This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Alarm Topic Description	1
Service Management System Alarms	3

Alarm Topic Description

Alarm generation

Alarms on each configured node are written to the syslog and are then captured by the smsAlarmDaemon for entry in the SMF database.

For management of these alarms, refer to *Service Management System Technical Guide*.

Severity levels

This table describes the alarms severity levels.

Level	Abbr	Description
Critical	C	These alarms are raised when the application has encountered an error which indicates that the system is unable to function.
Error	E	These alarms indicate the application has encountered a serious problem completing a necessary task and could not complete the task.
Warning	W	Warnings are raised to indicate the application encountered a problem completing a non-mission critical task.
Notice	N	Notices are raised to indicate that the application has completed a task successfully.

Alarm format

Alarms usually follow this format:

```
Mon DD 24:MM:SS hostname process name: [ID alarmID user.severity] process(PID)
SEVERITY: Alarm text with possible variables
```

Where:

Variable	Description
Mon DD	Month and date the alarm was logged.
24:MM:SS	Time the alarm was logged in 24 hour format.
hostname	Name of the machine on which the alarm was generated.
process name	Name of the process which logged the alarm.
alarmID	ID number of the alarm.
severity	Alarm severity.
process	Name of the process which logged the alarm.
PID	Process ID of the process which logged the alarm.
SEVERITY	Alarm severity.

Alarm text	Alarm text. This may include variables such as node number. Note: In some cases the entire alarm text is generated from variables.
------------	--

Note: Some alarms from some subsystems may have a different format.

Example: This text shows an smsMaster alarm about pending update queues.

```
Mar 30 13:34:54 prodsmp1 smsMaster: [ID 953149 user.warning] smsMaster(17833)
WARNING: Pending queue now above 15 (Worst Node 317)
```

Alarm text and variables

The %d and %s symbols represent variables within the alarm text. These values are generated by the subsystem and added to the message when the alarm is raised.

Usually the %d is a number and the %s is text in the context of the message to complete the alarm message. Occasionally other % symbols are also used (for example, %u) for different variables.

Further information

For more information about:

- The SMS Alarms subsystem, see *Service Management System Technical Guide*
- Creating and maintaining the SMS Alarm Relay rule set, see *Service Management System User's Guide*

Service Management System Alarms

Alarm	Severity	Text	Cause	Resolution	Service
280000	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Unable to find the program %s %d	Attempting to open the current file has resulted in an error.	Assuming basic UNIX skills (Check the following). 1) Does the specified file exist? 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? 5) Is the file available but the PATH for the current user is not set to find it? 6) Finally contact support.	SMS
280001	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Connection message expected not %s %d;	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
280002	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Connection type `%s %d not implemented yet;	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
280003	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: select-Connection manager select error	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
280004	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Update Loader message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280005	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Unable to send connAck message	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280006	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Connect ack message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280007	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Inferior master message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280008	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Master Controller message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280009	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Unable to send connAck message	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280010	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Update Loader %d now out of history on master %d	Replication system error	Contact support. The node in question is now out-of-sync with the SMP machine!	SMS
280011	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Unable to send update to loader %d; disconnecting.	Replication system error	No resolution. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280012	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Failure to send Info msg	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280013	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: accept-Connection accept error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280014	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: bind-Problem binding socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280015	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: bind-Problem listening on socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280016	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: compareResyncReceive has not reset yet; trying again	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
280017	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Connect ack message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280018	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Connection message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280019	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Connection type `%s %d not implemented yet	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280020	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: connect-Problem connecting socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280021	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: fcntl-Problem setting socking blocking to %d	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280022	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Inferior master message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280023	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: ioctl-Unable to set TCP socket non-blocking	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280024	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: ioctl-Unable to set TCP socket to close on exec (F_SETFD)	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280025	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Master Controller message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280026	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: No Master Found - suggests a replication config error	Replication system error	Refer to UNIX/application expert first. Check the following 1) is the smsMaster process running on the SMP? 2) is the SMP machine available? 3) are there any related smsMaster errors shown in the log on the SMP? 4) does the replication.config file still exist on the SMP? 5) Has a resync been started - check the updateLoader log for details. 6) Finally contact support.	SMS
280027	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: read-Connection read error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280028	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: read-Unix IPC pipe connection lost	Internal software error.	No resolution. If problem persists then contact support.	SMS
280029	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: read-Unix IPC pipe read error	Internal software error.	No resolution. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280030	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: select-Connection manager select error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280031	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: select-DB Event Reader select error	Replication system error	Refer to ORACLE/application expert first. 1) Check for locks on the ORACLE database instance. 2) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 3) If problem persists then contact support.	SMS
280032	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: select-Error from socket select	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280033	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: setsockopt-Problem setting socket option: Invalid argument	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280034	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: socketpair-Unable to open socketpair	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280035	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: socket-Problem with opening socket	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280036	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Unable to find the program %s %d.	Attempting to open the current file has resulted in an error.	Assuming basic UNIX skills (Check the following). 1) Does the specified file exist? 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? 5) Is the file available but the PATH for the current user is not set to find it? 6) Finally contact support.	SMS
280037	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Unexpected msg of type %d	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280038	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Unknown Unix IPC message %d received	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280039	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Update Loader %d now out of history on master %d	Replication system error	Contact support. The node in question is now out-of-sync with the SMP machine!	SMS
280040	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Update Loader message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280041	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Update Requester message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280042	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Write to fd %d only sent %d bytes not %d	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280043	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Failure to send Info msg	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280044	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Unable to send connAck message	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280045	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: write-Unable to send update to loader %d; disconnecting.	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280046	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: accept-Connection accept error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280047	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: bind-Problem binding socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280048	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: bind-Problem listening on socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280049	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: connect-Problem connecting socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280050	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: ioctl-Unable to set TCP socket to close on exec (F_SETFD)	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280051	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: read-Connection read error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280052	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: select-Error from socket select	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280053	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: setsockopt-Problem setting socket option: Invalid argument	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280054	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: socket-Problem with opening socket	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280055	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: fcntl-Problem setting socking blocking to %d	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280056	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: fcntl-Problem setting socking blocking to %d	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280057	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: ioctl-Unable to set TCP socket to close on exec (F_SETFD)	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280058	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: read-Unix IPC pipe connection lost	Internal software error.	No resolution. If problem persists then contact support.	SMS
280059	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: read-Unix IPC pipe read error	Internal software error.	No resolution. If problem persists then contact support.	SMS
280060	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: select-DB Event Reader select error	Replication system error	Refer to ORACLE/application expert first. 1) Check for locks on the ORACLE database instance. 2) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 3) If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280061	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: socketpair-Unable to open socketpair	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
280062	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Unexpected msg of type %d	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280063	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Unknown Unix IPC message %d received	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280064	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Update Requester message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
280065	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: logic=%d oraUpdateLoader.c@%d: hash table corrupt	Internal software error.	No resolution. Contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280066	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) CRITICAL: Lost connection to Oracle; exiting.	Cannot connect to ORACLE.	Refer to ORACLE/application expert first (Check the following). 1) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 2) process should restart and re-attempt to connect to ORACLE - check process output for errors. Finally contact support.	SMS
280067	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) ERROR: Replication config file `%s %d` not found	Replication system error	Refer to UNIX/application expert first. Check the following 1) Is this the first time that the node in question has been replicated to? 2) Is the target machine available - on the network / for FTP access? 3) Does the smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected - check the updateLoader log for details. 6) Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280068	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) ERROR: system-Error copying config file to hostZZZ	Replication system error	Refer to UNIX/application expert first. Check the following 1) First time that the node in question has been replicated to? 2) Target machine available - on the network for FTP access? 3) smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected, if the replication.config file on the target machine differs to the one on the SMP. 6) Finally contact support.	SMS
280069	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) ERROR: This node not found in replication config	Replication system error	Refer to UNIX/application expert first. Check the following 1) Is the node ID specified in the startup script of the updateLoader > 512? 2) If so set the value to something lower than 512. 3) Check the replication configuration in the SMS screens for the correct value for the updateLoader. 4) If problem persists then contact support.	SMS
280070	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) ERROR: Error opening Resync File `%s %d;	Kernel communication/disk error.	Assuming basic UNIX skills (Check the following). 1) Does the specified file exist? 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280071	ERROR	DEF123compareResyncRecv: compareResyncRecv(%d) ERROR: Node resync process completed;	Resyncing has completed for this node.	No resolution.	SMS

280241	WARNING	DEF123repConfigWriter: repConfigWriter(%d) WARNING: Table %s %d has no configured keys or no other columns.	Replication system error	Refer to ORACLE/application expert first. Likely cause is that an error occurred in the configuration of replication. 1)Check the configuration of the node in the SMS screens and also the node ID specified in the startup script for the updateLoader. 2)Check the smsMaster and the updateLoader logs for further related error messages. 3)Warning - any change to the replication configuration for a given node will cause that node to resync which may not be desirable. 4)Finally contact support.	SMS
280242	WARNING	DEF123repConfigWriter: repConfigWriter(%d) WARNING: Update lost with null columns.	Replication system error	Refer to ORACLE/application expert first. A data error has caused a replication fault. Check the error logs for the smsMaster and the updateLoader for further details. It may be possible to identify the error by manually running the update via SQL (rollback command if successful). Contact support for further assistance.	SMS
280243	WARNING	DEF123repConfigWriter: repConfigWriter(%d) WARNING: Update of %s %d affected %d rows.	Replication system error	No resolution. Contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
280244	WARNING	DEF123repConfigWriter: repConfigWriter(%d) WARNING: Updates will be lost onZZZ	Replication system error	Refer to ORACLE/application expert first. Error suggests a communication or configuration fault between the SMP and one of the replication nodes. Check the error logs for the smsMaster and the updateLoader for further details. Contact support for further assistance.	SMS
280245	WARNING	DEF123repConfigWriter: repConfigWriter(%d) WARNING: Oracle unavailable after %d seconds with error: ORA-%d:%z	Cannot connect to ORACLE.	Refer to ORACLE/application expert first (Check the following). 1) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 2) Check the environment variables and/or configuration files: ORACLE_SID(environment), tnsnames.ora(configuration file), listener.ora(configuration file). Verify that the username and password for the current machine is correct. 3) Observe startup output for errors. Finally contact support.	SMS
280246	ERROR	DEF123resyncServer: resyncServer(%d) CRITICAL: socket-Problem with opening socket	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service

281171	WARNING	DEF123smsStatsDaemon: smsStatsDaemon(%d) WARNING: Macro %s %d not found.	Internal software error.	Assuming basic UNIX skills (Check the following). 1) Does the macro name exist? - likely to be /IN/html/<application>/language/macro.lang 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? 5) Can the macro name be added to macro.lang? 6) Finally contact support.	SMS
281172	WARNING	DEF123smsStatsDaemon: smsStatsDaemon(%d) WARNING: Too many application IDs for MID	Configuration issue / error	Refer to UNIX/application expert first. Check the SMS statistics configuration (SMS Management Screens, Operator functions). Contact support if problem persists.	SMS
281173	WARNING	DEF123smsStatsDaemon: smsStatsDaemon(%d) WARNING: Too many measurement Ids	Configuration issue / error	Refer to UNIX/application expert first. Check the SMS statistics configuration (SMS Management Screens, Operator functions). Contact support if problem persists.	SMS
281174	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: socket-Problem with opening socket	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281175	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Unable to find the program %s %d	Attempting to open the current file has resulted in an error.	Assuming basic UNIX skills (Check the following). 1) Does the specified file exist? 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? 5) Is the file available but the PATH for the current user is not set to find it? 6) Finally contact support.	SMS
281176	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Connection message expected not %s %d;	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
281177	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Connection type ` %s %d not implemented yet;	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
281178	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: select-Connection manager select error	Internal communications error.	Refer to UNIX/application expert first. If problem persists then contact support.	SMS
281179	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Update Loader message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281180	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: write-Unable to send connAck message	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281181	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Connect ack message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281182	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Inferior master message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281183	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Master Controller message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281184	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: write-Unable to send connAck message	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281185	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Update Loader %d now out of history on master %d	Replication system error	Contact support. The node in question is now out-of-sync with the SMP machine!	SMS
281186	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: write-Unable to send update to loader %d; disconnecting.	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281187	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: write-Failure to send Info msg	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281188	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: No Master Found - suggests a replication config error	Replication system error	Refer to UNIX/application expert first. Check the following 1) is the smsMaster process running on the SMP? 2) is the SMP machine available? 3) are there any related smsMaster errors shown in the log on the SMP? 4) does the replication.config file still exist on the SMP? 5) Has a resync been started - check the updateLoader log for details. 6) Finally contact support.	SMS
281189	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: select-Error from socket select	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281190	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: accept-Connection accept error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281191	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: bind-Problem binding socket	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281192	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: bind-Problem listening on socket	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281193	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: connect-Problem connecting socketZZZ	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281194	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: ioctl-Unable to set TCP socket to close on exec (F_SETFD)	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281195	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: read-Connection read error	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281196	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: select-Error from socket select	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281197	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: setsockopt-Problem setting socket option: Invalid argument	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281198	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: fcntl-Problem setting socking blocking to %d	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281199	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: fcntl-Problem setting socking blocking to %d	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281200	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: ioctl-Unable to set TCP socket to close on exec (F_SETFD)	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
281201	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: read-Unix IPC pipe connection lost	Internal software error.	No resolution. If problem persists then contact support.	SMS
281202	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: read-Unix IPC pipe read error	Internal software error.	No resolution. If problem persists then contact support.	SMS
281203	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: select-DB Event Reader select error	Replication system error	Refer to ORACLE/application expert first. 1) Check for locks on the ORACLE database instance. 2) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 3) If problem persists then contact support.	SMS
281204	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: socketpair-Unable to open socketpair	Internal communications error.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281205	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Unexpected msg of type %d	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281206	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Unknown Unix IPC message %d received	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS
281207	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Update Requester message expected notZZZ	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. If problem persists then contact support.	SMS

281209	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Aiee! cmnPluginReleaseHandle received NULL handle!	Internal software error.	Contact support. No further information can be obtained.	SMS
281210	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: cmnPlugin: error loading library %s %d:%z	Shared library is missing/corrupt	Refer to application expert first. Check validity and permissions of the shared libraries in /IN/service_packages/SMS/lib	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281211	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Lost connection to Oracle; exiting.	Cannot connect to ORACLE.	Refer to ORACLE/application expert first (Check the following). 1) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 2) Verify that the username and password for the current machine is correct. 3) Observe startup output for errors. 4) process should restart and re-attempt to connect to ORACLE - check process output for errors. Finally contact support.	SMS
281212	CRITICAL	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: malloc() returned NULL in build_filename (cmnLang.cc)! Out of memory!	Insufficient memory to perform desired action due to internal software error.	Refer to UNIX/application expert first (Check the following). 1) Rogue processes consuming memory 2) Unusually large memory consumption for an individual binary. Finally contact support.	SMS
281213	CRITICAL	DEF123smsStatsLoader: smsStatsLoader(%d) CRITICAL: Out of memory in cmnLang.cc:processLine!	Insufficient memory to perform desired action due to internal software error.	Refer to UNIX/application expert first (Check the following). 1) Rogue processes consuming memory 2) Unusually large memory consumption for an individual binary. Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281214	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Replication config file ` %s %d not found	Replication system error	Refer to UNIX/application expert first. Check the following 1) Is this the first time that the node in question has been replicated to? 2) Is the target machine available - on the network / for FTP access? 3) Does the smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected - check the updateLoader log for details. 6) Finally contact support.	SMS
281215	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: system-Error copying config file to hostZZZ	Replication system error	Refer to UNIX/application expert first. Check the following 1)Is this the first time that the node in question has been replicated to? 2)Is the target machine available - on the network for FTP access? 3)Does the smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected, if the replication.config file on the target machine differs to the one on the SMP. 6)Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281216	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: This node not found in replication config	Replication system error	Refer to UNIX/application expert first. Check the following 1) Is the node ID specified in the startup script of the updateLoader > 512? 2) If so set the value to something lower than 512. 3) Check the replication configuration in the SMS screens for the correct value for the updateLoader. 4) If problem persists then contact support.	SMS
281217	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Error opening Resync File `%s %d`;	Kernel communication/disk error.	Assuming basic UNIX skills (Check the following). 1) Does the specified file exist? 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? Finally contact support.	SMS
281218	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Node resync process completed;	Resyncing has completed for this node.	No resolution.	SMS
281219	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Update Loader %d at `%s %d:%d` also connecting from `%s %d:%d`	Replication system error	Refer to UNIX/application expert first. Error suggests that more than one replication process or node is connecting with the same node ID. 1) Check each of the node process startup scripts to ensure that each one has a unique node ID. 2) If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
281220	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Connection to `%s %d` lost HB late by 123ms	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
281221	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Unable to reach master node %d at `%s %d`	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
281222	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: SMS Master shutting down	Process shutting down	Refer to UNIX/application expert first. Check the following 1) Was this shut down intentional? - if so then ignore the message - if not then there may be a communication error between the updateLoaders and the smsMaster which has invoked the InferiorMaster functionality 2) Contact support if required.	SMS
281223	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Master Controller `%s %d` process started (node %d)	Process has started successfully.	No resolution.	SMS
281224	ERROR	DEF123smsStatsLoader: smsStatsLoader(%d) ERROR: Unable to reach master node %d at `%s %d`	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service

282118	ERROR	DEF123infMaster: infMaster(%d) ERROR: system-Error copying config file to hostZZZ	Replication system error	Refer to UNIX/application expert first. Check the following 1)Is this the first time that the node in question has been replicated to? 2)Is the target machine available - on the network for FTP access? 3)Does the smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected, if the replication.config file on the target machine differs to the one on the SMP. 6)Finally contact support.	SMS
282119	ERROR	DEF123infMaster: infMaster(%d) ERROR: This node not found in replication config	Replication system error	Refer to UNIX/application expert first. Check the following 1) Is the node ID specified in the startup script of the updateLoader > 512? 2) If so set the value to something lower than 512. 3) Check the replication configuration in the SMS screens for the correct value for the updateLoader. 4) If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282120	ERROR	DEF123infMaster: infMaster(%d) ERROR: Error opening Resync File `%s %d;	Kernel communication/disk error.	Assuming basic UNIX skills (Check the following). 1) Does the specified file exist? 2) Are the correct permissions set for the file? 3) Is the file corrupt, can it be opened? 4) Is the disk full? Finally contact support.	SMS
282121	ERROR	DEF123infMaster: infMaster(%d) ERROR: Node resync process completed;	Resyncing has completed for this node.	No resolution.	SMS
282122	ERROR	DEF123infMaster: infMaster(%d) ERROR: Update Loader %d at `%s %d:%d also connecting from `%s %d:%d	Replication system error	Refer to UNIX/application expert first. Error suggests that more than one replication process or node is connecting with the same node ID. 1) Check each of the node process startup scripts to ensure that each one has a unique node ID. 2) If problem persists then contact support.	SMS
282123	ERROR	DEF123infMaster: infMaster(%d) ERROR: Connection to `%s %d lost HB late by 123ms	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
282124	ERROR	DEF123infMaster: infMaster(%d) ERROR: Unable to reach master node %d at `%s %d	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282125	ERROR	DEF123infMaster: infMaster(%d) ERROR: SMS Master shutting down	Process shutting down	Refer to UNIX/application expert first. Check the following 1) Was this shut down intentional? - if so then ignore the message - if not then there may be a communication error between the updateLoaders and the smsMaster which has invoked the InferiorMaster functionality 2) Contact support if required.	SMS
282126	ERROR	DEF123infMaster: infMaster(%d) ERROR: Master Controller `%s %d` process started (node %d)	Process has started successfully.	No resolution.	SMS
282127	ERROR	DEF123infMaster: infMaster(%d) ERROR: Unable to reach master node %d at `%s %d`	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
282128	ERROR	DEF123infMaster: infMaster(%d) ERROR: Update Requester `%s %d` process registered (node %d)	Information only	No resolution.	SMS
282129	ERROR	DEF123infMaster: infMaster(%d) ERROR: Failed to read database item from tableZZZ	Replication system error	Contact support. Error suggests the unexpected invocation of the InferiorMaster functionality.	SMS
282130	ERROR	DEF123infMaster: infMaster(%d) ERROR: Merge complete with %d errors	Replication system error	Contact support. Error suggests the unexpected invocation of the InferiorMaster functionality.	SMS
282131	ERROR	DEF123infMaster: infMaster(%d) ERROR: Merge started from node %d	Replication system error	Contact support. Error suggests the unexpected invocation of the InferiorMaster functionality.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282132	ERROR	DEF123infMaster: infMaster(%d) ERROR: Recieved Update Ack from loader %d with no outstanding update	Replication system error	Refer to ORACLE/application expert first. Likely cause is that an error occurred in the configuration of replication. 1)Check the configuration of the node in the SMS screens and also the node ID specified in the startup script for the updateLoader. 2)Check the smsMaster and the updateLoader logs for further related error messages. 3)Warning - any change to the replication configuration for a given node will cause that node to resync which may not be desirable. 4)Finally contact support.	SMS
282133	ERROR	DEF123infMaster: infMaster(%d) ERROR: Connection to `%s %d lost HB late by 123ms	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
282134	ERROR	DEF123infMaster: infMaster(%d) ERROR: Reached master node %d at `%s %d	Client successfully made a connection.	No resolution.	SMS
282135	ERROR	DEF123infMaster: infMaster(%d) ERROR: Unable to reach master node %d at `%s %d	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282136	ERROR	DEF123infMaster: infMaster(%d) ERROR: Connect attempt timed out after %d secs	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
282137	ERROR	DEF123infMaster: infMaster(%d) ERROR: Connection pipe broke	Internal software error.	No resolution. If problem persists then contact support.	SMS
282138	ERROR	DEF123infMaster: infMaster(%d) ERROR: gethostbyname-Problem getting host `s %d	Communications over the socket appears to have problems.	Refer to UNIX/application/LAN expert first (Check the following). 1) TCP/IP connection integrity. 2) Type netstat -na (see man netstat for more information) to determine the status of the listening socket for this connection. (Should be a configuration parameter). Finally contact support.	SMS
282139	ERROR	DEF123infMaster: infMaster(%d) ERROR: TCP connection to %s %d.%d was lost	Internal communications error.	Refer to UNIX/application expert first. Check specific process log for further information. Check network for communication issues. If problem persists then contact support.	SMS
282140	ERROR	DEF123infMaster: infMaster(%d) ERROR: Database is still locked	Database lock	Refer to ORACLE/application expert first. If problem persists then contact support.	SMS
282141	ERROR	DEF123infMaster: infMaster(%d) ERROR: Users update request information callback	Internal communications error.	Refer to UNIX/application expert first. DNS server cannot resolve host name or has no route to IP address. Check IP set up on machine. If problem persists then contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282142	ERROR	DEF123infMaster: infMaster(%d) ERROR fetchNext oraResyncWrite.c@%d: ORA-1555 with no preceeding data	Internal software error.	Refer to ORACLE/application expert first. A communication/data error has occurred. Contact support for further assistance.	SMS
282143	ERROR	DEF123infMaster: infMaster(%d) ERROR logic=%d oraUpdateLoader.c@%d: Long value is expected and missing.	Internal software error.	Refer to ORACLE/application expert first. A communication/data error has occurred. Contact support for further assistance.	SMS
282144	CRITICAL	DEF123infMaster: infMaster(%d) ERROR malloc=%d oraResyncRead.pc@%d: out of memory	Insufficient memory to perform desired action due to internal software error.	Refer to UNIX/application expert first (Check the following). 1) Rogue processes consuming memory 2) Unusually large memory consumption for an individual binary. Finally contact support.	SMS
282145	ERROR	DEF123infMaster: infMaster(%d) ERROR oraRWRow=%d oraResyncWrite.c@%d: This should never happen.	Internal software error.	Contact support. No further information can be obtained.	SMS
282146	ERROR	DEF123infMaster: infMaster(%d) ERROR oraRWSetup=%d oraResyncWrite.c@%d: sleeping waiting for debugging	Information only	No resolution.	SMS
282147	ERROR	DEF123infMaster: infMaster(%d) ERROR select=%d oraEventReader.pc@%d: mangled update	Internal software error.	Refer to UNIX/application/LAN expert first. Check the smsMaster log on the SMP and also the updateLoader logs for further details. Contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282148	ERROR	DEF123infMaster: infMaster(%d) ERROR write oraEventReader.pc@%d: lost update, errno == %d	Internal software error.	Refer to UNIX/application/LAN expert first. Check the smsMaster log on the SMP and also the updateLoader logs for further details. Contact support.	SMS
282149	ERROR	DEF123infMaster: infMaster(%d) ERROR write=%d oraEventReader.pc@%d: zero length write	Internal software error.	Refer to UNIX/application/LAN expert first. Check the smsMaster log on the SMP and also the updateLoader logs for further details. Contact support.	SMS
282150	ERROR	DEF123infMaster: infMaster(%d) ERROR: Column %s %d.%s %d not found in configuration.	Replication system error	Refer to ORACLE/application expert first. Likely cause is that an error occurred in the configuration of replication which has caused the smsMaster to send an update to an updateLoader that can not cater for it. 1)Check the configuration of the node in the SMS screens and also the node ID specified in the startup script for the updateLoader. 2)Warning - any change to the replication configuration for a given node will cause that node to resync which may not be desirable. 3)Finally contact support	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282151	ERROR	DEF123infMaster: infMaster(%d) ERROR: Error transferring to primary node 0xZZZ	Replication system error	Refer to UNIX/application expert first. Check the following 1)Is this the first time that the node in question has been replicated to? 2)Is the target machine available - on the network for FTP access? 3)Does the smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected, if the replication.config file on the target machine differs to the one on the SMP. 6)Finally contact support.	SMS
282152	ERROR	DEF123infMaster: infMaster(%d) ERROR: Error transferring to secondary node 0xZZZ	Replication system error	Refer to UNIX/application expert first. Check the following 1)Is this the first time that the node in question has been replicated to? 2)Is the target machine available - on the network for FTP access? 3)Does the smf_oper user have file transfer rights to the destination machine? 4) If this is not a new node to replication a resync may have be started once the initial error is corrected, if the replication.config file on the target machine differs to the one on the SMP. 6)Finally contact support.	SMS

Alarm	Severity	Text	Cause	Resolution	Service
282153	ERROR	DEF123infMaster: infMaster(%d) ERROR: Failed to connect to Oracle	Cannot connect to ORACLE.	Refer to ORACLE/application expert first (Check the following). 1) Verify that ORACLE is running through checking the status of the listener(lsnrctl) and restart ORACLE only if necessary. 2) Check the environment variables and/or configuration files: ORACLE_SID(environment), tnsnames.ora(configuration file), listener.ora(configuration file). 3) Verify that the username and password for the current machine is correct. 4) Observe startup output for errors. Finally contact support.	SMS
282154	ERROR	DEF123infMaster: infMaster(%d) ERROR: Key column %s %d.%s %d not found in configuration.	Replication system error	Refer to ORACLE/application expert first. Likely cause is that an error occurred in the configuration of replication which has caused the smsMaster to send an update to an updateLoader that can not cater for it. 1)Check the configuration of the node in the SMS screens and also the node ID specified in the startup script for the updateLoader. 2)Warning - any change to the replication configuration for a given node will cause that node to resync which may not be desirable. 3)Finally contact support	SMS

Alarm	Severity	Text	Cause	Resolution	Service
