Oracle® Retail MICROS Stores2 Release Note, Release 1.26

Stores2

Release History ver. 1.26

Report developed by:
Fortech Italia srl

Q.A. Department

Version 1.05 of 26/01/2011

Table of contents

Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This document contains all the modifications made to Stores2 from the 1.26.0 version.

2 Useful Information

N.B.:

The fixes include all previous fixes starting from the Service Pack (i.e. the fix 1.26.3 will include all the fixes released starting from Service Pack 1.26.0).

2.1 External Modules

IMPORTANT: the following external modules must also be released with sp 1.26.0:

- S2_UC00.exe

- S2_UC02.exe

- S2_UC06.exe

- S2_UC15.exe replaces S2_UC13.exe

- S2_UC14.exe

- S2_UC16.exe (if you want to perform the archiving function on access databases)

- S2_UC18.exe (solves a problem related to the calendar, and it is necessary to install it at customers who use Epson cash registers)

so check which ones are already present in the installation and release the remaining ones.

The setup of this version already contains all these components (excluding S2_UC16.exe and S2_UC18.exe).

2.2 Host data interchange tracks

Make sure that the host data interchange tracks are always updated to the version in question (see document DOC.06.0145).

2.3 Changes to Stores2 database

If you need to make changes to the Stores2 database (add indexes, views, etc.) you need to follow the rules described in the document "MCR.09.0208.0.ADE-(en) - Customer changes to database.doc". Ask the Fortech technical department for the document.

3 List of modifications

3.1 Service Pack 1.26.0 release on 08/11/2010

This update brings the database level to version 2716.

3.1.1 Addition of new functionalities

- **General (olt 9912): Addition of a duplicate workstation code and shared local database check (see DOC.10.0432.0.AO-(en) - Stores2 - 1.26.0 – General – Stores2 start-up checks);**

- General (olt 9236): Addition of acoustic alarm management via the PC sound card (see DOC.10.0434.0.AO-(en) - Stores2 - 1.26.0 – Sales – Acoustic alarm through the PC sound card.doc);

- General (olt 9695): a conversion has been made on database fields from ntext to nvarchar(max) to remain aligned with the specifications of the new SQL versions;

- Customers (olt 9554): Addition of fiscal code validation (see DOC.10.0433.0.AO-(en) - Stores2 -1.26.0 - Customers – Fiscal code validation in customers.doc);

- Customers (olt 8688): a new implementation has been carried out able to analyze the Stores2 customer database, extract the problems related to duplicate customers and allow the operator to combine the data from various cards into just one, automatically canceling the cards no longer considered valid (see - DOC.10.0573.0.MM-(en) - Stores2 - 1.26.0 – Customers – Duplicate customer check.doc);

- Warehouses (olt 9973): introduction of an improvement to warehouse motive management. During the creation phase for a warehouse document, the operator's selection of the motive could be misleading; for this reason the possibility has been introduced of adding an additional description to the warehouse motive, as well as groups of motives (see DOC.10.0638.0.MM-(en) - Stores2 - 1.26.0 - Warehouses – Additional descriptions for warehouse motives.doc);

- Customer orders (olt 10035): addition of a series of functionalities to 'Customer orders' management. For all the details see the documents (see DOC.10.0646.0.MM-(en) - Stores2 -1.26.0 – Customer orders – Modifications to customer order management.doc);

- Supplier orders (olt 10121): an implementation has been made so that the management of head office stock management in orders to supplier and 'Online stock' management can co-exist;

3.1.2 Improvements

- General (prb 93419): Addition of negative number management in the S2_Text module;

- Targets (prb 94171): Improvements to target master data;

- Warehouses (prb 94987): Improvement of movement list block during copy, delete, opening, etc. operations;

- Warehouses (prb 95036): Improvement of warehouse motive saving;

- Dictionary (prb 95261): Improvement of error management in the SGCostante function. As of version 1.26.0 the error will no longer appear on the video. However, the resource will not be translated;

- Sales (prb 96063): Improvement of promotion management (see DOC.09.0412.3.AO-(en) - Stores2 -1.26.0 - Sales – Promotion management.doc);

3.1.3 Corrections

- General (prb 94713): Correction of product code management with an apostrophe;

- General (prb 95263): Correction of the VerificaListini routine so that price lists for mixed state nodes are not cancelled;

- Price lists (prb 94453): Correction of the reconstruction of price lists in the event of a blank table;

3.2 Fix 1.26.1 release on 19/11/2010

This update brings the database level to version 2721.

3.2.1 Addition of new functionalities

- Price lists (olt 9677 and 10,209): Management of fixed prices and various improvements to discount tables (see DOC.10.0124.1.AO-(en) - Stores2 - 1.26.1 - Sales – Discount table management.doc);

- Portuguese taxes (olt 10322): Stores2 has been upgraded to the standards required by Portuguese taxes (see MCR.10.0643.0.MR - (en) – Stores2 certification for Portuguese taxes.doc);

- Host (olt 9861): Addition of a field related to the product barcode during the stock exporting phase (in the S2_GIACE file);

3.2.2 Improvements

- Statistics (prb 97165): Management of an error which occurred when importing statistics with no ODBC connection;

- Sales (prb 97539): Improvement of barcode reading in sales;

- Connections (prb 97769): Improvement of customer recoding management (the function is not performed if there are no customers to recode);

- Stock (prb 97614): Addition of a check on the stock list on the presence of the warehouse set as main one;

3.2.3 Corrections

- Messages (prb 95410): Correction of the error which occurred by double clicking on the "Properties" button in the message list;

- Connections (prb 97482): Correction of the order heading value assignment in the presence of heading discounts during the data acquisition from host phase;

- Connections (prb 98108): Correction of the use of "Connect now" in the presence of incoming data;

- Receipt formats (prb 97118): Correction of an error in the caption value assignment for code 60 fields for receipt formats;

- Warehouses (prb 97098): Correction of grid reloading management for a warehouse document after enabling the 'portable scanner' tool;

- Warehouses (prb 98092): Correction of a problem during the rejected DDT confirmation phase which caused Stores2 to block;

- Supplier orders (prb 92320): Addition of traces to better monitor order closing operations;

- Label printing (prb 97703): Correction of barcode printing upon request for products assigned to a kit;

- Sales (prb 96170): Correction of the customer node filter during the envelope selection phase;

- Sales (prb 97365): Correction of the taxable income rounding procedure in the vat summary;

- Sales (prb 97702): Correction of the retrieval of the number of decimals configured on the currency of a promotion;

- Sales (prb 97756): Correction of the interpretation of decimals in the envelope management grid;

- Sales (prb 97532): Correction of management of max change/amounts in payments. Management of exchange rate;

3.3 Fix 1.26.2 release on 03/12/2010

This update brings the database level to version 2726.

3.3.1 Addition of new functionalities

- General (olt 10371): Addition of barcode decoding management (see DOC.10.0436.0.AO-(en) - Stores2 - 1.26.2 - Sales – Barcode decoding options.doc);

3.3.2 Corrections

- Inventories (prb 98009): Correction of the error which occurred by double clicking on the properties key;

- Promotions (prb 98254): We have added an update level to correct the 'PromoProgressivo' field on the 'MovimentiRighe' table from Tinyint to Smallint (the problem was only present on a few stores migrated with a hybrid version of Stores2);

- Promotions (prb 98522): Correction of promotion master data management to maintain the line number on products and nodes;

- General (prb 98869): Correction of transmission to host setting saving in general parameters;

- General (prb 98894): Correction of an error when saving a string longer than 50 characters in the city of shipping addresses;

- General (prb 98276): Correction of label format importing with no ODBC connections;

- Connections (prb 98070): Correction of a problem which could cause double receipt transmitting;

- Connections (prb 98682): Correction of a problem in data exporting from host phase, where dataoratrasmissioneadhost was not transmitted;

- Connections (prb 98908): Addition of a modification aimed at excluding the host movements with incomplete order references;

- Connections (prb 98800): Correction of "FidelityMovimenti" sorting in the event of a sale to a company employee;

- Warehouses (prb 98178): Correction of an error which occurred when working on an adjustment and pressing the delete button after opening the download data from portable scanner screen;

- Warehouses (prb 98586): Correction of an adjustment generation problem due to incorrect management of product break down from different orders in document lines;

- Sales (prb 97441): Correction of a problem in receipt splitting if the return lines are automatically deleted;

- Sales (prb 98587): Correction of the cash register closing procedure with devices using the 'Epson Generic' driver;

- Sales (prb 98961): Correction of problems in promotion management with vouchers in Greek taxation;

- Sales (prb 97768): Correction of line value assignment of suspended receipts associated to a company employee;

- Statistics (prb 98253): Repair of the S2_FonteInventario module to get around any errors during the inventory statistics printing phase;

3.4   Fix 1.26.3 release on 20/12/2010

This update brings the database level to version 2732.

3.4.1 Addition of new functionalities

- Portuguese taxes (olt 10028): Stores2 certification for new Portuguese laws for 2011;

- Connections (olt 10022): Addition of delay management in automatic activations (see DOC.10.0437.0.AO-(en) - Stores2 - 1.26.3 - Connections- Delay management in automatic activations and improvements to AutostartAvvio module.doc);

- Warehouses (olt 9797): Modification to the filter on movements in wizard transfers to manage stores without transfers as well;

- Other (olt 9986): Addition of automatic activation management for external functions during the cash register closing phase (see DOC.10.0438.0.AO-(en) - Stores2 - 1.26.3 - Other – Automatic activation management by external function events.doc);

- Expected presences (olt 10500): Addition of the editable expected presences management (see DOC.10.0439.0.AO-(en) - Stores2 - 1.26.3 – Expected presences – Modification to previous expected presences.doc);

- Sales (olt 10498): Modification of "TipoRiferimento" assignment management during the expense entry phase in Russian taxation (see DOC.10.0715.0.MM-(en) - Stores2 - 1.26.3 – Sales – Modification of field value assignment in KO2 report.doc);

- Sales (olt 10088): The possibility has been added of printing gift receipts and the total fidelity points of a customer to whom the sale is registered with RCH Swing cash register (see DOC.10.0716.0.MM-(en) - Stores2 - 1.26.3 – Sales – Gift receipt and fidelity point printing with RCH Swing.doc);

- Sales (olt 10271): Addition of an implementation used to print gift cards on non-fiscal Epson and generic Windows printers;

3.4.2 Improvements

- Connections (prb 98998): Modification of discount table importing from host so that the program promptly updates the discount table without requiring previous deletion of the nodo/classenodo/parametro0/tipolistino group like before;

3.4.3 Corrections

- Warehouses (prb 98929): Addition of traces in warehouse document closing management and improvement of quantity management in the data downloading from PS phase;

- Warehouses (prb 99384): Addition of traces in warehouse document closing management and improvement of quantity management in the data downloading from PS phase;

- Warehouses (prb 99759): Correction of warehouse document confirmation with generation of adjustment in various savings;

- Statistics (prb 99035): Correction of the exclusion of geographic node parameters in statistic filters;

- Envelope management (prb 99103): Correction of decimal management;

- Discount table (prb 99161): Correction of price calculation management in products;

- Sales (prb 99297): Adjustment of the RCH Onda driver to manage the vista operating system. S2_CR_RCHOnda.dll and registering the new Dll. Addition of the string UsaPathUtente=1 in the [SET] section of file S2_Cr_RCHOnda.ini;

- Master data (prb 99483): Correction of foreign language description display in label formats;

- Connections (prb 99674): Correction of a customer extraction to host error in the event of date of birth value assigned to 0;

3.5 Fix 1.26.4 release on 13/01/2011

This update brings the database level to version 2739.

3.5.1 Addition of new functionalities

- General (olt 9631): Addition of Target management by Product Parameters (see doc DOC.11.0113.0.DB-(en) - Stores2 – 1.26.4 – Data interchange with host – Target management by product parameters.doc);

- General (olt 9876): Addition of credit note value management for Russian stores (see doc DOC.11.0112.0.DB-(en) - Stores2 - 1.26.4 - Deposits – Credit Note Value Management (for Russian stores).doc);

- Warehouses (olt 10023): Addition of returns to head office management for new products (see doc DOC.11.0102.0.AO-(en) - Stores2 - 1.26.4 - Warehouses – Return reason management.doc);

- PS data acquisition (prb 99787): Modification to data acquisition management from PS from file to allow acquisition of products with decimal Qty. It will be necessary to specify the asci code for the decimal separator in the portable scanner format;

3.5.2 Improvements

- Warehouses (prb 99480): Improvement of list loading management;

- Warehouses (prb 100071): Improvement of PS-PC value summary management in the closing phase. It is now no longer possible to enter negative values;

- Warehouses (prb 100186): Addition of acoustic warning for incorrect barcode including in the barcode reading phase during keyboard emulation;

- Warehouses (prb 100573): Addition of trim management on products entered manually in the grid;

- Warehouses (prb 100750): Addition of traces in the warehouse document closing phase;

- Orders (prb 100821): Improvement of quantity control management in the order if there is data with Righe and RigheQta not aligned;

- Connections (prb 94597): Optimizations to stock reconstruction management during the update acquisition phase;

3.5.3 Corrections

- Sales (prb 98034): Correction of promotion management in the event of change in receipt date;

- Price lists (prb 99861): Correction of the configuration screen display in price list generation by node phase without parameters to display;

- Connections (prb 99865) Correction of data extraction to host with the discount reason with a combined payment type;

- Inventories (prb 99897): Correction of inventory area opening with double mouse click;

- Sales (prb 99969): Correction of receipt issuing with ko report (Russian taxation);

- Price lists (prb 100099): Correction of the 'Multiplo' field in the rounding phase. Entry of 0 value managed;

- Connections (prb 100155): Correction of fidelity movement sorting between the various fidelity islands in the presence of deleted fidelity master data;

- Connections (prb 100228): Correction of default reorganization option management in the selection phase of the 'Shut off PC' and 'Unsupervised' flag;

- Sales (prb 100246) Correction of department and services description retrieval in the promotion summary window;

- Sales (prb 100259) Correction of price retrieval in the barcode reading phase with management of the 'TabellaSconto';

- Connections (prb 100287) Correction of automatic incoming transfer confirmation;

- Warehouses (prb 100364) Correction of the DataOraTrasmissioneAdHost = '19790928' setting in the event of deletion of an adjustment;

- Warehouses (prb 100396) Correction of head office management of adjustment modifications;

- Connections (prb 100467): Correction of note entry management on the transmission control screen;

- Statistics (prb 100470): Correction of inspection printing management;

- Sales (prb 100530): Correction of an error which occurred by canceling the cashier selection (with the password request and timeout management) after closing of the receipt;

- Stock (prb 100757): Correction of stock recalculation management in the presence of products with code containing an asterisk;

- Messages (prb 100987): Correction of message opening after a failed click of the properties key;

3.6 Fix 1.26.5 release on 26/01/2011

This update brings the database level to the following values:
VersioneDatabase: 2740
VersioneFisicaDatabase: 2601
VersioneLogicaDatabase: 0

3.6.1 Addition of new functionalities

- **General (prb 101643):** Modification of database level management. Now the levels to execute will be written in the 'LivelliDatabase' table and distributed. The new CheckDatabase will be able to recognize them and execute them even if the version of the person who created the packet is higher than the version of the person acquiring (the database version taken into consideration will be that of the "VersioneFisicaDatabase" field in the "Installazione" table). The work will be concluded with 1.27 managing the software distribution to test stores. The documentation will be supplied with the 1.27 version (in the 1.26.5 version nothing changes from the user side);

- Sales (olt 10468, 10618): Modifications to "TabellaSconti" management (see doc DOC.10.0124.2.AO-(en) - Stores2 - 1.26.5 - Sales – Discount table management.doc);

- Stock (olt 10369): Addition of a filter per variant on the stock search screen;

- Statistics (olt 10346): Addition of the possibility of importing a product list from Excel sheet in the product filter of Stores2 statistics (see doc DOC.11.0114.0.DB-(en) - Stores2 - 1.26.5 - Statistics – Data selection from Excel file importing.doc);

- Customers (olt 9875): addition of the possibility of checking the correctness of an address supplied by a customer, by contacting the Google Maps webserver and obtaining the geocode of the specified address, whose coordinates will be registered in the customer record (see doc DOC.11.0118.0.DB - (en) - Stores2 - 1.26.5 – Online customer address check.doc);

3.6.2 Improvements

- Price lists (prb 100921): Addition of the possibility of executing the VerificaListini function after having generated a price list with the quick price list;

- Warehouses (prb 101408): Forced Uppercase function during the data acquisition from PS phase;

- Orders (prb 101466): Improvement of the control on the quantity in the order with prices per size;

3.6.3 Corrections

- Sales (prb 100965): Correction of discount reason reading management if the last line read is not the last one edited;

- Sales (prb 101191): Non-fiscal receipt printing, a check on the length of the fiscal code has been added: if this is blank (case of a 'legal entity'), the name will not be abbreviated;

- Messages (prb 101179): Correction of the message list to show the hourglass in the search phase;

- Statistics (prb 101688): When the possibility is given to a user to select the printing language, the description function of the localized tables did not use the selected language. This possibility has now been added;

- Products (prb 101691): Correction of the date change function on the price calculation window on sconto tables;

- Statistics (prb 101489): Correction of the error which occurred by launching a statistic with value assignment to a currency without exchange rates;

- Sales (prb 101152): correction of a sales problem for an article with decimal quantities; if the quantity was greater than 100 it was not possible to enter decimals. Intervention on S2_RepartiVendita, modified to manage the maximum value on the quantity and not the string length;

- Connections (prb 101903): In preparing data packets for other stores, correction of the failure to create indexes in the MovimentiTestate table. The correction of S2_Periferia.dll 1.26.0.16 entails addition of the keys to the data packet only in the condition where the receiving database is Access and the packet arrives from an SQL Server. In the other cases this does not occur, i.e. the keys are not added;

- General (prb 102124): Bypassing of the control on update.lck for clients with win7. A file with the name below needs to be created in the program installation folder (on the

server):
- "NO_CHECK_UPD_LOCK_ALL.*". Even with 0 Byte. This inhibits a check for all network clients including the master workstation;
- "NO_CHECK_UPD_LOCK_{computername}.*". Even with 0 Byte. This inhibits a check for the network client indicated in {computername}. (E.g. NO_CHECK_UPD_LOCK_RM-WXPP.txt);
In this case as many files can be created as are win7 PC in the company network;
