This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

The Oracle Hospitality Payment Gateway Services provide a payment card processing solution that integrates with the Oracle Hospitality Point-of-Sale (POS) and the Oracle Hospitality OPERA systems.

Purpose

These Release Notes provide a brief overview of additions, enhancements, and corrections implemented in this software release. Their intent is informative, not instructional.

Audience

This document is intended for the Oracle Hospitality Payment Gateway Services customer.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

https://support.oracle.com

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Documentation

Oracle Hospitality product documentation is available on the Oracle Help Center at http://docs.oracle.com/en/industries/hospitality/

Revision History

Date	Description of Change
January 2016	Initial Release

1 Features and Updates

This section lists the new features and updates in this release.

- The application now supports Java 8.
- In the United States, this release supports credit card payment processing through Merchant Link for Oracle Hospitality Point-of-Sale (POS) customers.
- In the United Kingdom, this release supports contactless feature for Barclay Card merchants.
- This release supports credit card payment processing for Food & Beverage Quick Service Restaurant functionality through FirstData integration
- In Korea, you can integrate the KICC payment processing solution with the Oracle Hospitality RES 3700 Point-of-Sale.
- In the United States when integrating with Elavon and an Oracle Hospitality Point-of-Sale, you can now use multi-token transaction processing, EMV chip cards, and PINs for debt card transactions.

Unless otherwise noted, the supported Oracle Hospitality POS systems include:

- Oracle Hospitality Simphony
- Oracle Hospitality Simphony First Edition
- Oracle Hospitality 9700
- Oracle Hospitality RES 3700

2 Resolved Issues

This section provides a brief overview of resolved issues in this software release.

Clarify #	ID	Description
	825	Elevon merchants can now save transactions offline. This enables the transactions to send and process automatically when the system connects back online.
17146424	789	In the Australia region, if you are using a CBA solution and processing a Pay Only transaction, when the Ingencio device does not respond the Oracle Hospitality OPERA PMS and MPG systems now reject the transaction.
	535	In the Australia region, when using Travelex, the End-of-Day report and the Exception Report now print correctly.
16906740	533	Ecommerce integrations using the Global Collect payment provider and Oracle Hospitality OPERA PMS, can now reverse a transaction.
	528	For the Planet Payment integrations, the China UnionPay transactions using a Verifone Vx680 PINPAD can now process the payment and the tip amount posts on the Oracle Hospitality POS check.
	526	In Hong Kong, integrations using the Planet Payment solution can now print the receipt from the Oracle Hospitality POS.
