This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

2.1 Configuration.....	3
2.1.1 <i>New layout type creation.....</i>	<i>3</i>
2.1.2 <i>ElenchiFiltriCampi, ElenchiColonne, ElenchiFiltriColonne value assignment.....</i>	<i>3</i>
2.1.3 <i>Layout type selection on Geographic Node</i>	<i>3</i>
2.2 Operation.....	4

Note: The rebranding for the latest version of this documentation set is in development as part of post MICROS acquisition activities. References to former MICROS product names may exist throughout this existing documentation set.

1 Introduction

This modification makes it possible to customize the display of filters and columns of the receipt list at geographic node level.

2 Receipt list screen customized for node

2.1 Configuration

It is necessary to enter the information related to the layout type by hand, via modifications to the database.

2.1.1 New layout type creation

A new layout Type needs to be created via queries. In the example the query to create a layout type (the value 2 corresponds to the receipt layout type) with code=1.

```
INSERT INTO ElenchiTipi(Codice, Descrizione, UltimoUtente, TipoSchema) SELECT 1, 'ElencoScontrini1, '000', 2
```

The created type will then be used in the subsequent chapters for defining the layout details.

2.1.2 ElenchiFiltriCampi, ElenchiColonne, ElenchiFiltriColonne value assignment

The tables ElenchiFiltriCampi, ElenchiColonne, ElenchiFiltriColonne have a value assigned with the default type=0. New records need to be created for the previously generated layouts.

2.1.3 Layout type selection on Geographic Node

The section "Layout types" has been added to Geographic Nodes, Various section, used to select the layout types to use at node level for the receipt list.

2.2 Operation

Receipt list filters and columns will be composed based on the layout type selected in Geographic nodes.
