3.13	Fix 1.24.12 release on 10/11/2010	39
3.13.1	Corrections	39

Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This document contains all the modifications made to Stores2 from the 1.24.0 version.

2 Useful Information

N.B.:

The fixes include all previous fixes starting from the Service Pack (i.e. the fix 1.24.3 will include all the fixes released starting from Service Pack 1.24.0).

2.1 External Modules

IMPORTANT: the following external modules must also be released with sp 1.24.0:

- S2_UC00.exe
- S2_UC02.exe
- S2_UC06.exe
- S2_UC15.exe replaces S2_UC13.exe
- S2_UC14.exe
- S2_UC16.exe (if you want to perform the archiving function on access databases)
- S2_UC18.exe (solves a problem related to the calendar, and it is necessary to install it at customers who use Epson cash registers)

so check which ones are already present in the installation and release the remaining ones.

The setup of this version already contains all these components (excluding S2_UC16.exe and S2_UC18.exe).

2.2 Host data interchange tracks

Make sure that the host data interchange tracks are always updated to the version in question (see document DOC.06.0145).

2.3 Changes to Stores2 database

If you need to make changes to the Stores2 database (add indexes, views, etc.) you need to follow the rules described in the document "MCR.09.0208.0.ADE-(en) - Customer changes to database.doc". Ask the Fortech technical department for the document.

3 List of modifications

3.1 Service Pack 1.24.0 release on 26/02/2010

This update brings the database level to version 2425.

3.1.1 Addition of new functionalities

- General (olt 8599): Addition of virtual keyboard management for touch screen monitors (see doc. DOC.10.0123.0.AO-(en) - Stores2 - 1.24.0 - General – Touch screen management.doc);
- General (prb 80706): Addition of differentiated caption management for tools in various functions (see doc. DOC.10.0128.0.AO-(en) - Stores2 - 1.24.0 - General – Differentiated caption management for tools in various functions.doc);
- Warehouses (olt 8458): Addition of line note management on warehouse movements (see doc. DOC.10.0121.0.AO-(en) - Stores2 - 1.24.0 - Warehouses – Line note management on warehouse documents.doc);
- Warehouses (olt 8264): Addition of a tool used to completely adjust a warehouse document in cases where, for example, the sent goods do not arrive at the store (see DOC.10.0169.0.MM-(en) - Stores2 - 1.24.0 - Warehouses – Unreceived goods management.doc);
- Customers (olt 8347): Addition of printing management for single customer from the list (see doc DOC.10.0122.0.AO-(en) - Stores2 - 1.24.0 - Customers – Single customer printing management.doc);
- Customers (olt 8453): Creation of an implementation on the customer form to allow indicating a date of birth without entering the year (see DOC.10.0164.0.MM-(en) - Stores2 - 1.24.0 – Customers – Customer date of birth management without year.doc);
- Sales (olt 8672 and olt 8072): Addition of discount table management for the creation of price runtime (see doc. DOC.10.0124.0.AO-(en) - Stores2 - 1.24.0 - Sales – Discount table management.doc);

- Sales (olt 7987): Addition of controls on the maximum receipt and change amount (see doc. DOC.10.0127.0.AO-(en) - Stores2 - 1.24.0 - Sales – Maximum receipt amount control.doc);
- Sales (prb 78544): Addition of the possibility of printing the discount voucher barcode including on non-fiscal printers. The '450' field has been added in the 'footer' section of receipt formats (modification connected with OLT 7808);
- Sales (prb 80519): Addition of a control on the possibility of reprinting receipts with fiscal cash registers;
- Sales (olt 6195): Addition of a series of improvements to goods stocking management (see DOC.10.0175.0.MM-(en) - Stores2 - 1.24.0 - Sales – Optimizations to goods stocking management.doc);
- Sales (olt 7808): Addition of the possibility of managing "pro-forma" invoices and returns from customers if the customer returns goods for a value greater than the goods taken in exchange (see DOC.10.0200.0.MM-(en) - Stores2 - 1.24.0 – Sales – Pro-forma invoices and returns from customers.doc);
- Sales (olt 8412): An implementation has been made so that in the retrieved product list in receipt management only items with a valid sales price are displayed (see DOC.10.0177.0.MM-(en) - Stores2 - 1.24.0 – Sales – Constraint on products for sale selection.doc);
- Sales (olt 8590): An implementation has been made valid for all pos interfaces. During the payment with pos phase, the progress bar which informs the operator on the transaction process now also shows the information on the type of payment and respective amount (see DOC.10.0187.0.MM-(en) - Stores2 - 1.24.0 – Sales – Improvements to interfacing with pos devices.doc);
- Sales (olt 8800): Addition of the possibility of adding a customizable phrase in fidelity with points management (see DOC.10.0169.0.MM-(en) - Stores2 - 1.24.0 – Sales – Customized message management in fidelity receipts.doc);
- Sales (olt 8854): Addition of the possibility of printing a discount summary phrase on a receipt and two new descriptions which are printed before the fidelity barcode number and receipt barcode (see DOC.10.0197.0.MM-(en) - Stores2 - 1.24.0 – Sales – Discount summary printing.doc);

- Fidelity (olt 8309): Implementation of the possibility for block migration of all fidelity customers from one store to another store (see DOC.10.0167.0.MM-(en) - Stores2 - 1.24.0 – Customers – Fidelity customer migration between nodes.doc);
- Fidelity (olt 8392): Addition of a change whereby when beeping the barcode of a fidelity customer who can use a fidelity discount, the operator is immediately notified of the discount, without having to wait for receipt closing (see DOC.10.0176.0.MM -(en) - Stores2 - 1.24.0 – Sales – Changes to fidelity discount display.doc);
- Deposits (olt 8550): Implementation made to let an operator enter a negative amount in deposits (see DOC.10.0167.0.MM-(en) - Stores2 - 1.24.0 – Sales – Negative Z-Report in deposits.doc);
- Deposits (prb 78053): Addition of the possibility of filtering the list of deposits by sales date, and to display it within the list;
- Connections (olt 8887): Addition of variable management in automatic activations (see doc. DOC.10.0125.0.AO-(en) - Stores2 - 1.24.0 – Automatic activations – Key word management in automatic activation parameters.doc);
- Connections (olt 8888, prb 77931): Addition of computer turn off management in the manual connection phase (see doc. DOC.10.0126.0.AO-(en) - Stores2 - 1.24.0 - Connections – PC switch off management in manual connections.doc);

3.1.2 Improvements

- Master data (olt 8840): Addition of a constraint on supplier master data editing for own nodes, or only if they are dependent nodes;
- Master data (olt 8054): Limitation to the number of settable parameters in geographic nodes to 20 due to compatibility with access constraints;
- Master data (olt 8981): Movement of the system message configuration to the geographic node installation section;
- Master data (prb 77791): Increase of the “Descrizione” field to 100 characters in automatic activations;
- Master data (prb 79644): Addition of a form (warehouse button) to geographic nodes sales section to contain options regarding warehouses;

- Warehouses (olt 8764): Improvement to ordered reconstruction and made it independent from stock reconstruction;
- Warehouses (prb 80232): Improvements made to the warehouse movement deletion phase;
- Warehouses (prb 80282): Improvement to the use of warning messages for head office confirmation procedures for an adjustment document;
- Sales (olt 8765): Improvement to receipt deletion, in order to delete already transmitted suspended receipts including without specific authorization;
- Sales (prb 75893): Addition of the "ConsentiStampaGiftCard" field to the "Casse" table, this field indicates for which cash registers it is possible to print the department of a gift card set as non-fiscal;
- Sales (prb 78372): Improvements have been added for a correct management (opening and closing) of the payment window;
- Sales (prb 78084): Improvement of automatic payment management in the closing phase for a receipt;
- Sales (prb 78649): Improvement in terms of code level of header discount management only for line discounts;
- Sales (prb 80156): Improvement and optimization of information retrieval on various sales-related managements which are managed by the geographic node;
- Sales (prb 79261): Modification of log writing to save the sales line motive;
- Warehouses (prb 78755): Addition of a "UsuTP" field to the "MovimentiTestate" table to identify where the PS was used in the goods comparison phase;
- Connections (olt 8762): Removal of stock reconstruction forcing for all at the end of connection, regardless of the number of movements present in the packet, mass stock reconstruction is performed;

3.1.3 Corrections

- General (prb 78055): Addition of some missing descriptions in the ElenchiFiltriCampi table;
- Host (prb 79787): Addition of the 'rifmovnodo', 'rifmovanno', 'rifmovtipo', 'rifmovnumero' and 'rifmovnodoorigine' fields of "MovimentiRighe" in the interchange tracks;
- Orders (prb 77933): Modification of the order retransmission procedure, now the node performing the operation must be the order node or head office node;
- Orders (prb 77979): Correction of focus repositioning after entry of a non-orderable product in an order;
- Sales (prb 78369): Correction of a problem which could make the payment window be called up more than once;
- Sales (prb 79263): Correction of an error in the receipt printing phase if a closing operation was performed too fast. The cash register is not able to manage too much information that arrives at the same time, so some cycles were added to delay information processing;
- Sales (prb 79363): Correction of a problem which occurred by creating a discount voucher barcode for an alphanumeric node if in the creation phase for the first barcode and other barcodes exist with the same prefix but of other nodes;
- Sales (prb 79425): Correction of error management for Dataprocess cash registers. If the 'Fpconnector' driver closes when filling out a receipt, once the closing phase is started Stores2 will give the possibility of reactivating the driver (thus closing the receipt) or cancel the sale;
- Sales (prb 77309): Correction of the opening/closing of the sales stock management;
- Sales (prb 78497): Correction of warehouse updating on document lines during the discount reason editing phase;

- Sales (prb 79379): Correction of the use of the generic start and end validity dates for promotions;
- Sales (prb 79646): Correction of an error in the receipt printing phase if a closing operation was performed too fast. The cash register is not able to manage too much information that arrives at the same time, so some cycles were added to delay information processing;
- Warehouses (prb 79955): Correction of confirmation of documents with an apostrophe in the external reference number;
- Statistics (prb 80262): Correction of datasource exporting with DTS (ExportDSWithDTS parameter in Store2.ini) which returned an error with SQL Server 2008;

3.2 Fix 1.24.1 release on 22/03/2010

This update brings the database level to version 2431.

3.2.1 Addition of new functionalities

- Generic (olt 9132): Addition of the possibility of db reconstruction in sql 2005 starting from a head office with sql 2008 (see doc DOC.10.0131.0.AO-(en) - Stores2 - 1.24.1 – General parameters – SQL 2005 and 2008 database reconstruction .doc);
- Customer orders (prb 82304): Modification of approval management on customer orders. If the order control node is not set for the node loading the order, the order needs to be already confirmed;
- Sales (olt 8758): Addition of the 'CleanCash' interface for Swedish taxation (see doc. DOC.10.0717.1.MS - (en) - CleanCash Sweden configuration.doc);
- Sales (olt 9124): Addition of interfacing of RCH GLOBE cash register with Stores2 (see DOC.10.0246.0.MB - (en) - RCH Globe driver configuration.doc);
- Sales (olt 9157): Addition of an improvement to pro-forma invoice management in order to be able to perform an incoming cash register generation for credit notes issued with payments other than cash;
- Sales (olt 8853): Addition of gadget management (see doc DOC.10.0130.0.AO-(en) - Stores2 - 1.24.1 - Sales – Gadget management.doc);

- Warehouses (prb 82004): Modification of document approval management from head office. The reject function can no longer be performed for documents before the latest closed inventory;
- Warehouses (olt 7980): Addition of the possibility of making warehouse FIFO value assignments (see MCR.7980.09.0485.1.ADE-(en) – FIFO value assignment.doc);
- Warehouses (olt 9029): Parameter setting for value assignment management of warehouse movement adjustment date (see doc DOC.10.0132.0.AO-(en) - Stores2 - 1.24.1 - Warehouses – Modification to document adjustment date.doc);

3.2.2 Improvements

- Generic (prb 81151): Improvement of the positioning of the screen inside the Main area;
- Generic (prb 81161): Improvement of the layout of fields and the size of the warehouse motive screens and in general parameters;
- Price lists (prb 81687) Improvement of the performance of the VerificaListini function;
- Fidelity (prb 74771): Optimizations made in the code for movement fidelity cancellation procedures with Greek taxation;
- Sales (prb 80541): Optimization of the 'CleanCash' fiscal module interfacing for Swedish taxation;
- Sales (prb 80770): Optimization of the automatic return procedure; if the node requires that the returns are justified, the control must also be performed during the automatic return procedure;
- Sales (prb 80925): Speed up of opening of receipt display opening;
- Warehouses (prb 81389): Improvement of the display of cancelled lines in uneditable movements. They will now be indicated in red;

3.2.3 Corrections

- Other (prb 82090): Correction of Stores2SQLServer collation combo loading;

- Other (prb 82300): Correction of order of nodes in data retransmission;
- ExportHeaderCheck (prb 82136): Correction of an error using the tool S2_Exportheadercheck.exe;
- Master data (prb 81030): Correction of the problem during use of new payments in the payment grid in various authorizations of the sales section in geographic nodes;
- Master data (prb 81557): Correction of an overflow error when entering in property of the master data of a product with 51800 records in 'prodottiprezzi';
- Customers (prb 82139): Correction of the block entry procedure for duplicate customers;
- Customers (prb 81578): Correction of the label that appeared after retransmission of a customer;
- Fidelity (prb 81568): Inhibition of the possibility of editing fidelity conditions entered from other stores;
- Statistics (prb 81401): Correction of the display of nodes which can be used in the statistics;
- Online Stock (prb 81107): Addition of a correction so that when requesting the stock from a node which has on-line stock activated for the node, the request does not need to be sent to the server;
- Sales (prb 81112): Correction of blank field management in the invoice printing phase with the obligation of coding the customer;
- Sales (prb 82193): Correction of promotion operation if various geographic node parameters are selected in the 'node' tab;
- Sales (prb 80864): Restoration of paper finished/almost finished and open door control;

- Warehouses (prb 81589): Correction of data downloading from portable scanner management with cipherlab interface in order to keep from going into overflow after reading many items (more than 2500);
- Warehouses (prb 82299): Correction of the 'ambiguous column name Annullato' error in the warehouse document closing phase;
- Warehouses (prb 81829): Execution of a repair to correctly show the net price in the load to order; Orders (prb 81364): Correction of the possibility to set the expiration date manually;
- Orders (prb 81009): Addition of a forcing for the selection of the supplier if the flag is enabled for the product/supplier association constraint;
- Connections (prb 80893, 82119): Correction of simultaneous start-up management of Stores2.exe and S2_exchange.exe and mutex management of the two applications;
- Connections (prb 81924) Correction of the compatibility of the S2_Autostart.exe module;
- Connections (prb 82003): Correction of the error which occurred during the "EliminazioneVecchiArchiviTrasmissione" second connection round;
- Connections (prb 80112): Execution of a modification so that data never transmitted to stores (due to time synchronization problems) are retransmitted;
- Connections (prb 80714): Correction of fidelity movement extraction with the FidelityMovimenti sorted by 'Fidelity';
- Connections (prb 80966): Correction of an error in the automatic activation execution phase with external systems;
- Connections (prb 81695): Correction of an error which could occur in the incorrect order acquisition phase;
- Connections (prb 82296): Correction of a problem during acquisition of packets containing master data;

3.3 Fix 1.24.2 release on 31/03/2010

This update brings the database level to version 2441.

3.3.1 Addition of new functionalities

- Generic (olt 9071): Customized message management during the Stores2 start-up phase (see doc DOC.10.0262.0.AO-(en) - Stores2 - 1.24.2 - Stores2 – Message management at program start-up.doc);
- Generic (olt 8040): Addition of the possibility of being able to save information on the database regarding the code of the user who created/modified a particular type of document and the corresponding geographic node (see DOC.10.0273.0.MM-(en) - Stores2 - 1.24.2 - General – Saving last Stores2 user references.doc);
- Price lists (olt 8666): Addition of the possibility of using the filter/search functionality in the product grid in quick price lists (see DOC.10.0272.0.MM-(en) - Stores2 - 1.24.2 – Price lists – Product search in quick price list grid.doc);
- Customers (olt 8742): Addition of the possibility of specifying the mandatory status of one of more classification parameters in the master data of a customer (see DOC.10.0268.0.MM-(en) - Stores2 - 1.24.2 – Customers – Mandatory customer parameters in master data.doc);
- Stock (olt 9072): Management of product exclusion of the 'defective' warehouse during the stock search phase (see doc DOC.10.0263.0.AO-(en) - Stores2 - 1.24.2 – Warehouses – Defective product exclusion from stock.doc);
- Orders (olt 9170): Addition of bank identifier management for suppliers in orders (see doc DOC.10.0265.0.AO-(en) - Stores2 - 1.24.2 - Orders – Bank identifier management on orders and suppliers.doc);
- Sales (olt 8662): A series of modifications have been made to unified barcode/password management between employee, cashier and clerk (see DOC.10.0274.0.MM-(en) - Stores2 - 1.24.2 – General – Single barcode and password for employee cashier clerk.doc);
- Sales (olt 9295): Addition of a control on the presence of loads in sale account management (see doc DOC.10.0276.0.AO-(en) - Stores2 - 1.24.2 – Sales – Load presence control in sales account management.doc);

- Warehouses (olt 9255): Addition of product information in PS data comparison and in the keyboard emulation screen (see doc DOC.10.0275.0.AO-(en) - Stores2 - 1.24.2 - Warehouses – Additional information on read product.doc);
- Warehouses (olt 8293): Addition of product order type management in the grid in the data unloading from PS phase (see doc DOC.10.0261.0.AO-(en) - Stores2 - 1.24.2 - Warehouses – Unloaded barcode ordering in barcode printing.doc);
- Warehouses (olt 9067): The possibility has been implemented of forcing date assignment to a suspended document being confirmed (see DOC.10.0258.0.MM-(en) - Stores2 - 1.24.2 - Warehouses – Suspended document date management.doc);
- Warehouses (olt 9073): The possibility has been implemented of editing the confirmation date of a warehouse document, assigned using the 'Set date' function (see DOC.10.0257.0.MM-(en) - Stores2 - 1.24.2 - Warehouses – Editing the proposed date on loads.doc);
- Export to other (prb 82881): New management in data exporting (see doc DOC.08.0467.1.FCR - MR - (en) – Export to Other interchange tracks.doc);
- Host (olt 9069): Addition of differentiated synchronization file management in data exchange with host (see doc DOC.10.0264.0.AO-(en) - Stores2 - 1.24.2 – Connections – Differentiated synchronization file management in data exchange with host.doc);

3.3.2 Corrections

- Master data (prb 83005): Correction of value resetting in kit master data;
- Generic (prb 82419): Correction of a memory problem not released by S2_Display module.
- Generic (prb 82716): Addition of corrections to the TPanCtl2.dll, S2_ValoriTestata.dll and S2_RepartiVendita.dll modules to avoid the "out of memory" problem;
- Tax Free (prb 81943): Correction of receipt number retrieval in the tax free printing phase;
- Sales (prb 82842): Correction of VAT rate check during the kit product phase;

- Sales (prb 82301): Addition of traces in the clerk and cashier selection phase via barcodes in sales;
- Sales (prb 82513): Correction of return with promotion management with RCH cash registers;
- Sales (prb 82581): Correction of the net price calculation during the phase of price type change via barcode reading;
- Sales (prb 81476): Correction of customer parameter saving in sales;
- Sales (prb 81159): Correction of a record cancellation procedure in the MovimentiBuoniMerce table;
- Sales (prb 81333): Correction of a problem in receipt cancellation with the splitting procedure;
- Sales (prb 83322): Correction of a problem with the ELA 242 drivers where the no communication with cash register message did not appear;
- Sales (prb 82920): Correction of an error which could result in failure to print receipts if the receipt closing operations were too fast;
- Warehouses (prb 82439): Correction of stock updating in the reopening and document saving phase;
- Warehouses (prb 81253): Correction of adjustment cancellation if a document previously saved as suspended, was confirmed without modifications;
- Warehouses (prb 82285): Addition of traces in the document closing phase without saving;
- Warehouses (prb 82680): Correction of the order association in adjustments in the event of movements with more than one order with the same product;
- Connections (prb 82531): Correction of reacquisition of suspended transfers;

- Connections (prb 82839): Correction of product recoding during acquisition in access;
- Connections (prb 82825): Correction of multiple start-up of S2_Exchange;
- Connections (prb 81604): Improvement of S2_Exchange traces writing;
- Connections (prb 82528): Modification of the S2_Exchange tool to correctly retrieve the command to execute in order to start automatic activations with events to perform after connection;

3.4 Fix 1.24.3 release on 27/04/2010

This update brings the database level to version 2447.

3.4.1 Addition of new functionalities

- General (olt 8766): Addition of an implementation, enabled by default, which informs the user of a workstation where it is not possible to perform connections because connections are already being performed by a master workstation (see DOC.10.0321.0.MM-(en) - Stores2 - 1.24.2 - General - Addition of message for overlapping connections.doc);
- General (olt 9104): Addition of the possibility of being able to define variable data structures and to update geographic node data via batch (text file) DOC.10.0326.0.MM-(en) - Stores2 - 1.24.2 - General - Creation of variable structures.doc);
- Price lists (olt 8663): Improvements have been added to improve browsing and selection of product parameters in the inventory and quick price list creation phase (see DOC.10.0273.0.MM-(en) - Stores2 - 1.24.3 - General - Multiselection on quick price lists and inventories.doc);
- Stock (olt 9150): The possibility has been added to be able to send host only changed stock record or those added from the last extraction (see DOC.10.0318.0.MM-(en) - Stores2 - 1.24.3 - Host - Exporting only modified stock to host.doc);
- Sales (olt 9128): Addition of customizable fields on Portuguese receipts (see DOC.10.0293.0.MM-(en) - Stores2 - 1.24.3 - Sales - Addition of custom fields on Portuguese receipts.doc);

- Sales (olt 9103): The possibility has been added during the receipt closing phase of displaying just one generic "Credit card" key in the payment type selection phase, but to continue to assign the payment to the correct credit card (see DOC.10.0311.0.MM-(en) - Stores2 - 1.24.3 - Sales – Generic credit card management.doc);
- Sales (prb 82995): Modification to the layout of receipts for Epson FP81/90 cash registers. It is possible to manage a blank row one sales line and the next by enabling the string "EmptyRow=1" in the file S2_CR_Epson_FP90.ini, in the section [SET];
- Warehouses (olt 8994): In the confirmation phase for a document approved by the head office, the control on the "Suspended" flag has been change to force the user to edit its value. The program previously did this automatically without asking the user anything. The change has been made as default and no additional configuration will be necessary;
- Inventories (olt 9237): Modification of an inventory closing block logic if document approval from head office is enabled (see DOC.10.0327.0.MM-(en) - Stores2 - 1.24.3 – Inventories – Modifications to the inventory closing control in the presence of documents with head office approval.doc);

3.4.2 Improvements

- Master data (prb 83385): Addition of suspended flag management present in the ProdottiPrezzi table to the grid in the Prices tab on the product master data form;
- Quick price lists (olt 9413): Improvement to rounding management in the quick price list creation phase (see doc DOC.10.0124.0.AO-(en) - Stores2 - 1.24.0 - Sales – Discount table management.doc chapter 2.1.1.4);
- Sales (prb 84117): Removal of the scrollbar in product list and customer list;
- Invoices (olt 8874): Exclusion of lines related to non-fiscal departments from invoice printing and management;
- Warehouses (prb 83558): Standardization of DataOraConferma updating for MovimentiSospesi in the event of automatic movement confirmation;
- Inventories (prb 83560): Addition of a display warning message for products not belonging to the inventory object;

3.4.3 Corrections

- General (prb 83376 and 83928): Correction of repositioning of maximized and minimized stores2 windows;
- General (prb 84087): Correction of DB migration from Access to SQL Server;
- General (prb 83172): Addition of corrections to the S2_TextBox.ocx module to avoid the "out of memory" problem;
- General (prb 83742): Correction of a general Stores2 form resizing problem;
- Master data (prb 82698): Correction of decimal and alternative decimals on foreign currency in the sales price creation phase from the product master data;
- Master data (prb 83327): Correction of opening of fidelity master data in the presence of more than 32000 product parameter codes;
- Master data (prb 84018): Correction of geographic node statistic parameter scrolling during display;
- Master data (prb 84273): Correction of head office's change to fidelity conditions linked to employees;
- Master data (prb 83470): Correction of a page up and page down problem in the creation phase for a size scale master data;
- Price lists (prb 83448): Correction of price list importing from excel with more than 32000 records;
- Price lists (prb 83481): Correction of the management of ClasseNodoPrezzo for "Public" TipoPrezzo in quick price lists and product master data;
- Price lists (prb 83007): Correction of the creation of automatic price list rules to always have rounding data;

- S2_ExportHeaderCheck (prb 83561): Correction of an incorrect message during the warning phase for stock inconsistencies;
- Statistics (prb 84537): Correction of an error in processing of statistics which refer to the movement log;
- Statistics (prb 82853): Correction of statistics management to show the correct receipt number;
- Sales (prb 82781): Correction of promotion management in the presence of discounts due to an employee card;
- Sales (prb 84160): Correction of change display on Epson displays;
- Sales (prb 83062): Correction of retransmission of records used in fidelity management by parameter;
- Sales (prb 83213): When using cut and paste it was possible to indicate negative values in both the price and net price fields. This operation has now been blocked.
- Sales (prb 81951): Correction of a problem of no receipt issue with RCH Swing cash registers;
- Sales (prb 83351): Correction of a problem of no receipt printing with RCH Nucleo cash registers;
- Sales (prb 83842): Correction of a problem of no receipt issue with RCH Globe cash registers;
- Sales (prb 83958, 84137, 84193): Correction of problems of no receipt issue with Epson FP81/90 cash registers;
- Sales (prb 83707): Correction of the correct currency symbol display in the "Payment details" section during the cash register closing phase;

- Sales (prb 84062): Disabling of the 'Allow negative receipt' checkbox in the master data of all cash registers. Enabling of the credit note printing for serial version DataProcess 270M and 270GE cash registers;
- Sales (prb 84504): Correction of change management with credit/debit card payments on Epson FP81/90 and Olivetti cash registers which use ELA drivers;
- Warehouses (prb 82828): Correction of adjustment management of Greek taxation, in detail now the fiscal adjustment references are also assigned to the original document. In addition an adjusted transfer document will no longer be transmitted to the stores;
- Warehouses (prb 83149): Correction of the confirmed document retrieval functions (automatic=3) in the presence of a 'rejected' adjustment;
- Warehouses (prb 83341): Correction of confirmation of movements which generated adjustments by adding a product not present in the original document;
- Warehouses (prb 83469): Elimination of the possibility to confirm documents cancelled from the list;
- Warehouses (prb 83495): Correction of the exclusion of guided returns for products entered in cancelled receipts;
- Warehouses (prb 83573): Correction of olt 9029 to make it possible to constrain the user to enter the document date equal to today if the specific flag is present in the operator class;
- Warehouses (prb 83588): Correction of deletion of lines at zero in the saving phase of a new node document;
- Warehouses (prb 84047): Correction of reference saving in guided return management in the event that the host deletes the references.
- Warehouses (prb 83368): Correction of a problem of incorrect date management during the confirmation phase for transfers between stores;

- Warehouses (prb 83977): Correction of an error in the warehouse movement deletion phase where an invoice was printed;
- Warehouses (prb 84568): Correction of a problem that could cause significant slowdowns during the warehouse document confirmation phase;
- Orders (prb 83420): Correction of the button display;
- Connections (prb 83347): Correction of the mutex downloading in the external module acquisition phase;
- Connections (prb 83463): Correction of data interchange with host to eliminate orders rejected because not edited from the interchange database;
- Connections (prb 84020): Correction of pc being turned off in the manage connection phase if an update is present;
- Connections (prb 82204): Correction of an incorrect fidelity movement distribution problem;
- Connections (prb 83479): Correction of a packet acquisition problem where tables were missing;
- Connections (prb 83912): Correction of a packet sorting error with fidelity movements to non-automated nodes;

3.5 Fix 1.24.4 release on 21/05/2010

This update brings the database level to version 2470.

3.5.1 Addition of new functionalities

- General (olt 9386): Addition of the selection of single table to retransmit using the data retransmission tool;

- Price lists (olt 9055): Addition of improvements to the Stores2 price list table management (see DOC.10.0334.0.MM-(en) - Stores2 - 1.24.4 - Price lists - Improvements to price list table management.doc);
- Statistics (olt 9168): Addition of a support to use of the 'Chart Director' module for the creation of graphics in statistics, by installation of the new external module 'S2_UC22' (see DOC.10.0335.0.MM-(en) - Stores2 - 1.24.4 - General - Creation of external UC22 module.doc);
- Customers (olt 8986): Introduction of a series of modifications and functions related to customer management (see DOC.10.0350.0.MM-(en) - Stores2 - 1.24.4 - Customers - Changes to customer management.doc);
- Products (olt 9310): Addition of automatic generation management for INDICOD barcodes for products (see doc DOC.10.0341.0.AO-(en) - Stores2 - 1.24.4 - Products - INDICOD barcode generation.doc);
- Calendars (olt 9521): Improvement to calendar problem control (see doc DOC.10.0344.0.AO-(en) - Stores2 - 1.24.4 - Calendars - Modification to calendar management sales control.doc);
- Sales (olt 9271): Addition of the possibility to be able to print Gift Receipts' on RCH Globe cash registers (see DOC.10.0392.0.MM-(en) - Stores2 - 1.24.4 - Sales - Gift receipt printing on RCH Globe.doc);
- Sales (olt 8995): Introduction of a date and time synchronization function between the PC and cash register, for Epson FP81/90 and Dataprocess serial version cash registers (see DOC.10.0391.0.MM-(en) - Stores2 - 1.24.4 - Sales - Date and time synchronization between pc and cash register.doc);
- Sales (olt 9320): Addition of the possibility to be able to automatically retrieve the total payments recorded by Epson FP81/90 cash registers and to assign a value to the Z-Report field in the deposit creation phase (see DOC.10.0389.0.MM -(en) - Stores2 - 1.24.4 - Sales - Automatic payment retrieval with Epson FP81.doc);
- Sales (olt 9306): Implementation of the possibility of adding the information of the clerk who made the sale on the copy of the customer receipt with Russian SP101FR cash register (see DOC.10.0361.0.MM-(en) - Stores2 - 1.24.4 - Sales - Printing clerk code on receipts issued with SP101FR cash registers.doc);

- Sales (olt 9100): Addition of the possibility of producing KO-1 and KO-2 documents for Russian stores (see DOC.10.0380.0.MM-(en) - Stores2 - 1.24.4 - Sales - KO1 and KO2 forms for Russia.doc);
- Sales (olt 9101): Addition of the possibility of filling in the deposit slip with indication of the bills and coins composing the deposit (see DOC.10.0377.0.MM-(en) - Stores2 - 1.24.4 - Sales – Improvement to deposit slip printing.doc);
- Sales (olt 8038): Addition of the possibility of being able to configure a specific receipt format for return receipts (see DOC.10.0381.0.MM-(en) - Stores2 - 1.24.4 - Sales – Return receipt format.doc);
- Sales (olt 9436): Addition of an improvement to management situations where a request is made to create a deposit after opening the cash drawer when not movements have been executed (see DOC.10.0385.0.MM-(en) - Stores2 - 1.24.4 - Sales – Improvement to cash drawer opening controls.doc);
- Sales (prb 84424): Addition of the gift receipt printing function from the sales list and receipt management for Epson FP81/90, Epson generic and serial version DataProcess cash registers
- Sales (prb 84424): Addition of keyboard locking in receipt management for Epson FP81/90 cash registers;
- Deposits (olt 9318): Modification to deposit management (see doc DOC.10.0345.0.AO-(en) - Stores2 - 1.24.4 - Deposits – Modifications to deposits.doc);
- Warehouses (olt 9451): Addition of automatic document line compacting during saving (see doc DOC.10.0339.0.AO-(en) - Stores2 - 1.24.4 - Warehouses – Automatic line compacting.doc);
- Warehouses (olt 9406): Addition of variable management in portable scanner formats (see doc DOC.10.0277.0.AO-(en) - Stores2 - 1.24.4 - Warehouses – Variable management in portable scanner formats.doc);
- Warehouses (olt 9106): As of the version 1.24.4 the status of documents which require approval, both if created with standard procedure or created on-line, will be displayed with “Stand-by” description (see doc DOC.10.0338.0.AO-(en) - Stores2 - 1.24.4 - Warehouses – Display of host approval status in warehouse movement list.doc);

- Warehouses (olt 8326): Modification to the creation of lines with prices by size to enter only lines read in the barcode reading phase (see doc DOC.10.0342.0.AO-(en) - Stores2 - 1.24.4 - Warehouses- Supplier orders – Elimination of lines without quantity in barcode reading.doc);
- Supplier orders (olt 9337): Management of automatic product addition in order proposals (see doc DOC.10.0343.0.AO-(en) - Stores2 - 1.24.4 – Supplier orders – Automatic product addition in the order proposal.doc);
- Inventories (olt 9148): Modification to inventory management by sales account (see doc DOC.10.0340.0.AO-(en) - Stores2 - 1.24.4 - Inventories – Inventory management by sales account.doc);
- Connections (olt 9390): Addition of a management to align stock by node (see doc DOC.10.0346.0.AO-(en) - Stores2 - 1.24.4 - Connections – Enabling stock alignment by node.doc);
- Host (olt 9199): Addition of customer order exporting by host (see doc DOC.10.0347.0.AO-(en) - Stores2 - 1.24.4 - Connections – Customer order extraction to host.doc);
- Host (olt 9355): Addition of script management before and after importing (see doc DOC.10.0348.0.AO-(en) - Stores2 - 1.24.4 - Connections – Script execution before and after data acquisition from host.doc);
- Host (olt 9070): Addition of optimization to order importing from host in order to speed up importing of many orders (see DOC.10.0354.0.MM-(en) - Stores2 - 1.24.4 - Connections – Improvements to order acquisition from host.doc);

3.5.2 Improvements

- Master data (prb 84514): Departments, field enabling and disabling; enabling or disabling a field on the department screen, fields are enabled or disabled compatible with the executed configuration;
- Master data (prb 84349): Modification of "FidelityCondizioni" table sorting. The modification involves the sorting of the 'FidelityCondizioni' table along with the 'Clienti' table if the 'Clienti' table is sorted to 'Fidelity'. Otherwise the 'FidelityCondizioni' table is transmitted with the 'Fidelity' table;

- Connections (prb 79895): Improvement of the readability of the connection log in the update acquisition phase;
- Exporting to host (prb 85080): Value assignment to the S2_ProgressivoElaborazione field in the Stock file in exporting to host (value is assigned to field only on dbExchange and not on the file);

3.5.3 Corrections

- General (prb 84130): Correction of the management of several Stores2 forms at the same time;
- General (prb 85113): Correction of an error connected to the setting of 'prefix' character for the optical pen on the workstation;
- General (prb 83774): Addition on controls on the minimum database level for Stores2;
- General (prb 86214): Correction of an error in the database reconstruction phase;
- General (prb 83237): Correction of the date update function of records for SQL Server database, the getUTCDate() function must be used taking the database date and not that of the operating system where Stores2 is executed;
- General (prb 85835): Correction of the length of the 'DescrizioneVariante' field (it has been increased to 50 characters) on the AppoggioCartellini table;
- Master data (prb 83559): Correction of the automatic activations configuration, the program allowed making unmanaged configurations;
- Master data (prb 83795): Correction of discount reason management with barcodes;
- Master data (prb 81814): Correction of price importing by other stores, prices in unmanaged currency eliminated from the price table;
- Operators (prb 84011): Correction of the display and use of utilities and buttons set in orders to suppliers;

- Users (prb 85854): Correction of correct password use management by entering in the property of a deposit, if there are associated user and cashiers.
- Statistics (prb 84867): Correction of an error on the S2_StatElaborazione module;
- Reports and printouts (prb 85383): The SubReportSQL vector now contains the correct table name;
- Price lists (prb 85760): Modification of S2_Host00 to set the decimal number on the S2_ProdottiPrezzi table after having input the prices generated by automatic price lists;
- Price lists by node (prb 86075): Addition of the RicevutoDaHost flag setting to 'false' when price lists by node are created;
- Price lists (prb 84653): Correction of the link between the 'Splitting' and 'New price list calculation formulas' tabs in the quick price list creation phase;
- Price lists (prb 85242, 85786, 86188): Correction of 'UltimoUtente', 'DataOraCreazione' and 'DataOraUltimaVariazione' field saving for the 'ProdottiPrezzi' table for products added manually to a quick price list;
- Sales (prb 84174): Correction of tax free printing if there is a product at 0 price in the receipt;
- Sales (prb 84623): Epson FP81/90, addition of the paper finished or door open control before receipt printing, the sale will not be registered in Stores2;
- Sales (prb 84655): Correction of prefix management of a suspended receipt, with Greek taxation;
- Sales (prb 85181): Addition of corrections to fix the OutofMemory error when a key is pressed on the order selection screen and reinforcement of the control of the status of the Epson cash register for the problem of failure to issue receipts with Epson FP81/90 cash registers;
- Sales (prb 85476): Correction of a duplicate key error when a suspended receipt was closed which entailed splitting;

- Sales (prb 84010): Correction of return management with fidelities by product parameter;
- Sales (prb 84428): Correction of variant description saving in fidelitymovimenti. Now it is cut off at the thirtieth character;
- Sales (prb 85592): Correction of "Repeatable" and "Same product" flag management on 3x2 promotions;
- Sales (prb 85119): Correction of total updating only for sales transmitted in sales list;
- Warehouses (prb 85034): Modification to the confirmed adjustment management with qty=0. In revising an adjustment (automatic = 7) and by setting all the qty to 0, during the adjustment closing phase it will be deleted and all references to the adjustment on the original document will be cleared. Instead, references to the original document will remain on the adjustment to make it possible to reconstruct what was done;
- Warehouses (prb 85563): Correction of an error during the cancellation phase of a transmitted warehouse document;
- Warehouses (prb 85082): Execution of a change so if a document is 'Rejected' for Greek stores, DataOraTrasmissioneAdHost is assigned a value with a dummy date so that the document is not sent to the host;
- Warehouses (prb 85464): Correction of a problem in the creation of a sales account transfer; a block has been added to block the selection of nodes without sales account warehouse;
- Warehouses (prb 84180): Correction of the message which appeared by trying to eliminate an adjustment to an incoming transfer;
- Movements (prb 84912, 85042): Correction of the elimination of warehouse adjustments;
- Warehouses (prb 85968): Correction of cost reconstruction management if an alternative price list is specified;

- Warehouses (prb 85697, 85818): Correction of stock updating in the cancellation phase of an internal transfer registered to a non-automated node;
- Supplier orders (prb 85776): Correction of the management for displaying 'custom' fields if display of just one product parameter is enabled;
- Supplier orders (prb 85652): Correction of "RigheQta" saving in suspended orders with lines at zero;
- Inventories (prb 84261): Correction of inventory adjustment document acquisition at head office, when the head office is set as inventory control node and warehouse management node on the store;
- Inventories (prb 85620): Correction of the control of documents to approve in the inventory closing phase;
- Inventories (prb 85290): Correction of rejected inventory reopening;
- Connections (prb 85079): Data reception from head office, change to overwrite the confirmed movement, in the event that the reception of the suspended document is with 'approval rejected' status including with automatic connection (or 'unsupervised');
- Connections (prb 85486): Correction of transfer importing before the last inventory, in order not to display the document change date message if the document really does not need to be generated;
- Connections (prb 85602): Correction of an error in importing data from the Retail Group if there are incorrect records in the file received from the Retail Group;
- Connections (prb 85210): Correction of a problem whereby the Stores2CE service failed to restart after acquisition of an update;
- Connections (prb 84946): Correction of the language file and uc file if already present on the node;
- Connections (prb 85345): Modification of the logic for parallel node stock extraction so that only stock changed in the 7 days before the last data extraction is extracted (the

DataOraTrasmissione of the NodiTabelleTrasmissione table for the Giacenze -7 table for the interested nodes must be Less than or equal to DataUltimoAggiornamento of the Giacenze table);

- Stock acquisition from host (prb 85765): If the size received is not a size coded in Stores2, the record will not be acquired;
- Barcode acquisition from host (prb 85834): Deleted barcodes are excluded from the duplicate barcode control;

3.6 Fix 1.24.5 release on 03/06/2010

This update brings the database level to version 2473.

3.6.1 Addition of new functionalities

- Sales (olt 9234): Addition of the "Do not display in receipt management" flag on promotion general data, if enabled the promotion recap screen will not be displayed;
- Sales (olt 9602): Implementation of fidelity point printing on Sweda MikroPOS Ej cash register;

3.6.2 Improvements

- Sales (prb 86262): Improvement of the editing phase management for a receipt. The cancelled clerks are now loaded in the combo, but only if they are already present on the receipt;
- Sales (prb 86660): Optimization of receipt format management for Portuguese stores, so that if the owner is not specified in the sale because the receipt is not associated to any owner and if the 'Intest. Intestatarario' field is set as 'mandatory', the word 'Customer' will always be printed;
- Sales (prb 85562): Optimization of department management. Optimization of department selection using a barcode;

3.6.3 Corrections

- ADO log (prb 86103): Addition of millisecond management;

- CheckDB (prb 86387): Correction of level 2470 on sql 2000;
- Online managements (prb 86400): Correction of the disconnection from Internet in the event of non-permanent connection. If the connection has been made manually, during the closing or connection phase Stores2 does not close it;
- Customers (prb 86568): Repair of errors on customer management. If the zip code and address are blank and the country and city are specified, the program generated an error and the focus remained in the address cell;
- Statistics (prb 85806): Modification to 'Warehouse documents' source, correction of the length of the 'IntestatarioLocalita' field which was too short in some cases;
- Statistics (prb 86456): Modification made to the Order Log Source to be able to select the variant parameters;
- Sales (prb 86353): Correction of malfunctioning on the change amount control on the currency;
- Sales (prb 86036, 86634): Correction of promotion management with discount in goods. The quantity on the line is correctly managed;
- Sales (prb 86244): Correction of a problem in registering a return using the receipt barcode: if the node is forced to indicate a receipt reason the program showed the product detail but when the PrezzoNetto field of MovimentiRigheQta was confirmed its value was assigned with zero;
- Sales (prb 85884): Correction of problems which occurred in customer selection. By deleting or editing a fidelity customer the program blocked the operation in the presence of discount vouchers, now all the information related to the customer is protected. When replacing a fidelity customer (where only the card is present and not the customer's master data) with a non-fidelity customer the program now runs all the necessary controls;
- Inventories (prb 86788): Correction of value saving of the first form for inventory items (for example the exclusion of a product line) in the new inventory setting phase;

- Connections (prb 86844): Correction of an error in the data extraction phase on the FidelityMovimenti table, in the presence of a parameter code, associated to the fidelity sorting parameter type, and not used by any node;

3.7 Fix 1.24.6 release on 07/07/2010

This update brings the database level to version 2474.

3.7.1 Improvements

- Customer master data (prb 87162): Optimizations of the fidelity creation procedure on the customer form;
- Quick price lists (87109): Modification of the 'price node class' filter on the reference price list; addition of an option on the classenodoprezzo filter on the reference price list screen, on the quick price list creation form, to display price lists with no value assigned to classenodoprezzo (possibility already present in the nodoprezzo filter);
- Sales (prb 87821): Improvement of the automatic date updating after midnight in receipt management;
- Inventories (prb 87440): Modification of the Form and TabControl dimensions containing the ParametriProdotti (inventory object) so that it is possible to manage a greater number of them (following the modifications for OLT 8663 - 'Multiselection on quick price lists and inventories' where the ParametriProdottoTipi selection procedure for the inventory object was changed).

3.7.2 Corrections

- Master data (prb 87996, 88714): Correction of the creation of automatic activations with events;
- Other (prb 87791): Correction of apostrophe replace in the product code when it is used in the cReperisciListino function query;
- Other (prb 87333): Correction of supplier order data reconstruction in the db reconstruction phase;

- Customers (prb 87701): Enlargement of the fields for customer type to manage long translations as well;
- Stock (prb 87614): Forced ordering of the stock log list;
- Sales (prb 87141): Modification to the program to be able to manage a promotion which gives a total like €10 and proportionally divides the value on the lines by managing the cent is between the two;
- Warehouses (prb 88619): Correction of date assignment in document confirmation without adjustments with the "sets day's date only for adjustments" option;
- Customer orders (prb 88446): Correction of the collection display during the customer order reopening phase;
- Inventories (prb 87307): Correction of the scroll bar use in inventory parameters;
- Connections (prb 87787): Correction of "TabellaSconti" table acquisition from host;
- Connections (prb 88435): Correction of fidelity data exporting in the event of 'fidelity' sorting;
- Host (prb 86327): Modification of the S2_Host00 in order not to consider as incorrect the collection records produced with a blank variant;
- Host (prb 87009): Modification of S2_Host00 to set cancelled on the customer parameter file in the event of extraction of a cancelled customer;
- Exporting to third parties (prb 87068): Modification of the executable S2_ExportToOther to move the extraction date retrieval to after opening of the database;
- Connections (prb 81264): correction of a problem in configuring a continuous automatic activation;
- Sales (prb 87582): correction of a problem which could occur rarely during the receipt closing phase, due to operations performed very quickly;

- Statistics (prb 87623): correction of a problem in the 'Competition' source where the 'sequential' was not filtered in the printing phase;
- Host (prb 87635 and 88027): correction of an error in rapportiko extraction phase (Russian taxes);
