This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Oracle Hospitality OPERA Cloud Services (OPERA Cloud) is a hosted, Software as a Service (SaaS) solution. It provides a configurable system operable in either single- or multi-property mode. All properties in an enterprise share a single database. The user interface uses web services to communicate with the OPERA Database. This enables flexible integration with third-party interfaces using Service Oriented Architecture (SOA).

OPERA Cloud aligns to Oracle Hospitality OPERA Property Management releases to provide version compatibility.

Purpose

The Release Notes provide a brief overview of additions, enhancements, and corrections implemented in this software release. Their intent is informative, not instructional.

Audience

This document is intended for OPERA Cloud version 1.20 users.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL: <https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create the problem
- Exact error message received and any associated log files
- Screen shots of each step you take

Documentation

Oracle Hospitality product documentation is available on the Oracle Help Center at <http://docs.oracle.com/en/industries/hospitality>.

Revision History

Date	Description of Change
June 2016	<ul style="list-style-type: none">• Initial publication

1 Features and Updates

Accounts Receivables

- Added:
 - An action menu option in Account Setup for distributing an account to multiple properties when logged into the Hub level.
 - An option on the Direct Bill Transfer screen to search and select a different Account Receivables account before transferring an invoice.
 - A View Folio action to the following screens:
 - Direct Bill Transfer screen.
 - Invoice Details screen.
- An Override Credit Limit task to Role Manager in the Accounts Receivables Financials Group enabling:
 - Override and transfer invoice functionality on accounts that are over the Credit Limit set in Account Setup.
 - Override settling guest folios functionality on Direct Bill for accounts over the credit limit.
- When logged in at the Hub level, you can now copy accounts from one property to another using the Distribute function.

Administration – Booking

- Added:
 - A Promotion field and a Preferences drop-down list in the Auto Attach Elements screen. Preferences show the same list as Profile Preferences.
 - Ability to configure Guest Type values on the Reservation Management screen.
 - Text/Table viewing option for results to the Auto Attach Element screen.

Administration – Enterprise

- Added:
 - Property Details functionality in the Chain and Property Management workspace for configuring features that are unique to the property.
 - Property Detail Categories functionality in Chain and Property Management.

Administration – Financial

- Added:
 - Ability to copy Package Codes within a Property or to other Properties.
 - The handling of User Defined Functions (UDF) to Posting Attributes for Rate Code Package within Rate Code Configuration.
 - Templates to Transaction Groups and Transaction Sub Groups when an ORS or MHOT license code is active.
 - A Transaction Code Protection screen in the Transaction Management Workspace.
- The Membership check box is now selected as the default on new rate codes when the Default Membership Rate parameter in OPERA Controls is On.

-
- The Post It screen now provides a UPC (Universal Product Code) field to allow searching for Articles or Transaction Codes.

Administration – Inventory

- Added:
 - A Smoking Preference field for Template and Property records in Room Type configuration.
 - A Function Space screen in Function Space Management that lets you search for existing configurations.
 - Room Pools configuration screen in the Accommodation Management workspace.

Blocks

- Added:
 - Functionality for creating an Account and linking a Contact in a single process.
 - Ability to edit the start date on the Block Details screen. Editing the start date automatically updates the number of nights field.
 - A Console view in Block search. This shows additional block details.
 - Ability to apply Wash Schedules to blocks with a cutoff date in the Room Details screen in the Block presentation screen.
- Enabled Sort By functionality in Manage Blocks Advanced Search.
- The Changes Log in Block Restrictions now features a date range search.

Commissions

- Added:
 - An indicator to the Reservation screen for Commission Notes. This provides details if the reservation is detached from an Agent's Commission Account.
 - A requirement to select a Stop Processing Reason when placing an Agent or Commission Record on hold.

Dashboards

- Added:
 - An action for Create a House Posting Account in EZTask Reservations.
 - A reservation count now appears on the screen within the Dashboard EZ Task for Check In and Check out.
- Enabled a search filter for multiple confirmation numbers in EZTask, Check In, Check Out, and Reservations search.
- Converted reservation balance amounts to links (in Console view) that take you to the Manage Billing screen.

Exports

- Converted the edit export train to a dashboard layout.

Interface Setup

- Added:
 - Ability to edit Interface records.
 - An Interface Configuration screen.
 - An Import Rooms screen.

Inventory Management

- Added:
 - Ability to define a default housekeeping status for rooms checked out as Day Use. This is defined in the Default Day Use Room Status Setting in the Rooms Management Group.
 - Ability to assign maintenance tickets.
- Enabled:
 - Opening an Out of Order, Out of Service, or Room Maintenance record in Room Management by double selecting. In Table view, you can open Out Of Order or Out of Service records by single selecting the Room Number box.
 - Saving view options on the Room Calendar.
- The Rooms Availability screen now provides an action for Create A New Reservation and Create On-The-Spot Reservation. Both options open the Look To Book Sales Screen for viewing House and Room Type availability.
- Converted Tentative Rooms Sold and Guarantee Rooms Sold values in the Rooms Availability screen to links. The links open the Reservation Type screen for searching by Date and Reservation Type.

Miscellaneous

- Added:
 - A Telephone Operator menu option in My Favorites showing reservations having a stay date of three days before through seven days after the current business date. The reservations must have an arrival date within the last six months.
 - Ability to Select All or Clear All reports when regenerating End of Day reports.
 - Ability to select the Room Status option from My Favorites in Quick Launch.
 - OXI message Status screens. These allow viewing, management, and reprocessing of eXchange messages through a unified interface.

Mobility

- Added:
 - Queue Rooms functionality.
 - Ability to Prioritize and Remove Rooms from Queue.
 - Reservation search to Charge It.

OPERA Controls

- Added:
 - A new setting for Decimal Calculation and a new parameter for Permanent Folio Storage in the Cashiering group. The Permanent Folio Storage parameter enables storing a folio copy in PDF format.

-
- A Printing Method setting in the General group to enable printing reports by:
 - Printer by an adobe reader plugin (this may not be supported on all browsers.)
 - Preview to Print.
 - Email to Print (printer must be compatible with email or cloud printing.)
 - A Rate Information Template setting in the Rate Management group. This allows a property to configure generic text common for most rate codes.
 - Ability to specify a Do Not Post limit and whether previous postings should be adjusted when the Advanced Generate function in OPERA Controls is set to Active.
 - Minimum and Maximum Rate Allowed parameters.
 - A global parameter for Transaction Code Ownership. When active, the parameter:
 - Adds radio buttons for Central or Property Ownership in the Transaction Code configuration screen.
 - Updates all existing Transaction Codes automatically to Property Ownership.
 - Adds tasks for Override Property Ownership and Override Central Ownership.
 - The following Block Functions, Parameters, and Settings:
 - Contract Billing (Function)
 - Block deposit Required (Parameter)
 - Return Block Inventory to House (Parameter)
 - Copy Block Notes (Setting)
 - Copy Catering Status (Setting)
 - The following Commission Parameters and Settings for properties with an active OPP_COM license code:
 - Include Zero Commissions (Parameter).
 - Pre-Printed Check Numbers (Parameter).
 - Commission Codes to Not Process (Setting).
 - Default Commission (Setting).
 - Default Prepaid Commission Trn Code (Setting).
 - Default Reason Code (Setting).
 - Profile Settings for Contact Address Type and Contact Phone Type when the Contacts function is active.
 - A global parameter for Restrict Profile Name Change After Folio Creation in the Profiles group.
 - A Maximum Number of Open Business Dates setting in the End Of Day group. This determines the number of dates that can remain open without completing the Print Final Reports process in End of Day.

Profiles

- Added:
 - An action link for Create Linked Profile or Create Linked Contact.
 - A View option to the Search and Select Profile screen for Last Stay information (Last Visit date, Last Room number, and Last Rate amount).
 - A View All option when search results for Profiles, Reservations, Blocks, and Account Receivable Accounts are 200 or fewer.
 - An Advanced Search option to exclude inactive profiles.
 - Ability to mark profiles as private.
- Enhanced Profile Advanced Search with the ability to search for a profile by Tax ID or Tax ID 2.

-
- The Inherit Rates check box is now available in configuration when the Profile Links Inherit rates functionality is active.

Quick Launch

- Added:
 - The keyboard F2 function key for accessing Quick Launch.
 - Numeric keys 1 - 0 for accessing the first 10 My Favorite links.
 - Ability to translate reports and report names into supported languages.
 - A tab for creating groups and values in the User Defined Fields screen in User Interface Management.
 - Ability to create User Defined Fields with linked lists of values in Chain and Property Management using the Property Detail Category and Property Details screens.
- When accessing screens using the F2 Quick Launch menu, you can now activate Search by pressing Enter on the keyboard.
- When launching Quick Links using the F2 Quick Key, the window opened displays the Close button at the bottom of the window without the need to scroll down.

Reports

- Added:
 - A Duplicate Profile Report (prduplicateprofile) for determining if duplicate profiles exist.
 - An Upsell (resupsell) report on guests who paid for room upgrades. This tracks the number of Upsells and Additional Room Revenue generated by Front Desk agents at check-in.
 - The stat_forecastyearly report.
 - A +/- field in Report configuration enabling a date offset (before or after the current business date) when editing default report parameters.
 - Ghost text for report groups that do not contain any reports.
 - Report rendering within the same browser window.
 - A Tax Type Details report.
 - A Membership Type filter and Membership No. column on the Package Allowance Guest IHN report (finpkgallow).
 - Ability to configure shift reports in the Reports menu. This requires the Manage Reports user task.

Reservations

- Added:
 - Ability to customize confirmation letters from the Confirmation screen in Manage Reservations.
 - A Shares sort option to the Manage Reservations search and Quick Search screens.
 - Ability to redistribute adults/children on share reservations using drag and drop.
 - Flags indicating credit cards sent for approval. These are visible on the Complete Check In stop of the Check In train.
 - An Edit Reservation link after selecting a reservation in the Room Calendar. The link opens the Stay Details screen.

-
- An Upgrade Indicator on upgraded reservations when Reservation Upgrade at Check In functionality is active.
 - A Commission Pay setting in Opera Controls. This enables creation of Commission records for Agent, Source, or Agent and Source profile types, depending on the setting and whether Source profiles are active in the property.
 - A check box on profile types linked to a reservation to control whether a commission record is created for that reservation. The check box is marked for payment by default.
 - The ability to remove a room assigned on the Stay Details screen.
 - A parameter for Auto Creation of Profile in the Look To Book Sales Screen group. This enables the automatic creation of a profile after performing a profile search on the Look To Book Sales Screen or the Book Now screen.
 - A parameter for Mandatory Room Move Reasons in the Reservations Group within OPERA Control.
 - A Lookup a Profile option in Manage Reservations for profiles in an external system. Select Profile downloads the external profile and replaces the profile in the reservation.
 - Linked email addresses on the Connected Profiles screen. This allows you to send emails from the Reservation presentation screen without opening the full profile.
 - A panel splitter for sharing and/or linked reservations to metadata service customization. This enables retention of your screen view preference when entering another sharing and/or linked reservation.
 - A parameter for Arrivals With Deposit Balance in The OPERA Controls End of Day group. This runs an additional End of Day procedure that checks for arrivals that have not yet checked in and have a deposit balance.
 - A Default Day Use Room Status setting in the Rooms Management group of OPERA Controls. This setting controls an automated change in room status after checkout.
 - An Assign Room action link in a reservation that opens the Room Assignment screen.
 - Ability to change arrival dates, number of nights, and departure dates on multi segment reservations using the Edit Action on the Stay Details screen.
 - An option for Cancel Reservation in the Check In train.
 - Ability to create guest messages for multiple reservations on the Reservations Workspace.
 - The option of updating Clean or Inspected status of the room when a reservation is being checked out.
 - An icon on the Wake Up Call Companion for reservations that have a wake up call on the guest's departure date.
 - Enhanced:
 - The I Want To option for Assign Room with:
 - A list of all available rooms for the room type shown in the reservation.
 - Ability to type in any room number to display the desired room type (if the room type is available).
 - The Book Now popup with smoking preferences and/or room features that you can add using Property Inspector.
 - Rate Category and Room Class list of values search filters in the Look To Book Sales Screen.
 - Quick Search with additional search filters for Group, Membership Type, Membership Level and Room Type.

-
- Ability to mass cancel reservations using Quick Launch, Mass Cancellation. Mass Cancellation produces a status screen and an option to print.
 - Ability to generate batch confirmation letters from the Reservation Workspace.
 - The Notifications panel in Reservations and Blocks automatically resizes based on the number of notifications. This functionality is visible in Reservation Presentation screen, Manage Billing, Blocks, and the Check In / Check Out trains.
 - A Quick Print Folio action link on the Complete Check Out stop of the Check Out train.
 - Removed the Accompanying Guest tab from the Connected Profile screen and added its functionality to the Associated Profiles tab.
 - The Deposit / Cancellation screen now provides a Receipt link for Deposits posted to a reservation. The link opens the Report Destination screen.
 - Redesigned the Routing screen for faster and easier selection of transaction or routing codes in one screen.
 - The Wake Up Call Companion now shows an icon on reservations that have a wake up call on the departure date.

Role Manager

- Added:
 - Flags to identify new tasks. The flags update only on new tasks added on subsequent software upgrades.
 - Ability to translate tasks associated with roles based on the user's language.

Toolbox

- Added:
 - Update Contacts in Data Management. This allows you to change Contacts linked to Activities and Blocks.
 - Ability to add new chains / properties.
 - Update Owners in Data Management for the following: Accounts, Contacts, Activities, Blocks, Potentials, FIT, Leads, and Campaigns.
 - Ability in Transaction Management to update the Ownership of a Transaction Code between Property and Central Ownership.
 - Delete Tab on the Membership Types screen in Data Management.
 - Business Block Compare tab on the Data Management screen. Change Code tab on the Transaction Management screen in Data Management.
 - Change Room Type tab in the Room Utilities screen in Data Management.
 - Update Market Code screen in Data Management.
 - Imbalance Analysis in Data Management. It provides the following options:
 - Repopulate Trial Balance - All Dates.
 - Repopulate missing Bills into Folio Tax.
 - Fix DBs for Adjusted Invoices.
 - Fix invalid AR Postings.
 - Fix naguestledetail.rdf and guestledger.rdf.
 - Verify Imbalance and Fix imbalances.
- Convert Production Data in Data Management now prompts you to enter a Support Key to access this functionality.

-
- You can now change the Sub Group linked to a Transaction Code using the Transaction Management, Change Subgroup tab Data Management.
 - Moved Environment Controls parameters from OPERA Controls into the Toolbox menu.

2 System Requirements, Supported Systems, and Compatibility

This section describes the hardware sizing, operating systems, browsers, bandwidth, and devices supported with OPERA Cloud version 1.20.

Interface PC Supported Hardware Sizing

OPERA Cloud supports interface PCs with the following:

- Microsoft Windows 7 Professional operating system
- 1x dual core central processing unit
- 3 GB memory
- 4 GB free disk space minimum
- 80 MB for each installed property interface, defined as voicemail, call accounting, movies, and so on.
- An additional 40 MB per additional instance in a Multi-Property setup
- An additional 150 MB for the IFC Controller

Workstation Supported Hardware Sizing

OPERA Cloud supports the Microsoft Windows 7 Workstation with the following:

- Microsoft Windows 7 Business minimum; Microsoft Windows 7 Enterprise recommended
- 1x dual core central processing unit
- 2 GB memory minimum
- 80 MB free disk space minimum
- 16 KB bandwidth per user minimum available for WAN connections.

The minimum PC configuration supports one OPERA Cloud Session and a small application (< 5 MB memory usage). Users who require multiple sessions or use other large applications need a Power User sized PC. Power User sizing should support two sessions with one other application. Power users with larger needs should add more memory.

WAN latency should be below 120 ms for a 1K packet (ping -l 1024) for optimal performance. If the WAN circuit is used to transport other software, such as email, internet connection, and so on, then it is highly recommended that you use QoS (Quality of Service) software or a dedicated circuit to ensure that mission critical applications have priority use of the bandwidth.

PCs installed with Microsoft Windows 7 require additional configuration. Both support 32-bit and 64-bit workstations. On 64-bit workstations, use the 32-bit browser.

PCs installed with personal firewall software and/or current anti-virus clients might require additional memory than specified above.

Client Compatibility

Microsoft Windows Vista (Client)
Microsoft Windows 7 (Client)
Microsoft Windows 7 (OXI PC)
Microsoft Windows 8 Pro or Enterprise (Client)
Microsoft Windows 8 Pro or Enterprise (OXI PC)

Browser Compatibility

Microsoft Internet Explorer 7.0+ 32-bit only
Microsoft Internet Explorer 8.0+ 32-bit only
Microsoft Internet Explorer 9.0+ 32-bit only
Microsoft Internet Explorer 10.0+ 32-bit only
Microsoft Internet Explorer 11.0+ 32-bit only *
Microsoft Edge *

* OPERA Professional Premium/Standard Cloud Service and OPERA Enterprise Premium/Standard Cloud Service are browser agnostic. This adds support to any modern Operating System and Browser including Microsoft Internet Explorer 11 (Version 18.06 forward) and Microsoft Edge. For Security and compatibility purposes, update both the operating system and browser to the latest available versions.

Network Bandwidth Requirements

The following table contains the network bandwidth recommendation for OPERA Cloud. Network bandwidth figures include the following assumptions:

- Downloading a page size of 16K (a conservative estimate of average) should not take longer than 0.5 seconds. This does not include server time.
- Up to 50% (a conservative estimate) of all users request the page download simultaneously.

The formula used to produce the calculations was:

- $\text{NetworkBandwidth(Mbps)} = \frac{8 * \text{NrOfUsers} * \text{PageSize(MB)} * 1.2(\text{ContingencyFactor}) * \text{SimultaneouslyActiveUsers}(\%)}{\text{PageDownloadTime(Seconds)}}$

Sizing Network bandwidth for OPERA Cloud					
Number of Users	5	10	25	50	100
Network Bandwidth (Mbps)	0.75	1.5	4	8	16

3 Resolved Issues

Modules	ID (Clarify Case Number)	Description
Administration - Enterprise	16797920	Enabled changing the Short Date format in Property Controls.
Administration - Financial	17217841	Added a filter for Room Class and ability to set daily rates by Room Class in the Set Rate Range screen.
Administration - Financial	17166208	On the Foreign Currency Codes screen the value for currency symbol is now available for updating when the currency code is in use.
Administration - Financial	17090995	Added the currency code in the primary details section and on the Rate Schedules screen.
Blocks	17447635	Enabled ability to edit Blocks created in external systems.
Blocks	17089512	Enabled the ability to make reservation in the Look To Book Sales Screen for blocks that were created or managed by an external system.
Blocks	17000994	You can now add a payment method when creating reservations on the Rooming List screen in Multi Line view.
Blocks	17000416	The rate code search/select popup automatically sizes properly in the Internet Explorer browser when adding a rate code to a block.
Blocks	16959042	When accessing the Block Presentation screen, the Assign Rooms link appears only if the block has reservations attached.
Blocks	16958850	When a Master Block is deleted, the associated Sub Block is now deleted.
Cashiering	17325293	In properties using Chip and PIN credit card readers, the Complete Check In stop of the Check In Train populates the credit card reader selection screen without delays.
Generic	17120335	The security application menu now loads properly when combinations of records in the USER_CRO_ACCESS_LIST and SEC_USER_LOCATION do not match the user's roles/chain.
Generic	16803333	The Calendar component throughout the application correctly shows the Month and Day of the Week based on the language chosen.
Generic	16712509	Increased max token parameter allocation to prevent disconnections.
Inventory Management	17090535	Room Assignment table view in the Check In train and Available Rooms screen correctly shows the Room Condition icon for rooms assigned a condition.
Profiles	17369723	Removed the Attachment tab from the Correspondence screen and made it a primary screen

Profiles	16950259	available on Manage Profiles. Search by Postal Code in Manage Profiles correctly returns addresses in properties where an Address Cleaning system is configured.
Profiles	16181639	Enabled a link on the Profile presentation screen allowing you to create a new reservation. The link takes you to the Look To Book Sales Screen.
Reservations	17674174	The Look To Book Sales Screen Rate Information panel and the Trip Composer now correctly show the same rate amount as in the Room Rate combination Availability for a properties where Best Available Rates by Day is in use.
Reservations	17236631	The Confirmations functionality in the Reservation presentation screen now correctly provides the total number of Confirmation Letters regardless of delivery status.
Reservations	17227021	Batch Deposits search results correctly show the Due On date for reservations with Deposit Rules. Selecting reservations without credit card as method of payment provides an Action menu with options for Deposit / Cancellation and Cancel Reservations.
Reservations	17190123	Names appear correctly in search results when adding a Source profile to a reservation in the Look To Book Sales Screen or in Manage Reservations.
Reservations	17166123	The Review Reservation step of the Check In Train correctly saves the values entered in the Departure Time, Display Color, and Purpose of Stay fields (you can add these fields using Property Inspector).
Reservations	17096630	Manage Reservations Room Assignment search provides filters for ETA From, ETA To, and Max Number of Nights. Search results provide view options for ETA and sort by options for Arrival Date and ETA, based on arrival time.
Reservations	17091110	The Look To Book Sales Screen shows sell messages in the language of the logged-in user.
Reservations	17073448	Made an aesthetic change to the warning message that is presented when attempting to assign a dirty room to a guest at check in.
Reservations	17057311	The Arrival Date field defaults to the current business date after modifying a reservation on the Look To Book Sales Screen.
Reservations	17015148	The Look To Book Sales Screen search for availability shows Open Rates for Room Types with Availability and no restrictions. Rates appear as closed for Room Types that have a restriction either at the Room Type or Room Class level, even though the Room Type may show Availability.
Reservations	17005408	Made an aesthetic spelling change in the advanced search warning message when adding search criteria for membership level, but not for membership type.
Reservations	168803245	The Changes Log for a new reservation correctly lists only one log entry for Override activity in the Look To

Reservations	16737949	Book Sales Screen. The Book Now popup opens correctly when a user double clicks and drags/drop a Rate/Room Type combination at the same time.
Role Manager	16953520	Changed the following in Bookings Main Task, Reservation Management: <ul style="list-style-type: none">▪ Max Nights Upper Limit to Override Max Nights Upper Limit.▪ Max Room Upper Limit to Override Max Rooms Upper Limit. Changed the following in General Main Task, Ownership: <ul style="list-style-type: none">▪ Ownership to Profile and Blocks Ownership.
