

Oracle® Retail Brand Compliance Management Cloud Service

Release Notes

Release 17.0.15.0

F25122-02

November 2019

This document highlights the major changes for Release 17.0.15.0 of Oracle Retail Brand Compliance Management Cloud Service.

Overview

Oracle Retail Brand Compliance Management Cloud Service is an integrated suite of applications designed to meet all aspects of sourcing, developing, and protecting retailer brands. The suite provides solutions for product development, compliance, quality, and traceability. It is designed specifically for retail, food service, and manufacturing businesses to develop and protect their brands, manage their suppliers, and ensure full end-to-end product lifecycle management.

Oracle Retail Brand Compliance Management Cloud Service is composed of the following applications:

- Library enables the issue, receipt, and acceptance of policies, guidelines, and key working documents.
- Product supports the development of products and production specifications.
- Project supports the development of project briefs, plans, and workflow management.
- Supplier enables the identification, selection, and approval of suppliers.

Oracle Retail Cloud Services and Business Agility

Oracle Retail Brand Compliance Management Cloud Service is hosted in the Oracle Retail Cloud with the security features inherent to Oracle technology and a robust data center classification, providing significant uptime. The Oracle Cloud team is responsible for installing, monitoring, patching, and upgrading retail software.

Included in the service is continuous technical support, access to software feature enhancements, hardware upgrades, and disaster recovery. The Cloud Service model helps to free customer IT resources from the need to perform these tasks, giving retailers greater business agility to respond to changing technologies and to perform more value-added tasks focused on business processes and innovation.

Oracle Retail Software Cloud Service is acquired exclusively through a subscription service (SaaS) model. This shifts funding from a capital investment in software to an operational expense. Subscription-based pricing for retail applications offers flexibility and cost effectiveness.

Client System Requirements

The following technology is supported:

- The following web browsers are supported:

Note: Oracle Retail assumes that the retailer has ensured its Operating System has been patched with all applicable Windows updates.

- Microsoft Internet Explorer 11
- Mozilla Firefox ESR 60+
- Google Chrome (Desktop) 73+

Fixed Issues

The following tables list issues fixed in this release:

Table 1 General Fixed Issues

Defect Number	Description
28850589, 28874677, 29331610, 29593880, 29707463, 29811786	Unable to open a record from a list view A fix is made to address an intermittent issue where the <i>Please select a row</i> message was being displayed and preventing a record being opened from the list views, even when a row had been selected. This was not related to a specific list, and could be worked around by closing and reopening the list view and continuing with the required activity.
29765202	Bulk Glossary Export Issue A fix has been made to revert a previous change that included the bulk export of the <i>Checklist Audit Available Questions</i> . In some instances where a portal has an extensive use of the <i>Checklist Audits</i> , the impact of including this glossary was causing the general export to fail.

Table 2 Supplier Fixed Issue

Defect Number	Description
29121737	Inactive glossary entries available for selection A fix is made to rectify an issue with inactive glossary entries being available for selection in picklists. The issue related to the following glossaries: <ul style="list-style-type: none">■ Other Production Details - used in the Sourcing details page of the Site record.■ Area - used in the Supplier records.■ Audit/Visit Score - used in Audit Templates (Allowable Score Options).■ Audit/Visit Standards - used in Audit Templates.■ Audit/Visit Issue Types - used in Audit Templates. Inactive entries are no longer available for selection from the glossary.

Table 3 Product Fixed Issues

Defect Number	Description
28092934	<p>Error when deleting variants from a Product Record</p> <p>A fix is made to rectify an error when attempting to save the Product Record after removing a product variant from the Product Coverage table.</p> <p>The error occurred if the portal was operating in multi-variant mode, that is, where the <i>Allow Creation of Multiple Products</i> system parameter is set to Yes.</p>
28845251, 28988369, 29374322	<p>Error when removing a section from a Specification</p> <p>A fix is made to rectify an error when removing a section from the Product Specification.</p> <p>The issue occurred in multi-pack specifications, when removing sections such as the Packaging or Other Labelling Copy.</p>
29005198	<p>Opening Product Records from Surveillance Test Reports</p> <p>A fix is made to rectify an issue with the correct record not opening when the Product Record or Produce Product Record is opened from the Sample Details page of an associated test report.</p>
29027745	<p>Country Where Sold duplicated in Specifications</p> <p>A fix is made to rectify an issue with the Country Where Sold value being duplicated in the Product Specification.</p> <p>The issue occurred when the specification was authorized or activated without first being saved. For example, in a Collaborative Draft specification, selecting the country and setting the status to Supplier Authorized without saving the specification would result in the selected country being duplicated.</p>
29223748	<p>Error when navigating between sections within a Specification</p> <p>A fix is made to rectify an error when navigation is from one section to another within the product specification.</p> <p>The issue occurred after saving and printing the Allergy and Dietary Advice section of a Food specification.</p>
29239391, 29597138	<p>Error uploading a Surveillance Test Report</p> <p>A fix is made to rectify an error when uploading a test report. The issue occurred when the upload process was trying to determine the Site record using the site code only. The Site record needs to be determined by using both the Supplier code and the Site code; this prevents more than one site code being returned and causing the error.</p>
29264317	<p>Unlinking deleted Specifications from Projects</p> <p>A fix is made to rectify an issue preventing projects being unlinked from a deleted product specification.</p> <p>When a specification is deleted, any links to projects are now removed.</p>
29265071	<p>Benchmark fields missing from list views</p> <p>A fix is made to rectify an issue with the Benchmark Brand and Justification fields being missing from the list of fields that can be added to a Product Record list view.</p>

Table 3 (Cont.) Product Fixed Issues

Defect Number	Description
29302718, 29450152, 29754807, 29815208, 29863422, 29863552	<p>Mandatory Field Rules / Specification Locking Rules</p> <p>A fix is made to ensure that when either the <i>Mandatory Field Rules</i> or the <i>Specification Locking Rules</i> are changed that this change is now applied to all servers within the <i>cluster</i> running the application.</p> <p>Previously, if either of these <i>Rules</i> were changed then the change would only take place on the server where the change was made. Therefore the <i>Rules</i> would be perceived to be inconsistent based upon the server in the cluster being accessing. A server restart would always resolve the issue and bring all servers in the cluster back in alignment, but this would require a disruption of service.</p>
29374461	<p>Error when calculating Nutrition values in a Specification</p> <p>A fix is made to rectify an error when recalculating the nutrient values and label declaration on a product specification after editing the Salt values.</p>

Table 4 Project Fixed Issues

Defect Number	Description
29119113	<p>Project Activities not showing in correct sequence</p> <p>A fix is made to rectify an issue with a project's activities not being shown in the correct sequence.</p> <p>The issue occurred when viewing the list of activities within a Project Template. The sequence is now correctly based on the value of the activity's sequence number.</p>
29265256	<p>Linking Product Records to Project Activities</p> <p>A fix is made to rectify an issue with the linking of project activities to multiple products.</p> <p>The issue occurred where the project and product were associated with a Supplier, but not a Site. It resulted in only the projects with activities that were not already linked were available for selection when linking a product to a project.</p>
29446787	<p>Multiple records unlinked when unlinking a single record from a Project</p> <p>A fix is made to rectify an issue with multiple records being unlinked from a Project when a just a single record was unlinked.</p> <p>Where a project was linked to multiple records, such as Product Records, the unlinking of one the records resulted in all linked records of that type being unlinked.</p>

Table 5 Application Program Interfaces (APIs) Fixed Issue

Defect Number	Description
29220696	<p>Retrieving the status history of Specifications</p> <p>A fix is made to rectify an issue with the Product Specifications REST API, to allow for the retrieval of the date and time of a specification's status change. This data is of use, for example, to determine the age distribution of specifications.</p> <p>The date and time of the status change is now included as a timestamp value within the statusHistory element.</p> <p>Example of how this will be evident in the XML returned. Note the <i>createdOn</i> and <i>updatedOn</i> tags within the <i>statusHistory</i> tag:</p> <pre> <ns1:statusHistory> <ns1:comments>...</ns1:comments> <ns1:localeData> <ns1:statusFrom>Deleted</ns1:statusFrom> <ns1:statusTo>Retailer Draft</ns1:statusTo> <ns1:id>160544</ns1:id> </ns1:localeData> <ns1:id>3682</ns1:id> <ns1:createdOn>2018-12-20T12:23:43.000Z</ns1:createdOn> <ns1:updatedOn>2018-12-20T12:23:43.000Z</ns1:updatedOn> </ns1:statusHistory> <ns1:statusHistory> <ns1:localeData> <ns1:statusFrom>Retailer Draft</ns1:statusFrom> <ns1:statusTo>Deleted</ns1:statusTo> <ns1:id>160531</ns1:id> </ns1:localeData> <ns1:id>3681</ns1:id> <ns1:createdOn>2018-12-20T12:22:52.000Z</ns1:createdOn> <ns1:updatedOn>2018-12-20T12:22:52.000Z</ns1:updatedOn> </ns1:statusHistory> </pre>

Post Release Tasks

There are no specific post release tasks that need to be done as part of this release.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Value-Added Reseller (VAR) Language

Oracle Retail VAR Applications

The following restrictions and provisions only apply to the programs referred to in this section and licensed to you. You acknowledge that the programs may contain third party software (VAR applications) licensed to Oracle. Depending upon your product and its version number, the VAR applications may include:

(i) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(ii) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Mobile Store Inventory Management.

(iii) the software component known as **Access Via**™ licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(iv) the software component known as **Adobe Flex**™ licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

You acknowledge and confirm that Oracle grants you use of only the object code of the VAR Applications. Oracle will not deliver source code to the VAR Applications to you. Notwithstanding any other term or condition of the agreement and this ordering document, you shall not cause or permit alteration of any VAR Applications. For purposes of this section, "alteration" refers to all alterations, translations, upgrades, enhancements, customizations or modifications of all or any portion of the VAR Applications including all reconfigurations, reassembly or reverse assembly, re-engineering or reverse engineering and recompilations or reverse compilations of the VAR Applications or any derivatives of the VAR Applications. You acknowledge that it shall be a breach of the agreement to utilize the relationship, and/or confidential information of the VAR Applications for purposes of competitive discovery.

The VAR Applications contain trade secrets of Oracle and Oracle's licensors and Customer shall not attempt, cause, or permit the alteration, decompilation, reverse engineering, disassembly or other reduction of the VAR Applications to a human perceivable form. Oracle reserves the right to replace, with functional equivalent software, any of the VAR Applications in future releases of the applicable program.
