Preface

1.1. Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2. Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3. Access to OFSS Support

<https://support.us.oracle.com>

1.4. Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual

Introduction provides brief information on the overall functionality covered in the User Manual

Chapters are dedicated to individual transactions and its details, covered in the User Manual

1.5. Related Information Sources

For more information on Oracle FLEXCUBE Core Banking Release 5.2.0.0.0, refer to the following documents:

- Oracle FLEXCUBE Core Banking Licensing Guide

Customer Information Capture

Oracle FLEXCUBE supports capture of customer details at a global level. The CIF module encompasses the whole process of adding a new customer to the bank's customer base, subsequent maintenance of their details and cross-references between the customer and their accounts in the bank.

8053 - Customer Addition

Using this option you can add the details of a new customer to the customer information database. A customer can be added to the system while initiating to open an account, or even before opening an account.

During the process of account opening, the system validates to check if the customer is new or an existing customer. If the given details of the customer do not meet the search criteria, the system prompts the teller stating that 'It is a new customer' and displays this option.

The system also restricts the teller from operating the account of a customer, who is a staff of the bank for security reasons.

Definition Prerequisites

- CIM01 - Signature Types Maintenance
- CIM02 - Business Type Maintenance
- CIM03 - Customer Prefixes Maintenance
- CIM04 - Profession Codes Maintenance
- CIM08 - Customer Types Maintenance
- BAM75 - State Codes Maintenance
- BAM72 - Customer City Maintenance

Modes Available

Not Applicable

To add a new customer

1. Type the fast path **8053** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Addition**.
2. The system displays the **Customer Addition** screen.

Customer Addition

Field Description

Field Name	Description
Home Branch	[Mandatory, Drop-Down] Select the home branch of the customer from the drop-down list. It is defaulted to the branch code of the user who is logged in.
Customer IC	[Mandatory, Alphanumeric, 30] Type the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC. In countries where there is no concept of unique identification criteria, this can be configured to be auto-generated.

Field Name	Description
Category	<p>[Mandatory, Drop-Down]</p> <p>Select the category of the customer from the drop-down list.</p> <p>For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using the Customer Types Maintenance (Fast Path: CIM08) option.</p> <p>Further processing such as tax applicable, Service Charges, etc., are levied based on the customer type.</p>
CIF Type	<p>[Mandatory, Drop-Down]</p> <p>Select the type of registered entity from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer • Prospect
IC Type	<p>[Display]</p> <p>This field displays the IC type of the customer, based on the option selected in the Category field.</p> <p>An IC type is internally linked to every customer category/customer type. This field is displayed when the category is selected for the customer.</p>
Language	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate language from the drop-down list.</p> <p>It is the language in which the bank would interact with the customer.</p>
Customer ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Full Name	<p>[Conditional, Alphanumeric,100]</p> <p>Type the full name of the corporate customer.</p> <p>For Individual customer, this will be disabled and will be a concatenation of First Name, Middle Name and Last Name.</p>

Field Name	Description
Salutation	<p>[Conditional, Drop-Down]</p> <p>Select the salutation to be used for the customer from the drop-down list.</p> <p>This field is mandatory for individual customers. Various prefixes can be maintained using the Customer Prefixes Maintenance (Fast Path: CIM03) option.</p> <p>For example, Mr., Mrs., Miss, M/s, etc.</p> <p>This field is disabled and set to M/s option for corporate customers.</p>
First Name	<p>[Mandatory, Alphanumeric, 252]</p> <p>Type the first name of the customer.</p>
Middle Name	<p>[Optional, Alphanumeric, 252]</p> <p>Type the middle name of the customer.</p>
Last Name	<p>[Optional, Alphanumeric, 252]</p> <p>Type the last name of the customer.</p>
Short Name	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the short name of the customer.</p> <p>The short name is defaulted when the user enters the full name of the customer. The user can modify it, if required.</p> <p>The full name as well as the short name will be displayed in capital letters only, even if it is entered in small letters.</p>
Address	<p>[Mandatory, Alphanumeric, 35]</p> <p>Type the address of the customer.</p> <p>It has 3 lines for the address. It accepts character, numbers and "#" as special character.</p>
Town/City	<p>[Mandatory, Drop-Down]</p> <p>Select the name of the town or city, where the customer resides, from the drop-down list.</p> <p>This can be configured to be optional, if the bank so desires.</p>
State	<p>[Mandatory, Drop-Down]</p> <p>Select the name of the state, where the customer resides, from the drop-down list.</p>
Country	<p>[Mandatory, Drop-Down]</p> <p>Select the name of the country, where the customer resides, from the drop-down list.</p>
Nationality	<p>[Mandatory, Drop-Down]</p> <p>Select the nationality of the customer from the drop-down list.</p>

Field Name	Description
Country of Residence	[Mandatory, Drop-Down] Select the customer's country of residence from the drop-down list.
Zip	[Mandatory, Alphanumeric, 10] Type the zip code of the city where the customer resides.
Birth/Reg Date	[Mandatory, Pick List, dd/mm/yyyy] Select the birth date in case of the individual customer or the registration date in case of a corporate customer. Based on the details entered in this field the system identifies a customer as a major or a minor.
Resi Phone No	[Mandatory, Numeric, Three, Five, 20] Type the residence contact number of the customer.
Customer Education	[Conditional, Drop-Down] Select the education of the customer from the drop-down list. This field is disabled for corporate type of customer.
Mobile No	[Optional, Numeric, 20] Type the mobile number of the customer.
Email ID	[Optional, Alphanumeric, 40] Type the email address of the customer.
Gender	[Conditional, Drop-Down] Select the gender of the individual customer from the drop-down list. This field is disabled for corporate type of customer.
Marital Status	[Conditional, Drop-Down] Select the marital status of the individual customer from the drop-down list. This field is disabled for corporate type of customer.
Staff	[Conditional, Check Box] Select the Staff check box, if the customer is a staff of the bank. This field is disabled for corporate type of customer.
Employee Id	[Conditional, Alphanumeric, Six] Type the employee id of the bank staff. This field is enabled if the Staff check box is selected.

Field Name	Description
Business	<p>[Conditional, Pick List]</p> <p>Select the business of the corporate customer from the pick list.</p> <p>The values displayed in the option are the business segments to which the customer's belong. Each business type is defined in the Business Type Maintenance (Fast Path: CIM02) option.</p> <p>This field is disabled for individual type of customer.</p>
Profession	<p>[Conditional, Drop-Down]</p> <p>Select the profession of the customer from the drop-down list.</p> <p>The profession codes are maintained in the Profession Codes Maintenance (Fast Path: CIM04) option.</p> <p>This field is disabled for corporate type of customer.</p>
Mother Maiden's Name	<p>[Conditional, Alphanumeric, 252]</p> <p>Type the mother maiden's name.</p> <p>This field is enabled for individual customers.</p>

3. Enter the customer IC and select the category from the drop-down list.
4. Click the **Val. Customer** button. The system will validate the existence of the customer using the above combination.
5. The system displays the message "This is a new Customer". Click the **OK** button.
OR
The system displays the message "This is an existing Customer". The system will disable the addition process.
6. Enter the contact details, address details, and the personal information of the customer.

7. Click the **Ok** button.
8. The system displays the unique customer identification number. Click the **Ok** button.
9. The system displays the message " Do you want to continue with Customer Document Maintenance? ". Click the **Ok** button.
10. The system displays the **Customer Document Maintenance** (Fast Path: CHM52) option. For more details, refer to this option in the **Customer Information User Manual**.

CI501- Assisted Customer Creation

Using this option you can add the details of a new customer or a prospect. A customer can be added to the system at the time of account opening, or before it. During the process of account opening, the system validates to check if the customer is new or an existing customer.

You can also perform a CRM search using this option. The detail of the customer added in Oracle FLEXCUBE is also updated in CRM.

Note: The validations provided in this option are based on **Oracle FLEXCUBE**.

Definition Prerequisites

Not Applicable

Modes Available

Not Applicable

To add a new customer

1. Type the fast path **CI501** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Assisted Customer Creation**.
2. The system displays the **Assisted Customer Creation** screen.

Assisted Customer Creation

Field Description

Field Name	Description
Customer Search	
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria, to search for the customer, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer name • Customer ID- Unique identification given by the bank.

Address Details

Field Description

Field Name	Description
Address	[Mandatory, Alphanumeric, 35, Three Lines] Type the address of the customer. It has three lines for the address. It accepts character, numbers and "#" as special character.
State	[Mandatory, Drop-Down] Select the name of the state, where the customer resides, from the drop-down list.
Town/City	[Mandatory, Drop-Down] Select the name of the town or city, where the customer resides, from the drop-down list. This can be configured to be optional, if the bank so desires.
Country	[Mandatory, Drop-Down] Select the name of the country, where the customer resides, from the drop-down list.
Country Of Residence	[Mandatory, Drop-Down] Select the name of the country where the customer resides, where the customer resides, from the drop-down list.

Field Name	Description
Postal Code	[Mandatory, Numeric, 10] Type the postal code of the customer.
Phone(Resi)	[Mandatory, Numeric, 24] Type the residence phone number of the customer.
Mobile	[Optional, Numeric, 10] Type the mobile number of the customer.

7. Click the **Ok** button.
8. The system displays the message "Transaction Completed successfully". Click the **Ok** button.

CIM09 - Customer Information Master Maintenance

Using this option basic information of a customer can be maintained. Information such as the customer's mailing address, permanent address, corporate information, etc., can be captured.

This back-office maintenance allows for maintenance of additional customer information apart from the basic customer information added during customer addition. Since the customer addition is done as a separate transaction, the Add mode will be disabled in this option.

Definition Prerequisites

- 8053 - Customer Addition
- CIM06 - Income Slabs Maintenance
- CIM07 - Relation Master Maintenance
- BAM03 - Branch Master Maintenance

Modes Available

Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To modify the customer information master details

1. Type the fast path **CIM09** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Information Master Maintenance**.
2. The system displays the **Customer Information Master Maintenance** screen.

Customer Information Master Maintenance

Field Description

Field Name	Description
Search Criteria	[Mandatory, Drop-Down] Select the search criteria, to search for the customer, from the drop-down list. The options are: <ul style="list-style-type: none"> • Customer Short Name • Customer IC - Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID - Unique identification given by the bank.

Field Name	Description
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Home Branch	<p>[Display]</p> <p>This field displays the branch, where the customer's account is maintained.</p> <p>It is maintained in the Branch Master Maintenance (Fast Path: BAM03) option.</p>
Full Name	<p>[Display]</p> <p>This field displays the full name of the customer.</p> <p>The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p>
Short Name	<p>[Display]</p> <p>This field displays the short name of the customer.</p> <p>The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p> <p>The customer short name can be changed through the Change Customer Name/IC Number (Fast path: 7101) option.</p>

CIM09 - Customer Information Master Maintenance

3. Click the **Modify** button.
4. Select the search criteria from the drop-down list.
5. Type the search string, press the **<Tab>** key.
6. The system displays a list of customer's that match the search criterion.
7. Select the customer from the pick list. The customer details are displayed in the screen.

Customer Information Master Maintenance

The screenshot displays the 'Customer Information Master Maintenance' window. At the top, the search criteria is set to 'Customer Short Name' with a search string of 'Man'. The customer details shown are: IC: ECSTEST001, ID: 100000048, Home Branch: 9999-ORACLE DEMO BANK, Full Name: MANMEET S KOHLI, and Short Name: MANMEET S KOHLI. The window is divided into several tabs: 'Basic Information', 'Mailing Address', 'Permanent/Registration Address', 'Hold Mail Address', 'Corporate Customer Info', and 'Other Details'. The 'Basic Information' tab is active, showing fields for CIF Type (Customer), Salutation (Mr), First-name (MANMEET), Mid-name (S), Last-name (KOHLI), Conversion Date (01/01/1800), IC Details (Category: INDIVIDUALS, IC Type: Identity Card Number, Current IC No: ECSTEST001), Report Group (1, 2, 3), Guardian Type (No Guardian), Default Act No., Customer Status (Regular), CRIF Consent Level (One), Reason, Date of Verification (01/01/1800), Fx Customer Category (Z), and various checkboxes for Staff, Member, and Verification. The 'Record Details' section at the bottom shows the input by 'TMANMEET9999', authorized by 'SYSTEM', last maintenance date '21/07/2014 16:10:22', and last maintenance action 'Authorize'. The window includes a 'Remarks' field and a 'Record Details' section with buttons for 'Add By Copy', 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', and 'Inquiry'. The bottom right corner has buttons for 'UDF', 'Ok', 'Close', and 'Clear'.

8. Modify the relevant information in the various tabs.

Basic Information

Field Description

Field Name	Description
CIF Type	[Conditional, Drop-Down] Select the Customer option to convert a prospect into a customer. This field is disabled in case of an existing customer.
Conversion Date	[Conditional, Pick List] Select the Conversion Date from the pick list. It is the date on which the prospective customer is converted into an existing customer. This field is enabled only if the CIF type is Prospect.
Salutation	[Display] This field displays the salutation of the customer. It is defaulted from the Customer Addition (Fast Path: 8053) option.
First-name	[Display] This field displays the first name of the customer.

Field Name	Description
Mid-name	[Display] This field displays the middle name of the customer.
Last-name	[Display] This field displays the last name of the customer.
Special Customer	[Optional, Check Box] Select the Special Customer check box if the customer belongs to special category. User templates having restricted access to transactions, adhoc report inquiries / generation can be defined for special category customers in the Template Profile Maintenance (Fast Path: SMM01) option.
Staff	[Conditional, Check Box] Select this check box if the customer is a staff member of the bank. This field is enabled if the Staff option is selected from the Category drop-down list in the Customer Addition (Fast Path: 8053) option.
Global	[Optional, Check Box] Select the Global check box, if the customer has to be replicated to FLEXCUBE Corporate Module . The CL Tracking Details tab will be enabled only if this check box is selected.
Member	[Optional, Check Box] Select the Member check box, if the customer is a member of any association or club.
Keep In Office	[Optional, Check Box] Select the Keep In Office check box, if the customer wants to direct the bank to hold his mails/statements in the home branch. The Keep In Office option allows the customer to direct his correspondence with the bank to be held in the home branch. If the Keep In Office check box is selected, in the Modify mode the Hold Mail Address tab is displayed with the alternate address. This address cannot be modified. By default, the system displays the home branch address as the hold mail address.
Membership No	[Conditional, Alphanumeric, 20] Type the membership number of the customer if he is a member of any association or club. This field is enabled only if the Member check box is selected.

Field Name	Description
Report Group	<p>[Optional, Drop-Down]</p> <p>Select the report group, to which the customer belongs, from the drop-down list. There could be a maximum of three report groups to which a customer can belong.</p> <p>This is provided for information only and has no processing implications.</p>
Income Tax No	<p>[Optional, Alphanumeric, 20]</p> <p>Type the identification number of the customer provided by the Income Tax Department for the purpose of tracking tax liabilities.</p>
Officer Id	<p>[Optional, Drop-Down]</p> <p>Select the Officer Id from the drop-down list.</p> <p>It is the ID of the officer, who entered the customer details or the ID of the relationship manager who has been assigned to the customer.</p>
Language	<p>[Mandatory, Drop-Down]</p> <p>Select the language from the drop-down list.</p> <p>It is the customer's preferred language while communicating with the bank.</p>
Guardian Type	<p>[Display]</p> <p>This field displays the type of the guardian.</p> <p>A guardian is required when the customer is a minor.</p> <p>The options are:</p> <ul style="list-style-type: none"> • No Guardian - The system displays this option when the customer does not have a guardian. By default, the system displays this option when the customer is a major. • Natural Guardian - The system displays this option when the parents of the customer are his guardians. • Legal Guardian - The system displays this option when the guardians of the customer are guardians by law
Employee ID	<p>[Optional, Alphanumeric, 16]</p> <p>Type the employee ID of the customer, if the customer is a staff of the bank.</p>
Default Acct No	<p>[Optional, Alphanumeric, 16]</p> <p>Type the customer's default account number.</p>
Employer Code	<p>[Optional, Pick List]</p> <p>Select the employer code from the pick list. The employer name is displayed in the adjacent field.</p> <p>These codes are maintained using the Company Master Maintenance (Fast Path: BAM81) option.</p>

Field Name	Description
Minor Status	[Display] This check box indicates whether the customer is a minor.
Restricted	[Display] This field displays whether the customer is a restricted customer or not. This is maintained in the Customer Account Restriction option (Fast Path: CIM21). Only tellers with suitable capability will be able to inquire and post transactions into restricted accounts. Normal tellers will not be able to transact on the account.
Customer Status	[Display] This field displays the customer status.
Secrecy level	[Optional, Drop-Down] Select the level of secrecy of the customer information from the drop-down list. It ranges from 1 to 6 and can be customized as per customer requirement.
CRIF Consent Level	[Optional, Drop-down] Select the CRIF Consent Level from the drop-down list. It is the level of consent given by the customer to the bank with regards to sharing his information with the third parties.
Customer Block Status	[Display] This check box displays whether the customer is blocked for transaction.
Reason	[Display] This field displays the reason for the customer block.
Verification Status	[Optional, Check Box] Select the Verification Status check box to indicate confirmation of the verification for the customer.
Date of Verification	[Display] This field displays the date on which the customer status is verified.
Reason for Verification	[Optional, Drop-Down] Select the reason for the status verification from the drop-down list.

Field Name	Description
Fx Customer Category	<p>[Mandatory, Drop-Down]</p> <p>Select the category of the Fx customer from the drop-down list.</p> <p>By default system displays the value as Z as the Fx customer category which is defaulted at the time of customer addition. The Z customer category is considered as the worst FX customer category.</p> <p>The customer category is used for grading and rate calculation purpose. The value in this field is defined at the back end as part of Day 0 setup.</p>
Spend Analysis	<p>[Optional, Check Box]</p> <p>Select the Spend Analysis check box, to enable spend analysis for all the accounts under the customer.</p> <p>By default it is un-selected.</p>
IC Details	
Category	<p>[Display]</p> <p>This field displays the category of the customer.</p> <p>For example, Tax Paying Individual, Church, Foreign Corporate, etc. You can choose to set up multiple customer types to segregate the customers using the Customer Types Maintenance (Fast Path: CIM08) option.</p> <p>Further processing such as tax applicable, Service Charges, etc., are levied based on the customer type.</p>
IC Type	<p>[Display]</p> <p>This field displays the IC type of the customer, based on the category to which the customer belongs.</p> <p>This is maintained in the Customer Types Maintenance (Fast Path: CIM08) option.</p>
Current IC No	<p>[Display]</p> <p>This field displays the current IC number of the customer.</p>
Old IC No	<p>[Display]</p> <p>This field displays the old IC number of the customer, if any.</p>

Mailing Address

This is the address to which customer's account statements are mailed. At the CASA Account level, it is possible to indicate if the statements are to be sent to Customer level address or Account level address or both. The system, by default displays the address mentioned in the **Customer Addition** option (Fast Path: 8053).

To modify the mailing address of the customer, the following details are captured:

The screenshot displays the 'Customer Information Master Maintenance' window with the 'Mailing Address' tab selected. The form contains the following data:

- Search Criteria:** Customer Short Name, Search String: a
- IC:** 234167, **ID:** 605835, **Home Branch:**

CL Tracking Details

The CL Tracking Details tab enables the bank to maintain the customer central liability information. The central liability (CL) tracking is done in **FLEXCUBE Corporate**. A sequence of actions needs to be performed to define the Central Liability enable it to be effective.

When a customer is not a part of a group, the group level limits such as FX-Clean Risk Limit, Secured Clean Risk Limit, Secured PSTL Risk Limit, etc., are same as that of customer level limits such as Customer FX-Clean Risk Limit, Customer Secured Clean Risk Limit, Customer Secured PSTL Risk Limit, etc.

When the customer is a part of a group, then the liability number selected/entered should be the group liability number. For example, Customer A and Customer B belong to group Z. In this case, all the three customers, including the group, are defined as separate customers in **FLEXCUBE Retail**, each having its own **FLEXCUBE** Customer ID. When defining group Z, the group level limits are defined and customer level limits are unassigned. However when defining customer's A or B, the **FLEXCUBE** Customer ID of group Z is entered as liability number and the customer level such as Customer FX-Clean Risk Limit, Customer Secured Clean Risk Limit, Customer Secured PSTL Risk Limit, etc., are to be entered. The system automatically displays the FX-Clean Risk Limit, Secured Clean Risk Limit, Secured PSTL Risk Limit, etc., of group.

The screenshot displays the Oracle Customer Information Master Maintenance application window. The title bar reads "Customer Information Master Maintenance". The search criteria are set to "Customer Short Name" with a search string of "Edward". The customer details shown are: IC: 121212112, ID: 604940, Home Branch: HO, Full Name: EDWARD CULLENS, and Short Name: EDWARD CULLENS.

The "CL Tracking Details" tab is active, showing various risk limits and dates. The fields are as follows:

Liability Number:	604940	Credit Rating:	
Revision Date:	01/01/2009		
Total Limit Amount:	12,500	Limit Currency:	INR
FX-Clean Risk Limit:	10,000	Customer - Fx Clean Risk Limit:	10,000
Secured Clean Risk Limit:	10,000	Customer - Secured Clean Risk Limit:	10,000
Secured PSTL Risk Limit:	1,000	Customer - Secured PSTL Risk Limit:	0
AFL Issuance Date:	01/01/2008	AFL Expiry Date:	01/01/2009
AFL Effective Date:	01/01/2008	Last Renewal Date:	01/01/2009
Unadvised:	<input checked="" type="checkbox"/>	Documentation Complete:	<input checked="" type="checkbox"/>

At the bottom, the "Record Details" section shows: Input By: TKATDARE, Authorized By: SYSTEM, Last Mnt. Date: 16/11/2009 13:23:24, Last Mnt. Action: Authorize, and Authorized: . The bottom toolbar includes buttons for Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, Ok, Close, and Clear.

Field Description

Field Name	Description
Liability Number	<p>[Display]</p> <p>This field displays the Customer ID of the customer as the Liability Number.</p> <p>If the customer is a part of a group, then the parent Customer ID would be needed to be selected from the pick list.</p> <p>Even after replication of the customer, in the modify mode the system would allow the user to change the liability ID to any other customer ID.</p>
Credit Rating	<p>[Optional, Alphanumeric, 45]</p> <p>Type the credit rating assigned to the customer as per the banks rating scale.</p>
Revision Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>This field displays the date on which the credit limits set for the customer will be revised.</p>
Total Limit Amount	<p>[Mandatory, Numeric, 11, Two]</p> <p>Type the overall limit assigned to a group or customer.</p> <p>Though the total of each sub-limit to be defined can be greater than this value, each of the sub-limits cannot exceed this value.</p>
Limit Currency	<p>[Mandatory, Drop-Down]</p> <p>Select the currency in which the limit amounts are being defined from the drop-down list.</p> <p>By default the local currency is the limit currency.</p>
FX-Clean Risk Limit	<p>[Mandatory, Numeric, 9, Two]</p> <p>Type the unsecured foreign exchange limit available for the group or customer.</p>
Customer - Fx Clean Risk Limit	<p>[Mandatory, Numeric, 9, Two]</p> <p>Type the unsecured foreign exchange limit available to a customer.</p> <p>If the customer is a part of a group, then this limit has to be less than or equal to FX-Clean Risk Limit.</p>
Secured Clean Risk Limit	<p>[Mandatory, Numeric, 9, Two]</p> <p>Type the secured clean risk limit available on the group or customer.</p>
Customer - Secured Clean Risk Limit	<p>[Mandatory, Numeric, 9, Two]</p> <p>Type the secured clean risk limit available to the customer.</p> <p>If the customer is a part of a group, then this limit has to be less than or equal to Secured Clean Risk Limit.</p>

Field Name	Description
Secured PSTL Risk Limit	[Mandatory, Numeric, 9, Two] Type the secured pre-settlement risk limit (PSTL) available on the group or customer.
Customer - Secured PSTL Risk Limit	[Mandatory, Numeric, 9, Two] Type the secured pre-settlement risk limit (PSTL) available on the customer. If the customer is a part of a group, then this limit has to be less than or equal to Secured PSTL Risk Limit.
AFL Issuance Date	[Mandatory, Pick List, dd/mm/yyyy] Select the AFL Issuance date from the pick list.
AFL Expiry Date	[Mandatory, Pick List, dd/mm/yyyy] Select the AFL Expiry date from the pick list.
AFL Effective Date	[Mandatory, Pick List, dd/mm/yyyy] Select the AFL Effective date from the pick list.
Last Renewal Date	[Mandatory, Pick List, dd/mm/yyyy] Select the last renewal date from the pick list.
Unadvised	[Optional, Check Box] Select the Unadvised check box, if all limit facilities to a customer across FLEXCUBE has been suspended and any credit that is to be forwarded to the customer has to be under authorisation.
Documentation Complete	[Optional, Check Box] Select the Documentation Complete check box, if all the documents have been received.

Customer MIS Info

This screen enables the user to link MIS codes at the customer level.

The screenshot shows the 'Customer Information Master Maintenance' window. At the top, there is a search section with 'Search Criteria' set to 'Customer Short Name' and a 'Search String' of 'Edward'. Below this, customer details are displayed: IC: 121212112, ID: 604940, Home Branch: HO, Full Name: EDWARD CULLENS, and Short Name: EDWARD CULLENS. A series of tabs are visible, with 'Customer MIS Info' selected. The main area contains a table with 10 rows for linking MIS codes. Each row has a 'MIS Class' field and a 'MIS Code' dropdown menu, all currently set to '(None)'. A 'Kiros operacijas' section with 'User Defined Fields' is also present. At the bottom, a 'Record Details' section shows 'Input By: TKATDARE', 'Authorized By: SYSTEM', 'Last Mnt. Date: 16/11/2009 13:23:24', 'Last Mnt. Action: Authorize', and 'Authorized: [checked]'. The bottom bar includes buttons for 'Add', 'Modify', 'Delete', 'Cancel', 'Amend', 'Authorize', 'Inquiry', 'Ok', 'Close', and 'Clear'.

12. The customer information details are modified once the record is authorized.

CIM11 - Customer Detail Maintenance

Using this option you can maintain additional data for individual customer. The background information of the customer such as their employment details and relationship details can be captured in this option.

These details, though not mandatory, are in addition to the ones which have been maintained in the **Customer Master Maintenance** (Fast Path: CIM09) option.

Definition Prerequisites

- BAM03 - Branch Master Maintenance
- CIM04 - Profession Codes Maintenance
- 8053 - Customer Addition
- 7101 - IC No - Short Name Change

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer details

1. Type the fast path **CIM11** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Detail Maintenance**.
2. The system displays the **Customer Detail Maintenance** screen.

Customer Detail Maintenance

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria, to search for the customer, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer short name • Customer IC - Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID - Unique identification given by the bank.

Field Name	Description
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Home Branch	<p>[Display]</p> <p>This field displays the branch, where the customer's account is opened.</p> <p>It is maintained in the Branch Master Maintenance (Fast Path: BAM03) option.</p>
Full name	<p>[Display]</p> <p>This field displays the full name of the customer.</p> <p>The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p>
Short Name	<p>[Display]</p> <p>This field displays the short name of the customer.</p> <p>The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p> <p>The customer short name can be changed through the Change Customer Name/IC Number (Fast Path: 7101) option.</p>

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Enter the search string and press the **<Tab>** key and select it from the pick list.

Customer Detail Maintenance

The screenshot shows the 'Customer Detail Maintenance' application window. At the top, there are search criteria: 'Customer Short Name' selected from a dropdown, and a search string 'v'. Below this, fields for IC (452462525), ID (601127), and Home Branch (9999) are visible. The full name 'VIGNESH RAMAN' and short name 'VIGNESH RAMAN' are also displayed. The 'Employment Details' tab is active, showing fields for Occupation, Designation, and Tenure (set to 'Permanent'). Below this is the 'Employer/Business Detail' section with fields for Name, Address, City, State, Country, Postal code, Phone, Telex No, Fax No, Mobile, Email ID, Number of years in present Employment/Business (0), and Retirement age (0). At the bottom, there is a 'Record Details' section with fields for Input By, Authorized By, Last Mnt. Date, Last Mnt. Action, and Authorized. The bottom of the window features a toolbar with buttons for Add, Modify, Delete, Cancel, Amend, Authorize, and Inquiry, along with OK, Close, and Clear buttons.

6. Enter the relevant information in the various tabs.

Search String	<p>[Mandatory, Alphanumeric, 20, Pick List]</p> <p>Enter the search string to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the criterion is specified as customer's short name or IC then any of the initial letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters at the start in their respective criteria. Choose the appropriate customer from the existing customer list. If the criterion is specified as Customer ID, one has to enter the complete customer ID</p> <p>For example: The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
Full Name	<p>[Display]</p> <p>This field displays the full name of the customer.</p> <p>By default the system displays the name as entered in the Customer Addition (Fast Path: 8053) option.</p>

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Enter the search string to search for the customer and press the **<Tab>** or **<Enter>** key and select the customer from the pick list. The data corresponding to the search is displayed.
6. Double-click the record to display the details.

Customer Defined Spend Class

7. Click the **Add**  button.
8. Enter the other relevant details.

Field Description

Field Name	Description
Spend Class Code	[Mandatory, Alphanumeric, 20] Enter the spend class code. This is a unique ID associated with each Customer Defined Spend Class. In case if the new class is defined through FCDB, class code is to be auto generated.

Field Name	Description
Spend Class Description	<p>[Mandatory, Alphanumeric, 120]</p> <p>Enter the description for the entered spend class code.</p> <p>This description will be displayed as the spend class on the external system (e.g. FCDB) front-end.</p>
Delete (y/n)	<p>[Optional, Toggle]</p> <p>Click the toggle status to Y to delete the field.</p> <p>The default value is N.</p>

9. Click the **OK** button. The system displays the message "Record Added.....Authorization Pending".

CIM26 - Customer Instruction Maintenance

This option allows the customer to capture multiple instructions. The user creates instructions that are displayed in customer 360 degree view in FC Core.

These instructions have to be authorized and any external systems will be given access to display them. The expired instructions can be archived.

Definition Prerequisites

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To create multiple instructions

1. Type the fast path **CIM26** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Customer Instruction Maintenance**.
2. The system displays the **Customer Instruction Maintenance** screen.

Customer Instruction Maintenance

7. Enter the relevant details in the **Instruction Details** section.

Field Description

Field Name	Description
Instruction Details	

Field Name	Description
Instruction Date	[Optional, Pick List, dd/mm/yy] Select the date on which the instruction is valid from the pick list or enter it.
Instruction Expiry Date	[Mandatory, Pick List, dd/mm/yyyy] Select the date on which the instruction is expired from the pick list or enter it.
Customer Message	[Mandatory, Alphanumeric, 4000] Enter the message to be displayed to end customer at external system portal when Show to Customer check box is selected.
Show to Customer	[Optional, Check Box] Select the Show to Customer check box to display the message to the customer otherwise message will be displayed only to bank users. By default it is not selected.

- Click the **OK** button. The system displays the message "Record added.....Authorization Pending".

CIM27 - Reminder

This option is used for setting up reminders by bank users on behalf of the customers. A single reminder can be setup having the same reminder date and expiry date. Frequency based reminders can also be defined which will generate as per the frequency specified till the reminder expiry date.

Generation of the reminders is done in beginning of day process. In case of frequency based reminders, the number of days before which the reminder should be displayed can also be specified.

Reminders displayed will have the ability to be dismissed. Once dismissed, it will no longer be displayed on the dashboard.

Reminders due for each day will be generated using a scheduler driven batch program scheduled to run every day. The generated reminders will be stored which will be accessed by external systems for retrieval and display of reminders at their end.

The Reminder instances that are expired or that got dismissed will be archived.

The following information related to Reminders is captured –

- Reminder Type
- Reminder Date
- Reminder Subject
- Reminder Message
- The user who created the Reminder
- Frequency of Reminder generation
- View days of Reminder

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To set the reminders

1. Type the fast path **CIM27** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Reminder**.
2. The system displays the **Reminder** screen.

- Click the **OK** button. The system displays the message "Record Added.....Authorization Pending".

CHM52 - Customer Document Maintenance

Using the **Document Plan Code Maintenance** (Fast Path: ORS35) option you can create a document plan code. **Oracle FLEXCUBE** allows you to attach a document plan at the customer level or at account level. The documents are attached at the customer level based on the plan code selected for a particular customer type in the **Customer Type Maintenance** (Fast Path: CIM08) option.

After a customer is added, you can capture the details of documents submitted by the customer as per bank's norms by performing document maintenance. The system tracks the mandatory documents based on the receipt date. The mandatory documents need to be marked as received. The non-mandatory documents can be marked either as received or waived.

Using this option you can maintain the document status for each customer.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To maintain document status for a customer

1. Type the fast path **CHM52** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Cash > Customer Document Maintenance**.
2. The system displays the **Customer Document Maintenance** screen.

Field Description

Field Name	Description
Serial No	[Display] This column displays the system generated serial number, based on the existing documents attached to the customer or documents in the plan.
Plan Code	[Display] This column displays the plan code. The plan codes are maintained in the Document Plan Code Maintenance (Fast Path: ORS35) option. A plan code is maintained to create a consolidated set of standard documents. Ideally banks may maintain a plan code based on the product type. Multiple documents can be maintained under a single plan code.
Name of Document	[Display] This column displays the name of the document corresponding to the serial number and the plan code.

Field Name	Description
Document Check	<p>[Display]</p> <p>This column displays the check level for the selected document as maintained in the Document Plan Code Maintenance (Fast Path: ORS35) option.</p> <p>By default it displays the value as Customer KYC.</p>
Request Purpose	<p>[Mandatory, User Input]</p> <p>This field will capture the purpose of documents requested.</p>
Date of Request	<p>[Mandatory, User Input (YYYYMMDD)]</p> <p>This field will capture the date on which the documents were requested from the customer.</p>
Provided	<p>[Optional, Check Box]</p> <p>Select the Provided check box if the documents are provided.</p>
Date Provided	<p>[Conditional mandatory (if Provided is Y), User Input (YYYYMMDD)]</p> <p>This field will capture the date on which the documents are provided by the customer.</p>
Expiry date	<p>[Optional, Pick List, YYYY/MM/DD]</p> <p>Select the date after which document will no longer be valid from the pick list.</p>
Verified	<p>[Optional, Check Box]</p> <p>Select the Verified check box if the documents are verified.</p>
Status Mode	<p>[Mandatory, Drop-Down]</p> <p>Select the status of the document from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Not Received • Received • Waive • Returned <p>For a mandatory document, the status has to be either Received or Returned.</p>
Comments/Remarks	<p>[Optional, Alphanumeric, 120]</p> <p>Any remarks/comments regarding the received documents from the customer</p>

Field Name	Description
Mandatory (Y/N)	[Display] This column displays the value as Y if the document is mandatory else N . It is the default value for each document, as maintained in the Document Plan Code Maintenance (Fast Path: ORS35) option.

6. Modify the relevant document status.
7. Click the **Ok** button.
8. The system displays the message "Record Authorized..". Click the **Ok** button.
9. The system displays the message "Transaction completed successfully..". Click the **Ok** button.

CIM29 - Conversation Preferences Maintenance

This option is used to define default user/ role to which the conversation needs to be assigned and the stale period till which closed conversations will be available in the system.

Definition Prerequisites

- SMM02 - User Profile Maintenance
- SMM04 - Class Profile Maintenance
- SMM12 - User Class Cross Reference Maintenance

Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To define the conversation preferences

1. Type the fast path **CIM29** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Others > Conversation Preferences Maintenance**.
2. The system displays the **Conversation Preferences Maintenance** screen.

TDS05 - Customer Special Tax Code Maintenance

Using this option, you can maintain special tax codes for a specified period at customer level. After changing tax codes, the additional tax 1 and additional tax 2 is applicable as maintained in the **Additional Tax Maintenance** (Fast Path: BAM51) option. The new tax codes are updated during BOD after remote authorisation. During account opening, if special tax code exists for the customer, then the special tax code will be applicable for the account.

Note 1: If special tax code has to be maintained, then tax waiver should be discontinued. Both cannot coexist.

Note 2: You can only delete the special tax codes which have not been activated.

Definition Prerequisites

- 8053 - Customer Addition
- BAM51 - Additional Tax Maintenance

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To maintain customer special tax codes

1. Type the fast path **TDS05** and click **Go** or navigate through the menus to **Global Definitions > Master > Customer Special Tax Code Maintenance**.
2. The system displays the **Customer Special Tax Code Maintenance** screen.

Customer Image Capture

The system allows the banker to capture the specimen signature and/or the photograph of customer's to facilitate the online verification process for the teller. This feature will replace the manual storage and retrieval of specimen signatures and photographs. A customer can be linked with a maximum of one signature and one photograph. In an offline scenario, these images can be retrieved from the customer's home branch.

The specimen signature and photograph of the customer is scanned and stored as a .jpeg or .jpg image. The teller can attach the scanned image to an account using the Linking Customer Image option.

7102 - Link Cust Image

Using this option the photograph and/or specimen signature of the customer can be linked to a **Oracle FLEXCUBE** customer. This feature of capturing signature and identity photograph of the customer is required by the teller to facilitate the online verification process.

This linking can be done in the online mode using the **FLEXCUBE** Customer ID or Customer IC and Customer type combination. A customer can be linked with a maximum of one signature and one photograph.

In an offline scenario, these images can be retrieved from the customer's home branch. The supervisor can authorize the photograph and signatures linked to the customer, using the **Authorise Captured Image** (Fast Path: 7104) option. The image can be viewed only after it has been authorized.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Modify Customer Image

The screenshot shows a software window titled "Modify Customer Image*" with a yellow border. Inside the window, there are several input fields and dropdown menus. The "Image Type" dropdown is set to "Signature". The "Selection Criteria" dropdown is set to "Customer ID". The "Customer IC" field is empty. The "Customer Type" dropdown is also empty. The "Customer ID" field contains the text "606099" and "EDWARD MATHEW". At the bottom of the window, there is a navigation bar with buttons for "LDF", "OK", "Close", and "Clear".

5. Click the **Ok** button.
6. The system displays the **Signature/Image** screen.

Signature/Image

7. Type the appropriate path for the image file or click the **Browse** button to select the image file. The system will display the image to be linked.
8. Click the **Ok** button.
9. The system displays the message "Image Linked Successfully. Authorization Pending". Click the **Ok** button.
10. The modified image is linked to the account successfully once the record is authorized.

3000 - Thumb Print Interface

Using this option you can verify the thumbprint of the customer. It is an interface with the thumbprint application online and displays whether the verification is successful or not.

It will also display the customer ID and all the accounts linked to the customer ID. Once the account in which the customer wants to perform transaction is selected, you can navigate to that particular screen, and the details of the account number are displayed in the subsequent screen.

Definition Prerequisites

- 8053 - Customer Addition

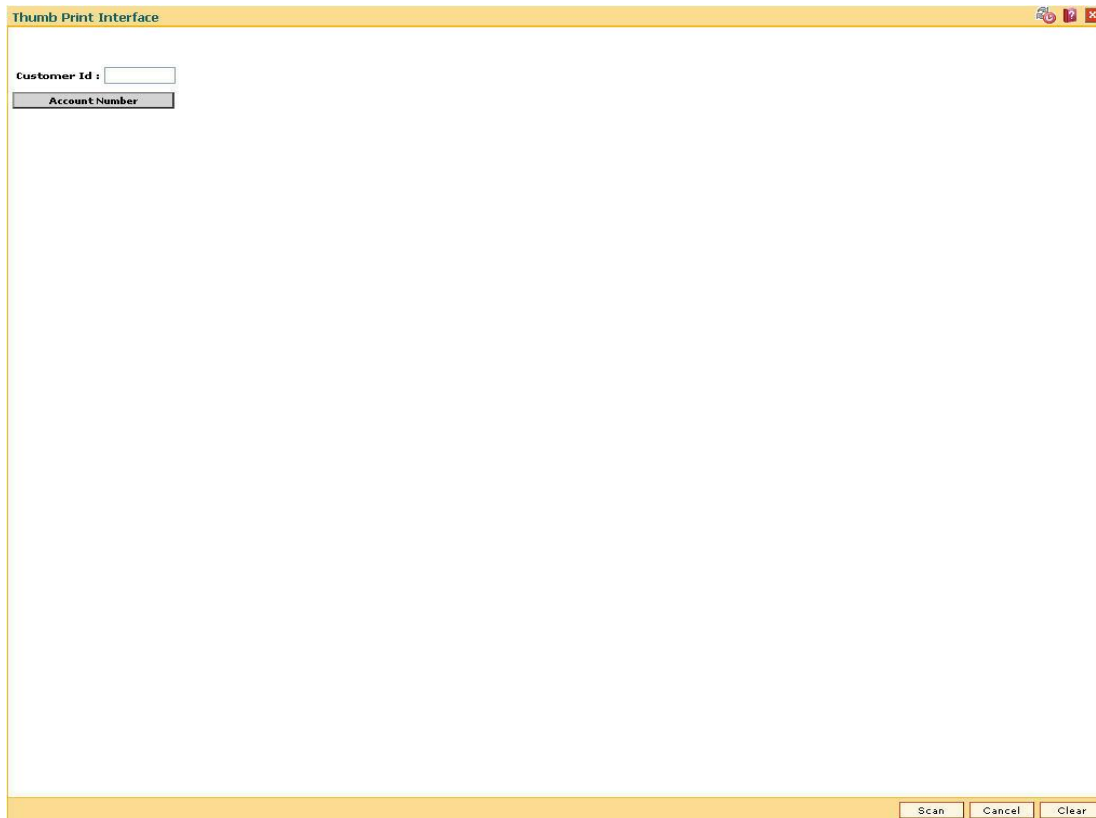

Modes Available

Not Applicable

To verify the thumb print

1. Type the fast path **3000** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Thumb Print Interface**.
2. The system displays the **Thumb Print Interface** screen.

Thumb Print Interface

The screenshot shows a web browser window titled "Thumb Print Interface". The window has a yellow border. Inside, there are two input fields: "Customer Id" and "Account Number". At the bottom right, there are three buttons: "Scan", "Cancel", and "Clear".

Field Description

Field Name	Description
Customer ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC & Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p> <p>This field is enabled only if the Customer ID is selected in the Selection Criteria field.</p>

Account Number [Display]
This field displays the account number.

3. Connect the thumb scanner to the system.
4. Click the **Scan** button.
5. The system displays the message "Please Insert The Card".
6. Insert the smart card in the scanner and click the **Ok** button.
7. The system displays the message "Sensor Feedback".
8. Scan the thumb impression of the customer on the sensor.
9. The system displays the message "Verification Successful". Click the **Ok** button.
10. The system displays the customer account numbers.
11. Click the appropriate account number. Once the account number is selected the customer session is started.
12. Enter the fast path for the required transaction. The account details are automatically populated on the screen.

Note: If the thumb verification is not successful then the user will be prompted for dual authorization. If the user clicks the **Cancel** button then the transaction is aborted. If **Ok** button is clicked then user has to enter the supervisor login details. Once the login details are verified then user can proceed with the transaction else the transaction is aborted.

Customer Based Transactions

Oracle FLEXCUBE provides the comprehensive customer-based information to a user of the financial service provider. The customer-based transaction allows the user to search for all details of the customer. Inquiries related to the account, can be conducted based on the customer search and the name of the customer can be changed on genuine circumstances, etc.

7101 - IC No - Short Name Change

Using this option you can change the Customer IC, Short Name, or Full Name.

Due to various reasons, customers may want to change their name; for example, a female customer could change her maiden name after marriage, or an individual / corporate customer could adopt a new name, etc. The passport number of a customer could be changed to a new IC number as the earlier passport would have got expired.

CI141 - Customer To Customer Relation

Using this option, you can maintain the records of relationship shared by any particular customer (referred as primary customer) with other customer's of the bank (referred as secondary customers).

The account relationships can be defined in the **Customer Account Relationship Maintenance** (Fast Path: CI142) option.

These relations are maintained only for information purposes. No processing is done using these definitions.

Note: This transaction is automatically authorized.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add By Copy, Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer relation details

1. Type the fast path **CI141** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer To Customer Relation**.
2. The system displays the **Customer To Customer Relation** screen.

Customer To Customer Relation

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down] Select the search criteria from the drop-down list. The options are:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer IC - Identification given by a central authority. • Customer ID - Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20, Pick List] Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field. If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Enter the search string and press the **<Tab>** key and select the customer from the pick list.

Customer To Customer Relation

6. Enter the relevant information in the **Relationship Details** tab.

Relationship Detail

Field Description

Field Name	Description

5. Double-click the record to view the relationship details.
6. Click the **Close** button.

CI162 - Combined Statement Plan

Using this option you can prepare a combined statement of customer accounts. You can maintain instructions for providing a single statement to customers who own multiple accounts. Each combined statement plan must have at least two accounts associated with it.

An account cannot be included in more than one statement plan. A plan number is given to each combination of accounts that are associated with a plan. Closed accounts cannot be included in statement plans. Each account in the combined statement plan will have a flag called Details/Summary.

If the flag is selected as Summary, then only summary will be printed in the combined statement.

The default value for Details/Summary flag will be as follows:

- Details- For CASA with statement (including OD account)
- Summary- For CASA with passbook, Term Deposit & Loan accounts (FCR and FCC)

The following account types are available for the combined statement:

- Current account
- Savings account with statement
- Savings account with passbook (can be identified with the passbook flag at the account level)
- Term deposit accounts
- Loan accounts (in FCR and FCC).

Also the bank can decide to have bank level maintenance as ' Automatic combined statement plan generation' during FCR setup. In this case automatic inclusion of accounts in combined statement plan process happens in the end of day process.

For Example:

If a customer has at least one CASA account with relation as SOW and Non Syariah and is not part of any combined statement plan, opens any new CASA (With relation as SOW), TD or Loan account then that account along with existing CASA account will be automatically included in Automatic Combined Statement Plan i.e. Plan No.1.

However, if the customer doesn't want or have a special request for his/her combined statement structure; branch can un-combine the statement of accounts manually. In case the customer opts for more than one combined statement, the user can create separate combined statement plan manually. The address in the combined statement plan will be defaulted with the customer mailing address (at the time of automatic plan generation or manual addition).

By default, customer accounts (under 1 CIF) will be included into one combined statement automatically except joint account (And/Or). If customer requests, the joint accounts will be included in the combined statement manually.

If there is only one account in a combined statement plan, because of closure of other accounts, then combined statement plan will be deleted automatically and only single statement will be printed for the month.

If there are more than one combined statement plan for the customer, then the new accounts will be combined with the high priority plan i.e. the one created first.

The maximum number of combined statement plans which can be created per customer can be 99. Any user generated Combined Statement Plan will start from 2 and will carry on till 99 as plan number 1 is reserved for the system. The maximum number of accounts that can be included in a combined statement plan can be 9999.

Note: The system automatically authorizes this transaction.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the combined statement

1. Type the fast path **CI162** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Combined Statement Plan**.
2. The system displays the **Combined Statement Plan** screen.

Field Description

Field Name	Description
Account No	[Display] This field displays the list of all the accounts with which the customer has a primary relationship.

Field Name	Description
Included	<p>[Toggle] Click the toggle status to change the value. The options are:</p> <ul style="list-style-type: none"> • Y - If Y is displayed against an account, it indicates that the account is included in the combined statement plan • N - If N is displayed against an account, it indicates that the account is not included in the combined statement plan. <p>You can add or remove an account to/from the combined statement plan by double-clicking the Included column to change the N value to Y and vice-versa.</p> <p>Closed accounts are displayed in the list of accounts, only for the information purpose and the system do not allow a closed account to be added to the plan.</p>
Type	<p>[Display] This field displays the module to which the account belongs. The options are:</p> <ul style="list-style-type: none"> • CH - CH indicates that the account is a CASA account • LN - LN indicates that the account is a Loan account • TD - TD indicates that the account is a Term Deposit account
Plan	<p>[Display] This field displays the serial number of the plan code to which the account belongs. If the value in the Included column is Y, then the Plan column displays the serial number of the plan code. If you change this value from N to Y, then the system will automatically display the plan code serial number currently used. If the account is not included in any combined statement plan then this column will have a zero value. If the account is included in another statement plan then the value in the Included column will be Y and the Plan column will display the serial number of the plan code.</p>
Statement Type	<p>[Toggle] Double-click on the field to change the statement type. The options are:</p> <ul style="list-style-type: none"> • Detail - If this option is selected, then the system will include this account in the combined statement in the detail mode. • Summary - If this option is selected, then the system will include this account in the combined statement in the summary mode. <p>For CASA with statement (including OD Account), default value will be Detail. For CASA with passbook, Loan and TD Accounts, default value will be Summary. For the system initiated combined statement plans, the default options, based on the conditions above, will be set by the system.</p>

8. Click the **Ok** button.
9. The system displays the message "Record authorized...Click Ok to Continue". Click the **Ok** button.

Examples for combined statement plan

Example 1: When a new customer opens account,

On 01/01/2007, a customer comes to branch and opens one CASA account No.111.

The customer has no other accounts other than the account which is opened during the day. Hence no system initiated combined statement plan will be generated in the EOD.

On 25/01/2007, customer comes to the branch for opening another TD account.

During the EOD, system will check whether any CASA accounts are available for the customer.

In this case, CASA Account No.111 already exists. Hence, in the EOD, a new system initiated combined statement plan (plan NO 1) will be generated and both the CASA account (111) as well as the newly opened TD account will be introduced in that plan.

Example 2:

When there are some TD accounts already available for the customer, and customer ZZZ has three TD accounts and one loan account with the bank. Since there are no CASA accounts, no combined statement will be created for the customer as combined statement plan requires at least one CASA account.

On 25/01/2007, customer ZZZ opens a CASA account with statement (passbook flag not ticked).

In the EOD, system will check whether there is any other account exists for the customer.

In this case, there are three TD accounts and one loan account available. Hence, system will create a combined statement plan and include the CASA account with statement along with three TD accounts and one loan account.

CIM10 - Customer NLS Details Maintenance

Using this option you can capture the customer address in native language such as Arabic, Japanese, etc., which aids in delivering correspondence through courier/post.

Definition Prerequisites

- BAM03 - Branch Master Maintenance
- CIM03 - Customer Prefixes Maintenance
- 8053 - Customer Addition
- 7101 - IC No - Short Name Change

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To maintain customer NLS details

1. Type the fast path **CIM10** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer NLS Details Maintenance**.
2. The system displays the **Customer NLS Details Maintenance** screen.

Field Description

Field Name	Description
Customer Information	
Search Criteria	<p>[Mandatory, Drop-Down] Select the search criteria, to search for the customer, from the drop-down list. The options are:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer IC - Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID- Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20] Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field. If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
Cust IC	<p>[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Home Branch	<p>[Display] This field displays the branch, where the customer's account is opened. It is maintained in the Branch Master Maintenance (Fast Path: BAM03) option.</p>

Field Name	Description
Full Name	[Display] This field displays the full name of the customer. The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.
Short Name	[Display] This field displays the short name of the customer. The short name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option. The customer short name can be changed through the Change Customer Name/IC Number (Fast Path: 7101) option.
Language	[Mandatory, Drop-Down] Select the national language of the customer from the drop-down list.
Customer NLS Details	
Salutation	[Mandatory, Drop-Down] Select the salutation given to the customer name from the drop-down list. The options are: <ul style="list-style-type: none"> • Prof • Mr. • Ms • Mrs. • Dr
NLS Full Name	[Display] This field displays the full name of the customer.
First Name	[Mandatory, Alphanumeric, 254] Type the first name of the customer.
Middle Name	[Optional, Alphanumeric, 254] Type the middle name of the customer.
Last Name	[Optional, Alphanumeric, 254] Type the last name of the customer.
Address	[Mandatory, Alphanumeric, 35] Type the address of the customer. There are three lines to enter the address.
Town/City	[Mandatory, Alphanumeric, 35] Type the name of the town or city, where the customer resides.
State	[Mandatory, Alphanumeric, 35] Type the name of the state where the customer resides.

Field Name	Description
Country	[Mandatory, Drop-Down] Select the name of the country, where the customer resides, from the drop-down list.
Zip Code	[Mandatory, Alphanumeric, 35] Type the zip code.

3. Click the **Add** button.
4. Select the search criteria from the drop-down list and press the <Tab> key.
5. Type the search string and press the <Tab> key.
6. Select the customer from the pick list.
7. Enter the customer NLS details.

Customer NLS Details Maintenance

8. Click the **Ok** button.
9. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **Ok** button.
10. The customer NLS details are added once the record is authorized.

CIM12 - Customer Contact/Complaint log Maintenance

Using this option, you can maintain a log of all contacts that a customer has had at the bank to help maintain continuity of all the discussions between the customer and various bank officers. You can also capture all customer complaints/requests, status of the complaints like whether it has been followed up or not, closed or not, etc.,

This facility is available to Customer/Non Customer (even non-customers can call for some requests or information to the call centre)/ bank staff.

Any fees corresponding to a request will have to be manually handled by the bank.

For Example:

Customer calls up the call centre and requests for TPIN Activation on 17th Sep 2009, User has to check 'Customer Complaint/Request log' radio button and by default the request date will be captured as 17th Sep 2009.

User can choose:

- Nature of Request - Service
- Criteria of Request - Account Maintenance
- Measurement - E Channel Maintenance
- Detail Measurement - TPIN Activation

On clicking **OK** the request will be added.

If the request is modified on 19th Sep 2007, then the TPIN of the customer will be activated and the request will be closed. User will visit the screen in Modify mode and the date will be defaulted to 19th Sep 2007 and Officer ID will be modified to the current officer doing the modification (which can be modified).

- Status - The user will change as 'Closed'.
- Description - The user modifies the details.

Note: The system automatically authorizes this transaction.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer contact/complaint log

1. Type the fast path **CIM12** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Contact/Complaint log Maintenance**.
2. The system displays the **Customer Contact/Complaint log Maintenance** screen.

Customer Contact/Complaint log Maintenance

Field Description

Field Name	Description
Customer Contact log	[Mandatory, Radio Button] Click this option if the customer contact log is to be maintained.
Customer Complaint/Requestlog	[Mandatory, Radio Button] Click this option if the customer complain or request log is to be maintained.
Requester Type	[Conditional, Drop-Down] Select the requester type from the drop-down list. The options are: <ul style="list-style-type: none"> • Customer • Non Customer

Field Name	Description
Search Criteria	<p>[Conditional, Drop-Down]</p> <p>Select the search criteria, to search for the customer, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer IC - Identification criteria (IC) arrived at by the bank during customer addition. <p>Customer ID- Unique identification given by the bank.</p> <p>This field is disabled if the Requester Type is Non Customer.</p>
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the Search String field.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>

Field Name	Description
Full Name	<p>[Conditional, Alphanumeric, 40]</p> <p>Type the full name of the customer.</p> <p>This field is enabled only if the Customer Complaint/Request Log option is selected and the Requester Type is Non Customer.</p> <p>For other options, the system displays the full name of the customer.</p> <p>The full name of the customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p>

3. Click the **Add** button.
4. Click on the criteria based on which log is to be maintained.
5. Select the search criteria from the drop-down list and enter the search string and press the **<Tab>** key and select the customer from the pick list.
OR
Select the requester type from the drop-down list.

Customer Contact/Complaint log Maintenance

6. Enter the relevant information in the **Log Details** tab.

Log Details

Field Description

Field Name	Description

Field Name	Description
Closure Remarks	[Optional, Alphanumeric, 255] Enter the free text to capture the closure remarks. This field is used by FCR user to reply to conversations assigned by external system users. All the replies from FCR will be stored in this field with FCR user ID who has replied with date and time.
Direct Access Channel	[Display] This field displays the flag to Indicate if the conversation originated from channel.
External System User ID	[Display] This field displays the external system's user ID.

7. Click the **OK** button.
8. The system displays the message "Record Added with Log Id". Click the **OK** button.
9. Click the **Close** button.

To modify the customer contact log

1. Click the **Modify** button.
2. Click on the criteria based on which log is to be maintained.
3. If the **Customer Complaint/Request log** option is selected, select the requester type.
4. Select the search criteria from the drop-down list and enter the search string and press the **<Tab>** key and select the customer from the pick list.
5. The system displays the appropriate tab.

Log Summary

This tab displays all the records for a selected customer. All the contact/complaint logs pertaining to all the accounts of the selected customer will be displayed along with the date. User can select a record based on the date to check the details.

Field Description

Field Name	Description
Conversation ID	[Display] This column displays the conversation ID.
Conversation Date	[Display] This column displays the date on which the conversation happened.
Subject	[Display] This column displays the subject of conversation.
Assigned To	[Display] This column displays the bank user or class in charge of the conversation.
Target Closure Date	[Display] This column displays the closure date communicated to the customer.

Field Name	Description
Assigned To	[Display] This column displays the status of the conversation. The status can be: <ul style="list-style-type: none">• Open• WIP• Pending With Customer• Closed• Modified• Re-Open

6. Double-click the appropriate record in the **Log ID** column to enable the **Log Details** tab.
7. Modify the relevant information and click the **OK** button.
8. The system displays the message "Record Modified". Click the **Ok** button.

CIM13 - Customer Memo Maintenance

Using this option, you can maintain a note on preferences or special status of a customer which can help in dealing with the customer appropriately at any point of time. A memo maintained at the customer level is applicable for all accounts held by a customer for which this customer is the primary customer.

Customer Memo is a string attached at the customer level which can be displayed when the teller does transactions on **Oracle FLEXCUBE** branch. If the memo severity is high, the memo is automatically displayed when performing a transaction from branch and the system will enforce an authorisation. In case of a low severity memo, the teller can choose to see the memo and the authorisation requirement is not enforced. However system will not validate the existence of memo in case of batch upload.

Note: This transaction is automatically authorized.

Definition Prerequisites

- 8053 - Customer Addition
- Customer Account should be opened

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the customer memo

1. Type the fast path **CIM13** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Memo Maintenance**.
2. The system displays the **Customer Memo Maintenance** screen.

Customer Memo Maintenance

Field Description

CIM18 - CBR Details Maintenance

The CBR details are certain user-defined features or attributes, based on which the customer can be grouped or categorized under a common language, location, salary structure, etc. CBR codes are useful for the Central Bank Reporting purposes.

Using this option you can create user defined fields which were not present in the various customer maintenance options which are a part of the standard **FLEXCUBE** Release. The bank can define the labels as well as contents of fields using the **User Defined Fields Maintenance** (Fast Path: BA078) option and **CBR PickLists Maintenance** (Fast Path: BA080) option.

Defining these categories facilitates generating MIS reports, beyond the standard reports available within **Oracle FLEXCUBE**.

Definition Prerequisites

- BA080 - CBR PickLists Maintenance
- BA078 - CBR Label Maintenance
- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add the CBR code details

1. Type the fast path **CIM18** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > CBR Details Maintenance**.
2. The system displays the **CBR Details Maintenance** screen.

CIM20 - Investor Services – Customer Data - Inquire*

FLEXCUBE Investor Services (FIS) is a comprehensive multi-currency shareholder servicing solution for Mutual Funds. Using this option you can make inquiries on the customer's data pertaining to FIS system.

It automates all Transfer Agent functions within a mutual fund company. All the mandatory information required by the FIS system has to be maintained in **Oracle FLEXCUBE**.

Definition Prerequisites

- BAM03 - Branch Master Maintenance

Modes Available

Add, Modify, Inquiry. For more information on the procedures of every mode, refer to Standard Maintenance Procedures.

To add the investor service details

1. Type the fast path **CIM20** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Investor Services- Customer Data-Inquire**.
2. The system displays the **Investor Services - Customer Data - Inquire** screen.

CIM30 - Customer Maturity Processing Maintenance

Banks have different type of customers like minors, major individuals, corporate customer's, etc and the customer details are added to the customer information database using the **Customer Addition** (Fast Path: 8053) option.

Using this option **Oracle FLEXCUBE** allows you to parameterize the customer status change from a minor to major when a minor customer turns major on attaining maturity or make the change through automation. In case the system is parameterized under automated mode, the functionality associated with this option will not be available.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Not Applicable

To perform the customer maturity processing maintenance

1. Type the fast path **CIM30** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Maturity Processing Maintenance**.
2. The system displays the **Customer Maturity Processing Maintenance** screen.

Customer Maturity Processing Maintenance

The screenshot shows a web-based application window titled "Customer Maturity Processing Maintenance". The interface includes a search section with a dropdown menu for "Search Criteria" (currently set to "Customer Short Name"), a "Search String" input field, and several other input fields for "IC", "ID", "Home Branch", "Full Name", and "Short Name". Below these fields is a table header with columns: "Serial No", "Account No", "Customer Short Name", "Customer ID", and "Swap". The table area is currently empty. At the bottom right of the window, there are three buttons: "Ok", "Close", and "Clear".

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>The search criteria are as follows:</p> <ul style="list-style-type: none"> • Customer Short Name • Customer IC - Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID- Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>The search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
IC	<p>[Display]</p> <p>The identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display]</p> <p>The ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC & Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Home Branch	<p>[Display]</p> <p>This field displays the branch, where the minor customer's account is initiated and maintained.</p>
Full Name	<p>[Display]</p> <p>The full name of the customer.</p> <p>The full name of the customer is defaulted from the Customer Addition option.</p>

Field Name	Description
Short Name	<p>[Display]</p> <p>The short name of the customer.</p> <p>The short name of the customer is defaulted from the Customer Addition option.</p> <p>The customer short name can be changed through the Change Customer Name/IC Number option.</p>

Column Name	Description

CIM39 - Customer ID Change Maintenance

Using this option, you can change the Primary Cust ID linked to an account i.e. you can link the accounts under one Customer ID where the customer has SOW, JAF and JOF relationship; to another Customer ID with the same relationship.

This is required during certain circumstances like the customer is deceased, multiple customer IDs exist for the same customer etc. The new customer is linked to the accounts in the same relationships as that of the previous customer.

Definition Prerequisites

- 8053 - Customer Addition
- 8051 - CASA Account Opening

Modes Available

Not Required

To change the customer ID

1. Type the fast path **CIM39** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer ID Change Maintenance**.
2. The system displays the **Customer ID Change Maintenance** screen.

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down] Select the search criteria, to search for a customer, from the drop-down list. The options are:</p> <ul style="list-style-type: none"> • Customer short name • Customer IC Identification criteria (IC) arrived at by the bank during customer addition. • Customer ID- Unique identification given by the bank.
Search String	<p>[Mandatory, Alphanumeric, 20, Pick List] Enter the search string, to search for a customer, corresponding to the search criteria selected in the Search Criteria field or select it from the pick list. If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list. For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
Full Name	<p>[Display] This field displays the full name of the customer. The full name of the primary customer is defaulted from the Customer Addition (Fast Path: 8053) option.</p>
IC	<p>[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>

3. Select the search criteria from the drop-down list.
4. Enter the search string and press the <Tab> key. Select the customer from the pick list.
5. The system displays the account details.
6. The **Accounts** tab is displayed.

CIM57 - Customer Anniversary Maintenance

Using this option you can block all the accounts of a customer. If the customer is not able to show up on the anniversary date or the date maintained is expired, the system will block the transactions from all the channels and branches.

This option allows tellers to maintain the future expiry date of Driving License, Passport etc. On expiry date of the documents, system will block the customer. This will happen at the BOD of anniversary date.

Definition Prerequisites

- 8053 - Customer Addition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add customer anniversary maintenance

1. Type the fast path **CIM57** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions > Customer Anniversary Maintenance**.
2. The system displays the **Customer Anniversary Maintenance** screen.

BAM64 - Customer-Account-Nominee Cross-Reference

Using this option allows you to link a nominee ID pre defined to a customer. This option is used to link a nominee to individual CASA or Term Deposit accounts of the selected customer and can also be used for defining nominee for individual deposits under the Term Deposit account of the customer. More than one nominee can also be linked to a customer.

Definition Prerequisites

- 8053 - Customer Addition
- BA438- Nominee Master Maintenance
- Existence of customer accounts

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add customer account nominee details

1. Type the fast path **BAM64** and click **Go** or navigate through the menus to **Global Definitions > Master > Customer-Account-Nominee Cross-Reference**.
2. The system displays the **Customer-Account-Nominee Cross-Reference** screen.

7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **Ok** button.

STM81 - Customer Blacklist Details Modification

Using this option, you can maintain the DHIB/DHN customer blacklist details.

The three events that trigger customer blacklisting with respect to cheque returns are:

- Inward Clearing Cheque Return with Reject Reason "NSF"
- Over the Counter Cheque return with Reject Reason "NSF"
- Inward file upload from Central Bank (from other banks) for the bank customer, blacklisted from other bank.

The DHIB/DHN blacklist status is maintained at the customer level. If the customer holds multiple accounts, including joint accounts, then the cheques rejected in all the accounts are considered for blacklisting. The blacklisting process is same for both conventional accounts and Syariah accounts of a customer, but both are tracked separately.

The four SP status of a customer are as follows:

- None
- SP 1: A cheque returns below a specified amount (Say amount < 500 Mio) in clearing or over the counter with reject reason as "NSF". The "SP1" status will expire in 6 months since the date of cheque return.
- SP 2: A second cheque returns (below < 500 Mio) within the last 6 months with reject reason as "NSF". The "SP2" status will expire in 6 months since the date of cheque return.
- SP 3: A third cheque returns (below < 500 Mio) within the last 6 months with reject reason as "NSF". The "SP3" status will expire in one year since the date of cheque return.

A cheque return beyond a specified amount (say amount \geq 500 Mio) with reject reason as "NSF", will update customer blacklist status to "SP3" from either "None", "SP1" or "SP2". If a cheque that was returned is passed within 7 working days from the date of cheque return, the blacklist status is reset to the previous status automatically by the system. If the same cheque number is rejected more than once with reason as insufficient funds, it will be treated as having been rejected only once. The bank will also receive a file from Central Bank, which will contain DHN blacklist customers of the bank originated from all the other banks.

Definition Prerequisites

- 8051 - CASA Account Opening

Modes Available

Not Applicable

To maintain the DHIB/DHN customer blacklist details

1. Type the fast path **STM81** and click **Go** or navigate through the menus to **Global Definitions > Clearing > Customer Blacklist Details Modification**.
2. The system displays the **Customer Blacklist Details Modification** screen.

ETM01 - Customer Alerts Registration

Alerts can be categorized as bank initiated CASA account level and customer level alerts. The bank initiated alert is sent to all the customers as and when the underlying event occurs while the customer registered and CASA account level alerts are sent to the customers who have registered for the same.

Using this option you can register for alerts and maintain various details required to provide the alert message service to customers. The alert message can be sent either through SMS or Email or both. You can also mark a time period for a customer within which no SMS alert messages will be sent. This flexibility is provided for customers who do not wish to be disturbed during their office hours or early morning etc. The SMS alerts queued during the do not disturb time range are sent to the customer after the end of set time range.

The alerts can be registered at customer level or at account level. Customer is required to specify which all type of transactions and events have to be intimated through alert. The transaction/ event triggers the alert generation. For the specified event or transaction, the system sends an alert message to the customer.

Definition Prerequisites

- 8053 - Customer Addition
- Availability of customer accounts

Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedure**.

To register customer alerts

1. Type the fast path **ETM01** and click **Go** or navigate through the menus to **Global Definition > Clearing > Customer Alerts Registration**.
2. The system displays the **Customer Alerts Registration** screen.

Customer Alerts Registration

Field Description

Field Name	Description
------------	-------------

Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer short name • Customer IC • Customer ID
------------------------	--

Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string, to search for a customer, corresponding to the criteria selected in the Customer Search field.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Select the appropriate customer from the existing customer list.</p> <p>For example, the customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
----------------------	--

Field Name	Description
IC	<p>[Display]</p> <p>This field displays the identification code of the customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
ID	<p>[Display]</p> <p>This field displays the ID of the customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Full Name	<p>[Display]</p> <p>This field displays the full name of the customer.</p> <p>By default the system displays the name as entered in the Customer Addition (Fast Path: 8053) option.</p>
Short Name	<p>[Display]</p> <p>This field displays the short name of the customer.</p> <p>By default the system displays the name as entered in the Customer Addition (Fast Path: 8053) option.</p>
Home Branch	<p>[Display]</p> <p>This field displays the code of the branch, where the customer account is opened.</p> <p>These short names are maintained in the Branch Master Maintenance (Fast Path: BAM03) option.</p>
Alert Type	<p>[Mandatory, Drop-Down]</p> <p>Select the alert type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer level - This option is selected for registering alerts for a specific customer. • Account level - This option is selected for registering alerts for a specific account.
Alert Address	
Mobile No	<p>[Display]</p> <p>This field displays the mobile number of the customer as maintained in the Customer Information Maintenance (Fast Path: CIM09) option.</p>

Field Name	Description
Email	[Display] This field displays the email ID of the customer as maintained in the Customer Information Maintenance (Fast Path: CIM09) option.
Time Range	
Start Time	[Optional, hh:mm:ss] Type the start time for the do not disturb period.
End Time	[Optional, hh:mm:ss] Type the end time for the do not disturb period.

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Type the search string and select the relevant record from the pick list. The system displays the customer details.

Customer Alerts Registration

6. Select the alert type from the drop-down list. The system displays the details of various accounts for the selected customer.

Accounts

This tab is enabled if the **Account level** option is selected in the **Alert Type** drop-down list.

The screenshot shows the 'Customer Alerts Registration' application window. It includes search criteria for Customer Short Name, IC (15151544), Full Name (SHANK BHAT), Home Branch (9999-Head Office), ID (606316), and Short Name (SHANKBHAT). The Alert Type is set to 'Account Level'. The Alert Address section shows Mobile No (15151519) and Email (SHANK.1212@gmail.com). The Time Range is set from 00:00:00 to 00:00:00. Below this, there are tabs for 'Accounts' and 'Alerts'. The 'Accounts' tab is active, displaying a table with one record:

Account Number	Category	Account Title	Relationship
00000000016301	C	NORMAL	SOW

At the bottom, there is a 'Remarks' field, a 'Record Details' section with fields for Input By, Authorized By, Last Mnt. Date, Last Mnt. Action, and Authorized, and a row of action buttons: Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry, UDF, Ok, Close, and Clear.

Field Description

Field Name	Description
Account Number	[Display] This column displays the account number. Based on the search criterion selected, all related CASA accounts of the customer are displayed.
Category	[Display] This column displays the category of the CASA account.
Account Title	[Display] This column displays the account title.
Relationship	[Display] This column displays the relationship by which the customer is linked to the account.

7. Double-click a particular record in the **Accounts** tab to view the alerts registered under the **Alerts** tab.
8. Enter the relevant details in the **Alerts** tab.

Alerts

This tab displays the alerts for which the customer/account is registered. If the **Customer level** option is selected in the **Alert Type** drop-down list, then all customer level alerts are displayed.

7004 - Customer Name and Address Inquiry

Using this option you can inquire about a customer's personal details such as name and address of all customers linked to the account. You have to key in an account number (CASA, Loans or Term Deposit) to display the customer name and address along with IC and the customer's relation to the account.

A maximum of 3 customer details can be displayed using this option. If there are more than three then they have to be looked into individually using the **Customer Account Relationship Maintenance** (Fast Path: CI142) option and the **Customer Master Maintenance** (Fast Path: CIM09) option.

Definition Prerequisites

Field Description

Column Name	Description
Account Number	[Display] This column displays all the accounts held by the customer.
Fees/Charges	[Display] This column displays the total fees and various charges levied on each account from the date of the account opening.
Interest Earned	[Display] This column displays the total debit interest, i.e. the interest earned by the bank against the account. This interest is an income for the bank.
Interest Paid	[Display] This column displays the total credit interest, i.e. the interest earned by the customer. This interest is expenditure for the bank.
Currency	[Display] This column displays the currency assigned to the product under which the account is opened.

- Click the **Asset Liability Report** radio button view the asset liability report and click the **OK** button.

Asset Liability Report

The **Asset Liability Report** option provides details of product wise assets, liabilities and the totals.

The screenshot shows the Oracle Customer Account Relation Inquiry - Zoom Inquiry window. The window title is "Customer Account Relation Inquiry - Zoom Inquiry*". The "Customer Information" section includes search criteria: "Customer Short Name" (dropdown), "Search String" (text box with "geo"), "ID" (text box with "603647"), and "Full Name" (text box with "GEORGE PAUL"). The "Based On" section has two radio buttons: "Profitability Inquiry" (unselected) and "Asset Liability Report" (selected). Below this, there are two summary rows: "Total Assets" and "Total Liabilities", each with a value of "0" and a currency symbol "₹". The main table has columns for "Product Name", "Customer Assets", and "Customer Liabilities", with a value of "0" and a currency symbol "₹" in the first row. At the bottom, there is a navigation bar with buttons for "UDF", "OK", "Close", and "Clear".

Field Description
