This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Release Overview

This document contains the release notes for XBRⁱ 10.8.2 release. These release notes cover new features and known and resolved issues for this version. This maintenance release must be used for all customers who are new or upgrading from the legacy XBR application for both the Retail & Grocery and Food & Beverage segments. It is also strongly recommended that all customers in the project implementation stages move to this release prior to production. If you have further questions, please contact product management.

Release version	Release Date
10.8.2	09/2017

New Features

New Look and Feel to Visual Insights (VI) Module

There is an updated look-and-feel that modernizes the appearance of Visual Insights to provide an improved user experience.

- Dynamic Links - you can create dynamic links to external content in a Grid visualization. For details, in the XBRi online help, see Dynamic links in a Grid visualization.
- Combine Dashboards - You can now import multiple dashboards or reports to a dashboard as new sheets, while retaining the original formatting. This feature allows you to quickly and easily share dashboards and reports. For steps, in the XBRi online help, see Importing multiple dashboards or reports into a dashboard.
- Graph Value Options - you can now specify values outside the minimum and maximum value range to maintain a consistent scale over time, even if the data is republished and the minimum and maximum values change. For more information, see the Axis Scale's Custom option under Data Exploration options.

Attribute Thresholds

You can add thresholds to attributes in visualizations, allowing you to apply conditional formatting across headers. When applying a threshold to a parent attribute, the conditional formatting is applied at level of the visualization. For details, in the XBRi online help, see Adding or removing a threshold in a visualization for dashboards.

Document Enhancements

- HTML5 widgets in documents now have a preference menu for the Heat Map and Network widgets, which allows you to further customize widgets within documents. For details, in the XBRi online help, see Providing analysis and interactivity: Widgets.

Security Patches

Any identified security risk areas have been addressed through these updates.

Supported Platforms

The XBRⁱ version 10.8.2 release is supported on the following platforms:

Supported Platforms

Category	Platform	Comments
DBMS	MS SQL Server 2008, 2012 Oracle 10g, 11g, 12c

Firefox		Version 56.0
Google Chrome		Version 61.0
Mobile Devices (XBR Ingenium mobile)		Comments
Apple iPad		iOS9, iOS10,

Key Known Issues

Category	Reference #	Description
History Lists, Alerts, File and Printer Subscriptions	XCS-6649	<p>After 10.8.1 to 10.8.2 backport, History Lists and Alerts are deleted and File and Print Subscriptions are not supported</p> <ul style="list-style-type: none">• When you upgrade from XBRⁱ 10.8.1 to 10.8.2, all existing History Lists are deleted, therefore, if you attempt to open a report from a history list, the report will not run. You must run subscriptions again to re-populate the history lists.• When you upgrade from XBRⁱ 10.8.1 to 10.8.2, all existing Alerts are deleted therefore, if you attempt to open an Alert from the Alerts page, the alert will not run. You must run subscriptions again to re-populate the Alerts page.• XBRⁱ 10.8.2 does not support File and Printer subscriptions. It is recommended that users unsubscribe from File and Printer Subscriptions prior to upgrading.
MFD – Dynamic Address Lists	XCS-6648	<p>If you created Dynamic Address Lists before upgrading to 10.8.2, you will need to re-create them with different names, and re-apply to your subscriptions.</p>
