Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This document contains all the modifications made to Stores2 from the 1.25.0 version.

2 Useful Information

N.B.:

The fixes include all previous fixes starting from the Service Pack (i.e. the fix 1.25.3 will include all the fixes released starting from Service Pack 1.25.0).

2.1 External Modules

IMPORTANT: the following external modules must also be released with sp 1.25.0:

- S2_UC00.exe
- S2_UC02.exe
- S2_UC06.exe
- S2_UC15.exe replaces S2_UC13.exe
- S2_UC14.exe
- S2_UC16.exe (if you want to perform the archiving function on access databases)
- S2_UC18.exe (solves a problem related to the calendar, and it is necessary to install it at customers who use Epson cash registers)

so check which ones are already present in the installation and release the remaining ones.

The setup of this version already contains all these components (excluding S2_UC16.exe and S2_UC18.exe).

2.2 Host data interchange tracks

Make sure that the host data interchange tracks are always updated to the version in question (see document DOC.06.0145).

2.3 Changes to Stores2 database

If you need to make changes to the Stores2 database (add indexes, views, etc.) you need to follow the rules described in the document "MCR.09.0208.0.ADE-(en) - Customer changes to database.doc". Ask the Fortech technical department for the document.

3 List of modifications

3.1 Service Pack 1.25.0 release on 30/06/2010

This update brings the database level to version 2577.

3.1.1 Addition of new functionalities

- General (olt 9375): The possibility has been added of saving generic Stores2 use traces and warehouse document deletion traces in the 'LOG.TXT' log file (see DOC.10.0447.0.MM-(en) - Stores2 - 1.25.0 - General - Addition of generic and document deletion traces.doc);
- General (olt 9549): The fill factor default value assigned by Stores2 during the index creation phase of a table has been changed (see DOC.10.0273.0.MM-(en) - Stores2 - 1.25.0 - General - Fill factor management on SQL Server indexes.doc);
- Master data (olt 9718): Modification of INDICOD barcode generation for products (see doc DOC.10.0341.1.AO-(en) - Stores2 -1.25.0 - Products - INDICOD barcode generation.doc);
- Price lists (olt 9520): During the price importing from host phase for prices on price lists suspended in Stores2 it was not possible to have suspended and unsuspended prices. Starting from Stores2 Service Pack 1.25 this situation is managed (see DOC.10.0456.0.MM-(en) - Stores2 - 1.25.0 - Price lists - Improvement to suspended flag management.doc);
- Price lists (olt 8308): NodoListino Management (see doc DOC.10.0422.0.AO-(en) - Stores2 - 1.25.0 - Price lists - Local price list management.doc);
- Statistics (olt 9225): Addition of language printing management (see doc DOC.10.0414.0.AO-(en) - Stores2 -1.25.0 - Statistics - Language selection.doc);
- Hours (olt 9482): Addition of nuit blanche management (see doc DOC.10.0424.0.AO-(en) - Stores2 -1.25.0 - Hours - Nuit Blanche management.doc);

- Tyco traffic counter (olt 9075): The possibility has been added to be able to indicate which traffic counter records should contribute to the count of people in deposits and which should not, and to be able to automatically import traffic counter data during the day, scheduling the frequency of this operation (see DOC.10.0449.0.MM-(en) - Stores2 - 1.25.0 – Traffic counter – Changes to Tyco traffic counter management.doc);
- Greek taxes (olt 9194): An algorithm has been added to validate the Greek VAT number (activated from Master data -> General Parameters -> Countries);
- Sales (olt 9429): Addition of receipt search for customer (see doc DOC.09.0423.0.AO-(en) - Stores2 -1.25.0 - Sales – Receipt search for customer.doc);
- Sales (olt 9080, olt 9511, prb 87142, prb 87142 and prb 87562): Modifications to promotion management (see doc DOC.09.0412.2.AO-(en) - Stores2 -1.25.0 - Sales – Promotion management.doc);
- Sales (olt 9483): Addition of a gadget product exclusion filter from receipt list (see doc DOC.10.0130.1.AO-(en) - Stores2 -1.25.0 - Sales – Gadget management.doc);
- Sales (olt 9231): The possibility has been added of managing cash withdrawals to be sent to the safe by pneumatic tube (see DOC.10.0445.0.MM-(en) - Stores2 - 1.25.0 – Sales – managing cash in/out in sales.doc);
- Sales (olt 8906): The possibility has been added to create a fidelity campaign based on the management of “privilege” cards (see DOC.10.0472.0.MM-(en) - Stores2 - 1.25.0 – Sales – Privilege card management.doc);
- Sales (olt 9446): Addition of a key block function during the payment phase with Epson FP81/90 cash registers;
- Sales (olt 9163): Addition of on-line voucher management*;
- Warehouses (olt 9505): Addition of season control in end of season returns*;
- Warehouses (olt 9581): Addition of script management (ScriptBefore and ScriptAfter) in lists, for the movement form;
- Warehouses (olt 9120): The possibility has been added of being able to filter the warehouse document search based on the user of Stores2 who was used to create or edit the document (see DOC.10.0420.0.MM-(en) - Stores2 - 1.25.0 – Warehouses – Displaying users from document list.doc);

- Warehouses (olt 9121): The possibility has been added for confirming a transfer proposal in various steps (see DOC.10.0455.0.MM-(en) - Stores2 - 1.25.0 – Warehouses – Transfer confirmation in various steps.doc);
- Warehouses (olt 9123): The possibility has been added of displaying the supplier product code in the line grid of a warehouse document (see DOC.10.0442.0.MM-(en) - Stores2 - 1.25.0 - Products – Displaying supplier product code.doc);
- Supplier orders (olt 9563): During the order composition phase, the possibility has been added to be able to prevent loading of products not present in the head office warehouse, with control to be performed on product size (see DOC.10.0459.0.MM-(en) - Stores2 - 1.25.0 – Orders - Unavailable product reorder block.doc);
- Customer orders (olt 9533 and 9115): Modifications to customer orders (see doc DOC.10.0425.0.AO-(en) - Stores2 - 1.25.0 – Customer orders – Improvements to customer orders.doc);
- Connections (olt 9339): The possibility has been added to be able to use the connection module from various workstations at the same time (see DOC.10.0448.0.MM-(en) - Stores2 - 1.25.0 - Connections – Concurrent use of S2_Exchange.doc);
- Connections (olt 9618): Addition of operation configuration in database reorganization (see doc DOC.10.0421.0.AO-(en) - Stores2 - 1.25.0 - Connections – Reorganization operation configuration.doc);

3.1.2 Improvements

- Customer master data (prb 87315): Optimizations of the fidelity creation procedure on the customer form;
- Master data (prb 87324): Increase of shipping address length on general parameters to 50 characters;
- Quick price lists (87183): Modification of the 'price node class' filter on the reference price list; addition of an option on the classenodoprezzo filter on the reference price list screen, on the quick price list creation form, to display price lists with no value assigned to classenodoprezzo (possibility already present in the nodoprezzo filter);
- Sales (prb 87828): Improvement of the automatic date updating after midnight in receipt management;

- Sales (prb 85704): Improvements to the driver for Olivetti cash registers; modification to the courtesy phrase setting phase;
- Sales (prb 86104): Improvement to the product search functionality to speed up the product list loading phase;
- Sales (prb 87723): Execution of an optimization so that all the receipts are saved which are generated in one sale. This information is then also saved on the log;
- Sales (prb 87082): Receipt format for non-fiscal printers, modification for managing 'centered' alignment on the courtesy phrase;
- Warehouses (prb 87160): Addition of localization (English) to the price control function;
- Warehouses (prb 87089): Improvement to suspended movement list management; by mistake the suspended movement list was 'designed' based on the settings of the list of movements and not suspended movements;
- Connections (prb 86724): Modification of the program by adding the call to the stock reconstruction function in the event of unsupervised connection. If the 'unsupervised' flag is enabled the program sets the reorganization flag as indicated in general parameters for the automatic connection;
- Connections (prb 87632): Modification of acquisition from host of head office rejected returns. If the return is rejected and cancelled, the program will cancel the RifMov* fields;

3.1.3 Corrections

- Other (prb 87792): Correction of apostrophe replace in the product code when it is used in the cReperisciListino function query;
- Other (prb 87904): Correction of the 'Allow zero length' setting for TEXT fields during the database reconstruction phase;
- Other (prb 86243): Addition of scroll bar where necessary and missing ('script' form in general parameters and in statistics management) to display the entire text;

- Master data (prb 86750): Correction of a error in kit by size management in SQL Server environment; in SQL Server environment and with a database which manages sizes, by entering 'new' of a kit there was an error due to an incorrect SQL Server string;
- Master data (prb 87997): Customer orders considered in the data deletion function;
- Master data (prb 88239): Correction of supplier order data reconstruction in the db reconstruction phase;
- Master data (prb 88437): Correction of fidelity data exporting in the event of 'fidelity' sorting;
- Master data (prb 88507): Correction of kit master data saving;
- Quick price lists (prb 86205): Correction of a problem saving any prices at zero; the program also saved the records in the 'prodottiprezzi' table with prices at zero, if present in the grid;
- Statistics (prb 86355): Improvement of times of statistics with filters on nodes;
- Statistics (prb 87624): Correction of the 'competition' data source, the 'Sequential' was not filtered in the printing phase;
- Customers (prb 87700): Enlargement of the fields for customer type to manage long translations as well;
- Sales (prb 87907): Correction of the price retrieval if the price node class is not set;
- Sales (prb 85838): Correction of a problem with the scroll arrows in receipt return, if the receipt contains many sales lines;
- Sales (prb 87380): Correction of key block in the payment with discounts phase;
- Sales (prb 86787): Correction of a problem where logically cancelled returns were not later taken into consideration;

- Connections (prb 85677): Correction of the message sending function to the head office node in the event of unaligned stock on stores;

3.2 Fix 1.25.1 release on 20/07/2010

This update brings the database level to version 2579.

3.2.1 Addition of new functionalities

- Warehouses (OLT 9509): Addition of a control on the season for end of season returns, so that only the price type explicitly associated to the document type is taken into consideration;
- Connections (OLT 9621): Addition of an implementation to speed up the receipt data transmission flow from other stores to the head office (see DOC.10.0498.0.MM-(en) - Stores2 - 1.25.1 – Transmissions – Continuous receipt transmission.doc);

3.2.2 Improvements

- Sales (prb 88110): Optimizations to the gift card control timer management;
- Sales (prb 88336): Optimizations to voucher management;

3.2.3 Corrections

- Movements (prb 88666): Correction of date assignment when confirming document without adjustments;
- TaxFree (prb 88909): Correction of receipt number printing;
- General (prb 89063): Correction the default setting on the "ScriptOnConfirm" and "ScriptOnEntry" fields of the list table;
- Operators (prb 89427): Correction of the operator display;
- Price lists (prb 89500): Correction of price exportation for price node class;

- Sales (prb 89863): Correction of promotion management combined with heading fidelities;
- Supplier orders (prb 89590): Correction of the control on the lock in the order saving phase;
- Customer orders (prb 89198): Correction of price selection. If the collection is not managed by default the sales price will be taken;
- Inventories (prb 89192): Correction of a problem in inventories with control from head office where warehouse adjustments were not transmitted to the head office;

3.3 Fix 1.25.2 release on 30/07/2010

This update brings the database level to version 2586.

3.3.1 Addition of new functionalities

- Sales (olt 9242): Addition of daily information management (see doc DOC.10.0514.0.MM-(en) - Stores2 -1.25.2 - Sales – Daily information management.doc);

3.3.2 Improvements

- Price lists (prb 88863): Improvement to management of the canceled state to take into account price lists with only some cancelled records (mixed state);
- Promotions (olt 9649 and prb 89435): Improvement of customer browsing in promotion master data and improved screen loading performance;
- Sales (prb 89855, 90003): Improvements to promotion management to make the messages clearer;
- Connections (prb 90087): Modification to database reorganization settings. By default, the reindex and reorganization are no longer enabled. They will need to be re-enabled manually. In addition the reorganization and reindex functions if set for automatic activations, will never be executed by the head office;

3.3.3 Corrections

- General (prb 90010): Correction of db upgrade with sql2000;
- General (prb 90082): Correction of an error which occurred by maximizing the ticket format menu and opening barcode management upon request;
- General (prb 90169): Correction of the dictionary use procedure for various functions related to geographic nodes;
- Utility (prb 90131): Correction of the S2_Access2SqlServer.exe tool;
- Stock (prb 89075): Correction of 'Magazzino' field emptying using the backspace key;
- Orders (prb 89452): Correction of an order entry problem with schedule;
- Operators (prb 89758): Correction of a problem in modifying employee hours by week;
- Price lists (prb 90245): Correction of the error by double clicking on the price list icon;
- Sales (prb 89076): Correction of sales stock memory cancellation after receipt closing;
- Sales (prb 89671): Correction of sales management so that even when pressing the shortcut from the keyboard it is not possible to change between sales and voucher return;
- Sales (prb 89938): Correction of gift card management so that it is not possible to use a card for an amount equal to zero;
- Sales (prb 90164): Correction of a problem in receipt management where the cashier selection window was not reactivated;
- Warehouses (prb 89077): Correction of warehouse number assignment management in the parcel confirmation phase if suspended internal transfers are present on Stores2;
- Warehouses (prb 88772): Correction of the deletion procedure for a warehouse if geographic nodes or general parameters are selected;

- Warehouses (prb 89074): Correction of an error in the warehouse document confirmation phase with generation of an adjustment;
- Warehouses (prb 89556): Correction of a problem in the rejected document approval phase, due to an error in the adjustment data retrieval phase;
- Warehouses (prb 89678): Correction of a problem in the confirmation phase of a document with reference to two different orders;
- Warehouses (prb 90118): Correction of an error in the schedule printing from movement list phase;
- Connections (prb 90458): Correction of supplier order importing from host to delete only the records with the Errato=0 flag;
- Connections (prb 90257): Correction of return exporting to host error in sales with Russian taxes;
- Connections (prb 90450): Correction of a problem involving failed acquisition of orders from host, due to a problem in managing incorrect orders;
- Connections (prb 89804): Correction of slow price extraction by adding an index to the ProdottiExport and ProdottiPrezziExport tables;

3.4 Fix 1.25.3 release on 19/08/2010

This update brings the database level to version 2587.

3.4.1 Corrections

- Other (prb 91475): Recompile of S2_ExportHeaders.exe for compatibility;
- Price lists (prb 91565): Correction of the "DataOraCreazione" value assignment for manually created price lists;
- Price lists (prb 90869): Correction of mixed state price list retrieval in quick price lists;

- Statistics (prb 91596): Correction of FirstDayOfWeek parameter management;
- Statistics (prb 90633): Correction of custom filter management in statistics;
- Sales (prb 91214): Correction of the promotion priority management in the event of sales with fidelity;
- Sales (prb 90366): Correction of the total summary calculation in receipt list in the event of customer search;
- Deposits (prb 84704): Correction of z report retrieval from the cash register in the event of more than one workstation;
- Movements (prb 91673, 91654): Correction of the deletion management for node warehouse documents;
- Movements (prb 90635): Correction of the warehouse field block on movements with motives that have a specific warehouse set;
- Supplier orders (prb 91378): Correction of the display of the expiration date in supplier orders;
- Supplier orders (prb 89116): Correction (blocked) of the confirmation from the suspended order list with quantity 0;
- Inventories (prb 90930): Correction of inventory closing;
- Connections (prb 90854): Correction of extraction to host of "MovimentiPagamenti" with amount = 0 and change (sales with currency different from node one);
- Connections (prb 90984): Correction of the delta exporting for modified stock in DbExchange_Output;
- Connections (prb 91176): Correction of exportation of collections to host.

- Connections (prb 91470): Correction of exportation to host of "StatoOrdine" field in "OrdiniFornitoriTestate" table;
- Connections (prb 91516): Correction of previous version deposit importing;

3.5 Fix 1.25.4 release on 09/09/2010

This update brings the database level to version 2594.

3.5.1 Addition of new functionalities

- Warehouses (OLT 9834): addition of the possibility to block modifications to costs in warehouse movements (see DOC.10.0577.0.MM-(en) - Stores2 - 1.25.4 - Warehouses - Price modification block.doc);
- General (OLT 9865): addition of the 'inspection management' function (see DOC.10.0578.0.MM-(en) - Stores2 - 1.25.4 - Operators - Inspection management.doc);
- Sales (OLT 9726): addition of the possibility to retransmit sales modified by the head office to stores (the value of the "NodoModifica" field is simply modified by setting it to '000', this way by using the 'Retransmit' tool the modified receipt will reach other stores as well).

3.5.2 Corrections

- Orders (prb 86191): correction of a problem in the order retransmission phase;
- Sales (prb 90465): correction of a problem with the date and time synchronization function between the pc and cash register;
- Connections (prb 90996): correction of a problem in the creation and modification of automatic activations with events;
- Sales (prb 91553): correction of some procedures in fidelity voucher management;
- Statistics (prb 91873): modification of the datafield field type to alphanumeric;
- General (prb 91187): correction of a problem in the copy phase of a geographic node;

- Warehouses (prb 91902): correction of a problem present in the goods comparison function;
- Warehouses (prb 92270): correction of a date management error in the movement importing phase from text file;
- Sales (prb 92445): correction of the possibility of making negative sales with FM3000 fiscal module
- General (prb 92547): correction of the execution of 2581 upgrade level in sql 2000 environment;
- Connections (prb 92785): correction of a failed transmission of company employee fidelity conditions;
- Price lists (prb 92881): correction of a problem in the rounding rules application phase during the creation of a quick price list;
- Warehouses (prb 92905): correction of an error in the warehouse movement selection phase;
- Host (prb 92930): correction of a problem in stock extraction to host phase;
- Host (prb 93088): correction of a problem in movement extraction to host phase;

3.6 Fix 1.25.5 release on 23/09/2010

This update brings the database level to version 2598.

3.6.1 Addition of new functionalities

- Master data (olt 10099): Addition of modification authorization management for generic prices in the product form in order to follow the price list logic (see doc DOC.10.0422.0.AO-(en) - Stores2 - 1.25.0 – Price lists – Local price list management.doc). Now generic price entry in the product Price section will be controlled by the "Price maintenance" setting of geographic nodes;

- Sales (olt 5195): Addition of emergency management in sales (see doc DOC.09.0153.0.PS (en) - Stores2 - 1.25.5 - General – Uninterrupted operation in emergency mode.doc). This modification is a paid Stores2 integration, for more information contact Fortech customer service (servizioclienti@fortech.it);
- Sales (olt 9887): Interfacing of POSNET THERMAL fiscal printer for Polish taxes;
- Sales (olt 10063): Addition of fixed value coupon management on promotions, i.e. to create a voucher for X euro to use for a purchase of Y euro;

3.6.2 Corrections

- Price lists (prb 93262): Correction of the Precisione field to allow saving of the maximum value of 9;
- Price lists (prb 93501): Correction of price list generation for mixed state nodes;
- Generic (prb 93323): Correction of the code generation for S2_ShutDown.exe;
- Generic (prb 93446): Correction of target saving in annual mode;
- Generic (prb 93896): Correction of an error in kit master data opening;
- Generic (prb 94179): Correction of regional settings management on ado viewer log;
- Customers (prb 93629): Correction of a problem where customers whose fidelity conditions were changed were not retransmitted;
- Sales (prb 92105): Correction of the use of gift cards and promotions when return departments are present;
- Sales (prb 93612): Correction of receipt management to prevent suspending a receipt containing an envelope;
- Sales (prb 93581): Correction of an error in 'Fidelity online' management for sales with non-fidelity customers;

- Sales (prb 92740): A modification has been made to vip card management where it is not possible to cancel a receipt where a voucher or bonus has been generated.
- Deposits (prb 93505): Correction of KO report printing;
- Warehouses (prb 92292): Correction of updating management of the 'NumeroSalvataggio' field in the 'MovimentiRighe' table; Now it is updated any time warehouse movements are saved, thus even in the case of approval, rejection and modification;
- Warehouses (prb 93677): Correction of parcel barcode retrieval in warehouse documents taken as a modification;
- Supplier orders (prb 93476): Correction of confirmation of orders with lines with qty at 0;
- Customer orders (prb 93548): Correction of the error which occurred during price list retrieval in customer orders;

3.7 Fix 1.25.6 release on 30/09/2010

This update brings the database level to version 2603.

3.7.1 Addition of new functionalities

- Host (olt 9869): Modification of discount table importing logic. Now the Parametro0 and price list type are considered discriminants for canceling records;
- Sales (olt 10059): Modification of price calculation with discount table. Rounding is now only performed on elements processed by the discount table;
- Sales (OLT 10146): Addition of barcode printing management in graphic format for NCR Realprint EJ cash registers (see DOC.10.0598.0.MB – EAN graphic receipt barcode on NCR Realprint EJ.doc);

- Sales (OLT 10019): Addition of a modification to the quantity multiplier in receipt management: it is now possible to multiply by fractions, if the product so allows (see DOC.10.0597.0.MM-(en) - Stores2 - 1.25.6 - Sales – QTY multiplier management for fractions.doc);
- Warehouses (prb 94267): Addition of a function used to upload selected warehouse documents on an ftp, in the form of files from host, immediately after closing the document (see doc DOC.10.0430.0.AO-(en) - Stores2 - 1.25.6 - Warehouses – Immediate document transmission via ftp.doc);

3.7.2 Corrections

- General (prb 94192): Correction of the geographic node recoding procedure so that the tables related to Stores2CE are recoded;
- Users (prb 94010): Correction of an error where if there was a head office user with reference node when the operator was changed the users of the first user's reference node were displayed;
- Price lists (prb 94410): Correction of the price list verification function in the presence of price lists with mixed state;
- Fidelity (prb 93658): Correction of a problem in the summary list by node for the fidelity form, which considered all of the points for the card and not just the ones connected to the currently valid point total;
- Sales (prb 94300): Correction of a calculation problem during the euro/franc exchange phase in payments. In some cases the exchange left a cent "suspended";
- Sales (): Correction of the S2_CR_POSNET_Thermal.dll driver;
- Warehouses (prb 94287): Correction of an error which occurred by reconfirming warehouse documents already confirmed from the list;
- Warehouses (prb 94327): Correction of translations in Asian characters in guided return management;
- Warehouses (prb 94382): Addition of traces to wizard transfer management;

- Warehouses (prb 94456): Correction of the saving of order association to movement lines if directly set by the lines;
- Warehouses (prb 94592): Correction of the date change in warehouse movements. Before problems, such as losing the season field value, could occur;
- Warehouses (prb 94603): Correction of a problem in the parcel barcode generation phase due to incorrect management of the lock creation on the table;
- Statistics (prb 94639): Correction of online stock management in statistics. The problem occurred from statistics when all the stores whose stock is seen are dependents (and thus the call to on-line stock should not be made);
- Statistics (prb 93995): Correction of a problem in online stock management from statistics whereby if nodes were not selected the request was not sent to the head office;
- Statistics (prb 94242): Modification of the 'product' filter of the 'customer order' source. The field has been transformed into a filter used to select products;
- Customer orders (prb 94306): Correction of some problems in customer order management. Correction of a problem in saving a suspended order based on which the order state was set at "to confirm" instead of "being prepared". Fixing of an error in order confirmation and cancellation phase on a subconcentrator. Correction of a line addition problem on a suspended order;
- Inventories (prb 93699): Correction of problems which occurred by canceling data downloading from portable scanner;
- Host (prb 94256): Correction of the possibility of setting the products in transmission to host options in general parameters;
- Connections (prb 94250): Elimination of the modification which forced sending of stock of the last seven days during the stock alignment phase. Correction of stock extraction for the single selected node;

- Connections (prb 92069): Addition of traces to try and find any problem related to suspended document generation;

3.8 Fix 1.25.7 release on 21/10/2010

This update brings the database level to version 2616.

3.8.1 Addition of new functionalities

- Sales (olt 10236): Addition of improvements to promotion management to manage the multiple issue of vouchers (using the repeatable flag) in the event of promotion with set value threshold;
- Sales (olt 9856): Addition of the functionality to Stores2 for printing the fidelity customer code and total euro spent during the year by the customer, for cash registers which use the E00 (Epson generic) and ELA 242 drivers (see DOC.10.0626.0.MM-(en) - Stores2 - 1.25.7 - Sales – Barcode and total euro spent printing.doc);
- Sales (olt 10081): Addition of Instant win management;
- Orders (olt 10156): Addition of a modification which requires that in the closing phase of a confirmed order the quantities defined by SAP are reset only if the goods are not available and only if the order modification schema allows resetting quantities (see DOC.10.0618.0.MM-(en) - Stores2 - 1.25.7 - Orders – Modification to head office stock control in orders.doc);
- Connections (olt 9679): Addition of improvements to transmission monitoring management (see doc DOC.10.0431.0.AO-(en) - Stores2 - 1.25.7 - Connections – Improvements to transmission monitoring.doc);

3.8.2 Corrections

- General (prb 94502): Correction of message value assignment in the geographic node reconstruction phase;
- General (prb 95008 and 95912): Correction of the data control order in transmission and receiving directories when the program is started;

- General (prb 95088): Correction of the VerificaListini routine so that price lists for mixed state nodes are not cancelled;
- General (prb 95037): Correction of a problem with scrollbar operation related to warehouse motives in geographic nodes;
- General (prb 95754): Modification of the control for master workstation saving;
- Statistics (prb 95056): Correction of 'Season analysis' statistic processing;
- Statistics (prb 95232): Correction of a problem in product source, based on which the price was not converted for the currencies different than the currency of the node executing the statistic;
- Customers (prb 95596): Correction of a problem which significantly slowed down the customer entry procedure in master data;
- Promotions (prb 94629): Correction of the promotion copy;
- Inspections (prb 94628): Correction of some problems in inspection management;
- Sales (prb 94752, 95887): Correction of the promotion priority management;
- Sales (prb 95081): Correction of the hourglass management in cashier selection at receipt management start-up;
- Warehouses (prb 95200): Correction of confirmation via data download from ps for documents created with the wizard containing the same product on more than one line;
- Warehouses (prb 95867): Modification of data saving from work db to main db;
- Warehouses (prb 94741): Correction of grid loading for the qty split on various lines;
- Warehouses (prb 95142): Correction of incremental management of the 'NumeroSalvataggio' field in the 'MovimentiTestate' table;

- Inventories (prb 95717): Correction of an overflow error which could occur in the inventory closing phase;
- Messages (prb 95139): Correction of an error in the attachment saving phase of messages;
- Supplier orders (prb 94983): Correction of a problem for displaying the date of an order;
- Supplier orders (prb 95406): Correction of editing rules management for proposed orders;
- Connections (prb 95237): Correction of transmission monitoring management opening on sql 2000;
- Connections (prb 95457): Correction of end of transmission customer recoding execution, so that it is executed after the transmission;
- Connections (prb 95473): Correction of a packet acquisition problem where they were rejected because mistakenly considered as corrupt;
- Transfers (prb 94756): Correction of a problem in managing the 'Dataorachiusura' and 'Datascontrino' fields during the transfer importing phase;

3.9 Fix 1.25.8 release on 12/11/2010

This update brings the database level to version 2621.

3.9.1 Addition of new functionalities

- Sales (olt 10293): Adjustment to coupon management in value promotions to manage multiple voucher redemption;
- Inspections (olt 10127): Addition of data source for inspections;

3.9.2 Corrections

- Users (prb 96596): Correction of subset management;

- Stock (prb 97276): Addition of a control on the stock list on the presence of the warehouse set as main one;
- Customers (prb 95607): Correction of fidelity customer migration;
- Warehouses (prb 94663): Correction of "NumeroSalvataggio" field management during the document deletion phase;
- Warehouses (prb 95821, 96263, 96463, 96454): Correction of errors which could occur when working with warehouse documents;
- Warehouses (prb 97098): Correction of product grid loading after cancellation of a data downloading from portable scanner;
- Sales (prb 96353, 97454): Correction of management of max change/amounts in payments. Management of exchange rate;
- Sales (prb 97248): Correction of modification of receipts issued in the event of multiple payments;
- Sales (prb 96555): Modification of the screen to prevent cutting fields with 800x600 resolution;
- Supplier orders (prb 97075): Correction of importing from host and management of orders to correctly calculate the totals;
- Supplier orders (prb 96440): Correction of supplier order saving if the expiration date is used;
- Supplier orders (prb 96210): Correction of stock display in orders;
- Labels (prb 96071): Correction of a failed graphic barcode printing problem in label printing.
- Connections (prb 95677): Correction of an update procedure which could fail around midnight, since it was not possible to stop the Stores2CE service;

- Connections (prb 96014): Correction of a problem in creating transfers via automatic activations for documents with a date before that of the warehouse block;
- Connections (prb 97015): Correction of a document disalignment problem between the head office and stores due to an incorrect management of the saving number;
- Connections (prb 97065): Correction of a problem in the transfer adjustment acquisition phase where the date was postdated by one day compared to the date of the last inventory;
- Receipt formats (prb 97118): Correction of an error in the caption value assignment for code 60 fields for receipt formats;
- Warehouses (prb 95391): Correction of the display of the "Print" button on the data comparison screen in suspended movement management;
- Promotions (prb 96561): Correction of an incompatibility problem of the Instant Win promotion with other promotions;
- Promotions (prb 96656): Correction of an error during the Instant Win component initialization phase;
- Stamping (prb 92745 and 96002): Correction of an error whereby when entering receipt management the previously opened stamping mask appeared;
- Sales (prb 96653): Execution of a change to inhibit receipt barcode printing with cash registers using ELA driver in management mode;

3.10 Fix 1.25.9 release on 30/11/2010

This update brings the database level to version 2625.

3.10.1 Addition of new functionalities

- Customers (OLT 10418): modification to the customer import from excel file in order to manage importing of non-EAN13 customer barcodes (see doc.08.0477.3.ps (en) - stores2 - 1.25.9 - customers - importing customers and fidelity conditions from excel sheet.doc);

- Warehouses (prb 97916): addition of a series of traces and warnings on quantities not matching the warehouse document adjustments;
- General (OLT 10079): addition of support for Stores2 for Swedish taxation (see DOC.10.0575.1.MR - (en) – Sweden – Stores2 Certification.doc and MCR.10079.10.0596.0.MR – Modifications for Stores2 certification in Sweden.doc);

3.10.2 Improvements

- Inspections (olt 10288): Modification of the inspection management 'Incremento' field to manage a decimal;
- Connections (prb 97694): Improvement of customer recoding management (the function is not performed if there are no customers to recode);

3.10.3 Corrections

- Promotions (prb 97727): We have added an update level to correct the 'PromoProgressivo' field on the 'MovimentiRighe' table from Tinyint to Smallint (the problem was only present on a few stores migrated with a hybrid version of Stores2);
- Promotions (prb 98431): Correction of promotion master data management to maintain the line number on products and nodes;
- Inspections (prb 97926): Repair of Spanish translations in inspection management;
- Warehouses (prb 97686): correction of barcode printing upon request for products which are part of kits;
- Warehouses (prb 98000): correction of a problem which blocked Stores2 in the confirmation phase for a rejected warehouse DDT;
- Warehouses (prb 98138): correction of an error which occurred when working on an adjustment and pressing the delete button after opening the download data from portable scanner screen;
- Warehouses (prb 98495): correction of an adjustment generation problem due to incorrect management of product break down from different orders in document lines;

- Statistics (prb 98252): repair of the S2_FonteInventario module to get around any errors during the inventory statistics printing phase;
- Sales (prb 96489): correction of a problem which did not allow entering a second decimal in the 'cilindro' field of envelope master data;
- Sales (prb 96143): correction of a incorrect decimal number retrieval problem for the currency in promotions;
- Sales (prb 98561, 97980 and 98384): correction of the cash register closing procedure with devices using the 'Windows Generic' driver;
- Sales (prb 98285): Correction of the display of the product group number during the promotion calculation phase;
- Targets (prb 98299): Correction of target saving;
- Connections (prb 94901): correction of a problem which could cause double receipt transmitting;
- Connections (prb 98674): correction of a problem in data exporting from host phase, where dataoratrasmisioneadhost was not transmitted;
- Connections (prb 97931): Correction of the use of "Connect now" in the presence of incoming data;

3.11 Fix 1.25.10 release on 10/12/2010

This update brings the database level to version 2626.

3.11.1 Addition of new functionalities

- Other (olt 10041): Addition of inventory exporting in Pantheon program management;
- Sales (prb 99124): Addition of the possibility to manage the receipt format for Gift Card (for details see olt 10271 and the description of the work performed);

3.11.2 Corrections

- General (prb 98853): Correction of transmission to host setting saving in general parameters;
- Envelope management (prb 98842): Correction of decimal management;
- Discount table (prb 98997): Modification of acquisition management for the file S2_TABSC so that the Nodo/ClasseNodo/Parametro0/TipoListino group is not deleted ahead of time, which happened previously;
- Warehouses (prb 99139): Addition of traces in warehouse document closing management and improvement of quantity management in the data downloading from PS phase;
- Sales (prb 98812): Adjustment of promotion management to Greek taxation;
- Sales (prb 99296): Adjustment of the RCH Onda driver to manage the vista operating system. S2_CR_RCHonda.dll and registering the new Dll. Addition of the string UsaPathUtente=1 in the [SET] section of file S2_Cr_RCHonda.ini;
- Connections (prb 95483): Correction of "FidelityMovimenti" sorting in the event of a sale to a company employee;
- Connections (prb 98907): Addition of a block during movement importing from Host if the order reference is incomplete;

3.12 Fix 1.25.11 release on 17/01/2011

This update brings the database level to version 2626.

3.12.1 Improvements

- Warehouses (prb 100017): Addition of acoustic warning for incorrect barcode including in the barcode reading phase during keyboard emulation;
- Orders (prb 99729): Improvement of quantity control management in the order if there is data with Righe and RigheQta not aligned;

- Connections (olt 10204): Faster movement extraction to host;

3.12.2 Corrections

- Inventories (prb 95841): Correction of inventory area opening with double mouse click;
- General (prb 99576): Correction of minimum supply list search;
- Sales (prb 100098): Correction of fidelity calculation with discount scale to take into account sales made by other nodes;
- Connections (prb 100360): Correction of automatic incoming transfer confirmation;
