Oracle® Retail MICROS Stores2 Release Note, Release 1.21

Stores2

Release History ver. 1.21

Report developed by:
Fortech Italia srl

Q.A. Department

Version 1.14 of 04/11/2009

Table of contents

Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This document contains all the modifications made to Stores2 with the 1.20.0 version.

2 Useful Information

N.B.:

The fixes include all previous fixes starting from the Service Pack (i.e. the fix 1.21.3 will include all the fixes released starting from Service Pack 1.21.0).

2.1 External Modules

IMPORTANT: the following external modules must also be released with sp 1.21.0:

- S2_UC00.exe

- S2_UC02.exe

- S2_UC06.exe

- S2_UC15.exe replaces S2_UC13.exe

- S2_UC14.exe

- S2_UC16.exe (if you want to perform the archiving function on access databases)

- S2_UC18.exe (solves a problem related to the calendar, and it is necessary to install it at customers who use Epson cash registers)

so check which ones are already present in the installation and release the remaining ones.

The setup of this version already contains all these components (excluding S2_UC16.exe and S2_UC18.exe).

2.2 Host data interchange tracks

Make sure that the host data interchange tracks are always updated to the version in question (see document DOC.06.0145).

2.3 Changes to Stores2 database

If you need to make changes to the Stores2 database (add indexes, view, etc.) you need to follow the rules described in the document "MCR.09.0208.0.ADE-(en) - Customer changes to database.doc". Ask the Fortech technical department for the document.

3 List of modifications

3.1 Service Pack 1.21.0 release on 19/02/2009

This update brings the database level to version 2048.

3.1.1 Addition of new functionalities

- Warehouses (olt 5844): Addition of information on the warehouse movement grid (see doc. DOC.09.0105.0.AO-(it) - Stores2 - 1.21.0 - Magazzini - Gestione informazioni aggiuntive sulla griglia dei documenti di magazzino.doc);

- Connections (olt 6462): Addition of the possibility to create data packets disconnected from type B containing the orders (see doc. DOC.09.0107.0.AO-(it) - Stores2 - 1.21.0 - Collegamenti - Pacchetti ordini separati.doc);

- Warehouses (olt 6531): Addition of the possibility to enter a second line discount in warehouse documents (see doc DOC.09.0106.0.AO-(it) - Stores2 - 1.21.0 - Magazzini - Gestione secondo sconto in documenti di magazzino.doc);

- Orders (olt 6761): Addition of authorization management for some order heading information (see doc DOC.09.0108.0.AO-(it) - Stores2 - 1.21.0 - Ordini - Abilitazione informazioni su scheda ordini.doc);

- Messages (olt 6691): Addition of a control to limit the dimension of some attachments to messages (see doc DOC.09.0109.0.AO-(it) - Stores2 - 1.21.0 - Messaggi - Limitazione dimensione allegati ai messaggi.doc);

- Filters (olt 6893): Addition of search management by variant code and variant description in product search screens (see doc DOC.09.0110.0.AO-(it) - Stores2 - 1.21.0 - Filtri - Filtro variante sulla ricerca prodotto.doc);

- Filters (olt 6799): Addition of filters on product movement display (see doc DOC.09.0111.0.AO-(it) - Stores2 - 1.21.0 - Filtri - Aggiunta filtri sulla visualizzazione movimenti del prodotto.doc);

- Sales (olt 6892): Addition of open deposits and voucher warning management (see doc DOC.09.0112.0.AO-(it) - Stores2 - 1.21.0 - Vendite - Segnalazione acconti e buoni aperti.doc);

- Sales (olt 6852 and olt 6860): Addition of coupon management (see doc DOC.09.0113.0.AO-(it) - Stores2 - 1.21.0 - Vendite - Gestione coupons.doc);

- Fidelity (olt 6887 and olt 6947): Addition to fidelity management (see doc DOC.09.0114.0.AO-(it) - Stores2 - 1.21.0 - Fidelity - Implementazioni alla gestione fidelity.doc);

- Sales (olt 7056): Addition of the possibility of requesting additional information on the customer in the receipt closing phase (see doc DOC.09.0115.0.AO-(it) - Stores2 - 1.21.0 - Vendite - Informazioni localita cliente in fase di chiusura scontrino.doc and DOC.7056.09.0128.0.MR-(it) - Stores2 - 1.21.0 - Vendite - Gestione CAP e nazione in chiusura scontrino.doc);

- Warehouses (olt 6844): Addition of mass goods receiving management (see doc DOC.09.0116.0.AO-(it) - Stores2 - 1.21.0 - Magazzini - Ricevimento merce di massa.doc);

- Customers (olt 6793): Addition of information and filters by creation time date and last variation in the customer list and form;

- Warehouses (olt 6890): Modification of approval management from head office in order to be able to keep the document suspended until it is approved by the head office;

- General (olt 6891): Modification of the conversion setting value in unicode, now the program performs the conversion by default;

- Warehouses (olt 6915): Modification of the immediate transmission by setting a just created document as already transmitted in order to prevent subsequent modifications if the operator is not appropriately authorized;

- Master data (olt 6964): Modification of operator class management by introducing the hierarchy to prevent arbitrary user modifications;

- Inventories (olt 5891): Addition of data matching controls upon confirmation of a count/zone document and inventory closing;

- Warehouses (olt 6780): Modification of document confirmation to show order references also on adjustments and on parcel confirmation documents;

- Warehouses (olt 6572): Addition of the 'in processing' function on warehouse motives, to make it possible to create and later modify the document even if suspended and transmitted including if the user is not authorized to modify transmitted documents;

- Connections (olt 6461): Creation of the possibility to set the performed transactions sequence during connections;

- Inventories (olt 6967): Creation of the possibility to directly close an inventory in cancelled state only to have the possibility of statistical analyses without updating warehouse and stock;

- Sales (olt 6658): Addition of unified user/cashier password management in receipt management;

- FootFall traffic counter (olt 6767): Introduction of the possibility to manage the Stores2 calendar for analysis of the data recorded by the Footfall traffic counter (see doc. DOC.09.0134.0.MM-(it) - Stores2 - 1.21.0 - Versamenti - Utilizzo calendario in analisi dati del contapersone FootFall.doc);

- Host (olt 6871): Addition of the possibility to extract stock with host value assignment using "S2_Valorizzazione";

- Sales (olt 6904): Addition of the possibility of printing a courtesy phase on the footer of the receipt for NCR Real Print EJ cash registers (see doc. DOC.09.0125.0.MM-(it) - Stores2 - 1.21.0 - Vendite - Stampa frase di cortesia con casse NCR Real Print EJ.doc);

- Warehouses (olt 6946): Addition of customized information for data importing with portable scanner from text file (see doc. DOC.09.0191.0.MM-(it) - Stores2 - 1.21.0 - Formati Terminalino - Gestione informazioni personalizzate per importazione dati con TP da file di testo.doc);

- Denso portable scanner (olt 6483): A change has been made so that Stores 2 acquires the "INV*.txt" file data generated by the Denso portable scanner 'Inventory' function (see doc. DOC.09.0179.0.MM-(it) - Stores2 - 1.21.0 - Denso - Acquisizione file INV.txt in creazione inventari.doc);

3.1.2 Improvements

- Generic (olt 7040): Removal of physical network management;

- Warehouses (prb 58128): Inhibition of parcel confirmation if the supplier is not specified on the original document even if the motive requires this;

- Connections (prb 60684): Movement of the routine to perform price list reconstruction no longer at the closing of the product list but at start of connections in extraction;

- Master data (prb 59527): Modification of the barcode selection routine in manual stamping to identify the barcode type and correct element selection;

- Generic (olt 6872): Movement of XcedZip control in connection modules where it is used to prevent loss of compatibility;

- Generic (olt 6087): Standardization of the "Search" key operation in the various Stores2 screens;

- Generic (olt 6836): Addition of the computer version and name to the technology table;

- Sales (olt 6329): Improvement of sales management with USA taxes (see doc DOC.09.0117.0.AO-(it) - Stores2 - 1.21.0 - Vendite - Modifiche alla navigazione in gestione scontrini per la fiscalità USA.doc);

- Master data (prb 57190): Addition of general parameters data saving block if the payment type in cash is not set;

- Inventories (prb 57021): Redefinition of the 'confirm' and 'reject' options on inventories proposed by the inventory control node;

- Price lists (prb 58797): Addition of a scroll bar in the price list reconstruction phase;

- Master data (prb 59113): Improvement of the display of geographic nodes to make all fields uneditable but leaving them consultable;

- Sales (prb 59709): As a prerequisite the expense department needs to be associated to the department nodes. A control has been added at form receipt level. If the general parameters require the expense department and if the node manages the departments by node, the program checks that the department has been actually authorized on the

node. If this has not been done the program does not allow entry in receipt management;

- Warehouses (prb 60530): Addition of controls which prevent the user from continuing with creation of a new document if there are no parcel barcodes available (the procedure for retrieving available parcel barcodes is described in the document on parcel management);

- Warehouses (prb 60531): When saving a parcel document the "NumeroColli" field will be automatically assigned a value on the document heading;

- Cash register driver (prb 58697): Modification of the driver S2_CR_GENWIN.dll to manage the configuration file by workstation. The program now first searches for the presence of S2_CR_GENWIN_{postazID}.ini where {postazID} is the workstation code; if the file is not present, it will search for S2_CR_GENWIN.ini;

- Denso portable scanner (prb 58615): A decision has been made to enter a warning in the export phase for ANAINV.txt file in the 'Stock for scanner' procedure, so that it is possible to display a message on the video warning the user if the file dimensions are bigger than those set in Stores2. In addition to the warning a log is also managed;

- Customers (olt 6886): Optimization of automatic code assignment management in shipping addresses (in customer form) so that each customer has its own code list;

- Customers (olt 7112 and 6762): Optimization of various phases connected with customer master data (see doc. DOC.09.0151.0.MM-(it) - Stores2 - 1.21.0 - Clienti - Modifiche alla scheda clienti.doc);

- Greek taxes (olt 6485): Optimization and improvement of Greek tax management (for all the details see doc. DOC.09.0152.0.MM-(it) - Stores2 - 1.21.0 - Vendite - Modifiche alla fiscalità greca.doc);

- General (prb 57218): Optimization of management of updating levels so that the Stores2 levels from version 1.0 to version 1.18 are contained in a class, while those of the supported version are included in a new class;

- POS (prb 59554): Modification of the drivers for French POS, so that the protocol type is correctly managed;

- Warehouses (prb 60445): Optimization of "warehouse document management type" by value so that the control on the possibility of changing the values of a document is made based on the date of the last average cost consolidation;

- Sales (olt 6618): Optimization of suspended receipt modification management. It is now possible to modify suspended receipts only "by entering properties" of a receipt, while it is no longer possible to make modifications "by entering display";

- Sales (olt 6181): Optimization of the change cashier procedure. The cashier change tool and button are displayed only if the receipt does not contain lines. This modification is enabled by default;

3.1.3 Corrections

- Master data (prb 58019): Correction of master data management for portable scanner format;

- Inventories (prb 59447): Correction of the translation in English at the end of closing an inventory without quantity differences;

- Connections (prb 59197): Correction of deleting of correlated data in the various tables in the event of product master data physical deletion;

- Connections (prb 60364): Correction of the stock reconstruction function to recalculate the total quantities of the warehouse document;

- Sales (prb 60677): Correction of the heading discount breakdown function in the event of sales receipt adjustment;

- Warehouses (prb 58045): Correction of date management in the confirmation phase of parcels adjusting documents with a date before the date of the last inventory;

- Sales (prb 59618): Correction of the owner value assignment on the receipt heading in the event of reading more than one card;

- Master data (prb 60379): Correction of the movement of the last parcel barcode information generated in the replacement phase of the master workstation;

- Warehouses (prb 60369): Correction of the transmission and retransmission of the last generated parcel barcode;

- Sales (prb 60122): Correction of product price retrieval with the Ignore price list flag but contents in the discounted price list;

- Sales (prb 59743): Correction of management to hide the credit card number of receipts (on both customer and store copies).

3.2 Fix 1.21.1 release on 27/02/2009

This update brings the database level to version 2054.

3.2.1 Addition of new functionalities

- Fidelity (OLT 7256): fidelity point printing management added to EPSON driver, already present for example in Custom or Nucleo drivers.

3.2.2 Corrections

- Sales (prb 60471): correction of the block during receipt list opening phase with receipt management open;

- Master data (prb 61489): correction of master data display in fidelity;

- Warehouses (prb 61164): correction of the warehouse document copy procedure using parcels;

- Warehouses (prb 61166): correction of a saving problem for order lines after use of the 'comprimirighe' tool;

- Warehouses (prb 61383): correction of a duplicate key error which appeared during the parcel confirmation phase;

- Warehouses (prb 61385): correction of the goods return creation procedure with parcel management;

- Connections (prb 61487): correction of price list check screen display, which always remained in the forefront before;

3.3 Fix 1.21.2 release on 18/03/2009

This update brings the database level to version 2058.

3.3.1 Addition of new functionalities

- Connections (olt 7326): During the "MovimentiRighe" table host data extraction and acquisition phase, the "RiferimentoHost" field has been added.

3.3.2 Optimizations

- Sweda cash registers (OLT 7196): optimization of the interface between Stores2 and the Sweda driver and modification of configuration ".ini" file management (see doc. DOC.09.0222.0.MR - (en) – Sweda cash register configuration.doc);

- Greek taxes: (prb 61441 and 62044): alignment of some managements based on Greek tax parameters (see doc. attached to prb 62044).

3.3.3 Improvements

- Sales (prb 60720): Improvement of credit card management in receipt management;

- Sales (prb 61532): Addition of tool blocks in sales to prevent tool clicking with the progress bar enabled;

- Warehouses (prb 60888): Addition of logs in warehouse management to track movement opening and closing operations;

- Password (prb 62361): Speeding up of the program response during entry phase of an incorrect password;

- Query Exec (olt 6963): Improvement of some query exec functions (see doc DOC.05.0156.1.ADE - S2_QueryExec.doc)

- Sales (olt 4673): Improvement of decimal quantity management in receipt management;

3.3.4 Corrections

- Fidelity (prb 61505): correction of the fidelity discount calculation procedure in the event of suspended receipts;

- Fidelity (prb 61861): correction of an error which appeared during the fidelity condition creation phase;

- Sales (prb 61691): correction of 'TipoListino' field value assignment in the event of products which are part of a receipt return;

- Translations (prb 61860): addition and correction of various translations in English;

- Connections (prb 62297): During the extraction to host phase of lines with incorrect discount percentages, the value will now be extracted to zero and not blank;

- Warehouses (prb 61752): Correction of the piece count during the data download from PS phase in managements which use parcels for those products which with the same variant and size had more than one barcode;

- Warehouses (prb 61643): Improvement of saving management for the last generated parcel barcode. Now the saving is performed upon opening and not closing of the screen and it will be possibile to generate parcels from just one workstation at a time;

- Warehouses (prb 61811): Correction of the finished parcel barcode information message during the parcel document creation phase. Now the message no longer blocks and lets you perform data downloading from PS;

- Inventories (prb 61609): During the inventory closing phase the parcel cancellation state is not controlled (if there are partly confirmed but cancelled parcels the program will no longer block you);

- sales: correction of the return reason control on the line in the event of mandatory reason for return;

- sales: correction of re-printing of a tax free with the 'disable invoice/tax free printing on issued receipts' flag;

- warehouses: correction of retrieval of the last barcode in barcode printing;

- movements: correction of display in movement list if no node is indicated and you want to display all the transmitted movements;

- warehouses: correction of description retrieval in foreign language for products in load documents associated to an order;

- sales: correction of document retrieval during the printing phase of a new tax free displaying only the receipts where invoices, tax frees and credit notes have not been issued;

- sales: correction of tax free printing with Dll version Global Refund management;

- connections: correction of stock extraction for parallel nodes during the stock alignment phase;

- connections: correction of nodigiacenzework table acquisition during stock alignment phases;

- general parameters: correction of saving and transmission for barcode extraction options;

- warehouses: correction of adjustment cancellation error in the event of adjustment document display;

- connections: addition of the extraction to host for new customer table fields;

- connections: exclusion of cancelled receipts from MRIVA and MVRPA files for host.

3.4   Fix 1.21.3 release on 30/03/2009

This update brings the database level to version 2065.

3.4.1 Addition of new functionalities

- General (olt): Addition of field recoding management (see doc. DOC.09.0122.0.AO-(en) - Stores2 - 1.21.3 - General – Field recoding.doc);

3.4.2 Improvements

- Customers (prb 62557): Improvement of zip code management on the customer master data form

- Customers (prb 62798): Addition of the "IndirizzoEsteso" field in the "NodiParametriAggiuntivi" table managed on the customer master data form;

3.4.3 Corrections

- Node employees (prb 62114): Correction of barcode display during the node employee property opening phase;

- Events (prb 62420): Correction of the elimination of the first element of the list;

- Statistics (prb 62439 and prb 62676): Correction during the statistics definition and editing phase;

- Master data (prb 62726): Correction of geographic node saving after having eliminated the tax free settings;

- Master data (prb 62787): Correction of the error which occurred when adding a grouping parameter for the automatic reorder;

- Operator classes (prb 62745): Correction of button management on barcode printing on request;

- Customers (prb 62373): Correction of a problem which did not allow hiding the "Credit card" button on the master data of a customer;

- Sales (prb 63079): Correction of the control on the expense department when entering receipt management;

- Statistics (prb 62494): Correction of the possibilità to be able to select a value of a list type custom filter;

- Inventories (prb 62628): Correction of inventory list scrolling, which could cause focus loss problems from the list;

- Sales (prb 62775): Correction of the receipt printing procedure with discounts greater than 50% using SAPEL (Romania) cash registers;

- Barcode printing (prb 62920): Correction of a problem which caused processing of too much data during barcode printing on request;

- Connections (prb 61301): Correction of movement acquisition from host to prevent importing of documents without any righeqta in the event of inexistent size or variant;

- Connections (prb 62930): Addition of 'EventiTipi' table extraction;

- Movements (prb 62476): Correction of consecutive opening of two documents with 'double mouse click';

- Connections (prb 62523): During the movement acquisition phase the 'ricevuto' field value on movimentirighe is kept if it has a value assigned and not overwritten;

- Statistics (prb 62647): Correction of retrieval of nodes to display in the sales source;

- Cashiers (prb 62761): Correction of cashier unlock with temporary password from receipt management;

- Expected presences (prb 62473): Correction of expected presences creation with default management in the event of various employees of different nodes;

- Connections (prb 62759): Correction of CZ packet sorting by automated subnode but which manages the warehouse;

3.5   Fix 1.21.4 release on 10/04/2009

This update brings the database level to version 2069.

3.5.1   Corrections

- General (prb 63163): Correction of the connection enable command from Stores2 which in some cases could fail;

- General (prb 62961): Correction of reconstruction of subconcentrator db which manage messages;

- General (prb 63355): Correction of product search by supplier;

- General (prb 63371): Correction of translation management of fidelity screens;

- Sales (prb 63448): Correction of VAT rate retrieval in the presence of various records in the "CodiciIvaRighe" table with different validity dates but no expiration date;

- Warehouses (prb 62714): Correction of most recent barcode retrieval, with the same dataoraultimavariazione or creation the higher is considered;

- Warehouses (prb 63196): Correction of supplier shipping address display in warehouse documents registered to supplier;

- Warehouses (prb 63255): Modification of record loading logic in movement list, the first 10,000 movements are displayed and loaded and the end of list message changed to 'The first 10,000 records have been displayed';

- Warehouses (prb 63236): During the data acquisition from file phase, if you decide to delete the file, the file will be moved to the trash and not eliminated based on Windows rules;

- Warehouses (prb 63243): Correction of the filter on the document type during the creation phase of a mass receiving document;

- Connections (prb 63327): Correction of the order acquisition from host procedure to correctly perform the qty squaring control (a filter was performed of the processing sequential on righeqta but not on the lines, thus the program doubled the quantity);

- Connections (prb 63328): Modification of the sales price check during the load acquisition from host phase, now the check occurs on the node currency and no longer on the document currency;

- Connections (prb 63334): Correction of the creation, confirmation and transmission of transfers in the event of load automatic generation from transfer and automatic confirmation of the incoming transfer;

- Connections (prb 63472): Correction of autosmistamentotabelle table updating contained in type A packets during the data acquisition phase;

- Connections (prb 63212): Correction of operator class retransmission;

- Connections (prb 62178): Correction of importing from host and warning on movimentirigheqta record logs with quantity at zero;

- Automatic activations (prb 63003): Correction of the automatic activation configuration screen to constrain activation to events for the reorder function;

- Statistics (prb 63198): Correction of statistic performance with automatic activation and hidden filters;

- Customers (prb 63216): Correction of zip code management on the customer form if the province is missing;

3.6   Fix 1.21.5 release on 30/04/2009

This update brings the database level to version 2076.

3.6.1   Improvements

- Sales (prb 62581): Addition of a block on allocation barcode reading if the allocation warehouse is not correctly set;

- Sales (prb 63107): Addition of a control at start-up of receipt management to prevent activation of sales functionality if the clerk code (and node) associated to the cashier master data is not present in the 'Commessi' table;

- Sales (prb 63972): Addition of a control on the amount settled during payments;

- Sales (prb 63370): Addition of the fidelity courtesy phase in foreign language;

- Sales (prb 63600): Addition of the possibility of printing a courtesy phase on the footer of the receipt for RCH Nucleo and Epson FP81 cash registers. The courtesy phase can be set in the field of the same name, situated in "Geographic nodes", "Sales" tab, "Receipt printing options" button.

- Customers (prb 63770): Addition of the "Allow modification of other node customers" flag in Geographic nodes, Various section, used to change customers who do not belong to your node;

- Customers (prb 64058): Modification of customer importing from excel sheet to set the country of the user's reference node as country if it is present;

- Movements (prb 63785): Addition of the possibility to mass good receiving to generate suspended and cancelled adjustment documents (function automatically activated if generation of adjustments is included and not new documents and if the geographic node has the "Transmit suspended adjustments" flag set in the Warehouse section);

- General (prb 63648): Optimization of the exchange rate reconstruction function;

3.6.2 Corrections

- General (prb 62627 and prb 63684): Correction of barcode printing in access;

- Parcels (prb 62938 and prb 63664): Correction of the MovimentoHost flag setting even on old documents;

- Parcels (prb 63150): Correction of line deletion during the parcel confirmation phase with only one line;

- Warehouses (prb 63167): Correction of the final PS/PC differences in the document closing phase;

- Warehouses (prb 63518): Correction of the focus positioning on sizes in the movement grid during the manual product selection phase;

- Warehouses (prb 64019): Correction of the display of transferred and suspended parcels in wizard transfers (now they are no longer displayed);

- Warehouses (prb 63718): Correction of unconfirmable warehouse document confirmation in the event of a date before the last inventory;

- Warehouses (prb 63777): Setting of the MovimentoHost field of the MovimentiTestate table to false for the adjustments generated with automatic 7 in non-parcel management;

- Warehouses (prb 63973): Correction of variant parameter retrieval during the barcode printing phase;

- Sales (prb 63916): Correction of the filter for node on customers in receipt management;

- Sales (prb 64060): Correction of the control on stocks during the product selection phase, if sales account warehouse is present;

- Sales (prb 64308): Correction of tax recalculation in the event of limit or deductible management with application of the discount reason via barcode reading;

- Connections (prb 64226): Correction of transfer extraction with automatic generation, in the event that the outgoing transfer is not suspended;

- Connections (prb 64228): Correction of sorting during CE updates;

- Connections (prb 63790): Correction of S2Send restart after connections;

- Connections (prb 64007): Correction of transaction opening during the 'S2_VAPTP' file importing phase;

- Connections (prb 64285): Correction of the error in acquisition from host of movements for the node without warehouse;

- Connections (prb 63693): Correction of the nodiparametriaggiuntivi table acquisition;

- Connections (prb 63627): Correction of the control on the discount percentage range so that it is performed on the heading discount as well;

- Connections (prb 63697): Correction of the Stores2CE service start-up procedure during the program updating phase to a new service pack;

- Statistics (prb 64298): Correction of a problem for which, during the phase to define a statistic, if there was a column grouping associated with a field without the possibility of selecting the description flag, the program returned an error and did not allow saving the statistic;

- Printouts (prb 63662): Correction of invoice note retrieval during invoice reprinting;

- Customers (prb 64110): Correction of the customer search function, to include the master data with VAT value assigned;

- Geographic nodes (prb 64309): Correction of price list extraction during the reconstruction phase of a geographic node;

- Inventories (prb 63910): Elimination of hourglass display during data downloading from portable scanner;

3.7 Fix 1.21.6 release on 15/05/2009

3.7.1 Addition of new functionalities

- Users (olt 7374): Addition of blocks on the creation/editing of node employees;

- Sales (olt 7531): Modification of sales account management to define which is the main warehouse to use for starting to subtract the pieces. For returns the sales warehouse

will always be used. The new management can be configured via an option button on Geographic nodes, sales section;

- Price lists (olt 7572): Modification of the "ClasseNodoPrezzo" field size of the "ProdottiPrezzi" table from 4 to 10 characters. To manage the new size it will be necessary to manually change the value in the CampiLogici table;

- Customers (prb 64048): addition of the possibility of filtering the reference node and subsets in the screens related to customer search.

3.7.2 Optimizations

- Geographic nodes (prb 64784): optimization of the data saving function for the "Geographic nodes" function.

3.7.3 Improvements

- Warehouses (prb 64174): Speed up of opening function for movement history in stock;

3.7.4 Corrections

- Master data (prb 64534): Correction of translation management on the duty management screen;

- Master data (prb 64319): Correction of the warning message in the discount reason confirmation phase; if associated to a fidelity it cannot be a line and/or heading reason;

- Sales (prb 63953): Correction of mandatory customer parameter management during use of a user with a reference node;

- Sales (prb 64326): Correction of fidelity management by birthday to allow use of the management including by selecting the customer from the headings or specific tool;

- Sales (prb 64423): Correction of customer selection from heading management if a fidelity is already present without master data;

- Sales (prb 62577): Correction of direct product selection management by the code;

- Connections (prb 64433): Correction of the host acquisition of price lists per node;

- Connections (prb 64461): Correction of the host acquisition of prices;

- Connections (prb 64762): Correction of the preparation of differential updates containing .bin type files;

- Connections (prb 64727): Correction of the AggiornaOrdine function during type B file acquisition;

- Connections (prb 64310): Correction of the automatic field value during OT extraction phase, at the first extraction with value 0 and at the second with value 5 in the event of automatic IT creation;

- Connections (prb 64458): Correction of fidelitymovimenti extraction for host allowing alphanumeric nodes during extraction;

- Connections (prb 64494): Correction of host parametrigenerali modification extraction from the head office to other stores;

- Connections (prb 64539): Correction of cancelled OT acquisition which is then not associated to any IT;

- Connections (prb 64555): Correction of the CZ packet integrity check by checking only the presence of movimentitestate, movimentirighe and movimentitigheqta tables;

- Connections (prb 64498): Correction of extraction in access and sql of fidelitymovimenti with sorting by fidelity;

- Orders (prb 64762): Correction of the quantities in the reorder proposal;

- Price lists (prb 64662): correction of price list importing in Excel;

- Products (prb 64667): correction of information saving in the assignment function for vat department cash registers;

- Warehouses (prb 64822): correction of an entry problem for uncoded product entry in a warehouse document;

- Warehouses (prb 64850): correction of a refresh problem in the product entry procedure from portable scanner;

- Warehouses (prb 64596): correction of the line extraction procedure of owner lists.

3.8 Fix 1.21.7 release on 16/06/2009

3.8.1 Addition of new functionalities

- Deposits (olt 7569): In the "Cash fund" section of the "Sales" tab of geographic nodes a new "Disable deposited cash" parameter has been added so that the operator cannot register any value to deposit if cash has not been collected. It is assumed that the modifications will be enabled if the dynamic cash fund is set. Otherwise the box for deposited cash would be already disabled;

- Statistics (olt 7733): Addition of the possibility in statistics to translate the numbers in words for Russian (1305 would become one thousand three hundred five);

- Transfers (olt 7714): Addition of the possibility of only performing adjustments without transfers and to also take into account the suspended elements;

- Traffic counter (prb 65075): addition of a support for the Nedap traffic counter;

- Sales (prb 65342): addition of the possibility of printing fidelity information on receipts with Fasy Libeccio cash registers;

- Cash registers (olt 7602): addition of the possibility of reading ECR code of fiscal cash register registrations and to write the information on a database;

- Online returns (olt 7276): addition of the possibility of managing online returns.

3.8.2 Improvements

- General (prb 65135): Improvement of the Stores2 process start function;

- General (prb 65197): Integration of path variable management in automatic activations. For details see the parameters described in the document DOC.07.0585.0.MM-(it) - Stores2 - 1.17.0 - Utility – External utility management in Stores2.doc.

3.8.3 Corrections

- Warehouses (prb 63409): correction of opening of movimentischeda and collischeda which now have an exclusive operation, it will not be possible to open them at the same time;

- Connections (prb 64983): correction of the date checking routine to remove any thousandths set on the date before performing data extraction;

- Master data (prb 65048): correction of the geographic node retransmission tool to update the dataoraultimavariazione for all the correlated tables which need to be retransmitted;

- Connections (prb 65745): addition of an update level for retransmission of all loads from other stores with nodoogirine different than the node (only for a fortech customer);

- General (prb 65864): correction of the Stores2 closing process in the event of errors, all of the stores2 services are terminated without leaving open sessions;

- Warehouses (prb 65882): correction of the refresh in the movement list with OS WVista;

- Connections (prb 64900): Correction of update query in the "ProdottiTaglie" table in data acquisition from host phase;

- Master data (prb 64997): Correction of filter management on the deletion state in the list of minimum supply lists;

- Master data (prb 65449): Correction of button management in the inventory list and count documents;

- Orders (prb 65143 and 65959): Correction of order generation via minimum supply;

- Statistics (prb 65152): Correction of information display in the dependent custom filters during statistic creation phase;

- Statistics (prb 65999): Insertion of the missing part of complete cash register management on statistics;

- General (prb 65383): Correction of the display of data in lists on Vista;

- General (prb 65731): Correction of the Export to header check tool;

- Customers (prb 64796): correction of the list of customer search function in receipt management;

- Warehouses (prb 64851): correction of net price recalculation on warehouse documents with heading discount;

- Warehouses (prb 65767): correction of an error which appeared by entering landing cost in the heading of a warehouse document;

- Price lists (prb 64904): correction of an error in automatic price list creation phase with code greater than three characters;

- Inventories (prb 65001): correction of the Stores2 functions connected to rejected inventory management;

- Sales (prb 65407): correction of an error which appeared by adjusting a sale using Greek taxes;

- Sales (prb 65430): correction of the block which did not allow adjustment of a payment document with Greek taxes;

- Warehouses (prb 65482): Correction of the suspended load documents without making modifications;

- Warehouses (prb 65849): Correction of parcel managed return document generation.

3.9 Rilascio Fix 1.21.8 in data 17/07/2009

Questo aggiornamento porta il livello del database alla versione 2094.

3.9.1 Aggiunta di nuove funzionalità

- Vendite (OLT 7782): Aggiunta la possibilità di reperire il totale dell'incassato dalla memoria fiscale per le casse russe Wincor Nixdorf modello "??101??-?";

3.9.2 Migliorie

- Magazzini (prb 65502): Modificata la gestione della classe operatore con opzione di modifica documenti "solo a valore" per consentire il cambio dei valori anche su documenti di rettifica di nodi dipendenti;

- ExportToOther (prb 66120): Modificata la gestione di esportazione per ordinare il record relativo alla taglia in base al campo sequenza;

3.9.3 Correzioni

- Anagrafiche (prb 66240): Corretta gestione delle liste intestatari nei magazzini (aggiunta nodo, eliminazione, modifica lista etc);

- Anagrafiche (prb 66360): Corretta la ricostruzione dei database in access;

- Anagrafiche (prb 67224): Corretta l'importazione dei listini da file excel, in presenza di codici prodotto più lunghi di 20 caratteri;

- Vendite (prb): Corretta la gestione in gestione scontrini del moltiplicatore delle quantità;

- Vendite (prb 67281): Corretta l'assegnazione dello status 'fiscale' a fatture e tax free per fare in modo che anche il movimento di vendita associato sia fiscale, nel caso in cui non venga stampato uno scontrino;

- Vendite (prb 67522): Correzione dell'implementazione della stampa punteggi fidelity con casse Fasy Libeccio, per fare in modo che sia funzionale anche utilizzando i driver Sideral;

- Vendite: (prb 66326): Correzione della procedura per cui, cancellando la motivazione sconto, il programma ricalcolava il valore dell'aliquota IVA senza considerare che alla riga avrebbe potuto essere assegnata un'aliquota diversa da quella di default;

- Vendite (prb 66620): Correzione di un problema di mancata attivazione della cassa Olivetti PRT 200 FX;

- Vendite (prb 66752): Corretta la gestione della modalità standby del display delle casse Epson FP81/90;

- Versamenti (prb 65199): Correzione di un'anomalia che causava l'alterazione della form di Stores2 di compilazione versamenti dopo che venivano compilati dieci versamenti consecutivamente ed era abilitato il fondo cassa dinamico;

- Magazzini (prb 66472): Corretta la creazione dei documenti che gestiscono la stagione;

- Magazzini (prb 67139): Corretto il controllo sui riferimenti esterni in fase di ripristino di un documento annullato (il controllo viene eseguito solo se la causale lo prevede);

- Magazzini (prb 66758): Corretta la gestione dello stato "In lavorazione" per le causali di magazzine gestite con l'S2_Send;

- Magazzini (prb 67027): Correzione di un errore di sintassi durante il salvataggio dei prodotti in griglia in procedura resi;

- Clienti (prb 66425): Corretta la decodifica delle località con apostrofo nella scheda anagrafica del cliente;

- Fidelity (67469): Corretto l'utilizzo del massimale nella gestione per compleanno;

- Utenti (prb 67138): Corretta la gestione di unificazione password tra utenti e cassieri;

- Ordini (prb 66086): Corretto il ricalcolo del valore scontato in visualizzazione delle righe dell'ordine;

- Collegamenti (prb 66393): Corretto lo smistamento per ramo dei listini tramite il modulo S2_Send;

- Collegamenti (prb 66598): Corretta la gestione di ricodifica in acquisizione di pacchetti dati con db access;

- Collegamenti (prb 66856): Corretta la trasmissione delle fatture;

- Collegamenti (prb 67444): Corretta ma gestione dei messaggi e dei log in fase di aggiornamento su un negozio bloccato;

- Collegamenti (prb 67050): Correzione di un errore in fase di aggiornamento di Stores2 durante la copia del file Kcryptsetup.dll;

- Collegamenti (prb 66338): Corretta la gestione dell'errore in caso di acquisizione aggiornamenti di Stores2 utilizzando credenziali amministrative sbagliate;

- Collegamenti (prb 66691): Corretta un'anomalia nell'esportazione giacenze ad host;

- Altro (prb 67160): Velocizzata la ricostruzione delle giacenze;

3.10 Rilascio Fix 1.21.9 in data 03/008/2009

Questo aggiornamento porta il livello del database alla versione 2097.

3.10.1 Aggiunta di nuove funzionalità
3.10.2 Migliorie

- Ordini (prb 67690): Modificata la gestione del sottoscorta per poter mantenere la compatibilità con l'utilizzo delle liste di ordinabilità;

3.10.3 Correzioni

- Vendite (prb 67706 e 66160): Corretta la gestione del tasto abort in caso di errori di timeout durante le transazioni con il PcCharge;

- Generale (prb 67699): Corretta la routine di reperimento del prezzo in caso di prodotti con apostrofo nel codice articolo;

- Collegamenti (prb 67831): corretta la valorizzazione del percorso di copia dei file di tipo EZ nei subconcentratori;

- Collegamenti (prb 68197): corretto l'ordinamento dell'estrazione dei prezzi per taglia con il modulo S2_ExportToOther, l'ordinamento viene ora eseguito per sequenza taglia e non in ordine alfabetico;

- Traduzioni (prb 67148): corrette alcune traduzioni nella procedura resi online;

- Giacenze (prb 67781): correzione di un problema di visualizzazione delle giacenze dopo aver effettuato una ricostruzione giacenze;

- Magazzini (prb 67824): corretto un problema nella gestione resi per stagione con gestione colli;

- Magazzini (prb 67968): inseriti messaggi che riportano i dettagli dei prodotti scartati perche' aventi stagione differente da quella selezionata;

- Magazzini (prb 68106): correzione della gestione del bulk insert in fase di acquisizione resi online;

- Vendite (prb 68049): correzione della gestione del tipo pagamento nel caso di creazione di uno scontrino con reso;

3.11 Rilascio Fix 1.21.10 in data 27/008/2009

Questo aggiornamento porta il livello del database alla versione 2098.

3.11.1 Aggiunta di nuove funzionalità

3.11.2 Migliorie

- Magazzini (prb 66696): modificato il reperimento del prezzo nella procedura di carico da ordine: il costo del prodotto viene reperito al netto degli sconti di riga dell'ordine di riferimento;

- Vendite (prb 68940): è ora possibile eliminare logicamente uno scontrino consignment trasmesso e sospeso anche dall'utente senza abilitazione alla modifica dei documenti trasmessi;

- Collegamenti (prb 68986): in fase di acquisizione di un movimento sospeso con 'gestione on line' già presente e confermato in periferia il documento viene scartato sia durante attivazione automatica che manuale;

3.11.3 Correzioni

- Vendite (prb 67916): Corretto il reperimento dello sconto di testata associato all'anagrafica dei dipendenti azienda;

- Movimenti (prb 67950): corretta la visualizzazione del filtro 'InLavorazione' in caso di installazione sql;

- Versamenti (prb 67952): corretta la visualizzazione nell'elenco versamenti del commesso a cui è associato il versamento selezionato;

- Movimenti (prb 68262): corretta gestione costo landing sulle righe in caso di documento rettificato;

- Generale (prb 68417): eliminata la copia dell'ultimobarcodecollo in fase di copia nodo;

- Collegamenti (prb 68595): corretta routine di reperimento nodi paralleli per l'estrazione delle giacenze;

- Vendite (prb 69227): corretta valorizzazione nodoorigine e nodomodifica di uno scontrino consignment;

3.12 Rilascio Fix 1.21.11 in data 16/09/2009

Questo aggiornamento porta il livello del database alla versione 2099.

3.12.1 Migliorie

- Casse (prb 70320): Aggiunto vecchio driver di stampa che usava i timeout per la stampa degli scontrini. Valido solo per Micropos (W10) e Micropos GE (W11). Il file di ini (S2_CR_Sweda.ini) dovrà essere impostato nella vecchia modalità (Es. [Timeout] TimeOutLungo = 2000 TimeOutCorto = 1000). E' necessario eseguire manualmente sulla sede e sul negozio le query allegate per aggiungere queste casse all'elenco (di default non saranno visibili e sono altamente sconsigliate) Sweda_OLD_-_queries.txt ;

- Vendite (olt 5928): Aggiunto di un messaggio di errore in caso di mancato reprimento delle righe scontrino durante la stampa;

- Statistiche (prb 69525): prima la 'FonteVendite' escludeva sempre gli scontrini annullati o sospesi; ora possono essere inclusi nelle statistiche;

3.12.2 Correzioni

- Listini (prb 67815): Uniformato il calcolo dell'arrotondamento dello sconto tra i listini rapidi e le vendite;

- Listini (prb 70047): Corretti i messaggi di errore e la lista dei prodotti errati in caso di importazione listini da file excel

- Vendite (prb 70295): Modificato il driver S2_CR_DATECS_DP_500 per evitare di mandare le sequenze di blocco e sblocco tastiera all'avvio della gestione scontrini per testare la connessione con la cassa;

- Vendite (prb 69183): Corretta ripartizione sconto di testata sulle righe in caso di valore netto a zero della riga;

- Vendite (prb 69325): corretta l'emissione scontrini con resi con cassa Sweda Mikropos;

- Versamenti (prb 69688): Corretta la gestione della modifica di un versamento nel caso non sia l'ultimo eseguito a seconda della configurazione di mantenimento coerenza dati sul nodo geografico;

- Versamenti (prb 69570): correzione di un errore nella stampa rapportino giornaliero;

- Magazzini (prb 67811): corretto un errore che poteva apparire nel caso in cui arrivasse un messaggio di notifica legato ai resi online e l'operatore si trovasse nella schermata di selezione prodotto o gestione riga scontrino della gestione scontrini;

- Magazzini (prb 70026): In fase di conferma documento di reso nella modalità on line senza connessione, se si decide di annullare, i file preparati verranno cancellati;

- Collegamenti (prb 69159): Corretto messaggio di errore in fase di scarto documenti per stagione errata;

- Collegamenti (prb 69403): Corretta l'estrazione ad host dei movimenti considerando anche i record con statoapprovazionehost=3.

3.13 Rilascio Fix 1.21.12 in data 19/10/2009

3.13.1 Aggiunta di nuove funzionalità

- Vendite (OLT 8145): aggiunto il supporto alla fiscalità turca (vedi doc. DOC.09.0562.0.MM-(it) - Stores2 - 1.21.0 - Vendite - Fiscalità turca.doc);

- Collegamenti (OLT 8170): aggiunta la gestione di log aggiuntivi per le attività del tool S2_Exchange (vedi doc. DOC.09.0561.0.MM-(it) - Stores2 - 1.21.0 - Collegamenti - Monitor attività S2_Exchange.doc);

- Parametri generali (OLT 8096): aggiunta la gestione dell'attivazione NFC su nodo e postazione.

3.13.2 Correzioni

- Collegamenti (prb 69872): corretta acquisizione simultanea di file standard fortech e file cliente durante l'acquisizione di dati da host;

- Listini (prb 71504): corretta importazioni prezzi da foglio excel in caso di anagrafica prodotti senza varianti;

- Anagrafiche (prb 71174): aggiunte campi per la parametrizzazione dell'abilitazione all'utilizzo del NFC sia sulla postazione che sul nodo geografico;

- collegamenti (prb 71944): corretto lo svuotamento della tabella S2_ProdottiTaglie nel dbexchange_Input in fase di importazione corretta dei record;

- Autostart (prb 69527): corretto S2_Autostart.ocx facendo in modo di passare la password sulla stringa di connessione al database;

- Host (prb 70518): aggiunte le transazioni in fase di acquisizione movimenti da host;

- Magazzini (prb 70521): aggiunte le transazioni in fase di chiusura movimenti di magazzino;

- Resi on line (prb 70535): modificato il salvataggio del Log_S2ReturnedManager per essere splittato e spostato ogni 2 Mb;

- Clienti (prb 71651): corretto il controllo sul campo email per escluderlo se nascosto;

- Listini (prb 71685): corretta la creazione dei listini rapidi a scaglione;

- Export a terzi (prb 71895) corretta l'esportazione dei movimenti intestati a cliente dove la somma dei caratteri del nome e del cognome superavano i 50;

- Magazzini (prb 72118): corretta la visualizzazione del nodo destinatario nei documenti di magazzino anche per quei documenti con salvato un nodo non più valido;

- Magazzini (prb 70478): correzione di alcune anomalie riguardanti resi online arrivati due volte.

3.14 Rilascio Fix 1.21.13 in data 04/11/2009

Questo aggiornamento porta il livello del database alla versione 2100.

3.14.1 Aggiunta di nuove funzionalità

- Aggiunte (prb 73275): Acciunta la possibilità, in fase di collegamento, di scrivere un file con il nome macchina di chi ha lanciato i collegamenti (vedi DOC.09.0550.0.AO-(it) - Stores2 - 1.21.13 - 1.22.6 - Collegamenti - Scrittura log exchange con nome macchina.doc);

3.14.2 Correzioni

- Listini (prb 72919): Corretta la copia del fattore in fase di creazione da listini rapidi;

- Clienti (prb 71049): correzione della schermata di richiesta inserimento barcode in fase di inserimento di un cliente fidelity;

- Vendite (prb 72671): corretta un'anomalia nella gestione conto vendita per cui i prodotti venivano scaricati erroneamente dal magazzino di vendita;

- Magazzini (prb 72454): Allungato il campo "CodiceScalarinoTaglie" nella tabella "AppoggioCartellini" a 20 caratteri;

- Magazzini (prb 72539): Corretto il salvataggio delle note per gli utenti con opzione di modificare solo i valori;
