

# Oracle® Communications MetaSolv Solution ASR

Release Notes

Release 52.0

**E69069-03**

September 2016

---

This document describes the enhancements that are introduced and the Access Service Ordering Guidelines (ASOG) issues that have been implemented in Oracle Communications MetaSolv Solution Access Service Request (ASR) 52.

This document consists of the following sections:

- [Data Conversions](#)
- [Software Support](#)
- [Product Enhancements](#)
- [ASOG Issues Implemented](#)
- [Fixes in This Release](#)
- [Known Problems in This Release](#)

See *ASR Installation Guide* for instructions about installing ASR 52.

## Data Conversions

The `ASR52BD.sql` file is included in this release. The installer provides all upgrades to MetaSolv Solution executable files and stored procedure files (**Procs** directory).

## Software Support

MetaSolv Solution 6.3.x supports ASR 52 on the following software versions:

- Oracle Enterprise Linux Server 6.2 (or later) and 7 (or later)
- Red Hat Enterprise Linux Server 6.2 (or later) and 7 (or later)
- Oracle Solaris 10 1/13 and Solaris 11
- Windows Server 2012 R2
- Oracle WebLogic Server 12.1.3
- Oracle Database 12c R1
- JacORB 3.5

MetaSolv Solution 6.2.x supports ASR 52 on the following software versions:

- Oracle Linux Server release 5.5 (Carthage)
- Red Hat Enterprise Linux Server 5
- Oracle Solaris 10 update 5/08 or higher (on a SPARC machine)

- AIX 6.1 or higher (on a POWER6 machine)
- HP-UX 11.23 or higher (on an Itanium machine. 32-bit and 64-bit JAVA supported)
- Windows Server 2008 R2
- Oracle WebLogic Server 10.3.1
- Oracle Database 11g R2
- JacORB 2.3.1

## Product Enhancements

This section describes new enhancements in ASR 52.

### Enhanced Platform Support

ASR now supports updated operating systems and underlying software systems. See ["Software Support"](#) for more information.

### New Fields

#### Administrative (ADMIN) Form

- Wireless Site Indicator (WSI-P) - PRILOC

#### Ethernet Virtual Connection (EVC) Form

- Priority Bit Color Ingress (P-BITC-I)
- Priority Bit Color Egress (P-BITC-E)

#### Confirmation Notice (CN) Form

- Multi-Chassis Link Aggregation Group ID (MCLAG-ID)

#### Switched Ethernet Services (SES) Form

- Color Identifier (CI)
- Multi-Chassis Link Aggregation Group (MCLAG)
- Multi-Chassis Link Aggregation Group ID (MCLAG-ID)
- Multi-Chassis Link Aggregation Group Protection (MCLAG-P)

### Modified Fields

#### Administrative (ADMIN) Form

- The length of the **Billing Account Number (BAN)** field has been increased from 13 to 14.
- The **Wireless Site Indicator (WSI)** field has been renamed to **Wireless Site Indicator (WSI-S) - SECLOC** and its existing definition has been modified.
- The existing definition of the **Early Date Acceptance (EDA)** field has been modified.

### Confirmation Notice (CN) Form

- The length of the **Billing Account Number (BAN)** field has been increased from 13 to 14.

### Ethernet Virtual Connection (EVC) Form

The existing definition of the following fields has been modified:

- Priority Bit (P-BIT)
- Related UNI Identifier (RUID)

### Multiple-Exchange Company (Multi-EC) Form

- The length of the **Billing Account Number (BAN)** field has been increased from 13 to 14.

### Service Address Location Information (SALI) Form

The length of the following fields has been increased from 15 to 18:

- Access Telephone Number (ACTEL)
- Alternate Access Telephone Number (AACTEL)
- Alternate Local Contact Telephone Number (ALCON TEL)
- Additional Alternate Local Contact Telephone Number (AALCON TEL)

## ASOG Issues Implemented

Table 1 describes the Access Service Ordering Guidelines (ASOG) issues that have been implemented in this release.

**Table 1 ASOG Issues**

Issue Number	Description
3519	The following changes have been made in the ADMIN form: <ul style="list-style-type: none"><li>■ Added new <b>Wireless Site Indicator (WSI-P) - PRILOC</b> field.</li><li>■ The <b>Wireless Site Indicator (WSI)</b> field has been renamed to <b>Wireless Site Indicator (WSI-S) - SECLOC</b> and its existing definition has been modified.</li><li>■ Added a new valid entry to the <b>Early Date Acceptance (EDA)</b> field.</li></ul>
3529	The length of the <b>Billing Account Number (BAN)</b> field has been increased from 13 to 14 in the following forms: <ul style="list-style-type: none"><li>■ ADMIN</li><li>■ CN</li><li>■ Multi-EC</li></ul>
3530	Implemented UI and API usage validation changes for the <b>End User Indicator (EU)</b> field in the ADMIN form.
3531	The existing definition of the <b>Early Date Acceptance (EDA)</b> field has been modified in the ADMIN form. Added a new valid entry to the <b>Response Type (RT)</b> field in the CN form. Implemented UI and API usage validation changes for the <b>Supplement Type (SUP)</b> field in the ADMIN form.

**Table 1 (Cont.) ASOG Issues**

<b>Issue Number</b>	<b>Description</b>
3532	Added a new valid entry to the <b>General Exchange Tariff Options Code (GETO)</b> field in the Transport form.
3533	The length of the following fields has been increased from 15 to 18 in the SALI form: <ul style="list-style-type: none"> <li>■ Access Telephone Number (ACTEL)</li> <li>■ Alternate Access Telephone Number (AACTEL)</li> <li>■ Alternate Local Contact Telephone Number (ALCON TEL)</li> <li>■ Additional Alternate Local Contact Telephone Number (AALCON TEL)</li> </ul>
3535	Added new <b>Color Identifier (CI)</b> field in the SES form. The following changes have been made in the EVC form: <ul style="list-style-type: none"> <li>■ Added new <b>Priority Bit Color Ingress (P-BITC-I)</b> and <b>Priority Bit Color Egress (P-BITC-E)</b> fields.</li> <li>■ The existing definition of the <b>Priority Bit (P-BIT)</b> field has been modified in the EVC form.</li> <li>■ Implemented UI and API usage validation changes for the <b>Priority Bit (P-BIT)</b> field.</li> </ul>
3537	Implemented UI and API usage validation changes for the <b>Service Virtual Local Area Network (S-VLAN)</b> field in the EVC form.
3539	Implemented UI and API usage validation changes for the <b>New Construction (NCON)</b> field in the SALI form.
3540	Added the following new fields in the SES form: <ul style="list-style-type: none"> <li>■ Multi-Chassis Link Aggregation Group (MCLAG)</li> <li>■ Multi-Chassis Link Aggregation Group ID (MCLAG-ID)</li> <li>■ Multi-Chassis Link Aggregation Group Protection (MCLAG-P)</li> </ul> Added new <b>Multi-Chassis Link Aggregation Group ID (MCLAG-ID)</b> field in the CN form. The existing definition of the <b>Related UNI Identifier (RUID)</b> field has been modified in the EVC form. Implemented UI and API usage validation changes for the <b>Related UNI Identifier (RUID)</b> field in the EVC form.

## Fixes in This Release

[Table 2](#) lists the customer-reported bugs that have been fixed in this release.

**Table 2 Fixed Bugs**

<b>BugDB Number</b>	<b>Description</b>
20854485	<p><b>Issue</b></p> <p>When running the importEUSA ASR CORBA API, if the <b>REFNUM</b> field is not populated in the first SALI form, the API returns the following error:</p> <pre>Field: [LMetaSolv.CORBA.WDI.WDIError; = Array (values following) [0] Field: code = 25151 [0] Field: reason = PON: XXX   FORM : SALI  :: REFNUM is required. [1] Field: code = 25164 [1] Field: reason = PON: XXX   FORM : 'ASR'  :: Please correct the above listed errors to initiate the OBF usage rules validation.</pre> <p><b>Resolution</b></p> <p>Code has been corrected and now the importEUSA ASR CORBA API runs successfully by assigning the REFNUM value as 0001 when the REFNUM field is not populated in the first SALI form.</p>
17344449	<p><b>Issue</b></p> <p>When opening the ACI circuit, the application intermittently returns the following error:</p> <pre>An error has occurred in the script on this page. Line: 11 Char: 14 Error: 'document.all.buttonRepeat2' is null or not an object</pre> <p><b>Resolution</b></p> <p>The code has been corrected and now the ACI form opens properly without any errors.</p>
17347555	<p><b>Issue</b></p> <p>The end user location name is updated in the End User Location window when you modify the <b>EUNAME</b> field in the ASR SALI form despite the <b>Update EUL name when the End User name is modified in the ASR SALI form</b> preference being set to N.</p> <p><b>Resolution</b></p> <p>The code has been corrected and now the end user location name is not updated in the End User Location window when you modify the <b>EUNAME</b> field in the ASR SALI form with the <b>Update EUL name when the End User name is modified in the ASR SALI form</b> preference set to N.</p>

**Table 2 (Cont.) Fixed Bugs**

<b>BugDB Number</b>	<b>Description</b>
14490154	<p><b>Issue</b></p> <p>When you enter a circuit ID (ECCKT) in the <b>ECCKT</b> field in the Admin form on an ASR Change/Disconnect order, the application allows you to enter canceled and disconnected circuits. This issue occurs in both GUI and API.</p> <p><b>Resolution</b></p> <p>The code has been corrected and now when you enter a circuit ID (ECCKT) in the <b>ECCKT</b> field in the Admin form on an ASR Change/Disconnect order, the application displays the following error message for canceled and disconnected circuits:</p> <p>Error: The circuit corresponding to the circuit ID provided in the ECCKT field should not be in a disconnected or canceled status.</p> <p>For API, the import of the ASR order fails and the application displays the same error message mentioned above for GUI.</p>
20548860	<p><b>Issue</b></p> <p>When running the importCR ASR CORBA API, if the <b>UREF</b> and <b>LREF</b> fields are not populated and the <b>REFNUM</b> field is populated, the API returns the following error:</p> <pre>Field: [LMetaSolv.CORBA.WDI.WDIError; = Array (values following) [0] Field: code = 25862 [0] Field: reason = PON: XXX   Form: UREF   VC Number:   Field: {3}   Value {4}  :: is invalid. [1] Field: code = 25164 [1] Field: reason = PON: XXX   FORM : CR  :: The valid values are: 1-5 for LREF.</pre> <p><b>Resolution</b></p> <p>The code has been corrected and now the importCR ASR CORBA API runs successfully even when the <b>UREF</b> and <b>LREF</b> fields are not populated and the <b>REFNUM</b> field is populated.</p>
21316085	<p><b>Issue</b></p> <p>The OBF validation rules are not triggered when the <b>Routing Matrix</b> field contains the following values in the ASR Translation Questionnaire (TQ) form: 1+5YY, 0+5YY, 0-L, 411, LPDA, and 0+L.</p> <p><b>Resolution</b></p> <p>The code has been corrected and now the OBF validation rules are triggered properly even if the <b>Routing Matrix</b> field contains the following values in the ASR TQ form: 1+5YY, 0+5YY, 0-L, 411, LPDA, and 0+L.</p>

## Known Problems in This Release

This section describes the known problems in this release.

### Cannot Capture Audit History of Certain Data

The Capture ASR Audit/Supplement History feature enables you to capture the audit and supplement history of ASR orders. Currently this feature does not support the capturing of audit history of certain data. Specifically, you cannot capture the audit history of the following:

- Port Configuration form
- Routing Matrix form
- Routing Exception Matrix form
- Translation Questionnaire Additional CIC information
- Translation Questionnaire SAC NXX
- Fields on the Circuit Identification window
- User Data
- Notes
- Tasks
- Links

## Cannot Capture Audit History of a Few Forms Using API

Currently, you cannot capture the audit history of the following forms using API:

- SALI form
- EVC form
- PVC form

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.
