

Oracle® Retail Brand Compliance Management Cloud Service

Release Notes

Release 16.0.4.6

September 2017

This document highlights the major changes for Release 16.0.4.6 of Oracle Retail Brand Compliance Management Cloud Service.

Overview

Oracle Retail Brand Compliance Management Cloud Service is an integrated suite of applications designed to meet all aspects of sourcing, developing, and protecting retailer brands. The suite provides solutions for product development, compliance, quality, and traceability. It is designed specifically for retail, food service, and manufacturing businesses to develop and protect their brands, manage their suppliers, and ensure full end-to-end product lifecycle management.

Oracle Retail Brand Compliance Management Cloud Service is composed of the following applications:

- Library enables the issue, receipt, and acceptance of policies, guidelines, and key working documents.
- Product supports the development of products and production specifications.
- Project supports the development of project briefs, plans, and workflow management.
- Supplier enables the identification, selection, and approval of suppliers.

Oracle Retail Cloud Services and Business Agility

Oracle Retail Brand Compliance Management Cloud Service is hosted in the Oracle Retail Cloud with the security features inherent to Oracle technology and a robust data center classification, providing significant uptime. The Oracle Cloud team is responsible for installing, monitoring, patching, and upgrading retail software.

Included in the service is continuous technical support, access to software feature enhancements, hardware upgrades, and disaster recovery. The Cloud Service model helps to free customer IT resources from the need to perform these tasks, giving retailers greater business agility to respond to changing technologies and to perform more value-added tasks focused on business processes and innovation.

Oracle Retail Software Cloud Service is acquired exclusively through a subscription service (SaaS) model. This shifts funding from a capital investment in software to an operational expense. Subscription-based pricing for retail applications offers flexibility and cost effectiveness.

Client System Requirements

The following technology is supported:

- The following web browsers are supported on Microsoft Windows 7:

Note: Oracle Retail assumes that the retailer has ensured its Operating System has been patched with all applicable Windows updates.

- Microsoft Internet Explorer 11
- Mozilla Firefox 45.1.1 ESR
- Google Chrome 50+
- The following web browsers are supported on Oracle Linux 7:
 - Mozilla Firefox 45.1.1 ESR
 - Google Chrome 50+

Fixed Issues

The following tables list issues fixed in this release:

Table 1 General Fixed Issues

Defect Number	Description
25464791, 26143181	Global Change batch job failures A fix is made to rectify an issue where the Change Responsibility Global Change batch job was failing to run, stalling with a Fail Retry status.
26479065	Missing literals in List Views A fix is made to rectify an issue with default system text literals missing from list views that are accessed from the list of Tasks on the user's Home page. The missing system text has now been provided. Impact on existing systems: Any client-specific overrides or language translations must be manually applied as a post-release task.
26530583	Formatting of Terms & Conditions text A fix is made to rectify an issue with the formatting of the text of the terms and conditions which appears at the end of the Supplier Registration wizard. The text was right-justified, and the last line truncated. The text is now presented correctly.
26551105	Global Change batch job messages A fix is made to rectify an issue where a spurious message was being issued by the Product Technologist Responsibility Global Change batch job.

Table 1 (Cont.) General Fixed Issues

Defect Number	Description
26751558	<p>Glossary entries not defaulting to Active</p> <p>A fix is made to rectify an issue where new entries in certain Supplier module glossaries were not defaulting their status to Active.</p> <p>The Active flag is now correctly set by default when adding a new entry to the affected glossaries: Billing Codes, Supplier Types, Site Types, Maintenance Audit Reasons, Invoicing Systems, Supplier Top Grades, Site Top Grades, Reference Statuses, Reference Types, Business Units, Currencies, Other Production Details, Area, Countries.</p>

Table 2 Product Fixed Issues

Defect Number	Description
26385793	<p>Counter Ticket Pack Copy Preview contains duplicates</p> <p>A fix is made to rectify an issue where rows were being duplicated when previewing the Pack Copy file for a Counter Ticket specification type.</p> <p>The tables affected were:</p> <ul style="list-style-type: none"> ▪ Front of Ticket/Additional Technical Copy for Counter Ticket ▪ Back of Ticket/Additional Information for Counter Staff
26407339	<p>Error when closing a Product Record after a Specification status change</p> <p>A fix is made to rectify an error when saving a Product Record which has been edited while a linked Specification has been progressed to Pack Copy Sent status.</p>
26483087	<p>Ingredients declaration warning</p> <p>A fix is made to rectify an issue where formatted ingredients were incorrectly raising a validation warning message of a possible allergen needing to be declared.</p> <p>The validation was only covering the situation where an ingredient is within a declared compound - missing the fact that ingredients can be declared by forced addition or by being summed with the same name.</p>
26481990	<p>Business language Ingredients List showing in Specification</p> <p>A fix is made to rectify an issue where the business language version of the Ingredients List field was showing in the Specification's Recipe section regardless of the setting of the system parameter.</p> <p>The system now correctly hides the Business Language Ingredients List field if the Show Business Language Fields system parameter is set to No. Other areas of the system that have business language versions of fields correctly show or hide the fields accordingly.</p>
26525224	<p>Unable to select a Specification's Spec Admin contact</p> <p>A fix is made to rectify an issue where it was not possible to add a Spec Admin contact within a Specification.</p>
26531017	<p>Error when downloading a blank Product Import file</p> <p>A fix is made to rectify an error when downloading a blank Product Import file from the Product Records list view.</p>
26550782	<p>Error when opening a Produce Specification in the Global Changes list views</p> <p>A fix is made to rectify an error when opening a Specification from the Change Product Produce Responsibility Global Change list view.</p>

Table 2 (Cont.) Product Fixed Issues

Defect Number	Description
26626119	<p>Min Life Into Depot % not calculated</p> <p>A fix is made to rectify an issue with the Min Life Into Depot % value not being calculated in the Storage section of a Produce Specification.</p> <p>The issue only occurred in Specifications that had been migrated from an external system. The value now automatically calculates from the associated values, instead of showing '-'.</p>
26637272	<p>Incorrect declaration for List 2 ingredients list type</p> <p>A fix is made to rectify an issue with the generation of the declaration for the List 2 type of ingredients declaration. The issue related to the rounding of QUID values, the inclusion of ingredients, and their formatting within the declaration.</p>

Table 3 Supplier Fixed Issues

Defect Number	Description
26237574	<p>Incorrect status in Change History log for Audit Issues</p> <p>A fix is made to rectify an issue with the status of an Audit Issue that is at Awaiting Approval being shown with its status as Accepted in the Change History log.</p> <p>The issue occurred where the user chose to accept the Audit Issue, but validation prevented the status change. The status in the Change History is now only set if the status change action has successfully completed.</p>
26532595	<p>New Site Contact not appearing</p> <p>A fix is made to rectify an issue where a new Contact did not appear after being added to a Site record.</p>
26532649	<p>Error when completing an Audit</p> <p>A fix is made to rectify an error where the completion of an Audit failed due to a lock on the associated Site record.</p> <p>The issue occurred where the system attempted to update the Site record with details of latest completed audit. The Site update has been changed to use a batch job which will automatically retry until any locks have been released.</p> <p>This fix has also been applied to other areas where an update is cascaded to another record:</p> <ul style="list-style-type: none"> ▪ Glossary Scorecard Questions to related Scorecard Templates and scheduled Scorecards. ▪ Country Where Sold in Product Records to related Product Specifications. ▪ Site Reference changes to Product Specification Other Labelling Copy Sections. ▪ Supplier Addresses to Site Addresses. ▪ The action to add Activities to a Project and schedule it.

Table 3 (Cont.) Supplier Fixed Issues

Defect Number	Description
26543733	<p>Error when deleting Audit Checklists using API A fix is made to rectify an HTTP 403 error being returned when attempting to delete an Audit Checklist using the Audit Checklist API.</p> <p>Impact on existing systems: If the Audit Checklist API is to be used, a post release task is necessary to add the AUDIT_CHECKLIST_DELETE endpoint to any API Service records that may be used to delete Audit Checklists.</p>

Table 4 Library Fixed Issue

Defect Number	Description
26530855	<p>Icons in the Library view change after expanding a node A fix is made to rectify an issue with icons in the Library Archive view changing when a folder with child folders is expanded.</p> <p>The icons now remain the same before and after a node is expanded.</p>

Post Release Tasks

If the Audit Checklist API is to be used to delete Audit Checklists, is necessary to add the AUDIT_CHECKLIST_DELETE endpoint to the Service record being used to access the API.

Please be aware that for existing implementations there is new system text which will be automatically uploaded with this release. If there are any client-specific overrides or language translations required, they must be manually applied as a post-release task.

The following table lists the new system text:

Area	Key (Column A)	Label (Column E)
Product Records	productRecordFlow.view.ProductRecordlist.addColumnDialog.CountryWhereSoldlistTitle	Countries Where Sold
Product Specifications	listViewTitle.produceSpecsAtStatus	Specs by Status
	listViewTitle.temporaryProduceSpecsByStatusForTaskApp	Temporary Produce Specs by Status
	listViewTitle.productSpecificationsAwaitingActionRetailer	Specs Awaiting Action
Alerts	listViewTitle.alertResponseAlertResponsesWhereAChangeHasBeenRequested	Responses Requiring Attention
Surveillance	listViewTitle.importedTestReportsForTaskApp	Imported Test Reports awaiting action

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via™** licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex™** licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
