3.14.1 Correction.....26

Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This document contains all the modifications made to Stores2 with the 1.16.0 version.

2 Useful Information

N.B.:

The fixes include all previous fixes starting from the Service Pack (i.e. the fix 1.17.3 will include all the fixes released starting from Service Pack 1.17.0).

2.1 External Modules

IMPORTANT: the following external modules must also be released with sp 1.16.0:

- S2_UC00.exe
- S2_UC02.exe
- S2_UC06.exe
- S2_UC15.exe replaces S2_UC13.exe
- S2_UC14.exe

so check which ones are already present in the installation and release the remaining ones.

2.2 Host data interchange tracks

Make sure that the host data interchange tracks are always updated to the version in question (see document DOC.06.0145).

3 List of modifications

3.1 Service Pack 1.17.0 release on 01/10/2007

3.1.1 Addition of new functionalities

- Addition of the mandatory customer selection management in the negative sales phase (see doc. DOC.07.0588.0.AO - (it));
- Addition of attachment management in messages (see doc. DOC.07.0587.0.AO - (it))

- Addition of approval management in warehouse documents (see doc. DOC.07.0576.0.AO - (it));
- Addition of points accumulation management for department sales (see doc. DOC.07.0571.0.AO - (it));
- Addition of modification management for already confirmed warehouse documents from host (see doc. DOC.07.0564.0.AO - (it));
- Addition of reference node management on deposits (see doc. DOC.07.0563.0.AO - (it));
- Addition of displaying employee data in the event of fidelity in the receipt heading (see doc. DOC.07.0559.0.AO - (it));
- Addition of the possibility of displaying line percentage discounts (see doc. DOC.07.0558.0.AO - (it));
- Addition of fiscal year management by node and geographic node parameter (see doc. DOC.07.0557.0.AO - (it));
- Addition of protocol management on warehouse adjustments (see doc. DOC.07.0542.0.AO - (it));
- Addition of filters in the price list lists by node;
- Addition of parameter management of measurements in goods transfers (see doc. DOC.07.0542.0.AO - (it));
- Addition of transaction number manual entry management for unsuccessful pos payments (see doc. DOC.07.0522.0.AO - (it));
- Addition of transfer automatic generation management with automatic confirmation (see doc. DOC.07.0525.0.AO - (it));
- Addition of Dataprocess 270GE driver management (see doc. DOC.5071.07.0499.1.MR - (it));
- Addition of a "FornitoreAlternativo" field in the statistics;

- Addition of the possibility to exclude closed nodes from new warehouse movements (see doc. DOC.07.0515.0.MM-(it) - Stores2 - 1.17.0 - Magazzini - Esclusione nodi chiusi da nuovi movimenti di magazzino.doc);
- Addition of a function used to force fidelity points (see doc. DOC.07.0515.0.MM-(it) - Stores2 - 1.17.0 - Fidelity - Impostazione manuale di un punteggio fidelity.doc);
- Addition of the possibility to differentiate product taxation at variant and size level (see doc. DOC.07.0515.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Gestione aliquota IVA per Prodotto-Variante-Taglia.doc);
- Addition of a function used to indicate commission percentages by validity date (see doc. DOC.07.0517.0.MM-(it) - Stores2 - 1.17.0 - Anagrafica - Gestione provvigioni per data.doc);
- Addition of a new filter, called City, used to perform a search inside the list of company employees (see doc. DOC.07.0521.0.MM-(it) - Stores2 - 1.17.0 - Anagrafiche - Filtro località in elenco dipendenti aziendali.doc);
- Addition of a new login screen in Stores2 (see doc. DOC.07.0524.0.MM-(it) - Stores2 - 1.17.0 - Anagrafiche - Nuova gestione della videata di login utente.doc);
- Addition of the possibility of automatic login in Stores2 by using the Window login (see doc. DOC.07.0528.0.MM-(it) - Stores2 - 1.17.0 - Anagrafiche - Login automatico utilizzando la sicurezza di Windows.doc);
- Addition of a modification aimed at allowing authorized users to access expense and deposit displaying without the limit of indicating the password of other operators (see doc. DOC.07.0530.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Apertura di spese e versamenti senza l'obbligo di indicare la password.doc);
- Addition of a function which lets cashiers change their passwords by themselves (see doc. DOC.07.0531.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Cambio password per cassiere.doc);
- Addition of the possibility of making receipts at the date of the last closed inventory (see doc. DOC.07.0533.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Registrazione scontrini alla data di chiusura dell'ultimo inventario.doc);

- Addition of an implementation used to record openings of cash register cash drawer (see doc. DOC.07.0535.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Registrazione aperture cassetto.doc);
- Addition of the possibility of setting non-hierarchical relations between nodes, in order analyze data (see doc. DOC.07.0537.0.MM-(it) - Stores2 - 1.17.0 - Anagrafiche - Definizione di relazioni non gerarchiche tra nodi per analizzare i dati.doc);
- Addition of an implementation which guarantees displaying of the discount percentage on the stock search screen (see doc. DOC.07.0538.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Visualizzazione percentuale di sconto in ricerca giacenze.doc);
- Addition of the possibility of being able to select and indicate only the products of a specific line, i.e. with the same product parameter, in a warehouse document (see doc. DOC.07.0539.0.MM-(it) - Stores2 - 1.17.0 - Magazzini - Gestione parametri prodotto su documenti di magazzino.doc);
- Addition of the possibility of inserting spacing lines in receipts using RCH Nucleo cash registers (see doc. DOC.07.0544.0.MM-(it) - Stores2 - 1.17.0 - Driver Nucleo - Spaziatura righe nella stampa dello scontrino.doc);
- Addition of a modification used to print the receipt barcode with RCH Nucleo cash registers (see doc. DOC.07.0545.0.MM-(it) - Stores2 - 1.17.0 - Driver Nucleo - Stampa barcode scontrino per RCH Nucleo.doc);
- Addition of the fidelity points print function, including on RCH G2000 cash registers (see doc. DOC.07.0549.0.MM-(it) - Stores2 - 1.17.0 - Driver Nucleo - Stampa punteggio fidelity su RCH G2000.doc);
- Addition of a function used to manage the error which Stores2 displayed at start-up if connection to the SQL database was unsuccessful (see doc. DOC.07.0551.0.MM-(it) - Stores2 - 1.17.0 - Server - Verifica attivazione servizi SQL Server all'avvio di Stores2.doc);
- Addition of a modification which makes the "nickname" be shown in the customer search function present in the receipt heading (see doc. DOC.07.0553.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Aggiunta campo 'Nome Locale' nella testata dello scontrino.doc);
- Addition of the possibility of excluding products from reorderability at a color variant level, in addition to having the "NonInOrdine" flag disabled (see doc. DOC.07.0556.0.MM-(it) - Stores2 - 1.17.0 - Ordini - Ordinabilità per variante.doc);

- Addition of the possibility of being able to select a list of possible owners for each warehouse motive, in order to guarantee more flexible motive management (see doc. DOC.07.0561.0.MM-(it) - Stores2 - 1.17.0 - Magazzini - Liste intestatari per causali di magazzino.doc);
- Addition of an implementation used to filter prices based on classification parameters for the prices, within the product form display window (see doc. DOC.07.0562.0.MM-(it) - Stores2 - 1.17.0 - Anagrafiche - Filtri prezzi su scheda prodotti.doc);
- Addition of a new implementation, for which it is possible to associate a product code with an order code. This way, the search for a product in the master data or receipt management will be able to be performed by entering an order number as well (see doc. DOC.07.0566.0.MM-(it) - Stores2 - 1.17.0 - Vendite - Ricerca prodotti per numero commessa.doc);
- During the quick list creation phase, the possibility has been added to be able to select the starting products including based on the product code (for example, it is possible to enter all the products with a code starting with "123" or which contain the string "ABC") (see doc. DOC.07.0584.0.MM-(it) - Stores2 - 1.17.0 - Listini - Creazione listino rapido con filtro su codice prodotto.doc);
- Addition of a modification used to manage external utilities inside Stores2 (see doc. DOC.07.0585.0.MM-(it) - Stores2 - 1.17.0 - Utility - Gestione utility esterne in Stores2.doc);
- Addition of free text management on the display of many cash registers;
- Addition and enabling again of flow node management;
- Addition of the possibility of managing the Stores2CE application. For information contact the technical department;

3.1.2 Optimizations

- Optimization of the value assignment function to make it faster;
- Optimization of uploading of the node combo in the receipt list function;
- Various optimizations in the receipt management function;

3.1.3 Improvements

- Improvement of data retrieval during the wizard transfer management phase (see doc. DOC.07.0532.0.AO - (it));
- Improvement of adjustment generation management;
- Improvement of the database compacting function, to compact an SQL database after reconstruction of an SQL node;
- Improvement of the price list opening speed;
- Improvement and optimization of drivers for NCR cash registers;
- Improvement of statistics exporting management: if you select the option "only selected statistic", you will only display this (plus its group), otherwise you display all of them;
- Improvement of price loading by size range;
- Improvement on saving of employee presences;
- Improvement of the display logic of deposits and expenses, giving the possibility to the Master workstation to display the movements of other workstations as well. To do this a combo has been introduced in the lists with parametric displaying;
- Improvement of the use of CPU by non-modal messages;

3.1.4 Corrections

- Correction of log writing by Stores2 Web;
- Correction of the "Solo vendite a reparto" flag management in receipt list;
- Correction of the focus positioning in the stock code;
- Correction of barcode value assignment in the discount reasons in the database reconstruction phase;

- Correction of the control on the maximum number of people (32760) that can be entered in deposits;
- Correction of the display of foreign currencies in various qualification if an acronym is used;
- Correction of problem which could occur during creation of a Gift Receipt in the receipt list function;
- Correction of an error in the label format setting function;
- Correction of the gross cost and net cost retrieval management;
- Correction of the interchange track management module to improve the log in the localized description acquisition phase;
- Various corrections and optimizations made to fidelity management;
- Correction of product exporting with code longer than 20 characters;
- Correction of deposits-expenses management for managing a subnode: it is now possible to select all the dependent nodes even if no receipts or cash register movements have been made;
- Correction of the length of the IdentificativoFatturazione and IdentificativoSpedizione2 fields in the geographic nodes (raised to 20 characters);
- Correction and management of an error which could occur in product acquisition from portable scanner: now Stores2 indicates both the difference in sizes and product codes where it occurred;
- Correction of the date of birth validity control in the customer form confirmation phase, which in some cases resulted in an error;
- Correction of a problem which could assign a customer a VAT code not enabled for the node;
- Correction of a fault in database reconstruction, which caused the reconstruction of the StoricoMovimenti table despite the fact that it was disabled;
- Correction of some product form displaying problems due to Unicode conversion errors;

- Correction of various translation errors in Japanese and Greek;
- Correction of a fidelity management problem, due to the fact that season management as a variant parameter was not compatible with fidelity management which only used product parameters;
- Correction of a taxfree copy printing problem by using GlobalRefund DLL management;
- Correction of the possibility of setting more default fidelity conditions;
- Correction of a problem which could cause the creation of zone inventories which, due to a lack of refresh, could create apparently blank count documents;
- Correction of an error which could occur by entering a modification of a deposit;
- Correction of a problem which could cause last name text in an invoice printing to always be enabled;
- Correction of a problem in closing a discount voucher or account via tool;
- Correction of the employee search function by presence registration, so that it is not possible to display or select employees with a dismissal date previous to the current date;
- Correction of the price calculation on warehouse emptying;
- Correction of the status control management for IBM non-fiscal printer;
- Correction of an error which could occur in General Parameters by entering a code with more than 50 characters in the data transmission directory;
- Correction of a problem in the expected presences graphic function, which in some cases displayed 60 minutes instead of an hour;
- Correction of the field management for times zones in geographic nodes;
- Correction and modification of the cash register movement function: mandatory fiscal code and VAT number is set at a national level;
- Correction and repair of drivers for Dataprocess 270 GE cash register;
- Correction of a failure to import fidelity customers in a reconstructed database;

- Correction and repair of various problems in the Stores2 interface with denso portable scanners;
- Correction of the quick price list management function to not allow entry of additional suspended prices to an unsuspended price list.

3.2 1.17.1 release on 16/10/2007

3.2.1 Addition of new functionalities

- Addition of sketch field (alternative image) in the product master data and in the data import from host phase;
- Addition of "Exclude controls for matching data" flag in the deposit option of geographic Nodes which is used in order not to perform controls on the elimination of deposits, and on the generation of retrodated receipts of deposits present;

3.2.2 Optimizations

- Log optimization, addition of traces in the receipt saving phase;

3.2.3 Improvements

- Improvement of controls in the customer form field dimensions;
- Improvement of pos payment management;
- Improvement of the receipt deletion and cancellation phase;
- Modification of unsuspended load document import management with automatic at 8: by making an adjustment and then deleting it, the original document now automatically maintains at 8;

3.2.4 Corrections

- Correction of the function used to indicate the number of tax free copies to print with Global Refund ocx;
- Correction of some faults which could cause errors in the supplier order extraction and acquisition phase;
- Correction of a problem regarding disappearance of the cursor on the first product search line inside the search function in the lines of a document;

- Correction of some Stores2 messages which in particular circumstances could appear illegible;
- Correction of the product search function in sales: if only one item is present and the 'Disable automatic selection of products in search phase' parameter is enabled, the program would automatically select the single item;
- Correction and management of some controls regarding suspended receipts;
- Correction of the management function for date formatting in statistics;
- Correction of a problem which could cause the loss of references to node and owner warehouse in the closing phase of a warehouse document with management of owner lists enabled;
- Correction of order-product management and repair of some errors;
- Correction of maximum character management in the file or directory search;
- Correction of the 'Courtesy phrase' language resource;
- Correction of confirmation messages which were shown in the display phase of some warehouse documents;
- Correction of stock reconstruction function;
- Correction of commission modification per date;
- Correction of the display in non-fidelity customer lists created by the head office;
- Correction of the date format for node employees and elimination of the barcode;
- Correction of the modification and saving of company employees;
- Correction of the failure to delete a support table in the sales source;
- Correction of the value assignment problem if the installation did not manage ClasseNodoPrezzo;

3.3 1.17.2 release on 29/10/2007

3.3.1 Addition of new functionalities

- Addition of interfacing management between Stores2 and the POS using WinEpts drivers;

3.3.2 Optimizations

- Introduction of the possibility to be able to add a description and a host size to the size scale management, management with data exchange;

3.3.3 Corrections

- Correction of data retrieval from people counter in the deposit and connection phase, delay increased in the query generation phase;
- Correction of errors which occurred by acquiring updates in sql, when databases no longer used were present in the stores2 installation directory;
- Correction of saving of the parcel barcode reference in the creation phase of a new movement containing an entire parcel;
- Correction of the update level of 1.17.0 which performed the stock reconstruction. Now the data with a node other than mine are not deleted;
- Correction of the print tool for a message, which first could only be used from Stores2Web;
- Correction of credit card reading using devices with PCCharge drivers;
- Correction of the deletion management of a company employee and done so that the barcode for the employee is also deleted;
- Correction of the function regarding the customer master data form, which, based on certain program settings did not make it possible to make changes;
- Correction of the extraction of fidelity movements if the "fidelitymovimenti" table is set to fidelity sorting;
- Correction of an error which, in particular circumstances, could occur in the inventory closing phase;

- Correction of problem which did not make it possible to acquire 'E' type packets, which remained blocked in the Stores2 reception directory;
- Correction of the export procedure of an Excel format statistic, which could generate an error in particular cases;
- Correction of some problems with the "Elenco TaxFree" statistic;
- Correction of a print tool error in the portable scanner comparison printout;
- Correction of a problem which could occur during the reconstruction of a node, due to an error on the "ProdottiCommesse" table;
- Correction of product acquisition management from a text file inside the lines of a warehouse document;
- Correction of the French translations of the "Transfer management" function;
- Correction of user permission management in the consolidated movement display phase;
- Correction of the taxfree list function, which could generate errors with particular records;

3.4 1.17.3 release on 19/11/2007

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.4.1 Addition of new functionalities

- Addition of data archiving management;
- Addition of the possibility to create a CE user from the head office even if installation of this application is not present;
- Addition of traces in the stamps;
- Addition of Fasy Wing cash register management

3.4.2 Corrections

- Correction of the saving directory for CE upgrades;

- Correction of display of deposit amount at head office;
- Correction of the error during acquisition of the table S2CE_GeneralSettings;
- Correction of saving (they are not saved) of lines at 0 in the warehouse document creation phase;
- Correction of transcoding of Czech characters in the receipt print phase;
- Correction of the deletion of adjustment by operators with the flag 'Allow modification adjustment document to Approve';
- Correction of the management of Plafond Validity Months on fidelity conditions;
- Correction of the management of users in languages not supported on Stores2CE;
- Correction of the download management of orders with cancelled products from CE terminal;
- Correction of the entry and management of fiscal code and VAT number in all program phases where the information is requested;
- Correction of a problem when displaying a receipt from the sales list and closing it, the focus always returned to the first receipt of the list and not on the last displayed receipt;
- Correction of fidelity points management in the voucher return phase;
- Correction of closing the cashier login window with an X after having entered an incorrect password;
- Correction of company employee sorting by island;
- Correction of customer extraction in the creation phase of a new node;
- Correction of resources in Japanese;
- Correction of the list display of files to acquire in the batch file acquisition phase from Stores2;
- Correction of supplier maintenance in the date change phase of a suspended movement;

- Correction of retrieval in date order of movements to enter in deposits;
- Correction of saving in long for the workstation Timezone;
- Correction of the display of the password change key in the manual presences for employees;
- Correction of the reacquisition from host of the image field in the product table;
- Correction of warehouse document printing;
- Correction of annual target saving;
- Correction of the automatic setting to 8 during the restoration of a document which had automatic at 8 as the starting value;
- Correction of receipt closing to prevent additional operations during the registration phase;
- Correction of the fasy zephyr cash register display management;
- Correction of the Fidelity button display in the customer list based on enabling of the flag 'Do not display fidelity customers from the customer list';
- Correction of update acquisition due to an incompatibility of some 1.17.2 version modules. To carry out the upgrade, if you have this version contact Fortech Italia's technical department;

3.5 1.17.4 release on 01/12/2007

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.5.1 Addition of new functionalities

- Addition of flag 'Obligatory stamp references' on warehouse motives to release the management of obligatory references for Greek taxes;
- Addition of monthly and infinite numbering for Cyprus and Costa Rica. These two managements will be integrated with monthly and daily ones which are already present

and can be used both for the node and workstation. The configuration occurs in the Geographic nodes and Sales tab;

3.5.2 Corrections

- Correction of Stores2 closing when the connection warning screen is still present;
- Correction of saving management for the time in stamps;
- Correction of reassignment of deleted barcodes in data acquisition from host phase;
- Correction of filter management for supplier on the product screen in the event of use of alternative suppliers;
- Correction of the cancellation and restoration of node employees;
- Correction of "ProdottiCodiciIva" table acquisition from host;
- Correction of currency retrieval on movement heading in the date change phase;
- Correction of the error which occurred by incorrectly entering a date in the statistics and hitting send;
- Correction of management of heading discounts without reasons;
- Correction of suspended document sending management;
- Correction of incoming transfer generation with access DB in the automatic generation management of the load for transfer;
- Correction of the customer parameter description display in the receipt headings;
- Correction of confirmation and adjustment management for warehouse documents;
- Correction of automatic starting of connections via S2_AutostartAvvio with Stores2 open;
- Correction of the management of connections on a new db which does not have a workstation. Now the error message is managed;
- Correction of database saving in the reorganization phase;
- Correction of message extraction with eliminated attachments;

- Correction of master data acquisition on stores;

3.6 1.17.5 release on 10/12/2007

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

From this version on it is possible to distribute S2_UC15.exe used to increase the value of the register key, the standard value is too low to perform the archiving operation in access.

3.6.1 Addition of new functionalities

- Addition of fiscal code exporting to host in the file S2_MVCAS;
- Addition of the possibility to make the Denso portable scanner enabled to acquire upgrade of its software automatically from Stores2;

3.6.2 Corrections

- Correction of the currency column heading display on the movement form in stock;
- Correction of the control on the first validity date in euro exchange rates if other deleted exchange rates are already present;
- Correction of the password obligation for CE or Web user in password change phase from login;
- Correction of message export query;
- Correction of the NumeroScontrino filter in sales in order not to have the limit of the integer field;
- Correction of goods transfer generation in the presence of suspended goods transfers;
- Correction of external module importing;
- Correction of goods transfer generation in the presence of suspended documents in non-Greek taxes;
- Correction of S2_PROCI file importing from host
- Correction of the printing of "particular" characters with generic Epson printers. In the previous version the transcoding of characters was corrected, but this resulted in

printers that previously could not correctly code the € character now showing the ç character. With this correction the original situation has been restored (thus the symbol will continue not to be displayed), while waiting for a final solution;

- Correction of "Export to others" function data extraction;

3.7 1.17.6 release on 18/12/2007

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.7.1 Corrections

- Correction of a problem in the owner lists, based on this when deleting a supplier from a list the supplier was actually deleted from the first list and not the selected one;
- Correction of a cash register detection in the closing phase for Fasy Wing cash register;
- Correction of the Method '~' of object '~' failed error which occurred random on sales;
- Correction of the generation of reference associated in SQL in transfer mode with load automatic generation;
- Correction of automatic transfer extraction;
- Generic corrections on Stores2Gift management;

3.8 1.17.7 release on 08/01/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.8.1 Optimizations

- Optimization of order acquisition from host to make it faster;
- Addition of a control on subtotal printing using a Dataprocess cash register;

3.8.2 Corrections

- Correction of price assignment during generation of adjustments if with same product-variant a size and the price was changed;
- Correction of problems found in the use phase of the automatic emptying function;
- Correction of message display in the closing phase with the X of movements open in display;
- Correction of price display based on authorizations in the stock display phase;
- Correction of the data archiving procedure;
- Correction of negative data unloading management from portable scanner. Stores2 considered them incorrect;
- Correction of wizard transfer screen resizing;
- Correction of adjustment generation with products with equal line number but different price;
- Correction of dropdown menu display in price lists;
- Correction of deleted fidelity barcode management;
- Correction of adjustment confirmation from head office;
- Correction of inventory extraction to host;
- Correction of expected presences management spanning 2 years;
- Correction of a problem in the expected presences graph, based on which hours could be shown which were not actually present;
- Correction of translations not performed on the wizard transfer management screen;
- Correction of a problem in parcel management: in the event of a missing parcel, the program assigned a value to the field with zeros instead of blank spaces during the export phase;
- Correction of a display problem with the third button present on the barcode printing screen;

- Correction of a duplicate key error on the FidelityConditions table in the database reconstruction phase;

3.9 1.17.8 release on 29/01/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.9.1 Optimizations

- Modification to receipt management, by inserting a timer to keep the label constantly updated which indicates the number of suspended receipts. The list of suspended receipts was also changed to display the TesseraCliente and NumeroCella information;
- Introduction of management to determine the type of receipt barcode printing with RCH Nucleo cash registers.

3.9.2 Corrections

- Correction of a problem regarding failure to clean references on an associated document in the event of deletion of an adjustment, if work is done on other stores movements from the head office;
- Correction of a problem based on which the "default" flag of a function was not saved (working on authorizations of an operator class);
- Correction of the display of many buttons on various program screens;
- Correction of the total value calculation of a warehouse movement, which in some particular cases was not exact;
- Correction of some translations in French in the program;
- Correction of some problems which could occur in processing goods transfers;
- Correction of an incorrect query of the Stores2 data source which could create problems at a statistics level;

- Correction of an error based on which during data acquisition from host the size scale for a product was not correctly changed even if the new size scale correctly contained all the sizes planned at the time for the product;
- Correction of the acquisition of a Stores2CE update packet on the server (via connections of Stores2) if Stores2CE is set as service;
- Correction of the control function to check if it is possible to change a size scale during data extraction to host;
- Correction of the transfer system based on which an adjustment was created instead of performing a change on the original document;
- Correction of some errors connected to the data archiving function;
- Correction of the "Used" parameter reconstruction for products and variants in the data receiving phase;

3.10 1.17.9 release on 05/02/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.10.1 Corrections

- Correction of the access geographic nodes reconstruction routine from head office sql;
- Correction of ParametriProdottiCodici extraction so that they are retransmitted only from the head office;
- Correct of a problem on discount reason description printing, which was printed even if the "stampa descrizione su scontrino" flag in the related discount reason was disabled;
- Correction of an error which could occur in data extraction to host due to an incorrect control on the count of size scale sizes;
- Correction of the data source "S2_FonteFidelity", due to incorrect filter in retrieval of a product parameter;

3.11 1.17.10 release on 13/02/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.11.1 Optimizations

- Addition of logs to track data downloading operations from portable scanner;

3.11.2 Corrections

- Correction of transfer generation for non-automated nodes;
- Correction of order archiving;
- Correction of allocation management in line deletion phase;
- Correction of particular cases where the conditions incorrectly occurred necessary for showing the run-time calendar selection;
- Correction of space insertion in a receipt in the event of non-discounted products using the RCH Nucleo cash registers;
- Correction of a problem of failed "H" type packet acquisition;
- Correction of some problems which could cause the creation of warehouse documents with duplicate key;

3.12 1.17.11 release on 03/03/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.12.1 Correction

- Correction of the control in the phase for quick price list creation with the same start date;
- Correction of opening in properties of documents generated with already confirmed status;

- Correction of the warning messages by opening warehouse documents in display;
- Correction of a minor problem on value assignment of the sales data source: if there was a sale and a return of the same article they were assigned a 0 value even if the data was grouped for month and the sale and return were in two different months;
- Correction of translation management of some unmanaged screens;
- Correction of the 'Field not required' error which occurred by selecting the "ScalarinoTaglieCodice" field in the 'Inventory' statistical data Source.
- Correction of the S2_ProdottiGriglia module to increase the maximum price field value from 9,999,999 to 99,999,999;
- Correction of invoice numbering. We have expanded the range of compatible values;
- Correction of the parameter grid filter operation on Fonte Obbiettivi;
- Correction of the creation of the "S2CE_GeneralSettingsLayout" table during connections;
- Correction of some translation in English of prglog;
- Correction of Stores2 update packet acquisition if the Stores2CE server is installed as service on the pc;
- Correction of a problem which could cause Stores2 to crash during the receipt management exit phase, using the Fasy Zephyr cash register;

3.13 1.17.12 release on 02/03/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.13.1 Correction

- Correction of manual line addition to a parcel opened manually;
- Correction of good transfer generation;
- Correction of the error in fraud control phase during database compacting. Addition of a control on the database status before writing the event on the database;

- Correction of translations in Greek;
- Correction of host movement extraction with negative total;
- Correction of the stock reconstruction function if subnodes are present;
- Correction of Japanese character management in statistics filters.
- Addition of logs in receipt management to monitor discounting;

3.14 1.17.13 release on 11/06/2008

WARNING: to be able to acquire this or one of the subsequent versions starting from the 1.17.2 version it is necessary to perform particular operations via ComMa32. Contact Fortech Italia's technical department.

3.14.1 Correction

- Sales: correction of a problem whereby when beeping the barcode of a receipt the cancelled sales lines were also displayed;
- Sales: correction of receipt sales line printing based on Romanian taxes, so that the product code and its description are printed;
- Sales: correction of some managements of errors which could occur in the printing phase of a tax-free;
- Sales: correction of saving in the information regarding the customer's country in the 'movimentitaxfree' table;
- Sales: correction of the control on the cashier timer when the cash drawer open request screen is in the foreground.
- Sales: correction of department and product return printing with fisclae FP 90 cash registers;
- General: correction of the control performed in login activation by initials, so that it is mandatory to use different initials at node level, instead of network.

3.15 Rilascio Fix 1.17.14 in data 03/07/2008

3.15.1Correzioni.

- Generale: correzione alla ricostruzione dei parametri prodotto usati durante la fase di collegamento e alla chiusura dell'elenco prodotti in anagrafica.

3.16 Rilascio Fix 1.17.15 in data 05/08/2008

3.16.1Correzioni

- Anagrafiche: correzione routine ricostruzione parametripredotto e parametrivarianti usati;
