MCA80- Inquiry of Sold / Issued Inventory.....	58

Preface

1.1. Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2. Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3. Access to OFSS Support

<https://support.us.oracle.com>

1.4. Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual

Introduction provides brief information on the overall functionality covered in the User Manual

Chapters are dedicated to individual transactions and its details, covered in the User Manual

1.5. Related Information Sources

For more information on Oracle FLEXCUBE Core Banking Release 5.2.0.0.0, refer to the following documents:

- Oracle FLEXCUBE Core Banking Licensing Guide

Inventory

Inventory of a bank is a valuable commodity and proper tracking needs to be in place to check its fraudulent usage. The bank has to maintain the stock record of each inventory to initiate the tracking system. Each stock in the inventory list has to be given a unique code, which can be used to identify the stock with the issuer, currency and inventory type. Printed inventories are procured from external agencies that are appointed by the bank, for which the bank needs to maintain the identification of the suppliers.

9019 - Transfer Stocks

When a teller initiates a buy or sell of a specific inventory item/s to the vault teller it is termed as the transfer of stocks. You have to enter the stock code, denomination and the total quantity he/she wants to purchase or sell for successful completion of the transaction.

Definition Prerequisites

Not Applicable

Other Prerequisites

- IV001 - Stock Transactions

Modes Available

Not Applicable

To transfer the balance stock

1. Type the fast path **9019** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Inventory > Transfer Stocks**.
2. The system displays the **Transfer Stocks** screen.

Transfer Stocks

5. Click the **Ok** button.
6. The system displays the message "Authorization Required. Do You Want to continue?". Click the **OK** button.
7. The system displays the **Authorization Reason** screen.
8. Enter the relevant information and click the **Grant** button.

Note: For information on Authorization transactions, refer to the *FLEXCUBE Introduction User Manual*.

IV001 - Stock Transactions

Using this option you can execute the following:

- Request stock from the central inventory: The request can be regular or adhoc with stock/inventory code, denomination details and total quantity required.
- Keep track of stock ordered from suppliers: The purchase order number, date, purchase and inventory details.
- Keep record of stock received from the suppliers: The receipt date and the received inventory details.
- Issue stock to branches: The issued date, branch and the issued inventory details.

Definition Prerequisites

Not Applicable

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add stock transaction details

1. Type the fast path **IV001** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Inventory > Stock Transactions**.
2. The system displays the **Stock Transactions** screen.

Stock Transactions

Field Description

Field Name	Description
Transaction	<p>[Mandatory, Drop-Down]</p> <p>Select the appropriate transaction option from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Request Stock • Order Stock • Receive Stock • Issue Stock <p>Based on the transaction type selected the tab for the respective transaction will be activated.</p>
	<p>3. Click the Add button.</p> <p>4. Select the appropriate transaction from the drop-down list.</p> <p>5. The system enables the corresponding tab depending on the transaction type selected.</p>

Request Stocks

Field Description

Field Name	Description
Request No.	[Mandatory, Alphanumeric, 10] Type the request number, which will be used to track the request status by the bank or branch and to place the purchase order with supplier by central inventory department.
Requesting Branch	[Mandatory, Drop-Down] Select the branch code from the drop-down list. This is the bank or branch that has initiated request for the stock.
Request Type	[Mandatory, Drop-Down] Select the request type from the drop-down list. The options are: <ul style="list-style-type: none"> • Adhoc: When a request is placed before the re-order level is reached it is termed as Ad-hoc. • Regular: When a request is placed after re-order alert is generated.

Field Name	Description
Date of Request	[Mandatory, Pick List, dd/mm/yyyy] Select the request date from the pick list. By default, this field displays the current posting date. It must be less than or equal to current date, and cannot be a future date.
Ad-hoc Request Reason	[Conditional, Alphanumeric, 40] Type the reason for requesting the stock. This field is enabled if the user selects the Adhoc option in the Request Type field.
Reference No 1	[Optional, Alphanumeric, 12] Type the first reference number.
Reference No 2	[Optional, Alphanumeric, 12] Type the second reference number.
Column Name	Description
Srl No.	[Display] This column displays the system generated serial number.
Request id	[Display] This column displays the request ID.
Stock catalog Code	[Mandatory, Drop-Down] Select the appropriate stock catalogue code, of the stock or the inventory item for which the request order is placed, from the drop-down list.
Denm.	[Mandatory, Drop-Down] Select the appropriate denomination value of the stock from the drop-down list. If denomination is not applicable, the drop-down displays 0 option. Select 0 in this case.
Qty req.	[Mandatory, Numeric, 10] Type the appropriate amount of stocks required. For example, 50 units of banker's cheque. It can be 50 leaves or booklets of banker's cheque.

Column Name	Description
Total	<p>[Display]</p> <p>This column displays the total value.</p> <p><i>Total Value = Denomination * Quantity</i></p> <p>For example,</p> <p>If Denomination = 100 and Quantity = 20</p> <p>Then Adjustment Total value = 2000</p> <p>Only stock or inventory items which are tracked denomination wise will have an Adjustment Total value.</p>
Delete(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y if you want to delete the particular stock item from the list.</p> <p>By default, the system displays the value as N.</p>

Field Description

Field Name	Description
Purchase Order No.	[Mandatory, Alphanumeric, 10] Type the unique purchase order number, which is used to track the purchase order status. On receipt of the stock from supplier this purchase order number is used to indicate receipt.
Request No.	[Mandatory, Pick List] Select the request number, for which purchase order needs to be placed, from the pick list. The pick list displays only those request numbers against which there are no orders placed or partial orders are placed.
Date of order	[Mandatory, Pick List, dd/mm/yyyy] Select the date of request from the pick list. This date must be a current or previous date and cannot be a future date.
Supplier code	[Mandatory, Drop-Down] Select the supplier code from the drop-down list. The drop-down list displays the list of all approved suppliers.
Reference no. 1	[Optional, Alphanumeric, 12] Type the first reference number.
Reference no. 2	[Optional, Alphanumeric, 12] Type the second reference number.
Column Name	Description
Srl No.	[Display] This column displays the system generated serial number for each stock item.
Request id	[Display] This column displays the request ID for each stock item in the list.
Stock catalog Code	[Display] This column displays the stock catalogue code of the stock or the inventory item for which the request order is placed.
Denm.	[Display] This column displays the denomination value of the requested stock.

Column Name	Description
Qty req.	<p>[Mandatory, Numeric, Seven]</p> <p>Type the quantity of stocks.</p> <p>The user can modify the quantity of stocks requested at the time of placing an order. The quantity can be reduced from the original requested but cannot be increased.</p> <p>For example, 50 units of banker's cheque. It can be 50 leaves or booklets of banker's cheque.</p>
Series #	<p>[Conditional, Numeric, 10]</p> <p>Type the series number that has been defined for the particular stock code.</p>
Start #	<p>[Conditional, Numeric, 10]</p> <p>Type the start number from which a stock item is ordered.</p> <p>If the Auto- Serial No flag is on, then system automatically generates the Start No by incrementing the highest number of the current stock.</p> <p>The user can modify the Start No or provide it when it is not already available.</p>
End #	<p>[Display]</p> <p>This column displays the end number of the series.</p> <p>The end number is calculated and generated by the system depending on the quantity and the start number specified.</p> <p>For example,</p> <p>If Quantity = 100 and Start No = 50 Then End No = 149</p>
Total	<p>[Display]</p> <p>This column displays the total value.</p> <p><i>Total Value = Denomination + Quantity</i></p> <p>For example,</p> <p>If Denomination = 100 and Quantity = 20 Then Adjustment Total value = 2000</p> <p>Only stock or inventory items which are tracked denomination wise will have an Adjustment Total value.</p>
Delete(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y if you want to delete the particular stock item from the list.</p> <p>By default, the system displays the value as N.</p>

Receive Stocks

Field Description

Field Name	Description
Purchase Order No.	[Mandatory, Pick List] Select the purchase order number, which is used to track the purchase order status, from the pick list. On receipt of the stock from supplier this purchase order number is used to indicate receipt.
Received From	[Mandatory, Drop-Down] Select the supplier from whom the stock is received from the drop-down list.
Inventory Branch	[Mandatory, Drop-Down] Select the inventory branch that has placed the request for the stock from the drop-down list.
Date of Receipt	[Mandatory, Pick List, dd/mm/yyyy] Select the date of receipt from the pick list. The receipt date cannot be greater than the current date.

Column Name	Description
Srl No.	[Display] This column displays the system generated serial number for each stock item in the list.
Request id	[Display] This column displays the request ID for each stock item in the list.
Stock catalog Code	[Display] This column displays the stock catalogue code of the stock or the inventory item for which the request order is placed.
Denm.	[Display] This column displays the denomination value of the requested stock.
Qty req.	[Display] This column displays the quantity of stocks. In case of partial receipt for the stock request, the user can modify the original values to reflect the received stock values. The quantity can be reduced from the original requested but cannot be increased. For example, 50 units of banker's cheque. It can be 50 leaves or booklets of banker's cheque.
Series #	[Conditional, Numeric, 10] Type the series number that has been defined for the particular stock code.
Start #	[Conditional, Numeric, 10] Type the start number. The stock item is ordered from this value onwards.
End #	[Display] This column displays the end number of the series. The end number is calculated and generated by the system depending on the quantity and the start number specified. For example, If Quantity = 100 and Start No = 50 Then End No = 149

Column Name	Description
Total	<p>[Display]</p> <p>This column displays the total, based on the denomination and quantity specified.</p> <p><i>Total = Denomination + Quantity</i></p> <p>For example,</p> <p>If Denomination = 100 and Quantity = 20 Then Total = 2000</p> <p>Only stock or inventory items tracked denomination wise will have an Adjustment Total value.</p>
Confirm (y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y to confirm the physical receipt of either full or partial stock.</p> <p>By default, the system displays the value as N.</p> <p>If the stock is received in partial, the user will need to modify the quantity field, to reflect the quantity actually received.</p> <p>The stock level will not be updated at inventory till the confirmation flag is set to Y.</p>
Delete(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y if you want to delete the particular stock item from the list.</p> <p>By default, the system displays the value as N.</p>

Issue Stocks

Field Description

Field Name	Description
Request No.	[Mandatory, Pick List] Select the request number, for which purchase order is placed, from the pick list. The pick list displays only those request numbers against which full orders or partial orders are placed.
Issued To	[Mandatory, Drop-Down] Select the appropriate bank or branch, for which the inventory bank had placed the request for stock, from the drop-down list.
Date of Issue	[Mandatory, Pick List, dd/mm/yyyy] Select the date of issue from the pick list.

Column Name	Description
Srl No.	[Display] This column displays the system generated serial number for each stock item in the list.
Request id	[Display] This column displays the request ID for each stock item in the list.
Stock catalog Code	[Display] This column displays the stock catalogue code of the stock or the inventory item for which the request order is placed.
Denm.	[Display] This column displays the denomination value of the requested stock.
Qty req.	[Display] This column displays the quantity of stocks. In case of partial receipt for the stock request, the user can modify the original values to reflect the received stock values. The quantity can be reduced from the original requested but cannot be increased. For example, 50 units of banker's cheque. It can be 50 leaves or booklets of banker's cheque.
Series #	[Display] This column displays the series number that has been defined for the particular stock code received.
Start #	[Display, Numeric, Seven] Type the start number, from which a stock item is received.
End #	[Display] This column displays the end number of the series. The end number is calculated and generated by the system depending on the quantity and the start number specified. For example, If Quantity = 100 and Start No = 50 Then End No = 149

Column Name	Description
Total	<p>[Display]</p> <p>This column displays the total, based on the denomination and quantity specified.</p> <p><i>Total = Denomination * Quantity</i></p> <p>For example,</p> <p>If Denomination = 100 and Quantity = 20 Then Total = 2000 Only stock or inventory items tracked denomination wise will have an Adjustment Total value.</p>
Confirm(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y to confirm the physical issue of stock either in full or partial.</p> <p>By default, the system displays the value as N.</p> <p>If the stock is issued in partial, the user will need to modify the quantity field, to reflect the quantity actually issued.</p> <p>The stock level will not be updated at the issue bank/branch till the confirmation flag is set to Y.</p>
Delete(y/n)	<p>[Toggle]</p> <p>Click the toggle status to change the value to Y if you want to delete the particular stock item from the list.</p> <p>By default, the system displays the value as N.</p>

6. Enter the required information in the various fields.
7. Click the **Ok** button.
8. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **Ok** button.
9. The stock transaction details are added once the record is authorised.

Note: Click **Add** button to add request stocks.

IV002 - Stock Adjustment

Using this option you can adjust/amend the stock status to reflect the correct position of instruments that have been canceled, returned, torn, lost in transit, etc.

Other than the issue and use of stock status for everyday transactions, the teller or vault teller can maintain other statuses such as Rejected, Torn, Canceled, Lost/Misplaced, etc. to indicate the position of stocks in hand. E.g. The Central Inventory department required USD traveler's cheque of denomination 100. However the supplier issued INR traveler's cheque of denomination 100 that were marked as received. This traveler's cheque can be marked as rejected.

Stock adjustment will be allowed to the teller who have TIL linked to it and the status will be updated in the TIL accordingly. The 'To Teller' to whom the transfer is made should also have TIL linked.

Definition Prerequisites

- IV001 - Stock Transactions

Modes Available

Not Applicable

To adjust the balance stock

1. Type the fast path **IV002** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Inventory > Stock Adjustment**.
2. The system displays the **Stock Adjustment** screen.

Stock Adjustment

Field Description

Field Name	Description
Stock Code	[Mandatory, Drop-Down] Select the stock code, for the stock, or the inventory item you want to make adjustment to, from the drop-down list.
Denomination	[Conditional, Pick List] Select the denomination code, for the stock code being transferred, from the pick list. The denomination needs to be selected for inventory items such as traveler's check, etc. which are tracked.

Field Name	Description
Type of Adjustment	<p data-bbox="553 268 842 296">[Mandatory, Drop-Down]</p> <p data-bbox="553 310 1179 338">Select the type of adjustment from the drop-down list.</p> <p data-bbox="553 352 1268 380">It is the status the user wants to amend the inventory item to.</p> <p data-bbox="553 394 745 422">The options are:</p> <ul data-bbox="594 447 1328 1768" style="list-style-type: none"> <li data-bbox="594 447 1328 569">• Cancelled: A teller can mark a reversed banker's cheque issue transaction as Cancelled. Since the instrument has already been marked as Used, the system does not update the status of the instrument. <li data-bbox="594 590 1328 737">• Duplicate: If a customer reported a TD certificate as lost and has a duplicate issued, the teller can mark it as duplicate. Since the original certificate has already been marked as Used, the system does not update the status of the instrument. <li data-bbox="594 758 1328 821">• Found: If a branch is able to locate the lost inventory item, it is marked as Found. <li data-bbox="594 842 1328 905">• Lost: During the receipt, if an inventory item is found lost, it is marked as Lost. <li data-bbox="594 926 1328 1068">• Returned: When an inventory item is returned on an account that it is above the excess level, it is marked as Returned. For example, excess inventory at branch level for stock code A is 100 units. Branch Z holds 102 units. Branch Z will mark 2 units of stock A as Returned. <li data-bbox="594 1089 1328 1152">• Intra Branch Transfer: If this option is selected, transfer between Tellers of same branch is allowed. <li data-bbox="594 1173 1328 1236">• Torn: If a check book is found to be torn after receipt, the teller can mark it as Torn. <li data-bbox="594 1257 1328 1341">• Used: If the instrument serial number is wrongly entered during an offline transaction, then the actual instrument number used can be updated with the used status. <li data-bbox="594 1362 1328 1535">• Rejected: If a stock item is not issued as per the request order it can be rejected. For example, if the central inventory department requested USD TC of denomination 100, and the supplier issued INR TC of denomination 100 that were marked as received, then these TCs can be marked as rejected. <li data-bbox="594 1556 1328 1619">• Destroyed: This status is marked by HO when inventory supplied by supplier is not in good order. <li data-bbox="594 1640 1328 1703">• Voided: This status is marked by branches when inventory supplied by supplier is not in good order. <li data-bbox="594 1724 1328 1768">• Returned by Customer: This option can be used if the customer wants to return the cheque.

Field Name	Description
Adjustment Date	<p>[Mandatory, Pick List, dd/mm/yyyy]</p> <p>Select the appropriate date of adjustment from the pick list.</p> <p>By default, this field displays the current posting date as date of adjustment.</p>

Series Number	<p>[Mandatory, Numeric, 12]</p> <p>Type the series number of the stock to be adjusted.</p>
Start Number	<p>[Mandatory, Numeric, 10]</p> <p>Type the start number in the stock series.</p> <p>The stock has to be transferred from this number onwards.</p>
End Number	<p>[Display]</p> <p>This field displays the end number of the series.</p> <p>The end number is calculated and generated by the system, depending on the quantity and the start number specified.</p> <p>For example,</p> <p>If Quantity = 100 and Start No = 50</p> <p>Then End No = 149</p>

Field Name	Description
Adjustment Total Value	<p>[Display]</p> <p>This field displays the adjustment total value, based on the denomination and quantity specified.</p> <p>Adjustment Total Value = Denomination + Quantity</p> <p>For example,</p> <p>If Denomination = 100 and Quantity = 20</p> <p>Then Adjustment Total value = 2000</p> <p>Only stock or inventory items tracked denomination wise will have adjustment total value.</p>
Reason For Adjustment	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the reason for adjusting the stock or the inventory item.</p>

3. Select the stock code from the drop-down list.
4. Enter the required information in the various fields.

Stock Adjustment

The screenshot shows the 'Stock Adjustment*' application window with the following fields and values:

- Stock Code: Bankers Cheque
- Type of Adjustment: Cancelled
- From Branch: Centras
- To Branch: (empty)
- Adjustment Quantity: 100
- Series Number: 201
- Start Number: 150
- Adjustment Total Value: (empty)
- Reason For Adjustment: cheque lost
- Denomination: (empty)
- Adjustment Date: 31/01/2008
- From User: API_SUPER
- To User: (empty)
- End Number: 249

At the bottom of the window, there is a navigation bar with buttons for 'UDF', 'OK', 'Close', and 'Clear'. Below the navigation bar, there is a list of categories: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, and Travellers Cheque.

6. Click the **OK** button.
7. The system displays the "Authorization Required. Do You Want to continue?" message. Click the **OK** button.
8. The system displays the **Authorization Reason** screen.
9. Enter the required information and click the **Grant** button.
10. The system displays the message "Stock Adjustment Completed Successful". Click the **OK** button.

Note: For information on **Authorisation** transactions, refer to the ***FLEXCUBE Introduction User Manual***.

IV011 - Stock Inquiries

Using this option you can perform several inquiries to assist in tracking inventory items or stock. Inquiries can be performed at the following levels:

- Central Inventory Department: Branch details related to the central inventory department and the branch can be viewed
- Branch Level: Only branch level details can be viewed
- Teller Level: Only teller level details can be viewed

Three types of Inquiries that aid in inventory tracking are:

- Indent Requests Status
- Balance on hand
- Stock Transactions

Definition Prerequisites

- IV001 - Stock Transactions

Modes Available

Not Applicable

To inquire on stock

1. Type the fast path **IV011** and click **Go** or navigate through the menus to **Transaction Processing > Internal Transactions > Inquiries > Stock Inquiries**.
2. The system displays the **Stock Inquiries** screen.

IV005 - Inventory PIN Maintenance

This option is used for inventory PIN maintenance. The screen maintains the PIN of passbook and CD, assigns the initial PIN, register, reset, unlock and change the PIN etc.

Definition Prerequisites

- 8053 - Customer Addition
- IVM01 - Stock Codes
- IVM10 - Multi Currency Package - Stock Code Cross Reference
- Inventory linked to a CASA, RD or TD account

Modes Available

Not Applicable

To maintain the inventory PIN

1. Type the fast path **IV005** and click **Go** or navigate through the menus to **Global Definitions > Master > Inventory PIN Maintenance**.
2. The system displays the **Inventory PIN Maintenance** screen.

Inventory PIN Maintenance

The screenshot shows the Oracle Inventory PIN Maintenance screen. The window title is "Inventory Pin Maintenance*". The interface includes a search section with the following fields:

- Search Criteria: [Dropdown]
- Search String: [Text]
- ID: [Text]
- IC: [Text]
- Full Name: [Text]
- Action: [Dropdown]
- Stock Code: [Text]
- Inventory No.: [Text]
- PIN Status: [Text]
- Initial Pin: [Text]

At the bottom of the screen, there is a navigation bar with the following tabs: Card, Change Pin, Cheque, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, Service Charge, Signature, and Traveller Cheque. Below the tabs are buttons for UDF, OK, Close, and Clear.

Field Description

Field Name	Description
Search Criteria	<p>[Mandatory, Drop-Down]</p> <p>Select the search criteria, to search for the customer, from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Customer short name • Customer IC- Identification criteria (IC) • Customer ID
Search String	<p>[Mandatory, Alphanumeric, 20]</p> <p>Type the search string corresponding to the search criteria selected.</p> <p>This field list out all customers that were found to be matching the value entered in the search string corresponding to the option chosen in the search criteria.</p> <p>If the search criterion is specified as customer's short name or IC then any of the letter(s) of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list.</p> <p>For example, The customer's short name is George Abraham. One can search the above customer by entering 'Geo' in the search string field.</p>
ID	<p>[Display]</p> <p>This field displays the customer ID of the selected customer.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
IC	<p>[Display]</p> <p>This field displays customer IC of the selected customer.</p> <p>A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.</p>
Full Name	<p>[Display]</p> <p>This field displays the full name of the selected customer.</p>

Field Name	Description
Inventory No.	<p>[Mandatory, Pick List]</p> <p>Select the inventory number from the pick list.</p> <p>The pick list displays all the inventories having 'Password Applicable' attribute as true which are issued to the selected customer.</p>
Stock Code	<p>[Mandatory, Pick List]</p> <p>Select the stock code for the inventory being reported as lost from the pick list.</p> <p>Stock code is a manually generated unique number, which enables the bank to track the inventory. A stock code has to be unique in the system.</p>
PIN Status	<p>[Display]</p> <p>This field displays the PIN status of the selected inventory.</p> <p>If the inventory selected doesn't have any PIN, PIN status will be displayed as 'No PIN'.</p>
Action	<p>[Mandatory, Drop-Down]</p> <p>Select the action to be done related to the PIN for the selected inventory from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Register PIN • Reset PIN • Unlock PIN • Change PIN • Assign Initial PIN
Initial PIN	<p>[Conditional, Alphanumeric, 20]</p> <p>Type the initial PIN for the selected inventory.</p> <p>This field is enabled if Action is selected as Assign Initial PIN.</p>

3. Select the search criteria from the drop-down list.
4. Type the search string and press the **<Tab>** key. The system displays a list of customer's that match the search criterion.
5. Select the customer from the pick list. The customer details are displayed in the screen.
6. Select the action from the drop-down list.
7. Enter the other required information.

IVM10 - Multi Currency Package - Stock Xref

Using this option, user can make the cross reference between multi currency package and stock code. While issuing inventory to the MCA or account, system will check that cross reference is maintained between the multi currency package and stock code. If the cross reference is not maintained, system will not allow to issue the inventory to the MCA opened under that multi currency package or issue an inventory to the account opened under the MCA which is linked to the multi currency package. To allow inventory issuance, facility should be made available in the product master as well there should exist the MCA package and stock code cross reference.

Note: Multi currency account will be opened under multi currency package and account will be opened under MCA.

Definition Prerequisites

- CHM01 - CASA Product Master Maintenance
- TDM01 - TD Product Master
- MCA01 - Multi Currency Package Definition

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add stock code details for cross reference

1. Type the fast path **IVM10** and click **Go** or navigate through the menus to **Global Definitions > Master > Multi Currency Package - Stock Xref**.
2. The system displays the **Multi Currency Package - Stock Xref** screen.

MCA80- Inquiry of Sold / Issued Inventory

Using this screen user can Inquire about Sold / Issued Inventory based on either Account Number or Stock Number. In case account no option is chosen, all the fields except stock number will be enabled. Stock number field will be disabled. If stock no option is chosen, all the fields except stock number will be disabled. Stock number field will be enabled in this case. The grid displays stock code, description, stock status and linked (Y/N) along with the account details. If more than one certificate (replaced and issued status) were linked to deposit, then the user can inquire about details of both the certificates. If stock is sold to non customer, then only stock details will be displayed. Account related columns will remain blank. Linked column will have value 'N' for sold inventory.
