POS

With the advent of POS cash transactions are getting minimized. This has done away with the hassle of handling cash at the merchant establishment. The transaction can be concluded with exact amount up to decimal points. Acceptance of POS is growing every day. All this makes POS an important deliver channel.

POS01 - POS Acquirer POS Id Maintenance

Each POS (Point of Sale) is logically attached to a dummy account in some branch (originating branch) in **FLEXCUBE**. Every POS in the POS network of a Bank has two POS IDs (Card Acceptor terminal ID and Card Acceptor ID code), which uniquely identify the POS.

Using this option, you can facilitate the cross-reference between the POS IDs, dummy account and the POS branch. Also, every forwarder (VISA/Master Card), which the bank interfaces with, has to be configured through the **POS Acquirer POS Id Maintenance** option.

Definition Prerequisites

- BAM03 - Branch Master Maintenance

Other Prerequisites

- GL Codes should be defined

Modes Available

Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.
