TECHNICAL DOCUMENTATION

Stores2 - 1.33.1 - Fidelity - Automatic renewal of the accumulation in discount scale

Report developed by:

MICROS-Retail srl with sole shareholder

Alessio Ossola

Version 1.00 of 08/08/2013

Table of contents

1 Introduction	3
2 Automatic renewal of the accumulation in discount scale.....	3
2.1 Configuration.....	3
2.2 Operation.....	3

Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This function is used to define that resetting of the advantages reached with the discount scale does not occur when the validity months expire but only if there have been no sales for the set number of months.

2 Automatic renewal of the accumulation in discount scale

2.1 Configuration

In the fidelity master data, Fidelity management section, a new parameter “Automatic accumulation renewal” has been added to the discount scale management parameters.

The screenshot shows a software window titled "Fidelity" with several tabs: "Anagrafiche", "Gestione fidelity", and "Gestione scadenza tessere". The "Gestione fidelity" tab is active. On the right side, there are "Conferma" and "Annulla" buttons. The main area contains a list of configuration options with checkboxes:

- Scrivi movimenti fidelity
- Consenti selezione in periferia
- Consenti modifica sconto riga
- Non calcolare lo sconto di riga sui resi.
- Crea fidelity condizioni alla conferma della scheda cliente
- Gestione on-line
- Stampa barcode (Intermec EasyCoder E4)
- Tipo fidelity di default in anagrafica clienti
- Impedisci sconto testata
- Anagrafica non associata
- Crea condizioni fidelity solo per nuova tessera
- Verifica E-mail

Below this list, there are several sub-sections: "Gestione plafond", "Gestione scala sconti" (highlighted), "Gestione accumulo", "Gestione compleanno", and "Promozione per parametro". The "Gestione scala sconti" section contains the following fields:

- Scala sconti: 1 Totale
- Codice scala sconti: 001 S1
- Rinnovo automatico dell'accumulo: 2** (highlighted with a red box)
- Escludi vendita in corso
- Solo accumulo in saldo
- Gestisci condizioni fidelity
- Considera valori di altri nodi

If a value is set in this section, the “Validity months” parameter in the Master data section will no longer be considered.

2.2 Operation

If the new parameter is set for discount scale management, the card instead of being reset after X months (Validity months) from the date of activation will be reset only if no sales have been made in X months (Automatic accumulation renewal months) from the last sale.
