;C</td> <td></td> <td style="color: green;">PM&amp;C Backup successful</td> <td style="color: green;">COMPLETE</td> </tr> </tbody> </table> </div> <p><b>Note:</b> Alternatively, you can monitor the Backup task by executing the following command:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><code>\$ sudo pmaccli getBgTasks</code></p> </div>		ID	Task	Target	Status	State		181	Backup PM&C		PM&C Backup successful	COMPLETE
	ID	Task	Target	Status	State									
	181	Backup PM&C		PM&C Backup successful	COMPLETE									

#### Procedure 40: Backup PMAC Application

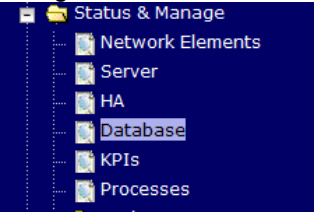

6 <input type="checkbox"/>	<b>Backup Server:</b> Transfer PMAC File to Backup Server	<p>Login to the backup server identified in <b>step 1</b> and copy backup image to the customer server where it can be safely stored. If the customer system is a Linux system, please execute the following command to copy the backup image to the customer system.</p> <pre data-bbox="456 407 1430 499">\$ sudo scp admusr@&lt;PMAC_IP_Address&gt;:/var/TKLC/smac/backup/* /path/to/destination/</pre> <p>When prompted, enter the admusr user password and press <b>Enter</b>.</p> <p>If the Customer System is a Windows system please refer to reference [7] Using WinSCP to copy the backup image to the customer system.</p>
5 <input type="checkbox"/>	<b>Repeat for Additional TVOE Servers</b>	Repeat <b>steps 2-6</b> for additional TVOE servers

## Procedure 41: NOAM Database Backup

<b>S T E P #</b>	<p>This procedure will provide instruction on how to back up the NOAM Database.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Identify Backup Server</b>	<p>Identify an external server to be used as a backup server for the following steps. The server should not be co-located with any of the following items:</p> <ul style="list-style-type: none"> <li>• TVOE</li> <li>• PMAC</li> <li>• DSR NOAM</li> <li>• DSR SOAM</li> </ul>
2 <input type="checkbox"/>	<b>NOAM VIP GUI: Login</b>	<p>Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></p> </div> <p>Login as the <i>guiadmin</i> user:</p> <div style="text-align: center; margin: 20px 0;">  </div> <div style="text-align: center; margin: 10px 0;"> <p><b>Oracle System Login</b> <span style="float: right;">Fri Mar 20 12:29:52 2015 EDT</span></p> <hr style="width: 50%; margin: 0 auto;"/> </div> <div style="text-align: center; margin: 20px 0;"> <div style="border: 1px solid gray; padding: 10px; width: fit-content; margin: 0 auto;"> <p><b>Log In</b></p> <p>Enter your username and password to log in</p> <p>Username: <input type="text" value="guiadmin"/></p> <p>Password: <input type="password" value="••••••"/></p> <p><input type="checkbox"/> Change password</p> <p><input type="button" value="Log In"/></p> </div> </div> <p style="text-align: center; margin: 10px 0;">Welcome to the Oracle System Login.</p> <p style="text-align: center; margin: 10px 0;">Unauthorized access is prohibited. **Procedure 43: Enable/Disable DTLS (SCTP Diameter Connections Only)**

<b>S T E P #</b>	<p>This procedure will provide instructions on how to prepare clients before configuring SCTP diameter connections.</p> <p style="text-align: center;"> <b>Important</b> </p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1</p> <input type="checkbox"/>		<p>Oracle's SCTP Datagram Transport Layer Security (DTLS) has SCTP AUTH extensions by default. SCTP AUTH extensions are required for SCTP DTLS. However, there are known impacts with SCTP AUTH extensions as covered by the CVEs referenced below. It is highly recommended that customers installing DSR 7.1/7.1.1 should prepare clients before the DSR connections are established after installation. This will ensure the DSR to Client SCTP connection will establish with SCTP AUTH extensions enabled. See RFC 6083. If customers DO NOT prepare clients to accommodate the DTLS changes, then the SCTP connections to client devices WILL NOT establish after the DSR is installed.</p> <p><a href="https://access.redhat.com/security/cve/CVE-2015-1421">https://access.redhat.com/security/cve/CVE-2015-1421</a></p> <p><a href="https://access.redhat.com/security/cve/CVE-2014-5077">https://access.redhat.com/security/cve/CVE-2014-5077</a></p> <p>Execute procedures in [10] to disable/enable the DTLS feature.</p>

## Appendix A: Sample Network Element and Hardware Profiles

In order to enter all the network information for a network element, a specially formatted XML file needs to be filled out with the required network information. The network information is needed to configure both the NOAM and any SOAM Network Elements.

It is expected that the maintainer/creator of this file has networking knowledge of this product and the customer site at which it is being installed. This network element XML file is used for DSR deployments using Cisco 4948 switches and HP c-Class blade servers. The following is an example of a Network Element XML file.

The SOAM Network Element XML file needs to have same network names for the networks as the NOAMP Network Element XML file has. It is easy to accidentally create different network names for NOAMP and SOAM Network Element, and then the mapping of services to networks will not be possible.

Figure 5 Example Network Element XML File

```
<?xml version="1.0"?>
<networkelement>
  <name>NE</name>
  <networks>
    <network>
      <name>INTERNALXMI</name>
      <vlanId>3</vlanId>
      <ip>10.2.0.0</ip>
      <mask>255.255.255.0</mask>
      <gateway>10.2.0.1</gateway>
      <isDefault>true</isDefault>
    </network>
    <network>
      <name>INTERNALIMI</name>
      <vlanId>4</vlanId>
      <ip>10.3.0.0</ip>
      <mask>255.255.255.0</mask>
      <nonRoutable>true</nonRoutable>
    </network>
  </networks>
</networkelement>
```

**'nonRoutable' Field:** By defining a network as 'nonRoutable' as seen above for INTERNALIMI, this means that the network shall not be routable outside the layer 3 boundary. This allows the user to define the same IP range in each SOAM site, and no duplicate IP check will be performed during server creation.

The server hardware information is needed to configure the Ethernet interfaces on the servers. This server hardware profile data XML file is used for DSR deployments using HP c-Class blade servers and HP c-Class rack-mount servers. It is supplied to the NOAM server so that the information can be pulled in and presented to the user in the GUI during server configuration. The following is an example of a Server Hardware Profile XML file.

# Appendix B: Configuring for TVOE iLO Access

## Appendix B 1: Connecting to the TVOE iLO

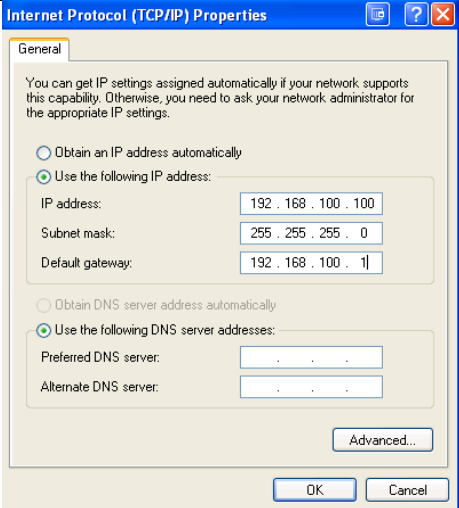

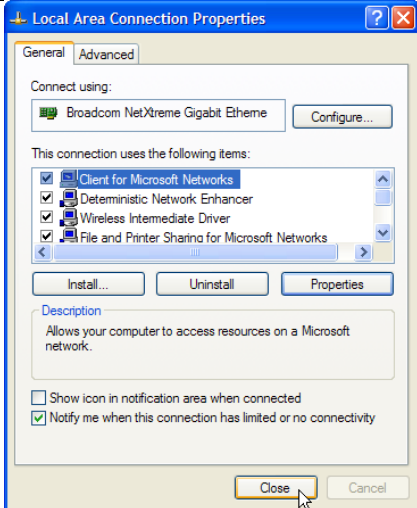

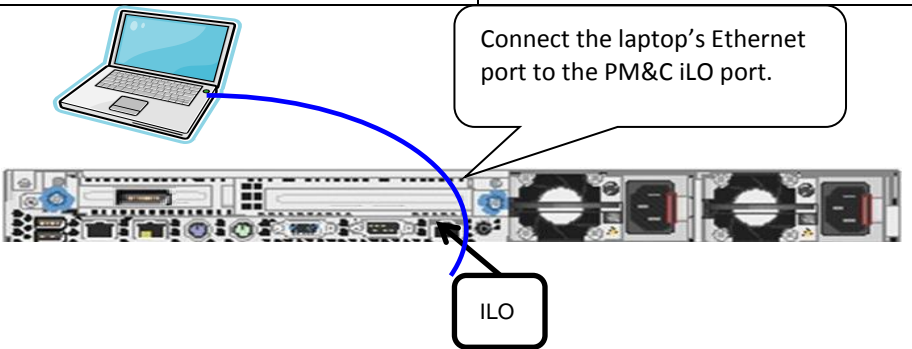

This procedure contains the steps to connect a laptop to the TVOE iLO via a directly cabled Ethernet connection.

Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact **Appendix O: My Oracle Support (MOS)**, and ask for assistance.

STEP #	Procedure	Result	
<p>1</p> <p><input type="checkbox"/></p>	<p>Access the laptop network interface cards TCP/IP <b>Properties</b> screen.</p> <p><b>NOTE:</b> For this step follow the instruction specific to the laptop's OS (XP or 7).</p>	<p style="text-align: center;"><b>Windows XP</b></p> <ul style="list-style-type: none"> <li>• Go to <b>Control Panel</b></li> <li>• Double-click on <b>Network Connections</b></li> <li>• Right-click the wired Ethernet Interface icon and select <b>Properties</b></li> <li>• Select <b>Internet Protocol (TCP/IP)</b></li> </ul> <p>Select <b>Properties</b></p> 	<p style="text-align: center;"><b>Windows 7</b></p> <ul style="list-style-type: none"> <li>• Go to <b>Control Panel</b>.</li> <li>• Double-click on <b>Network and Sharing Center</b></li> <li>• Select <b>Change Adapter Settings</b> (left menu)</li> <li>• Right-click the <b>Local Area Connection</b> icon and select <b>Properties</b></li> </ul> <p>Select <b>Internet Protocol Version 4 (TCP/IPv4)</b></p> 

## Appendix B 1: Connecting to the TVOE iLO

<p>2</p> <p>□</p>	<p>Click <b>Use the following IP address</b></p> <p>Set the <b>IP address</b> to 192.168.100.100</p> <p>Set the <b>Subnet mask</b> to 255.255.255.0</p> <p>Set the <b>Default gateway</b> to 192.168.100.1</p> <p>Select <b>OK</b>.</p> <p>Select <b>Close</b> from the network interface card's main <b>Properties</b> screen.</p>		
<p>3</p> <p>□</p>	<p>Connect the laptop's Ethernet port directly to the TVOE iLO port using a standard Cat-5 cross-over cable.</p>		

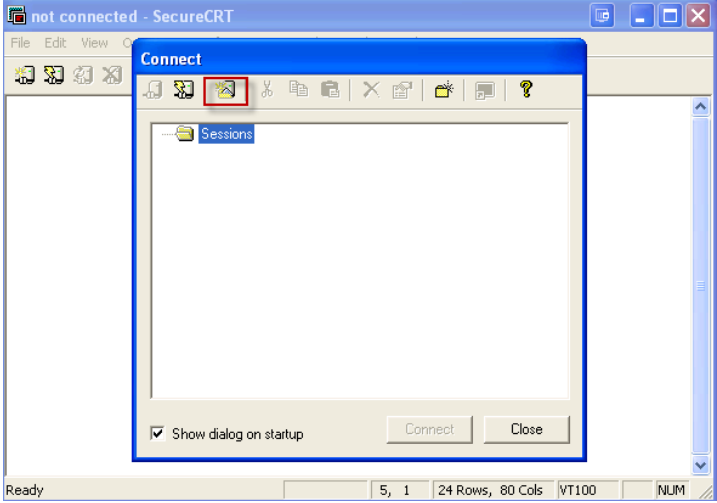

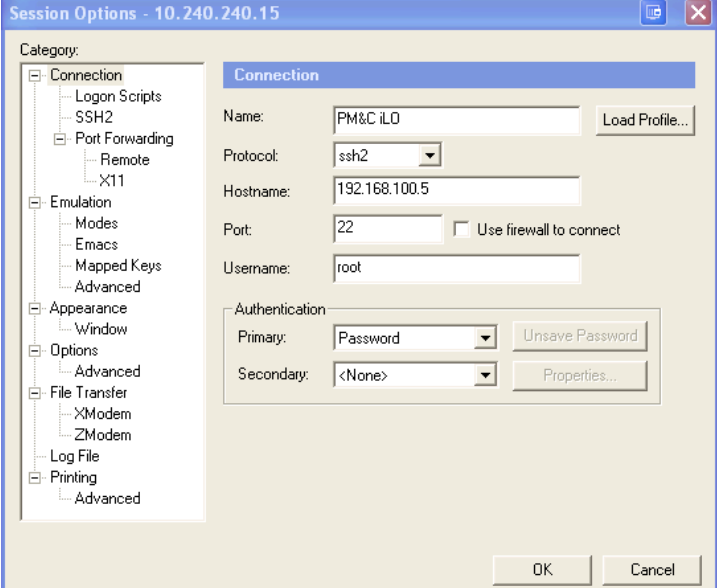

# Appendix C: TVOE iLO Access

## Appendix C 1: Accessing the TVOE iLO

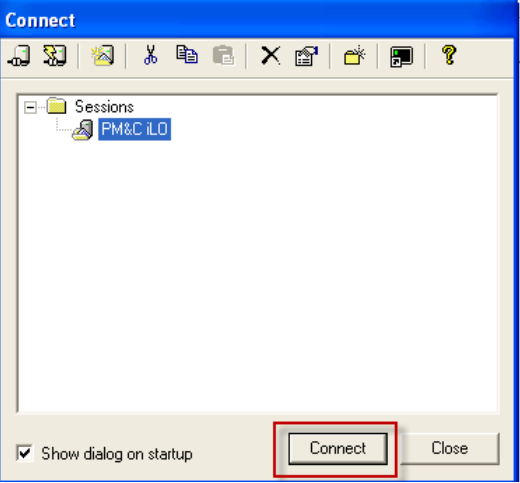

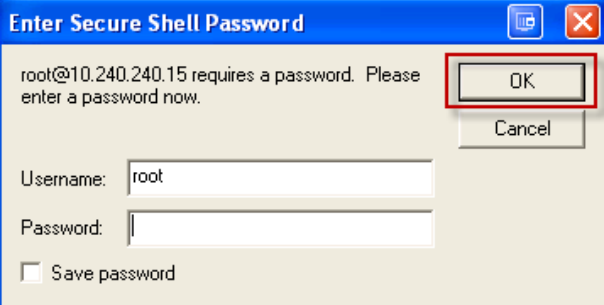

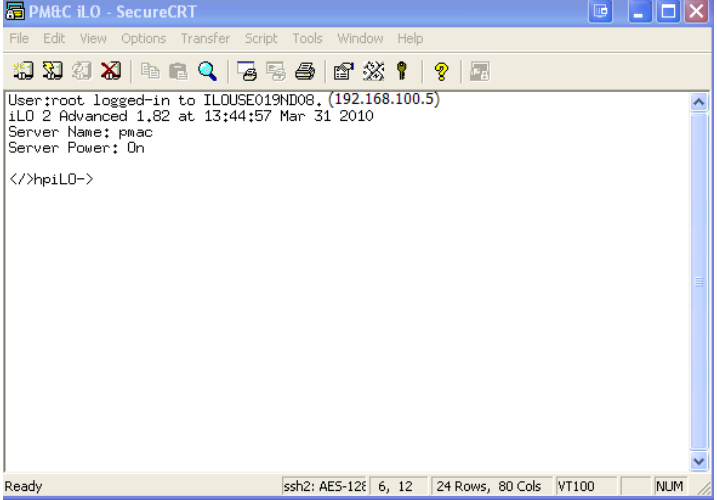

This procedure contains the steps to access the TVOE iLO.

Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact **Appendix O: My Oracle Support (MOS)**, and ask for assistance.

STEP #	Procedure	Result
1 <input type="checkbox"/>	<p>Launch a terminal emulator, e.g. Putty, Secure CRT.</p> <p>Navigate to <b>File -&gt; Connect</b></p> <p>Click on the <b>New Session</b> icon.</p> <p><b>Note:</b> This example demonstrates Secure CRT.</p>	
2 <input type="checkbox"/>	<p>Enter TVOE iLO for <b>Name</b> 192.168.100.5(Manufacturing default) or customer IP set during installation for <b>Hostname</b>.</p> <p>Enter admusr for <b>Username</b>.</p> <p>Click <b>OK</b></p> <p><b>Note:</b> See <b>Appendix B: Configuring for TVOE iLO Access</b> to configure your system network to access the TVOE iLO.</p>	

### Appendix C 1: Accessing the TVOE iLO

<p>3</p> <p><input type="checkbox"/></p>	<p>Navigate <b>File -&gt; Connect</b> to open the Connect window.</p> <p>Highlight the session you created and click <b>Connect</b>.</p>	
<p>4</p> <p><input type="checkbox"/></p>	<p><b>Login</b> to the TVOE iLO using the appropriate password.</p>	
<p>5</p> <p><input type="checkbox"/></p>	<p>The TVOE iLO is displayed.</p>	

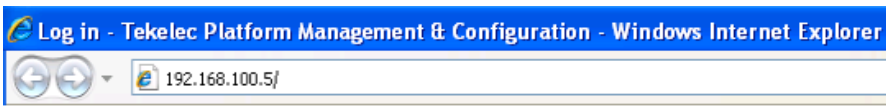

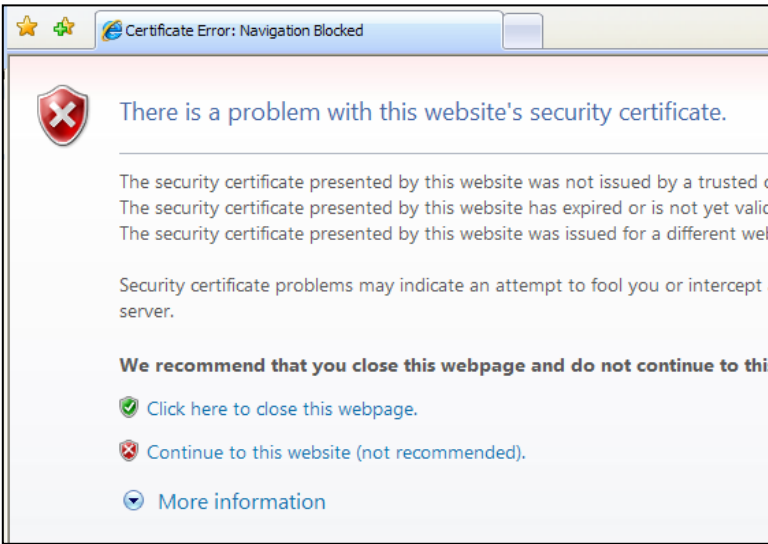

## Appendix D: TVOE iLO4 Access

### Appendix D 1: TVOE iLO4 GUI Access

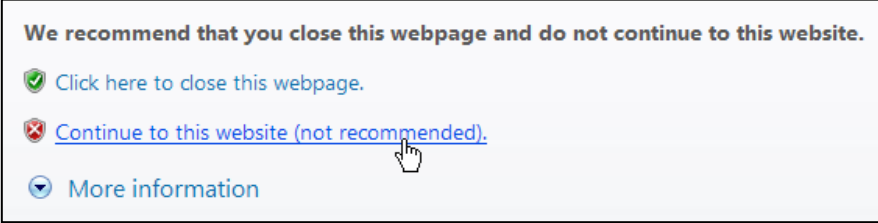

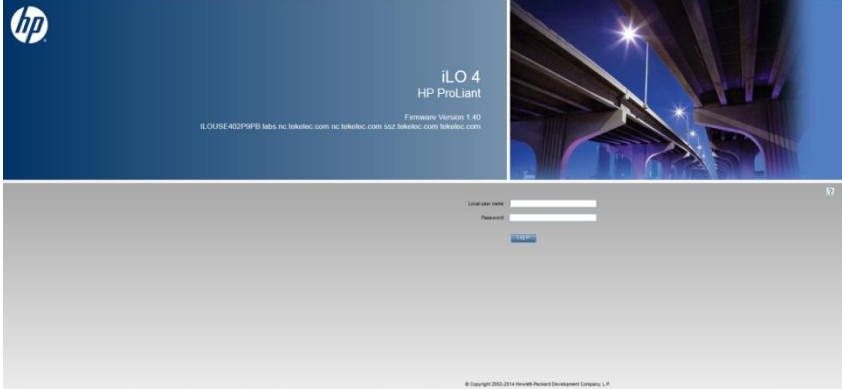

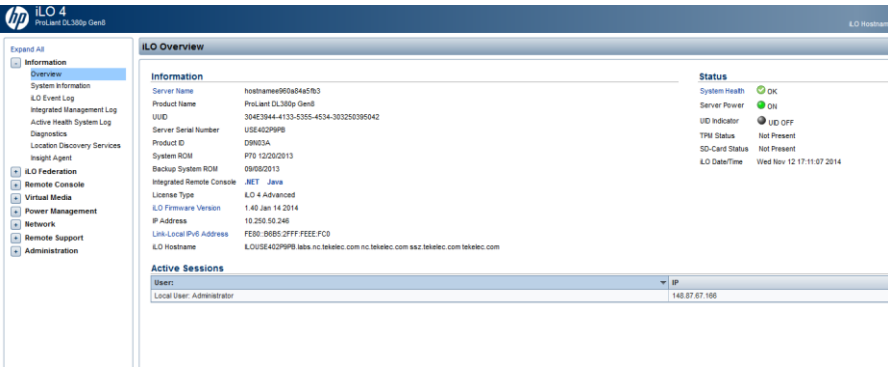

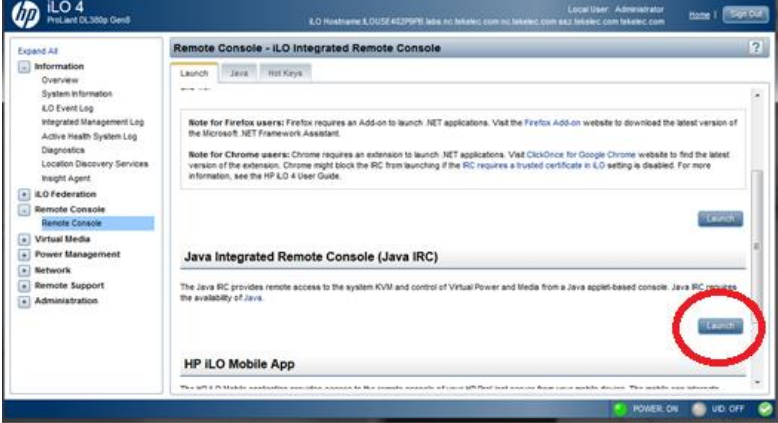

This procedure contains the steps to access the TVOE iLO4 GUI.

Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact **Appendix O: My Oracle Support (MOS)**, and ask for assistance.

STEP #	Procedure	Result
1 <input type="checkbox"/>	<b>Launch Internet Explorer</b>  Navigate to 192.168.100.5 (manufacturing default) or customer IP set during installation.	
2 <input type="checkbox"/>	Internet Explorer may display a warning message regarding the Security Certificate.	

## Appendix D 1: TVOE iLO4 GUI Access

<p>3</p> <p><input type="checkbox"/></p>	<p>Select the option to <b>Continue to the website (not recommended)</b></p>	
<p>4</p> <p><input type="checkbox"/></p>	<p>Log in to the iLO4</p>	
<p>5</p> <p><input type="checkbox"/></p>	<p>The iLO4 Home page is displayed.</p>	
<p>6</p> <p><input type="checkbox"/></p>	<p>Click on <b>Launch</b> to start the PMAC iLO4 CLI</p>	

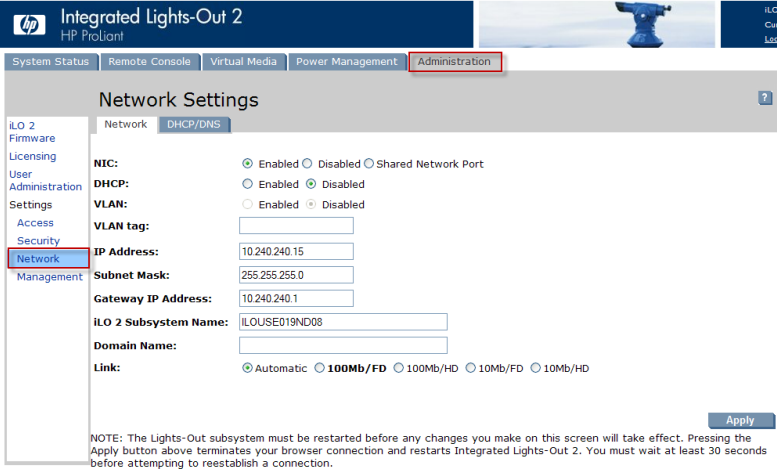

# Appendix E: Changing the TVOE iLO Address

## Appendix E 1: Changing the TVOE iLO Address

This procedure will set the IP address of the TVOE iLO to the customer's network so that it can be accessed by Oracle support.

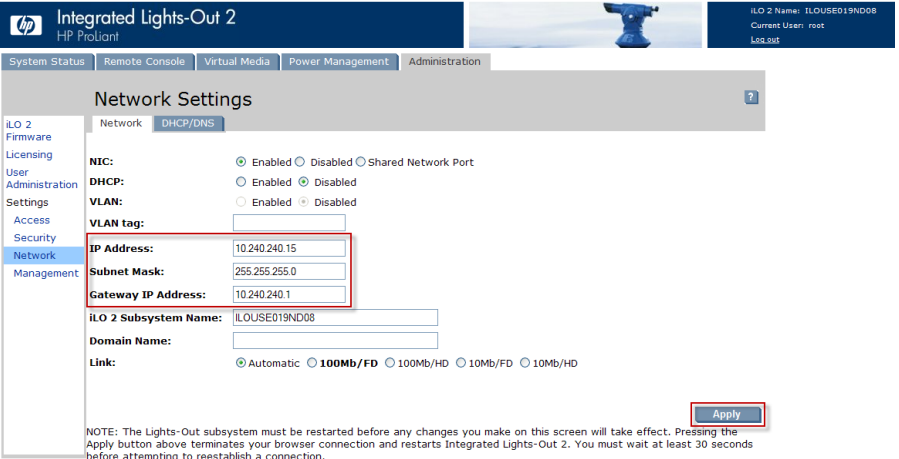

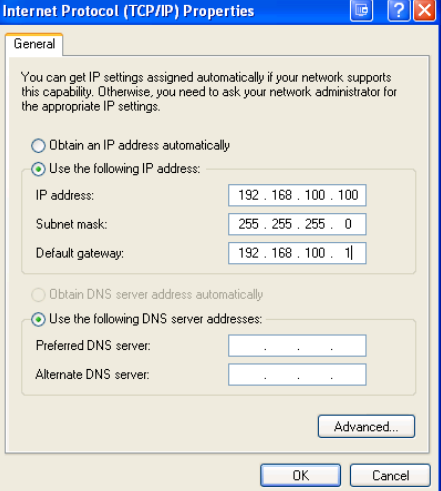

Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact **Appendix O: My Oracle Support (MOS)**, and ask for assistance.

STEP #	Procedure	Result
<p>1</p> <p><input type="checkbox"/></p>	<p>Connect to the TVOE iLO GUI using the instructions in <b>Appendix D: TVOE iLO4 Access</b></p>	
<p>2</p> <p><input type="checkbox"/></p>	<p>Click the <b>Administration</b> tab.</p> <p>Under <b>Settings</b> in the left column click on <b>Network</b>.</p>	

## Appendix E 1: Changing the TVOE iLO Address

<p>3</p> <p><input type="checkbox"/></p>	<p>Change the <b>IP Address</b>, <b>Subnet Mask</b> and <b>Gateway IP Address</b> to the values supplied in the IP Site Survey for the TVOE iLO.</p> <p>Select <b>Apply</b>.</p> <p><b>Note:</b> You will lose access after you hit the <b>Apply</b> button.</p>	
<p>4</p> <p><input type="checkbox"/></p>	<p>Reset the PC's network connection replacing the <b>Subnet Mask</b> and <b>Gateway</b> with those just used for the TVOE iLO. Use an appropriate <b>IP address</b> for this subnet.</p>	
<p>5</p> <p><input type="checkbox"/></p>	<p>Connect to the TVOE iLO GUI using the instructions in <b>Appendix D: TVOE iLO4 Access</b></p> <p><b>Note:</b> Use the IP address entered in <b>Step 3</b></p>	

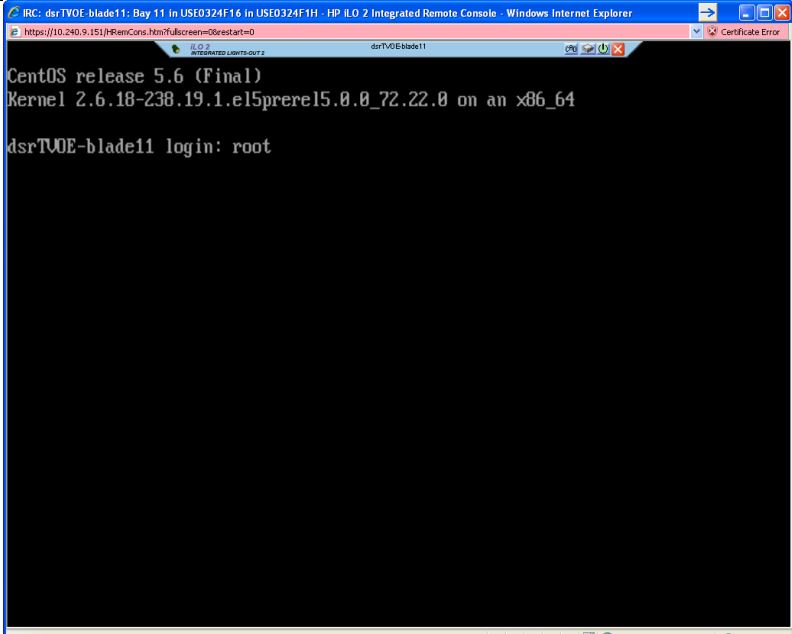

# Appendix F: PMAC/NOAM/SOAM Console iLO Access

## Appendix F 1: PMAC/NOAM/SOAM Console iLO Access

This procedure describes how to log into the PMAC/NOAM/SOAM console from ILO.

Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.

If this procedure fails, contact **Appendix O: My Oracle Support (MOS)**, and ask for assistance.

STEP #	Procedure	Result
<p>1</p> <p><input type="checkbox"/></p>	<p>Log in as <b>admusr</b> on the TVOE server hosting the NOAM using either ILO or SSH to the TVOE server's XMI or Mgmt. address</p>	 <p>The screenshot shows a Windows Internet Explorer browser window titled "IRC: dsrTVOE-blade11: Bay 11 in USE0324F16 in USE0324F1H - HP iLO 2 Integrated Remote Console". The address bar shows "https://10.240.9.151/PrmCons.htm?Fullscreen=0&amp;restart=0". The main content area displays a terminal window with the following text: "CentOS release 5.6 (Final)", "Kernel 2.6.18-238.19.1.el5pre.el5.0.0_72.22.0 on an x86_64", and "dsrTVOE-blade11 login: root". The terminal background is black with white text. The browser window also shows a "Certificate Error" warning in the top right corner.</p>

## Appendix F 1: PMAC/NOAM/SOAM Console iLO Access

<p>2</p> <p><input type="checkbox"/></p>		<p>On the TVOE host, execute the following command:</p> <pre style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;">\$sudo virsh list</pre> <p>This will produce a listing of currently running virtual machines.</p> <pre style="background-color: black; color: white; padding: 10px; margin: 10px auto;">[root@dsrTVOE-blade11 ~]# virsh list  Id Name                State -----   4 DSR_NOAMP            running [root@dsrTVOE-blade11 ~]# _</pre> <p>Find the VM name for your DSR NOAM and note its ID number in the first column.</p> <p><b>Note:</b> If the VM state is not listed as “running” or you do not find a VM you configured for your NOAM at all, then halt this procedure and contact Oracle Customer Support.</p>
<p>3</p> <p><input type="checkbox"/></p>	<p>Connect to console of the VM using the VM number obtained in Step 2.</p>	<p>On the TVOE host, execute:.</p> <pre style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;">\$sudo virsh console &lt;DSRNOAM-VMID&gt;</pre> <p>Where <b>DSRNOAM-VMID</b> is the VM ID you obtained in <b>Step 2</b>:</p> <pre style="background-color: black; color: white; padding: 10px; margin: 10px auto;">Connected to domain DSR_NOAMP Escape character is ^]  CentOS release 5.6 (Final) Kernel 2.6.18-238.19.1.el5prere15.0.0_72.22.0 on an x86_64 hostname1322840832 login: _</pre> <p>You are now connected to the DSR NOAMs console.</p> <p>If you wish to return to the TVOE host, you can exit the session by pressing <b>CTRL + ]</b></p>

# Appendix G: Accessing the NOAM GUI using SSH Tunneling with Putty

## Appendix G 1: Accessing the NOAM GUI using SSH Tunneling with Putty

<b>S T E P #</b>	<p><b>Note:</b> This procedure assumes that the NOAM server you wish to create a tunnel to has been IPM'd with the DSR application ISO</p> <p><b>Note:</b> This procedure assumes that you have exchanged SSH keys between the PMAC and the first NOAM server.</p> <p><b>Note:</b> This procedure assumes that you have obtained the control network IP address for the first NOAM server. You can get this from the PMAC GUI's Software Inventory screen.</p> <p>That variable will be referred to as &lt;NOAM-Control-IP&gt; in these instructions.</p> <p><b>Note:</b> It is recommended that you only use this procedure if you are using Windows XP. There are known issues with putty and Windows 7 that may cause unpredictable results when viewing GUI screens through SSH tunnels.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	Log in to PMAC Server using PuTTY	Launch the PuTTY application from your station and open a session to the PMAC's management address. Login as <b><i>admusr</i></b>

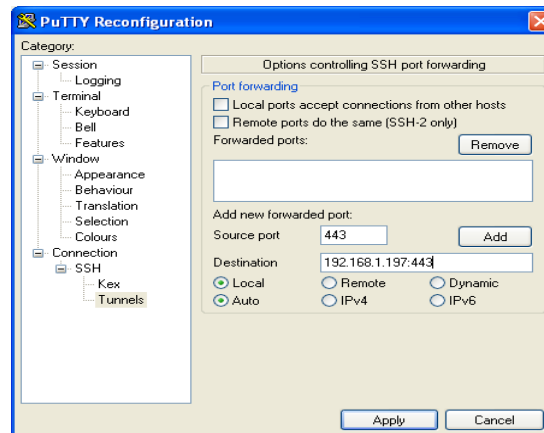

## Appendix G 1: Accessing the NOAM GUI using SSH Tunneling with Putty

2  
 **Create SSH Tunnel through the PMAC in PuTTY**

Click the icon in the upper left hand corner of the PuTTY window to bring down the **main menu**.

Select **Change Settings**  
 Select **Connections -> SSH -> Tunnels**

Verify that the **“Local”** and **“Auto”** buttons are selected. Leave other fields blank

In **Source Port**, enter **443**

In **Destination**, enter **<NOAM-Control-IP>:443**

Click **Add**

You should now see a display similar to the following in the text box at the center of this dialog.

Click **Apply**

Now establish the SSH session to the PMAC, login as **admusr**

### Appendix G 1: Accessing the NOAM GUI using SSH Tunneling with Putty

3 <input type="checkbox"/>	Use Local Web Browser to <b>Connect</b> to GUI	<p>Using your web browser, navigate to the following URL:</p> <p><code>https://localhost/</code></p>  <p>You should arrive at the login screen for the NOAM GUI.</p> <p><b>Note:</b> If using windows 7 and a blank screen is displayed, enable <b>Compatibility Mode</b> in IE, or use a different browser (Firefox or Chrome)</p>
-------------------------------	--	--

# Appendix H: Accessing the NOAM GUI using SSH Tunneling with OpenSSH for Windows

## Appendix H 1: Accessing the NOAM GUI using SSH Tunneling with OpenSSH for Windows

<p><b>S</b></p> <p><b>T</b></p> <p><b>E</b></p> <p><b>P</b></p> <p><b>#</b></p>	<p><b>Note:</b> This procedure assumes that the NOAMP server you wish to create a tunnel to has been IPM'd with the DSR application ISO</p> <p><b>Note:</b> This procedure assumes that you have exchanged SSH keys between the PMAC and the first NOAMP server.</p> <p><b>Note:</b> This procedure assumes that you have obtained the control network IP address for the first NOAMP server. You can get this from the PMAC GUI's Software Inventory screen. That variable will be referred to as &lt;NOAM-Control-IP&gt; in these instructions.</p> <p><b>Note:</b> This is the recommended tunneling method if you are using Windows 7.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1</p> <p><input type="checkbox"/></p>	<p>If Needed, Download and Install <b>OpenSSH</b> for Windows</p>	<p>Download <b>OpenSSH for Windows</b> from <a href="#">here</a>.</p> <p>Extract the installer from the ZIP file, then run the installer. <b>openssh</b> is now installed on your PC.</p>
<p>2</p> <p><input type="checkbox"/></p>	<p><b>Create</b> SSH Tunnel Through the PMAC</p>	<p>Open up a Command Prompt shell</p> <p>Within the command shell, enter the following to create the SSH tunnel to the 1st NO, through the PMAC:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <pre>&gt; ssh -L 443:&lt;1st_NO_Control_IP_Address&gt;:443 admusr@&lt;PMAC_Management_IP_Address&gt;</pre> </div> <p>(Answer <b>Yes</b> if it asks if you want to continue connecting)</p> <div style="background-color: black; color: white; padding: 5px; margin: 10px 0;"> <pre>C:\&gt;ssh -L 443:192.168.1.14:443 root@10.240.9.132 The authenticity of host '10.240.9.132 (10.240.9.132)' can't be established. RSA key fingerprint is e0:f5:2c:bf:70:d9:a6:fd:42:74:83:09:a0:7a:da:0c. Are you sure you want to continue connecting (yes/no)? yes Warning: Permanently added '10.240.9.132' (RSA) to the list of known hosts. root@10.240.9.132's password: Last login: Sat Mar 23 09:28:00 2013 from 10.26.15.162 [root@pmac-90006 ~]#</pre> </div> <p>The tunnel to the 1<sup>st</sup> NOAM is now established.</p>

## Appendix H 1: Accessing the NOAM GUI using SSH Tunneling with OpenSSH for Windows

3 <input type="checkbox"/>	Use Local Web Browser to Connect to GUI	<p>Using your web browser, navigate to the following URL:</p> <p><code>https://localhost/</code></p>  <p>You should arrive at the login screen for the NOAM GUI.</p>
-------------------------------	---	---

## Appendix J: Application NetBackup Client Installation Procedures

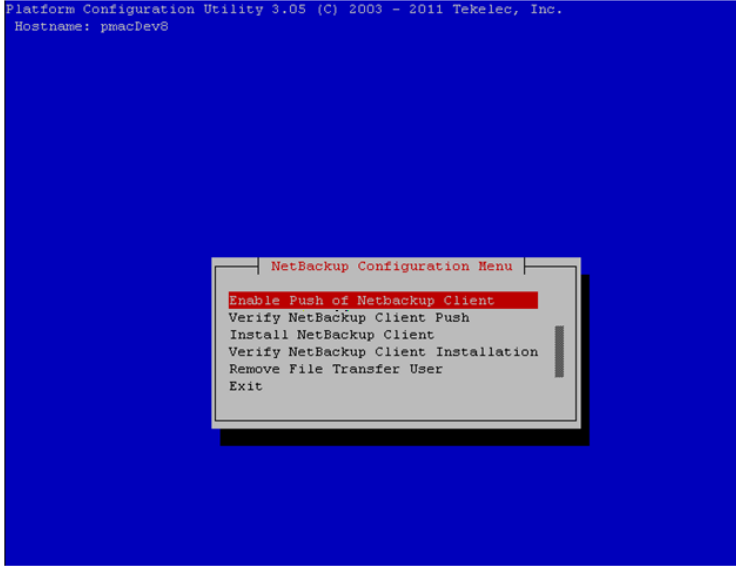

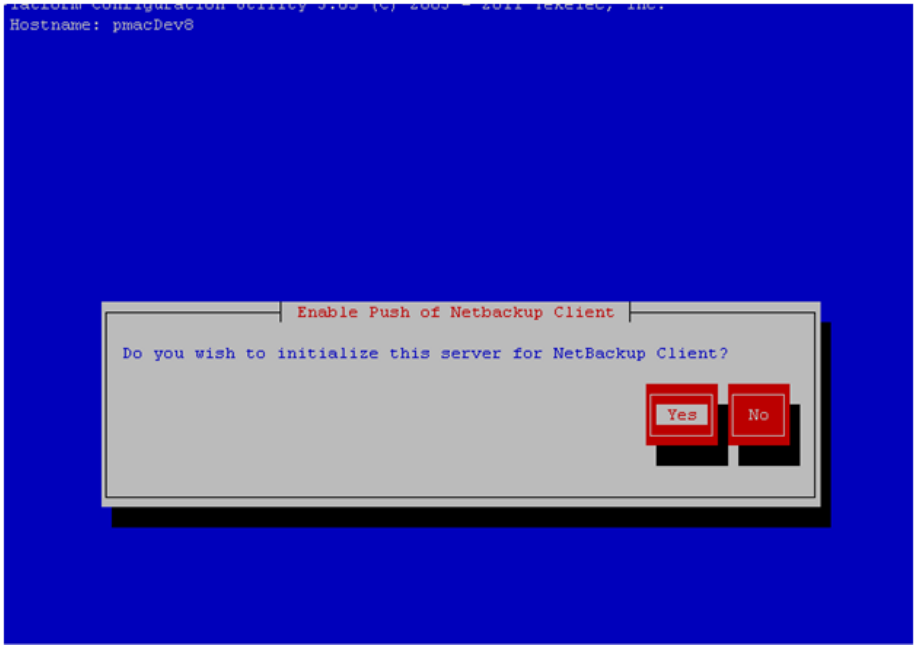

NetBackup is a utility that allows for management of backups and recovery of remote systems. The NetBackup suite is for the purpose of supporting Disaster Recovery at the customer site. The following procedures provides instructions for installing and configuring the NetBackup client software on an application server in two different ways, first using platcfg and second using nbAutoInstall (push Configuration)

### NETBACKUP CLIENT INSTALL USING PLATCFG

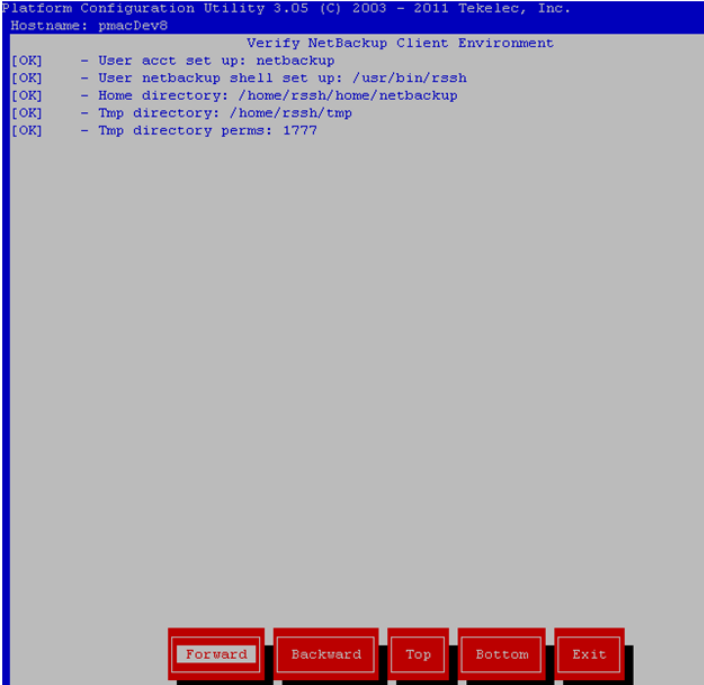

#### Appendix J 1: Application NetBackup Client Installation (Using Platcfg)

<b>S T E P #</b>	<p>This procedure explains the Netbackup installation using platcfg</p> <p><b>Prerequisites:</b></p> <ul style="list-style-type: none"> <li>• Application server platform installation has been completed.</li> <li>• Site survey has been performed to determine the network requirements for the application server, and interfaces have been configured.</li> <li>• NetBackup server is available to copy, sftp, the appropriate NetBackup Client software to the application server.</li> <li>• Execute Appendix A.3 of [7]</li> </ul> <p><b>Note:</b> Execute the following procedure to switch/migrate to having netBackup installed via platcfg instead of using NBAutoInstall (<i>Push Configuration</i>)</p> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Application server iLO:</b> Login	Login and launch the integrated remote console SSH to the application Server (PMAC or NOAM) as <b>admusr</b> using the management network for the PMAC or XMI network for the NOAM.

**Appendix J 1: Application NetBackup Client Installation (Using Platcfg)**

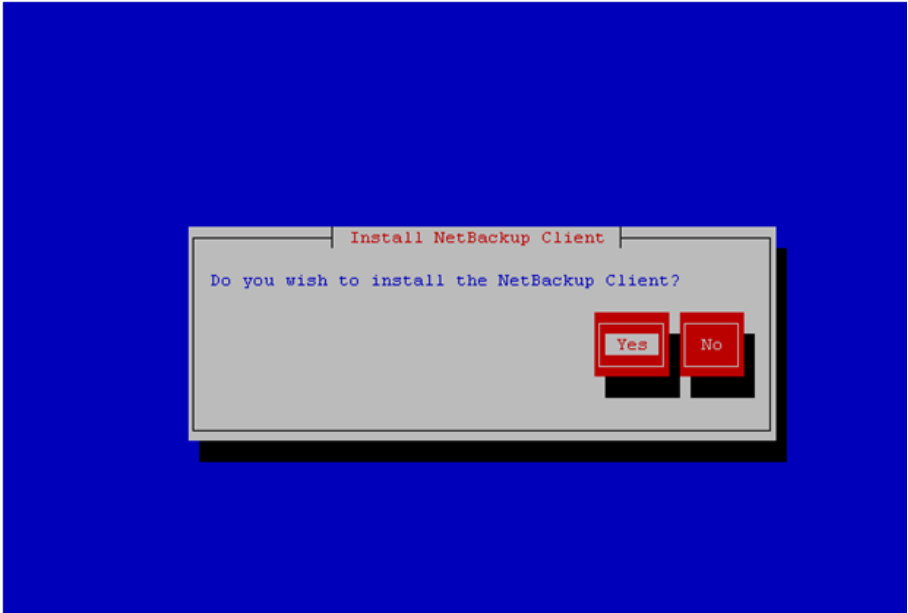

<p>2</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Navigate to NetBackup Configuration</p>	<p>Configure NetBackup Client on application server</p> <pre>\$ sudo su - platcfg</pre> <p>Navigate to <b>NetBackup -&gt; Configuration</b></p> 
<p>3</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Enable Push of NetBackup Client</p>	<p>Navigate to <b>NetBackup Configuration -&gt; Enable Push of NetBackup Client</b></p> 

## Appendix J 1: Application NetBackup Client Installation (Using Platcfg)

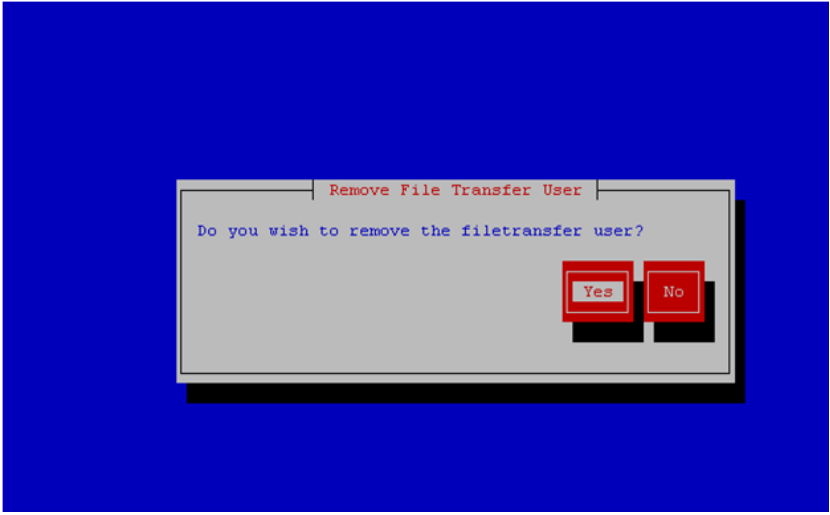

4 <input type="checkbox"/>	<b>Application server iLO:</b> Verify NetBackup Client software push is enabled.	<p>Navigate to <b>NetBackup Configuration -&gt; Verify NetBackup Client Push</b></p>  <pre>Platform Configuration Utility 3.05 (C) 2003 - 2011 Tekelec, Inc. Hostname: pmacDev8 Verify NetBackup Client Environment [OK] - User acct set up: netbackup [OK] - User netbackup shell set up: /usr/bin/rssh [OK] - Home directory: /home/rssh/home/netbackup [OK] - Tmp directory: /home/rssh/tmp [OK] - Tmp directory perms: 1777</pre> <p>Verify list entries indicate <b>OK</b> for NetBackup client software environment. Select <b>Exit</b> to return to NetBackup Configuration menu.</p>
-------------------------------	---	--

## Appendix J 1: Application NetBackup Client Installation (Using Platcfg)

6 <input type="checkbox"/>	<b>Application server iLO:</b> Install NetBackup Client software on application server.	<p>Execute the command:</p> <pre>\$ sudo chmod 555 /var/TKLC/home/rssh/tmp/client_config</pre> <p>Where <b>NETBACKUP_BIN</b> is the temporary directory where the netbackup client install programs were copied in <b>step 5</b>. The directory should look similar to the following: "/tmp/bp.XXXX/"</p> <p>Navigate to <b>NetBackup Configuration -&gt; Install NetBackup Client</b></p>  <p>Verify list entries indicate <b>OK</b> for NetBackup client software installation</p> <p>Select <b>Exit</b> to return to NetBackup Configuration menu</p>
-------------------------------	--	---

**Appendix J 1: Application NetBackup Client Installation (Using Platcfg)**

<p>7</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Verify NetBackup Client software installation on the application server.</p>	<p>Navigate to <b>NetBackup Configuration -&gt; Verify NetBackup Client Installation.</b></p>  <p>Verify list entries indicate <b>OK</b> for NetBackup Client software installation. Select <b>Exit</b> to return to NetBackup Configuration menu.</p>
<p>8</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Disable NetBackup Client software transfer to the application server.</p>	<p>Navigate to <b>NetBackup Configuration -&gt; Remove File Transfer User</b></p>  <p>Select <b>Yes</b> to remove the NetBackup file transfer user from the application server</p>
<p>9</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Exit platform configuration utility (platcfg)</p>	<p><b>Exit</b> platform configuration utility (platcfg)</p>

## Appendix J 1: Application NetBackup Client Installation (Using Platcfg)

10 **Application server iLO:**  
 Use platform configuration utility (platcfg) to modify hosts file with NetBackup server alias.

**Note:** After the successful transfer and installation of the NetBackup client software the NetBackup servers hostname can be found in the NetBackup **"/usr/opensv/netbackup/bp.conf"** file, identified by the **SERVER** configuration parameter.

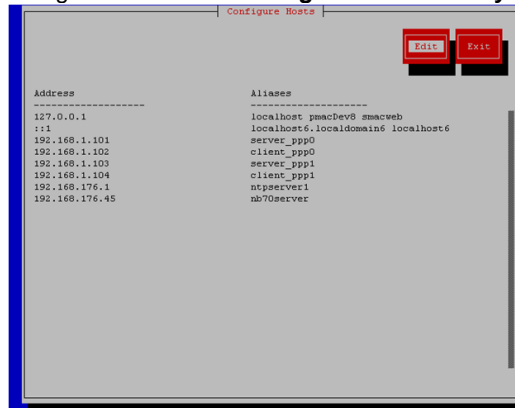

The NetBackup server hostname and IP address must be added to the application server's host's file. List NetBackup servers hostname:

```
$ sudo cat /usr/opensv/netbackup/bp.conf
SERVER = nb70server
CLIENT_NAME = pmacDev8
```

Use platform configuration utility (platcfg) to update application hosts file with NetBackup Server alias.

```
$ sudo su - platcfg
```

Navigate to **Network Configuration -> Modify Hosts File**

Select **Edit**, the **Host Action Menu** will be displayed.

Select **Add Host**, and enter the appropriate data

Select **OK**, confirm the host alias add, and exit Platform Configuration Utility

## Appendix J 1: Application NetBackup Client Installation (Using Platcfg)

11 <input type="checkbox"/>	<b>Application server iLO:</b> Create links to NetBackup client notify scripts on application server where NetBackup expects to find them.	Copy the notify scripts from appropriate path on application server for given application: <pre style="border: 1px solid black; padding: 5px;">\$ sudo ln -s &lt;path&gt;/bpstart_notify /usr/opensv/netbackup/bin/bpstart_notify  \$ sudo ln -s &lt;path&gt;/bpend_notify /usr/opensv/netbackup/bin/bpend_notify  An example of &lt;path&gt; is "/usr/TKLC/appworks/sbin"</pre>
--------------------------------	---	--

### NETBACKUP CLIENT INSTALL/UPGRADE WITH NBAUTOINSTALL

**Note:** Execute the following procedure to switch/migrate to having netBackup installed via NBAutoInstall (*Push Configuration*) instead of manual installation using platcfg

**Note:** Executing this procedure will enable TPD to automatically detect when a Netbackup Client is installed and then complete TPD related tasks that are needed for effective Netbackup Client operation. With this procedure, the Netbackup Client install (pushing the client and performing the install) is the responsibility of the customer and is not covered in this procedure.

## Appendix J 2: Application NetBackup Client Installation (NBAUTOINSTALL)

<b>S T E P #</b>	This procedure explains the Netbackup installation with NBAUTOINSTALL <p><b>Prerequisites:</b></p> <ul style="list-style-type: none"> <li>• Application server platform installation has been completed.</li> <li>• Site survey has been performed to determine the network requirements for the application server, and interfaces have been configured.</li> <li>• NetBackup server is available to copy, sftp, the appropriate NetBackup Client software to the application server.</li> </ul> <p><b>Note:</b> If the customer does not have a way to push and install Netbackup Client, then use Netbackup Client Install/Upgrade with platcfg.</p> <p><b>Note:</b> It is required that this procedure is executed before the customer does the Netbackup Client install.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Application server iLO:</b> Login	Login and launch the integrated remote console.  SSH to the application Server (PMAC or NOAM) as <i>admusr</i> using the management network for the PMAC or XMI network for the NOAM.

## Appendix J 2: Application NetBackup Client Installation (NBAUTOINSTALL)

<p>2</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Enable nbAutoInstall</p>	<p>Execute the following command:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo /usr/TKLC/plat/bin/nbAutoInstall --enable</pre>
<p>3</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Create links to NetBackup client notify scripts on application server where NetBackup expects to find them.</p>	<p>Execute the following commands</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo mkdir -p /usr/openv/netbackup/bin/  \$ sudo ln -s &lt;path&gt;/bpstart_notify /usr/openv/netbackup/bin/bpstart_notify  \$ sudo ln -s &lt;path&gt;/bpend_notify /usr/openv/netbackup/bin/bpend_notify</pre> <p>Note: An example of &lt;path&gt; is "/usr/TKLC/plat/sbin"</p>
<p>4</p> <p><input type="checkbox"/></p>	<p><b>Application server iLO:</b> Verify NetBackup configuration file</p>	<p>Open <b>/usr/openv/netbackup/bp.conf</b> and make sure it points to the NetBackup Server using the following command:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo vi /usr/openv/netbackup/bp.conf</pre> <pre>SERVER = nb75server CLIENT_NAME = 10.240.10.185 CONNECT_OPTIONS = localhost 1 0 2</pre> <p><b>Note:</b> Verify that the above server name matches the NetBackup Server, and verify that the CLIENT_NAME matches the hostname or IP of the local client machine, if they do not, update them as necessary.</p> <p>Edit <b>/etc/hosts</b> using the following command and add the NetBackup server:</p> <pre style="border: 1px solid black; padding: 5px;">\$ sudo vi /etc/hosts</pre> <pre>e.g.: 192.168.176.45      nb75server</pre> <p><b>Note:</b> The server will now periodically check to see if a new version of Netbackup Client has been installed and will perform necessary TPD configuration accordingly. At any time, the customer may now push and install a new version of Netbackup Client.</p>

## CREATE NETBACKUP CLIENT CONFIG FILE

This procedure will copy a NetBackup Client config file into the appropriate location on the TPD based application server. This config file will allow a customer to install previously unsupported versions of NetBackup Client by providing necessary information to TPD.

### Appendix J 3: Create NetBackup Client Config File

<b>S T E P #</b>	<p>This procedure will copy a NetBackup Client config file into the appropriate location on the TPD based application server. This config file will allow a customer to install previously unsupported versions of NetBackup Client by providing necessary information to TPD.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Application server iLO:</b> Create NetBackup Config File	<p>Create the NetBackup Client config file on the server using the contents that were previously determined. The config file should be placed in the <i>/usr/TKLC/plat/etc/netbackup/profiles</i> directory and should follow the following naming conventions:            NB\$ver.conf</p> <p>Where \$ver is the client version number with the periods removed. For the 7.5 client the value of \$ver would be 75 and the full path to the file would be:  <i>/usr/TKLC/plat/etc/netbackup/profiles/NB75.conf</i></p> <p><b>Note:</b> The config files must start with "NB" and must have a suffix of ".conf". The server is now capable of installing the corresponding NetBackup Client.            The server is now capable of installing the corresponding NetBackup Client.</p>

### Appendix J 3: Create NetBackup Client Config File

2 <input type="checkbox"/>	<b>Application server iLO:</b> Create NetBackup Config script	<p>Create the NetBackup Client config script file on the server using the contents that were previously determined. The config script file should be placed in the <code>/usr/TKLC/plat/etc/netbackup/scripts</code> directory. The name of the NetBackup Client config script file should be determined from the contents of the NetBackup Client config file.</p> <p>As an example for the NetBackup 7.5 client the following is applicable:</p> <p><u>NetBackup Client config:</u> <code>/usr/TKLC/plat/etc/netbackup/profiles/NB75.conf</code></p> <p><u>NetBackup Client config script:</u> <code>/usr/TKLC/plat/etc/netbackup/scripts/NB75</code></p> <p>Note: Change the client config and script permission by executing the following command:</p> <p>Illustrative purposes only:</p> <pre>\$ sudo chmod 555 /usr/TKLC/plat/etc/netbackup/profiles/NB75.conf \$ sudo chmod 55 /usr/TKLC/plat/etc/netbackup/scripts/NB75</pre>
-------------------------------	--	--

## OPEN PORTS FOR NETBACKUP CLIENT SOFTWARE

This procedure will use iptables and ip6tables (if applicable) to open the applicable ports for the NetBackup client to communicate to the NetBackup Server.

### Appendix J 4: Open ports for NetBackup Client Software

<p><b>S</b> <b>T</b> <b>E</b> <b>P</b> <b>#</b></p>	<p>This procedure will use iptables and ip6tables (if applicable) to open the applicable ports for the NetBackup client to communicate to the NetBackup Server.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1</p> <p><input type="checkbox"/></p>	<p><b>Active NOAM Server:</b> Login</p>	<p>Establish an SSH session to the active NOAM server. Login as <b>admusr</b>.</p>
<p>2</p> <p><input type="checkbox"/></p>	<p><b>Active NOAM Server:</b> Open Ports for NetBackup Client Software</p>	<p>Change directories to <code>/usr/TKLC/plat/etc/iptables</code></p> <pre style="border: 1px solid black; padding: 2px;">\$ cd /usr/TKLC/plat/etc/iptables</pre> <p>Using “vi”, create a file named <code>60netbackup.ipt</code></p> <pre style="border: 1px solid black; padding: 2px;">\$ sudo vi 60netbackup.ipt</pre> <p>Insert the following contents into the file:</p> <pre># NetBackup ports. # *filter -A INPUT -m state --state NEW -m tcp -p tcp --dport 1556 -j ACCEPT -A INPUT -m state --state NEW -m tcp -p tcp --dport 13724 -j ACCEPT -A INPUT -m state --state NEW -m tcp -p tcp --dport 13782 -j ACCEPT</pre> <p>Now save and close the file using <b>:wq</b></p> <p><b>Note:</b> If system servers are to use IPv6 networks for NetBackup client-to-server communication, then repeat this procedure to create a file named <code>60netbackup.ip6t</code>, with the same contents as shown above, in the directory <code>/usr/TKLC/plat/etc/ip6tables</code>.</p>
<p>3</p> <p><input type="checkbox"/></p>	<p><b>Standby NOAM:</b> Open Ports for NetBackup Client Software</p>	<p>Repeat <b>Steps 1-2</b> for the standby NOAM to open ports for NetBackup client software.</p>

#### Appendix J 4: Open ports for NetBackup Client Software

4 <input type="checkbox"/>	<b>Active SOAM:</b> Open Ports for NetBackup Client Software	Repeat <b>Steps 1-2</b> for the active SOAM to open ports for NetBackup client software.
<input type="checkbox"/>	<b>Standby SOAM:</b> Open Ports for NetBackup Client Software	Repeat <b>Steps 1-2</b> for the standby SOAM to open ports for NetBackup client software.

## Appendix K: IDIH Fast Deployment Configuration

The fdconfig file contains 8 sections. The following is a list of those sections with a short description:

Section	Description
Software Images	A list of the TVOE, TPD, and iDIH application versions.
TVOE Blade	Contains the Enclosure ID, OA addresses, location, name and Hardware type of an HP Blade.
TVOE RMS	Includes Hardware Type and ILO address of the Rack Mount Server.
Type	Management or Standalone
TVOE Configuration	Contains all ip addresses, hostname and network devices for the TVOE host.
Guest Configurations (3)	The guest sections contain network and hostname configuration for the Oracle, Mediation and Application guests.

### Software Images

Be sure to update the software images section based on software versions you intend to install. The following table outlines typical installation failures caused by incorrect software versions. Use the “fdconfig dumpsteps –file=” command to produce output of a Fast Deployment Session.

Software Image	Element	Command Text
TVOE ISO	mgmtsrvrtvoe	IPM Server
TPD ISO	Oracle,tpd Mediation,tpd Application,tpd	IPM Server
iDIH Mediation ISO	Mgmtsrvrtvoe,configExt	Transfer File
iDIH Oracle ISO iDIH Mediation ISO iDIH Application ISO	Oracle,ora Mediation,med Application,app	Upgrade Server

### TVOE Blade

The TVOE Blade section should be commented out if you intend to install a Rack Mount Server. Be sure to fill out the sections properly. Enclosure ID, OA IP addresses and the Bay must be correct or the PMAC will not be able to discover the blade. Hardware profiles are different for Gen8 and Gen6. Gen6 blades profiles have fewer CPU's and Ram allocated to the Guest.

### TVOE RMS

The TVOE RMS section should be commented out if you intend to install a TVOE Blade. It contains the ILO ip address and Hardware profile. If the ILO IP address is incorrect the PMAC will not be able to discover the Rack Mount Server, server discovery must occur before the installation can begin.

## TYPE

If your IDIH system is to be collocated with a PMAC on the same TVOE host make sure “Type=Management” is not commented out. It will setup a management network instead of an xmi network and it will remove the software stanza inside of the TVOE server stanza. If you are setting up a standalone IDIH then comment out “Type=Management” which will setup an xmi bridge.

## TVOE CONFIGURATION

This section defines the hostname, network ip addresses for the TVOE bridges and it defines the network devices. You can define the devices you intend to use for bonded interfaces and the tagged bonded interfaces you intend to associate with a bridge.

Execute “cat hw\_id” or hardwareInfo” command on TVOE host to get the hardware ID for the “Hw=” parameter. **Note:** For Gen9 (Hardware ID “ProLiantDL380Gen9”), please use Gen8’s Hardware ID (“ProLiantDL380pGen8”).

## GUEST CONFIGURATION

These sections contain the hostname, IPv4 addresses, IPv4 netmask, IPv4 gateway, and IPv6 addresses. If you do not intend to configure IPv6 addresses then leave those IP addresses commented out. The IPv6 netmask is included in the IPv6 address.

Below is FDC configuration template included on the mediation ISO:

```
# Software Images
TvoeIso="TVOE-3.0.1.0.0_86.20.0-x86_64"

## Appendix M: DSR Fast Deployment Configuration

The following table contains the variables that the DSR fast deployment script will prompt for during NOAM deployment.

Fast Deployment Variable	Description	Value
Cabinet ID of this Enclosure? (NOAM Blade Deployment Only)	This value should match the value entered from Section “Enclosure and Blades Setup” from reference [7]	<input type="text"/>
Enclosure ID? (NOAM Blade Deployment Only)	This value should match the value entered from Section “Enclosure and Blades Setup” from reference [7]	<input type="text"/>
Bay number of the First NOAM TVOE Host (NOAM Blade Deployment Only)	This value will be the blade number of the first NOAM server. <b>Note:</b> ‘F’ MUST append the bay number (example: 8F)	<input type="text"/>
Bay number of the Second NOAM TVOE Host (NOAM Blade Deployment Only)	This value will be the blade number of the second NOAM server. <b>Note:</b> ‘F’ MUST append the bay number (example: 16F)	<input type="text"/>
iLO/iLOM IP address of the First Rack Mount Server (NOAM Rack Mount Server Deployments Only)	This value will be the iLO/iLOM IP address of the First rack mount server.  <b>Note:</b> If the NOAM is located on the same TVOE host as the PMAC, this value will be the one entered in procedure “Add Rack Mount Server to the PM&C System Inventory” from reference [7]	<input type="text"/>
iLO/iLOM IP address of the Second Rack Mount Server (NOAM Rack Mount Server Deployments Only)	This value will be the iLO/iLOM IP address of the First rack mount server.	<input type="text"/>
iLO/iLOM username of the First Rack Mount Server (NOAM Rack Mount Server Deployments Only)	This value will be the iLO/iLOM username of the first rack mount server.  <b>Note:</b> If the NOAM is located on the same TVOE host as the PMAC, this value will be the one entered in procedure “Add Rack Mount Server to the PM&C System Inventory” from reference [7]	<input type="text"/>
iLO/iLOM username of the Second Rack Mount Server (NOAM Rack Mount Server Deployments Only)	This value will be the iLO/iLOM username of the second rack mount server.	<input type="text"/>
iLO/iLOM password of the First Rack Mount Server (NOAM Rack Mount Server Deployments Only)	This value will be the iLO/iLOM password of the first rack mount server.  <b>Note:</b> If the NOAM is located on the same TVOE host as the PMAC, this value will be the one entered in procedure “Add Rack Mount Server to the PM&C System Inventory” from reference [7]	<input type="text"/>

iLO/iLOM password of the Second Rack Mount Server (NOAM Rack Mount Server Deployments Only)	This value will be the iLO/iLOM password of the second rack mount server.	<input type="text"/>
Hostname for the First TVOE Host	This value will be the hostname of the first TVOE host	<input type="text"/>
Hostname for the Second TVOE Host	This value will be the hostname of the second TVOE host	<input type="text"/>
XMI IP address of the First TVOE Host (NOAM Blade Deployment Only)	This value will be the XMI IP address of the first TVOE Host.	<input type="text"/>
XMI IP address of the Second TVOE Host (NOAM Blade Deployment Only)	This value will be the XMI IP address of the second TVOE Host.	<input type="text"/>
PMAC VM Name of the First NOAM	This value will be the VM name (visible from <b>Main Menu -&gt; VM Management</b> on the PMAC.)	<input type="text"/>
PMAC VM Name of the Second NOAM	This value will be the VM name (visible from <b>Main Menu -&gt; VM Management</b> on the PMAC.)	<input type="text"/>
First NOAM Hostname	This value will be the first NOAM hostname.	<input type="text"/>
Second NOAM Hostname	This value will be the second NOAM hostname.	<input type="text"/>
XMI IP address of the First NOAM	This value will be the XMI IP address of the first NOAM. <b>Note:</b> this value will be used to access the NOAM GUI for configuration	<input type="text"/>
Customer Provided NTP Server #1 Customer Provided NTP Server #2 Customer Provided NTP Server #3	Customer provided NTP source. Refer to Figure 2 of [7].	NTP Server #1: <input type="text"/> NTP Server #2: <input type="text"/> NTP Server #3: <input type="text"/>
XMI bond interface	This value will be the XMI bond interface. Example: bond0.3	<input type="text"/>
XMI VLAN ID	This value will be the XMI VLAN ID. Example: 3	<input type="text"/>
IMI bond interface	This value will be the IMI bond interface. Example: bond0.4	<input type="text"/>
IMI VLAN ID	This value will be the IMI VLAN ID. Example: 4	<input type="text"/>

Management bond interface (NOAM Rack Mount Server Deployments Only)	This value will be the Management bond interface. Example: bond0.2  <b>Note:</b> If NOAMs are located on the same TVOE host as the PMAC, this value MUST match what was configured in Section “TVOE Network Configuration” of reference [7].	
Management VLAN ID (NOAM Rack Mount Server Deployments Only)	This value will be the Management VLAN ID. Example: 2  <b>Note:</b> If NOAMs are located on the same TVOE host as the PMAC, this value MUST match what was configured in Section “TVOE Network Configuration” of reference [7].	
xmi Network IP Subnet Mask	This value will be the xmi IP network subnet mask.	
Management Network IP subnet mask	This value will be the management IP network subnet mask.	
xmi Network IP default gateway	This value will be the default gateway of the xmi network.	
Management Network IP default gateway	This value will be the default gateway of the management network.	

## Appendix N: Growth/De-Growth

For scenarios where growth or de-growth is required, it may be necessary to delete or re-shuffle VM guests, SDS, and DSR servers. Appendix T.1 will explain how to add individual VMs and add various DSR/SDS servers. Appendix T.2 will explain how to delete individual VMs and move or remove various DSR/SDS servers.

### Appendix N.1: Growth

For growth scenarios where it is necessary to add DSR servers, the following sequence of steps should be followed:

Step	Procedure(s)
Perform Backups	Appendix N.1.1
Perform system health check	Appendix N.1.2
Identify Servers which will be affected by the Growth: <ul style="list-style-type: none"> <li>• DR-NOAM</li> <li>• SOAM Spares</li> <li>• MP (SBR, SS7MP, IPFE)</li> </ul>	
Add new servers  Create and Configure the VMs on new servers (SOAM spare and DR-NOAMs Only)	Appendix N.1.3
Configure Servers in new VM locations	NOAM/DR-NOAM: Appendix N.1.4  SOAM: Appendix N.1.5  MP: Appendix N.1.6
Post Growth Health Check	Appendix N.1.7
Post Growth Backups	Appendix N.1.8

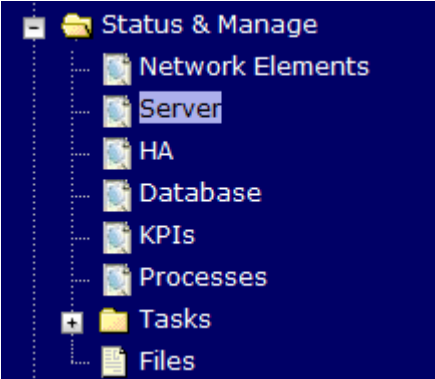

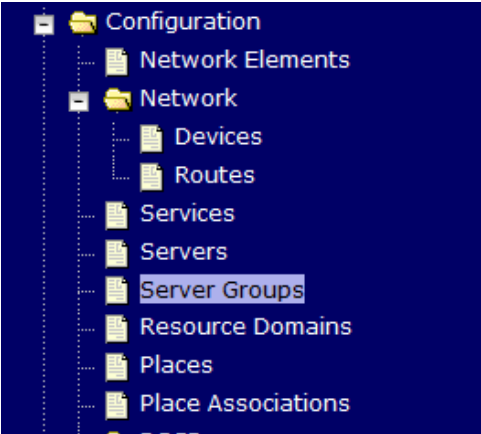

### Appendix N.1.1 Perform Backups

<b>S T E P #</b>	<p>This procedure will reference steps to backup all necessary items before a growth scenario.</p> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Backup TVOE</b>	Backup all TVOE host configurations by executing <b>Procedure 39</b>
2 <input type="checkbox"/>	<b>Backup PMAC</b>	Backup the PMAC application by executing <b>Procedure 40</b>
3 <input type="checkbox"/>	<b>Backup NOAM/SOAM databases</b>	Backup the NOAM and SOAM Databases by executing <b>Procedure 41</b> and <b>Procedure 42</b>

## Appendix N.1.2 Perform Health Check

<b>S T E P #</b>	<p>This procedure will provide steps verify system status and log all alarms.</p> <p>Check off (✓) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1</p> <input type="checkbox"/>	<p><b>NOAM VIP GUI:</b> Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></p> </div> <p>Login as the <i>guiadmin</i> user:</p> <div style="text-align: center; margin: 20px 0;">  <p><b>Oracle System Login</b></p> <hr style="width: 30%; margin: 0 auto;"/> <p style="font-size: small;">Fri Mar 20 12:29:52 2015 EDT</p> </div> <div style="border: 1px solid gray; padding: 10px; margin: 20px auto; width: 80%;"> <p style="text-align: center;"><b>Log In</b></p> <p style="text-align: center;">Enter your username and password to log in</p> <p>Username: <input type="text" value="guiadmin"/></p> <p>Password: <input type="password" value="••••••"/></p> <p style="text-align: center;"><input type="checkbox"/> Change password</p> <p style="text-align: center;"><input type="button" value="Log In"/></p> </div> <p style="text-align: center; font-size: small;">Welcome to the Oracle System Login.</p> <p style="text-align: center; font-size: x-small;">Unauthorized access is prohibited. ## Appendix N.2.3 Removing Server from Server Group

<p>11</p> <p>☐</p>	<p><b>NOAM VIP GUI: Login</b></p>	<p>Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></p> </div> <p>Login as the <i>guiadmin</i> user:</p> <div style="text-align: center;">  <p>The screenshot shows the Oracle System Login page. At the top is the Oracle logo. Below it is the text 'Oracle System Login' and the date 'Fri Mar 20 12:29:52 2015 EDT'. A central box titled 'Log In' contains the instruction 'Enter your username and password to log in'. There are input fields for 'Username: guiadmin' and 'Password: .....'. A checkbox for 'Change password' is present. A 'Log In' button is at the bottom of the box. Below the box, it says 'Welcome to the Oracle System Login.' and a warning: 'Unauthorized access is prohibited. This Oracle system requires the use of Microsoft Internet Explorer 8.0, 9.0, or 10.0 with support for JavaScript and cookies.' At the very bottom, it states 'Oracle and Java are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.'</p> </div>

### Appendix N.2.3 Removing Server from Server Group

13

**NOAM  
VIP GUI:**  
Remove  
Server  
From  
Server  
Group

Navigate to **Main Menu -> Configuration -> Server Groups**

Select the server group for which the server from **step 2** that was placed OOS.

Click **Edit**

Uncheck the server from **step 2** from the *SG Inclusion* column:

	Value	Description
Group Name	DAMP *	Unique identifier used to I and must not start with a c
	C *	Select one of the Levels s
t	Oahu_SOAM *	Select an existing Server C
on	DSR (multi-active cluster) *	Select one of the Function
Replication Connection Count	1	Specify the number of TCP 8.]
<b>SG Inclusion</b>		<b>Preferred HA Role</b>
DAMP-1	<input type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare
DAMP-2	<input checked="" type="checkbox"/> Include in SG	<input type="checkbox"/> Preferred Spare
<b>Signment</b>		
VIP Address		Add

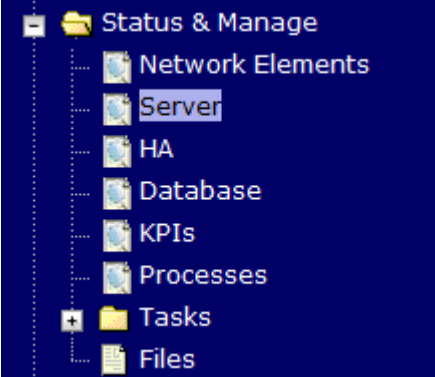

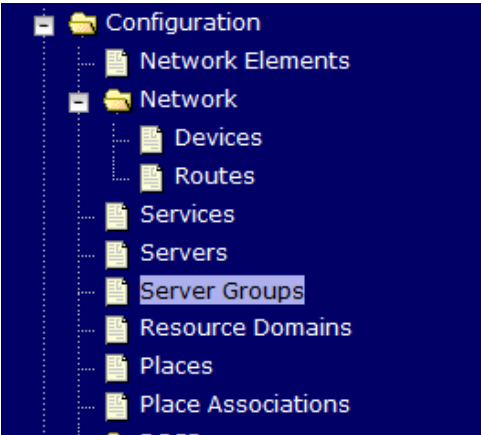

Click **Ok**

## Appendix N.2.7 Post Growth Health Check

<p><b>S T E P #</b></p>	<p>This procedure will provide steps verify system status and log all alarms after Growth.</p> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
<p>1 <input type="checkbox"/></p>	<p><b>NOAM VIP GUI:</b> Login</p>	<p>Establish a GUI session on the NOAM server by using the VIP IP address of the NOAM server. Open the web browser and enter a URL of:</p> <div data-bbox="480 667 1334 709" style="border: 1px solid black; padding: 2px;"> <p><code>http://&lt;Primary_NOAM_VIP_IP_Address&gt;</code></p> </div> <p>Login as the <i>guiadmin</i> user:</p> <div data-bbox="480 806 1334 1394" style="text-align: center;">  </div>

## Appendix N.2.7 Post Growth Health Check

<p>2</p> <p>☐</p>	<p><b>NOAM VIP GUI:</b> Verify Server Status</p>	<p>Navigate to <b>Main Menu -&gt; Status &amp; Manage -&gt; Server</b></p>  <p>Verify all Server Status is Normal (Norm) for: Alarm (Alm), Database (DB), Replication Status, and Processes (Proc).</p> <table border="1" data-bbox="479 785 1338 909"> <thead> <tr> <th>Appl State</th> <th>Alm</th> <th>DB</th> <th>Reporting Status</th> <th>Proc</th> </tr> </thead> <tbody> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> <tr> <td>Enabled</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> <td>Norm</td> </tr> </tbody> </table>	Appl State	Alm	DB	Reporting Status	Proc	Enabled	Norm	Norm	Norm	Norm	Enabled	Norm	Norm	Norm	Norm	Enabled	Norm	Norm	Norm	Norm	Enabled	Norm	Norm	Norm	Norm
Appl State	Alm	DB	Reporting Status	Proc																							
Enabled	Norm	Norm	Norm	Norm																							
Enabled	Norm	Norm	Norm	Norm																							
Enabled	Norm	Norm	Norm	Norm																							
Enabled	Norm	Norm	Norm	Norm																							
<p>3</p> <p>☐</p>	<p><b>NOAM VIP GUI:</b> Verify Server Configuration</p>	<p>Navigate to <b>Main Menu -&gt; Configuration -&gt; Server Groups</b></p>  <p>Verify the configuration data is correct for your network.</p>																									

**Appendix N.2.7 Post Growth Health Check**

<p>4 ☐</p>	<p><b>NOAM VIP GUI:</b> Log Current Alarms</p>	<p>Navigate to <b>Main Menu -&gt; Alarms &amp; Events -&gt; View Active</b></p>  <p>Click on the <b>Report</b> button</p>  <p><b>Save</b> or <b>Print</b> this report, keep copies for future reference.</p>  <p>Compare this alarm report with those gathered in procedure <b>Appendix N.1.2</b></p>
<p>5 ☐</p>	<p><b>SOAM VIP GUI:</b> Repeat</p>	<p>Repeat <b>Steps 1-3</b> for the SOAM</p>

### Appendix N.1.8 Post Growth Backups

<b>S T E P #</b>	<p>This procedure will reference steps to backup all necessary items after a growth scenario.</p> <p>Check off (√) each step as it is completed. Boxes have been provided for this purpose under each step number.</p> <p>If this procedure fails, contact <b>Appendix O: My Oracle Support (MOS)</b>, and ask for assistance.</p>	
1 <input type="checkbox"/>	<b>Backup TVOE</b>	Backup all TVOE host configurations by executing <b>Procedure 39</b>
2 <input type="checkbox"/>	<b>Backup PMAC</b>	Backup the PMAC application by executing <b>Procedure 40</b>
3 <input type="checkbox"/>	<b>Backup NOAM/SOAM databases</b>	Backup the NOAM and SOAM Databases by executing <b>Procedure 41</b> and <b>Procedure 42</b>

## Appendix O: My Oracle Support (MOS)

MOS (<https://support.oracle.com>) is your initial point of contact for all product support and training needs. A representative at Customer Access Support (CAS) can assist you with MOS registration.

Call the CAS main number at **1-800-223-1711** (toll-free in the US), or call the Oracle Support hotline for your local country from the list at <http://www.oracle.com/us/support/contact/index.html>.

When calling, there are multiple layers of menus selections. Make the selections in the sequence shown below on the Support telephone menu:

- 1) For the first set of menu options, select 2, "New Service Request". You will hear another set of menu options.
- 2) In this set of menu options, select 3, "Hardware, Networking and Solaris Operating System Support". A third set of menu options begins.
- 3) In the third set of options, select 2, "Non-technical issue". Then you will be connected to a live agent who can assist you with MOS registration and provide Support. Identifiers. Simply mention you are a Tekelec Customer new to MOS.
